The Aristocrat of Motordom

KNIGHT Motored cars have always been the aristocrats of motordom.

Today the leading cars in practically every country are Knight-Motored.

The Willys-Knight

Improves with use,
Requires no adjustment,
Makes beneficial use of
carbon,
Is powerful, flexible and
economical.

You will find no other single car with all of these advantages.

Overland-Mann Company

KANKAKEE, ILLINOIS

Introduction

IN this directory we have endeavored to give Kankakee county farmers a complete and reliable directory of the farmers, breeders and merchants of the county, with such other information as will make the directory a valuable reference book.

The task of calling on every farmer in a county and collecting the information for such a directory is a tremendous one. We have received splendid co-operation from the farmers and business men of the county, without which the publication of such a directory would be impossible. In a very few cases we have found farmers unwilling to give the information requested, which accounts for a few names that do not appear.

A few mistakes are bound to occur in a directory that involves so large an amount of work, but we have spared no effort or expense to make the information complete and accurate, and we believe that the mistakes are very few.

We want to speak a word of appreciation for the advertisers whose liberal support has helped materially to bear the heavy expense of publishing this directory, and ask that you favor them with your patronage whenever possible.

We hope and believe that the publication of this directory will be a real service to Kankakee county farmers and in line with PRAIRIE FARMER's policy of service to the farmers of Illinois. We hope that the increased circulation of PRAIRIE FARMER in Kankakee county which has resulted will help in the movement for better farming, better farm living, and more prosperity for the county, and that our many new friends will become permanent members of the big PRAIRIE FARMER family.

BURRIDGE D. BUTLER,
Publisher, Prairie Farmer.

ГЛАВА ПЕРВАЯ

1898

В начале 1898 года в Петербурге, в доме № 12 по Невскому проспекту, родился мальчик, которого назвали Иваном Ивановичем. Его родители, Иван Иванович и Анна Ивановна, были оба инженерами. Мальчик родился здоровым, но в первые месяцы жизни болел несколько раз.

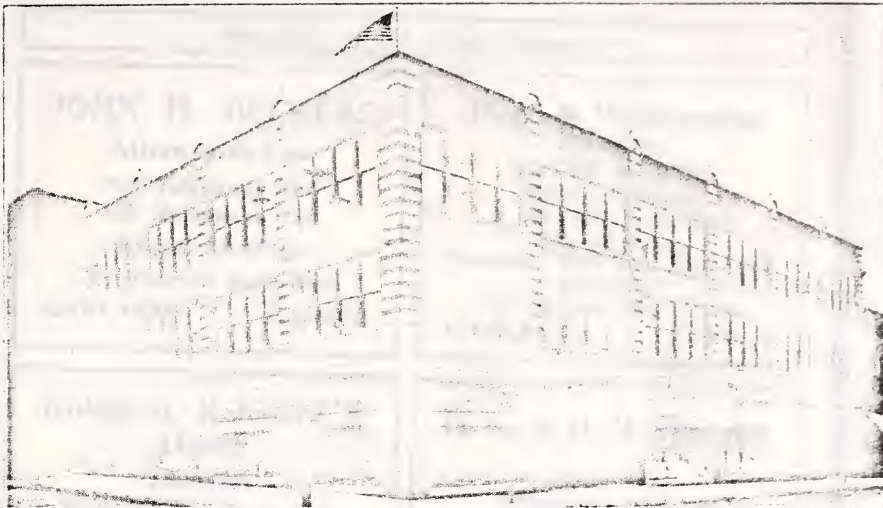

В детстве Иван Иванович был очень любознательным и активным. Он любил играть с конструкторами, выкладывать кубики и читать книги. Его родители заметили, что мальчик имеет хорошие способности к математике и естественным наукам. В школе он также отличался, особенно в точных науках. В подростковом возрасте он увлекся физикой и химией, проводил много времени в лаборатории.

В 1915 году Иван Иванович окончил университет с отличием. Он получил степень кандидата наук. После окончания университета он работал в одном из научных учреждений. В 1918 году он был мобилизован в армию, но вскоре был освобожден по состоянию здоровья.

После окончания войны Иван Иванович продолжил свою научную деятельность. Он работал в различных научных учреждениях, занимаясь исследованиями в области физики и химии. В 1925 году он был избран членом Академии наук. В 1930 году он переехал в Москву, где и продолжил свою работу.

В 1935 году Иван Иванович был назначен на должность профессора в Московском университете. Он читал лекции по физике и химии, а также руководил научными работами студентов. В 1940 году он был избран членом Президиума Академии наук. В 1945 году он был награжден орденом Ленина за заслуги в развитии науки. В 1950 году он переехал в Ленинград, где и работал до конца своих дней.

Иван Иванович умер 15 января 1960 года.

The Biggest and Most Complete Department Store In the Kankakee District

KANKAKEE enjoys the position of being the trading center of Kankakee County and all the surrounding counties—and The Chicago Store is Kankakee city's biggest and most popular retail store.

The Chicago Store is a modern, up-to-date department store which grew up to its present proud position by honest merchandising methods and fair dealing with the public. Efficient, satisfactory service and low prices have always been and are now its chief attractions.

WE WANT YOU TO BE OUR GUEST WHEN IN KANKAKEE
Our recently built new store building shown in the above picture is a modern, up-to-date retail store home with every convenience for shoppers, such as elevator service, roomy and spacious isles, modern fixtures, etc. There is a well-appointed public rest room with lavatory connecting on the second floor, with an experienced maid in attendance. We invite visitors to make it a meeting place and use its conveniences after a dusty auto trip from out of town.

THE UNIVERSITY OF CHICAGO

The University of Chicago is a private research university in Chicago, Illinois. It was founded in 1837 as the first American university to be organized on the European model, with a focus on research and scholarship. The university is known for its commitment to academic excellence and its diverse student body. It has a long history of producing influential leaders in various fields of study.

The university is organized into several divisions, including the Division of the Physical Sciences, the Division of the Biological Sciences, the Division of the Social Sciences, and the Division of the Humanities. Each division is further divided into departments, which are responsible for teaching and research in their respective fields.

The University of Chicago is also known for its unique approach to education, which emphasizes critical thinking and intellectual inquiry. This is reflected in its curriculum, which is designed to be challenging and rigorous. The university also offers a wide range of extracurricular activities, including sports, arts, and community service, to provide students with a well-rounded education.

Over the years, the University of Chicago has earned a reputation as one of the leading universities in the world. It has produced numerous Nobel laureates, Pulitzer Prize winners, and other distinguished scholars. Its commitment to research and scholarship continues to make it a premier institution of higher learning.

The Kankakee County Soil and Crop Improvement Association

DOWN in Kankakee County, Illinois, the folks have a way of thinking that the Kankakee County Soil and Crop Improvement Association is the greatest organization of its kind in existence, and some of them fondly believe that it is the highest ambition of like organizations in other counties to be able to say, "We're doing just as good work as John Collier and his Kankakee people."

You will gather this impression whether you ask a Kankakee storekeeper or a Pilot Township farm hand. If you want to strike up a conversation with someone in Kankakee, ask them to tell you a little about the Soil Improvement Association. You'll be lucky if you get away inside of an hour.

Kankakee people are neither egoists nor boasters—they are just as modest as are the rest of the people I know in Illinois. But when it comes to farm advisory work, they just refuse to take a back seat to anybody. And this makes us wonder what their soil improvement association is doing to make them so proud of it.

I asked that question of C. E. Robinson, president of the association, and this is what he told me: "Oh, we're just a bunch of four or five hundred farmers joined together to see if we can't discourage the growing of timothy hay and other such foolish farm practices, and to see if we can't have more alfalfa farmers and fewer timothy farmers." A modest statement about a great movement, Robinson's is, but really about as good a description of it as I know.

It all began back in the late winter and spring of 1912, five years ago. They had been holding farmers' institutes and short courses in Kankakee County for years, and the only complaint was that the effect of these meetings didn't last long enough—in other words, the inspiration for better farming received there didn't reach to the plow handles in enough cases. So a few of the farmers began to talk about what a fine thing it would be to get a trained man to come in and spend his whole time with them, advising, answering questions and assist-

ing them generally with problems relating to better farming.

