P R E F A C E .

OUR history of Summit County, after months of arduous toil, is now completed. Every important field of research has been minutely scanned by those engaged in its preparation; no subject of universal public value has been omitted, save where protracted effort failed to secure trustworthy results. The necessarily limited nature of the work, the impossibility of ingrafting upon its pages, the vast fund of the county's historic information, and the proper omission of many valueless details and events, have compelled the publishers to be brief on all subjects presented. Fully aware of our inability to furnish a perfect history from meager public documents, inaccurate private correspondence and numberless conflicting traditions, we make no pretension of having prepared a work devoid of blemish. Through the courtesy and the generous assistance met with everywhere, we have been enabled to rescue from oblivion the greater portion of important events that have transpired in Summit County in past years. We feel assured that all thoughtful people in the county, at present and in future, will recognize and appreciate the importance of the undertaking, and the great public benefit that has been accomplished.

It will be observed that a dry statement of fact has been avoided; and that the rich romance of border incident has been woven in with statistical details, thus forming an attractive and graphic narrative, and lending beauty to the mechanical execution of the volume, and additional value to it as a work for perusal. We claim superior excellence in our manner of collecting material; in the division of the subject matter into distinct and appropriate chapters; in giving a separate chapter to every town, township and important subject, and in the systematic arrangement of the individual chapters. While we acknowledge the existence of unavoidable errors, we claim to have prepared a work fully up to the standard of our promises, and as accurate and comprehensive as could be expected under the circumstances.

STARK COUNTY

OHIO

HISTORY OF OHIO.

BY A. A. GRAHAM.

CHAPTER I.

INTRODUCTORY — TOPOGRAPHY — GEOLOGY — PRIMITIVE — RACES — ANTIQUITIES — INDIAN TRIBES.

THE present State of Ohio, comprising an extent of country 210 miles north and south, 220 miles east and west, in length and breadth—25,576,969 acres—is a part of the Old Northwest Territory. This Territory embraced all of the present States of Ohio, Indiana, Illinois, Michigan, Wisconsin and so much of Minnesota as lies east of the Mississippi River. It became a corporate existence soon after the formation of the Virginia Colony, and when that colony took on the dignity of State government it became a county thereof, whose exact outline was unknown. The county embraced in its limits more territory than is comprised in all the New England and Middle States, and was the largest county ever known in the United States. It is watered by the finest system of rivers on the globe; while its inland seas are without a parallel. Its entire southern boundary is traversed by the beautiful Ohio, its western by the majestic Mississippi, and its northern and a part of its eastern are bounded by the fresh-water lakes, whose clear waters preserve an even temperature over its entire surface. Into these reservoirs of commerce flow innumerable streams of limpid water, which come from glen and dale, from mountain and valley, from forest and prairie—all avenues of health, commerce and prosperity. Ohio is in the best part of this territory—south of its river are tropical heats; north of Lake Erie are polar snows and a polar climate.

The territory comprised in Ohio has always remained the same. Ohio's history differs somewhat from other States, in that it was never under Territorial government. When it was created, it was made a State, and did not pass through the stage incident to the most of other States, *i. e.*, exist as a Territory before being advanced to the powers of

a State. Such was not the case with the other States of the West; all were Territories, with Territorial forms of government, ere they became States.

Ohio's boundaries are, on the north, Lake Erie, and Michigan; on the west, Indiana; on the south, the Ohio River, separating it from Kentucky; and, on the east, Pennsylvania and West Virginia. It is situated between $38^{\circ} 25'$ and 42° north latitude; and $80^{\circ} 30'$ and $84^{\circ} 50'$ west longitude from Greenwich, or $3^{\circ} 30'$ and $7^{\circ} 50'$ west from Washington. Its greatest length, from north to south, is 210 miles; the extreme width, from east to west, 220 miles. Were this an exact outline, the area of the State would be 46,200 square miles, or 29,568,000 acres; as the outlines of the State are, however, rather irregular, the area is estimated at 39,964 square miles, or 25,576,960 acres. In the last census—1870—the total number of acres in Ohio is given as 21,712,420, of which 14,469,132 acres are improved, and 6,883,575 acres are woodland. By the last statistical report of the State Auditor, 20,965,371 $\frac{1}{2}$ acres are reported as taxable lands. This omits many acres untaxable for various reasons, which would make the estimate, 25,576,960, nearly correct.

The face of the country, in Ohio, taken as a whole, presents the appearance of an extensive monotonous plain. It is moderately undulating but not mountainous, and is excavated in places by the streams coursing over its surface, whose waters have forced a way for themselves through cliffs of sandstone rock, leaving abutments of this material in bold outline. There are no mountain ranges, geological uplifts or peaks. A low ridge enters the State, near the northeast corner, and crosses it in a southwesterly direction, emerging near the intersection of the 40th degree of north latitude with

the western boundary of the State. This "divide" separates the lake and Ohio River waters, and maintains an elevation of a little more than thirteen hundred feet above the level of the ocean. The highest part is in Logan County, where the elevation is 1,550 feet.

North of this ridge the surface is generally level, with a gentle inclination toward the lake, the inequalities of the surface being caused by the streams which empty into the lake. The central part of Ohio is almost, in general, a level plain, about one thousand feet above the level of the sea, slightly inclining southward. The Southern part of the State is rather hilly, the valleys growing deeper as they incline toward the great valley of the Ohio, which is several hundred feet below the general level of the State. In the southern counties, the surface is generally diversified by the inequalities produced by the excavating power of the Ohio River and its tributaries, exercised through long periods of time. There are a few prairies, or plains, in the central and northwestern parts of the State, but over its greater portion originally existed immense growths of timber.

The "divide," or water-shed, referred to, between the waters of Lake Erie and the Ohio River, is less elevated in Ohio than in New York and Pennsylvania, though the difference is small. To a person passing over the State in a balloon, its surface presents an unvarying plain, while, to one sailing down the Ohio River, it appears mountainous. On this river are bluffs ranging from two hundred and fifty to six hundred feet in height. As one ascends the tributaries of the river, these bluffs diminish in height until they become gentle undulations, while toward the sources of the streams, in the central part of the State, the banks often become low and marshy.

The principal rivers are the Ohio, Muskingum, Scioto and Miami, on the southern slope, emptying into the Ohio; on the northern, the Maumee, Sandusky, Huron and Cuyahoga, emptying into Lake Erie, and, all but the first named, entirely in Ohio.

The Ohio, the chief river of the State, and from which it derives its name, with its tributaries, drains a country whose area is over two hundred thousand square miles in extent, and extending from the water-shed to Alabama. The river was first discovered by La Salle in 1669, and was by him navigated as far as the Falls, at Louisville, Ky. It is formed by the junction of the Alleghany and Monongahela rivers, in Pennsylvania, whose waters

unite at Pittsburgh. The entire length of the river, from its source to its mouth, is 950 miles, though by a straight line from Pittsburgh to Cairo, it is only 615 miles. Its current is very gentle, hardly three miles per hour, the descent being only five inches per mile. At high stages, the rate of the current increases, and at low stages decreases. Sometimes it is barely two miles per hour. The average range between high and low water mark is fifty feet, although several times the river has risen more than sixty feet above low water mark. At the lowest stage of the river, it is fordable many places between Pittsburgh and Cincinnati. The river abounds in islands, some of which are exceedingly fertile, and noted in the history of the West. Others, known as "tow-heads," are simply deposits of sand.

The Scioto is one of the largest inland streams in the State, and is one of the most beautiful rivers. It rises in Hardin County, flows southeasterly to Columbus, where it receives its largest affluent, the Olentangy or Whetstone, after which its direction is southerly until it enters the Ohio at Portsmouth. It flows through one of the richest valleys in the State, and has for its companion the Ohio and Erie Canal, for a distance of ninety miles. Its tributaries are, besides the Whetstone, the Darby, Walnut and Paint Creeks.

The Muskingum River is formed by the junction of the Tuscarawas and Waldhoning Rivers, which rise in the northern part of the State and unite at Coshocton. From the junction, the river flows in a southeastern course about one hundred miles, through a rich and populous valley, to the Ohio, at Marietta, the oldest settlement in the State. At its outlet, the Muskingum is over two hundred yards wide. By improvements, it has been made navigable ninety-five miles above Marietta, as far as Dresden, where a side cut, three miles long, unites its waters with those of the Ohio Canal. All along this stream exist, in abundant profusion, the remains of an ancient civilization, whose history is lost in the twilight of antiquity. Extensive mounds, earthworks and various fortifications, are everywhere to be found, inclosing a mute history as silent as the race that dwelt here and left these traces of their evi-
ence. The same may be said of all the other valleys in Ohio.

The Miami River—the scenes of many exploits in pioneer days—rises in Hardin County, near the headwaters of the Scioto, and runs southwesterly, to the Ohio, passing Troy, Dayton and Hamilton. It is a beautiful and rapid stream, flowing through

a highly productive and populous valley, in which limestone and hard timber are abundant. Its total length is about one hundred and fifty miles.

The Maumee is the largest river in the northern part of Ohio. It rises in Indiana and flows northeasterly, into Lake Erie. About eighty miles of its course are in Ohio. It is navigable as far as Perrysburg, eighteen miles from its mouth. The other rivers north of the divide are all small, rapid-running streams, affording a large amount of good water-power, much utilized by mills and manufactories.

A remarkable feature of the topography of Ohio is its almost total absence of natural lakes or ponds. A few very small ones are found near the water-shed, but all too small to be of any practical value save as watering-places for stock.

Lake Erie, which forms nearly all the northern boundary of the State, is next to the last or lowest of America's "inland seas." It is 290 miles long, and 57 miles wide at its greatest part. There are no islands, except in the shallow water at the west end, and very few bays. The greatest depth of the lake is off Long Point, where the water is 312 feet deep. The shores are principally drift-clay or hard-pan, upon which the waves are continually encroaching. At Cleveland, from the first survey, in 1796, to 1842, the encroachment was 218 feet along the entire city front. The entire coast is low, seldom rising above fifty feet at the water's edge.

Lake Erie, like the others, has a variable surface, rising and falling with the seasons, like great rivers, called the "annual fluctuation," and a general one, embracing a series of years, due to meteorological causes, known as the "secular fluctuation." Its lowest known level was in February, 1819, rising more or less each year, until June, 1838, in the extreme, to six feet eight inches.

Lake Erie has several excellent harbors in Ohio, among which are Cleveland, Toledo, Sandusky, Port Clinton and Ashtabula. Valuable improvements have been made in some of these, at the expense of the General Government. In 1818, the first steamboat was launched on the lake. Owing to the Falls of Niagara, it could go no farther east than the outlet of Niagara River. Since then, however, the opening of the Welland Canal, in Canada, allows vessels drawing not more than ten feet of water to pass from one lake to the other, greatly facilitating navigation.

As early as 1836, Dr. S. P. Hildreth, Dr. John Locke, Prof. J. H. Riddle and Mr. I. A. Lapham,

were appointed a committee by the Legislature of Ohio to report the "best method of obtaining a complete geological survey of the State, and an estimate of the probable cost of the same." In the preparation of their report, Dr. Hildreth examined the coal-measures in the southeastern part of the State, Prof. Riddle and Mr. Lapham made examinations in the western and northern counties, while Dr. Locke devoted his attention to chemical analyses. These investigations resulted in the presentation of much valuable information concerning the mineral resources of the State and in a plan for a geological survey. In accordance with the recommendation of this Committee, the Legislature, in 1837, passed a bill appropriating \$12,000 for the prosecution of the work during the next year. The Geological Corps appointed consisted of W. W. Mather, State Geologist, with Dr. Hildreth, Dr. Locke, Prof. J. P. Kirtland, J. W. Foster, Charles Whittlesey and Charles Briggs, Jr., Assistants. The results of the first year's work appeared in 1838, in an octavo volume of 134 pages, with contributions from Mather, Hildreth, Briggs, Kirtland and Whittlesey. In 1838, the Legislature ordered the continuance of the work, and, at the close of the year, a second report, of 286 pages, octavo, was issued, containing contributions from all the members of the survey.

Succeeding Legislatures failed to provide for a continuance of the work, and, save that done by private means, nothing was accomplished till 1869, when the Legislature again took up the work. In the interim, individual enterprise had done much. In 1841, Prof. James Hall passed through the State, and, by his identification of several of the formations with those of New York, for the first time fixed their geological age. The next year, he issued the first map of the geology of the State, in common with the geological maps of all the region between the Alleghanies and the Mississippi. Similar maps were published by Sir Charles Lyell, in 1845; Prof. Edward Hitchcock, in 1853, and by J. Mareon, in 1856. The first individual map of the geology of Ohio was a very small one, published by Col. Whittlesey, in 1848, in Howe's History. In 1856, he published a larger map, and, in 1865, another was issued by Prof. Nelson Saylor. In 1867, Dr. J. S. Newberry published a geological map and sketch of Ohio in the Atlas of the State issued by H. S. Stebbins. Up to this time, the geological knowledge was very general in its character, and, consequently, erroneous in many of its details. Other States had been

accurately surveyed, yet Ohio remained a kind of *terra incognita*, of which the geology was less known than any part of the surrounding area.

In 1869, the Legislature appropriated, for a new survey, \$13,900 for its support during one year, and appointed Dr. Newberry Chief Geologist; E. B. Andrews, Edward Orton and J. H. Klippart were appointed Assistants, and T. G. Wormley, Chemist. The result of the first year's work was a volume of 164 pages, octavo, published in 1870.

This report, accompanied by maps and charts, for the first time accurately defined the geological formations as to age and area. Evidence was given which set at rest questions of nearly thirty years' standing, and established the fact that Ohio includes nearly double the number of formations before supposed to exist. Since that date, the surveys have been regularly made. Each county is being surveyed by itself, and its formation accurately determined. Elsewhere in these pages, these results are given, and to them the reader is referred for the specific geology of the county. Only general results can be noted here.

On the general geological map of the State, are two sections of the State, taken at each northern and southern extremity. These show, with the map, the general outline of the geological features of Ohio, and are all that can be given here. Both sections show the general arrangements of the formation, and prove that they lie in sheets resting one upon another, but not horizontally, as a great arch traverses the State from Cincinnati to the lake shore, between Toledo and Sandusky. Along this line, which extends southward to Nashville, Tenn., all the rocks are raised in a ridge or fold, once a low mountain chain. In the lapse of ages, it has, however, been extensively worn away, and now, along a large part of its course, the strata which once arched over it are removed from its summit, and are found resting in regular order on either side, dipping away from its axis. Where the ridge was highest, the erosion has been greatest, that being the reason why the oldest rocks are exposed in the region about Cincinnati. By following the line of this great arch from Cincinnati northward, it will be seen that the Helderberg limestone (No. 4), midway of the State, is still unbroken, and stretches from side to side; while the Oriskany, the Carboniferous, the Hamilton and the Huron formations, though generally removed from the crown of the arch, still remain over a limited area near Bellefontaine, where they

form an island, which proves the former continuity of the strata which compose it.

On the east side of the great anticlinal axis, the rocks dip down into a basin, which, for several hundred miles north and south, occupies the interval between the Nashville and Cincinnati ridge and the first fold of the Alleghany Mountains. In this basin, all the strata form trough-like layers, their edges outcropping eastward on the flanks of the Alleghanies, and westward along the anticlinal axis. As they dip from this margin eastward toward the center of the trough, near its middle, on the eastern border of the State, the older rocks are deeply buried, and the surface is here underlaid by the highest and most recent of our rock formations, the coal measures. In the northwestern corner of the State, the strata dip northwest from the anticlinal and pass under the Michigan coal basin, precisely as the same formations east of the anticlinal dip beneath the Alleghany coal-field, of which Ohio's coal area forms a part.

The rocks underlying the State all belong to three of the great groups which geologists have termed "systems," namely, the Silurian, Devonian and Carboniferous. Each of these are again subdivided, for convenience, and numbered. Thus the Silurian system includes the Cincinnati group, the Medina and Clinton groups, the Niagara group, and the Salina and Water-Line groups. The Devonian system includes the Oriskany sandstone, the Carboniferous limestone, the Hamilton group, the Huron shale and the Erie shales. The Carboniferous system includes the Waverly group, the Carboniferous Conglomerate, the Coal Measures and the Drift. This last includes the surface, and has been divided into six parts, numbering from the lowest, viz.: A glaciated surface, the Glacial Drift, the Erie Clays, the Forest Bed, the Iceberg Drift and the Terraces or Beaches, which mark intervals of stability in the gradual recession of the water surface to its present level.

"The history we may learn from these formations," says the geologist, "is something as follows:

"*First.* Subsequent to the Tertiary was a period of continual elevation, during which the topography of the country was much the same as now, the draining streams following the lines they now do, but cutting down their beds until they flowed sometimes two hundred feet lower than they do at present. In the latter part of this period of elevation, glaciers, descending from the Canadian

islands, excavated and occupied the valleys of the great lakes, and covered the lowlands down nearly to the Ohio.

"*Second.* By a depression of the land and elevation of temperature, the glaciers retreated northward, leaving, in the interior of the continent, a great basin of fresh water, in which the Erie clays were deposited.

"*Third.* This water was drained away until a broad land surface was exposed within the drift area. Upon this surface grew forests, largely of red and white cedar, inhabited by the elephant, mastodon, giant beaver and other large, now extinct, animals.

"*Fourth.* The submergence of this ancient land and the spreading over it, by iceberg agency, of gravel, sand and boulders, distributed just as icebergs now spread their loads broadcast over the sea bottom on the banks of Newfoundland.

"*Fifth.* The gradual draining-off of the waters, leaving the land now as we find it, smoothly covered with all the layers of the drift, and well prepared for human occupation."

"In six days, the Lord made the heavens and the earth, and rested the seventh day," records the Scriptures, and, when all was done, He looked upon the work of His own hands and pronounced it "good." Surely none but a divine, omnipotent hand could have done all this, and none can study the "work of His hands" and not marvel at its completeness.

The ancient dwellers of the Mississippi Valley will always be a subject of great interest to the antiquarian. Who they were, and whence they came, are still unanswered questions, and may remain so for ages. All over this valley, and, in fact, in all parts of the New World, evidences of an ancient civilization exist, whose remains are now a wonder to all. The aboriginal races could throw no light on these questions. They had always seen the remains, and knew not whence they came. Explorations aid but little in the solution of the problem, and only conjecture can be entertained. The remains found in Ohio equal any in the Valley. Indeed, some of them are vast in extent, and consist of forts, fortifications, moats, ditches, elevations and mounds, embracing many acres in extent.

"It is not yet determined," says Col. Charles Whittlesey, "whether we have discovered the first or the original people who occupied the soil of Ohio. Modern investigations are bringing to light evidences of earlier races. Since the presence of

man has been established in Europe as a cotemporary of the fossil elephant, mastodon, rhinoceros and the horse, of the later drift or glacial period, we may reasonably anticipate the presence of man in America in that era. Such proofs are already known, but they are not of that conclusive character which amounts to a demonstration. It is, however, known that an ancient people inhabited Ohio in advance of the red men who were found here, three centuries since, by the Spanish and French explorers.

"Five and six hundred years before the arrival of Columbus," says Col. Charles Whittlesey, "the Northmen sailed from Norway, Iceland and Greenland along the Atlantic coast as far as Long Island. They found Indian tribes, in what is now New England, closely resembling those who lived upon the coast and the St. Lawrence when the French and English came to possess these regions.

"These red Indians had no traditions of a prior people; but over a large part of the lake country and the valley of the Mississippi, earth-works, mounds, pyramids, ditches and forts were discovered—the work of a more ancient race, and a people far in advance of the Indian. If they were not civilized, they were not barbarians. They were not mere hunters, but had fixed habitations, cultivated the soil and were possessed of considerable mechanical skill. We know them as the *Mound Builders*, because they erected over the mortal remains of their principal men and women memorial mounds of earth or unhewn stone—of which hundreds remain to our own day, so large and high that they give rise to an impression of the numbers and energy of their builders, such as we receive from the pyramids of Egypt."

Might they not have been of the same race and the same civilization? Many competent authorities conjecture they are the work of the lost tribes of Israel; but the best they or any one can do is only conjecture.

"In the burial-mounds," continues Col. Whittlesey, "there are always portions of one or more human skeletons, generally partly consumed by fire, with ornaments of stone, bone, shells, mica and copper. The largest mound in Ohio is near Miamisburg, Montgomery County. It is the second largest in the West, being nearly seventy feet high, originally, and about eight hundred feet in circumference. This would give a superficial area of nearly four acres. In 1864, the citizens of Miamisburg sunk a shaft from the summit to the natural surface, without finding the bones

or ashes of the great man for whom it was intended. The exploration has considerably lowered the mound, it being now about sixty feet in height.

"Fort Ancient, on the Little Miami, is a good specimen of the military defenses of the Mound-Builders. It is well located on a long, high, narrow, precipitous ridge. The parapets are now from ten to eighteen feet high, and its perimeter is sufficient to hold twenty thousand fighting men. Another prominent example of their works exists near Newark, Licking County. This collection presents a great variety of figures, circles, rectangles, octagons and parallel banks, or highways, covering more than a thousand acres. The county fair-ground is permanently located within an ancient circle, a quarter of a mile in diameter, with an embankment and interior ditch. Its highest place was over twenty feet from the top of the moat to the bottom of the ditch."

One of the most curious-shaped works in this county is known as the "Alligator," from its supposed resemblance to that creature. When measured, several years ago, while in a good state of preservation, its dimensions were two hundred and ten feet in length, average width over sixty feet, and height, at the highest point, seven feet. It appears to be mainly composed of clay, and is overgrown with grass.

Speaking of the writing of these people, Col. Whittlesey says: "There is no evidence that they had alphabetical characters, picture-writing or hieroglyphics, though they must have had some mode of recording events. Neither is there any proof that they used domestic animals for tilling the soil, or for the purpose of erecting the imposing earthworks they have left. A very coarse cloth of hemp, flax or nettles has been found on their burial-hearths and around skeletons not consumed by fire.

"The most extensive earthworks occupy many of the sites of modern towns, and are always in the vicinity of excellent land. Those about the lakes are generally irregular earth forts, while those about the rivers in the southern part of the State are generally altars, pyramids, circles, cones and rectangles of earth, among which fortresses or strongholds are exceptions.

"Those on the north may not have been cotemporary or have been built by the same people. They are far less prominent or extensive, which indicates a people less in numbers as well as industry, and whose principal occupation was war among

themselves or against their neighbors. This style of works extends eastward along the south shore of Lake Ontario, through New York. In Ohio, there is a space along the water-shed, between the lake and the Ohio, where there are few, if any, ancient earthworks. It appears to have been a vacant or neutral ground between different nations.

"The Indians of the North, dressed in skins, cultivated the soil very sparingly, and manufactured no woven cloth. On Lake Superior, there are ancient copper mines wrought by the Mound-Builders over fifteen hundred years ago." Copper tools are occasionally found tempered sufficiently hard to cut the hardest rocks. No knowledge of such tempering exists now. The Indians can give no more knowledge of the ancient mines than they can of the mounds on the river bottoms.

"The Indians did not occupy the ancient earthworks, nor did they construct such. They were found as they are now—a hunter race, wholly averse to labor. Their abodes were in rock shelters, in caves, or in temporary sheds of bark and boughs, or skins, easily moved from place to place. Like most savage races, their habits are unchangeable; at least, the example of white men, and their efforts during three centuries, have made little, if any, impression."

When white men came to the territory now embraced in the State of Ohio, they found dwelling here the Iroquois, Delawares, Shawanees, Miamis, Wyandots and Ottawas. Each nation was composed of several tribes or clans, and each was often at war with the others. The first mentioned of these occupied that part of the State whose northern boundary was Lake Erie, as far west as the mouth of the Cuyahoga River, where the city of Cleveland now is; thence the boundary turned southward in an irregular line, until it touched the Ohio River, up which stream it continued to the Pennsylvania State line, and thence northward to the lake. This nation were the implacable foes of the French, owing to the fact that Champlain, in 1609, made war against them. They occupied a large part of New York and Pennsylvania, and were the most insatiate conquerors among the aborigines. When the French first came to the lakes, these monsters of the wilderness were engaged in a war against their neighbors, a war that ended in their conquering them, possessing their territory, and absorbing the remnants of the tribes into their own nation. At the date of Champlain's visit, the southern shore of Lake Erie was occupied by the Eries, or, as the orthography of the word is

sometimes given, Erigos, or Errienous.* About forty years afterward, the Iroquois (Five Nations) fell upon them with such fury and in such force that the nation was annihilated. Those who escaped the slaughter were absorbed among their conquerors, but allowed to live on their own lands, paying a sort of tribute to the Iroquois. This was the policy of that nation in all its conquests. A few years after the conquest of the Eries, the Iroquois again took to the war-path, and swept through Ohio, Indiana and Illinois, even attacking the Mississippi tribes. But for the intervention and aid of the French, these tribes would have shared the fate of the Hurons and Eries. Until the year 1700, the Iroquois held the south shore of Lake Erie so firmly that the French dared not trade or travel along that side of the lake. Their missionaries and traders penetrated this part of Ohio as early as 1650, but generally suffered death for their zeal.

Having completed the conquest of the Hurons or Wyandots, about Lake Huron, and murdered the Jesuit missionaries by modes of torture which only they could devise, they permitted the residue of the Hurons to settle around the west end of Lake Erie. Here, with the Ottawas, they resided when the whites came to the State. Their country was bounded on the south by a line running through the central part of Wayne, Ashland, Richland, Crawford and Wyandot Counties. At the western boundary of this county, the line diverged northwesterly, leaving the State near the northwest corner of Fulton County. Their northern boundary was the lake; the eastern, the Iroquois.

The Delawares, or "Lenni Lenapes," whom the Iroquois had subjugated on the Susquehanna, were assigned by their conquerors hunting-grounds on the Muskingum. Their eastern boundary was the country of the Iroquois (before defined), and their northern, that of the Hurons. On the west, they

* Father Louis Hennepin, in his work published in 1684, thus alludes to the Eries: "These good fathers," referring to the priests, "were great friends of the Hurons, who told them that the Iroquois went to war beyond Virginia, or New Sweden, near a lake which they called 'Erige,' or 'Erie,' which signifies 'the cat,' or 'nation of the cat,' and because these savages brought captives from this nation in returning to their cantons along this lake, the Hurons named it, in their language, 'Erige,' or 'Erike,' 'the lake of the cat,' and which our Canadians, in softening the word, have called 'Lake Erie.'"

