COTTCO UNIVERSAL—THE ADAPTABLE INDEX—INSTRUCTIONS

Permits of Separately Grouping Common or Frequently Occurring Family Names or Surnames and Active Associations, Corporations, Firms, Etc. Comprehensive Table Designate the Page on Which All Other Groups Must Start According to the First Letters of Surname or First Letters of First Principal Word in Corporation or Firm Names.

1. COTTCO UNIVERSAL INDEXES are made up of independent units. A Unit consists of a quantity of sheets, variously paged from 1 up, and Sub-Index sheets on which are printed Index Tables as a guide to where names falling to that unit will be entered and found. Blocks are provided on the Sub-Index sheets to write certain names and indicate the page on which they are separately grouped. Each unit is designated by an alphabetical tab.

2. Separately grouped names, called "Set Out Names," are those most frequently occurring. Do not fail to take full advantage of this feature. Determine as far as possible at the time this Index is started, all names that should, because of their frequent entry on the records to which this is an index, be "separately grouped." Bear in mind that the Index will continue as a current set for years to come. Each name "separately grouped" reduces the size of the "mixed names groups". Cotton No. 2-S starts in not less than 2 volumes, concludes in 6 volumes. Each volume contains 510 pages (276 sheets). 250 sheets are taken for "Mixed Names groups". We provide pages for at least 20 set out names by pasting 10 sheets of each unit beyond these required for mixed names, but to take full advantage of this feature, the typical unit should run more sheets and separately group 125 to 150 names in each set of A to K and L to Z indexes.

3. Write "Set Out Names" in the correct ruled block according to the large alphabet divisions on the proper Sub-Index sheet. Assign the first "Set Out" name of each unit to the page designated on Sub-Index sheet to that unit. Give to each name an entire sheet (two pages). Establish all other "Set Out Names" on succeeding pages or which would be odd numbered right hand pages, disregarding alphabetical arrangement. When all the extra sheets in each book have been used, either for "Set Out Names" or as added sheets for the continuance of "Set Out Name" groups, or "Mixed Name" groups, purchase additional sheets and binders and grow or expand the books until each unit has become a separate volume.

4. Fill up column 1 of correct ruled block first with "Set Out Names." Then column 2 and so fo.

5. "Set Out Names" to be given together all the given names. Not common names like Smith, Jones, Brown, etc., may be subdivided by given initials on the Sub-Index and assigned four or more sheets, as Smith, A to D, Smith, E to J, Smith, K to O, Smith, P to Z.

6. SEPARATE GROUPS should be made of (1) Banks, Board Trustees, Colleges, Boards of Education, etc. (2) Churches. (3) Courts. (4) Federal, Postoffice, Customs, and any others that might be better indexed and found if classified under general heads and grouped together as a separate group. When an individual name appears on all court calendars in the proper book as one name, then a group of names appears on all court calendars in the proper book as one name, then a group of names appears on all court calendars under Richard, Robert, Thomas, etc., as 6 sheets of Richard, and another 6 sheets of Robert, and five sheets under Thomas, and so forth. Or, if the 6 sheets of Richard, and another 6 sheets of Robert, and 5 sheets of Thomas, are found to be a page in the 6 units, and 2 sheets in proper block on 3 sub-index sheets under Richard, Robert, etc.) Index Letters in Sub-Index sheets, (4) Or subdivide court names into Colleges and Schools, Federal, Postoffice, Customs, and Others, Federal, Postoffice, Customs, and Others, Federal, Postoffice, Customs, and Others

COTTCO UNIVERSAL—THE ADAPTABLE INDEX—INSTRUCTIONS

Permits of Separately Grouping Common or Frequently Occurring Family Names or Surnames and Active Associations, Corporations, Firms, Etc. Comprehensive Tables Designate the Page on Which All Other Groups Must Start According to the First Letters of Surname or First Letters of First Principal Word in Corporation or Firm Name.

1. COTTCO UNIVERSAL INDEXES are made up of independent units. A Unit consists of a quantity of sheets, regularly paged from 1 up, and Sub-Index sheets on which are printed Index Tables as a guide to where names falling to that unit will be entered and found. Blocks are provided on the Sub-Index sheets to write certain names and indicate the page on which they are separately grouped. Each unit is designated by an alphabetical tab.