Some of the farmers were enthusiastic, some lukewarm, a good many doubtful and even hostile, but in any event there were enough willing to chance \$10 on it to pledge that amount toward the support of the Kankakee County Soil and Crop Improvement Association to get it started. The government put up \$1,200 annually, and the board of supervisors a like amount. The board of directors hunted up a modest-looking young man named Collier, who was guaranteed to know farming both from the plow and pitchfork standpoint and from the book and science method. Collier began working June 1, 1912, and thus a new line of work was launched in Illinois—the county advisory movement which has since spread to 25 counties and which has brought large returns in both better farming and better citizenship everywhere it has gone in this state. Collier wasn't altogether first in Illinois, as William G. Eckhardt began work on the same day in DeKalb County.

What of the results? To either a casual observer or a close student it is at once apparent that the members have received their money's worth, and more; and how they have done this is told in the rest of this story.

The first big problem which Collier and the members of the soil improvement association went to work on was that of increasing the productivity of Kankakee County soils. According to the University of Illinois survey, there are 92 types of soil in Kankakee County, and each one is fundamentally different from the others and requires different treatment.

The most important soil type is brown silt loam, comprising perhaps one-half of the county's area. This area covers most of the northern half of the county and a part of the southwestern corner. Most of the brown silt loam lands, because they are so productive, have been grain-farmed for years and the returns getting smaller gradually but surely. Legumes and raw rock phosphate, one to supply nitrogen and organic matter, and the other phosphorus, are the things

FARMERS AND BREEDERS, KANKAKEE COUNTY

TOP NOTCHERS, 1917—Nils Olsen, Pilot twp., general farmer; W. W. Parish, Ganeer twp., cattle feeder; A. G. Goepper, Limestone twp., general farmer; C. M. C. Buntain, Mornence twp., general farmer; A. S. Pallisard, St. Anne twp., general farmer.

needed to build up worn brown silt loam soils, and these have been used by a great many Kankakee County farmers.

M. F. Baker, of Kankakee, is one of the farmers who has been using phosphate. The use of 1,000 pounds of phosphate in the oats doubled his sweet clover crop. J. D. Watkins, also of Kankakee, began in 1911 to use phosphate. In 1916 he got 26 bushels per acre of very poor quality corn where no phosphate had been applied, and 41 bushels of good quality where phosphate had been used. Watkins also has a two and three-quarters ton clover yield to compare with a three-quarters ton yield. On A. C. Radeke's farm near Kankakee, further effects of phosphate can be seen. Wheat on clover sod made 18 bushels per acre, where manure was added 26 bushels per acre, and where phosphate was applied 38 bushels per acre. These three brief examples serve to show the sort of soil work which is being carried on by members of the Kankakee County Soil and Crop Improvement Association. They are following out the Illinois system of maintaining fertility, which means maximum crops and a productive soil for the next fellow.

So much limestone has been used in Kankakee County that no record is kept. It is used mainly to put on ground in preparation for alfalfa or clover. Very little was used five years ago.

A number of farmers have kept records for Collier on the difference in yields between fall and spring plowing. Fred Baur, of Herscher, found 14 bushels per acre advantage in fall plowing for corn over spring plowing. This is one example of what is being done along improvement in methods of tillage.

Another work which the association has encouraged is the bringing in of new legumes into Kankakee County for soil improvement. The majority of farmers are grain farmers and sow clover for soil improvement. For that reason any clover which produces more growth to plow under than common red clover is one of great value. The association has tried out both mammoth red clover and and sweet clover, and found that both of them fill the bill very well. Over twenty thousand acres of each of these clov-

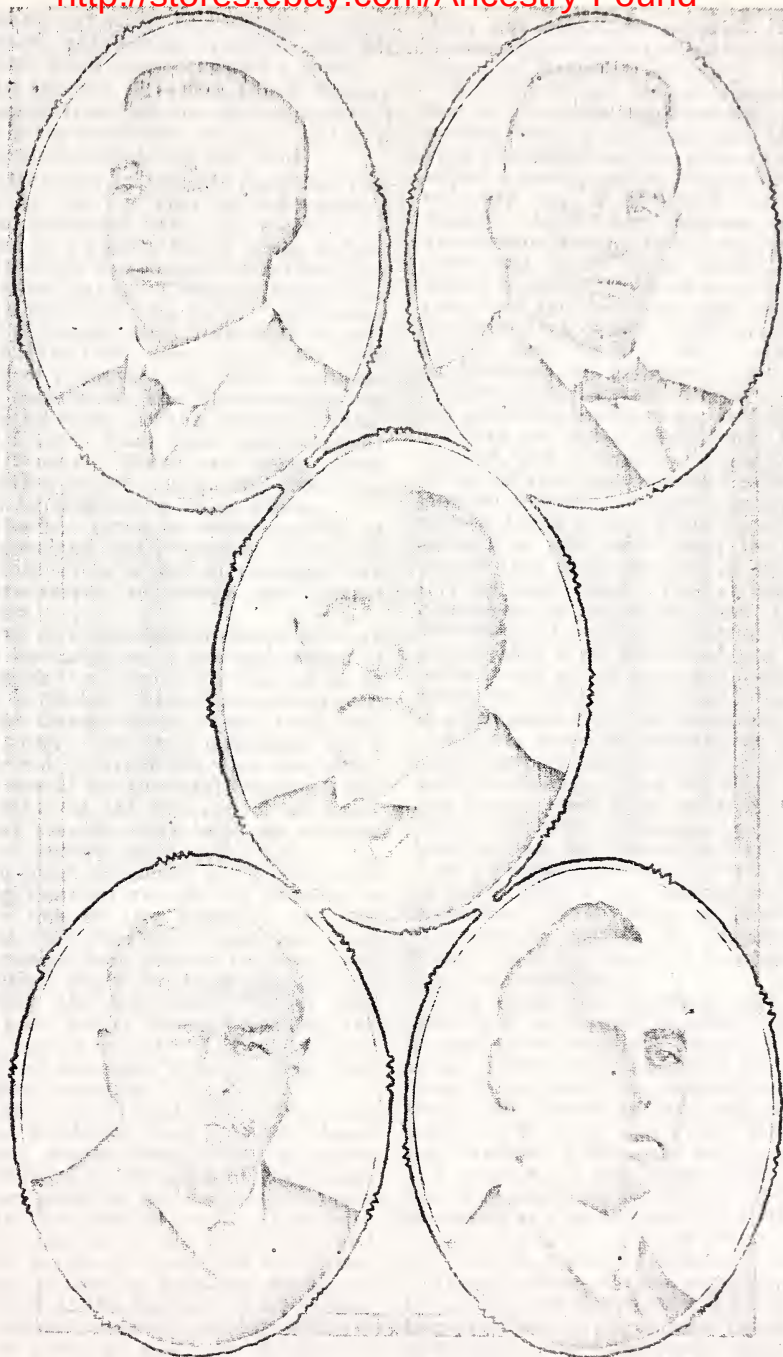

ers were sowed last year to plow under.

The sweet clover is commonly sown in the spring with a small grain, pastured that fall, and let grow the next year to plow under. Some men have found it highly profitable to cut for seed. "It is much better for soil improvement than for seed," says Collier. Others have found it valuable as a silage crop, mixing one load of straw with four of sweet clover. Nearly 100 farmers followed this practice last year. Mammoth clover is used just the same as sweet clover, except that it has not been used for silage. The two clovers had been grown mighty little in Kankakee County previous to 1912, but now they are making glad many thousand acres of soils by the great volume of organic matter which they are supplying.

The second most important soil type in Kankakee County is sandy loam. It covers a strip along the south side of the Kankakee river and includes about one-third of the county. This was originally a sandy swamp and much of it still approaches that description, and it varies all the way from a real brown sandy loam to pure dune sand. Its most immediate need is potassium, though it analyzes very low in both nitrogen and phosphorus also. Formerly it was a happy hunting ground of the complete fertilizer agents with their songs about "2-8-2," but the Kankakee Soil Improvement Association doesn't believe in 2-8-2 and it does believe in permanent systems of soil building.

Experiments on the sandy soils soon showed that the application of potassium in some economical form like potassium chlorate (muriate of potash) or kainit, turned crop failures into crop successes. It was likewise found that the nitrogen could be added in an economical and profitable way through the growing of legumes, and that after this was done it paid to apply raw rock phosphate.