Charlevoix, writing in 1721, says: "The name it bears is that of an Indian nation of the Huron (Wyandot) language, which was formerly seated on its banks, and who have been entirely destroyed by the Iroquois. *Erie*, in that language, signifies 'cat,' and, in some accounts, this nation is called the 'cat nation.' This name, probably, comes from the large numbers of that animal found in this region."

extended as far as a line drawn from the central part of Richland County, in a semi-circular direction, south to the mouth of Leading Creek. Their southern boundary was the Ohio River.

West of the Delawares, dwelt the Shawanees, a troublesome people as neighbors, whether to whites or Indians. Their country was bounded on the north by the Hurons, on the east, by the Delawares; on the south, by the Ohio River. On the west, their boundary was determined by a line drawn southwesterly, and again southeasterly—semi-circular—from a point on the southern boundary of the Hurons, near the southwest corner of Wyandot County, till it intersected the Ohio River.

All the remainder of the State—all its western part from the Ohio River to the Michigan line—was occupied by the Miamis, Mincamis, Twigtwees, or Tawixtawes, a powerful nation, whom the Iroquois were never fully able to subdue.

These nations occupied the State, partly by permit of the Five Nations, and partly by inheritance, and, though composed of many tribes, were about all the savages to be found in this part of the Northwest.

No sooner had the Americans obtained control of this country, than they began, by treaty and purchase, to acquire the lands of the natives. They could not stem the tide of emigration; people, then as now, would go West, and hence the necessity of peacefully and rightfully acquiring the land. "The true basis of title to Indian territory is the right of civilized men to the soil for purposes of cultivation." The same maxim may be applied to all uncivilized nations. When acquired by such a right, either by treaty, purchase or conquest, the right to hold the same rests with the power and development of the nation thus possessing the land.

The English derived title to the territory between the Alleghanies and the Mississippi partly by the claim that, in discovering the Atlantic coast, they had possession of the land from "ocean to ocean," and partly by the treaty of Paris, in February, 1763. Long before this treaty took place, however, she had granted, to individuals and colonies, extensive tracts of land in that part of America, based on the right of discovery. The French had done better, and had acquired title to the land by discovering the land itself and by consent of the Indians dwelling thereon. The right to possess this country led to the French and Indian war, ending in the supremacy of the English.

The Five Nations claimed the territory in question by right of conquest, and, though professing friendship to the English, watched them with jealous eyes. In 1684, and again in 1726, that confederacy made cessions of lands to the English, and these treaties and cessions of lands were regarded as sufficient title by the English, and were insisted on in all subsequent treaties with the Western Nations. The following statements were collected by Col. Charles Whittlesey, which show the principal treaties made with the red men wherein land in Ohio was ceded by them to the whites:

In September, 1726, the Iroquois, or Six Nations, at Albany, ceded all their claims west of Lake Erie and sixty miles in width along the south shore of Lakes Erie and Ontario, from the Cuyahoga to the Oswego River.

In 1744, this same nation made a treaty at Lancaster, Penn., and ceded to the English all their lands "that may be within the colony of Virginia."

In 1752, this nation and other Western tribes made a treaty at Logstown, Penn., wherein they confirmed the Lancaster treaty and consented to the settlements south of the Ohio River.

February 13, 1763, a treaty was made at Paris, France, between the French and English, when Canada and the eastern half of the Mississippi Valley were ceded to the English.

In 1783, all the territory south of the Lakes, and east of the Mississippi, was ceded by England to America—the latter country then obtaining its independence—by which means the country was gained by America.

October 24, 1784, the Six Nations made a treaty, at Fort Stanwix, N. Y., with the Americans, and ceded to them all the country claimed by the tribe, west of Pennsylvania.

In 1785, the Chippewas, Delawares, Ottawas, and Wyandots ceded to the United States, at Fort McIntosh, at the mouth of the Big Beaver, all their claims east and south of the "Cayahaga," the Portage Path, and the Tuscarawas, to Fort Laurens (Bolivar), thence to Loramie's Fort (in Shelby County); thence along the Portage Path to the St. Mary's River and down it to the "Omee," or Maumee, and along the lake shore to the "Cayahaga."

January 3, 1786, the Shawanees, at Fort Finney, near the mouth of the Great Miami (not owning the land on the Scioto occupied by them), were allotted a tract at the heads of the two

Miamis and the Wabash, west of the Chippewas, Delawares and Wyandots.

February 9, 1789, the Iroquois made a treaty at Fort Harmar, wherein they confirmed the Fort Stanwix treaty. At the same time, the Chippewas, Ottawas, Delawares, and Wyandots—to which the Sauks and Pottawatomies assented—confirmed the treaty made at Fort McIntosh.

Period of war now existed till 1795.

August 3, 1795, Gen. Anthony Wayne, on behalf of the United States, made a treaty with twelve tribes, confirming the boundaries established by the Fort Harmar and Fort McIntosh treaties, and extended the boundary to Fort Recovery and the mouth of the Kentucky River.

In June, 1796, the Senecas, represented by Brant, ceded to the Connecticut Land Company their rights east of the Cuyahoga.

In 1805, at Fort Industry, on the Maumee, the Wyandots, Delawares, Ottawas, Chippewas, Shawanees, Menses, and Pottawatomies relinquished all their lands west of the Cuyahoga, as far west as the western line of the Reserve, and south of the line from Fort Laurens to Loramie's Fort.

July 4, 1807, the Ottawas, Chippewas, Wyandots, and Pottawatomies, at Detroit, ceded all that part of Ohio north of the Maumee River, with part of Michigan.

November 25, 1808, the same tribes with the Shawanees, at Brownstown, Mich., granted the Government a tract of land two miles wide, from the west line of the Reserve to the rapids of the Maumee, for the purpose of a road through the Black Swamp.

September 18, 1815, at Springwells, near Detroit, the Chippewas, Ottawas, Pottawatomies, Wyandots, Delawares, Senecas and Miamis, having been engaged in the war of 1812 on the British side, were confined in the grants made at Fort McIntosh and Greenville in 1785 and 1795.

September 29, 1817, at the rapids of the Maumee, the Wyandots ceded their lands west of the line of 1805, as far as Loramie's and the St. Mary's River and north of the Maumee. The Pottawatomies, Chippewas, and Ottawas ceded the territory west of the Detroit line of 1807, and north of the Maumee.

October 6, 1818, the Miamis, at St. Mary's, made a treaty in which they surrendered the remaining Indian territory in Ohio, north of the Greenville treaty line and west of St. Mary's River.

The numerous treaties of peace with the Western Indians for the delivery of prisoners were—

one by Gen. Forbes, at Fort Du Quesne (Pittsburgh), in 1758; one by Col. Bradstreet, at Erie, in August, 1764; one by Col. Boquet, at the mouth of the Walhonding, in November, 1764; in May, 1765, at Johnson's, on the Mohawk, and at Philadelphia, the same year; in 1774, by Lord Dunmore, at Camp Charlotte, Pickaway County. By the treaty at the Maumee Rapids, in 1817, reservations were conveyed by the United States to all the tribes, with a view to induce them to cultivate the soil and cease to be hunters. These were, from time to time, as the impracticability of the plan became manifest, purchased by the Government, the last of these being the Wyandot Reserve, of twelve miles square, around Upper Sandusky, in 1842, closing out all claims and composing all the Indian difficulties in Ohio. The open war had ceased in 1815, with the treaty of Ghent.

"It is estimated that, from the French war of 1754 to the battle of the Maumee Rapids, in 1794, a period of forty years, there had been at least 5,000 people killed or captured west of the

Alleghany Mountains. Eleven organized military expeditions had been carried on against the Western Indians prior to the war of 1812, seven regular engagements fought and about twelve hundred men killed. More whites were slain in battle than there were Indian braves killed in military expeditions, and by private raids and murders; yet, in 1811, all the Ohio tribes combined could not muster 2,000 warriors."

Attempts to determine the number of persons comprising the Indian tribes in Ohio, and their location, have resulted in nothing better than estimates. It is supposed that, at the commencement of the Revolution, there were about six thousand Indians in the present confines of the State, but their villages were little more than movable camps. Savage men, like savage beasts, are engaged in continual migrations. Now, none are left. The white man occupies the home of the red man. Now

"The verdant hills
Are covered o'er with growing grain,
And white men till the soil,
Where once the red man used to reign."

CHAPTER II.

EARLY EXPLORATIONS IN THE WEST.

WHEN war, when ambition, when avarice fail, religion pushes onward and succeeds. In the discovery of the New World, wherever man's aggrandizement was the paramount aim, failure was sure to follow. When this gave way, the followers of the Cross, whether Catholic or Protestant, came on the field, and the result before attempted soon appeared, though in a different way and through different means than those supposed.

The first permanent efforts of the white race to penetrate the Western wilds of the New World preceded any permanent English settlement north of the Potomac. Years before the Pilgrims anchored their bark on the cheerless shores of Cape Cod, "the Roman Catholic Church had been planted by missionaries from France in the Eastern moiety of Maine; and Le Caron, an ambitious Franciscan, the companion of Champlain, had passed into the hunting-grounds of the Wyandots, and, bound by the vows of his life, had, on foot or paddling a bark canoe, gone onward, taking alms of the savages until he reached the rivers of Lake

Huron." This was in 1615 or 1616, and only eight years after Champlain had sailed up the waters of the St. Lawrence, and on the foot of a bold cliff laid the foundation of the present City of Quebec. From this place, founded to hold the country, and to perpetuate the religion of his King, went forth those emissaries of the Cross, whose zeal has been the admiration of the world. The French Colony in Canada was suppressed soon after its establishment, and for five years, until 1622, its immunities were enjoyed by the colonists. A grant of New France, as the country was then known, was made by Louis XIII to Richelieu, Champlain, Razilly and others, who, immediately after the restoration of Quebec by its English conquerors, entered upon the control and government of their province. Its limits embraced the whole basin of the St. Lawrence and of such other rivers in New France as flowed directly into the sea. While away to the south on the Gulf coast, was also included a country rich in foliage and claimed in virtue of the unsuccessful efforts of Coligny.

Religious zeal as much as commercial prosperity had influenced France to obtain and retain the dependency of Canada. The commercial monopoly of a privileged company could not foster a colony; the climate was too vigorous for agriculture, and, at first there was little else except religious enthusiasm to give vitality to the province. Champlain had been touched by the simplicity of the Order of St. Francis, and had selected its priests to aid him in his work. But another order, more in favor at the Court, was interested, and succeeded in excluding the mendicant order from the New World, established themselves in the new domain and, by thus enlarging the borders of the French King, it became entrusted to the Jesuits.

This "Society of Jesus," founded by Loyola when Calvin's Institutes first saw the light, saw an unequalled opportunity in the conversion of the heathen in the Western wilds; and, as its members, pledged to obtain power only by influence of mind over mind, sought the honors of opening the way, there was no lack of men ready for the work. Through them, the motive power in opening the wilds of the Northwest was religion. "Religious enthusiasm," says Bancroft, "colonized New England, and religious enthusiasm founded Montreal, made a conquest of the wilderness about the upper lakes, and explored the Mississippi."

Through these priests — increased in a few years to fifteen — a way was made across the West from Quebec, above the regions of the lakes, below which they dared not go for the relentless Mohawks. To the northwest of Toronto, near the Lake Iroquois, a bay of Lake Huron, in September, 1634, they raised the first humble house of the Society of Jesus among the Hurons. Through them they learned of the great lakes beyond, and resolved one day to explore them and carry the Gospel of peace to the heathen on their shores. Before this could be done, many of them were called upon to give up their lives at the martyr's stake and receive a martyr's crown. But one by one they went on in their good work. If one fell by hunger, cold, cruelty, or a terrible death, others stood ready, and carrying their lives in their hands, established other missions about the eastern shores of Lake Huron and its adjacent waters. The Five Nations were for many years hostile toward the French and murdered them and their red allies whenever opportunity presented. For a quarter of century, they retarded the advance of the missionaries, and then only after wearied with a long struggle, in which they began to see their

power declining, did they relinquish their warlike propensities, and allow the Jesuits entrance to their country. While this was going on, the traders and Jesuits had penetrated farther and farther westward, until, when peace was declared, they had seen the southwestern shores of Lake Superior and the northern shores of Lake Michigan, called by them Lake Illinois.* In August, 1654, two young adventurers penetrated the wilds bordering on these western lakes in company with a band of Ottawas. Returning, they tell of the wonderful country they have seen, of its vast forests, its abundance of game, its mines of copper, and excite in their comrades a desire to see and explore such a country. They tell of a vast expanse of land before them, of the powerful Indian tribes dwelling there, and of their anxiety to become annexed to the Frenchman, of whom they have heard. The request is at once granted. Two missionaries, Gabriel Dreuillettes and Leonard Gareau, were selected as envoys, but on their way the fleet, propelled by tawny rowers, is met by a wandering band of Mohawks and by them is dispersed. Not daunted, others stood ready to go. The lot fell to René Mesnard. He is charged to visit the wilderness, select a suitable place for a dwelling, and found a mission. With only a short warning he is ready, "trusting," he says, "in the Providence which feeds the little birds of the desert and clothes the wild flowers of the forest." In October, 1660, he reached a bay, which he called St. Theresa, on the south shore of Lake Superior. After a residence of eight months, he yielded to the invitation of the Hurons who had taken refuge on the Island of St. Michael, and bidding adieu to his neophytes and the French, he departed. While on the way to the Bay of Chegoi-me-gon, probably at a portage, he became separated from his companion and was never afterward heard of. Long after, his cassock and his breviary were kept as amulets among the Sioux. Difficulties now arose in the management of the colony, and for awhile it was on the verge of dissolution. The King sent a regiment under command of the aged Tracy, as a safeguard against the Iroquois, now proving themselves enemies to

* Mr. C. W. Butterfield, author of *Crawford's Campaign*, and good authority, says: "John Nicholet, a Frenchman, left Quebec and Three Rivers in the summer of 1634, and visited the Hurons on Georgian Bay, the Chippewas at the Sault Ste. Marie, and the Winnebagoes in Wisconsin, returning to Quebec in the summer of 1635. This was the first white man to see any part of the Northwest Territory. In 1641, two Jesuit priests were at the Sault Ste. Marie for a brief time. Then two French traders reached Lake Superior, and after them came that tide of emigration on which the French based their claim to the country."

the French. Accompanying him were Courcelles, as Governor, and M. Talon, who subsequently figures in Northwestern history. By 1665, affairs were settled and new attempts to found a mission among the lake tribes were projected.

"With better hopes—undismayed by the sad fate of their predecessors" in August, Claude Allouez embarked on a mission by way of Ottawa to the Far West. Early in September he reached the rapids through which rush the waters of the lakes to Huron. Sailing by lofty sculptured rocks and over waters of crystal purity, he reached the Chippewa village just as the young warriors were bent on organizing a war expedition against the Sioux. Commanding peace in the name of his King, he called a council and offered the commerce and protection of his nation. He was obeyed, and soon a chapel arose on the shore of the bay, to which admiring crowds from the south and west gathered to listen to the story of the Cross.

The scattered Hurons and Ottawas north of Lake Superior; the Pottawatomies from Lake Michigan; the Sacs and Foxes from the Far West; the Illinois from the prairies, all came to hear him, and all besought him to go with them. To the last nation Allouez desired to go. They told him of a "great river that flowed to the sea," and of "their vast prairies, where herds of buffalo, deer and other animals grazed on the tall grass." "Their country," said the missionary, "is the best field for the Gospel. Had I had leisure, I would have gone to their dwellings to see with my own eyes all the good that was told me of them."

He remained two years, teaching the natives, studying their language and habits, and then returned to Quebec. Such was the account that he gave, that in two days he was joined by Louis Nicholas and was on his way back to his mission.

Peace being now established, more missionaries came from France. Among them were Claude Dablon and Jacques Marquette, both of whom went on to the mission among the Chippewas at the Sault. They reached there in 1668 and found Allouez busy. The mission was now a reality and given the name of St. Mary. It is often written "Sault Ste. Marie," after the French method, and is the oldest settlement by white men in the bounds of the Northwest Territory. It has been founded over two hundred years. Here on the inhospitable northern shores, hundreds of miles away from friends, did this triumvirate employ themselves in extending their religion and the influence of their

King. Traversing the shores of the great lakes near them, they pass down the western bank of Lake Michigan as far as Green Bay, along the southern shore of Lake Superior to its western extremity, everywhere preaching the story of Jesus. "Though suffering be their lot and martyrdom their crown," they went on, only conscious that they were laboring for their Master and would, in the end, win the crown.

The great river away to the West of which they heard so much was yet unknown to them. To explore it, to visit the tribes on its banks and preach to them the Gospel and secure their trade, became the aim of Marquette, who originated the idea of its discovery. While engaged at the mission at the Sault, he resolved to attempt it in the autumn of 1669. Delay, however, intervened—for Allouez had exchanged the mission at Che-goi-me-gon for one at Green Bay, whither Marquette was sent. While here he employed a young Illinois Indian to teach him the language of that nation, and thereby prepare himself for the enterprise.

Continued commerce with the Western Indians gave protection and confirmed their attachment. Talon, the intendant of the colony of New France, to further spread its power and to learn more of the country and its inhabitants, convened a congress of the Indians at the Falls of St. Mary, to which he sent St. Luson on his behalf. Nicholas Perrot sent invitations in every direction for more than a hundred leagues round about, and fourteen nations, among them Sacs, Foxes and Miamis, agreed to be present by their ambassadors.

The congress met on the fourth day of June, 1671. St. Luson, through Allouez, his interpreter, announced to the assembled natives that they, and through them their nations, were placed under the protection of the French King, and to him were their furs and peltries to be traded. A cross of cedar was raised, and amidst the groves of maple and of pine, of elm and hemlock that are so strangely intermingled on the banks of the St. Mary, the whole company of the French, bowing before the emblem of man's redemption, chanted to its glory a hymn of the seventh century:

"The banners of heaven's King advance;
The mysteries of the Cross shines forth."*

A cedar column was planted by the cross and marked with the lilies of the Bourbons. The power of France, thus uplifted in the West of which Ohio is now a part, was, however, not destined

* Bancroft.

to endure, and the ambition of its monarchs was to have only a partial fulfillment.

The same year that the congress was held, Marquette had founded a mission among the Hurons at Point St. Ignace, on the continent north of the peninsula of Michigan. Although the climate was severe, and vegetation scarce, yet fish abounded, and at this establishment, long maintained as a key to further explorations, prayer and praise were heard daily for many years. Here, also, Marquette gained a footing among the founders of Michigan. While he was doing this, Allouez and Dablon were exploring countries south and west, going as far as the Mascoutins and Kickapoos on the Milwaukee, and the Miamis at the head of Lake Michigan. Allouez continued even as far as the Sacs and Foxes on the river which bears their name.

The discovery of the Mississippi, heightened by these explorations, was now at hand. The enterprise, projected by Marquette, was received with favor by M. Talon, who desired thus to perpetuate his rule in New France, now drawing to a close. He was joined by Joliet, of Quebec, an emissary of his King, commissioned by royal magnate to take possession of the country in the name of the French. Of him but little else is known. This one excursion, however, gives him immortality, and as long as time shall last his name and that of Marquette will endure. When Marquette made known his intention to the Pottawatomies, they were filled with wonder, and endeavored to dissuade him from his purpose. "Those distant nations," said they, "never spare the strangers; the Great River abounds in monsters, ready to swallow both men and canoes; there are great cataracts and rapids, over which you will be dashed to pieces; the excessive heats will cause your death." "I shall gladly lay down my life for the salvation of souls," replied the good man; and the docile nation joined him.

On the 9th day of June, 1673, they reached the village on Fox River, where were Kickapoos, Mascoutins and Miamis dwelling together on an expanse of lovely prairie, dotted here and there by groves of magnificent trees, and where was a cross garlanded by wild flowers, and bows and arrows, and skins and belts, offerings to the Great Maniton. Allouez had been here in one of his wanderings, and, as was his wont, had left this emblem of his faith.

Assembling the natives, Marquette said, "My companion is an envoy of France to discover new countries; and I am an ambassador from God to

enlighten them with the Gospel." Offering presents, he begged two guides for the morrow. The Indians answered courteously, and gave in return a mat to serve as a couch during the long voyage.

Early in the morning of the next day, the 10th of June, with all nature in her brightest robes, these two men, with five Frenchmen and two Algonquin guides, set out on their journey. Lifting two canoes to their shoulders, they quickly cross the narrow portage dividing the Fox from the Wisconsin River, and prepare to embark on its clear waters. "Uttering a special prayer to the Immaculate Virgin, they leave the stream, that, flowing onward, could have borne their greetings to the castle of Quebec. 'The guides returned,' says the gentle Marquette, 'leaving us alone in this unknown land, in the hand of Providence.' France and Christianity stood alone in the valley of the Mississippi. Embarking on the broad Wisconsin, the discoverers, as they sailed west, went solitarily down the stream between alternate prairies and hillsides, beholding neither man nor the wonted beasts of the forests; no sound broke the silence but the ripple of the canoe and the lowing of the buffalo. In seven days, 'they entered happily the Great River, with a joy that could not be expressed;' and the two birchbark canoes, raising their happy sails under new skies and to unknown breezes, floated down the calm magnificence of the ocean stream, over the broad, clear sand-bars, the resort of innumerable water-fowl—gliding past islets that swelled from the bosom of the stream, with their tufts of massive thickets, and between the wild plains of Illinois and Iowa, all garlanded with majestic forests, or checkered by island groves and the open vastness of the prairie."*

Continuing on down the mighty stream, they saw no signs of human life until the 25th of June, when they discovered a small foot-path on the west bank of the river, leading away into the prairie. Leaving their companions in the canoes, Marquette and Joliet followed the path, resolved to brave a meeting alone with the savages. After a walk of six miles they came in sight of a village on the banks of a river, while not far away they discovered two others. The river was the "Mouin-gou-e-na," or Moingona, now corrupted into Des Moines. These two men, the first of their race who ever trod the soil west of the Great

* Bancroft.

River, commended themselves to God, and, uttering a loud cry, advanced to the nearest village. The Indians hear, and thinking their visitors celestial beings, four old men advance with reverential mien, and offer the pipe of peace. "We are Illinois," said they, and they offered the calumet. They had heard of the Frenchmen, and welcomed them to their wigwams, followed by the devouring gaze of an astonished crowd. At a great council held soon after, Marquette published to them the true God, their Author. He also spoke of his nation and of his King, who had chastised the Five Nations and commanded peace. He questioned them concerning the Great River and its tributaries, and the tribes dwelling on its banks. A magnificent feast was spread before them, and the conference continued several days. At the close of the sixth day, the chieftains of the tribes, with numerous trains of warriors, attended the visitors to their canoes, and selecting a peace-pipe, gayly caparisoned, they hung the sacred calumet, emblem of peace to all and a safeguard among the nations, about the good Father's neck, and bid the strangers good speed. "I did not fear death," writes Marquette; "I should have esteemed it the greatest happiness to have died for the glory of God." On their journey, they passed the perpendicular rocks, whose sculptured sides showed them the monsters they should meet. Farther down, they pass the turbid flood of the Missouri, known to them by its Algonquin name, Pekitanoni. Resolving in his heart to one day explore its flood, Marquette rejoiced in the new world it evidently could open to him. A little farther down, they pass the bluffs where now is a mighty emporium, then silent as when created. In a little less than forty leagues, they pass the clear waters of the beautiful Ohio, then, and long afterward, known as the Wabash. Its banks were inhabited by numerous villages of the peaceful Shawanees, who then quailed under the incursions of the dreadful Iroquois. As they go on down the mighty stream, the canes become thicker, the insects more fierce, the heat more intolerable. The prairies and their cool breezes vanish, and forests of white-wood, admirable for their vastness and height, crowd close upon the pebbly shore. It is observed that the Chickasaws have guns, and have learned how to use them. Near the latitude of 33 degrees, they encounter a great village, whose inhabitants present an inhospitable and warlike front. The pipe of peace is held aloft, and instantly the savage foe drops his arms and extends a friendly greeting.

Remaining here till the next day, they are escorted for eight or ten leagues to the village of Akansea. They are now at the limit of their voyage. The Indians speak a dialect unknown to them. The natives show furs and axes of steel, the latter proving they have traded with Europeans. The two travelers now learn that the Father of Waters went neither to the Western sea nor to the Florida coast, but straight south, and conclude not to encounter the burning heats of a tropical clime, but return and find the outlet again. They had done enough now, and must report their discovery.

On the 17th day of July, 1673, one hundred and thirty-two years after the disastrous journey of De Soto, which led to no permanent results, Marquette and Joliet left the village of Akansea on their way back. At the 38th degree, they encounter the waters of the Illinois which they had before noticed, and which the natives told them afforded a much shorter route to the lakes. Paddling up its limpid waters, they see a country unsurpassed in beauty. Broad prairies, beautiful uplands, luxuriant groves, all mingled in excellent harmony as they ascend the river. Near the head of the river, they pause at a great village of the Illinois, and across the river behold a rocky promontory standing boldly out against the landscape. The Indians entreat the gentle missionary to remain among them, and teach them the way of life. He cannot do this, but promises to return when he can and instruct them. The town was on a plain near the present village of Utica, in La Salle County, Ill., and the rock was Starved Rock, afterward noted in the annals of the Northwest. One of the chiefs and some young men conduct the party to the Chicago River, where the present mighty city is, from where, continuing their journey along the western shores of the lake, they reach Green Bay early in September.

The great valley of the West was now open. The "Missippi" rolled its mighty flood to a southern sea, and must be sully explored. Marquette's health had keenly suffered by the voyage and he concluded to remain here and rest. Joliet hastened on to Quebec to report his discoveries. During the journey, each had preserved a description of the route they had passed over, as well as the country and its inhabitants. While on the way to Quebec, at the foot of the rapids near Montreal, by some means one of Joliet's canoes became capsized, and by it he lost his box of papers and two of his men. A greater calamity could have

hardly happened him. In a letter to Gov. Frontenac, Joliet says:

"I had escaped every peril from the Indians; I had passed forty-two rapids, and was on the point of disembarking, full of joy at the success of so long and difficult an enterprise, when my canoe capsized after all the danger seemed over. I lost my two men and box of papers within sight of the French settlements, which I had left almost two years before. Nothing remains now to me but my life, and the ardent desire to employ it in any service you may please to direct."

