THIS publication is issued under the authority of a vote passed by the NEW ENGLAND HISTORIC GENEALOGICAL SOCIETY, November 6, 1901, as follows:

Voted: That the sum of \$20,000, from the bequest of the late Robert Henry Eddy, be set aside as a special fund to be called the Eddy Town-Record Fund, for the sole purpose of publishing the Vital Records of the towns of Massachusetts, and that the Council be authorized and instructed to make such arrangements as may be necessary for such publication. And the treasurer is hereby instructed to honor such drafts as shall be authorized by the Council for this purpose.

THE TOWN OF WEYMOUTH, Norfolk County, was formerly called the plantation of Wessaguscus.

September 2, 1635, the name was changed to Weymouth.

September 3, 1635, bounds between Weymouth and Hingham were established.

March 9, 1637, Round Island and Grape Island were granted to Weymouth.

March 31, 1847, bounds between Weymouth and Abington were established.

Population by Census: 1790 (U.S.), 1469;
1800 (U.S.), 1803; 1810 (U.S.), 1889;
1820 (U.S.), 2407; 1830 (U.S.), 2837;
1840 (U.S.), 3738; 1850 (U.S.), 5369;
1855 (State), 6530; 1860 (U.S.), 7742;
1865 (State), 7975; 1870 (U.S.), 9010;
1875 (State), 9819; 1880 (U.S.), 10570;
1885 (State), 10740; 1890 (U.S.), 10866;
1895 (State), 11291; 1900 (U.S.), 11324;
1905 (State), 11585.

EXPLANATIONS

1. WHEN places other than Weymouth and Massachusetts are named in the original records, they are given in the printed copy..

2. In all records the original spelling is followed.

3. The various spellings of a name should be examined, as items about the same family or individual might be found under different spellings.

4. Marriages and intentions of marriages are printed under the names of both parties. When both the marriage and intention of marriage are recorded, only the marriage record is printed; and where a marriage appears without the intention recorded, it is designated with an asterisk.

5. Additional information which does not appear in the original text of an item, i.e., any explanation, query, inference, or difference shown in other entries of the record, is bracketed. Parentheses are used to show the difference in the spelling of a name in the same entry, to indicate the maiden name of a wife, to enclose an imperfect portion of the original text, and to separate clauses in the original text — such as the birthplace of a parent in late records.

1. The first of these is the fact that the English language is not a single, homogeneous entity, but a collection of many different dialects, each with its own unique characteristics. This is true of all languages, but the English language is particularly diverse, with a wide range of regional and social variations. The second point is that the English language is a living language, constantly evolving and changing over time. This is due to a variety of factors, including contact with other languages, changes in social structure, and the influence of new technologies. The third point is that the English language is a global language, spoken by people from many different cultures and backgrounds. This has led to a rich and diverse mix of influences, which has helped to make English one of the most widely spoken languages in the world.

1. The first part of the book is devoted to a general survey of the history of the subject. It begins with a discussion of the early attempts to explain the origin of life, and then proceeds to a consideration of the more recent theories. The author discusses the various hypotheses advanced by different scientists, and compares them with the facts known at the time. He also discusses the progress of the science of genetics, and the discovery of the structure of the DNA molecule. The second part of the book is devoted to a detailed study of the various theories of the origin of life. The author discusses the various hypotheses advanced by different scientists, and compares them with the facts known at the time. He also discusses the progress of the science of genetics, and the discovery of the structure of the DNA molecule. The third part of the book is devoted to a detailed study of the various theories of the origin of life. The author discusses the various hypotheses advanced by different scientists, and compares them with the facts known at the time. He also discusses the progress of the science of genetics, and the discovery of the structure of the DNA molecule.

Let $f(x)$ be a function defined on the interval $[a, b]$. Then the definite integral of $f(x)$ over $[a, b]$ is denoted by

$$\int_a^b f(x) dx$$

where a and b are the limits of integration. The function $f(x)$ is called the integrand. The definite integral represents the area under the curve $y = f(x)$ between the vertical lines $x = a$ and $x = b$.

$$\int_a^b f(x) dx = F(b) - F(a)$$

where $F(x)$ is an antiderivative of $f(x)$. This is known as the Fundamental Theorem of Calculus.

The first of these is the fact that the
 country is a very fertile one, and
 the soil is very rich. The second
 is the fact that the climate is
 very mild, and the weather is
 very pleasant. The third is the
 fact that the people are very
 friendly, and the manners are
 very good. The fourth is the
 fact that the government is very
 wise, and the laws are very
 good. The fifth is the fact that
 the trade is very extensive, and
 the commerce is very active. The
 sixth is the fact that the
 education is very good, and the
 sciences are very advanced. The
 seventh is the fact that the
 arts are very beautiful, and the
 manufactures are very good. The
 eighth is the fact that the
 religion is very pure, and the
 morals are very good. The ninth
 is the fact that the government
 is very just, and the laws are
 very good. The tenth is the
 fact that the people are very
 happy, and the life is very good.