Enough muriate of potash was used by farmers in 1913 and 1914 to show the soundness of this teaching, but the European war cut off the supply. Since then wood ashes have been substituted as the carrier of potash with fairly good results. W. G. Armour, of Kankakee, used 200 pounds per acre of potassium muriate, and his average corn yields went up from nothing to 40

TOP NOTCHERS, 1916—W. H. Lowe, Aroma twp., seed breeder; Geo. Courville, Bourbonnais twp., dairyman; C. M. Wright, Manteno twp., sheep feeder; Len Small, Kankakee twp., horse breeder; R. W. Wilcox, Pilot twp., general farmer.

bushels per acre. D. E. Styles, of Mokence, got similar results, and his clover yield was increased a third.

In the old days Kankakee County bought from 80 to 100 carloads of complete fertilizers annually, and now four or five make up the total.

Black clay loam spots make up from five to ten per cent of the county's area, scattered here and there a few acres in a place. Other types include peat, muck, and almost everything else in small areas. Different treatments have been used on these. Limestone and potassium have been used on peat.

In 1916 there were orders for 6,000 tons of phosphate by members of the soil association, and 100 carloads were actually used. In this respect Kankakee County leads every other county in Illinois. There are many stone quarries in the county, and limestone may be obtained in many places.

Another piece of work equally as fundamental and important as the soil fertility work is that of working with improvement of seeds and plants grown.

One of Collier's first pieces of work was to carry on a demonstration of formalin treatment for oat smut in each township. Less than ten per cent of the farmers then treated their oats for smut. Now it is unpopular for a man not to treat his oats for smut. The use of the formalin treatment has brought, on the average of all cases where records were kept, an average of six bushels increased yield.

An effort was made and work is still being done to get all the farmers to grow one or two varieties of corn, wheat, etc. Reid's, Plowman and Iowa Silvermine have proved the best corn varieties; Big Four, Iowa 103, and Silvermine the best oats; Turkey Red the best winter wheat; Marquis the best spring wheat. The association urges all members to grow these high yielding varieties.

More fundamental still is the work of the Kankakee Seed Breeders' Association, whose twenty-eight members are devoted to the work of developing higher yielding and otherwise more desirable strains of crops. The rules of this association are very strict, and a rigid system of inspection and examination is used to keep the quality of its seeds at the highest. Last spring, for instance, members sold 2,500 bushels of corn at \$5.00 per bushel to farmers outside of Kankakee County.

This was especially selected. W. H. Lowe, of Aroma, is president, and Nils Olsen, of Herscher, secretary.

Another major line of endeavor is that of livestock improvement. Only a comparatively small amount of purebred livestock has been grown in Kankakee County, and it has never been regarded as a livestock breeders' county. Under the auspices of the association, several local breeders' associations have been formed. The swine breeders hold two sales each year, and this has been the means of disseminating good stuff over the county very rapidly. M. A. Dupuis, of Manteno, is president, and J. P. Fellows, of Kankakee, secretary. None but purebred breeders are admitted.

There are some Shorthorns, a few Jerseys, and a number of good Holsteins in the county, and Collier organized a cattle breeders' association among these men. They have been holding a sale each year, but next winter they hope to hold a separate sale for each breed. E. P. Vining, of Kankakee, is president, and Logan Snyder, of Manteno, secretary. Twice a year this association holds a tour, when some of its forty-six members' farms are visited. Good ideas as well as good stock are thus passed on.

A horse breeders' association is another part of the livestock improvement machinery. Last fall eight local colt shows were held, arousing more horse and colt enthusiasm than had been known for years in Kankakee. This year the same number will likely be held, with a big windup show in Kankakee. J. H. Ader, of Chebanse, is president, and M. E. Hayden, of Grant Park, secretary of this aggressive organization.

New crops for livestock have also been part of the association's work. It was found that soy beans in corn made a most excellent crop for hogging down, and the association ordered 600 bushels of seed, enough to plant 5,000 acres, this year. Ebony and Medium Yellow are used mostly.

A system of supplying farm help has also been started. The method of operation is a secret, but it is sufficient to say that last year over 200 farmers were supplied with experienced hands.

The big piece of work accomplished by Collier and the association has not been soil improvement, nor grain improvement, nor livestock improvement, but the bringing together of

Kankakee County farm boys in a movement which is without parallel anywhere in Illinois. This is Collier's pet project, and one from which he regards the greatest permanent good to come from.

There are 830 farm boys from 14 to 26 years of age enrolled in the Kankakee County Young Men's Country Club, and this has an aggressive organization in each township or community besides. It has a worthy purpose—to get the country boys together, to teach them that the country is the best place, and to get them to help one another.

"We are trying to teach the young men that the soil is the foundation of agriculture, that all else depends on it; therefore, they should learn soil and how to maintain its fertility," says Collier. "We are trying to teach them that seeds, as well as animals, can be bred up to a high degree of productiveness; that brains are needed and will show results on the farm as well as anywhere; and that farming is a business where efficiency is determined by skillful farm management.

"We are trying to teach them that the country which God made is more beautiful than the city which man made; that life out-of-doors and in touch with the earth is the natural life of man. We are trying to teach them that work is work wherever they find

it, but that work with nature is more inspiring than work with the most intricate machinery.

"We are trying to teach them that the dignity of labor depends not on what we do, but on how we do it; that opportunity comes to the boy on the farm as often as to the boy in the city; that life is larger, freer and happier on the farm than in the town; that success depends not upon his location, but upon himself; not upon his dreams, but upon what he actually does; not upon luck, but upon pluck. We are trying to teach him to work when he works, to play when he plays, and to give and demand a square deal in every act of life."

Every township has a boys' organization. Guy Grinnel, of Bourbonnais, is president of the county organization, and Howard Farr, of Kankakee, secretary. The activities of the young men's country club are varied. It runs the annual five-day county short course in Kankakee; it is one of the best factors working toward better farming, much of Collier's work being done through the boys; tours and hikes are held, as well as occasional township social stunts. It gets the boys and young men interested in farming; it teaches agriculture, and through its appeal to the social element makes better life for them.

The most unique thing brought

County Agricultural Advisor John C. Collier at Work

about by the association is the Top-Notchers. This is Collier's own idea. Every fall the members of the soil association get together and elect a township Top-Notcher—the best farmer in the township, according to the scorecard below. The township Top-Notchers get together and elect five county Top-Notchers—the five best farmers in the county. No farmer can be elected as township Top-Notcher unless his farm scores 65, and cannot be elected as county Top-Notcher unless his farm scores 85.

Medals are awarded at the annual meeting of the association to the county Top-Notchers. These medals bear the inscription, "For Excellence in Farming. County Top-Notcher, 1917." Needless to say they are keenly contested for. It is the duty of the township Top-Notchers to visit every other township Top-Notcher's farm.

In 1916 the honors went to R. W. Wilcox, of Pilot township; W. H. Lowe, of Aroma township; Len Small, of Kankakee township; George Courville, of Bourbonnais; and C. M. Wright, of Manteno township. In 1917 the honors were awarded to Nils Olsen, of Pilot township; W. W. Parish, of Ganeer township; A. G. Golper, of Limestone township; A. J. Pallisard, of St. Anne township, and C. M. C. Buntain, of Momence township.

A Top-Notcher remains a Top-Notcher unless his farm fails to score up to standard. The score-card is as follows:

1. SOIL FERTILITY

- (a) Drainage 5%
- (b) Lime—10 tons of limestone annually per 80 acres for a period of 5 years..... 3%
- (If potash is neither required

nor obtainable, 5% shall be allowed.)

- (c) Phosphorus—10 tons raw rock phosphate per 80 acres annually for a period of 5 years... 5%
(In like proportion if in other forms.)
- (d) Potash—1 ton per 80 acres annually for a period of 5 years. 2%
(If potash is required and obtainable.)
- (e) Organic matter.....10%
(10 acres of legume crops per 80 acres annually for a period of 5 years.)

