FOREWORD

The writing of local history is always a detailed, tedious and worrisome task. The sources are generally not located in central depositories or in large libraries where efficient catalog systems make researching a pleasure; in most instances they are housed in local archives and small libraries where lack of funds has not permitted the employment of trained catalogers, or in private homes where they are without benefit of chronological or subject organization. Old settled families of local areas not infrequently urge the inclusion of ancestors or relatives beyond the contributions of the individual to the history or development of the area. The sale of the completed work is never large owing to the limited nature of the subject matter and in many cases the author is forced to bear the total expense of publication. Because of these and other reasons, therefore, the historian who works in the field of local history must be a dedicated individual whose sole aim is to rescue from complete oblivion and to present in workable form archive and manuscript materials for the use of general historians or to present tight or detailed studies of small segments of state history for the enlightenment of the citizenry of a particular state or specific local community.

The printed pages which follow represent a significant achievement in local archival research, in accurate transcription, and in the editing of this type of historical material. The editor is thoroughly trained in the field, is experienced in this particular area of research, and has been impelled by strong bonds of devotion to her native state. The value of the work is obvious to all persons interested in the history of Louisiana.

It is to be hoped that this book will serve as a stimulating force to Louisianians throughout the state for the encouragement of the writing of local history. While numerous books have been written on the general history of the state and although multitudes of monographs on specific fields of subject matter have been produced, there is indeed much which needs to be done. The complete, definitive history of Louisiana has not yet been written and will not be written until many, many spades have overturned many more areas of her rich historical earth.

HISTORICAL INTRODUCTION

That section of Louisiana known as the Attakapas District has a history that extends over a period of more than two hundred years. Between 1720 and 1744 St. Dennis, founder of Natchitoches and commandant there, established trading posts at what are now Opelousas and St. Martinville, and maintained at each place a merchant to trade with the Indians. The post at St. Martinville thus became the administrative seat of the district and came to be known as the Post des Attakapas.

The District of Attakapas received its name from the Attakapas Indians, a fierce tribe that inhabited the area before the coming of the white man. According to tradition these Indians were cannibals and waged such cruel war against others that the neighboring tribes formed a league against them and, in a great battle near St. Martinville, completely subjugated them and reduced them to a few scattering remnants, living in miserable villages located from Bayou Teche to Texas. They are now practically extinct.

The Attakapas District included originally the present parishes of St. Martin, St. Mary, Lafayette, Vermilion and Iberia. Prior to 1765 the population consisted of a few Indians, trappers, traders and ranch owners. In 1765 Commissioner Aubry reported that he sent two hundred and thirty Acadians to the Attakapas District. These were granted lands in the district and, with other later Acadian arrivals, made up the basis of the present population, though four years later three hundred Spaniards from the Canary Islands settled near the present city of New Iberia. A census of the district taken a few years later by Governor O'Reilly gave the entire district a population of less than eight hundred.

Prior to the Spanish occupation of Louisiana the Attakapas District was governed from New Orleans, though the French officials seldom visited the district. It was not until 1768, when Spanish governor O'Reilly came into office, that any special attention was given to the Attakapas District. Under the Spanish policy of encouraging agriculture and maintaining a strong government in all parts of the territory, the small settlement and trading post at present St. Martinville was in 1769 converted into a permanent military post, and a resident commandant appointed to enforce Spanish law and keep the peace. Among those who served as commandants were Gabriel Fuselier de la Claire, Chevalier Alexandre DeClouet and Louis Charles de Blanc.

This station now became known officially as Postes des Attakapas and henceforth all civil and military affairs of the district were administered from this post by the commandant. In addition to being leader of the militia this official also exercised powers similar to those possessed by a justice of the peace. He had jurisdiction over disputes between citizens involving amounts up to twenty dollars. He was the executive officer of the district enforcing all judgments, serving as notary and as judge in the settlement of estates. As military officer he examined all passports of strangers and allowed no one to settle in his district without a permit from the governor. In certain cases he was authorized to perform the marriage ceremony in the absence of a priest.

When the Louisiana territory became a possession of the United States with William C. C. Claiborne as its first governor, Congress divided the territory into two parts with that portion south of thirty-three degrees of latitude designated as the Territory of Orleans, which, with certain changes and additions became the present state of Louisiana. In 1805 Governor Claiborne's legislative council divided the Territory of Orleans into twelve counties, one of which became Attakapas County that included the territory comprising the five parishes named above. This division having become unsatisfactory to the inhabitants, the legislative council in 1807 discarded the county set up except as a unit for levying territorial taxes and representatives. At the same time the territory was divided into nineteen civil parishes. Under this act the county Attakapas became St. Martin Parish, being named after St. Martin, the fourteenth century French Bishop and Saint.