2. Separately grouped names, called "Set Out Names," are those most frequently occurring. Do not fail to take full advantage of this feature. Determine as far as possible at the time this index is started, all names that should, because of their frequent entry on the records to which this is an index, be "separately grouped." Bear in mind that the index will continue as a current set for years to come. Such names "separately grouped" reduces the size of the "mixed name groups". Cottco No. 3-S starts in and less than 2 volumes, considers in 6 volumes. Each volume contains 500 pages (376 sheets). 500 sheets are paged for "Mixed Name groups". We provide pages for at least 20 set out names by paging 10 sheets of each unit beyond those required for mixed names, but to take full advantage of this feature, the Indexer should page more sheets and separately group 125 to 150 names in each set of A to K and L to Z Indexes.

3. Write "Set Out Names" in the correct ruled block front with "Set Out Names." Then column 2 and so on.

4. Fill in columns 1 of correct ruled block front with "Set Out Names." Then column 2 and so on.

5. A "Set Out Name" is one group regardless of its given name. But common names like Smith, Jones, Brown, etc., may be sub-divided by given initials on the Sub-Index sheet and assigned four or more different sheets, as Smith, A to D, Smith, E to J, Smith, K to O, Smith, P to Z.

6. SPECIAL GROUPS should be made of (1) Schools, School Trustees, Colleges, Boards of Education, (2) Churches, Church Boards, (3) Cemeteries, (4) Lodges, Fraternities, Societies, and any others that should be better indexed and found if classified under general heads, and grouped together as a department. When an indexer makes references and all names found in the records are entered in Cottco, a Firm publishes sheets. For example write "Schools, School Trustees, etc., on 5 sub-sheets and number 10 to a page in the 5 unit, and in corner block on 5 sub-sheet, same write Schools or Trustees (any heading, style) on C sub-index sheet under Cottco Tab Subject C. 1 unit number 5 sub-sheet number 10 to a page. Under "Churches, Church Boards, Cemeteries, etc." write "Churches" on the 3 unit number 5 sub-sheet number 10 to a page.

7. Begin "Mixed Names" on the next sub-sheet of Index Book succeeding an entry of a "Set Out Name." Refer from the other line on the sheet where further publication. For example if in the Table for Mixed Names designates page 1 for As, Ab, Ac, Ad, etc., and the first names to be entered (not a set out) is Adler, write it on first line of page 1, Aarons on second line, Asher on third line, and so on. It will be noted that the figures in the table run 1, 2, 3, 4, 5, etc., this means each group to be started on the right hand or odd numbered page. The group is continued on the back of sheet, left hand or even numbered page, and when both sides of a numbered sheet are filled on, insert an unnumbered or extra sheet immediately following the sheet that is filled up and number it, (preferably in red ink), the same even number on both sides of the sheet as appears on the last listed page of the point inserted. It can be seen that any number of sheets can be added for the accommodation of a group, and in addition to the even page number that you put on both sides of the sheet, we suggest the lettering of each added sheet A, B, C, D, etc.

8. Should a name develop large after it was begun as a "Mixed Name," rewrite the sheet on sheets and make "Set Out Name" groups of the names that have developed heavy.

9. Many names that are spelled differently and pronounced alike, such as Schaffer-Shaffer-Shaeffer, Lowry-Lowrey-Lowrie, Pierce-Pearce, Read-Reed-Reid, Detwiler-Detweiler, etc., are grouped together by the Key Tables for Mixed Names. No indexer below will have trouble in so combining in such manner all such names. All those the member may have to refer to differently, and will readily see as to how name is spelled. "Set Out" names similar in sound should be combined in the manner most used the different ways of spelling noted in proper alphabet divisions.

10. This Index is not commercial, but there is one right way to start. If in doubt write to our Factories and Markets, THE COTT PRINTING & INDEX CO., COLUMBUS, OHIO.

11. When additional sheets and blanks are required to expand the index, or when new, revised sheets or any other supplies are needed, order them of the firm named below. Refer to the Unit you have indexed. By so doing you will be sure to get supplies correct to every respect.

Raleigh

CERTIFICATE OF AUTHENTICITY

This is to certify that the microphotographs appearing on this reel are true and accurate reproductions of the records listed on the target (title) sheet preceding each volume or series of records microfilmed hereon; that the records were microfilmed on the date and at the reduction ratio indicated; and that on the date of microfilming, the records were in the custody of the official or other individual listed on the target sheet(s).

It is further certified that the records listed on the aforesaid target sheet(s) were microfilmed in conformity with the provisions of Sections 8-45.1 - 8-45.4, General Statutes of North Carolina; and that in order to insure archival quality and authentic reproduction of records filmed, they were microfilmed in the manner prescribed, and with equipment and film approved, by the State Department of Archives and History.

