 Thomas's Wharf, 504 Davol

FALL RIVER STREET DIRECTORY

COPYRIGHT, 1905, BY SAMPSON & MURDOCK CO.

GIVING the location of the Streets, Places, Parks, Squares, etc., and showing what other streets and places run from them, or across them, with the number at which they intersect

From this list, the location of any number on a street, or the location of any public building, can be easily ascertained; as, for instance, wishing to know at what part of South Main Street No. 366 is located, you look at South Main Street, and find that Rodman Street runs from 326, and Morgan Street from 406, showing that 366 South Main would come on the left, between Rodman and Morgan Streets

When a street crosses another, numbers (or ciphers) are given on both sides; but when it begins or ends at that street, the number is given only on the side at which it intersects. Ciphers are used where no numbers exist