When Joliet made known his discoveries, a *Te Deum* was chanted in the Cathedral at Quebec, and all Canada was filled with joy. The news crossed the ocean, and the French saw in the vista of coming years a vast dependency arise in the valley, partially explored, which was to extend her domain and enrich her treasury. Fearing England might profit by the discovery and claim the country, she attempted as far as possible to prevent the news from becoming general. Joliet was rewarded by the gift of the Island of Anticosti, in the St. Lawrence, while Marquette, conscious of his service to his Master, was content with the salvation of souls.

Marquette, left at Green Bay, suffered long with his malady, and was not permitted, until the autumn of the following year (1674), to return and teach the Illinois Indians. With this purpose in view, he left Green Bay on the 25th of October with two Frenchmen and a number of Illinois and Pottawatomic Indians for the villages on the Chicago and Illinois Rivers. Entering Lake Michigan, they encountered adverse winds and waves and were more than a month on the way. Going some distance up the Chicago River, they found Marquette too weak to proceed farther, his malady having assumed a violent form, and landing, they erected two huts and prepared to pass the winter. The good missionary taught the natives here daily, in spite of his afflictions, while his companions supplied him and themselves with food by fishing and hunting. Thus the winter wore away, and Marquette, renewing his vows, prepared to go on to the village at the foot of the rocky citadel, where he had been two years before. On the 13th of March, 1675, they left their huts and, rowing on up the Chicago to the portage between that and the Desplaines, embarked on their way. Amid the incessant rains of spring, they were rapidly borne down that stream to the Illinois, on whose rushing flood they floated to the

object of their destination. At the great town the missionary was received as a heavenly messenger, and as he preached to them of heaven and hell, of angels and demons, of good and bad deeds, they regarded him as divine and besought him to remain among them. The town then contained an immense concourse of natives, drawn hither by the reports they heard, and assembling them before him on the plain near their village, where now are prosperous farms, he held before their astonished gaze four large pictures of the Holy Virgin, and daily harangued them on the duties of Christianity and the necessity of conforming their conduct to the words they heard. His strength was fast declining and warned him he could not long remain. Finding he must go, the Indians furnished him an escort as far as the lake, on whose turbulent waters he embarked with his two faithful attendants. They turned their canoes for the Mackinaw Mission, which the afflicted missionary hoped to reach before death came. As they coasted along the eastern shores of the lake, the vernal hue of May began to cover the hillsides with robes of green, now dimmed to the eye of the departing Father, who became too weak to view them. By the 19th of the month, he could go no farther, and requested his men to land and build him a hut in which he might pass away. That done, he gave, with great composure, directions concerning his burial, and thanked God that he was permitted to die in the wilderness in the midst of his work, an unshaken believer in the faith he had so earnestly preached. As twilight came on, he told his weary attendants to rest, promising that when death should come he would call them. At an early hour, on the morning of the 20th of May, 1675, they heard a feeble voice, and hastening to his side found that the gentle spirit of the good missionary had gone to heaven. His hand grasped the crucifix, and his lips bore as their last sound the name of the Virgin. They dug a grave near the banks of the stream and buried him as he had requested. There in a lonely wilderness the peaceful soul of Marquette had at last found a rest, and his weary labors closed. His companions went on to the mission, where the news of his death caused great sorrow, for he was one beloved by all.

Three years after his burial, the Ottawas, hunting in the vicinity of his grave, determined to carry his bones to the mission at their home, in accordance with an ancient custom of their tribe. Having opened the grave, at whose head a cross had been planted, they carefully removed the bones and

cleaning them, a funeral procession of thirty canoes bore them to the Mackinaw Mission, singing the songs he had taught them. At the shores of the mission the bones were received by the priests, and, with great ceremony, buried under the floor of the rude chapel.

While Marquette and Joliet were exploring the head-waters of the "Great River," another man, fearless in purpose, pious in heart, and loyal to his country, was living in Canada and watching the operations of his fellow countrymen with keen eyes. When the French first saw the inhospitable shores of the St. Lawrence, in 1535, under the lead of Jacques Cartier, and had opened a new country to their crown, men were not lacking to further extend the discovery. In 1608, Champlain came, and at the foot of a cliff on that river founded Quebec. Seven years after, he brought four Recollet monks; and through them and the Jesuits the discoveries already narrated occurred. Champlain died in 1635, one hundred years after Cartier's first visit, but not until he had explored the northern lakes as far as Lake Huron, on whose rocky shores he, as the progenitor of a mighty race to follow, set his feet. He, with others, held to the idea that somewhere across the country, a river highway extended to the Western ocean. The reports from the missions whose history has been given aided this belief; and not until Marquette and Joliet returned was the delusion in any way dispelled. Before this was done, however, the man to whom reference has been made, Robert Cavalier, better known as La Salle, had endeavored to solve the mystery, and, while living on his grant of land eight miles above Montreal, had indeed effected important discoveries.

La Salle, the next actor in the field of exploration after Champlain, was born in 1643. His father's family was among the old and wealthy burghers of Rouen, France, and its members were frequently entrusted with important governmental positions. He early exhibited such traits of character as to mark him among his associates. Coming from a wealthy family, he enjoyed all the advantages of his day, and received, for the times, an excellent education. He was a Catholic, though his subsequent life does not prove him to have been a religious enthusiast. From some cause, he joined the Order of Loyola, but the circumscribed sphere of action set for him in the order illy concurred with his independent disposition, and led to his separation from it. This was effected, however, in a good spirit, as they

considered him fit for a different field of action than any presented by the order. Having a brother in Canada, a member of the order of St. Sulpice, he determined to join him. By his connection with the Jesuits he had lost his share of his father's estate, but, by some means, on his death, which occurred about this time, he was given a small share; and with this, in 1666, he arrived in Montreal. All Canada was alive with the news of the explorations; and La Salle's mind, actively grasping the ideas he afterward carried out, began to mature plans for their perfection. At Montreal he found a seminary of priests of the St. Sulpice Order who were encouraging settlers by grants of land on easy terms, hoping to establish a barrier of settlements between themselves and the Indians, made enemies to the French by Champlain's actions when founding Quebec. The Superior of the seminary, learning of LaSalle's arrival, gratuitously offered him a grant of land on the St. Lawrence, eight miles above Montreal. The grant, though dangerously near the hostile Indians, was accepted, and LaSalle soon enjoyed an excellent trade in furs. While employed in developing his claim, he learned of the great unknown route, and burned with a desire to solve its existence. He applied himself closely to the study of Indian dialects, and in three years is said to have made great progress in their language. While, on his farm his thoughts often turned to the unknown land away to the west, and, like all men of his day, he desired to explore the route to the Western sea, and thence obtain an easy trade with China and Japan. The "Great River, which flowed to the sea," must, thought they, find an outlet in the Gulf of California. While musing on these things, Marquette and Joliet were preparing to descend the Wisconsin; and LaSalle himself learned from a wandering band of Senecas that a river, called the Ohio, arose in their country and flowed to the sea, but at such a distance that it would require eight months to reach its mouth. This must be the Great River, or a part of it: for all geographers of the day considered the Mississippi and its tributary as one stream. Placing great confidence on this hypothesis, La Salle repaired to Quebec to obtain the sanction of Gov. Courcelles. His plausible statements soon won him the Governor and M. Talon, and letters patent were issued granting the exploration. No pecuniary aid was offered, and La Salle, having expended all his means in improving his

estate, was obliged to sell it to procure the necessary outfit. The Superior of the seminary being favorably disposed toward him, purchased the greater part of his improvement, and realizing 2,800 livres, he purchased four canoes and the necessary supplies for the expedition. The seminary was, at the same time, preparing for a similar exploration. The priests of this order, emulating the Jesuits, had established missions on the northern shore of Lake Ontario. Hearing of populous tribes still further west, they resolved to attempt their conversion, and deputed two of their number for the purpose. On going to Quebec to procure the necessary supplies, they were advised of La Salle's expedition down the Ohio, and resolved to unite themselves with it. La Salle did not altogether favor their attempt, as he believed the Jesuits already had the field, and would not care to have any aid from a rival order. His disposition also would not well brook the part they assumed, of asking him to be a co-laborer rather than a leader. However, the expeditions, merged into one body, left the mission on the St. Lawrence on the 6th of July, 1669, in seven canoes. The party numbered twenty-four persons, who were accompanied by two canoes filled with Indians who had visited La Salle, and who now acted as guides. Their guides led them up the St. Lawrence, over the expanse of Lake Ontario, to their village on the banks of the Genesee, where they expected to find guides to lead them on to the Ohio. As La Salle only partially understood their language, he was compelled to confer with them by means of a Jesuit stationed at the village. The Indians refused to furnish him the expected aid, and even burned before his eyes a prisoner, the only one who could give him any knowledge he desired. He surmised the Jesuits were at the bottom of the matter, fearful lest the disciples of St. Sulpice should gain a foothold in the west. He lingered here a month, with the hope of accomplishing his object, when, by chance, there came by an Iroquois Indian, who assured them that at his colony, near the head of the lake, they could find guides; and offered to conduct them thither. Coming along the southern shore of the lake, they passed, at its western extremity, the mouth of the Niagara River, where they heard for the first time the thunder of the mighty cataract between the two lakes. At the village of the Iroquois they met a friendly reception, and were informed by a Shawanese prisoner that they could reach the Ohio in six weeks' time, and that he

would guide them there. While preparing to commence the journey, they heard of the missions to the northwest, and the priests resolved to go there and convert the natives, and find the river by that route. It appears that Louis Joliet met them here, on his return from visiting the copper mines of Lake Superior, under command of M. Talon. He gave the priests a map of the country, and informed them that the Indians of those regions were in great need of spiritual advisers. This strengthened their intention, though warned by La Salle, that the Jesuits were undoubtedly there. The authority for Joliet's visit to them here is not clearly given, and may not be true, but the same letter which gives the account of the discovery of the Ohio at this time by La Salle, states it as a fact, and it is hence inserted. The missionaries and La Salle separated, the former to find, as he had predicted, the followers of Loyola already in the field, and not wanting their aid. Hence they return from a fruitless tour.

La Salle, now left to himself and just recovering from a violent fever, went on his journey. From the paper from which these statements are taken, it appears he went on to Onondaga, where he procured guides to a tributary of the Ohio, down which he proceeded to the principal stream, on whose bosom he continued his way till he came to the falls at the present city of Louisville, Ky. It has been asserted that he went on down to its mouth, but that is not well authenticated and is hardly true. The statement that he went as far as the falls is, doubtless, correct. He states, in a letter to Count Frontenac in 1677, that he discovered the Ohio, and that he descended it to the falls. Moreover, Joliet, in a measure his rival, for he was now preparing to go to the northern lakes and from them search the river, made two maps representing the lakes and the Mississippi, on both of which he states that La Salle had discovered the Ohio. Of its course beyond the falls, La Salle does not seem to have learned anything definite, hence his discovery did not in any way settle the great question, and elicited but little comment. Still, it stimulated La Salle to more effort, and while musing on his plans, Joliet and Marquette push on from Green Bay, and discover the river and ascertain the general course of its outlet. On Joliet's return in 1673, he seems to drop from further notice. Other and more venturesome souls were ready to finish the work begun by himself and the zealous Marquette, who, left among the far-away nations, laid down his life. The spirit of

La Salle was equal to the enterprise, and as he now had returned from one voyage of discovery, he stood ready to solve the mystery, and gain the country for his King. Before this could be accomplished, however, he saw other things must be done, and made preparations on a scale, for the time, truly marvelous.

Count Frontenac, the new Governor, had no sooner established himself in power than he gave a searching glance over the new realm to see if any undeveloped resources lay yet unnoticed, and what country yet remained open. He learned from the exploits of La Salle on the Ohio, and from Joliet, now returned from the West, of that immense country, and resolving in his mind on some plan whereby it could be formally taken, entered heartily into the plans of La Salle, who, anxious to solve the mystery concerning the outlet of the Great River, gave him the outline of a plan, sagacious in its conception and grand in its comprehension. La Salle had also informed him of the endeavors of the English on the Atlantic coast to divert the trade with the Indians, and partly to counteract this, were the plans of La Salle adopted. They were, briefly, to build a chain of forts from Canada, or New France, along the lakes to the Mississippi, and on down that river, thereby holding the country by power as well as by discovery. A fort was to be built on the Ohio as soon as the means could be obtained, and thereby hold that country by the same policy. Thus to La Salle alone may be ascribed the bold plan of gaining the whole West, a plan only thwarted by the force of arms. Through the aid of Frontenac, he was given a proprietary and the rank of nobility, and on his proprietary was erected a fort, which he, in honor of his Governor, called Fort Frontenac. It stood on the site of the present city of Kingston, Canada. Through it he obtained the trade of the Five Nations, and his fortune was so far assured. He next repaired to France, to perfect his arrangements, secure his title and obtain means.

On his return he built the fort alluded to, and prepared to go on in the prosecution of his plan. A civil discord arose, however, which for three years prevailed, and seriously threatened his projects. As soon as he could extricate himself, he again repaired to France, receiving additional encouragement in money, grants, and the exclusive privilege of a trade in buffalo skins, then considered a source of great wealth. On his return, he was accompanied by Henry Tonti, son of an illustrious Italian nobleman, who had fled from his

own country during one of its political revolutions. Coming to France, he made himself famous as the founder of Tontine Life Insurance. Henry Tonti possessed an indomitable will, and though he had suffered the loss of one of his hands by the explosion of a grenade in one of the Sicilian wars, his courage was undaunted, and his ardor undimmed. La Salle also brought recruits, mechanics, sailors, cordage and sails for rigging a ship, and merchandise for traffic with the natives. At Montreal, he secured the services of M. La Motte, a person of much energy and integrity of character. He also secured several missionaries before he reached Fort Frontenac. Among them were Louis Hennepin, Gabriel Ribourde and Zenabe Membre. All these were Flemings, all Recollets. Hennepin, of all of them, proved the best assistant. They arrived at the fort early in the autumn of 1678, and preparations were at once made to erect a vessel in which to navigate the lakes, and a fort at the mouth of the Niagara River. The Senecas were rather adverse to the latter proposals when La Motte and Hennepin came, but by the eloquence of the latter, they were pacified and rendered friendly. After a number of vexatious delays, the vessel, the Griffin, the first on the lakes, was built, and on the 7th of August, a year after La Salle came here, it was launched, passed over the waters of the northern lakes, and, after a tempestuous voyage, landed at Green Bay. It was soon after stored with furs and sent back, while La Salle and his men awaited its return. It was never afterward heard of. La Salle, becoming impatient, erected a fort, pushed on with a part of his men, leaving part at the fort, and passed over the St. Joseph and Kankakee Rivers, and thence to the Illinois, down whose flood they proceeded to Peoria Lake, where he was obliged to halt, and return to Canada for more men and supplies. He left Tonti and several men to complete a fort, called Fort "Crevecoeur"—broken-hearted. The Indians drove the French away, the men mutinied, and Tonti was obliged to flee. When La Salle returned, he found no one there, and going down as far as the mouth of the Illinois, he retraced his steps, to find some trace of his garrison. Tonti was found safe among the Pottawatomies at Green Bay, and Hennepin and his two followers, sent to explore the head-waters of the Mississippi, were again home, after a captivity among the Sioux.

La Salle renewed his force of men, and the third time set out for the outlet of the Great River.

He left Canada early in December, 1681, and by February 6, 1682, reached the majestic flood of the mighty stream. On the 24th, they ascended the Chickasaw Bluffs, and, while waiting to find a sailor who had strayed away, erected Fort Prudhomme. They passed several Indian villages further down the river, in some of which they met with no little opposition. Proceeding onward, ere-long they encountered the tide of the sea, and April 6, they emerged on the broad bosom of the Gulf, "tossing its restless billows, limitless, voiceless and lonely as when born of chaos, without a sign of life."

Coasting about a short time on the shores of the Gulf, the party returned until a sufficiently dry place was reached to effect a landing. Here another cross was raised, also a column, on which was inscribed these words:

"LOUIS LE GRAND, ROI DE FRANCE ET DE NAVARRE, REGNE; LE NEUVIEME, AVRIL, 1682." *

"The whole party," says a "proces verbal," in the archives of France, "chanted the *Te Deum*, the *Exauliat* and the *Domine salvum fac Regem*, and then after a salute of fire-arms and cries of *Vive le Roi*, La Salle, standing near the column, said in a loud voice in French:

"In the name of the most high, mighty, invincible and victorious Prince, Louis the Great, by the grace of God, King of France and of Navarre, Fourteenth of that name, this ninth day of April, one thousand six hundred and eighty two, I, in virtue of the commission of His Majesty, which I hold in my hand, and which may be seen by all whom it may concern, have taken, and do now take, in the name of His Majesty and of his successors to the crown, possession of this country of Louisiana, the seas, harbor, ports, bays, adjacent straits, and all the nations, people, provinces, cities, towns, villages, mines, minerals, fisheries, streams and rivers, comprised in the extent of said Louisiana, from the north of the great river St. Louis, otherwise called the Ohio, Alighin, Sipore or Chukagona, and this with the consent of the Chavunons, Chickachaws, and other people dwelling therein, with whom we have made alliance; as also along the river Colbert or Mississippi, and rivers which discharge themselves therein from its source beyond the Kiou or Nadouessious, and this with their consent, and with the consent of the Illinois, Mesigameas, Natchez, Koroas, which are the most considerable nations dwelling therein, with whom also

* Louis the Great, King of France and of Navarre, reigning the ninth day of April, 1682.

we have made alliance, either by ourselves or others in our behalf, as far as its mouth at the sea or Gulf of Mexico, about the twenty-seventh degree of its elevation of the North Pole, and also to the mouth of the River of Palms; upon the assurance which we have received from all these nations that we are the first Europeans who have descended or ascended the river Colbert, hereby protesting against all those who may in future undertake to invade any or all of these countries, peoples or lands, to the prejudice of the right of His Majesty, acquired by the consent of the nations herein named."

The whole assembly responded with shouts and the salutes of fire-arms. The *Sieur de La Salle* caused to be planted at the foot of the column a plate of lead, on one side of which was inscribed the arms of France and the following Latin inscription:

Robertvs Cavellier, cvm Domino de Tonly, Legato, R. P. Zenobi Membro, Recollecto, et, Viginti Gallis Primos Hoc Flymen inde ab ilineorvm Pago, enavigavit, ejvsqve ostivm fecit Pervivvm, nono Aprilis cio ioe LXXXII.

The whole proceedings were acknowledged before La Metaire, a notary, and the conquest was considered complete.

Thus was the foundation of France laid in the new republic, and thus did she lay claim to the Northwest, which now includes Ohio, and the county, whose history this book perpetuates.

La Salle and his party returned to Canada soon after, and again that country, and France itself, rang with anthems of exultation. He went on to France, where he received the highest honors. He was given a fleet, and sailors as well as colonists to return to the New World by way of a southern voyage, expecting to find the mouth of the Mississippi by an ocean course. Sailing past the outlets, he was wrecked on the coast of Texas, and in his vain endeavors to find the river or return to Canada, he became lost on the plains of Arkansas, where he, in 1687, was basely murdered by one of his followers. "You are down now, Grand Bashaw," exclaimed his slayer, and despoiling his remains, they left them to be devoured by wild beasts. To such an ignominious end came this daring, bold adventurer. Alone in the wilderness, he was left, with no monument but the vast realm he had discovered, on whose bosom he was left without covering and without protection.

"For force of will and vast conception; for various knowledge, and quick adaptation of his genius

to untried circumstances; for a sublime magnanimity, that resigned itself to the will of Heaven, and yet triumphed over affliction by energy of purpose and unflinching hope—he had no superior among his countrymen. He had won the affections of the governor of Canada, the esteem of Colbert, the confidence of Seignelay, the favor of Louis XIV. After the beginning of the colonization of Upper Canada, he perfected the discovery of the Mississippi from the Falls of St. Anthony to its mouth; and he will be remembered through all time as the father of colonization in the great central valley of the West.*

Avarice, passion and jealousy were not calmed by the blood of La Salle. All of his conspirators perished by ignoble deaths, while only seven of the sixteen succeeded in continuing the journey until they reached Canada, and thence found their way to France.

Tonti, who had been left at Fort St. Louis, on "Starved Rock" on the Illinois, went down in search of his beloved commander. Failing to find him, he returned and remained here until 1700, thousands of miles away from friends. Then he went down the Mississippi to join D'Iberville, who had made the discovery of the mouth of the Mississippi by an ocean voyage. Two years later, he went on a mission to the Chickasaws, but of his subsequent history nothing is known.

The West was now in possession of the French. La Salle's plans were yet feasible. The period of exploration was now over. The great river and its outlet was known, and it only remained for that nation to enter in and occupy what to many a Frenchman was the "Promised Land." Only eighteen years had elapsed since Marquette and Joliet had descended the river and shown the course of its outlet. A spirit, less bold than La Salle's would never in so short a time have penetrated for more than a thousand miles an unknown wilderness, and solved the mystery of the world.

When Joutel and his companions reached France in 1688, all Europe was on the eve of war. Other nations than the French wanted part of the New World, and when they saw that nation greedily and rapidly accumulating territory there, they endeavored to stay its progress. The league of Augsburg was formed in 1687 by the princes of the Empire to restrain the ambition of Louis XIV, and in 1688, he began hostilities by the capture of Philipsburg. The next year, England, under the

lead of William III, joined the alliance, and Louis found himself compelled, with only the aid of the Turks, to contend against the united forces of the Empires of England, Spain, Holland, Denmark, Sweden and Norway. Yet the tide of battle wavered. In 1689, the French were defeated at Walcourt, and the Turks at Widin; but in 1690, the French were victorious at Charleroy, and the Turks at Belgrade. The next year, and also the next, victory inclined to the French, but in 1693, Louvois and Luxemburg were dead and Namur surrendered to the allies. The war extended to the New World, where it was maintained with more than equal success by the French, though the English population exceeded it more than twenty to one. In 1688, the French were estimated at about twelve thousand souls in North America, while the English were more than two hundred thousand. At first the war was prosecuted vigorously. In 1689, De. Ste. Helene and D'Iberville, two of the sons of Charles le Morne, crossed the wilderness and reduced the English forts on Hudson's Bay. But in August of the same year, the Iroquois, the hereditary foes of the French, captured and burned Montreal. Frontenac, who had gone on an expedition against New York by sea, was recalled. Fort Frontenac was abandoned, and no French posts left in the West between Trois Rivieres and Mackinaw, and were it not for the Jesuits the entire West would now have been abandoned. To recover their influence, the French planned three expeditions. One resulted in the destruction of Schenectady, another, Salmon Falls, and the third, Casco Bay. On the other hand, Nova Scotia was reduced by the colonies, and an expedition against Montreal went as far as to Lake Champlain, where it failed, owing to the dissensions of the leaders. Another expedition, consisting of twenty-four vessels, arrived before Quebec, which also failed through the incompetency of Sir William Phipps. During the succeeding years, various border conflicts occurred, in all of which border scenes of savage cruelty and savage ferocity were enacted. The peace of Ryswick, in 1697, closed the war. France retained Hudson's Bay, and all the places of which she was in possession in 1688; but the boundaries of the English and French claims in the New World were still unsettled.

The conclusion of the conflict left the French at liberty to pursue their scheme of colonization in the Mississippi Valley. In 1698, D'Iberville was sent to the lower province, which, ere long, was made a separate independency, called Louisiana.

* Bancroft.

Forts were erected on Mobile Bay, and the division of the territory between the French and the Spaniards was settled. Trouble existed between the French and the Chickasaws, ending in the cruel deaths of many of the leaders, in the fruitless endeavors of the Canadian and Louisianian forces combining against the Chickasaws. For many years the conflict raged, with unequal successes, until the Indian power gave way before superior military tactics. In the end, New Orleans was founded, in 1718, and the French power secured.

Before this was consummated, however, France became entangled in another war against the allied powers, ending in her defeat and the loss of Nova Scotia, Hudson's Bay and Newfoundland. The peace of Utrecht closed the war in 1713.

The French, weary with prolonged strife, adopted the plan, more peaceful in its nature, of giving out to distinguished men the monopoly of certain districts in the fur trade, the most prosperous of any avocation then. Crozat and Cadillac—the latter the founder of Detroit, in 1701—were the chief ones concerned in this. The founding of the villages of Kaskaskia, Cahokia, Vincennes, and others in the Mississippi and Wabash Valleys, led to the rapid development, according to the French custom of all these parts of the West, while along all the chief water-courses, other trading posts and forts were established, rapidly fulfilling the hopes of La Salle, broached so many years before.

The French had, at the beginning of the eighteenth century, four principal routes to their western towns, two of which passed over the soil of Ohio. The first of these was the one followed by Marquette and Joliet, by way of the Lakes to Green Bay, in Wisconsin; thence across a portage to the Wisconsin River, down which they floated to the Mississippi. On their return they came up the Illinois River, to the site of Chicago, whence Joliet returned to Quebec by the Lakes. La Salle's route was first by the Lakes to the St. Joseph's River, which he followed to the portage to the Kankakee, and thence downward to the Mississippi. On his second and third attempt, he crossed the lower peninsula of Michigan to the Kankakee, and again traversed its waters to the Illinois. The third route was established about 1716. It followed the southern shores of Lake Erie to the mouth of the Maumee River; following this stream, the voyagers went on to the

junction between it and the St. Mary's, which they followed to the "Oubache"—Wabash—and then to the French villages in Vigo and Knox Counties, in Indiana. Vincennes was the oldest and most important one here. It had been founded in 1702 by a French trader, and was, at the date of the establishment of the third route, in a prosperous condition. For many years, the traders crossed the plains of Southern Illinois to the French towns on the bottoms opposite St. Louis. They were afraid to go on down the "Waba" to the Ohio, as the Indians had frightened them with accounts of the great monsters below. Finally, some adventurous spirit went down the river, found it emptied into the Ohio, and solved the problem of the true outlet of the Ohio, heretofore supposed to be a tributary of the Wabash.