2. SEED

- (a) Pure varieties 5%
- (b) 1. Treating oats for smut.....
- 2. Germination test of seed corn 5%
- (c) Selection and improvement of farm seeds 5%

3. SYSTEM OF ROTATION.....10%

4. TILLAGE

- (a) Methods employed :..... 5%
- (b) Cleanliness of farm..... 5%

5. LIVESTOCK

- (a) Use of registered sires..... 5%
- (b) Care of manure..... 5%

6. FARM BUILDINGS

- Equipment and care..... 5%

7. FARM MANAGEMENT

- (a) In relation to records and accounts 5%
- (b) In relation to grain farming, or in relation to stock farming.....10%

8. ATTITUDE FOR GOOD OF THE SOIL ASSOCIATION.....10%

TOTAL100%

This isn't a complete story of the association's work. It just tells part of the big things. I doubt if a complete story will ever be written of it. At any event I believe it has met with success such as its most optimistic backers didn't dream of five years ago.

Its officers are C. E. Robinson, of Kankakee, president, and L. B. Bratton, of Kankakee, secretary and treasurer, and the following board of directors: D. E. Stiles, of Momence; A. C. Radeke, of Kankakee; L. W. Smith, of Manteno; H. E. Taylor, of Kankakee, and Len Small, of Kankakee.—Herman Steen.

When you go into a store to buy shoes, say to the clerk, "I want a pair of _____ shoes". Don't say, "I want a pair of shoes". If you name a brand of shoes you know will give you satisfaction, you not only say you want shoes, but you know about what you want. A clerk will always give closer attention to a customer who knows what he wants. It is human nature. The clerk will be more likely to give you satisfaction, even if he does not have the make of shoes you ask for, because he will know better what to show you, if you are willing to consider another make.

The Young Men's Country Club of Kankakee County

By C. M. Clay Buntain

THE Kankakee County Soil and Crop Improvement Association was organized in May, 1912. Following this, and as a part of the Soil Association, came the Young Men's Country Club in November, 1912; later came the Pure Bred Swine Breeders' Association, the Pure Bred Horse Breeders' Association, the Pure Bred Cattle Breeders' Association, the Seed Breeders' Association, Township Top-Notchers' Club, County Top-Notchers' Club, and other branch organizations.

By far the most important organization in aiding the Soil Association was and is the Young Men's Country Club, known as the Boys' Club.

The club has a township and a county organization. The township club was organized in eleven of the seventeen townships in the county. The officers of the township club consist of a chairman, secretary and treasurer. After the township organization was completed, the Country Club was organized in November, 1912, with a membership of sixty between the ages of fourteen and twenty-five. Their officers consist of a president, vice-president, secretary, treasurer and a board of directors.

While the club is only five years old, it has done much for the advancement of agriculture in Kankakee County. Its activities have been directed along all phases of farm life. It is the Boosters' Club for the Soil Association.

Each year the club adopted a slogan for the work of the year that would receive special attention.

In 1912 the slogan was "Treat your oats for smut and test your seed corn."

Each boy of the total number of 125 decided to personally talk with ten farmers and ask those ten men if they would not treat their oats for smut and test their seed corn. In addition to meeting these ten farmers, each boy called up his ten men by telephone to remind them of this work. As a result one-half of the 2,500 farmers in this county treated their oats for smut and tested their seed corn. Ninety-

two thousand acres is the average acreage of oats in this county. This treatment of oats saves six bushels per acre, and the result is a saving of over one-half million bushels.

The second year the slogan was "Use limestone and rock phosphate." Many fathers were skeptical, but many sons had faith. To please the son, the father tried the use of limestone and rock phosphate on a very few acres. Learning the results were good, the farmer used more limestone and more rock phosphate. In 1912 the total number of cars of limestone used were only five cars, and in 1916, 465 cars.

In 1912 no rock phosphate was used. In 1916, eighty-five cars were used, and orders were placed for fifty more, but could not be supplied on account of the car shortage.

The slogan the third year was "Grow alfalfa and build more silos." In 1912 there were only ninety-two silos in the county. In 1916 there were 640. In 1912 there were only twenty-five acres of alfalfa in the county, while in 1916 there were 7,000 acres.

The slogan the fourth year was "Beautify the farm home."

It is not an uncommon thing for a father to become aroused and inspired by a son who has caught a glimpse of the real opportunity of the farm.

The following story is related by a member of the Soil Association: "My son, a member of the Boys' Club, said: 'Father, I see you are elected a Township Top-Notch Farmer, and I know what that means. I think the first thing we should do in the morning is to build a new fence around the house. Then clean up and clean out the rubbish in the dooryard, then make the home more attractive. If you are a Top-Notcher you must live the part.'" The father complied with this request.

There is much wholesome advice in the remarks of Ex-President Roosevelt who, at the dedicatory exercises of the Jordaville Public Library at Jordaville, N. Y., on August 26, 1908, said: "I hope, in the course of a few decades to see the farmers bend their energies towards making life in

the country more interesting and more attractive and towards inducing our people to understand how really attractive our country life is at present. I sometimes get impatient with the individual who goes to the city because he can find no attraction in the country; but I am doubtful if the fault lies with him so much as with the fact that there is too much loneliness and isolation and a failure to take advantage of much that could be used with the expenditure of a little energy. I welcome the development of every agency that tends to increase the attractiveness of country life and develop the social side of it. I believe that more and more buildings like this (public library) could be used to advantage, not only because of the books, but because it can be used as a place for social meetings."

Having realized to some extent the benefits of the slogan "Beautify the farm home" in the space of one year, the club at the beginning of the present year, said: "Let us have more beautiful homes and surroundings."

These young men began to see the great opportunities that the farm afforded. They believe that the soil is the foundation of agriculture, and the first great lesson is to learn how to maintain its fertility.

They vied with each other in raising bumper crops. Unusual yields of any crop and unusual experiences were noted and reported to the Soil Advisor. At the District Fair in this county, in 1916, \$950.00 were given in prizes for farm products. Eighty-five per cent of this amount was won by members of the Young Men's Country Club. Colt shows and dairy shows were held in the various townships and these young men learned how to judge livestock. The social side of farm life was not neglected. Parties, dances and socials and homecomings were frequent. In addition to these they have basket-ball games and athletic contests. A library for these young men was started in two townships.

The business men of Kankakee have entertained the club at banquets, and a spirit of friendship and good will exists between the business men and this club.

The crowning event of the year in the club is the Annual Short Course. In February, 1913, the club gave a Short Course in Agriculture for one

week in the city of Kankakee, and it has continued annually since that time.

This course consists of lectures each day by college experts, farmers, bankers and lawyers. The topics discussed cover a broad field, and those who attend are inspired and helped. The cost of the program for the course in 1917 was over \$1,000.00, entirely financed by the members of the club. A silver trophy cup is the prize given to the township that has the largest attendance throughout the course. The attendance of boys the first year was sixty; the attendance this year was 400. The membership in 1912 was sixty, and in 1917, 830.

After painstaking work, the boys have succeeded in their efforts to be useful to the cause of better farming. Their work was new and untried; their organization was the pioneer in the field. It was the first organization of its kind in the United States. In succeeding as these young men have, it may be said of them, in a measure, as was once said of men who meet with opposition in a worthy cause:

"The big men dare; and the big men do; they dream great dreams which they make come true. They bridge the rivers and link the plains, and gird the land with their railway trains. They make the desert break forth in bloom; they send the cataract thru a flume to turn the wheels of a thousand mills; they bring the coin to a nation's tills. The big men work and the big men plan; and, helping themselves, help their fellow-man. And the cheap men yelp at their carriage wheels, as the small dog barks at the big dog's heels."