COTTCO UNIVERSAL—THE ADAPTABLE INDEX—INSTRUCTIONS

Permits of Separately Grouping Common or Frequently Occurring Family Names or Surnames and Active Associations, Corporations, Firms, Etc. Comprehensive Tab Designate the Page on Which All Other Groups Must Start According to the First Letters of Surname or First Letters of First Principal Word in Corporation or Firm Name.

1. COTTCO UNIVERSAL INDEXES are made up of independent units. A Unit consists of a quantity of sheets, regularly spaced from 1 up, and Sub-Index sheets on which are printed Index Tables as a guide to where names falling in that unit will be entered and found. Blanks are provided on the Sub-Index sheets to write certain names and indicate the page on which they are separately grouped. Each unit is designated by an alphabetical tab.

2. Separately grouped names, called "Set Out Names," are those most frequently occurring. Do not fail to take full advantage of this feature. Determine as far as possible at the time this Index is started, all names that should, because of their frequent entry on the records to which this is an Index, be "separately grouped." Bear in mind that the Index will continue as a current aid for years to come. Each name "separately grouped" reduces the size of the "mixed names groups". Cotter No. 2-S starts in not less than 3 volumes, combines to 1 volumes. Each volume contains 500 pages (250 sheets). 500 sheets are passed for "mixed Names groups." We provide pages for at least 20 set out names by pasting 10 sheets of each unit beyond those required for mixed names, but to take full advantage of this feature, the Indexer should page were sheets and separately group 151 to 160 names in each set of A to K and L to Z Indexes.

3. Write "Set Out Name" in the correct ruled block according to the large alphabet divisions on the proper Sub-Index sheet. Index the first "Set Out" name of each unit to the page designated on Sub-Index sheet to that unit. Give to each name an entire sheet (two pages). Establish all other "Set Out Names" on succeeding pages or what would be odd numbered right hand pages, thereafter alphabetical sequence. When all the extra sheets in this book have been used, either for "Set Out Names" or as added sheets for the maintenance of "Set Out Name" groups, or "Mixed Name" groups, purchase additional sheets and Indexes and grow or extend the books until each unit has become a separately volume.

4. Fill up column 1 of unused ruled blocks of Sub-Index with "Set Out Names." Then column 2 and so in.

5. A "Set Out Name" to any group regardless of its given name. Set opposite names like Smith, Jones, Rogers, etc., may be subdivided by given initials on the Sub-Index and assigned four or more different sheets, as Smith, A to D, Smith, E to J, Smith, K to O, Smith, P to Z.

6. SPECIAL GROUPS should be made of (1) Schools, Schools, Colleges, Boards of Education, etc. (2) Churches, Church Boards, (3) Cemeteries, (4) Lodges, Fraternities, Societies, and any others that relate to "mixed names" and think of classified under general heads, and grouped together on a dedicated page. When an Indexed Entry references and all other references to proper blocks on Sub-Index sheets. (1 Schools, Colleges, Boards of Education, School Trustees, etc., on 2 sub-Index sheet, and entries it to a page in the 2 unit, and to proper block on 2 sub-Index sheet write Boards of Education, Boys School, etc.) on 3 sub-Index sheet write Churches (and Baptist, Methodist, Presbyterian, etc.) on 3 sub-Index sheet write Cemeteries, (and Lakeside, etc.) on 4 sub-Index sheet, and set 17 sub-Index sheet write Societies, (and Lodges, etc.)

7. Enter "Mixed Names" on the page designated by Index Table appearing on proper Sub-Index sheet. Write them like this on the sheets without further subdivision. For example, if the Key Table for Mixed Names designates page 1 for As, Ah, Ar, Ad, etc., and the first name to be (not a set out) is Adler, write it on first line of page 1. Assume on second line, Asher; on third line so on. It will be noted that the figures in the table run 1, 2, 3, 4, 5, 6, etc., this means each page started on the right hand or odd numbered page. The group is continued on the back of sheet (page or even numbered page, and when both sides of a numbered sheet are filled up, turn to an unbound or extra sheet immediately following the sheet that is filled up and number it (unnumbered ink), the same page number on both sides of the sheet as currently on the left hand the pasted inserted. It can be seen that any number of sheets can be added for the enlargement group, and in addition to the even page number that you put on both sides of the sheet, you the lettering of each added sheet A, B, C, D, etc.

8. Should a name develop large affair to was begun as a "Mixed Name," provide the sheets and make "Set Out Name" groups of the names that have developed large.

9. Many names that are spelled different ways and sounded alike, such as Schaffer-Shaffer, Lowery-Lowrey-Lowrie, Pierce-Pearce, Reid-Read-Reed, Roberts-Robertson, etc., are usually gather by the Key Tables for Mixed Names. No uniform index will below combine to an entire sheet. All such names. At times the number may have to refer to different pages when such as to how names is spelled. "Set Out" names whether to spread should be assigned to the proper the different ways of spelling noted in proper alphabet divisions.