In 1811, one year before Louisiana became a state, the territorial council decreed: "The County of Attakapas shall be divided into two parishes to be called the Parish of St. Martin and the Parish of St. Mary." By act of January 17, 1823, the Louisiana legislature directed: "The Parish of St. Martin is and shall be by the present act divided and a new parish be formed out of the western part of the said parish, which shall be called and known by the name of the Parish of Lafayette." An act of 1844 cut off the southwestern part of Lafayette Parish and formed it into Vermilion Parish. Iberia Parish was created in 1868 from territory taken from St. Martin and St. Mary Parishes. Thus was the Attakapas District divided into the five present day parishes named above, with parish seats at St. Martinville, Franklin, Lafayette, Abbeville and New Iberia, respectively. All are now flourishing, modern cities.

While the territorial and political evolution of the Attakapas District is now fairly well known, there is yet much to be learned about the families that settled in this rich and populous region. Any research that will throw light on the genealogies of these pioneer families and their descendants will be most welcome, and that is what is undertaken in the following pages.

PREFACE

It had been a fond hope of mine for some time to do genealogical research in the Attakapas area. Since my people settled in what later became St. Mary Parish shortly after the Louisiana Purchase, I had done much research on my family at the Franklin courthouse. But I thought of the many descendants of the early settlers who are far from Louisiana, and I thought of how I might aid them.

The opportunity to do something constructive along this line came in the summer of 1961. I was then living in Lafayette, and my scope of the area had been enlarged. It occurred to me it might be helpful if the names appearing in the original sources for the whole District could be combined into one volume and indexed; then a clearer idea of those early comers could be ascertained. This is what I have done. Another volume, on St. Mary Parish settlers, is anticipated.

At first I planned the volume to be inclusive through the eve of the Civil War, 1860. The material covering such a long period of time was too voluminous for one book. however, so I chose the year 1811, when St. Mary Parish was created from St. Martin Parish (the old Attakapas District), as my cut-off date. I found brands existing in the Brand Book back to 1739 — hence the dates, 1739 - 1811. Because 1813 was so close upon the heels of 1811, because the tax list of persons in St. Mary Parish in that year is so valuable and because St. Mary Parish included such a large portion of the whole area under consideration, I decided to include the 1813 tax list for St. Mary even though it post-dates the cut-off date.

Dean Griffin has indicated in the Introduction that after the Louisiana Purchase the area which is now the state of Louisiana except for the Florida Parishes was organized as the Territory of Orleans. The Territory was, in turn, divided into twelve counties, one of which was Attakapas County, comprising the current parishes of St. Martin, St. Mary, Lafayette, Vermilion, and Iberia. This large area roughly was the Attakapas District (with the Post des Attakapas) of the colonial period, and it was the Attakapas County of the American State Papers. It was also the St. Martin Parish (or Attakapas) of the 1810 Federal Census. It is this area which is embraced in this volume.

In compiling data for the book I was faced with two serious handicaps. The first and most important was a lack of knowledge of French and Spanish — the early records in the courthouse at St. Martinville being in those languages. The other was unfamiliarity with the evolution or background of French surnames. Two years of high school French enabled me to distinguish serious mistakes pertaining to the early French documents in the indexing: for instance, in one marriage contract the mother of the groom was referred to as the bride; in another, a document was indicated as being a marriage contract when it was not. But I was totally unable to read a document and distinguish what it was or what it was about.

Here let me impress upon the reader the fact that this work, especially the section on the St. Martin Parish records, is intended as a guide only. I

have tried hard to avoid errors but the chances for errors to creep in, especially in the St. Martin Parish records where I had to depend almost wholly upon the extant indexes, are all too numerous.

I also ascertained that the French were not at all consistent in what they called themselves; even to the point where they completely reversed their entire names! And those "dit's"! I depended upon my own ingenuity and deciphered them as best I could. The responsibility is solely mine, whatever the result may be.

I am reconciled to the fact that errors are probably in the book. For these I am sorry. I do believe, however, the work will be useful as a guide to descendants of both the Latin and Anglo-Saxon settlers of the early period.