Should these boys leave the farm and follow other vocations, the lessons they learned as farmer boys will always be useful. Clark E. Carr, in "The Illini," said:

"In no country of the earth is it possible for rural retreats to develop such strong and able men as ours. In the great mercantile and manufacturing centers, in the marts of trade or the stock exchanges, in the professions or in public life, it will be found that 90 per cent of the leading men have grown up on the farm or in these rural communities. I did not know this, of course, at the early age, but I have since realized that it is true, and whenever I see a bright

the first of these is the fact that the
 human body is not a simple machine,
 but a complex organism, in which the
 various parts are interdependent, and
 the whole is greater than the sum of
 the parts. This is the principle of
 the human body, and it is the basis
 of all human knowledge. The second
 principle is that the human body is
 a social organism, and that the
 individual is not a separate entity,
 but a member of a community. This
 is the principle of the human body,
 and it is the basis of all human
 knowledge. The third principle is that
 the human body is a dynamic organism,
 and that it is constantly changing and
 developing. This is the principle of
 the human body, and it is the basis
 of all human knowledge. The fourth
 principle is that the human body is a
 spiritual organism, and that it is
 capable of feeling, thought, and
 action. This is the principle of the
 human body, and it is the basis of
 all human knowledge. The fifth
 principle is that the human body is a
 moral organism, and that it is
 capable of good and evil. This is the
 principle of the human body, and it
 is the basis of all human knowledge.

young man, however poor and limited in opportunities, I picture his possibilities of attainment. I have come to regard every young man I meet as a sort of potential hero who may some day rule the state. A striking illustration of this is afforded by the little community of which I have just been speaking (Pittsfield, Illinois):

"An old court record, recently discovered at Pittsfield, shows that in one case tried there in the Circuit Court, involving only about \$50, eight lawyers were engaged, of whom six afterwards became United States senators—Douglas, Browning, Yates and Richardson from Illinois, Baker from Oregon, and McDougall from California."

In conclusion, thanks are due the efficient Soil Advisor, Prof. John S. Collier, for under his leadership the organization was made possible; with his friendly counsel and advice, its interest was increased and sustained.

The ideals he has held up to these young men are best summed up in their creed, that reads as follows: "I believe that the country which God made is more beautiful than the city which man made; that life out of doors and in touch with the earth is the natural life of man. I believe that work is work wherever we find it, but that work with nature is more inspiring than work with the most intricate machinery. I believe that the dignity of labor depends not on what you do, but on how you do it; that opportunity comes to the boy on the farm as often as to the boy in the city; that life is larger and freer and happier on the farm than in the town; that my success depends not upon my location, but upon myself—not upon my dreams, but upon what I actually do; not upon luck but upon pluck. I believe in working when you work, in playing when you play, and in giving and demanding a square deal in every act of life."

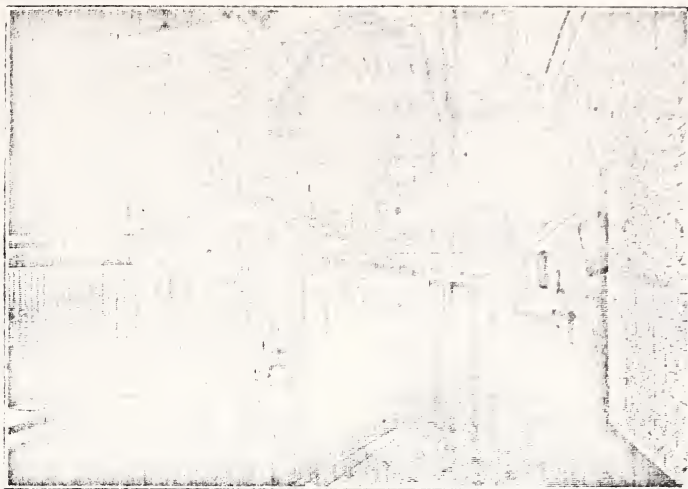

Almost everyone in Illinois knows the Lazy Farmer. Thousands of Illinois farmers laugh over his songs in *Prairie Farmer* every two weeks. You are missing a treat if you are not a reader of the Lazy Farmer's sayings.

The first of these is the fact that the American Medical Association is not a political organization. It is a professional organization, and its primary concern is the welfare of the medical profession and the public. It is not a political party, and it does not take any political position. It is a non-partisan organization, and it is not affiliated with any political party. It is a non-sectarian organization, and it is not affiliated with any religious sect. It is a non-racial organization, and it is not affiliated with any racial group. It is a non-ethnic organization, and it is not affiliated with any ethnic group. It is a non-national organization, and it is not affiliated with any national group. It is a non-regional organization, and it is not affiliated with any regional group. It is a non-local organization, and it is not affiliated with any local group. It is a non-individual organization, and it is not affiliated with any individual. It is a non-group organization, and it is not affiliated with any group. It is a non-organization organization, and it is not affiliated with any organization. It is a non-association organization, and it is not affiliated with any association. It is a non-union organization, and it is not affiliated with any union. It is a non-league organization, and it is not affiliated with any league. It is a non-society organization, and it is not affiliated with any society. It is a non-club organization, and it is not affiliated with any club. It is a non-association organization, and it is not affiliated with any association. It is a non-union organization, and it is not affiliated with any union. It is a non-league organization, and it is not affiliated with any league. It is a non-society organization, and it is not affiliated with any society. It is a non-club organization, and it is not affiliated with any club.

Abbreviations Used in this Directory

a—Acres; Ch—Children; O—Owner; T—Tenant or Renter; R—Rural Route; Sec—Section; maiden name of wife follows directory name in parentheses (); figures at end of information—year became resident of county. Name of farm follows names of children. In case of a tenant, the farm owner's name follows figures giving size of farm.

EXAMPLE

Ader, W. F. (Stella Folk) Ch Henry, Earl, Arthur, Willis, Irene; "Corner Lawn Farm" Chebanse R3 Chebanse (Iroquois County) Sec16 O320a (1894)

Means

W. A. Ader—Name.

(Stella Folk)—Wife's maiden name.

Ch Henry, Earl, Arthur, Willis, Irene—Children named.

"Corner Lawn Farm"—Name of farm.

Chebanse R3—Postoffice, Chebanse R. F. D. 3.

Chebanse Sec16—Chebanse township, Section 16.

O320a—Owner of 320 acres.

(1894)—Lived in county since 1894.

the first of the great principles of the American Revolution, the right of the people to alter or to abolish their government, and to institute a new one, whensoever they shall think it necessary for their safety and happiness. This principle was the foundation of the American Republic, and it was upon this principle that the American people have ever since acted. They have not only altered their government, but they have also abolished it, and they have instituted a new one, whensoever they have thought it necessary for their safety and happiness. This principle has been the basis of the American Republic, and it has been the basis of the American people's actions ever since.

the first of the great principles of the American Revolution, the right of the people to alter or to abolish their government, and to institute a new one, whensoever they shall think it necessary for their safety and happiness. This principle was the foundation of the American Republic, and it was upon this principle that the American people have ever since acted. They have not only altered their government, but they have also abolished it, and they have instituted a new one, whensoever they have thought it necessary for their safety and happiness. This principle has been the basis of the American Republic, and it has been the basis of the American people's actions ever since.

Merchandise advertised in Prairie Farmer carries a triple guarantee. The manufacturer guarantees it, the local merchant who sells it guarantees it, and Prairie Farmer guarantees square treatment from the advertiser. You can be sure of satisfaction by asking your merchant for goods advertised in Prairie Farmer.

Artesian Limestone Company

MANUFACTURERS OF

"ARTESIAN" Ground Limestone

ARTESIAN GROUND LIMESTONE is ground finer than cement, thus making it the strongest and most practical soil sweetener on the market. Packed in cloth sacks of approximately eighty pounds each.

Room 824, 29 South La Salle Street

PROTECT YOUR HONEST DOLLAR

To Prairie Farmer Readers—

Don't buy cheap, unadvertised goods, but protect yourself when buying by insisting on getting from your dealer only—

All Goods Advertised in Prairie Farmer are TRIPLE-G Goods.
All Goods Advertised in This Directory are TRIPLE-G Goods.

When the local dealer says in his advertisement:

**"We Sell and Recommend the Following
TRIPLE-Guarantee Goods"**

as in any advertisement in Prairie Farmer or in this
Directory, it gives you this TRIPLE-Guarantee

- 1st That the manufacturer of the goods stands back of them.
- 2nd That the Prairie Farmer stands back of them.
- 3rd That the merchant handling the goods stands back of them.

"TRIPLE-Guarantee Goods"

Are the best value for the money.

Safest to buy.

And Satisfaction is absolutely insured!

What Are "TRIPLE-G" Goods?

WHY should you ask for them and refuse any other kind?

WHEN a reader of Prairie Farmer goes into a store to buy, he is assured of getting full value for his money if he insists on buying only well known advertised goods and refusing to buy any unknown brand substitute.

