NEW PIANO FORTE WAREROOMS.

6, 6½, 6¾, 7, & 7¼ octave Piano Fortes can be bought at this Store, for Cash, at a less price than can be found in Hartford, Boston, or New York, or even the Factory prices, and no humbug. Just call and satisfy yourselves, and understand they are all **WARRANTED**.

Having enlarged this well known Music Store more than twice its former size, and bought from all the most favorite and celebrated makers, **TWENTY PIANO FORTES**, from Boston, Albany and New York, we can safely say that this is the largest, best, and cheapest Music Store in Connecticut.

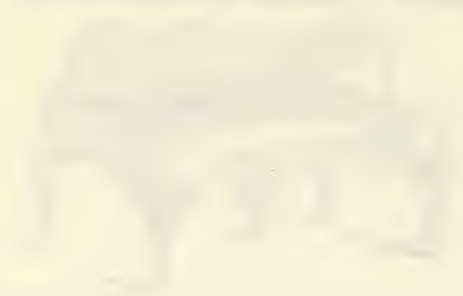

MELODEONS?

Fifty new model Melodeons, made by the celebrated inventors and patentees Carhart & Needham, which are generally admitted by all the best musicians in this Country, to be the best in the world, for sale or to rent, in city or country; if bought, the rent deducted.

4, 4½, 5, 6, & 7 Octave Melodeons.—Last year we sold about \$12,000 worth, and the sale of Prince & Co's is fairly stopped in Hartford; also, other makers. Carhart and Needham have just received a new patent for Melodeons, and no other person or persons will be allowed to use it but themselves. It is as much ahead of the common Melodeon as the Piano Forte is. Those who want Melodeons had better call and see them. **JOHN FARRIS** is sole agent for Connecticut.

BARKER & CO.,

162 MAIN STREET,

SOLE AGENTS FOR THE SALE OF

HALLET, DAVIS & CO'S CELEBRATED PIANOS, BOTH GRAND AND SQUARE.

An assortment of about twenty Pianos on hand constantly; the largest selection by far of any dealer in New England. Particular attention is directed to our

PATENT SUSPENSION BRIDGE.

It is considered to be the greatest improvement that was ever made in the Piano Forte; and please to recollect that no other makers dare infringe on the patent. Also, our celebrated

ELEVATED BASS STRINGS,

And Grand Action, entire Iron Frame, &c. In short, Hallet, Davis & Co.'s Pianos stand higher in the market than any other maker's in the United States. We received a

GOLD MEDAL,

At the last County Fair held in Hartford, for our superior Pianos. They have taken first premiums at all the Fairs throughout the State.

PRINCE & CO.'S IMPROVED PATENT MELODEONS.

We are also sole Agents for the sale of these far famed Instruments. Prince & Co. are making about one hundred Melodeons per week. Styles as follows:—Double Reed, Piano Case, \$150, 6 octave Melodeons, \$135, Piano Cases, 5 octave, \$100, Portable Cases, \$75, &c. &c. Always on hand, second hand Instruments, which we will sell cheap. Every body that has used Prince & Co.'s Melodeons, pronounce them superior to all others. Among the many testimonials which we might publish, please read the following:—

Poquonock, April 7th, 1855.

We, the undersigned, testify that the Melodeon purchased by this Congregational Society of Messrs. Barker & Co., has, after one year's fair trial, proved itself a superior Instrument; and we recommend to Churches desiring to purchase Melodeons, those of Prince & Co.'s Manufacture.

S. T. McKENNEY,	} Committee of	
O. B. GRIGGS,		Poquonock
HORATIO COLTON,		Cong. Society.

You will always find the largest assortment at our Store of any dealer in the State. In all cases our Instruments will be warranted.

SHEET MUSIC.

Our Sheet Music Department is very select and extensive, as we are receiving the choicest compositions, weekly, from the largest publishing houses in Boston and New York. Also, Music Books of every description. Pianos and Melodeons to let in City and Country. If bought at the end of the quarter the rent will be deducted. Tuning Forks, Guitar and Violin Strings, &c., &c.

In two 12 mo. volumes, at \$1.25 each.

THE DAILY REPUBLICAN has a circulation of 3800 copies, and is issued on a double sheet on Saturdays.

THE WEEKLY REPUBLICAN has a circulation of 4500 copies, and is a large quarto of 48 columns, 36 of which are devoted to reading matter. Both the Daily and Weekly circulate largely throughout the Connecticut valley, and are the best advertising mediums in New England.

THE HISTORY OF WESTERN MASSACHUSETTS is a full and complete narration of all important events which have occurred in the valleys of the Connecticut and Housatonic, from the time of the earliest settlement until the present day, embracing an Outline, or General History of the Counties of Hampden, Hampshire, Franklin and Berkshire, account of the scientific aspect and leading interests, and separate histories of its one hundred towns. This work is the result of much research and labor, and is thoroughly reliable and authentic.

A clear and well defined map of the four Counties prefaces the first volume. The two volumes will be sent, post paid, to any part of the United States, on receipt of \$3.00.