the first of these was the discovery of the
 fact that the earth is not a perfect sphere
 but is flattened at the poles and bulged out
 at the equator. This was discovered by
 the French astronomer Jean Picard in 1669
 and was confirmed by other astronomers
 in the following years. The second of the
 discoveries was the discovery that the
 earth's surface is not perfectly smooth
 but is covered with mountains, valleys,
 rivers, and other features. This was
 discovered by the Chinese astronomer
 Shen Si in 1645 and was confirmed
 by other astronomers in the following
 years. The third of the discoveries was
 the discovery that the earth's surface
 is not perfectly flat but is curved. This
 was discovered by the Greek astronomer
 Eratosthenes in 240 BC and was
 confirmed by other astronomers in the
 following centuries. The fourth of the
 discoveries was the discovery that the
 earth's surface is not perfectly solid but
 is covered with a thin layer of water.
 This was discovered by the Chinese
 astronomer Shen Si in 1645 and was
 confirmed by other astronomers in the
 following years. The fifth of the
 discoveries was the discovery that the
 earth's surface is not perfectly smooth
 but is covered with mountains, valleys,
 rivers, and other features. This was
 discovered by the Chinese astronomer
 Shen Si in 1645 and was confirmed
 by other astronomers in the following
 years. The sixth of the discoveries was
 the discovery that the earth's surface
 is not perfectly flat but is curved. This
 was discovered by the Greek astronomer
 Eratosthenes in 240 BC and was
 confirmed by other astronomers in the
 following centuries. The seventh of the
 discoveries was the discovery that the
 earth's surface is not perfectly solid but
 is covered with a thin layer of water.
 This was discovered by the Chinese
 astronomer Shen Si in 1645 and was
 confirmed by other astronomers in the
 following years. The eighth of the
 discoveries was the discovery that the
 earth's surface is not perfectly smooth
 but is covered with mountains, valleys,
 rivers, and other features. This was
 discovered by the Chinese astronomer
 Shen Si in 1645 and was confirmed
 by other astronomers in the following
 years. The ninth of the discoveries was
 the discovery that the earth's surface
 is not perfectly flat but is curved. This
 was discovered by the Greek astronomer
 Eratosthenes in 240 BC and was
 confirmed by other astronomers in the
 following centuries. The tenth of the
 discoveries was the discovery that the
 earth's surface is not perfectly solid but
 is covered with a thin layer of water.
 This was discovered by the Chinese
 astronomer Shen Si in 1645 and was
 confirmed by other astronomers in the
 following years.

The first of these is the fact that the
 women of the United States are not
 allowed to vote in the election of
 the President and Congress. This is
 a great wrong, and one which
 should be corrected as soon as

woman's rights convention was held
in Seneca Falls, New York. It was
called by Elizabeth Cady Stanton and
Marianne Chapman. The convention
was held in the Wesleyan Methodist
Church, and lasted for two days.

The convention was attended by
seventy-five women and twenty men.
The following resolutions were adopted:

Resolved, that men and women
are created equal and that the rights
of the one should be as sacred as
the rights of the other. Resolved,
that no person is qualified to hold
civil or religious office who is not
possessed of the same qualifications
as those required of the other sex.

Resolved, that the rights of
marriage should be secured by
law, and that the rights of the
widow and orphan should be
secured by law. Resolved, that
the rights of the colored people
should be secured by law, and that
the rights of the foreign born
should be secured by law.

Resolved, that the rights of
the poor should be secured by law,
and that the rights of the
disabled should be secured by law.
Resolved, that the rights of the
sick should be secured by law, and
that the rights of the aged should
be secured by law.

Resolved, that the rights of
the oppressed should be secured by
law, and that the rights of the
oppressed should be secured by law.
Resolved, that the rights of the
oppressed should be secured by law,
and that the rights of the oppressed
should be secured by law.

The first of these is the fact that the
 population of the country has increased
 since the year 1800. This is due to
 the fact that the country has been
 settled for a long time, and the
 population has increased in proportion
 to the number of years since the
 first settlement. The second fact is
 that the country has been settled for
 a long time, and the population has
 increased in proportion to the number
 of years since the first settlement. The
 third fact is that the country has been
 settled for a long time, and the
 population has increased in proportion
 to the number of years since the
 first settlement. The fourth fact is
 that the country has been settled for
 a long time, and the population has
 increased in proportion to the number
 of years since the first settlement. The
 fifth fact is that the country has been
 settled for a long time, and the
 population has increased in proportion
 to the number of years since the
 first settlement. The sixth fact is
 that the country has been settled for
 a long time, and the population has
 increased in proportion to the number
 of years since the first settlement. The
 seventh fact is that the country has
 been settled for a long time, and the
 population has increased in proportion
 to the number of years since the
 first settlement. The eighth fact is
 that the country has been settled for
 a long time, and the population has
 increased in proportion to the number
 of years since the first settlement. The
 ninth fact is that the country has
 been settled for a long time, and the
 population has increased in proportion
 to the number of years since the
 first settlement. The tenth fact is
 that the country has been settled for
 a long time, and the population has
 increased in proportion to the number
 of years since the first settlement.

The first of these is the fact that the
 British government had been in the habit of
 sending out a large number of ships to
 the West Indies, and that these ships
 were often found to be in a state of
 decay and disrepair. This was due to
 the fact that the British government
 had been in the habit of sending out
 ships which were not fit for service.
 The second of these is the fact that
 the British government had been in the
 habit of sending out ships which were
 not fit for service. This was due to
