State Senators

UNDER THE CONSTITUTION, ELECTED BY GENERAL TICKET.

THE Register for 1849 contains a list of Assistants, or members of the Upper House, from 1639 to 1819, when the Constitution went into operation. That for 1850 contains a list of Senators, by Districts, together with the votes of the successful and the opposing candidates, from 1830 to 1849. During the intervening period from 1819 to 1830, the Senators, twelve in number, were elected by general ticket. For two years the old Federal party had an organized existence, after which, for four or five years, during the last term of Monroe's administration, but little interest was taken in politics. In fact, in 1824, only 7,510 votes were cast in the whole state for Governor, of which all but 875 were for Gov. Wolcott.

The following are the votes for Senators by general ticket.

Dividend of \$1.35, to 96,382 scholars, \$120,610.90
 Extra Dividends to small districts, 12,670.00

Under the present laws, every district having 12 scholars, or over, is entitled to at least \$35. By this regulation, 362 districts drew more than their *pro rata* dividend, an average excess of 45 cents per child. It were better to pass a law to discourage small districts, to which local influences are constantly tending. No school can well be sustained in a district of 12 or 15 scholars; and such ought to

be united to larger ones. In fact, if the districts of the State were diminished one-half, and graded schools established in every considerable village, the fund would do more good.

Building Associations and Savings Banks

Differ from Savings Banks, in requiring monthly payments to be made of one dollar on a share, and in allowing a higher rate of interest than 6 per cent. to be taken on loans to stockholders, in the form of a bonus. No moneys can be withdrawn until the shares, including principal and interest, amount to \$200, when the stock becomes full. The average rate of interest, including the bonus, at present, is about 15 per cent. Besides payments on stock, these institutions receive money on deposit, to be withdrawn at pleasure, the same as Savings Banks.

HARTFORD:
PUBLISHED BY F. A. BROWN,
CORNER OF MAIN AND ASYLUM STREETS.

To the Public.

BRADLEY'S REGISTER was commenced in 1847, and in 1849 it was combined with GREEN'S. The Register of 1847* contains, Annals of Connecticut; The Patent of 1631; The Charter of 1662; List of State Officers from 1639 to 1846; and Historical Notices of Probate Courts, and of each Town, &c. That of 1848 contains, The Constitution of 1639; List of Assistants from 1639 to 1819; Democratic Powers of Towns, &c. That of 1849 contains, The Organization of the Superior Court in 1711, and List of Judges from 1711 to 1849, &c. That of 1850 contains, the Votes for Governor from 1819 to 1849; List of Senators from 1830 to 1849, with votes of opposing Candidates, &c. That of 1851 contains, Population of the Towns of the State at different Periods, &c. The present Register contains a list of Members of Congress from 1765 to 1853, &c.

We have been at the utmost pains to make the Register for 1853 as full and accurate as possible. But no work of the kind can be more perfect than the returns made. Though most of these were accurately made and promptly returned—for which we give our sincere thanks—yet many were hastily and incompletely made, names obscurely written, and not returned in season; and some have not come to hand, though three separate blanks have been sent.

We shall send Registers to those who have made returns, as far as ordered. And such others as do not receive them, will be supplied by applying to F. A. Brown, Hartford.

The public are as much interested as the publisher in having the Register accurate and complete. For this purpose, we desire that any errors in the present number, which may be continued, particularly in Justices of Peace, may be noted, and sent to F. A. Brown, Hartford, or Wm. S. Porter, New Haven. We also wish the names of some one in each town, interested in statistical matters, sent as above; to whom blanks will be sent for future numbers of the Register. Those making returns are entitled to a copy of the Register as compensation.

* The publisher has for sale a few copies of the back numbers of the Register.

Town Statistics.

The first and second columns indicate the legal distance from Hartford and New Haven. The third, the amount of Deposit Fund. The fourth, the Grand List. The fifth indicates the expenses of pauperism, and the sixth, all other town expenses except interest and roads and bridges. It will thus be seen that pauperism costs more than all other town objects, except as above, of which intemperance is the chief cause. In fact, expenses growing out of intemperance, including criminal prosecutions, and time and expenses of Selectmen in looking up and taking care of paupers made by intemperance, are fully equal to the expenses of pauperism which do not result from intemperance. Thus the taxes paid for intemperance, may be set down as the same as expenses for pauperism.