I am indebted to many persons who were in a position to help me. Officials at the University of Southwestern Louisiana showed me every courtesy possible. Notably, Dr. Elmer D. Johnson, Director of Stephens Memorial Library, and Dean Thomas J. Arceneaux of the College of Agriculture, who helped me with the Brand Book. It is Dean Arceneaux to whom I am indebted for background on the Brand Book. Miss Pearl Segura, Reference Librarian at Stephens Memorial Library, helped me in so many ways; she answered numerous questions pertaining to the Brand Book and she gave me copies she previously had had typed of the militia lists from the Sons of the American Revolution Spanish records microfilm. Harry Lewis Griffin, Dean Emeritus of the College of Liberal Arts, answered questions about early history of the section, and I am indebted to him for writing the Historical Introduction.

Dr. Edwin Adams Davis, Head of the Department of History at Louisiana State University, one of my graduate professors at the University, gave me needed advice, and I am indebted to him for writing the Foreword. Mr. L. C. Landry, Jr., of New Iberia was most generous in sharing the fruits of his own efforts with me and with his time. Mr. M. A. Barras, Clerk of Court of St. Martin Parish, and his staff were very kind and helpful. I am grateful to Mr. Charles E. East of Baton Rouge, a friend for a number of years, for reading portions of the manuscript and for his helpful suggestions.

This is primarily a genealogical work; therefore, except with regard to the land claims from the American State Papers and the Federal Census of 1810, the material in this work pertains to descendants of European ancestry.

BRAND BOOK FOR OPELOUSAS AND ATTAKAPAS

DISTRICTS, 1739-1888

Cattle raising had an early beginning in the Attakapas-Opelousas area. The eighteenth century French historian, Le Page du Pratz, tells us that the Avoyelles Indians early traded with the Spanish in Mexico, from whom they introduced horned cattle to the area.* These animals were growing wild on the Louisiana prairies by the time New Orleans was founded.

When the Acadians began to arrive in the Attakapas region, the Commandant at St. Martinville, Dauterive, induced them to start raising cattle beginning with the domesticated descendants of the early horned cattle from Mexico which were found here. The Acadians had engaged in cattle raising in Canada, and they rapidly developed the industry here. By the time of the Louisiana Purchase it was a large industry, and brands were of necessity registered in the courthouses.

In 1824 the state of Louisiana established a Branding Commission to prevent confusion as to brands, comprised of the Attakapas and Opelousas districts solely. Branding officials were authorized to index the brands then existing in the courthouses. That index was the basis of the Brand Book for Opelousas and Attakapas Districts. Future registrations were added to the book until 1888, when a second book was begun. The State Branding Commission was established in 1944 and is still in existence.

In the listing below of those persons residing in Attakapas County, or St. Martin Parish, having brands registered through the year 1811, the person's name is shown, along with the year in which the registration was made and the page in the book where the brand was registered. In cases where an arabic figure appears in parenthesis behind the page number, that figure is an indication that the name appears that number of times on the page. Thus,

Hebert, Jean-1770-4 (2)

indicates that Jean Hebert had brands registered in the year 1770 on page 4 twice. Where there is more than one page number involved, the figures are separated by commas. Where more than one year is involved, the years are separated by commas. Thus,

Hebert, Jean-1770-1, 4

indicates Jean Hebert had two brand registrations in 1770, one entered on page 1 in the Brand Book, the other on page 4; whereas,

Hebert, Jean-1770, 1791-1

indicates he had brands registered in 1770 and 1791, both appearing on page 1. Had the registrations been on different pages, they would have been shown separately.

In the book the exact date of registration is usually given. I copied only the year. The brand itself is also, of course, given in the book.

From the use of the words "fils" and "pere" ("son" and "father" in French), I judge the words were used more or less as we use "junior" and "senior" today. In a few cases this is also true of "grand" and "petit" ("large" and "small"). Notations in French have been copied where they appeared pertinent. In a few instances the names at the bottom of a page were so faint as to be illegible. Frequently the handwriting was hard to determine. Spellings of names varied; I tried to group the different spellings where it seemed they belonged. Errors may have crept in, and I caution the researcher as to this.

Where no dates were shown and the indication was that the brand was "probably" registered in a stated period (indicated by "prbly"), this assumption was made because the brand was entered with others of the same general period. When the word "possibly" was given (indicated by "psbly"), there was reason for a somewhat weaker assumption. The designation "1800's" signifies the early years 1800 through 1811.