WHY? Because advertised goods are well known goods that are backed up with the guarantee of PRAIRIE FARMER and the manufacturer. If the goods are not as represented in the advertising, or do not give full satisfaction, this TRIPLE GUARANTEE means that you have only to make your complaint and that any just claim will be fairly considered and your money paid back in case the goods are not as represented. This is PRAIRIE FARMER'S FAIR PLAY POLICY with its readers. We back up every advertisement in PRAIRIE FARMER and guarantee honest treatment. No humbugs, swindles or cheap substitute goods (that are made to sell and get the customer's money on false pretenses) are advertised in PRAIRIE FARMER. Buy the goods advertised in PRAIRIE FARMER and in this Directory and you are taking no chances. You are guaranteed satisfaction because all goods we advertise are

TRIPLE-GUARANTEED GOODS

We Recommend and

GOOD PURE BRED STOCK, well cared for, and well fed, gives good results. Have you a nice herd of milch cows and a good silo on your place? If not, you are all out of luck, for the best farmers in the country tell us that the dairy business is more profitable than any other product produced on the farm.

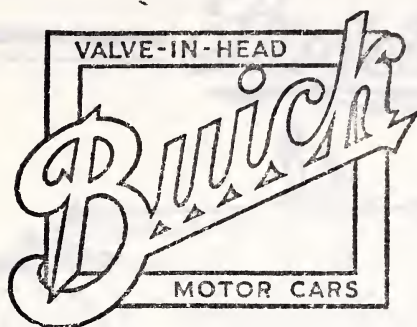

We are spending thousands of dollars to fit our plant for all the good, well-cared for milk that can be produced in a radius of 15 miles of Kankakee. So if you are not one of our many well satisfied milk producers, get in line. We will be glad to have you call at our factory when in town and talk the matter over with our creamery foreman.

KANKAKEE PURE MILK CO.

KANKAKEE

THOROUGH INSPECTION SERVICE FOR EACH

BUICK SIXES

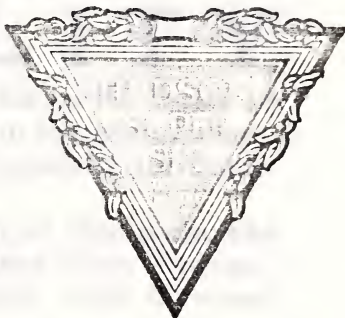

Dependable for all weather—cross country touring winter or summer. The Buick valve-in-head motor conserves and uses a larger percentage of power contained in gasoline than other types of motors.

Beautiful body lines—comfortable driving and passenger compartments. Every recognized accessory in its equipment. Appointments for demonstrations when desired. Ask for catalog.

THE HUDSON SUPER-SIX

A home car—a family car—for modest speeds—for every day use. Its many speed records proved its endurance; that is why abnormal tests were made. To prove endurance a stock chassis went 1,819 miles in 24 hours. A 7-passenger Super-six broke the transcontinental record San Francisco to New York and return—7,000 miles—in 10 days and 21 hours. Few want to travel so fast, yet it is a pleasure to know that your car—the Super-six—has this endurance. Let us demonstrate a Super-six at your home.

The Super-six 4-passenger speedster is ready for your inspection.

THE FORTIN SERVICE embraces repairing, painting, cylinder re-boring, battery repairing and recharging, tire repairing, magneto overhauling and remagnetizing, starting and lighting systems repaired and overhauled.

CAR SOLD — INVESTIGATE BEFORE YOU BUY

Studebaker

Established 1852

DURABILITY

One thing that adds excess value and life to the Series 18 FOUR and SIX is the special steels used in the manufacture, made to Studebaker's own specifications especially for Studebaker cars.

Another is the scientific heat treatment of vital parts, like gears, axles, axle shafts, etc., which makes them stronger, longer-wearing, and permits lighter weight with increased strength.

A third is the absolute accuracy of Studebaker manufacturing processes, and the resulting perfect fit and alignment of all parts, and perfect balance of motor parts and the entire car, reducing friction and wear to the very lowest point.

This is why Studebaker Cars "stand up," give continuous service month after month, year after year, with low up-keep cost. This is why a Studebaker in the end is one of the most economical cars in the world to buy.

Come in and let us give you a demonstration.

SERVICE

To you, real service means being able to get what you need when you need it—what you want when you want it—correct information when you request it.

All this we are able to, and do furnish our customers through our dealer, sales and expert organization.

REACHES YOUR VERY DOOR

Being centrally located our service is readily accessible to every farmer of Kankakee County.

This is the only kind of service that is worth while, because it means dollars and cents to you. Make sure that the emblem of this service—the I H C trade mark—appears on your next farm machine.

ELECTRICITY FOR EVERY FARM

Make Your Home Modern With DELCO-LIGHT

Have—

Bright, Safe Electric Lights in the home.

Electric Power for household and farm machinery.

An electric water system with running water for modern bathroom, kitchen, laundry, sprinkling and stock.

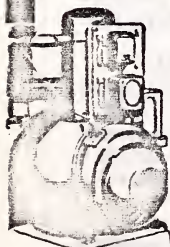

Electric Heat for flat iron, toaster, percolator, warming pads.

A modern country home will hold the boys and girls against the lure of the city. It will make a mighty fine haven for your own increasing years.

Investigate Delco-Light. Learn how it makes a modern home possible. The booklet tells about it. Call or write for it.

To Owners of Ford Cars

The Ford Motor Company of Detroit appointed us authorized agents for Ford cars in this territory. To properly represent Ford interests the company in return demands that we equip and maintain an adequate service station, employing competent Ford mechanics, using only genuine Ford made materials and charging regular Ford prices. This is the service we are giving to Ford owners—material, workmanship and price—the standard of each guaranteed. When your Ford car needs attention bring it to us and get the benefit of expert Ford mechanics. We give you the assurance of genuine Ford service, with genuine Ford made parts.

"My Last Winter In this Climate"

Have you ever silently made this resolution to yourself, when snow and slush was hub deep on the road? Have you ever considered what you are losing in money, health and happiness by not accepting an opportunity to

PROCURE A FARM IN THE SOUTHLAND?

Where a remarkable fertile soil and perfect climate make the opportunity for crop production unlimited.

A country that is renowned for the quality of it's crops—their variety and rotation—and the rapidity with which they mature. Also the splendid prices they command. We are offering unheard of bargains in southern farmlands, and would like to tell you about them—if you will call or write

You Know

Every experienced man knows that in the final analysis there is no fuel that can equal good anthracite for steady, even, economical heat and lasting satisfaction.

Foremost among anthracite coals is Lehigh Valley. Rich in carbon, clean, steady-burning—this coal is just the thing for your baseburner or furnace.

You make no mistake when you burn

Lehigh Valley Anthracite

The Coal That Satisfies

It is free from rock, slate and bone coal. It is prepared with exacting care and reaches you as free from foreign matter as coal can be.

We have a large supply on hand and can deliver any size (egg, range or chestnut) on the day the order is placed.

Just call 1400 on either phone. The Yellow Wagons deliver very carefully.

HEALTHFUL HEAT

Warm air heating is acknowledged to be the most sanitary, economical and satisfactory system to use. We are specialists in this work and have the largest and most complete line of warm air heating apparatus in the county. It will pay you to get our prices before you buy your next heating plant.

ROOFING AND SHEET-METAL WORK

We do all kinds of slate, tin and composition roofing, and sheet metal work of all kinds, including gutters, valleys, downspouts, ridge roll, ventilators, etc.

We also carry a complete line of high grade asphalt shingles and prepared roofings at lowest prices.

Comforts You've Always Wanted

You can have them. The cost likely is less than you think. Running water—hot or cold, hard or soft, in kitchen, bathroom and laundry is economically furnished by

Leader Water Systems

Tell us what you want and let us figure on the cost. Why carry water any longer? Get a Leader Water System and you will be rid of this biggest single job—furnishing water for your household. Hand, gasoline (as shown here) or electric outfits.

The Leader Electric Drive outfit pumps 1000 gallons for 9 cts.

We are ready to install a system for you now.

MR. FARMER:

When you want to borrow some money on that farm of yours, come in and talk it over with us. We have been loaning money on farms for over thirty years. Our rates are low and our terms very liberal.