10. This Index is not complicated, but there is one right way to start. If in doubt write Publishers and Makers, THE COTT PRINTING & INDEX CO., COLUMBUS, OHIO.

11. When additional sheets and blanks are required to extend the set, or when part of sheets or any other supplies are needed, order sheet of the form named below, and state in the best judgment. By so doing you will be sure to get supplies suitable for your purpose.

COTTCO UNIVERSAL—THE ADAPTABLE INDEX—INSTRUCTIONS

Permits of Separately Grouping Common or Frequently Occurring Family Names or Surnames and Active Associations, Corporations, Firms, Etc. Comprehen

Designate the Page on Which All Other Groups Must Start According to the First Letters of Surname or First Letters of First Principal Word in Corporation or Firm

1. COTTCO UNIVERSAL INDEXES are made up of independent units. A Unit consists of a number of sheets, regularly ruled from 1 up, and Sub-Index sheets on which are printed Index Tables or a guide to where names falling in that unit will be entered and found. Blanks are provided on the Sub-Index sheets to write certain names and indicate the page on which they are separately grouped. Each unit is designated by an alphabetical tab.

2. Separately grouped names, called "Set Out Names," are those most frequently occurring. Do not fail to take full advantage of this feature. Determine as far as possible at the time this Index is started, all names that should, because of their frequent entry on the records to which this is an Index, be "separately grouped." Bear in mind that the Index will continue as a current set for years to come. Each separately grouped name has the size of the "mixed names groups", Cotton No. 2-3 starts in not less than 3 volumes, numbered in 3 columns. Each volume contains 250 pages (375 sheets). 250 sheets are prepared for "Mixed Names groups". We provide paper for at least 20 set out names by paging 10 sheets of each unit beyond those required for mixed names, but to take full advantage of this feature, the Indexer should page more sheets and separately group 125 to 150 names in each set of A to K and L to Z Indexes.

3. Write "Set Out Names" in the correct ruled block according to the large alphabet division on the proper Sub-Index sheet. Assign the first "Set Out" name of each unit to the page designated on Sub-Index sheet to that unit. Give to each names an entire sheet (two pages), blocklist all other "Set Out Names" as regularly as names or what would be old numbered right-hand pages, disregarding alphabetical sequence. When all the extra sheets in this unit have been used, or allotted for "Set Out Names" or as added sheets for mixed names groups, or "Set Out Names" groups, as needed, start additional sheets and blocks and grow or expand the Index until each unit has become a separate volume.

4. Fill up column 1 of correct ruled block first with "Set Out Names." Then column 2 and so on.

5. A "Set Out Name" is any group regardless of its given name, that is known like Smith, Johnson, etc., may be subdivided by given initials, as the Sub-Index and ruled sheet or more different sheets, as Smith, A to D, Smith, E to J, Smith, K to O, Smith, P to Z.

6. SPECIAL GROUPS should be made of (1) Schools, School Trustees, Courses, Boards of Education, etc. (2) Churches, Church Boards, (3) Cemeteries, (4) Lodges, Fraternities, Societies, and any others that should be handled under special or classified headings, and grouped together on a Sub-Index sheet and ruled sheet of classified headings, and grouped together on un-numbered pages. When an individual makes reference and all group references in the proper block on numbered pages. When an individual makes reference and all group references in the proper block on numbered pages. When an individual makes reference and all group references in the proper block on

COTTCO UNIVERSAL—THE ADAPTABLE INDEX—INSTRUCTIONS

Permits of Separately Grouping Common or Frequently Occurring Family Names or Surnames and Active Associations, Corporations, Firms, Etc. Comprehensive Tables to Designate the Page on Which All Other Groups Must Start According to the First Letters of Surname or First Letters of First Principal Word in Corporation or Firm Name.

1. COTTCO UNIVERSAL INDEXES are made up of independent units. A Unit consists of a quantity of sheets, separately paged from 1 up, and Sub-Index sheets on which are printed Index Tables as a guide to where names falling in that unit will be entered and found. Blocks are provided on the Sub-Index sheets to write certain names and indicate the page on which they are separately grouped. Each unit is designated by an alphabetical tab.

