PREFACE

There is no general history of North Carolina based on the sources covering all phases of the State's development. Hence in the courses on North Carolina history at Trinity and the University of North Carolina extensive use is made of monographs, special works, magazine articles, and to a lesser degree of the sources. This Syllabus is based on the lectures and required readings in North Carolina history at the two institutions. The authors hope that it may prove of value outside of college classes. For all who use it the following suggestions are offered:

While the bibliography is not exhaustive, many items cited are out of print. Many of these may be found in old libraries, especially those of lawyers and public men who were active in the affairs of the past. The collection of such material forms a most interesting and instructive pursuit. A set of the *Colonial and State Records* may be found in every County Court House and in most of the public libraries.

The authors have purposely made little use of studies in biography. They believe that a knowledge of institutional and social development is a prerequisite for the intelligent understanding of the services of public men. Most of the biographical material available is lacking in this very element. However, exercises in biography may supplement the outlines here published.

The study of state history should include the study of local county history. For such a purpose an outline (No. XCIV) is reprinted from *North Carolina Day Program* with the consent of Mr. R. D. W. Connor.

For several suggestions and references the authors are indebted to Mr. W. H. Hoyt, of New York City.

July 7, 1913.

* Since the histories in this list, except those of Ashe and Hill, were published, many new sources have been discovered and a large number of monographs, biographies, and studies in special phases of North Carolina have been written. Hence in this work the older histories are rarely cited, reliance being placed as far as possible on the latest information obtainable. For the same reason, the value of the older historians is mainly antiquarian; they are therefore listed in the order of publication rather than alphabetically.