THIS is the Eighteenth annual issue of the HARTFORD CITY DIRECTORY. From a publication of 71 pages with a common paper cover, it has increased to a full bound book of nearly 350 pages. We have expended for this work, nearly \$500 for original drawings and engravings of Church Edifices and Public Buildings. This year, we have made an important addition, viz.—a Business Directory—giving the names and places of all individuals engaged in business for themselves—classified under their respective vocations. The citizens of Hartford may rest assured that neither pains nor expense will be spared to make this Directory the most complete, perfect and handsome work of the kind that can be annually produced in this country. In our new *Business Directory* we show upwards of 130 kinds of business carried on in this city by more than 1000 different persons, firms, and corporations.

In this number we show the public what rapid advances our city has made within the last year, as well as within the last eighteen years. There has been noted by our canvassers this year, upwards of 1800 removals of house-keepers, boarders, &c. And upwards of 2000 new names have been added to our Directory. This year, in the list of Churches, Corporations, Societies, Schools, Banks, &c. &c. we have recorded more than 2000 changes from last year—last year there were 1800. The copy in which the corrections are made; also a regular file of our City Directory for the past seventeen

ENTERED, according to Act of Congress in the year 1855, by
ELIHU GEER,
in the Office of the Clerk of the District Court of the United
States for the District of Connecticut.

years, can be seen at No. 10 State street. In 1838 there were in the Directory 1462 names—this year there are upwards of 8000 names—and 1000 *more* than last year, and 6700 *more* than in 1838 !

The Subscriber also procures Directories from all the other cities in the Union, where published, which are at the service of those who may desire to refer to the same.

ELIHU GEER.

HARTFORD, CONN., May 24, 1855.

EXPLANATIONS.

THE business location of individuals engaged in business for themselves, is first mentioned in connection with their names, and then their place of residence. Especial pains has been taken to ascertain the name, residence, and occupation of every male person, twenty-one years of age and upwards.

When two different numbers are given in connection with one name, and only one street mentioned, the number first given is the place of business, and the second the residence, and both in the same street.

Several streets in the city have not been numbered. This will account for the omission of numbers in connection with certain names. And the city having nearly quadrupled since it was numbered eighteen years ago, there are innumerable instances where the inhabitants of two and more dwellings, claim the same number.

For boundaries of Wards see page 295 of this book.

The letter h. signifies house; res. residence; st. street; bds. boards; av. avenue; e. corner; op. opposite, &c.

To the Hon. Secy of the Navy
Washington
Dear Sir
I have the honor to acknowledge the receipt of your letter of the 27th inst. in relation to the matter of the purchase of the schooner "Albatross" for the service of the Navy. I am sorry to hear that the vessel is not available for the service of the Navy at this time. I am, however, sure that the Navy Department will be able to find another vessel to suit its requirements.

Very respectfully,
John D. Long
Secretary of the Navy

The subscriber has invented and patented the *Attached Muzzle Rifle*, which is a decided improvement upon the usual style of Rifles. The muzzle is made of hardened material, so that long use will not impair its compactness, and by its peculiar construction gives additional force to the ball. These Rifles have been proved for action, and to be superior to the *Slap*, near the City Hall Market, Kingsley st. Particular attention paid to Repairing. Licensed to keep and sell Gunpowder.

1. The first part of the paper discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the success of any business or organization. The author provides a detailed overview of the various methods used to collect and analyze data, highlighting the strengths and weaknesses of each approach. The discussion is supported by numerous examples and case studies, which illustrate the practical application of these techniques in real-world scenarios. The author also addresses common challenges and offers solutions to ensure the reliability and integrity of the data collected.

The first of these is the fact that the earth is not a perfect sphere, but is flattened at the poles and bulged out at the equator. This is due to the centrifugal force of rotation, which tends to pull the material of the earth away from the poles and towards the equator. The second is the fact that the earth is not a uniform body, but is composed of different layers of material, each with its own density. The third is the fact that the earth is not a rigid body, but is capable of being deformed by external forces. These three factors are the main causes of the irregularities in the shape of the earth, and they are the main causes of the irregularities in the distribution of the earth's mass.

The first part of the paper is devoted to a discussion of the
 various methods which have been proposed for the determination of
 the rate of reaction between a radical and a molecule. The
 most common of these is the method of initial rates, in which
 the initial concentration of the radical is varied and the
 initial rate of reaction is measured. This method is simple
 and direct, but it is subject to a number of errors, and it
 is often difficult to obtain accurate results. Another method
 is the method of half-lives, in which the half-life of the
 radical is measured. This method is also simple, but it is
 subject to similar errors. A third method is the method of
 steady-state concentrations, in which the concentration of the
 radical is maintained at a constant value and the rate of
 reaction is measured. This method is more accurate than the
 others, but it is more complicated and it requires the use of
 special apparatus.