We make a specialty of handling co-operative and equity live stock shipments direct from the producer to the market, saving the middleman's profit. We solicit letters of inquiry and glad to explain our system of marking and handling co-operative shipments.

When in need of any stock for feeding or grazing purposes, it will pay you to consult us, as we have skilled buyers in all departments to look after our patrons' interest.

Money to Loan

We can loan \$100 per acre at 5 per cent on farm lands; 6 per cent on city property. Have money the day you want it.

CARLIN BROS.
112 East Court St.,
KANKAKEE, ILL.

Bang! Goes a Tire— But We Can Fix It

You would be surprised to see some of the tires we have repaired and restored to service. Don't despair of a tire until you have shown it to us. If we say it is gone there is no hope for it, but if we say we can repair it there are many more miles in it for you at very small expense.

MANTENO, ILLINOIS

BIRDSEYE VIEW OF THE BUSINESS SECTION OF MANTENO, ILL.

There Are No Skyscrapers in Manteno, But There is Lots of Room, Something That is Lacking in Many Large Towns

LIMIT YOUR SPENDING

and save the balance—that is a better way to get a start financially than to limit your saving and spend the balance.

With capital—reserved funds—you are ready for business opportunities which surely come to you. Remember, it is

NOT YOUR SAVING

alone that will make you independent. Your money must be in a safe place and must work for you.

YOU can have any kind of a silo you want. One that does not require painting, repairing, tightening of hoops, rebuilding after windstorms, and complete replacement after fire. The kind that will at once start returning 100 per cent yearly; or would you rather have the other kind?

All of the requirements for a good silo can best be met by concrete construction only. The concrete silo is airtight, water-tight, rat-proof and free from the need of repairs and it is permanent. Join the money makers and arrange now to build a concrete silo built by

GLUE METHOD OF INOCULA- TION

By Frank I. Mann in Prairie Farmer.

The glue method of inoculating clover and alfalfa seed is not only cheap and easy, but it is nearly "fool proof;" that is, it is not necessary to be very particular about all the details to have it successful in its results. A pound of glue may be dissolved in a gallon of water or in two or three gallons of water, without any appreciable difference in the results; and a quart of dry dirt, or a gallon of dry dirt, may be sprinkled on the seed after it has been moistened with the glue water. As a rule, about a quart of dirt may stick to the seed, and the rest of the dirt may be screened out or not, just as you prefer, as the amount of dirt is not material, if there is enough. In preparing the dirt, however, a little care should be used to secure it from a place where the bacteria are active, as shown by the nodules formed, and if the host plant, in this case sweet clover, has grown in the same place for several years the inoculation will be better. This dirt should not be dried in the sun, as direct sunlight is fatal to bacteria of nearly every kind. The dirt should be finely pulverized and sifted through a fine sieve, but this is not much trouble, as so small an amount is used.

LIVESTOCK FARMER'S MEDICINE CHEST

By Dr. A. S. Alexander in *Prairie Farmer*.

When a farmer can employ a competent graduate veterinarian at reasonable expense it always is best to do so, and in all serious cases such expert help should be used even if the expense will be considerable. Unfortunately it is not always possible to find such an expert or he may live at such a distance that an ordinary or trivial case will not warrant the expense of his employment, or the nearest veterinarian may not be a properly qualified practitioner, or is one in whom the stockman has no confidence.

For these reasons every owner of animals should keep some simple remedies on hand, and these are necessary even on farms where professional assistance can readily be had. It should be understood, however, that the untrained farmer should not attempt the administration of strong poisons, alkaloids and many preparations used hypodermically by a graduate veterinarian. Such preparations are extremely dangerous in the hands of the layman and are liable to do much more harm than good. The trained surgeon also should be depended upon for all major operations.

A cupboard may be set apart for storing medicines in a cool, dry place and where freezing will not occur in winter. A glass graduate and scales will be necessary for measuring and weighing medicines. Powdered drugs should be kept in tightly closed glass fruit jars and should be plainly labeled. They may soon lose their strength if exposed to the air. Poisons should be kept on a separate part of a shelf partitioned off for the purpose and away from simple, harmless drugs. Ointments, with the exception of fly blister, should be made up fresh at time of use. Liniment may be prepared and kept indefinitely if well corked.

The medicine case should also have a special division in which to keep a few instruments, bandages, suture silk

and absorbent cotton; or better still, these may be kept in a handbag for immediate use as required. The emergency bag should contain a roll of absorbent cotton, several rolled three-yard bandages of unbleached muslin in strips three inches wide, a pound or two of oakum, a spool of strong suture silk, half a dozen suture needles of assorted shapes and sizes, most of them large; a half-ounce, short-barreled, strong-nozzled hard rubber syringe, a two-ounce metal syringe, a cow trocar and canula for tapping a bloated animal, a pair of curved shears, a combination operating knife containing a curved bistoury, a probe pointed bistoury and a strong straight scalpel, a few milking tubes and a teat bistoury, an artery forceps, metal probe, castrating knife and pair of horse clippers.

These will suffice, but there are many other useful instruments such as a clinical thermometer, horse trocar, catheter and dentistry "float," which may be added from time to time. Some of the medicines to be listed later may also have a place in the emergency kit or bag, notably those needed for the treatment of wounds, and at hand should be a strong quart drenching bottle and ten feet of quarter-inch cotton rope with which to hold up a horse's head for drenching. A veterinary force pump is added on a large farm, but its place may be taken by three feet of new lawn sprinkling hose fitted with a large tin funnel. This is used to give a horse or cow a rectal injection. There should also be a six-foot piece of new half-inch rubber tubing for use in giving a cow or mare a vaginal injection.

Simple necessary medicines may best be listed under the following special heads:

Physics.

Epsom and Glauber Salts. Average dose for an adult cow, one pound in

three pints of warm water. Dose for a horse, 12 ounces.

Castor Oil. Especially useful for young animals. Dose for a calf or foal, from 1 to 6 tablespoonfuls shaken up in milk.

Raw Linseed Oil (not boiled, which is poisonous). Average dose, one pint for constipation and to follow a dose of colic medicine, or contain medicine for colic.

Barbados Aloes (freshly powdered). Average dose, one ounce, to be given to an adult horse as a "physic ball."

Wound Medicines.

Keep in stock one pint each of carbolic acid and coal tar disinfectant and a gallon can of the latter for dipping and disinfecting purposes. Two teaspoonfuls to a pint of water ordinarily makes a sufficiently strong solution. Bleeding is stopped by applying Monsel's solution of iron on oakum or cotton batting, or applying Monsel's powder. As a wound lotion also keep on hand a mixture of one ounce of sugar of lead and six drams of sulphate of zinc in one pint of water. This is called "white lotion" and should be plainly labeled "poison" and well shaken before use.

Dusting Powders.

A dusting powder of equal parts of slacked lime, charcoal and sulphur is useful for application to surface wounds and sores. Boracic acid also is needed and a little iodoform may be added to keep flies away.

Liniments.

Keep on hand a pint (pound) each of turpentine and aqua ammonia. One ounce each of these mixed with a pint of soft water, in which two raw eggs have been shaken up and the mixture left for 24 hours, will make a good stimulating liniment; or one ounce of each may be mixed with 6 to 14 ounces of raw linseed oil to make a very strong or comparatively mild liniment.

Lotions.

"White lotion" for wounds has already been mentioned. Equal quantities of lime water and raw linseed oil make "carron oil," an excellent lotion for burns. Two to four ounces of Goulard's extract and one to two ounces of glycerine in one quart of

soft water form a useful lotion for scratches and mud fever of itchiness and "gumminess" of the legs. A good lotion for inflammation of the udder is made by mixing together one part each of fluid extracts of poke root and belladonna leaves and one part of turpentine with five parts of sweet oil, melted lard or camphorated oil. It is made weaker or stronger as required. Anodyne lotion for painful swellings is made by combining equal quantities of tinctures of opium, aconite, belladonna and druggists' soap liniment. A small quantity of chloroform may be added. Mouth lotion consists of an ounce of powdered borax or alum in a quart of soft water; eye lotion of half a dram each of sulphate of zinc and fluid extract of belladonna in a quart of soft water.

Tonics.