2. Separately grouped names, called "Set Out Names," are those most frequently occurring. Do not fail to take full advantage of this feature. Determine as far as possible at the time this Index is started, all names that should, because of their frequent entry on the records to which this is an Index, be "separately grouped." Bear in mind that the Index will continue as a current one for years to come. Each name "separately grouped" reduces the size of the "mixed name groups". Cottco No. 3-S starts in issue "separately grouped" reduces the size of the "mixed name groups". Cottco No. 3-S starts in issue not less than 2 volumes, sometimes to 3 volumes. Each volume contains 500 pages (375 sheets). 250 sheets are used for "Mixed Name groups". We provide space for at least 50 set out names by paging 10 sheets of each unit beyond those required for mixed names, but to take full advantage of this feature, the Indexer should pages more sheets and separately group 125 to 150 names in each set of A to K and L to Z Indexes.

3. Write "Set Out Names" in the correct ruled block according to the large alphabet division on the proper Sub-Index sheet. Assign the first "Set Out" name of each unit to the page designated on Sub-Index sheet in that unit. Give to each name an index sheet (two pages). Establish all other "Set Out Names" on succeeding pages or what would be odd numbered right hand pages, designating alphabetical sequence. When all the extra sheets in the book have been used, either for "Set Out Names" or as added sheets for the enlargement of "Set Out Names" groups, "Mixed Name" groups provide additional sheets and binders and grow or expand the books until each unit has become a complete volume.

4. Fill up column 1 of correct ruled block first with "Set Out Names," then column 2 and so in.

5. A "Set Out Name" is one group regardless of its given name. Put remaining names like Smith, Jones, Brown, etc., may be subdivided by given initials on the Sub-Index and assigned four or more different sheets, as Smith, A to D, Smith, E to J, Smith, K to O, Smith, P to Z.

6. SPECIAL GROUPS should be made of (1) Schools, Select Trustees, Colleges, Boards of Missions, etc. (2) Churches, Church Boards, (3) Cemeteries, (4) Lodges, Fraternities, Societies, and any others that relate to lodges, lodge halls, lodge supplies, lodge insurance bonds, and general matters on a lodge select page. When an indexed name references and all group pages, in the proper sequence on Sub-Index Group A, First Lodge, Second Lodge, etc. Sub-Index group write Schools, Select Trustees, etc. If sub-Index sheets, and so on. If it is a page to the S Book, and to proper block on S sub-Index sheet write Leader of Schools (see Schools, etc.); on C sub-Index sheet write College (see Schools, etc.); on C sub-Index sheet write Collegiate (see Schools, etc.); on C sub-Index sheet write Cemetery (see Cemeteries, etc.); on C sub-Index sheet write Protection, (see Lodges, etc.) and so forth. If on T, sub-Index sheet, and on P sub-Index sheet write Publishers, (see Publishers, etc.).

7. Indexing Hints. Be the most discriminating in assigning Sub-Index groups. Make them large enough to be the source primary further subdivision. For example, if the Key Table for Mixed Names designates page 1 for An, Ab, Ac, Ad, etc., and the first names to be entered (not a set out) is *Adler*, write it on first line of page 1. Assume on second line, Asher (a third line, and so on. It will be noted that the figures in the tables run 1, 2, 3, 4, 5, etc. this means each group to be started on the right hand or odd numbered page. The group is continued on the back of sheet, left hand or even numbered page, and when both sides of a sheet are filled out, insert an extra sheet or extra sheet immediately following the sheet that is filled up and number it, (usually in red ink), the same even number on both sides of the sheet as appears on the left hand page of the point inserted. It can be seen that any number of sheets can be added for the accommodation of a group, and in addition to the even page number that you put on both sides of the sheet, we suggest the lettering of each added sheet A, B, C, D, etc.

8. Should a name develop large after it was begun as a "Mixed Name," provide the sheet or sheets and make "Set Out Name" groups of the names that have developed large.

9. Many names that are spelled differently and pronounced alike, such as Schaffer-Shaffer, Lowery-Lowrey-Lowrie, Fierce-Pierce, Reed-Read, Dalton-Daulton, etc., should be grouped together by the Key Tables for Mixed Names. By modern Index will bring together in an alphabetical manner all such names. At times the member may have to refer to different areas when different spellings as to how name is spelled. "Set Out" names similar in sound should be entered in the same group and the different ways of spelling noted in proper alphabetical division.

10. This Index is not complete, but then is one right way to start. If in doubt write [illegible] Palestine and [illegible], THE COTT PRINTING & INDEX CO., GOLDSMITH, OHIO.

11. When additional sheets and binders are required to expand the unit, or when new [illegible] chasely or any other supplies are needed, order them of the firm named below, and [illegible] best interests. By so doing you will be sure to get similar sheets to your [illegible]

Walker, Evans & [illegible]
Charleston