The fourth route was from the southern shore of Lake Erie, at Presqueville, over a portage of fifteen miles to the head of French Creek, at Waterford, Penn.; thence down that stream to the Ohio, and on to the Mississippi. Along all these routes, ports and posts were carefully maintained. Many were on the soil of Ohio, and were the first attempts of the white race to possess its domain. Many of the ruins of these posts are yet found on the southern shore of Lake Erie, and at the outlets of streams flowing into the lake and the Ohio River. The principal forts were at Mackinaw, at Presqueville, at the mouth of the St. Joseph's, on Starved Rock, and along the Father of Waters. Yet another power was encroaching on them: a sturdy race, clinging to the inhospitable Atlantic shores, were coming over the mountains. The murmurs of a conflict were already heard—a conflict that would change the fate of a nation.

The French were extending their explorations beyond the Mississippi; they were also forming a political organization, and increasing their influence over the natives. Of a passive nature, however, their power and their influence could not withstand a more aggressive nature, and they were obliged, finally, to give way. They had the fruitful valleys of the West more than a century; yet they developed no resources, opened no mines of wealth, and left the country as passive as they found it.

Of the growth of the West under French rule, but little else remains to be said. The sturdy Anglo-Saxon race on the Atlantic coast, and their progenitors in England, began, now, to turn their attention to this vast country. The voluptuousness

of the French court, their neglect of the true basis of wealth, agriculture, and the repressive tendencies laid on the colonists, led the latter to adopt a hunter's life, and leave the country undeveloped and ready for the people who claimed the country from "sea to sea." Their explorers were now at work. The change was at hand.

Occasional mention has been made in the history of the State, in preceding pages, of settlements and trading-posts of the French traders, explorers and missionaries, within the limits of Ohio. The French were the first white men to occupy the northwestern part of the New World, and though their stay was brief, yet it opened the way to a sinewy race, living on the shores of the Atlantic, who in time came, saw, and conquered that part of America, making it what the people of to-day enjoy.

As early as 1669, four years before the discovery of the Mississippi by Joliet and Marquette, La Salle, the famous explorer, discovered the Ohio River, and paddled down its gentle current as far as the falls at the present city of Louisville, but he, like others of the day, made no settlement on its banks, only claiming the country for his King by virtue of this discovery.

Early in the beginning of the eighteenth century, French traders and voyagers passed along the southern shores of Lake Erie, to the mouth of the Maumee, up whose waters they rowed their bark canoes, on their way to their outposts in the Wabash and Illinois Valleys, established between 1675 and 1700. As soon as they could, without danger from their inveterate enemies, the Iroquois, masters of all the lower lake country, erect a trading-post at the mouth of this river, they did so. It was made a depot of considerable note, and was, probably, the first permanent habitation of white men in Ohio. It remained until after the peace of 1763, the termination of the French and Indian war, and the occupancy of this country by the English. On the site of the French trading-post, the British, in 1794, erected Fort Miami, which they garrisoned until the country came under the control of Americans. Now, Maumee City covers the ground.

The French had a trading-post at the mouth of the Huron River, in what is now Erie County. When it was built is not now known. It was, however, probably one of their early outposts, and may have been built before 1750. They had another on the shore of the bay, on or near the site of Sandusky City. Both this and the one at the

mouth of the Huron River were abandoned before the war of the Revolution. On Lewis Evan's map of the British Middle Colonies, published in 1755, a French fort, called "Fort Junandat, built in 1754," is marked on the east bank of the Sandusky River, several miles below its mouth. Fort Sandusky, on the western bank, is also noted. Several Wyandot towns are likewise marked. But very little is known concerning any of these trading-posts. They were, evidently, only temporary, and were abandoned when the English came into possession of the country.

The mouth of the Cuyahoga River was another important place. On Evan's map there is marked on the west bank of the Cuyahoga, some distance from its mouth, the words "*French House*," doubtless, the station of a French trader. The ruins of a house, found about five miles from the mouth of the river, on the west bank, are supposed to be those of the trader's station.

In 1786, the Moravian missionary, Zeisberger, with his Indian converts, left Detroit in a vessel called the Mackinaw, and sailed to the mouth of the Cuyahoga. From there they went up the river about ten miles, and settled in an abandoned Ottawa village, where Independence now is, which place they called "*Saint's Rest*." Their stay was brief, for the following April, they left for the Huron River, and settled near the site of Milan, Erie County, at a locality they called New Salem.

There are but few records of settlements made by the French until after 1750. Even these can hardly be called settlements, as they were simply trading-posts. The French easily affiliated with the Indians, and had little energy beyond trading. They never cultivated fields, laid low forests, and subjugated the country. They were a half-Indian race, so to speak, and hence did little if anything in developing the West.

About 1749, some English traders came to a place in what is now Shelby County, on the banks of a creek since known as Loramie's Creek, and established a trading-station with the Indians. This was the first English trading-place or attempt at settlement in the State. It was here but a short time, however, when the French, hearing of its existence, sent a party of soldiers to the Twigtwees, among whom it was founded, and demanded the traders as intruders upon French territory. The Twigtwees refusing to deliver up their friends, the French, assisted by a large party of Ottawas and Chippewas, attacked the trading-house, probably a block-house, and, after a severe

battle, captured it. The traders were taken to Canada. This fort was called by the English "Pickawillany," from which "Piqua" is probably derived. About the time that Kentucky was settled, a Canadian Frenchman, named Loramie, established a store on the site of the old fort. He was a bitter enemy of the Americans, and for a long time Loramie's store was the headquarters of mischief toward the settlers.

The French had the faculty of endearing themselves to the Indians by their easy assimilation of their habits; and, no doubt, Loramie was equal to any in this respect, and hence gained great influence over them. Col. Johnston, many years an Indian Agent from the United States among the Western tribes, stated that he had often seen the "Indians burst into tears when speaking of the times when their French father had dominion over them; and their attachment always remained unabated."

So much influence had Loramie with the Indians, that, when Gen. Clarke, from Kentucky, invaded the Miami Valley in 1782, his attention was attracted to the spot. He came on and burnt the Indian settlement here, and destroyed the store of the Frenchman, selling his goods among the men at auction. Loramie fled to the Shawanees, and, with a colony of that nation, emigrated west of the Mississippi, to the Spanish possessions, where he again began his life of a trader.

In 1794, during the Indian war, a fort was built on the site of the store by Wayne, and named Fort Loramie. The last officer who had command here was Capt. Butler, a nephew of Col. Richard Butler, who fell at St. Clair's defeat. While here with his family, he lost an interesting boy, about eight years of age. About his grave, the sorrowing father and mother built a substantial picket-fence, planted honeysuckles over it, which, long after, remained to mark the grave of the soldier's boy.

The site of Fort Loramie was always an important point, and was one of the places defined on the boundary line at the Greenville treaty. Now a barn covers the spot.

At the junction of the Auglaize and Maumee Rivers, on the site of Fort Defiance, built by Gen. Wayne in 1794, was a settlement of traders, established some time before the Indian war began. "On the high ground extending from the Maumee a quarter of a mile up the Auglaize, about two hundred yards in width, was an open space, on the west and south of which were oak

woods, with hazel undergrowth. Within this opening, a few hundred yards above the point, on the steep bank of the Auglaize, were five or six cabins and log houses, inhabited principally by Indian traders. The most northerly, a large hewed-log house, divided below into three apartments, was occupied as a warehouse, store and dwelling, by George Ironside, the most wealthy and influential of the traders on the point. Next to his were the houses of Pirault (Pero) a French baker, and McKenzie, a Scot, who, in addition to merchandising, followed the occupation of a silversmith, exchanging with the Indians his brooches, ear-drops and other silver ornaments, at an enormous profit, for skins and furs.

Still further up were several other families of French and English; and two American prisoners, Henry Ball, a soldier taken in St. Clair's defeat, and his wife, Polly Meadows, captured at the same time, were allowed to live here and pay their masters the price of their ransom—he, by boating to the rapids of the Maumee, and she by washing and sewing. Fronting the house of Ironside, and about fifty yards from the bank, was a small stockade, inclosing two hewed-log houses, one of which was occupied by James Girty (a brother of Simon), the other, occasionally, by Elliott and McKee, British Indian Agents living at Detroit.*

The post, cabins and all they contained fell under the control of the Americans, when the British evacuated the shores of the lakes. While they existed, they were an undoubted source of Indian discontent, and had much to do in prolonging the Indian war. The country hereabouts did not settle until some time after the creation of the State government.

As soon as the French learned the true source of the Ohio and Wabash Rivers, both were made a highway to convey the products of their hunters. In coursing down the Ohio, they made trading-places, or depots, where they could obtain furs of the Indians, at accessible points, generally at the mouths of the rivers emptying into the Ohio. One of these old forts or trading-places stood about a mile and a half south of the outlet of the Scioto. It was here in 1740; but when it was erected no one could tell. The locality must have been pretty well known to the whites, however; for, in 1785, three years before the settlement of Marietta was made, four families

*Narrative of O. M. Spencer.

made an ineffectual attempt to settle near the same place. They were from Kentucky, but were driven away by the Indians a short time after they arrived, not being allowed to build cabins, and had only made preparations to plant corn and other necessaries of life. While the men were encamped near the vicinity of Piketown, in Pike County, when on a hunting expedition, they were surprised by the Indians, and two of them slain. The others hastened back to the encampment at the mouth of the Scioto, and hurriedly gathering the families together, fortunately got them on a flat-boat, at that hour on its way down the river. By the aid of the boat, they were enabled to reach Maysville, and gave up the attempt to settle north of the Ohio.

The famous "old Scioto Salt Works," in Jackson County, on the banks of Salt Creek, a tributary of the Scioto, were long known to the whites before any attempt was made to settle in Ohio. They were indicated on the maps published in 1755. They were the resort, for generations, of the Indians in all parts of the West, who annually came here to make salt. They often brought white prisoners with them, and thus the salt works became known. There were no attempts made to settle here, however, until after the Indian war, which closed in 1795. As soon as peace was assured, the whites came here for salt, and soon after made a settlement. Another early salt spring was in what is now Trumbull County. It is also noted on Evan's map of 1755. They were occupied by the Indians, French, and by the Americans as early as 1780, and perhaps earlier.

As early as 1761 Moravian missionaries came among the Ohio Indians and began their labors. In a few years, under the lead of Revs. Fredrick Post and John Heckewelder, permanent stations were established in several parts of the State, chiefly on the Tuscarawas River in Tuscarawas County. Here were the three Indian villages—Shoenburn, Gnadenhutzen and Salem. The site of the first is about two miles south of New Philadelphia; Gnadenhutzen was seven miles further south, and about five miles still on was Salem, a short distance from the present village of Port Washington. The first and last named of these villages were on the west side of the Tuscarawas River, near the margin of the Ohio Canal. Gnadenhutzen was on the east side of the river. It was here that the brutal massacre of these Christian Indians, by the rangers under Col. Williamson, occurred March 8, 1782. The account of the massacre and of these tribes

appears in these pages, and it only remains to notice what became of them.

The hospitable and friendly character of these Indians had extended beyond their white brethren on the Ohio. The American people at large looked on the act of Williamson and his men as an outrage on humanity. Congress felt its influence, and gave them a tract of twelve thousand acres, embracing their former homes, and induced them to return from the northern towns whither they had fled. As the whites came into the country, their manners degenerated until it became necessary to remove them. Through Gen. Cass, of Michigan, an agreement was made with them, whereby Congress paid them over \$6,000, an annuity of \$400, and 24,000 acres in some territory to be designated by the United States. This treaty, by some means, was never effectually carried out, and the principal part of them took up their residence near a Moravian missionary station on the River Thames, in Canada. Their old churchyard still exists on the Tuscarawas River, and here rest the bones of several of their devoted teachers. It is proper to remark here, that Mary Heckewelder, daughter of the missionary, is generally believed to have been the first white child born in Ohio. However, this is largely conjecture. Captive women among the Indians, before the birth of Mary Heckewelder, are known to have borne children, which afterward, with their mothers, were restored to their friends. The assertion that Mary Heckewelder was the first child born in Ohio, is therefore incorrect. She is the first of whom any definite record is made.

These outposts are about all that are known to have existed prior to the settlement at Marietta. About one-half mile below Bolivar, on the western line of Tuscarawas County, are the remains of Fort Laurens, erected in 1778, by a detachment of 1,000 men under Gen. McIntosh, from Fort Pitt. It was, however, occupied but a short time, vacated in August, 1779, as it was deemed untenable at such a distance from the frontier.

During the existence of the six years' Indian war, a settlement of French emigrants was made on the Ohio River, that deserves notice. It illustrates very clearly the extreme ignorance and credulity prevalent at that day. In May or June of 1788, Joel Barlow left this country for Europe, "authorized to dispose of a very large body of land in the West." In 1790, he distributed proposals in Paris for the disposal of lands at five

shillings per acre, which, says Volney, "promised a climate healthy and delightful; scarcely such a thing as a frost in the winter; a river, called by way of eminence 'The Beautiful,' abounding in fish of an enormous size; magnificent forests of a tree from which sugar flows, and a shrub which yields candles; venison in abundance; no military enrollments, and no quarters to find for soldiers." Purchasers became numerous, individuals and whole families sold their property, and in the course of 1791 many embarked at the various French sea-ports, each with his title in his pocket. Five hundred settlers, among whom were many wood carvers and guilders to His Majesty, King of France, coachmakers, friseurs and peruke makers, and other artisans and *artistes*, equally well fitted for a frontier life, arrived in the United States in 1791-92, and acting without concert, traveling without knowledge of the language, customs and roads, at last managed to reach the spot designated for their residence. There they learned they had been cruelly deceived, and that the titles they held were worthless. Without food, shelterless, and danger closing around them, they were in a position that none but a Frenchman could be in without despair. Who brought them thither, and who was to blame, is yet a disputed point. Some affirm that those to whom large grants of land were made when the Ohio Company procured its charter, were the real instigators of the movement. They failed to pay for their lands, and hence the title reverted to the Government. This, coming to the ears of the poor Frenchmen, rendered their situation more distressing. They never paid for their lands, and only through the clemency of Congress, who afterward gave them a grant of land, and confirmed them in its title, were they enabled to secure a foothold. Whatever doubt there may be as to the

causes of these people being so grossly deceived, there can be none regarding their sufferings. They had followed a jack-o-lantern into the howling wilderness, and must work or starve. The land upon which they had been located was covered with immense forest trees, to level which the coachmakers were at a loss. At last, hoping to conquer by a *coup de main*, they tied ropes to the branches, and while a dozen pulled at them as many fell at the trunk with all sorts of edged tools, and thus soon brought the monster to the earth. Yet he was a burden. He was down, to be sure, but as much in the way as ever. Several lopped off the branches, others dug an immense trench at his side, into which, with might and main, all rolled the large log, and then buried him from sight. They erected their cabins in a cluster, as they had seen them in their own native land, thus affording some protection from marauding bands of Indians. Though isolated here in the lonely wilderness, and nearly out of funds with which to purchase provisions from descending boats, yet once a week they met and drowned care in a merry dance, greatly to the wonderment of the scout or lone Indian who chanced to witness their revelry. Though their vivacity could work wonders, it would not pay for lands nor buy provisions. Some of those at Gallipolis (for such they called their settlement, from Gallia, in France) went to Detroit, some to Kaskaskia, and some bought land of the Ohio Company, who treated them liberally. Congress, too, in 1795, being informed of their sufferings, and how they had been deceived, granted them 24,000 acres opposite Little Sandy River, to which grant, in 1798, 12,000 acres more were added. The tract has since been known as French Grant. The settlement is a curious episode in early Western history, and deserves a place in its annals.

CHAPTER III.

ENGLISH EXPLORATIONS—TRADERS—FRENCH AND INDIAN WAR IN THE WEST—ENGLISH POSSESSION.

AS has been noted, the French title rested on the discoveries of their missionaries and traders, upon the occupation of the country, and upon the construction of the treaties of Ryswick, Utrecht and Aix la Chapelle. The English claims to the same region were based on the fact of a prior occupation of the corresponding coast, on an opposite construction of the same treaties, and an alleged cession of the rights of the Indians. The rights acquired by discovery were conventional, and in equity were good only between European powers, and could not affect the rights of the natives, but this distinction was disregarded by all European powers. The inquiry of an Indian chief embodies the whole controversy: "Where are the Indian lands, since the French claim all on the north side of the Ohio and the English all on the south side of it?"

The English charters expressly granted to all the original colonies the country westward to the South Sea, and the claims thus set up in the West, though held in abeyance, were never relinquished. The primary distinction between the two nations governed their actions in the New World, and led finally to the supremacy of the English. They were fixed agricultural communities. The French were mere trading-posts. Though the French were the prime movers in the exploration of the West, the English made discoveries during their occupation, however, mainly by their traders, who penetrated the Western wilderness by way of the Ohio River, entering it from the two streams which uniting form that river. Daniel Coxie, in 1722, published, in London, "A description of the English province of Carolina, by the Spaniards called Florida, and by the French called La Louisiane, as also the great and famous river Meschacebe, or Mississippi, the five vast navigable lakes of fresh water, and the parts adjacent, together with an account of the commodities of the growth and production of the said province." The title of this work exhibits very clearly the opinions of the English people respecting the West. As early as 1630, Charles I granted to Sir Robert Heath "All that part of America lying between thirty-

one and thirty-six degrees north latitude, from sea to sea," out of which the limits of Carolina were afterward taken. This immense grant was conveyed in 1638, to the Earl of Arundel, and afterward came into the possession of Dr. Daniel Coxie. In the prosecution of this claim, it appeared that Col. Wood, of Virginia, from 1654 to 1664, explored several branches of the Ohio and "Meschacebe," as they spell the Mississippi. A Mr. Needham, who was employed by Col. Wood, kept a journal of the exploration. There is also the account of some one who had explored the Mississippi to the Yellow, or Missouri River, before 1676. These, and others, are said to have been there when La Salle explored the outlet of the Great River, as he found tools among the natives which were of European manufacture. They had been brought here by English adventurers. Also, when Iberville was colonizing the lower part of Louisiana, these same persons visited the Chickasaws and stirred them up against the French. It is also stated that La Salle found that some one had been among the Natchez tribes when he returned from the discovery of the outlet of the Mississippi, and excited them against him. There is, however, no good authority for these statements, and they are doubtless incorrect. There is also an account that in 1678, several persons went from New England as far south as New Mexico, "one hundred and fifty leagues beyond the Meschacebe," the narrative reads, and on their return wrote an account of the expedition. This, also, cannot be traced to good authority. The only accurate account of the English reaching the West was when Bienville met the British vessel at the "English Turn," about 1700. A few of their traders may have been in the valley west of the Alleghany Mountains before 1700, though no reliable accounts are now found to confirm these suppositions. Still, from the earliest occupation of the Atlantic Coast by the English, they claimed the country, and, though the policy of its occupation rested for a time, it was never fully abandoned. Its revival dates from 1710 properly, though no immediate endeavor was made for many years after. That

year, Alexander Spotswood was made Governor of Virginia. No sooner did he assume the functions of ruler, than, casting his eye over his dominion, he saw the great West beyond the Alleghany Mountains unoccupied by the English, and rapidly filling with the French, who he observed were gradually confining the English to the Atlantic Coast. His prophetic eye saw at a glance the animus of the whole scheme, and he determined to act promptly on the defensive. Through his representation, the Virginia Assembly was induced to make an appropriation to defray the expense of an exploration of the mountains, and see if a suitable pass could not then be found where they could be crossed. The Governor led the expedition in person. The pass was discovered, a route marked out for future emigrants, and the party returned to Williamsburg. There the Governor established the order of the "Knights of the Golden Horseshoe," presented his report to the Colonial Assembly and one to his King. In each report, he exposed with great boldness the scheme of the French, and advised the building of a chain of forts across to the Ohio, and the formation of settlements to counteract them. The British Government, engrossed with other matters, neglected his advice. Forty years after, they remembered it, only to regret that it was so thoughtlessly disregarded.

Individuals, however, profited by his advice. By 1730, traders began in earnest to cross the mountains and gather from the Indians the stores beyond. They now began to adopt a system, and abandoned the heretofore renegade habits of those who had superseded them, many of whom never returned to the Atlantic Coast. In 1742, John Howard descended the Ohio in a skin canoe, and, on the Mississippi was taken prisoner by the French. His captivity did not in the least deter others from coming. Indeed, the date of his voyage was the commencement of a vigorous trade with the Indians by the English, who crossed the Alleghanies by the route discovered by Gov. Spotswood. In 1748, Conrad Weiser, a German of Herenberg, who had acquired in early life a knowledge of the Mohawk tongue by a residence among them, was sent on an embassy to the Shawanees on the Ohio. He went as far as Logstown, a Shawanee village on the north bank of the Ohio, about seventeen miles below the site of Pittsburgh. Here he met the chiefs in counsel, and secured their promise of aid against the French.

The principal ground of the claims of the English in the Northwest was the treaty with the

Five Nations—the Iroquois. This powerful confederation claimed the jurisdiction over an immense extent of country. Their policy differed considerably from other Indian tribes. They were the only confederation which attempted any form of government in America. They were often termed the "Six Nations," as the entrance of another tribe into the confederacy made that number. They were the conquerors of nearly all tribes from Lower Canada, to and beyond the Mississippi. They only exacted, however, a tribute from the conquered tribes, leaving them to manage their own internal affairs, and stipulating that to them alone did the right of cession belong. Their country, under these claims, embraced all of America north of the Cherokee Nation, in Virginia; all Kentucky, and all the Northwest, save a district in Ohio and Indiana, and a small section in Southwestern Illinois, claimed by the Miami Confederacy. The Iroquois, or Six Nations, were the terror of all other tribes. It was they who devastated the Illinois country about Rock Fort in 1680, and caused wide-spread alarm among all the Western Indians. In 1684, Lord Howard, Governor of Virginia, held a treaty with the Iroquois at Albany, when, at the request of Col. Duncan, of New York, they placed themselves under the protection of the English. They made a deed of sale then, by treaty, to the British Government, of a vast tract of country south and east of the Illinois River, and extending into Canada. In 1726, another deed was drawn up and signed by the chiefs of the national confederacy by which their lands were conveyed in trust to England, "to be protected and defended by His Majesty, to and for the use of the grantors and their heirs."*

If the Six Nations had a good claim to the Western country, there is but little doubt but England was justified in defending their country against the French, as, by the treaty of Utrecht, they had agreed not to invade the lands of Britain's Indian allies. This claim was vigorously contested by France, as that country claimed the Iroquois had no lawful jurisdiction over the West. In all the disputes, the interests of the contending nations was, however, the paramount consideration. The rights of the Indians were little regarded.

The British also purchased land by the treaty of Lancaster, in 1744, wherein they agreed to pay the Six Nations for land settled unlawfully in Pennsylvania, Virginia and Maryland. The In-

* Annals of the West.

dians were given goods and gold amounting to near a thousand pounds sterling. They were also promised the protection of the English. Had this latter provision been faithfully carried out, much blood would have been saved in after years. The treaties with the Six Nations were the real basis of the claims of Great Britain to the West; claims that were only settled by war. The Shawanee Indians, on the Ohio, were also becoming hostile to the English, and began to assume a threatening exterior. Peter Chartier, a half-breed, residing in Philadelphia, escaped from the authorities, those by whom he was held for a violation of the laws, and joining the Shawanees, persuaded them to join the French. Soon after, in 1743 or 1744, he placed himself at the head of 400 of their warriors, and lay in wait on the Alleghany River for the provincial traders. He captured two, exhibited to them a captain's commission from the French, and seized their goods, worth £1,600. The Indians, after this, emboldened by the aid given them by the French, became more and more hostile, and Weiser was again sent across the mountains in 1748, with presents to conciliate them and sound them on their feelings for the rival nations, and also to see what they thought of a settlement of the English to be made in the West. The visit of Conrad Weiser was successful, and Thomas Lee, with twelve other Virginians, among whom were Lawrence and Augustine Washington, brothers of George Washington, formed a company which they styled the Ohio Company, and, in 1748, petitioned the King for a grant beyond the mountains. The monarch approved the petition and the government of Virginia was ordered to grant the Company 500,000 acres within the bounds of that colony beyond the Alleghanies, 200,000 of which were to be located at once. This provision was to hold good for ten years, free of quit rent, provided the Company would settle 100 families within seven years, and build a fort sufficient for their protection. These terms the Company accepted, and sent at once to London for a cargo suitable for the Indian trade. This was the beginning of English Companies in the West; this one forming a prominent part in the history of Ohio, as will be seen hereafter. Others were also formed in Virginia, whose object was the colonization of the West. One of these, the Loyal Company, received, on the 12th of June, 1749, a grant of 800,000 acres, from the line of Canada on the north and west, and on the 29th of October, 1751, the Greenbriar Company received a grant of 100,000 acres.

To these encroachments, the French were by no means blind. They saw plainly enough that if the English gained a foothold in the West, they would inevitably endeavor to obtain the country, and one day the issue could only be decided by war. Vaudreuil, the French Governor, had long anxiously watched the coming struggle. In 1774, he wrote home representing the consequences that would surely come, should the English succeed in their plans. The towns of the French in Illinois were producing large amounts of bread-stuffs and provisions which they sent to New Orleans. These provinces were becoming valuable, and must not be allowed to come under control of a rival power. In 1749, Louis Celeron was sent by the Governor with a party of soldiers to plant leaden plates, suitably inscribed, along the Ohio at the mouths of the principal streams. Two of these plates were afterward exhumed. One was sent to the Maryland Historical Society, and the inscription* deciphered by De Witt Clinton. On these plates was clearly stated the claims of France, as will be seen from the translation below.