School Societies.

The enumeration of children is made in January. In our circular, we proposed the question, "What public taxes are raised, or what town or society appropriations are made to schools?"—but obtained only the few answers as given. The proportion of the avails of the deposit fund appropriated to schools, was given in the Register for 1850.

Insurance Companies.

The returns are too incomplete to present a full view as we do of Banks and Savings Banks. It is desirable that these companies should be obliged to make similar annual exhibits to the State, as those do. The capital put down to Mutual Companies, is the amount on which taxes are paid. *F.* denotes Fire Companies ; *M.*, Mutual Fire ; *L.*, Life ; and * includes Marine.

COMPTROLLER'S OFFICE.

HARTFORD, Oct. 14, 1850.

THIS may certify, That the Capital Stock of the CHARTER OAK LIFE INSURANCE COMPANY, amounting to *Two Hundred Thousand Dollars*, (\$200,000,) has all been paid in, or invested in securities of undoubted character, which have been passed and approved by their Board of Directors, and by me, agreeably to the requirements of the Charter. The Legislature having thrown extraordinary and unusual guards around this Charter, for the protection alike of the Company and the public; the strength, ability and well invested capital of the institution, are, in my opinion, unsurpassed by any Life Insurance Company in this State, or perhaps in this country.

R. G. PINNEY,
Comptroller of Public Accounts,
State of Connecticut.

"LIFE INSURANCE

IS THE POOR MAN'S WEALTH, AND A GOOD INVESTMENT FOR THE CAPITALIST."

1. Husbands and Fathers may make provision after their death for their widows and children.

2. The young may make provision for themselves in their declining years.

3. Parents may provide endowments for their children.

4. Creditors may compensate the loss which the death of their debtors might occasion.

5. Borrowers to secure, in case of death, a fund to repay the loan.

6. All who have a pecuniary interest in the existence of a life, to guard that interest from total loss through failure of life.

"Life Insurance is truly styled a Savings Bank for the widow and the orphan, so managed that the rich and the poor may alike avail themselves of its benefits."

Statistics of Towns.

In addition to the Grand List, we designed to present the statistics of Manufactures in this State; but the returns are so interwoven with other matters, that we can give only approximate values. In the following table, the 1st column contains the number of Taxable Polls in each town. The 2d, the Valuation of Property. The 3d, the Valuation of Mills, Stores, &c. The 4th, Investments in Manufactures and Manufacturing operations. In the returns there is a column headed, "Bank, Insurance and Manufacturing Stocks," but what proportion of this belongs to the latter, it is impossible to determine. There is but little uniformity in the returns. The same items in different towns, are, it will be perceived, put under different heads. In our circular to towns, we desired information as to the "Number of Manufactories, and principal articles manufactured." The replies are appended in the form of notes. By means of the table, and the subjoined information, a tolerably correct knowledge of the amount of manufacturing, and the kind of goods manufactured, in each town in the State, may be obtained. From a few towns, the returns are incomplete.

Another class of Savings Banks are organized under the general banking law. They have a guarantee fund, receive deposits, and loan their money at a bonus.

Building Associations and Savings Banks

Differ from Savings Banks in requiring monthly payments to be made of 1 dollar on a share, and in loaning money at a bonus. No moneys can be withdrawn until the shares, including principal and interest, amount to \$200, when the stock becomes full. Besides payments on stock, these institutions receive money on deposit, to be withdrawn at pleasure, the same as Savings Banks.

Railroads in Connecticut.

The first charter granted by the State was in 1832; and the first train commenced running on the Stonington road in 1839. During the brief period of 15 years, over 600 miles of completed railroad have been put in operation; and 100 miles more are in process of construction. Every important point in the State is accommodated with railroad facilities, better than any similar extent of country in the United States, and perhaps on the globe. Probably no point in the State is more than ten miles from a railroad. The capital invested is about 24 millions of dollars, more than the entire banking capital of the State. The only roads which have made dividends the past year, are the Hartford, New Haven and Springfield; the Norwich and Worcester; and the Stonington. The New Haven and Northampton is leased to the New York and New Haven Railroad.