The second part of the paper is devoted to a discussion of the
 various factors which influence the rate of reaction between a
 radical and a molecule. The most important of these are the
 concentration of the radical, the concentration of the molecule,
 the temperature, and the nature of the radical and the molecule.
 The rate of reaction increases with increasing concentration of
 the radical and with increasing concentration of the molecule.
 The rate of reaction also increases with increasing temperature.
 The nature of the radical and the molecule also influences the
 rate of reaction. For example, the rate of reaction between a
 primary radical and a molecule is generally slower than the
 rate of reaction between a secondary radical and a molecule.
 Similarly, the rate of reaction between a radical and a
 saturated molecule is generally slower than the rate of reaction
 between a radical and an unsaturated molecule.

The first part of the paper is devoted to a discussion of the
 various methods which have been proposed for the determination of
 the rate of reaction between a solid and a liquid. The methods
 which have been proposed may be divided into two main classes,
 namely, the gravimetric and the volumetric methods. The gravimetric
 methods are based on the measurement of the weight of the solid
 before and after the reaction, and the volumetric methods are based
 on the measurement of the volume of the gas evolved during the
 reaction. The gravimetric methods are generally more accurate than
 the volumetric methods, but they are also more tedious and more
 liable to error. The volumetric methods are generally less accurate
 than the gravimetric methods, but they are also less tedious and
 less liable to error.

The second part of the paper is devoted to a discussion of the
 various factors which influence the rate of reaction between a solid
 and a liquid. The factors which influence the rate of reaction may
 be divided into three main classes, namely, the physical factors,
 the chemical factors, and the biological factors. The physical factors
 are those which influence the rate of reaction through their effect
 on the physical properties of the solid and the liquid. The chemical
 factors are those which influence the rate of reaction through their
 effect on the chemical properties of the solid and the liquid. The
 biological factors are those which influence the rate of reaction
 through their effect on the biological properties of the solid and
 the liquid.

WADSWORTH ATHENAEUM.

111 Main Street, at the head of Mulberry Street.

Is a granite building of 100 feet in length, on Main street, and 80 feet in depth in center wings, and 70 feet in depth in outside wings, and is appropriated to four distinct Societies. Its architectural style is of the castellated structure, with central towers 70 feet in height, and corner buttresses 56 feet in height. The stone, which is a species of gneiss, was procured from the east part of Glastenbury, about nine miles South East of this city.

The North division, first story 13 feet high, second story 24 feet high, and both 35 feet long by 20 feet wide, is occupied by the YOUNG MEN'S INSTITUTE, for a reading room, quarterly and other meetings, and by their Library, of 10,000 volumes.

The South division is of the same dimensions as the North. The CONNECTICUT HISTORICAL SOCIETY use this.

The NATURAL HISTORY SOCIETY occupy a large room in the first story of the South division of the Athenaeum.

The central division of similar dimensions with the others, is used as a gallery of very valuable PAINTINGS and STATUARY.

The building was erected by voluntary contributions of citizens, and, with the land, cost \$59,557.38.

CONNECTICUT RETREAT FOR THE INSANE.

The Connecticut Retreat for the Insane was opened for the reception of patients, April 1, 1824. Since that period, 2804 have been received, of which 1335 were male, and 1469 female. About half of these have been restored to health, while a large number have been discharged with various degrees of improvement. 193 patients were remaining in the Institution, April 1, 1855. The house can accommodate 200 patients. Valuable additions have lately been made to its conveniences, and two buildings have also been erected for Lodges. The Retreat must depend chiefly for its means of usefulness, on the liberality of individuals who can appreciate the high benevolent objects it aims to accomplish.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) and (2) under the assumption that the functions $f_i(x)$ and $g_i(x)$ are continuous and satisfy certain conditions. It is shown that under these conditions the system has a solution in the class of continuous functions.

2. In the second part of the paper the problem of the existence of solutions of the system of equations (1) and (2) is considered under the assumption that the functions $f_i(x)$ and $g_i(x)$ are continuous and satisfy certain conditions. It is shown that under these conditions the system has a solution in the class of continuous functions.

The first part of the chapter discusses the importance of understanding the underlying principles of the system. It emphasizes that a thorough grasp of the theory is essential for effective application. The text then moves on to a detailed examination of the various components and their interactions. This section includes several examples and diagrams to illustrate the concepts. The second part of the chapter focuses on the practical aspects of the system, including the design and implementation of the various modules. It discusses the challenges faced during the development process and the solutions that were found. The chapter concludes with a summary of the key findings and a discussion of the future work that needs to be done. The overall goal of the chapter is to provide a comprehensive overview of the system and to help the reader understand its inner workings.

HEWS' PATENT AMERICAN ACTION PIANO.

GEORGE HEWS,

No. 379 Washington Street,

BOSTON.

*From the illustrious Pianist, L. M. GOTTSCHALK, to Mr.
Hews' Agent at New York.*

MR. N. P. B. CURTISS.—Dear Sir: Having had the pleasure of performing upon Geo. Hews' American Patent Action Piano, at the World's Fair in this City the present year, and other of his Pianos at your Warerooms, which afforded me much gratification, I cheerfully recommend them to the public. I am very glad of the improvement in the action. These instruments likewise, are of excellent tone, owing no doubt to the perfection of the scales.

Very Respectfully,

L. M. GOTTSCHALK.

☞ Pianos Exchanged, Tuned and Rented on favorable terms.