England's claim, briefly and clearly stated, read as follows: "That all lands, or countries westward from the Atlantic Ocean to the South Sea, between 48 and 34 degrees of North Latitude, were expressly included in the grant of King James the First, to divers of his subjects, so long time since as the year 1606, and afterwards confirmed in the year 1620; and under this grant, the colony of Virginia claims extent so far west as the South Sea, and the ancient colonies of Massachusetts Bay and Connecticut, were by their respective charters, made to extend to the said South Sea, so that not only the right to the sea coast, but to all the Inland countries from sea to sea, has at all times been asserted by the Crown of England."†

To make good their titles, both nations were now doing their utmost. Professedly at peace, it only needed a torch applied, as it were, to any point, to instantly precipitate hostilities. The French were

* The following is the translation of the inscription of the plate found at Venango: "In the year 1749, reign of Louis XV. King of France, we, Celeron, commandant of a detachment by Monsieur the Marquis de Gallisoniere, Commander-in-chief of New France, to establish tranquillity in certain Indian villages in these Cantons, have buried this plate at the confluence of the Toracklokin, this twenty-ninth of July, near the River Ohio, otherwise Beautiful River, as a monument of renewal of possession which we have taken of the said river, and all its tributaries; and of all the land on both sides, as far as the sources of said rivers; inasmuch as the preceding Kings of France have enjoyed it, and maintained it by their arms and by treaties; especially by those of Ryswick, Utrecht, and Aix La Chapelle."

† Colonial Records of Pennsylvania.

busily engaged erecting forts from the southern shores of Lake Erie to the Ohio, and on down in the Illinois Valley; up at Detroit, and at all its posts, preparations were constantly going on for the crisis, now sure to come. The issue between the two governments was now fully made up. It admitted of no compromise but the sword. To that, however, neither power desired an immediate appeal, and both sought rather to establish and fortify their interests, and to conciliate the Indian tribes. The English, through the Ohio Company, sent out Christopher Gist in the fall of 1750, to explore the regions west of the mountains. He was instructed to examine the passes, trace the courses of the rivers, mark the falls, seek for valuable lands, observe the strength, and to conciliate the friendship of the Indian tribes. He was well fitted for such an enterprise. Hardy, sagacious, bold, an adept in Indian character, a hunter by occupation, no man was better qualified than he for such an undertaking. He visited Logstown, where he was jealously received, passed over to the Muskingum River and Valley in Ohio, where he found a village of Wyandots, divided in sentiment. At this village he met Crogan, another equally famous frontiersman, who had been sent out by Pennsylvania. Together they held a council with the chiefs, and received assurance of the friendship of the tribe. This done, they passed to the Shawnee towns on the Scioto, received their assurances of friendship, and went on to the Miami Valley, which they crossed, remarking in Crogan's journal of its great fertility. They made a raft of logs on which they crossed the Great Miami, visited Piqua, the chief town of the Pickawillanies, and here made treaties with the Weas and Piankeshaws. While here, a deputation of the Ottawas visited the Miami Confederacy to induce them to unite with the French. They were repulsed through the influence of the English agents, the Miami sending Gist word that they would "stand like the mountains." Crogan now returned and published an account of their wanderings. Gist followed the Miami to its mouth, passed down the Ohio till within fifteen miles of the falls, then returned by way of the Kentucky River, over the highlands of Kentucky to Virginia, arriving in May, 1751. He had visited the Mingoës, Delawares, Wyandots, Shawnees and Miamis, proposed a union among these tribes, and appointed a grand council to meet at Logstown to form an alliance among themselves and with Virginia. His journey was marvelous for the day. It was extremely hazardous, as he

was part of the time among hostile tribes, who could have captured him and been well rewarded by the French Government. But Gist knew how to act, and was successful.

While Gist was doing this, some English traders established themselves at a place in what is now known as Shelby County, Ohio, and opened a store for the purpose of trading with the Indians. This was clearly in the limits of the West, claimed by the French, and at once aroused them to action. The fort or stockade stood on the banks of Loramie's Creek, about sixteen miles northwest of the present city of Sydney. It received the name Loramie from the creek by the French, which received its name in turn from the French trader of that name, who had a trading-post on this creek. Loramie had fled to the Spanish country west of the Mississippi, and for many years was a trader there; his store being at the junction of the Kansas and Missouri, near the present city of Kansas City, Mo. When the English traders came to Loramie's Creek, and erected their trading-place, they gave it the name of Pickawillany, from the tribe of Indians there. The Miami confederacy granted them this privilege as the result of the presents brought by Crogan and Gist. It is also asserted that Andrew Montour, a half-breed, son of a Seneca chief and the famous Catharine Montour, who was an important factor afterward in the English treaties with the Indians, was with them, and by his influence did much to aid in securing the privilege. Thus was established the first English trading-post in the Northwest Territory and in Ohio. It, however, enjoyed only a short duration. The French could not endure so clear an invasion of their country, and gathering a force of Ottawas and Chippewas, now their allies, they attacked the stockade in June, 1752. At first they demanded of the Miamis the surrender of the fort, as they were the real cause of its location, having granted the English the privilege. The Miamis not only refused, but aided the British in the defense. In the battle that ensued, fourteen of the Miamis were slain, and all the traders captured. One account says they were burned, another, and probably the correct one, states that they were taken to Canada as prisoners of war. It is probable the traders were from Pennsylvania, as that commonwealth made the Miamis presents as condolence for their warriors that were slain.

Blood had now been shed. The opening gun of the French and Indian war had been fired, and both

nations became more deeply interested in affairs in the West. The English were determined to secure additional title to the West, and, in 1752, sent Messrs. Fry, Lomax and Patton as commissioners to Logstown to treat with the Indians, and confirm the Lancaster treaty. They met the Indians on the 9th of June, stated their desires, and on the 11th received their answer. At first, the savages were not inclined to recognize the Lancaster treaty, but agreed to aid the English, as the French had already made war on the Twigtees (at Pickawillany), and consented to the establishment of a fort and trading-post at the forks of the Ohio. This was not all the Virginians wanted, however, and taking aside Andrew Montour, now chief of the Six Nations, persuaded him to use his influence with the red men. By such means, they were induced to treat, and on the 13th they all united in signing a deed, confirming the Lancaster treaty in its full extent, consenting to a settlement southwest of the Ohio, and covenanting that it should not be disturbed by them. By such means was obtained the treaty with the Indians in the Ohio Valley.

All this time, the home governments were endeavoring to out-manuever each other with regard to the lands in the West, though there the outlook only tokened war. The French understood better than the English how to manage the Indians, and succeeded in attaching them firmly to their cause. The English were not honest in their actions with them, and hence, in after years, the massacres that followed.

At the close of 1752, Gist was at work, in conformity with the Lancaster and Logstown treaties, laying out a fort and town on Chartier's Creek, about ten miles below the fork. Eleven families had crossed the mountains to settle at Gist's residence west of Laurel Hill, not far from the Youghiogheny. Goods had come from England for the Ohio Company, which were carried as far West as Will's Creek, where Cumberland now stands; and where they were taken by the Indians and traders.

On the other hand, the French were gathering cannon and stores on Lake Erie, and, without treaties or deeds of land, were gaining the good will of the inimical tribes, and preparing, when all was ready, to strike the blow. Their fortifications consisted of a chain of forts from Lake Erie to the Ohio, on the border. One was at Presque Isle, on the site of Erie; one on French Creek, on the site of Waterford, Penn.; one at the mouth of French Creek, in Venango County, Penn.; while opposite it was another, effectually commanding

that section of country. These forts, it will be observed, were all in the limits of the Pennsylvania colony. The Governor informed the Assembly of their existence, who voted £600 to be used in purchasing presents for the Indians near the forts, and thereby hold their friendship. Virginia, also, took similar measures. Trent was sent, with guns and ammunition and presents, to the friendly tribes, and, while on his mission, learned of the plates of lead planted by the French. In October, 1753, a treaty was consummated with representatives of the Iroquois, Delawares, Shawanees, Twigtees and Wyandots, by commissioners from Pennsylvania, one of whom was the philosopher Franklin. At the conferences held at this time, the Indians complained of the actions of the French in forcibly taking possession of the disputed country, and also bitterly denounced them for using rum to intoxicate the red men, when they desired to gain any advantage. Not long after, they had similar grounds of complaint against the English, whose lawless traders cared for nothing but to gain the furs of the savage at as little expense as possible.

The encroachments of the French on what was regarded as English territory, created intense feeling in the colonies, especially in Virginia. The purpose of the French to inclose the English on the Atlantic Coast, and thus prevent their extension over the mountains, became more and more apparent, and it was thought that this was the opening of a scheme already planned by the French Court to reduce all North America under the dominion of France. Gov. Dinwiddie determined to send an ambassador to the French posts, to ascertain their real intentions and to observe the amount and disposition of their forces. He selected a young Virginian, then in his twenty-first year, a surveyor by trade and one well qualified for the duty. That young man afterward led the American Colonies in their struggle for liberty. George Washington and one companion, Mr Gist, successfully made the trip, in the solitude of a severe winter, received assurance from the French commandant that they would by no means abandon their outposts, and would not yield unless compelled by force of arms. The commandant was exceedingly polite, but firm, and assured the young American that "we claim the country on the Ohio by virtue of the discovery of La Salle (in 1669) and will not give it up to the English. Our orders are to make prisoners of every Englishman found trading in the Ohio Valley."

During Washington's absence steps were taken to fortify the point formed by the junction of the Monongahela and Alleghany; and when, on his return, he met seventeen horses loaded with materials and stores for a fort at the forks of the Ohio, and, soon after, some families going out to settle, he knew the defense had begun. As soon as Washington made his report, Gov. Dinwiddie wrote to the Board of Trade, stating that the French were building a fort at Venango, and that, in March, twelve or fifteen hundred men would be ready to descend the river with their Indian allies, for which purpose three hundred canoes had been collected; and that Logstown was to be made headquarters, while forts were to be built in other places. He sent expresses to the Governors of Pennsylvania and New York, apprising them of the nature of affairs, and calling upon them for assistance. He also raised two companies, one of which was raised by Washington, the other by Trent. The one under Trent was to be raised on the frontiers, and was, as soon as possible, to repair to the Fork and erect there a fort, begun by the Ohio Company. Owing to various conflicting opinions between the Governor of Pennsylvania and his Assembly, and the conference with the Six Nations, held by New York, neither of those provinces put forth any vigorous measures until stirred to action by the invasions on the frontiers, and until directed by the Earl of Holderness, Secretary of State.

The fort at Venango was finished by the French in April, 1754. All along the creek resounded the clang of arms and the preparations for war. New York and Pennsylvania, though inactive, and debating whether the French really had invaded English territory or not, sent aid to the Old Dominion, now all alive to the conquest. The two companies had been increased to six; Washington was raised to the rank of Lieutenant Colonel, and made second under command of Joshua Fry. Ten cannon, lately from England, were forwarded from Alexandria; wagons were got ready to carry westward provisions and stores through the heavy spring roads; and everywhere men were enlisting under the King's promise of two hundred thousand acres of land to those who would go. They were gathering along Will's Creek and far beyond, while Trent, who had come for more men and supplies, left a little band of forty-one men, working away in hunger and want at the Fork, to which both nations were looking with anxious eyes. Though no enemy was near, and only a few Indian scouts were seen, keen eyes had observed the low

fortifications at the Fork. Swift feet had borne the news of it up the valley, and though Ensign Ward, left in command, felt himself secure, on the 17th of April he saw a sight that made his heart sick. Sixty batteaux and three hundred canoes were coming down the Alleghany. The commandant sent him a summons, which evaded no words in its meaning. It was useless to contend, that evening he supped with his conqueror; the next day he was bowed out by the polite Frenchman, and with his men and tools marched up the Monongahela. The first birds of spring were filling the air with their song; the rivers rolled by, swollen by April showers and melting snows; all nature was putting on her robes of green; and the fortress, which the English had so earnestly strived to obtain and fortify, was now in the hands of the French. Fort Du Quesne arose on the incomplete fortifications. The seven years' war that followed not only affected America, but spread to all quarters of the world. The war made England a great imperial power; drove the French from Asia and America; dispelled the brilliant and extended scheme of Louis and his voluptuous empire.

The active field of operations was in the Canadas principally, and along the western borders of Pennsylvania. There were so few people then in the present confines of Ohio, that only the possession of the country, in common with all the West, could be the animus of the conflict. It so much concerned this part of the New World, that a brief resumé of the war will be necessary to fully understand its history.

The fall of the post at the fork of the Ohio, Fort Du Quesne, gave the French control of the West. Washington went on with his few militia to retake the post. Though he was successful at first, he was in the end defeated, and surrendered, being allowed to return with all his munitions of war. The two governments, though trying to come to a peaceful solution of the question, were getting ready for the conflict. France went steadily on, though at one time England gave, in a measure, her consent to allow the French to retain all the country west of the Alleghanies and south of the lakes. Had this been done, what a different future would have been in America! Other destinies were at work, however, and the plan fell stillborn.

England sent Gen. Braddock and a fine force of men, who marched directly toward the post on the Ohio. His ill-fated expedition resulted only in the total defeat of his army, and his own death.

Washington saved a remnant of the army, and made his way back to the colonies. The English needed a leader. They next planned four campaigns; one against Fort Du Quesne; one against Crown Point; one against Niagara, and one against the French settlements in Nova Scotia. Nearly every one proved a failure. The English were defeated on sea and on land, all owing to the incapacity of Parliament, and the want of a suitable, vigorous leader. The settlements on the frontiers, now exposed to a cruel foe, prepared to defend themselves, and already the signs of a government of their own, able to defend itself, began to appear. They received aid from the colonies. Though the French were not repulsed, they and their red allies found they could not murder with impunity. Self-preservation was a stronger incentive in conflict than aggrandizement, and the cruelty of the Indians found avengers.

The great Pitt became Prime Minister June 29, 1757. The leader of the English now appeared. The British began to regain their losses on sea and land, and for them a brighter day was at hand. The key to the West must be retaken, and to Gen. Forbes was assigned the duty. Preceding him, a trusty man was sent to the Western Indians at the head-waters of the Ohio, and along the Monongahela and Alleghany, to see if some compromise with them could not be made, and their aid secured. The French had been busy through their traders inciting the Indians against the English. The lawless traders were another source of trouble. Caring nothing for either nation, they carried on a distressing traffic in direct violation of the laws, continually engendering ill-feeling among the natives. "Your traders," said one of them, "bring scarce anything but rum and flour. They bring little powder and lead, or other valuable goods. The rum ruins us. We beg you would prevent its coming in such quantities by regulating the traders. * * * These wicked whisky sellers, when they have got the Indians in liquor, make them sell the very clothes off their backs. If this practice be continued, we must be inevitably ruined. We most earnestly, therefore, beseech you to remedy it." They complained of the French traders the same way. They were also beginning to see the animus of the whole conflict. Neither power cared as much for them as for their land, and flattered and bullied by turns as served their purposes best.

The man selected to go upon this undertaking was Christian Frederic Post, a Moravian, who had lived among the Indians seventeen years, and mar-

ried into one of their tribes. He was a missionary, and though obliged to cross a country whose every stream had been dyed by blood, and every hillside rung with the death-yell, and grown red with the light of burning huts, he went willingly on his way. Of his journey, sufferings and doings, his own journal tells the story. He left Philadelphia on the 15th of July, 1758, and on the 7th of August safely passed the French post at Venango, went on to Big Beaver Creek, where he held a conference with the chiefs of the Indians gathered there. It was decided that a great conference should be held opposite Fort Du Quesne, where there were Indians of eight nations. "We will bear you in our bosoms," said the natives, when Post expressed a fear that he might be delivered over to the French, and royally they fulfilled their promises. At the conference, it was made clear to Post that all the Western Indians were wavering in their allegiance to the French, owing largely to the failure of that nation to fulfill their promises of aid to prevent them from being deprived of their land by the Six Nations, and through that confederacy, by the English. The Indians complained bitterly, moreover, of the disposition of the whites in over-running and claiming their lands. "Why did you not fight your battles at home or on the sea, instead of coming into our country to fight them?" they asked again and again, and mournfully shook their heads when they thought of the future before them. "Your heart is good," said they to Post. "You speak sincerely; but we know there is always a great number who wish to get rich; they have enough; look! we do not want to be rich and take away what others have. The white people think we have no brains in our heads; that they are big, and we are a handful; but remember when you hunt for a rattlesnake, you cannot always find it, and perhaps it will turn and bite you before you see it."* When the war of Pontiac came, and all the West was desolated, this saying might have been justly remembered. After concluding a peace, Post set out for Philadelphia, and after incredible hardships, reached the settlement uninjured early in September. His mission had more to do than at first is apparent, in the success of the English. Had it not been for him, a second Braddock's defeat might have befallen Forbes, now on his way to subjugate Fort Du Quesne.

Through the heats of August, the army hewed its way toward the West. Early in September it

* Post's Journal.

reached Raystown, whither Washington had been ordered with his troops. Sickness had prevented him from being here already. Two officers were sent out to reconnoiter the fort, who returned and gave a very good account of its condition. Gen. Forbes desired to know more of it, and sent out Maj. Grant, with 800 men, to gain more complete knowledge. Maj. Grant, supposing not more than 200 soldiers to be in the fort, marched near it and made a feint to draw them out, and engage them in battle. He was greatly misinformed as to the strength of the French, and in the engagement that followed he was badly beaten—270 of his men killed, 42 wounded, and several, including himself, taken prisoners. The French, elated with their victory, attacked the main army, but were repulsed and obliged to retreat to the fort. The army continued on its march. On the 24th of November they reached Turtle Creek, where a council of war was held, and where Gen. Forbes, who had been so ill as to be carried on a litter from the start, declared, with a mighty oath, he would sleep that night in the fort, or in a worse place. The Indians had, however, carried the news to the French that the English were as plenty as the trees of the woods, and in their fright they set fire to the fort in the night and left up and down the Ohio River. The next morning the English, who had heard the explosion of the magazine, and seen the light of the burning walls, marched in and took peaceable possession. A small fortification was thrown up on the bank, and, in honor of the great English statesman, it was called Fort Pitt. Col. Hugh Mercer was left in command, and the main body of the army marched back to the settlements. It reached Philadelphia January 17, 1759. On the 11th of March, Gen. Forbes died, and was buried in the chancel of Christ's Church, in that city.

Post was now sent on a mission to the Six Nations, with a report of the treaty of Easton. He was again instrumental in preventing a coalition of the Indians and the French. Indeed, to this obscure Moravian missionary belongs, in a large measure, the honor of the capture of Fort Du Quesne, for by his influence had the Indians been restrained from attacking the army on its march.

The garrison, on leaving the fort, went up and down the Ohio, part to Presque Isle by land, part to Fort Venango, while some of them went on down the Ohio nearly to the Mississippi, and there, in what is now Massac County, Ill., erected a fort, called by them Fort Massac. It was afterward named by many Fort Massacre, from the erroneous

supposition that a garrison had been massacred there.

The French, though deprived of the key to the West, went on preparing stores and ammunition, expecting to retake the fort in the spring. Before they could do this, however, other places demanded their attention.

The success of the campaign of 1758 opened the way for the consummation of the great scheme of Pitt—the complete reduction of Canada. Three expeditions were planned, by which Canada, already well nigh annihilated and suffering for food, was to be subjugated. On the west, Prideaux was to attack Niagara; in the center, Amherst was to advance on Ticonderoga and Crown Point; on the east, Wolfe was to besiege Quebec. All these points gained, the three armies were to be united in the center of the province.

Amherst appeared before Ticonderoga July 22. The French blew up their works, and retired to Crown Point. Driven from there, they retreated to Isle Aux Nois and entrenched themselves. The lateness of the season prevented further action, and Amherst went into winter quarters at Crown Point. Early in June, Wolfe appeared before Quebec with an army of 8,000 men. On the night of September 12, he silently ascended the river, climbed the heights of Abraham, a spot considered impregnable by the French, and on the summit formed his army of 5,000 men. Montcalm, the French commander, was compelled to give battle. The British columns, flushed with success, charged his half-formed lines, and dispersed them.

"They fly! they fly!" heard Wolfe, just as he expired from the effect of a mortal wound, though not till he had ordered their retreat cut off, and exclaimed, "Now, God be praised, I die happy." Montcalm, on hearing from the surgeon that death would come in a few hours, said, "I am glad of it. I shall not live to see the surrender of Quebec." At five the next morning he died happy.

Prideaux moved up Lake Ontario, and on the 6th of July invested Niagara. Its capture would cut off the French from the west, and every endeavor was made to hold it. Troops, destined to take the small garrison at Fort Pitt, were held to assist in raising the siege of Niagara. M. de Aubry, commandant in Illinois, came up with 400 men and 200,000 pounds of flour. Cut off by the abandonment of Fort Du Quesne from the Ohio route, he ascended that river as far as the Wabash, thence to portage of Fort Miami, or Fort Wayne,

down the Maumee to Lake Erie, and on to Presqu-ville, or Presque Isle, over the portage to Le Bœuf, and thence down French Creek to Fort Venango. He was chosen to lead the expedition for the relief of Niagara. They were pursued by Sir William Johnson, successor to Prideaux, who had lost his life by the bursting of a cannon, and were obliged to flee. The next day Niagara, cut off from succor, surrendered.

All America rang with exultation. Towns were bright with illuminations; the hillsides shone with bonfires. From press, from pulpit, from platform, and from speakers' desks, went up one glad song of rejoicing. England was victorious everywhere. The colonies had done their full share, and now learned their strength. That strength was needed now, for ere long a different conflict raged on the soil of America—a conflict ending in the birth of a new nation.

The English sent Gen. Stanwix to fortify Fort Pitt, still looked upon as one of the principal fortresses in the West. He erected a good fortification there, which remained under British control fifteen years. Now nothing of the fort is left. No memorial of the British possession remains in the West but a single redoubt, built in 1764 by Col. Bouquet, outside of the fort. Even this can hardly now be said to exist.

The fall of Quebec did not immediately produce the submission of Canada. M. de Levi, on whom the command devolved, retired with the French Army to Montreal. In the spring of 1760, he besieged Quebec, but the arrival of an English fleet caused him to again retreat to Montreal.

Amherst and Johnson, meanwhile, effected a union of their forces, the magnitude of whose armies convinced the French that resistance would be useless, and on the 8th of September, M. de Vaudreuil, the Governor of Canada, surrendered Montreal, Quebec, Detroit, Mackinaw and all other posts in Canada, to the English commander-in-chief, Amherst, on condition that the French inhabitants should, during the war, be "protected in the full and free exercise of their religion, and the full enjoyment of their civil rights, leaving their future destinies to be decided by the treaty of peace."

Though peace was concluded in the New World, on the continent the Powers experienced some difficulty in arriving at a satisfactory settlement. It was finally settled by what is known in history as the "family compact." France and Spain saw in the conquest the growing power of England,

and saw, also, that its continuance only extended that power. Negotiations were re-opened, and on the 3d of November, 1762, preliminaries were agreed to and signed, and afterward ratified in Paris, in February, 1763. By the terms of the compact, Spain ceded to Great Britain East and West Florida. To compensate Spain, France ceded to her by a secret article, all Louisiana west of the Mississippi.

The French and Indian war was now over. Canada and all its dependencies were now in possession of the English, who held undisputed sway over the entire West as far as Mississippi. It only remained for them to take possession of the outposts. Major Robert Rogers was sent to take possession of Detroit and establish a garrison there. He was a partisan officer on the borders of New Hampshire, where he earned a name for bravery, but afterward tarnished it by treasonable acts. On his way to Detroit, on the 7th of November, 1760, he was met by the renowned chief, Pontiac, who authoritatively commanded him to pause and explain his acts. Rogers replied by explaining the conquest of Canada, and that he was acting under orders from his King. Through the influence of Pontiac, the army was saved from the Indians sent out by the French, and was allowed to proceed on its way. Pontiac had assured his protection as long as the English treated him with due deference. Beletre, the commandant at Detroit, refused to surrender to the English commander, until he had received positive assurance from his Governor, Vaudreuil, that the country was indeed conquered. On the 29th of September, the colors of France gave way to the ensign of Great Britain amid the shouts of the soldiery and the astonishment of the Indians, whose savage natures could not understand how such a simple act declared one nation victors of another, and who wondered at the forbearance displayed. The lateness of the season prevented further operations, but early the next spring, Mackinaw, Green Bay, Ste. Marie, St. Joseph and the Ouitenon surrounded, and nothing was left but the Illinois towns. These were secured as soon as the necessary arrangements could be made.

Though the English were now masters of the West, and had, while many of these events narrated were transpiring, extended their settlements beyond the Alleghanies, they were by no means secure in their possession. The woods and prairies were full of Indians, who, finding the English like the French, caring more for gain than the welfare

of the natives, began to exhibit impatience and resentment as they saw their lands gradually taken from them. The English policy differed very materially from the French. The French made the Indian, in a measure, independent and taught him a desire for European goods. They also affiliated easily with them, and became thereby strongly endeared to the savage. The French were a merry, easy-going race, fond of gayety and delighting in adventure. The English were harsh, stern, and made no advances to gain the friendship of the savage. They wanted land to cultivate and drove away the Indian's game, and forced him farther west. "Where shall we go?" said the Indian, despondently; "you drive us farther and farther west; by and by you will want all the land." And the Anglo-Saxon went sturdily on, paying no heed to the complaints. The French

traders incited the Indian to resent the encroachment. "The English will annihilate you and take all your land," said they. "Their father, the King of France, had been asleep, now he had awakened and was coming with a great army to reclaim Canada, that had been stolen from him while he slept."

Discontent under such circumstances was but natural. Soon all the tribes, from the mountains to the Mississippi, were united in a plot. It was discovered in 1761, and arrested. The next summer, another was detected and arrested. The officers, and all the people, failed to realize the danger. The rattlesnake, though not found, was ready to strike. It is only an Indian discontent, thought the people, and they went on preparing to occupy the country. They were mistaken—the crisis only needed a leader to direct it. That leader appeared.

CHAPTER IV.

PONTIAC'S CONSPIRACY—ITS FAILURE—BOUQUET'S EXPEDITION—OCCUPATION BY THE ENGLISH.

PONTIAC, the great chief of the Ottawas, was now about fifty years old. He had watched the conflict between the nations with a jealous eye, and as he saw the gradual growth of the English people, their encroachment on the lands of the Indians, their greed, and their assumption of the soil, his soul was stirred within him to do something for his people. He had been a true friend of the French, and had led the Indians at the defeat of Braddock. Amid all the tumult, he alone saw the true state of affairs. The English would inevitably crush out the Indians. To save his race he saw another alliance with the French was necessary, and a restoration of their power and habits needed. It was the plan of a statesman. It only failed because of the perfidy of the French. Maturing his plans late in the autumn of 1762, he sent messengers to all the Western and Southern tribes, with the black wampum and red tomahawk, emblems of war, from the great Pontiac. "On a certain day in the next year," said the messenger, "all the tribes are to rise, seize all the English posts, and then attack the whole frontier."