There were a number of markings pertaining to Brand Book entries whose meanings were not clear. I copied these just as they were and put a question mark in parenthesis behind them. There is repetition in the Brand Book to some extent.

*Histoire de la Louisiane. . . avec deux voyages dans le nord du Nouveaux-Mexique. . . (3 vols., 1758, Paris, DeBure, l'aine, etc.)

Note: Frequently in the Brand Book only the surname was listed. When a surname was spelled more than one way it was so indicated. For example, on page 14 the listing "Gerior, Giroir." The brand was listed merely as registered to "Gerior." Since the name was also spelled "Giroir," both spellings were shown.

RECORDS OF ST. MARTIN PARISH

Dean Griffin has pointed out in the historical introduction that the first influx of population to Attakapas was in 1765 when 230 Acadians were sent to the district, and it was not until 1769 that a permanent military post was established there. There were, however, brands registered in the Brand Book as early as 1739; and there were sufficient inhabitants around to warrant the keeping of records as early as 1760, for the records at the courthouse in St. Martinville begin in that year. The earliest records there are known as "Original Acts."

I have divided the St. Martin Parish records into five lists. The first is a marriage index compiled mainly from the general index to marriages and from the index to the Original Acts. The list is alphabetized according to the groom's name, the date is given, followed by an OA (Original Acts) number, being the Original Act book and folio number of the document in the book. Thus

Hebert, Jean-Marie Meaux, 5/29/1771, St. Mart. OA 3-21

indicates the date of the marriage and that it is of record in Original Acts volume 3, being folio 21 in said volume. Marriage contracts are indicated by (*). Brides' names are shown in the general index in the back of the book, with identical information.

A second marriage list is comprised of marriages gleaned from other sources, and it is recorded in the same manner.

The third list is an alphabetical list of estates and wills from the Original Acts through 1805, when the County of Attakapas was created. These early wills and estates are shown with the year in which probated or opened and the reference. After the formation of the county in 1805, Estate Numbers were assigned, and these records are filed separately in the courthouse. The only information given with these estates is the date of opening. They comprise the fourth list.

The final list includes miscellaneous data which may be of help to the genealogist. Testaments were usually wills. Inventories were filed at times other than in connection with estates. Frequently they were filed at the time of marriage. These data are passed along as a guide to the researcher. The same OA and folio numbers apply as for marriages, as outlined above.

ATTAKAPAS SPANISH MILITIA

Mr. C. Robert Churchill became president of the Louisiana Society, Sons of the American Revolution, in 1916. Mr. Churchill soon became impressed with the fact that there were numerous descendants in Louisiana who were eligible for membership in both the Sons of the American Revolution and the Daughters of the American Revolution by virtue of Galvez's attacks upon the British at Baton Rouge, Mobile and Pensacola in 1779, 1780 and 1781. The result of his quest for proof of this was an unpublished manuscript which is entitled: S. A. R. Spanish Records; Spanish-English War, 1779-1783.

There were originally five copies of the manuscript. The original was revised in 1925. Microfilm copies of the revision are now extant, one being in Stephens Memorial Library at the University of Southwestern Louisiana. Miss Pearl Mary Segura, Reference Librarian at Stephens Memorial Library, had the entire manuscript transcribed by type from the microfilm. Very generously, she made the portions of the transcriptions pertaining to the Attakapas District available to me for inclusion in this work.

It should be remembered that the men included in these lists were militia men and that in addition to them there were other men in Louisiana who served in the Spanish regular army and whose descendants are eligible for membership in the D. A. R. and S. A. R.

ATTAKAPAS MILITIA CENSUS OF 1792

In the summer of 1961, about the time I started collecting data for this work, Mr. L. C. Landry, Jr., of New Iberia was browsing around the courthouse at St. Martinville. Thumbing through the old volumes of the Original Acts he came across the militia census of 1792. It was not dated, but a recapitulation which was quite similar followed closely upon the census and was dated August 6, 1792. It seemed reasonable to Mr. Landry, and to me, that while it may not have been concluded on the same date, at least it was around August, 1792. Mr. Landry photographed the census from Original Acts Book 14 (it being folio 142), and very kindly let me have a copy for this work.