Fowler's solution of arsenic is a good general tonic for rundown, thin, hidebound horses and those afflicted with chronic skin diseases or heaves (broken wind). The average dose is half an ounce (one tablespoonful) given night and morning until one quart has been given. The medicine may then be gradually discontinued, taking at least a week to the work. Dried sulphate of iron (copperas), dose one dram night and morning, is another good tonic, commonly combined with an equal dose of ground gentian root or ginger root, nuxvomica, saltpeter and fenugreek as a condition powder. The dose is one tablespoonful of the combination of drugs mixed in the feed night and morning for ten days. Omit sulphate of iron for pregnant animals. Nux is poisonous and must therefore be given with care. It is most useful as a nerve tonic and appetizer.

Colic Medicines.

Keep in stock one pound each of laudanum (dose, 1 to 2 ounces); essence of ginger root (dose, 1 to 2 drams); sulphuric acid (dose, $\frac{1}{2}$ to 1 ounce); turpentine (dose, 1 to 2 ounces); granular hyposulphite of soda (dose, 1 to 4 ounces). A dose of each of the first three medicines in a pint of water containing two ounces of hyposulphite of soda will prove effective for most colics. Two ounces of turpentine in a pint of raw linseed oil may be given for "wind" (flatulent)

colic, or following the other medicine when the pain of "cramp" (spasmodic) colic has subsided.

Fever Medicines.

Powdered saltpeter is an important drug for animals. It is given in the fever of influenza, founder (laminitis) or lymphangitis (milk leg, also for stocking of the legs and other large swellings. A dram is the average dose. Give it every four or six hours in fever, twice daily for swellings, or with tonics as a condition powder, and in double doses for founder or milk leg. Do not give it in colt distemper, when abscesses are forming. It may often be administered in drinking water or a bran mash or damp feed. It also is given in tablespoonful doses once or twice daily for garget of the cow. Beware of aconite often given for fever. It is too dangerous a poison to be safely used by anyone other than a trained doctor.

Blister.

An effective blistering ointment is made by melting together three parts of lard and one-quarter part of finely shaved yellow beeswax, and then stirring in one part of powdered cantharides (Spanish fly). Stir in a tin dish until cold, then store in a capped glass fruit jar. It improves with age. When using this blister clip off the hair, wash the skin clean, dry it perfectly. Tie the horse up short in his stall, rub the blister in for fifteen minutes and then smear on some more blister. Wash the blister off in 48 hours and then apply a little lard daily. Do not cover a blistered part, or rub it on the loins, or on top of the hips, or use it after a poultice, or on irritated skin, or in very hot or cold weather.

Absorbents.

Never be without tincture of iodine to swab on swollen glands, tumors, forming abscesses, bony growths, capped or puffed joints, indolent sores or wounds, canker of the mouth in pigs and ringworm spots. It also is useful to inject into abscesses, fistula and lump jaw cavities. Iodine ointment is made by mixing one dram each of iodine crystals and iodide of potash in one ounce of lard. This is used on swellings, sore necks and shoulders, puffs of all sorts, tumors,

forming abscesses, ringworm spots and enlargements of the udder. As an absorbent blister rub up one dram of biniodide of mercury with two ounces of the fly blister already mentioned and use on bony growths, such as splints and ringbone, callouses, indolent sores, tumors of the udder.

Worm Medicines.

Gasoline is kept on most farms and in tablespoonful doses in six ounces of milk is the best remedy for stomach worms in sheep. Lambs take less in proportion. Two ounces of turpentine in a pint of raw linseed oil is effective as a starting dose for a "wormy horse." Follow with worm powders composed of equal parts of salt, sulphur and dried sulphate of iron. Dose, one tablespoonful night and morning for a week, then skip ten days and repeat. Omit iron for pregnant animals. For worms of swine give one teaspoonful of turpentine in slop for three consecutive days for each eighty pounds of body weight; or one dram of dried sulphate of iron in slop for five successive mornings for each hundred pounds of body weight. Where swine are known to be seriously infested with worms, give eight grains of santolin and five grains of calomel in a little slop for each hundred pounds of body weight. Divide the pigs into lots of five and give the medicine in a little slop after starving the animals for eighteen hours. Care must be taken to give only the doses here prescribed, else damage may be done.

Disinfectants.

In the paragraph on wound medicines it has been advised to keep carbolic acid and coal tar disinfectant in stock. To these may be added formaldehyde, bichloride of mercury tablets and permanganate of potash crystals. In disinfecting a stable a solution of four or five ounces of formaldehyde to the gallon, or a 1-1,000 of bichloride of mercury (corrosive sublimate) or a 1-30 solution of carbolic acid or coal tar disinfectant should be used after a thorough cleansing of the premises. For wounds a 1-1,000 solution of corrosive sublimate also is the most effective disinfectant and a 1-500 solution should be used for disinfecting when a spore-forming germ, like that of anthrax, is pres-

ent. Permanganate of potash is a useful mild disinfectant (antiseptic and deodorizer) in a 1-5,000 to a 1-50 solution. The weaker solution is used lukewarm for vaginal injection purposes, while the 2 per cent solution is useful for injection into cavities from which come bad-smelling discharges and for swabbing sores (cankers) of the mouth. As a wound lotion it is usual to employ a 2 to 5 per cent solution of carbolic acid, or lysol, or coal tar disinfectant. Carbolic acid is also much used as an internal disinfectant in contagious abortion. Two drams of the acid is well diluted with water and mixed in soft feed for each pregnant cow every other night throughout pregnancy. Peroxide of hydrogen one part and clean water two or three parts is a popular disinfectant for cleansing foul wounds.

Scour Medicines.

The farm medicine chest would not be completely stocked without some remedies for diarrhoea or scours. A mixture of one part of salol and two parts of bismuth (first prescribed years ago by the writer) has become a standard remedy among farmers. The average dose is one teaspoonful given two or three times a day and washed down with milk or water. The dose may be doubled in bad cases and for larger calves and foals. Prepared chalk, powdered alum, sulphur, powdered catechu, rhubarb and ginger root are also much used for diarrhoea.

Administering Medicines.

Small doses of liquid medicine, such as the average two-ounce dose of a fever medicine or tonic solution, are best given by means of a half-ounce hard rubber syringe. Expert veterinarians sometimes give such medicines or bad-tasting drugs in gelatine capsules, or in form of a "ball." Worm, condition and tonic powders are mixed in damp grain feed. A large dose of liquid medicine is termed a "drench" and is given from a strong, long-necked bottle. A few inches of rubber hose may be fitted on the neck of such a bottle.

To drench a horse, back him into a stall, place a running noose of soft, small cotton rope or "clothes line" upon the upper incisor teeth, under the upper lip, and draw the noose tight, with the knot of the rope to

the front. Throw the loose end of the rope across an overhead beam, raise the horse's head, hold it there by means of the rope and pour the medicine into the mouth a little at a time until all is swallowed. Do not squeeze the throat of the horse when giving medicine and never pour the medicine into the nostril. If the horse will not swallow, pour a teaspoonful of cold water into a nostril and swallowing will instantly occur.

To drench a cow, place her in a stanchion or tie her in a stall. Walk up on her right side (milking side). Pass the left hand across her face and into her mouth. Hold her head in a straight line forward and slightly elevated, not turned to one side. Pour the medicine very slowly into the right side of the mouth. Let the head down instantly if the medicine causes the cow (or horse) to cough. Fluid given too fast passes into the paunch and is practically wasted. Administered slowly, it largely goes to the third and fourth stomachs and absorption takes place in the latter.

Sheep have to be very carefully drenched from a bottle to avoid choking. Swine take medicine through a hole cut in the toe of an old shoe thrust into the mouth or from a short, strong rubber hose fitted in the neck of a strong bottle. Dogs take medicine in capsules inserted in meat or from a bottle or spoon emptied into a pouch formed of the lip and cheek.

Avoid "doping" animals unnecessarily. Medicine should only be given when the animal is sick, should be the right medicine, and is best prescribed by an expert.

VALUE OF LABOR

The United States Department of Agriculture found in 1855 that it required four hours and 34 minutes of human labor to produce a bushel of corn. At the Minnesota experiment station it has been found recently that 45 minutes of human labor is about the average time required for the same work. In other words, human labor is worth six times as much as it was 60 years ago, due to the use of better machinery, better varieties of corn and better soil management.