The great council of all the tribes was held at the river Beorges, on the 27th of April, 1763. There, before the assembled chiefs, Pontiac deliv-

ered a speech, full of eloquence and art. He recounted the injuries and encroachments of the English, and disclosed their designs. The French king was now awake and would aid them. Should they resign their homes and the graves of their fathers without an effort? Were their young men no longer brave? Were they squaws? The Great Master of Life had chided them for their inactivity, and had sent his commands to drive the "Red Dogs" from the earth. The chiefs eagerly accepted the wampum and the tomahawk, and separated to prepare for the coming strife.

The post at Detroit was informed of the plot the evening before it was to occur, by an Ojibway girl of great beauty, the mistress of the commander, Major Gladwin. Pontiac was foiled here, his treachery discovered, and he was sternly ordered from the conference. A regular siege followed, but he could not prevail. He exhibited a degree of sagacity unknown in the annals of savage warfare, but all to no purpose; the English were too strong for him.

At all the other posts, save one, however, the plans of Pontiac were carried out, and atrocities, unheard of before in American history, resulted. The Indians attacked Detroit on the first of May,

and, foiled in their plans, a siege immediately followed. On the 16th, a party of Indians appeared before the fort at Sandusky. Seven of them were admitted. Suddenly, while smoking, the massacre begins. All but Ensign Paulli, the commander, fall. He is carried as a trophy to Pontiac.

At the mouth of the St. Joseph's, the missionaries had maintained a mission station over sixty years. They gave way to an English garrison of fourteen soldiers and a few traders. On the morning of May 25, a deputation of Pottawatomies are allowed to enter. In less than two minutes, all the garrison but the commander are slain. He is sent to Pontiac.

Near the present city of Fort Wayne, Ind., at the junction of the waters, stood Fort Miami, garrisoned by a few men. Holmes, the commander, is asked to visit a sick woman. He is slain on the way, the sergeant following is made prisoner, and the nine soldiers surrender.

On the night of the last day of May, the wampum reaches the Indian village below La Fayette, Ind., and near Fort Ouitenon. The commander of the fort is lured into a cabin, bound, and his garrison surrender. Through the clemency of French settlers, they are received into their houses and protected.

At Michilimackinac, a game of ball is projected. Suddenly the ball is thrown through the gate of the stockade. The Indians press in, and, at a signal, almost all are slain or made prisoners.

The fort at Presque Isle, now Erie, was the point of communication between Pittsburgh and Niagara and Detroit. It was one of the most tenable, and had a garrison of four and twenty men. On the 22d of June, the commander, to save his forces from total annihilation, surrenders, and all are carried prisoners to Detroit.

The capitulation at Erie left Le Bœuf without hope. He was attacked on the 18th, but kept off the Indians till midnight, when he made a successful retreat. As they passed Venango, on their way to Fort Pitt, they saw only the ruins of that garrison. Not one of its inmates had been spared.

Fort Pitt was the most important station west of the Alleghanies. "Escape!" said Turtle's Heart, a Delaware warrior; "you will all be slain. A great army is coming." "There are three large English armies coming to my aid," said Ecuyer, the commander. "I have enough provisions and ammunition to stand a siege of three years' time." A second and third attempt was

made by the savages to capture the post, but all to no avail. Baffled on all sides here, they destroy Ligonier, a few miles below, and massacre men, women and children. Fort Pitt was besieged till the last day of July, but withstood all attacks. Of all the outposts, only it and Detroit were left. All had been captured, and the majority of the garrison slain. Along the frontier, the war was waged with fury. The Indians were fighting for their homes and their hunting-grounds; and for these they fought with the fury and zeal of fanatics.

Detachments sent to aid Detroit are cut off. The prisoners are burnt, and Pontiac, infusing his zealous and demoniacal spirit into all his savage allies, pressed the siege with vigor. The French remained neutral, yet Pontiac made requisitions on them and on their neighbors in Illinois, issuing bills of credit on birch-bark, all of which were faithfully redeemed. Though these two posts could not be captured, the frontier could be annihilated, and vigorously the Indians pursued their policy. Along the borders of Pennsylvania and Virginia a relentless warfare was waged, sparing no one in its way. Old age, feeble infancy, strong man and gentle woman, fair girl and hopeful boy—all fell before the scalping-knife of the merciless savage. The frontiers were devastated. Thousands were obliged to flee, leaving their possessions to the torch of the Indian.

The colonial government, under British direction, was inimical to the borders, and the colonists saw they must depend only upon their own arms for protection. Already the struggle for freedom was upon them. They could defend only themselves. They must do it, too; for that defense is now needed in a different cause than settling disputes between rival powers. "We have millions for defense, but not a cent for tribute," said they, and time verified the remark.

Gen. Amherst bestirred himself to aid the frontiers. He sent Col. Henry Bouquet, a native of Switzerland, and now an officer in the English Army, to relieve the garrison at Fort Pitt. They followed the route made by Gen. Forbes, and on the way relieved Forts Bedford and Ligonier, both beleaguered by the Indians. About a day's journey beyond Ligonier, he was attacked by a body of Indians at a place called Bushy Run. For awhile, it seemed that he and all his army would be destroyed; but Bouquet was bold and brave and, under a feint of retreat, routed the savages. He passed on, and relieved the garrison at Fort

Pitt, and thus secured it against the assaults of the Indians.

The campaign had been disastrous to the English, but fatal to the plans of Pontiac. He could not capture Detroit, and he knew the great scheme must fail. The battle of Bushy Run and the relief of Fort Pitt closed the campaign, and all hope of co-operation was at an end. Circumstances were combined against the confederacy, and it was fast falling to pieces. A proclamation was issued to the Indians, explaining to them the existing state of affairs, and showing to them the futility of their plans. Pontiac, however, would not give up. Again he renewed the siege of Detroit, and Gen. Gage, now in command of the army in the colonies, resolved to carry the war into their own country. Col. Bradstreet was ordered to lead one army by way of the lakes, against the Northern Indians, while Col. Bouquet was sent against the Indians of the Ohio. Col. Bradstreet went on his way at the head of 1,200 men, but trusting too much to the natives and their promises, his expedition proved largely a failure. He relieved Detroit in August, 1764, which had been confined in the garrison over fifteen months, and dispersed the Indians that yet lay around the fort. But on his way back, he saw how the Indians had duped him, and that they were still plundering the settlements. His treaties were annulled by Gage, who ordered him to destroy their towns. The season was far advanced, his provisions were getting low, and he was obliged to return to Niagara chagrined and disappointed.

Col. Bouquet knew well the character of the Indians, and shaped his plans accordingly. He had an army of 1,500 men, 500 regulars and 1,000 volunteers. They had had experience in fighting the savages, and could be depended on. At Fort Loudon, he heard of Bradstreet's ill luck, and saw through the deception practiced by the Indians. He arrived at Fort Pitt the 17th of September, where he arrested a deputation of chiefs, who met him with the same promises that had deceived Bradstreet. He sent one of their number back, threatening to put to death the chiefs unless they allowed his messengers to safely pass through their country to Detroit. The decisive tone of his words convinced them of the fate that awaited them unless they complied. On the 3d of October the army left Fort Pitt, marched down the river to and across the Tuscarawas, arriving in the vicinity of Fredrick Post's late mission on the 17th. There a conference was held with the assembled

tribes. Bouquet sternly rebuked them for their faithlessness, and when told by the chiefs they could not restrain their young men, he as sternly told them they were responsible for their acts. He told them he would trust them no longer. If they delivered up all their prisoners within twelve days they might hope for peace, otherwise there would be no mercy shown them. They were completely humbled, and, separating hastily, gathered their captives. On the 25th, the army proceeded down to the Tuscarawas, to the junction with White Woman River, near the town of Coshocton, in Coshocton County, Ohio, and there made preparations for the reception of the captives. There they remained until the 18th of November; from day to day prisoners were brought in—men, women and children—and delivered to their friends. Many were the touching scenes enacted during this time. The separated husband and wife met, the latter often carrying a child born in captivity. Brothers and sisters, separated in youth, met; lovers rushed into each other's arms; children found their parents, mothers their sons, fathers their daughters, and neighbors those from whom they had been separated many years. Yet, there were many distressing scenes. Some looked in vain for long-lost relatives and friends, that never should return. Others, that had been captured in their infancy, would not leave their savage friends, and when force was used some fled away. One mother looked in vain for a child she had lost years before. Day by day, she anxiously watched, but no daughter's voice reached her ears. One, clad in savage attire, was brought before her. It could not be her daughter, she was grown. So was the maiden before her. "Can not you remember some mark?" asked Bouquet, whose sympathies were aroused in this case. "There is none," said the anxious and sorrowful mother. "Sing a song you sang over her cradle, she may remember," suggested the commander. One is sung by her mother. As the song of childhood floats out among the trees the maiden stops and listens, then approaches. Yes, she remembers. Mother and daughter are held in a close embrace, and the stern Bouquet wipes away a tear at the scene.

On the 18th, the army broke up its encampment and started on its homeward march. Bouquet kept six principal Indians as hostages, and returned to the homes of the captives. The Indians kept their promises faithfully, and the next year representatives of all the Western tribes met Sir William Johnson, at the German Flats, and made

a treaty of peace. A tract of land in the Indian country was ceded to the whites for the benefit of those who had suffered in the late war. The Indians desired to make a treaty with Johnson, whereby the Alleghany River should be the western boundary of the English, but he excused himself on the ground of proper power.

Not long after this the Illinois settlements, too remote to know much of the struggle or of any of the great events that had convulsed an empire, and changed the destiny of a nation, were brought under the English rule. There were five villages at this date: Kaskaskia, Cahokia, St. Philip, Vincennes and Prairie du Rocher, near Fort Chartres, the military headquarters of these French possessions. They were under the control or command of M. de Abadie, at New Orleans. They had also extended explorations west of the Mississippi, and made a few settlements in what was Spanish territory. The country had been, however, ceded to France, and in February, 1764, the country was formally taken possession of and the present city of St. Louis laid out.

As soon as the French knew of the change of government, many of them went to the west side of the river, and took up their residence there. They were protected in their religion and civil rights by the terms of the treaty, but preferred the rule of their own King.

The British took possession of this country early in 1765. Gen. Gage sent Capt. Stirling, of the English Army, who arrived before summer, and to whom St. Ange, the nominal commandant, surrendered the authority. The British, through a succession of commanders, retained control of the country until defeated by George Rogers Clarke, and his "ragged Virginia militia."

After a short time, the French again ceded the country west of the Mississippi to Spain, and relinquished forever their control of all the West in the New World.

The population of Western Louisiana, when the exchange of governments occurred, was estimated to be 13,538, of which 891 were in the Illinois country—as it was called—west of the Mississippi. East of the river, and before the French crossed into Spanish country, the population was estimated to be about 3,000. All these had grown into communities of a peculiar character. Indeed, that peculiarity, as has been observed, never changed until a gradual amalgamation with the American people effected it, and that took more than a century of time to accomplish.

The English now owned the Northwest. True, they did not yet occupy but a small part of it, but traders were again crossing the mountains, explorers for lands were on the Ohio, and families for settlement were beginning to look upon the West as their future home. Companies were again forming to purchase large tracts in the Ohio country, and open them for emigration. One thing yet stood in the way—a definite boundary line. That line, however, was between the English and the Indians, and not, as had heretofore been the case, between rival European Powers. It was necessary to arrange some definite boundary before land companies, who were now actively pushing their claims, could safely survey and locate their lands.

Sir William Johnson, who had at previous times been instrumental in securing treaties, wrote repeatedly to the Board of Trade, who controlled the greater part of the commercial transactions in the colonies—and who were the first to exclaim against extending English settlements beyond a limit whereby they would need manufactures, and thereby become independent of the Mother Country—urging upon them, and through them the Crown, the necessity of a fixed boundary, else another Indian war was probable. The Indians found themselves gradually hemmed in by the growing power of the whites, and began to exhibit hostile feelings. The irritation became so great that in the summer of 1767, Gage wrote to the Governor of Pennsylvania concerning it. The Governor communicated his letter to the General Assembly, who sent representatives to England, to urge the immediate settlement of the question. In compliance with these requests, and the letters of prominent citizens, Franklin among the number, instructions were sent to Johnson, ordering him to complete the purchase from the Six Nations, and settle all differences. He sent word to all the Western tribes to meet him at Fort Stanwix, in October, 1768. The conference was held on the 24th of that month, and was attended by colonial representatives, and by Indians from all parts of the Northwest. It was determined that the line should begin on the Ohio, at the mouth of the Cherokee (Tennessee), thence up the river to the Alleghany and on to Kittanning, and thence across to the Susquehanna. By this line, the whole country south of the Ohio and Alleghany, to which the Six Nations had any claim, was transferred. Part of this land was made to compensate twenty-two traders, whose goods had been stolen in 1763. The deeds made, were upon the express agreement that no claims should

ever be based on the treaties of Lancaster, Logstown, etc., and were signed by the chiefs of the Six Nations for themselves, their allies and dependents, and the Shawanees, Delawares, Mingoos of Ohio, and others; though the Shawanees and Delaware deputies did not sign them. On this treaty, in a great measure, rests the title by purchase to Kentucky, Western Virginia and Western Pennsylvania. The rights of the Cherokees were purchased by Col. Donaldson, either for the King, Virginia, or for himself, it is impossible to say which.

The grant of the northern confederacy was now made. The white man could go in and possess these lands, and know that an army would protect him if necessary. Under such a guarantee, Western lands came rapidly into market. In addition to companies already in existence for the purchase of land, others, the most notable of these being the "Walpole" and the "Mississippi" Land Companies, were formed. This latter had among its organizers such men as Francis Lightfoot Lee, Richard Henry Lee, George Washington and Arthur Lee. Before any of these companies, some of whom absorbed the Ohio Company, could do anything, the Revolution came on, and all land transactions were at an end. After its close, Congress would not sanction their claims, and they fell through. This did not deter settlers, however, from crossing the mountains, and settling in the Ohio country. In

spite of troubles with the Indians—some of whom regarded the treaties with the Six Nations as unlawful, and were disposed to complain at the rapid influx of whites—and the failure of the land companies, settlers came steadily during the decade from 1768 to 1778, so that by the close of that time, there was a large population south of the Ohio River; while scattered along the northern banks, extending many miles into the wilderness, were hardy adventurers, who were carving out homes in the magnificent forests everywhere covering the country.

Among the foremost speculators in Western lands, was George Washington. As early as 1763, he employed Col. Crawford, afterward the leader in "Crawford's campaign," to purchase lands for him. In 1770, he crossed the mountains in company with several gentlemen, and examined the country along the Ohio, down which stream he passed to the mouth of the Great Kanawha, where he shot some buffalo, then plenty, camped out a few nights, and returned, fully convinced, it seems, that one day the West would be the best part of the New-World. He owned, altogether, nearly fifty thousand acres in the West, which he valued at \$3.33 per acre. Had not the war of the Revolution just then broken out, he might have been a resident of the West, and would have been, of course, one of its most prominent citizens.

CHAPTER V.

AMERICAN EXPLORATIONS—DUNMORE'S WAR—CAMPAIGN OF GEORGE ROGERS CLARKE—
LAND TROUBLES—SPAIN IN THE REVOLUTION—MURDER OF
THE MORAVIAN INDIANS.

MEANWHILE, Kentucky was filling with citizens, and though considerable trouble was experienced with the Indians, and the operations of Col. Richard Henderson and others, who made unlawful treaties with the Indians, yet Daniel Boone and his associates had established a commonwealth, and, in 1777, a county was formed, which, ere long, was divided into three. Louisville was laid out on land belonging to Tories, and an important start made in this part of the West. Emigrants came down the Ohio River, saw the northern shores were inviting, and sent back such accounts that the land north of the river rapidly grew in favor with Eastern people.

One of the most important Western characters, Col. (afterward Gen.) George Rogers Clarke, had had much to do in forming its character. He was born November 19, 1752, in Albemarle County, Va., and early came West. He had an unusually sagacious spirit, was an excellent surveyor and general, and took an active interest in all State and national affairs. He understood the animus of the Revolution, and was prepared to do his part. Col. Clarke was now meditating a move unequalled in its boldness, and one that had more to do with the success of America in the struggle for independence than at first appears. He saw through the whole plan of the British,

who held all the outposts, Kaskaskia, Detroit, Vincennes and Niagara, and determined to circumvent them and wrest the West from their power. The British hoped to encircle the Americans by these outposts, and also unite the Indians in a common war against them. That had been attempted by the French when the English conquered them. Then the French had a powerful ally in the person of Pontiac, yet the brave frontiersmen held their homes in many places, though the Indians "drank the blood of many a Briton, scooping it up in the hollow of joined hands." Now the Briton had no Pontiac to lead the scattered tribes—tribes who now feared the unerring aim of a settler, and would not attack him openly—Clarke knew that the Delawares were divided in feeling and that the Shawanees were but imperfectly united in favor of England since the murder of their noted chiefs. He was convinced that, if the British could be driven from the Western posts, the natives could easily be awed into submission, or bribed into neutrality or friendship. They admired, from their savage views of valor, the side that became victorious. They cared little for the cause for which either side was fighting. Clarke sent out spies among them to ascertain the feasibility of his plans. The spies were gone from April 20 to June 22, and fully corroborated his views concerning the English policy and the feelings of the Indians and French.

Before proceeding in the narrative of this expedition, however, it will be well to notice a few acts transpiring north of the Ohio River, especially relating to the land treaties, as they were not without effect on the British policy. Many of the Indians north and south of the Ohio would not recognize the validity of the Fort Stanwix treaty, claiming the Iroquois had no right to the lands, despite their conquest. These discontented natives harassed the emigrants in such a manner that many Indians were slain in retaliation. This, and the working of the French traders, who at all times were bitterly opposed to the English rule, filled the breasts of the natives with a malignant hate, which years of bloodshed could not wash out. The murder of several Indians by lawless whites fanned the coal into a blaze, and, by 1774, several retaliatory murders occurred, committed by the natives in revenge for their fallen friends. The Indian slew any white man he found, as a revenge on some friend of his slain; the frontiersman, acting on the same principle, made the borders extremely dangerous to invaders and invaded. Another cause

of fear occurred about this time, which threatened seriously to retard emigration.

Pittsburgh had been claimed by both Pennsylvania and Virginia, and, in endeavoring to settle the dispute, Lord Dunmore's war followed. Dr. John Connelly, an ambitious, intriguing person, induced Lord Dunmore to assert the claims of Virginia, in the name of the King. In attempting to carry out his intentions, he was arrested by Arthur St. Clair, representing the proprietors of Pennsylvania, who was at Pittsburgh at the time. Connelly was released on bail, but went at once to Staunton, where he was sworn in as a Justice of Peace. Returning, he gathered a force of one hundred and fifty men, suddenly took possession of Pittsburgh, refused to allow the magistrates to enter the Court House, or to exercise the functions of their offices, unless in conformity to his will. Connelly refused any terms offered by the Pennsylvania deputies, kept possession of the place, acted very harshly toward the inhabitants, stirred up the neutral Indians, and, for a time, threatened to make the boundary line between the two colonies a very serious question. His actions led to hostile deeds by some Indians, when the whites, no doubt urged by him, murdered seven Indians at the mouth of the Captina River, and at the house of a settler named Baker, where the Indians were decoyed under promises of friendship and offers of rum. Among those murdered at the latter place, was the entire family of the famous Mingoe chief, Logan. This has been charged to Michael Cresap; but is untrue. Daniel Greathouse had command of the party, and though Cresap may have been among them, it is unjust to lay the blame at his feet. Both murders, at Captina and Yellow Creek, were cruel and unwarranted, and were, without doubt, the cause of the war that followed, though the root of the matter lay in Connelly's arbitrary actions, and in his needlessly alarming the Indians. Whatever may have been the facts in relation to the murder of Logan's family, they were of such a nature as to make all feel sure of an Indian war, and preparations were made for the conflict.

An army was gathered at Wheeling, which, some time in July, under command of Col. McDonald, descended the Ohio to the mouth of Captina Creek. They proposed to march against an Indian town on the Muskingum. The Indians sued for peace, but their pretensions being found spurious, their towns and crops were destroyed. The army then retreated to Williamsburg, having accomplished but little.

The Delawares were anxious for peace; even the Mingoës, whose relatives had been slain at Yellow Creek, and Captina, were restrained; but Logan, who had been turned to an inveterate foe to the Americans, came suddenly upon the Monongahela settlements, took thirteen scalps in revenge for the loss of his family, returned home and expressed himself ready to treat with the Long Knives, the Virginians. Had Connelly acted properly at this juncture, the war might have been ended; but his actions only incensed both borderers and Indians. So obnoxious did he become that Lord Dunmore lost faith in him, and severely reprimanded him.

To put a stop to the depredations of the Indians, two large bodies of troops were gathered in Virginia, one under Gen. Andrew Lewis, and one under command of Dunmore himself. Before the armies could meet at the mouth of the Great Kanawha, their objective point, Lewis' army, which arrived first, was attacked by a furious band of Delawares, Shawanees, Iroquois and Wyandots. The conflict was bitterly prolonged by the Indians, who, under the leadership of Cornstalk, were determined to make a decisive effort, and fought till late at night (October 10, 1774), and then only by a strategic move of Lewis' command—which resulted in the defeat of the Indians, compelling them to cross the Ohio—was the conflict ended. Meanwhile, Dunmore's army came into the enemy's country, and, being joined by the remainder of Lewis' command, pressed forward intending to annihilate the Indian towns. Cornstalk and his chiefs, however, sued for peace, and the conflict closed. Dunmore established a camp on Sippo Creek, where he held conferences with the natives and concluded the war. When he left the country, he stationed 100 men at the mouth of the Great Kanawha, a few more at Pittsburgh, and another corps at Wheeling, then called Fort Fincastle. Dunmore intended to return to Pittsburgh the next spring, meet the Indians and form a definite peace; but the revolt of the colonies prevented. However, he opened several offices for the sale of lands in the West, some of which were in the limits of the Pennsylvania colony. This led to the old boundary dispute again; but before it could be settled, the Revolution began, and Lord Dunmore's, as well as almost all other land speculations in the West, were at an end.

In 1775 and 1776, the chief events transpiring in the West relate to the treaties with the Indians, and the endeavor on the part of the Americans to

have them remain neutral in the family quarrel now coming on, which they could not understand. The British, like the French, however, could not let them alone, and finally, as a retaliatory measure, Congress, under advice of Washington, won some of them over to the side of the colonies, getting their aid and holding them neutral. The colonies only offered them rewards for *prisoners*; never, like the British, offering rewards for *scalps*. Under such rewards, the atrocities of the Indians in some quarters were simply horrible. The scalp was enough to get a reward, that was a mark of Indian valor, too, and hence, helpless innocence and decrepit old age were not spared. They stirred the minds of the pioneers, who saw the protection of their fire-sides a vital point, and led the way to the scheme of Col. Clarke, who was now, as has been noted, the leading spirit in Kentucky. He saw through the scheme of the British, and determined, by a quick, decisive blow, to put an end to it, and to cripple their power in the West.

Among the acts stimulating Clarke, was the attack on Fort Henry, a garrison about one-half mile above Wheeling Creek, on the Ohio, by a renegade white man, Simon Girty, an agent in the employ of the British, it is thought, and one of the worst wretches ever known on the frontier. When Girty attacked Fort Henry, he led his red allies in regular military fashion, and attacked it without mercy. The defenders were brave, and knew with whom they were contending. Great bravery was displayed by the women in the fort, one of whom, a Miss Zane, carried a keg of gunpowder from a cabin to the fort. Though repeatedly fired at by the savages, she reached the fort in safety. After awhile, however, the effect of the frontiersmen's shots began to be felt, and the Indians sullenly withdrew. Re-enforcements coming, the fort was held, and Girty and his band were obliged to flee.

Clarke saw that if the British once got control over the Western Indians the scene at Fort Henry would be repeated, and would not likely, in all cases, end in favor of the Americans. Without communicating any of his designs, he left Harrodsburg about the 1st of October, 1777, and reached the capital of Virginia by November 5. Still keeping his mind, he awaited a favorable opportunity to broach his plans to those in power, and, in the meanwhile, carefully watched the existing state of feeling. When the opportunity came, Clarke broached his plans to Patrick Henry, Governor of Virginia, who at once entered warmly into them, recognizing their great importance.

Through his aid, Clarke procured the necessary authority to prosecute his plans, and returned at once to Pittsburgh. He intended raising men about this post, but found them fearful of leaving their homes unprotected. However, he secured three companies, and, with these and a number of volunteers, picked up on the way down the Ohio River, he fortified Corn Island, near the falls, and made ready for his expedition. He had some trouble in recruiting his men, some of those from Kentucky refusing to aid in subduing stations out of their own country. He did not announce his real intentions till he had reached this point. Here Col. Bowman joined him with his Kentucky militia, and, on the 24th of June, 1778, during a total eclipse of the sun, the party left the fort. Before his start, he learned of the capture of Burgoyne, and, when nearly down to Fort Massac, he met some of his spies, who informed him of the exaggerated accounts of the ferocity of the Long Knives that the French had received from the British. By proper action on his part, Clarke saw both these items of information could be made very beneficial to him. Leaving the river near Fort Massac, he set out on the march to Kaskaskia, through a hot summer's sun, over a country full of savage foes. They reached the town unnoticed, on the evening of July 4, and, before the astonished British and French knew it, they were all prisoners. M. Rocheblave, the English commander, was secured, but his wife adroitly concealed the papers belonging to the garrison. In the person of M. Gibault, the French priest, Clarke found a true friend. When the true character of the Virginians became apparent, the French were easily drawn to the American side, and the priest secured the surrender and allegiance of Cahokia through his personal influence. M. Gibault told him he would also secure the post at St. Vincent's, which he did, returning from the mission about the 1st of August. During the interval, Clarke re-enlisted his men, formed his plans, sent his prisoners to Kentucky, and was ready for future action when M. Gibault arrived. He sent Capt. Helm and a single soldier to Vincennes to hold that fort until he could put a garrison there. It is but proper to state that the English commander, Col. Hamilton, and his band of soldiers, were absent at Detroit when the priest secured the village on the "Ouabache." When Hamilton returned, in the autumn, he was greatly surprised to see the American flag floating from the ramparts of the fort, and when approaching the gate he was abruptly

halted by Capt. Helm, who stood with a lighted fuse in his hand by a cannon, answering Hamilton's demand to surrender with the imperative inquiry, "Upon what terms, sir?" "Upon the honors of war," answered Hamilton, and he marched in greatly chagrined to see he had been halted by two men. The British commander sat quietly down, intending to go on down the river and subdue Kentucky in the spring, in the mean time offering rewards for American scalps, and thereby gaining the epithet "Hair-buyer General." Clarke heard of his actions late in January, 1779, and, as he says, "I knew if I did not take him he would take me," set out early in February with his troops and marched across the marshy plains of Lower Illinois, reaching the Wabash post by the 22d of that month. The unerring aim of the Westerner was effectual. "They will shoot your eyes out," said Helm to the British troops. "There, I told you so," he further exclaimed, as a soldier ventured near a port-hole and received a shot directly in his eye. On the 24th the fort surrendered. The American flag waved again over its ramparts. The "Hair-buyer General" was sent a prisoner to Virginia, where he was kept in close confinement for his cruel acts. Clarke returned to Kaskaskia, perfected his plans to hold the Illinois settlements, went on to Kentucky, from where he sent word to the colonial authorities of the success of his expedition. Had he received the aid promised him, Detroit, in easy reach, would have fallen too, but Gen. Green, failing to send it as promised, the capture of that important post was delayed.