FEDERAL CENSUS OF 1810

Federal censuses have been taken at ten-year intervals since 1790, under the terms of the Federal Constitution. The originals of the census reports are in the National Archives in Washington, D. C. Microfilm copies of these reports are available in many libraries throughout the country. Since the area comprising most of the state of Louisiana was not acquired by the United States until 1803, the first Federal Census which included inhabitants in this area was that of 1810. As has been indicated, the Territory of Orleans was in 1805 divided into 12 counties which were superceded two years later by the 19 parishes. Following is a listing of the householders in the 1810 census for Attakapas (or St. Martin) Parish, one of the 19.

A question mark in parenthesis (?) following a name indicates that it appeared unclear for some reason; usually, the ink had faded to such an extent that the name was not quite legible. Straight lines for either a given name or a surname indicate that that part of the name was illegible. In some few instances both names were illegible, and in these cases the names have been left off the list entirely.

AMERICAN STATE PAPERS

In 1832 the Congress of the United States began publication of governmental legislative and executive documents. These documents were divided into ten classes: Foreign Affairs, Indian Affairs, Finance, Commerce and Navigation, Military Affairs, Naval Affairs, Post Office Department, Public Lands, Claims, and Miscellaneous.

These volumes are a primary source to the student of American history, and they hold much interest for the genealogist. Of prime concern to genealogists are the volumes of Class 8, Public Lands. These volumes cover the disposition of claims to public lands between 1789 and 1837. There are two editions of Class 8. The Gales and Seaton edition, which is the one I used at Louisiana State University, has eight volumes. The other, the Duff Green edition, has five. The page numbering is somewhat different, of course, in the two editions; but in checking in Volume II of the Duff Green edition, I found the page contents, of the material I used, to be identical.

There are Louisiana references in all eight volumes (Gales & Seaton), and I presume in all those of the Duff Green edition. I have reproduced here the four listings containing the largest number of names for the Attakapas area. The first is from Volume II; the other three are from Volume III.

"Rem:" on the line following the information indicates data in the "Remarks" column. There was not room on the sheet adjacent to the information given, and in addition, American State Papers gives in most cases size of the acreage involved. There was not room in the work for this latter information.

The following notation was made at the beginning of this listing. "The letter A is prefixed to the certificates issued on complete patents under the French or Spanish Grants, and the letter B to the patent certificates issued by the commissioners on claims founded on titles incomplete, anterior to the change of Government."

For this last segment of claims from Volume III the following explanatory notes apply. (Copied from Page 172.)

Class No. 1, will comprise claims for lands held under complete patents of unquestionable authenticity, which, having been filed with the Register previous to the dissolution of the Board of Commissioners appointed for the purpose of ascertaining and adjusting titles and claims to lands in the said district, and found of record, have been transferred to the said Board for confirmation, pursuant to the fifth section of an act of Congress entitled "An act for ascertaining and adjusting titles and claims to lands, etc." passed the 2d March 1805. See note A, at the end of the report. (Compiler's note: said note A is not attached herewith, nor are the other notes mentioned below.)

Class No. 2, will comprise claims founded on authentic orders of survey conceded by the Spanish Government of Louisiana, which, with or without proof of occupancy, ought, in the opinion of the said Register and Receiver, to be confirmed. See note B, at the end of the report.

Class No. 3, will comprise claims founded on requetes, approved and sanctioned by the competent Spanish authority, or for lands which may have been surveyed by an authorized Spanish surveyor previous to the change of Government; and which, whether accompanied or not by proof of occupancy, ought, in the opinion of the said Register and Receiver, to be confirmed. See note C, at the end of the report.

Class No. 4, will comprise claims unsupported by any requete or concession under the former Government of Louisiana; but which, from regular transfers of title, bearing date anterior to the change of Government, before the authority competent to judge, and whose duty it was to decide on the validity of the title of the seller, whether supported or not by evidence of occupancy, ought, in the opinion of the said Register and Receiver, to be confirmed. See note D, at the end of the report.

Class No. 5, will comprise claims for lands which have been occupied or possessed ten consecutive years previous to the 20th day of December, 1803, which, in the opinion of the said Register and Receiver, ought to be confirmed for the quantity of land claimed, or within the acknowledged and ascertained limits thereof, provided the same shall not exceed the quantity of two thousand acres, pursuant to the second section of the act of Congress of the 3rd March, 1807. See note E, at the end of the report.

Class No. 6, will comprise claims for lands on which settlements had been made prior to the 1st day of October, 1800; and inhabited and cultivated for three consecutive years from that date by persons over the age of twenty-one years, or the heads of families, and not claiming or holding, in their own right, any grants or concessions for other lands from the French or Spanish Governments, ought to be, in the opinion of the said Register and Receiver, confirmed, pursuant to the first section of the act of Congress of the 21st April, 1806, for the quantity claimed, or within the acknowledged and ascertained limits of the same, not exceeding one mile square, or six hundred and forty acres. See note F, at the end of the report.

