VAN WERT, O.

"PRO BONO PUBLICO."

PREFACE

In submitting Volume III of the Van Wert City Directory, it is gratifying to note the progress that is being made in industries and growth of population.

A great factor in the upbuilding of any city is its civic pride; the fact that your citizens stand as a unit on everything that affects the prosperity of your city is worthy of commendation.

The City Directory is one of the foremost enterprises of any city; it is generally referred to by the press of the whole country as a semi-public institution of great value.

The Directory is more than a mere list of names of residents giving their various occupations and addresses. It is an infallible guide to your city, for your people and for the stranger within your gates. It not only deals with your people, but with your government, your institutions and various other organizations. It is a recognized standard work of reference and becomes the most reliable history of your city and its citizens. As there is no other publication in the world which gives the information as contained in the City Directory, there is probably no other publication in which all the people are so vitally interested.

To gather the data and compile a volume of this character is no easy task. It requires much time, a well defined system and incurs no little expense. Few people have any idea of the work it means and the tenacity it takes to publish a reliable directory.

In preparing this book the publishers have spared neither time nor expense, and if errors occur or a single name is omitted which should appear in the book, it is generally the fault of the public and not of the publishers. As every house is visited and it is not the publisher's or canvasser's fault if some one fails to give all the information or gives it incorrectly. The intentions of the reliable publisher are always for improvement, and you can always count on getting as accurate a directory as circumstances will permit.

The estimate of the population of a city is a matter necessarily enjoined upon the directory publishers; such estimates, however, are not merely theoretical but based on facts, sustained by the contents of the publication.

This volume contains 2,924 names of individuals; using the conservative multiple $2\frac{1}{2}$ times, to represent the names of married women and children not counted, indicates a population of

7,410

This does not mean simply population inside the city limits, but takes in consideration those adjacent but beyond the corporate lines.

In concluding, we desire to thank our patrons for their support and to extend our thanks to the public in general for the courteous way in which everyone supplied our canvassers with the desired data. We shall continue this publication every two years as heretofore.

Yours truly,
PIEDMONT DIRECTORY CO.,
ERNEST H. MILLER, Mgr.

Preface

We take pleasure in presenting our First Volume of the Delphos City Directory. The history of Delphos dates back to the year 1834. Since that time has undergone a wonderful change, until today it is a wide awake city of varied manufacturing industries, unsurpassed shipping facilities, up-to-date municipal improvements, including a splendid school system. In brief Delphos is an Ideal City.

The City Directory

Why?

There's a Reason

Because, just as the live wire which carries the current which turns the wheels of numerous industries, so does the City Directory carry the Lights to the buyer seeking goods in your line.

Because, just as the magnetic needle points the way to the mariner, so does the Directory point the way which brings together the Buyer and Seller.

Nuff Sed

Up-to-Date Methods

In this Progressive Age the City Directory is found on the Busy Man's desk.

Because he is wise to its true value, the cost of about a penny a day means to him the Saving of Dollars.