Had Clarke failed, and Hamilton succeeded, the whole West would have been swept, from the Alleghanies to the Mississippi. But for this small army of fearless Virginians, the union of all the tribes from Georgia to Maine against the colonies might have been effected, and the whole current of American history changed. America owes Clarke and his band more than it can ever pay. Clarke reported the capture of Kaskaskia and the Illinois country early after its surrender, and in October the county of Illinois was established, extending over an unlimited expanse of country, by the Virginia Legislature. John Todd was appointed Lieutenant Colonel and Civil Governor. In November, Clarke and his men received the thanks of the same body, who, in after years, secured them a grant of land, which they selected on the right bank of the Ohio River, opposite Louisville. They expected here a city would rise one day, to be the peer of Louisville, then coming

into prominence as an important place. By some means, their expectations failed, and only the dilapidated village of Clarkesburg perpetuates their hopes.

The conquest of Clarke changed the face of affairs in relation to the whole country north of the Ohio River, which would, in all probability, have been made the boundary between Canada and the United States. When this was proposed, the strenuous arguments based on this conquest, by the American Commissioners, secured the present boundary line in negotiating the treaty of 1793.

Though Clarke had failed to capture Detroit, Congress saw the importance of the post, and resolved on securing it. Gen. McCosh, commander at Fort Pitt, was put in command, and \$1,000,000 and 3,000 men placed at his disposal. By some dilatory means, he got no further than the Tuscarawas River, in Ohio, where a half-way house, called Fort Laurens, for the President of Congress, was built. It was too far out to be of practicable value, and was soon after abandoned.

Indian troubles and incursions by the British were the most absorbing themes in the West. The British went so far as Kentucky at a later date, while they intended reducing Fort Pitt, only abandoning it when learning of its strength. Expeditions against the Western Indians were led by Gen. Sullivan, Col. Daniel Broadhead, Col. Bowman and others, which, for awhile, silenced the natives and taught them the power of the Americans. They could not organize so readily as before, and began to attach themselves more closely to the British, or commit their depredations in bands, fleeing into the wilderness as soon as they struck a blow. In this way, several localities suffered, until the settlers became again exasperated; other expeditions were formed, and a second chastisement given. In 1781, Col. Broadhead led an expedition against the Central Ohio Indians. It did not prove so successful, as the Indians were led by the noted chief Brant, who, though not cruel, was a foe to the Americans, and assisted the British greatly in their endeavors to secure the West.

Another class of events occurred now in the West, civil in their relations, yet destined to form an important part of its history—its land laws.

It must be borne in mind, that Virginia claimed the greater portion of the country north of the Ohio River, as well as a large part south. The other colonies claimed land also in the West under the old Crown grants, which extended to the South or Western Sea. To more complicate mat-

ters, several land companies held proprietary rights to portions of these lands gained by grants from the Crown, or from the Colonial Assemblies. Others were based on land warrants issued in 1763; others on selection and survey and still others on settlement. In this state of mixed affairs, it was difficult to say who held a secure claim. It was a question whether the old French grants were good or not, especially since the change in government, and the eminent prospect of still another change. To, in some way, aid in settling these claims, Virginia sent a commission to the West to sit as a court and determine the proprietorship of these claims. This court, though of as doubtful authority as the claims themselves, went to work in Kentucky and along the Ohio River in 1779, and, in the course of one year, granted over three thousand certificates. These were considered as good authority for a definite title, and were so regarded in after purchases. Under them, many pioneers, like Daniel Boone, lost their lands, as all were required to hold some kind of a patent, while others, who possessed no more principle than "land-sharks" of to-day, acquired large tracts of land by holding a patent the court was bound to accept. Of all the colonies, Virginia seemed to have the best title to the Northwest, save a few parcels, such as the Connecticut or Western Reserve and some similar tracts held by New York, Massachusetts and New Jersey. When the territory of the Northwest was ceded to the General Government, this was recognized, and that country was counted as a Virginia county.

The Spanish Government, holding the region west of the Mississippi, and a portion east toward its outlet, became an important but secret ally of the Americans. When the French revolt was suppressed by O'Reilly, and the Spanish assumed the government of Louisiana, both Upper and Lower, there was a large tract of country, known as Florida (East and West), claimed by England, and duly regarded as a part of her dominion. The boundaries had been settled when the French first occupied Lower Louisiana. The Spaniards adopted the patriarchal form of rule, as much as was consistent with their interests, and allowed the French full religious and civil liberty, save that all tribunals were after the Spanish fashion, and governed by Spanish rules. The Spaniards, long jealous of England's growing power, secretly sent the Governors of Louisiana word to aid the Americans in their struggle for freedom. Though

they controlled the Mississippi River, they allowed an American officer (Capt. Willing) to descend the river in January, 1778, with a party of fifty men, and ravage the British shore from Manchez Bayou to Natchez.

On the 8th of May, 1779, Spain declared war against Great Britain; and, on the 8th of July, the people of Louisiana were allowed to take a part in the war. Accordingly, Galvez collected a force of 1,400 men, and, on the 7th of September, took Fort Manchac. By the 21st of September, he had taken Baton Rouge and Natchez. Eight vessels were captured by the Spaniards on the Mississippi and on the lakes. In 1780 Mobile fell; in March, 1781, Pensacola, the chief British post in West Florida, succumbed after a long siege, and, on the 9th of May, all West Florida was surrendered to Spain.

This war, or the war on the Atlantic Coast, did not immediately affect Upper Louisiana. Great Britain, however, attempted to capture St. Louis. Though the commander was strongly suspected of being bribed by the English, yet the place stood the siege from the combined force of Indians and Canadians, and the assailants were dispersed. This was done during the summer of 1680, and in the autumn, a company of Spanish and French residents, under La Balme, went on an expedition against Detroit. They marched as far north as the British trading-post Ke-ki-ong-a, at the head of the Maumee River, but being surprised in the night, and the commander slain, the expedition was defeated, having done but little.

Spain may have had personal interests in aiding the Americans. She was now in control of the Mississippi River, the natural outlet of the Northwest, and, in 1780, began the troubles relative to the navigation of that stream. The claims of Spain were considered very unjust by the Continental Congress, and, while deliberating over the question, Virginia, who was jealously alive to her Western interests, and who yet held jurisdiction over Kentucky, sent through Jefferson, the Governor, Gen. George Rogers Clarke, to erect a fort below the mouth of the Ohio. This proceeding was rather unwarrantable, especially as the fort was built in the country of the Chickasaws, who had thus far been true friends to the Americans, and who looked upon the fort as an innovation on their territory. It was completed and occupied but a short time, Clarke being recalled.

Virginia, in 1780, did a very important thing; namely, establishing an institution for higher edu-

cation. The Old Dominion confiscated the lands of "Robert McKenzie, Henry Collins and Alexander McKee, Britons, eight thousand acres," and invested the proceeds of the sale in a public seminary. Transylvania University now lives, a monument to that spirit.

While Clarke was building Fort Jefferson, a force of British and Indians, under command of Capt. Bryd, came down from Canada and attacked the Kentucky settlements, getting into the country before any one was aware. The winter before had been one of unusual severity, and game was exceedingly scarce, hence the army was not prepared to conduct a campaign. After the capture of Ruddle's Station, at the south fork of the Licking, Bryd abandoned any further attempts to reduce the settlements, except capturing Martin's Station, and returned to Detroit.

This expedition gave an additional motive for the chastisement of the Indians, and Clarke, on his return from Fort Jefferson, went on an expedition against the Miami Indians. He destroyed their towns at Loramie's store, near the present city of Sydney, Ohio, and at Piqua, humbling the natives. While on the way, a part of the army remained on the north bank of the Ohio, and erected two block-houses on the present site of Cincinnati.

The exploits of Clarke and his men so effectually chastised the Indians, that, for a time, the West was safe. During this period of quiet, the measures which led to the cession of Western lands to the General Government, began to assume a definite form. All the colonies claiming Western lands were willing to cede them to the Government, save Virginia, which colony wanted a large scope of Southern country southeast of the Ohio, as far as South Carolina. All recognized the justice of all Western lands becoming public property, and thereby aiding in extinguishing the debts caused by the war of the Revolution, now about to close. As Virginia held a somewhat different view, the cession was not made until 1783.

The subject, however, could not be allowed to rest. The war of the Revolution was now drawing to a close; victory on the part of the colonies was apparent, and the Western lands must be a part of the public domain. Subsequent events brought about the desired cession, though several events transpired before the plan of cession was consummated.

Before the close of 1780, the Legislature of Virginia passed an act, establishing the "town of Louisville," and confiscated the lands of John

Connelly, who was one of its original proprietors, and who distinguished himself in the commencement of Lord Dunmore's war, and who was now a Tory, and doing all he could against the patriot cause. The proceeds of the sale of his lands were divided between Virginia and the county of Jefferson. Kentucky, the next year, was divided into three counties, Jefferson, Lincoln and Fayette. Courts were appointed in each, and the entry and location of lands given into their hands. Settlers, in spite of Indian troubles and British intrigue, were pouring over the mountains, particularly so during the years 1780 and 1781. The expeditions of Clarke against the Miami Indians; Boone's captivity, and escape from them; their defeat when attacking Boonesboro, and other places—all combined to weaken their power, and teach them to respect a nation whose progress they could not stay.

The pioneers of the West, obliged to depend on themselves, owing to the struggle of the colonies for freedom, grew up a hardy, self-reliant race, with all the vices and virtues of a border life, and with habits, manners and customs necessary to their peculiar situation, and suited to their peculiar taste. A resume of their experiences and daily lives would be quite interesting, did the limits of this history admit it here. In the part relating directly to this county, the reader will find such lives given; here, only the important events can be noticed.

The last event of consequence occurring in the West before the close of the Revolution, is one that might well have been omitted. Had such been the case, a great stain would have been spared the character of Western pioneers. Reference is made to the massacre of the Moravian Christian Indians.

These Indians were of the Delaware nation chiefly, though other Western tribes were visited and many converts made. The first converts were made in New York and Connecticut, where, after a good start had been made, and a prospect of many souls being saved, they incurred the enmity of the whites, who, becoming alarmed at their success, persecuted them to such an extent that they were driven out of New York into Pennsylvania, where, in 1744, four years after their arrival in the New World, they began new missions. In 1748, the New York and Connecticut Indians followed their teachers, and were among the founders of Friedenshutzen, "Tents of Peace," a hamlet near Bethlehem, where their teachers were sta-

tioned. Other hamlets grew around them, until in the interior of the colony, existed an Indian community, free from all savage vices, and growing up in Christian virtues. As their strength grew, lawless whites again began to oppress them. They could not understand the war of 1754, and were, indeed, in a truly embarrassing position. The savages could form no conception of any cause for neutrality, save a secret sympathy with the English; and if they could not take up the hatchet, they were in the way, and must be removed. Failing to do this, their red brothers became hostile. The whites were but little better. The old suspicions which drove them from New York were aroused. They were secret Papists, in league with the French, and furnished them with arms and intelligence; they were interfering with the liquor traffic; they were enemies to the Government, and the Indian and the white man combined against them. They were obliged to move from place to place; were at one time protected nearly a year, near Philadelphia, from lawless whites, and finally were compelled to go far enough West to be out of the way of French and English arms, or the Iroquois and Cherokee hatchets. They came finally to the Muskingum, where they made a settlement called Schonbrun, "beautiful clear spring," in what is now Tuscarawas County. Other settlements gathered, from time to time, as the years went on, till in 1772 large numbers of them were within the borders of the State.

Until the war of independence broke out, they were allowed to peacefully pursue their way. When that came, they were between Fort Pitt and Detroit, one of which contained British, the other Americans. Again they could not understand the struggle, and could not take up the hatchet. This brought on them the enmity of both belligerent parties, and that of their own forest companions, who could not see wherein their natures could change. Among the most hostile persons, were the white renegades McKee, Girty and Elliott. On their instigation, several of them were slain, and by their advice they were obliged to leave their fields and homes, where they had many comforts, and where they had erected good chapels in which to worship. It was just before one of these forced removals that Mary, daughter of the missionary Heckewelder, was born. She is supposed to be the first white female child born north of the Ohio River. Her birth occurred April 16, 1781. It is but proper to say here, that it is an open question, and one that will probably never be decided,

i. e. Who was the first white child born in Ohio? In all probability, the child was born during the captivity of its mother, as history plainly shows that when white women were released from the Indians, some of them carried children born while among the natives.

When the Moravians were forced to leave their settlements on the Muskingum, and taken to Sandusky, they left growing fields of corn, to which they were obliged to return, to gather food. This aroused the whites, only wanting some pretext whereby they might attack them, and a party, headed by Col. David Williamson, determined to exterminate them. The Moravians, hearing of their approach, fled, but too late to warn other settlements, and Gnadenhutten, Salem and one or two smaller settlements, were surprised and taken. Under deceitful promises, the Indians gave up all their arms, showed the whites their treasures, and went unknowingly to a terrible death. When apprised of their fate, determined on by a majority of the rangers, they begged only time to prepare. They were led two by two, the men into one, the women and children into another "slaughter-house," as it was termed, and all but two lads were wantonly slain. An infamous and more bloody deed never darkened the pages of feudal times; a deed that, in after years, called aloud for vengeance, and in some measure received it. Some of Williamson's men wrung their hands at the cruel fate, and endeavored, by all the means in their power, to prevent it; but all to no purpose. The blood of the rangers was up, and they would not spare "man, woman or child, of all that peaceful band."

Having completed their horrible work, (March 8, 1782), Williamson and his men returned to Pittsburgh. Everywhere, the Indians lamented the untimely death of their kindred, their savage relatives determining on their revenge; the Christian ones could only be resigned and weep.

Williamson's success, for such it was viewed by many, excited the borderers to another invasion, and a second army was raised, this time to go to the Sandusky town, and annihilate the Wyandots. Col. William Crawford was elected leader; he accepted reluctantly; on the way, the army was met by hordes of savages on the 5th of

June, and totally routed. They were away north, in what is now Wyandot County, and were obliged to flee for their lives. The blood of the murdered Moravians called for revenge. The Indians desired it; were they not relatives of the fallen Christians? Crawford and many of his men fell into their hands; all suffered unheard-of tortures, that of Crawford being as cruel as Indian cruelty could devise. He was pounded, pierced, cut with knives and burned, all of which occupied nearly three hours, and finally lay down insensible on a bed of coals, and died. The savage captors, in demoniacal glee, danced around him, and upbraided him for the cruel murder of their relatives, giving him this only consolation, that had they captured Williamson, he might go free, but he must answer for Williamson's brutality.

The war did not cease here. The Indians, now aroused, carried their attack as far south as into Kentucky, killing Capt. Estill, a brave man, and some of his companions. The British, too, were active in aiding them, and the 14th of August a large force of them, under Girty, gathered silently about Bryant's Station. They were obliged to retreat. The Kentuckians pursued them, but were repulsed with considerable loss.

The attack on Bryant's Station aroused the people of Kentucky to strike a blow that would be felt. Gen. Clarke was put at the head of an army of one thousand and fifty men, and the Miami country was a second time destroyed. Clarke even went as far north as the British trading-post at the head of the Miami, where he captured a great amount of property, and destroyed the post. Other outposts also fell, the invading army suffering but little, and, by its decisive action, practically closing the Indian wars in the West. Pennsylvania suffered some, losing Hannahstown and one or two small settlements. Williamson's and Crawford's campaigns aroused the fury of the Indians that took time and much blood and war to subdue. The Revolution was, however, drawing to a close. American arms were victorious, and a new nation was now coming into existence, who would change the whole current of Western matters, and make of the Northwest a land of liberty, equality and union. That nation was now on the stage.

CHAPTER VI.

AMERICAN OCCUPATION—INDIAN CLAIMS—SURVEYS—EARLY LAND COMPANIES—COMPACT OF 1787—ORGANIZATION OF THE TERRITORY—EARLY AMERICAN SETTLEMENTS IN THE OHIO VALLEY—FIRST TERRITORIAL OFFICERS—ORGANIZATION OF COUNTIES.

THE occupation of the West by the American, really dates from the campaign of Gen. Clarke in 1778, when he captured the British posts in the Illinois country, and Vincennes on the Wabash. Had he been properly supported, he would have reduced Detroit, then in easy reach, and poorly defended. As it was, however, that post remained in charge of the British till after the close of the war of the Revolution. They also held other lake posts; but these were included in the terms of peace, and came into the possession of the Americans. They were abandoned by the British as soon as the different commanders received notice from their chiefs, and British rule and English occupation ceased in that part of the New World.

The war virtually closed by the surrender of Lord Cornwallis at Yorktown, Va., October 19, 1781. The struggle was prolonged, however, by the British, in the vain hope that they could retrieve the disaster, but it was only a useless waste of men and money. America would not be subdued. "If we are to be taxed, we will be represented," said they, "else we will be a free government, and regulate our own taxes." In the end, they were free.

Provisional articles of peace between the United States and Great Britain were signed in Paris on the 30th of November, 1782. This was followed by an armistice negotiated at Versailles on the 20th of January, 1783; and finally, a definite treaty of peace was concluded at Paris on the 3d of the next September, and ratified by Congress on the 4th of January, 1784. By the second article of the definite treaty of 1783, the boundaries of the United States were fixed. A glance at the map of that day shows the boundary to have been as follows: Beginning at Passamaquoddy Bay, on the coast of Maine, the line ran north a little above the forty-fifth parallel of latitude, when it diverged southwesterly, irregularly, until it reached that parallel, when it followed it until it reached the St. Lawrence River. It followed that river to Lake Ontario, down its center; up the Niagara River; through Lake Erie,

up the Detroit River and through Lakes Huron and Superior, to the northwest extremity of the latter. Then it pursued another irregular western course to the Lake of the Woods, when it turned southward to the Mississippi River. The commissioners insisted that should be the western boundary, as the lakes were the northern. It followed the Mississippi south until the mouth of Red River was reached, when, turning east, it followed almost a direct line to the Atlantic Coast, touching the coast a little north of the outlet of St. John's River.

From this outline, it will be readily seen what boundary the United States possessed. Not one-half of its present domain.

At this date, there existed the original thirteen colonies: Virginia occupying all Kentucky and all the Northwest, save about half of Michigan and Wisconsin, claimed by Massachusetts; and the upper part of Ohio, Indiana and Illinois, and the lower part (a narrow strip) of Michigan, claimed by Connecticut. Georgia included all of Alabama and Mississippi. The Spaniards claimed all Florida and a narrow part of lower Georgia. All the country west of the Father of Waters belonged to Spain, to whom it had been secretly ceded when the family compact was made. That nation controlled the Mississippi, and gave no small uneasiness to the young government. It was, however, happily settled finally, by the sale of Louisiana to the United States.

Pending the settlement of these questions and the formation of the Federal Union, the cession of the Northwest by Virginia again came before Congress. That body found itself unable to fulfill its promises to its soldiers regarding land, and again urged the Old Dominion to cede the Territory to the General Government, for the good of all. Congress forbade settlers from occupying the Western lands till a definite cession had been made, and the title to the lands in question made good. But speculation was stronger than law, and without waiting for the slow processes of courts,

the adventurous settlers were pouring into the country at a rapid rate, only retarded by the rifle and scalping-knife of the savage—a temporary check. The policy of allowing any parties to obtain land from the Indians was strongly discouraged by Washington. He advocated the idea that only the General Government could do that, and, in a letter to James Duane, in Congress, he strongly urged such a course, and pointed out the danger of a border war, unless some such measure was stringently followed.

Under the circumstances, Congress pressed the claims of cession upon Virginia, and finally induced the Dominion to modify the terms proposed two years before. On the 20th of December, 1783, Virginia accepted the proposal of Congress, and authorized her delegates to make a deed to the United States of all her right in the territory northwest of the Ohio.

The Old Dominion stipulated in her deed of cession, that the territory should be divided into States, to be admitted into the Union as any other State, and to bear a proportionate share in the maintenance of that Union; that Virginia should be re-imbursed for the expense incurred in subduing the British posts in the territory; that the French and Canadian inhabitants should be protected in their rights; that the grant to Gen. George Rogers Clarke and his men, as well as all other similar grants, should be confirmed, and that the lands should be considered as the common property of the United States, the proceeds to be applied to the use of the whole country. Congress accepted these conditions, and the deed was made March 1, 1784. Thus the country came from under the dominion of Virginia, and became common property.

A serious difficulty arose about this time, that threatened for awhile to involve England and America anew in war. Virginia and several other States refused to abide by that part of the treaty relating to the payment of debts, especially so, when the British carried away quite a number of negroes claimed by the Americans. This refusal on the part of the Old Dominion and her abettors, caused the English to retain her Northwestern outposts, Detroit, Mackinaw, etc. She held these till 1786, when the questions were finally settled, and then readily abandoned them.

The return of peace greatly augmented emigration to the West, especially to Kentucky. When the war closed, the population of that county (the three counties having been made one judicial district, and Danville designated as the seat of gov-

ernment) was estimated to be about twelve thousand. In one year, after the close of the war, it increased to 30,000, and steps for a State government were taken. Owing to the divided sentiment among its citizens, its perplexing questions of land titles and proprietary rights, nine conventions were held before a definite course of action could be reached. This prolonged the time till 1792, when, in December of that year, the election for persons to form a State constitution was held, and the vexed and complicated questions settled. In 1783, the first wagons bearing merchandise came across the mountains. Their contents were received on flat-boats at Pittsburgh, and taken down the Ohio to Louisville, which that spring boasted of a store, opened by Daniel Broadhead. The next year, James Wilkinson opened one at Lexington.

Pittsburgh was now the principal town in the West. It occupied the same position regarding the outposts that Omaha has done for several years to Nebraska. The town of Pittsburgh was laid out immediately after the war of 1764, by Col. Campbell. It then consisted of four squares about the fort, and received its name from that citadel. The treaty with the Six Nations in 1768, conveyed to the proprietaries of Pennsylvania all the lands of the Alleghany below Kittanning, and all the country south of the Ohio, within the limits of Penn's charter. This deed of cession was recognized when the line between Pennsylvania and Virginia was fixed, and gave the post to the Keystone State. In accordance with this deed, the manor of Pittsburgh was withdrawn from market in 1769, and was held as the property of the Penn family. When Washington visited it in 1770, it seems to have declined in consequence of the afore-mentioned act. He mentions it as a "town of about twenty log houses, on the Monongahela, about three hundred yards from the fort." The Penn's remained true to the King, and hence all their land that had not been surveyed and returned to the land office, was confiscated by the commonwealth. Pittsburgh, having been surveyed, was still left to them. In the spring of 1784, Tench Francis, the agent of the Penns, was induced to lay out the manor into lots and offer them for sale. Though, for many years, the place was rather unpromising, it eventually became the chief town in that part of the West, a position it yet holds. In 1786, John Scull and Joseph Hall started the *Pittsburgh Gazette*, the first paper published west of the mountains. In the initial number, appeared a lengthy article from the pen of H. H. Brackenridge,

afterward one of the most prominent members of the Pennsylvania bar. He had located in Pittsburgh in 1781. His letter gives a most hopeful prospect in store for the future city, and is a highly descriptive article of the Western country. It is yet preserved in the "Western Annals," and is well worth a perusal.

Under the act of peace in 1783, no provision was made by the British for their allies, especially the Six Nations. The question was ignored by the English, and was made a handle by the Americans in gaining them to their cause before the war had fully closed. The treaties made were regarded by the Indians as alliances only, and when the English left the country the Indians began to assume rather a hostile bearing. This excited the whites, and for a while a war with that formidable confederacy was imminent. Better councils prevailed, and Congress wisely adopted the policy of acquiring their lands by purchase. In accordance with this policy, a treaty was made at Fort Stanwix with the Six Nations, in October, 1784. By this treaty, all lands west of a line drawn from the mouth of Oswego Creek, about four miles east of Niagara, to the mouth of Buffalo Creek, and on to the northern boundary of Pennsylvania, thence west along that boundary to its western extremity, thence south to the Ohio River, should be ceded to the United States. (They claimed west of this line by conquest.) The Six Nations were to be secured in the lands they inhabited, reserving only six miles square around Oswego fort for the support of the same. By this treaty, the indefinite claim of the Six Nations to the West was extinguished, and the question of its ownership settled.

It was now occupied by other Western tribes, who did not recognize the Iroquois claim, and who would not yield without a purchase. Especially was this the case with those Indians living in the northern part. To get possession of that country by the same process, the United States, through its commissioners, held a treaty at Fort McIntosh on the 21st of January, 1785. The Wyandot, Delaware, Chippewa and Ottawa tribes were present, and, through their chiefs, sold their lands to the Government. The Wyandot and Delaware nations were given a reservation in the north part of Ohio, where they were to be protected. The others were allotted reservations in Michigan. To all was given complete control of their lands, allowing them to punish any white man attempting to settle thereon, and guaranteeing them in their rights.