Class No. 7, will comprise claims founded on occupancy subsequent to the 1st of October, 1800, and previous to the 12th day of April, 1814; and claims founded on occupancy, commenced previous to the said 1st day of October, by persons holding, or having held, other lands in their own names in Louisiana under French or Spanish grants or concessions; and which claims do not come

within the purview of classes Nos. 5 or 6, ought not, in the opinion of the said Register and Receiver, to be confirmed, the right of pre-emption to the extent of one hundred and sixty acres (a quarter of a section) being secured to the settler by an act of Congress passed the 12th of April, 1814. See note G, at the end of the report.

Class No. 8. will comprise claims which, being accompanied by no document of title of date anterior to the 20th day of December, 1803, nor proof of occupancy and cultivation prior to the 12th of April, 1814, ought not, in the opinion of the Register and Receiver, to be confirmed. See note H, at the end of the report.

Class No. 9. will comprise claims for land occupied as vacheries; and whether with or without evidence of occupancy, ought not, in the opinion of the Register and Receiver, to be confirmed. See note I, at the end of the report.

Class No. 10. will comprise claims for land purchased from Indians, or tribes of Indians, whose sales, not having been ratified by any Governor of Louisiana, are deemed null; and the claims such as, in the opinion of the Register and Receiver, ought not to be confirmed. See note K, at the end of the report.

Class No. 11. will comprise claims for land founded on documents of title, suspected to be counterfeit, or fraudulently obtained; and, in the opinion of Register and Receiver, ought not to be confirmed; as well as claims founded on evidence of occupancy discredited by the Register and Receiver. See note L, at the end of the report.

ST. MARY PARISH 1813 TAX LIST

For some reason the editor of the PLANTERS' BANNER (Franklin) in 1848 decided to publish the St. Mary Parish tax list for 1813. No particular reason was offered. It should not have been that it was the first such list, for St. Mary became a parish in 1811 and there should have been one for 1812, if not for 1811. Possibly it was then the earliest one in existence.

Because 1813 is only two years after the cut-off date for this work, and because the St. Mary Parish of 1813 represented a large segment of the old Attakapas District, I decided to include the tax list in this work on the old Attakapas District. The list may be found in the PLANTERS' BANNER issue of April 6, 1848, page 2, columns 4 - 5. The Louisiana State University Library microfilm department has a copy, and they photostated the page for me.

LIST OF PERSONS WHO WERE SUBJECT TO TAXATION IN THE PARISH OF ST.
MARY IN THE YEAR 1813

With the number of slaves in said parish; compiled from the Assessment Rolls for the Planters' Banner.

INDEX

The following abbreviations apply to the index.

BB - The Brand Book followed by year of registration and page in the book on which brand is found.

St. Mart. - A document found in the St. Martin Parish courthouse: a will, test. (testament), inv. (inventory). Estates after 1805 (est.) have an estate number; other documents have an "OA" number (Original Acts) followed by a folio number, which indicates in which Original Acts volume the document is of record and its folio number.

Mil. list - Followed by the year 1774 or 1777, the Attakapas Spanish Militia listing for either of those years. In other given years there are only officers.

1792 Mil. Cen. - Attakapas Militia Census of 1792.

1810 Cen. - Federal Census of 1810.

ASP - American State Papers, Public Lands, followed by a Roman Numeral II or III, indicating volume number, and an arabic figure, the page number.

St. Mary taxpayer - The tax roll for St. Mary Parish for 1813.

Ter. Pap. - Territorial Papers of the United States, ed. by Clarence Edwin Carter (Vol. IX: The Territory of Orleans, 1803-1812), followed by an arabic figure indicating page number where person's name is listed. This listing is so small that it was not shown individually in the work.

Av. - Calendar of Louisiana Colonial Documents: Vol. I (Avoyelles Parish) comp. by Winston DeVille, pub. by the Louisiana State Archives and Records Commission; symbol followed by the year in which the document was written and by another arabic figure which is its sequence number. There were only two references from this work, and they were not shown separately.

A broken line in the index indicates the first name was not given; a long unbroken line indicates the name was illegible. I have striven for simplicity in both the given names and surnames. It should be remembered that more than one individual may have been referred to.