By such means Congress gained Indian titles to the vast realms north of the Ohio, and, a few months later, that legislation was commenced that should determine the mode of its disposal and the plan of its settlements.

To facilitate the settlement of lands thus acquired, Congress, on May 20, 1785, passed an act for disposing of lands in the Northwest Territory. Its main provisions were: A surveyor or surveyors should be appointed from the States; and a geographer, and his assistants to act with them. The surveyors were to divide the territory into townships of six miles square, by lines running due north and south, and east and west. The starting-place was to be on the Ohio River, at a point where the western boundary of Pennsylvania crossed it. This would give the first range, and the first township. As soon as seven townships were surveyed, the maps and plats of the same were to be sent to the Board of the Treasury, who would record them and proceed to place the land in the market, and so on with all the townships as fast as they could be prepared ready for sale. Each township was to be divided into thirty-six sections, or lots. Out of these sections, numbers 8, 11, 26 and 29 were reserved for the use of the Government, and lot No. 16, for the establishment of a common-school fund. One-third of all mines and minerals was also reserved for the United States. Three townships on Lake Erie were reserved for the use of officers, men and others, refugees from Canada and from Nova Scotia, who were entitled to grants of land. The Moravian Indians were also exempt from molestation, and guaranteed in their homes. Soldiers' claims, and all others of a like nature, were also recognized, and land reserved for them.

Without waiting for the act of Congress, settlers had been pouring into the country, and, when ordered by Congress to leave undisturbed Indian lands, refused to do so. They went into the Indian country at their peril, however, and when driven out by the Indians could get no redress from the Government, even when life was lost.

The Indians on the Wabash made a treaty at Fort Finney, on the Miami, January 31, 1786, promising allegiance to the United States, and were allowed a reservation. This treaty did not include the Piankeshaws, as was at first intended. These, refusing to live peaceably, stirred up the Shawanees, who began a series of predatory excursions against the settlements. This led to an expedition against them and other restless tribes. Gen. Clarke commanded part of the army on that expedition,

but got no farther than Vincennes, when, owing to the discontent of his Kentucky troops, he was obliged to return. Col. Benjamin Logan, however, marched, at the head of four or five hundred mounted riflemen, into the Indian country, penetrating as far as the head-waters of Mad River. He destroyed several towns, much corn, and took about eighty prisoners. Among these, was the chief of the nation, who was wantonly slain, greatly to Logan's regret, who could not restrain his men. His expedition taught the Indians submission, and that they must adhere to their contracts.

Meanwhile, the difficulties of the navigation of the Mississippi arose. Spain would not relinquish the right to control the entire southern part of the river, allowing no free navigation. She was secretly hoping to cause a revolt of the Western provinces, especially Kentucky, and openly favored such a move. She also claimed, by conquest, much of the land on the east side of the river. The slow movements of Congress; the failure of Virginia to properly protect Kentucky, and the inherent restlessness in some of the Western men, well-nigh precipitated matters, and, for a while, serious results were imminent. The Kentuckians, and, indeed, all the people of the West, were determined the river should be free, and even went so far as to raise a regiment, and forcibly seize Spanish property in the West. Great Britain stood ready, too, to aid the West should it succeed, providing it would make an alliance with her. But while the excitement was at its height, Washington counseled better ways and patience. The decisive tone of the new republic, though almost overwhelmed with a burden of debt, and with no credit, debarred the Spanish from too forcible measures to assert their claims, and held back the disloyal ones from attempting a revolt.

New York, Massachusetts and Connecticut ceded their lands, and now the United States were ready to fulfill their promises of land grants, to the soldiers who had preserved the nation. This did much to heal the breach in the West, and restore confidence there; so that the Mississippi question was overlooked for a time, and Kentucky forgot her animosities.

The cession of their claims was the signal for the formation of land companies in the East; companies whose object was to settle the Western country, and, at the same time, enrich the founders of the companies. Some of these companies had been formed in the old colonial days, but the recent war

had put a stop to all their proceedings. Congress would not recognize their claims, and new companies, under old names, were the result. By such means, the Ohio Company emerged from the past, and, in 1786, took an active existence.

Benjamin Tupper, a Revolutionary soldier, and since then a government surveyor, who had been west as far as Pittsburgh, revived the question. He was prevented from prosecuting his surveys by hostile Indians, and returned to Massachusetts. He broached a plan to Gen. Rufus Putnam, as to the renewal of their memorial of 1783, which resulted in the publication of a plan, and inviting all those interested, to meet in February in their respective counties, and choose delegates to a convention to be held at the "Bunch-of-grapes Tavern." in Boston, on the first of March, 1786. On the day appointed, eleven persons appeared, and by the 3d of March an outline was drawn up, and subscriptions under it began at once. The leading features of the plan were: "A fund of \$1,000,000, mainly in Continental certificates, was to be raised for the purpose of purchasing lands in the Western country; there were to be 1,000 shares of \$1,000 each, and upon each share \$10 in specie were to be paid for contingent expenses. One year's interest was to be appropriated to the charges of making a settlement, and assisting those unable to move without aid. The owners of every twenty shares were to choose an agent to represent them and attend to their interests, and the agents were to choose the directors. The plan was approved, and in a year's time from that date, the Company was organized."*

By the time this Company was organized, all claims of the colonies in the coveted territory were done away with by their deeds of cession, Connecticut being the last.

While troubles were still existing south of the Ohio River, regarding the navigation of the Mississippi, and many urged the formation of a separate, independent State, and while Congress and Washington were doing what they could to allay the feeling north of the Ohio, the New England associates were busily engaged, now that a Company was formed, to obtain the land they wished to purchase. On the 8th of March, 1787, a meeting of the agents chose Gen. Parsons, Gen. Putnam and the Rev. Mannasseh Cutler, Directors for the Company. The last selection was quite a fitting one for such an enterprise. Dr. Cutler was

* Historical Collections.

an accomplished scholar, an excellent gentleman, and a firm believer in freedom. In the choice of him as the agent of the Company, lies the fact, though unforeseen, of the beginning of anti-slavery in America. Through him the famous "compact of 1787," the true corner-stone of the Northwest, originated, and by him was safely passed. He was a good "wire-puller," too, and in this had an advantage. Mr. Hutchins was at this time the geographer for the United States, and was, probably, the best-posted man in America regarding the West. Dr. Cutler learned from him that the most desirable portions were on the Muskingum River, north of the Ohio, and was advised by him to buy there if he could.

Congress wanted money badly, and many of the members favored the plan. The Southern members, generally, were hostile to it, as the Doctor would listen to no grant which did not embody the New England ideas in the charter. These members were finally won over, some bribery being used, and some of their favorites made officers of the Territory, whose formation was now going on. This took time, however, and Dr. Cutler, becoming impatient, declared they would purchase from some of the States, who held small tracts in various parts of the West. This intimation brought the tardy ones to time, and, on the 23d of July, Congress authorized the Treasury Board to make the contract. On the 26th, Messrs. Cutler and Sargent, on behalf of the Company, stated in writing their conditions; and on the 27th, Congress referred their letter to the Board, and an order of the same date was obtained. Of this Dr. Cutler's journal says:

"By this grant we obtained near five millions of acres of land, amounting to \$3,500,000; 1,500,000 acres for the Ohio Company, and the remainder for a private speculation, in which many of the principal characters of America are concerned. Without connecting this speculation, similar terms and advantages for the Ohio Company could not have been obtained."

Messrs. Cutler and Sargent at once closed a verbal contract with the Treasury Board, which was executed in form on the 27th of the next October.*

By this contract, the vast region bounded on the south by the Ohio, west by the Scioto, east by the seventh range of townships then surveying, and north by a due west line, drawn from the north

boundary of the tenth township from the Ohio, direct to the Scioto, was sold to the Ohio associates and their secret copartners, for \$1 per acre, subject to a deduction of one-third for bad lands and other contingencies.

The whole tract was not, however, paid for nor taken by the Company—even their own portion of a million and a half acres, and extending west to the eighteenth range of townships, was not taken; and in 1792, the boundaries of the purchase proper were fixed as follows: the Ohio on the south, the seventh range of townships on the east, the sixteenth range on the west, and a line on the north so drawn as to make the grant 750,000 acres, besides reservations; this grant being the portion which it was originally agreed the Company might enter into at once. In addition to this, 214,285 acres were granted as army bounties, under the resolutions of 1779 and 1780, and 100,000 acres as bounties to actual settlers; both of the latter tracts being within the original grant of 1787, and adjoining the purchase as before mentioned.

While these things were progressing, Congress was bringing into form an ordinance for the government and social organization of the Northwest Territory. Virginia made her cession in March, 1784, and during the month following the plan for the temporary government of the newly acquired territory came under discussion. On the 19th of April, Mr. Spaight, of North Carolina, moved to strike from the plan reported by Mr. Jefferson, the emancipationist of his day, a provision for the prohibition of slavery north of the Ohio after the year 1800. The motion prevailed. From that day till the 23d, the plan was discussed and altered, and finally passed unanimously with the exception of South Carolina. The South would have slavery, or defeat every measure. Thus this hideous monster early began to assert himself. By the proposed plan, the Territory was to have been divided into States by parallels of latitude and meridian lines. This division, it was thought, would make ten States, whose names were as follows, beginning at the northwest corner, and going southwardly: Sylvania, Michigania, Cheresonius, Assenisipia, Metropotamia, Illinoia, Saratoga, Washington, Polypotamia and Pelisipia.*

A more serious difficulty existed, however, to this plan, than its catalogue of names—the number of States and their boundaries. The root of the evil was in the resolution passed by Congress in October,

* Land Laws.

* Spark's Washington.

1780, which fixed the size of the States to be formed from the ceded lands, at one hundred to one hundred and fifty miles square. The terms of that resolution being called up both by Virginia and Massachusetts, further legislation was deemed necessary to change them. July 7, 1786, this subject came up in Congress, and a resolution passed in favor of a division into not less than three nor more than five States. Virginia, at the close of 1788, assented to this proposition, which became the basis upon which the division should be made. On the 29th of September, Congress having thus changed the plan for dividing the Northwestern Territory into ten States, proceeded again to consider the terms of an ordinance for the government of that region. At this juncture, the genius of Dr. Cutler displayed itself. A graduate in medicine, law and divinity; an ardent lover of liberty; a celebrated scientist, and an accomplished, portly gentleman, of whom the Southern senators said they had never before seen so fine a specimen from the New England colonies, no man was better prepared to form a government for the new Territory, than he. The Ohio Company was his real object. He was backed by them, and enough Continental money to purchase more than a million acres of land. This was augmented by other parties until, as has been noticed, he represented over five million acres. This would largely reduce the public debt. Jefferson and Virginia were regarded as authority concerning the land Virginia had just ceded to the General Government. Jefferson's policy was to provide for the national credit, and still check the growth of slavery. Here was a good opportunity. Massachusetts owned the Territory of Maine, which she was crowding into market. She opposed the opening of the Northwest. This stirred Virginia. The South caught the inspiration and rallied around the Old Dominion and Dr. Cutler. Thereby he gained the credit and good will of the South, an auxiliary he used to good purpose. Massachusetts could not vote against him, because many of the constituents of her members were interested in the Ohio Company. Thus the Doctor, using all the arts of the lobbyist, was enabled to hold the situation. True to deeper convictions, he dictated one of the most compact and finished documents of wise statesmanship that has ever adorned any statute-book. Jefferson gave it the term, "Articles of Compact," and rendered him valuable aid in its construction. This "Compact" preceded the Federal Constitution, in both of which are seen Jefferson's master-mind. Dr. Cutler followed closely the constitution of Mas-

sachusetts, adopted three years before. The prominent features were: The exclusion of slavery from the Territory forever. Provision for public schools, giving one township for a seminary, and every sixteenth section. (That gave one thirty-sixth of all the land for public education.) A provision prohibiting the adoption of any constitution or the enactment of any law that would nullify pre-existing contracts.

The compact further declared that "Religion, morality and knowledge being necessary to good government and the happiness of mankind, schools and the means of education shall always be encouraged."

The Doctor planted himself firmly on this platform, and would not yield. It was that or nothing. Unless they could make the land desirable, it was not wanted, and, taking his horse and buggy, he started for the Constitutional Convention in Philadelphia. His influence succeeded. On the 13th of July, 1787, the bill was put upon its passage and was unanimously adopted. Every member from the South voted for it; only one man, Mr. Yates, of New York, voted against the measure; but as the vote was made by States, his vote was lost, and the "Compact of 1787" was beyond repeal. Thus the great States of the Northwest Territory were consecrated to freedom, intelligence and morality. This act was the opening step for freedom in America. Soon the South saw their blunder, and endeavored, by all their power, to repeal the compact. In 1803, Congress referred it to a committee, of which John Randolph was chairman. He reported the ordinance was a compact and could not be repealed. Thus it stood, like a rock, in the way of slavery, which still, in spite of these provisions, endeavored to plant that infernal institution in the West. Witness the early days of Ohio, Indiana and Illinois. But the compact could not be violated; New England ideas could not be put down, and her sons stood ready to defend the soil of the West from that curse.

The passage of the ordinance and the grant of land to Dr. Cutler and his associates, were soon followed by a request from John Cleve Symmes, of New Jersey, for the country between the Miamis. Symmes had visited that part of the West in 1786, and, being pleased with the valleys of the Miamis, had applied to the Board of the Treasury for their purchase, as soon as they were open to settlement. The Board was empowered to act by Congress, and, in 1788, a contract was signed, giving him the country he desired. The terms of his

purchase were similar to those of the Ohio Company. His application was followed by others, whose success or failure will appear in the narrative.

The New England or Ohio Company was all this time busily engaged perfecting its arrangements to occupy its lands. The Directors agreed to reserve 5,760 acres near the confluence of the Ohio and Muskingum for a city and commons, for the old ideas of the English plan of settling a country yet prevailed. A meeting of the Directors was held at Bracket's tavern, in Boston, November 23, 1787, when four surveyors, and twenty-two attendants, boat-builders, carpenters, blacksmiths and common workmen, numbering in all forty persons, were engaged. Their tools were purchased, and wagons were obtained to transport them across the mountains. Gen. Rufus Putnam was made superintendent of the company, and Ebenezer Sproat, of Rhode Island, Anselm Tupper and John Matthews, from Massachusetts, and R. J. Meigs, from Connecticut, as surveyors. At the same meeting, a suitable person to instruct them in religion, and prepare the way to open a school when needed, was selected. This was Rev. Daniel Storey, who became the first New England minister in the Northwest.

The Indians were watching this outgrowth of affairs, and felt, from what they could learn in Kentucky, that they would be gradually surrounded by the whites. This they did not relish, by any means, and gave the settlements south of the Ohio no little uneasiness. It was thought best to hold another treaty with them. In the mean time, to insure peace, the Governor of Virginia, and Congress, placed troops at Venango, Forts Pitt and McIntosh, and at Miami, Vincennes, Louisville, and Muskingum, and the militia of Kentucky were held in readiness should a sudden outbreak occur. These measures produced no results, save insuring the safety of the whites, and not until January, 1789, was Clarke able to carry out his plans. During that month, he held a meeting at Fort Harmar,* at the mouth of the Muskingum, where the New England Colony expected to locate.

The hostile character of the Indians did not deter the Ohio Company from carrying out its plans. In the winter of 1787, Gen. Rufus Put-

nam and forty-seven pioneers advanced to the mouth of the Youghiogheny River, and began building a boat for transportation down the Ohio in the spring. The boat was the largest craft that had ever descended the river, and, in allusion to their Pilgrim Fathers, it was called the Mayflower. It was 45 feet long and 12 feet wide, and estimated at 50 tons burden. Truly a formidable affair for the time. The bows were raking and curved like a galley, and were strongly timbered. The sides were made bullet-proof, and it was covered with a deck roof. Capt. Devol, the first ship-builder in the West, was placed in command. On the 2d of April, the Mayflower was launched, and for five days the little band of pioneers sailed down the Monongahela and the Ohio, and, on the 7th, landed at the mouth of the Muskingum. There, opposite Fort Harmar, they chose a location, moored their boat for a temporary shelter, and began to erect houses for their occupation.

Thus was begun the first English settlement in the Ohio Valley. About the 1st of July, they were re-enforced by the arrival of a colony from Massachusetts. It had been nine weeks on the way. It had hauled its wagons and driven its stock to Wheeling, where, constructing flat-boats, it had floated down the river to the settlement.

In October preceding this occurrence, Arthur St. Clair had been appointed Governor of the Territory by Congress, which body also appointed Winthrop Sargent, Secretary, and Samuel H. Parsons, James M. Varnum and John Armstrong Judges. Subsequently Mr. Armstrong declined the appointment, and Mr. Symmes was given the vacancy. None of these were on the ground when the first settlement was made, though the Judges came soon after. One of the first things the colony found necessary to do was to organize some form of government, whereby difficulties might be settled, though to the credit of the colony it may be said, that during the first three months of its existence but one difference arose, and that was settled by a compromise.* Indeed, hardly a better set of men for the purpose could have been selected. Washington wrote concerning this colony:

"No colony in America was ever settled under such favorable auspices as that which has commenced at the Muskingum. Information, property and strength will be its characteristics. I know many of the settlers personally, and there

*Fort Harmar was built in 1785, by a detachment of United States soldiers, under command of Maj. John Doughty. It was named in honor of Col. Josiah Harmar, to whose regiment Maj. Doughty was attached. It was the first military post erected by the Americans within the limits of Ohio, except Fort Laurens, a temporary structure built in 1778. When Marietta was founded it was the military post of that part of the country, and was for many years an important station.

*"Western Monthly Magazine."

never were men better calculated to promote the welfare of such a community."

On the 2d of July, a meeting of the Directors and agents was held on the banks of the Muskingum for the purpose of naming the newborn city and its squares. As yet, the settlement had been merely "The Muskingum;" but the name Marietta was now formally given it, in honor of Marie Antoinette. The square upon which the blockhouses stood was called *Campus Martius*; Square No. 19, *Capitolium*; Square No. 61, *Cecilia*, and the great road running through the covert-way, *Sacra Via*.* Surely, classical scholars were not scarce in the colony.

On the Fourth, an oration was delivered by James M. Varnum, one of the Judges, and a public demonstration held. Five days after, the Governor arrived, and the colony began to assume form. The ordinance of 1787 provided two distinct grades of government, under the first of which the whole power was under the Governor and the three Judges. This form was at once recognized on the arrival of St. Clair. The first law established by this court was passed on the 25th of July. It established and regulated the militia of the Territory. The next day after its publication, appeared the Governor's proclamation erecting all the country that had been ceded by the Indians east of the Scioto River, into the county of Washington. Marietta was, of course, the county seat, and, from that day, went on prosperously. On September 2, the first court was held with becoming ceremonies. It is thus related in the *American Pioneer*:

"The procession was formed at the Point (where the most of the settlers resided), in the following order: The High Sheriff, with his drawn sword; the citizens; the officers of the garrison at Fort Harmar; the members of the bar; the Supreme Judges; the Governor and clergyman; the newly appointed Judges of the Court of Common Pleas, Gens. Rufus Putnam and Benjamin Tupper.

"They marched up the path that had been cleared through the forest to Campus Martius Hall (stockade), where the whole countermarched, and the Judges (Putnam and Tupper) took their seats. The clergyman, Rev. Dr. Cutler, then invoked the divine blessing. The Sheriff, Col. Ebenezer Sproat, proclaimed with his solemn 'Oh yes!' that a court is open for the administration of

even-handed justice, to the poor and to the rich, to the guilty and to the innocent, without respect of persons; none to be punished without a trial of their peers, and then in pursuance of the laws and evidence in the case.

"Although this scene was exhibited thus early in the settlement of the West, few ever equaled it in the dignity and exalted character of its principal participators. Many of them belonged to the history of our country in the darkest, as well as the most splendid, period of the Revolutionary war."

Many Indians were gathered at the same time to witness the (to them) strange spectacle, and for the purpose of forming a treaty, though how far they carried this out, the *Pioneer* does not relate.

The progress of the settlement was quite satisfactory during the year. Some one writing a letter from the town says:

"The progress of the settlement is sufficiently rapid for the first year. We are continually erecting houses, but arrivals are constantly coming faster than we can possibly provide convenient covering. Our first ball was opened about the middle of December, at which were fifteen ladies, as well accomplished in the manner of polite circles as any I have ever seen in the older States. I mention this to show the progress of society in this new world, where, I believe, we shall vie with, if not excel, the old States in every accomplishment necessary to render life agreeable and happy."

The emigration westward at this time was, indeed, exceedingly large. The commander at Fort Harmar reported 4,500 persons as having passed that post between February and June, 1788, many of whom would have stopped there, had the associates been prepared to receive them. The settlement was free from Indian depredations until January, 1791, during which interval it daily increased in numbers and strength.

Symmes and his friends were not idle during this time. He had secured his contract in October, 1787, and, soon after, issued a pamphlet stating the terms of his purchase and the mode he intended to follow in the disposal of the lands. His plan was, to issue warrants for not less than one-quarter section, which might be located anywhere, save on reservations, or on land previously entered. The locator could enter an entire section should he desire to do so. The price was to be 60 $\frac{3}{4}$ cents per acre till May, 1788; then, till November, \$1; and

* "Carey's Museum," Vol. 4.

after that time to be regulated by the demand for land. Each purchaser was bound to begin improvements within two years, or forfeit one-sixth of the land to whoever would settle thereon and remain seven years. Military bounties might be taken in this, as in the purchase of the associates. For himself, Symmes reserved one township near the mouth of the Miami. On this he intended to build a great city, rivaling any Eastern port. He offered any one a lot on which to build a house, providing he would remain three years. Continental certificates were rising, owing to the demand for land created by these two purchases, and Congress found the burden of debt correspondingly lessened. Symmes soon began to experience difficulty in procuring enough to meet his payments. He had also some trouble in arranging his boundary with the Board of the Treasury. These, and other causes, laid the foundation for another city, which is now what Symmes hoped his city would one day be.

In January, 1788, Mathias Denman, of New Jersey, took an interest in Symmes' purchase, and located, among other tracts, the sections upon which Cincinnati has since been built. Retaining one-third of this purchase, he sold the balance to Robert Patterson and John Filson, each getting the same share. These three, about August, agreed to lay out a town on their land. It was designated as opposite the mouth of the Licking River, to which place it was intended to open a road from Lexington, Ky. These men little thought of the great emporium that now covers the modest site of this town they laid out that summer. Mr. Filson, who had been a schoolmaster, and was of a somewhat poetic nature, was appointed to name the town. In respect to its situation, and as if with a prophetic perception of the mixed races that were in after years to dwell there, he named it Losantiville,* "which, being interpreted," says the "Western Annals," "means *vill*, the town; *anti*, opposite to; *os*, the mouth; *L*, of Licking. This may well put to the blush the *Campus Martius* of the Marietta scholars, and the *Fort Solon* of the Spaniards."

Meanwhile, Symmes was busy in the East, and, by July, got thirty people and eight four-horse wagons under way for the West. These reached Limestone by September, where they met Mr. Stites, with several persons from Redstone. All

came to Symmes' purchase, and began to look for homes.

Symmes' mind was, however, ill at rest. He could not meet his first payment on so vast a realm, and there also arose a difference of opinion between him and the Treasury Board regarding the Ohio boundary. Symmes wanted all the land between the two Miamis, bordering on the Ohio, while the Board wished him confined to no more than twenty miles of the river. To this proposal he would not agree, as he had made sales all along the river. Leaving the bargain in an unsettled state, Congress considered itself released from all its obligations, and, but for the representations of many of Symmes' friends, he would have lost all his money and labor. His appointment as Judge was not favorably received by many, as they thought that by it he would acquire unlimited power. Some of his associates also complained of him, and, for awhile, it surely seemed that ruin only awaited him. But he was brave and hopeful, and determined to succeed. On his return from a visit to his purchase in September, 1788, he wrote Jonathan Dayton, of New Jersey, one of his best friends and associates, that he thought some of the land near the Great Miami "positively worth a silver dollar the acre in its present state."

A good many changes were made in his original contract, growing out of his inability to meet his payments. At first, he was to have not less than a million acres, under an act of Congress passed in October, 1787, authorizing the Treasury Board to contract with any one who could pay for such tracts, on the Ohio and Wabash Rivers, whose fronts should not exceed one-third of their depth.

Dayton and Marsh, Symmes' agents, contracted with the Board for one tract on the Ohio, beginning twenty miles up the Ohio from the mouth of the Great Miami, and to run back for quantity between the Miami and a line drawn from the Ohio, parallel to the general course of that river. In 1791, three years after Dayton and Marsh made the contract, Symmes found this would throw the purchase too far back from the Ohio, and applied to Congress to let him have all between the Miamis, running back so as to include 1,000,000 acres, which that body, on April 12, 1792, agreed to do. When the lands were surveyed, however, it was found that a line drawn from the head of the Little Miami due west to the Great Miami, would include south of it less than six hundred thousand acres. Even this Symmes could not pay for, and when his patent was issued in September, 1794, it

* Judge Burnett, in his notes, disputes the above account of the origin of the city of Cincinnati. He says the name "Losantiville" was determined on, but not adopted, when the town was laid out. This version is probably the correct one, and will be found fully given in the detailed history of the settlements.

gave him and his associates 248,540 acres, exclusive of reservations which amounted to 63,142 acres. This tract was bounded by the Ohio, the two Miamis and a due east and west line run so as to include the desired quantity. Symmes, however, made no further payments, and the rest of his purchase reverted to the United States, who gave those who had bought under him ample pre-emption rights.

The Government was able, also, to give him and his colonists but little aid, and as danger from hostile Indians was in a measure imminent (though all the natives were friendly to Symmes), settlers were slow to come. However, the band led by Mr. Stites arrived before the 1st of January, 1789, and locating themselves near the mouth of the Little Miami, on a tract of 10,000 acres which Mr. Stites had purchased from Symmes, formed the second settlement in Ohio. They were soon afterward joined by a colony of twenty-six persons, who assisted them to erect a block-house, and gather their corn. The town was named Columbia. While here, the great flood of January, 1789, occurred, which did much to ensure the future growth of Losantiville, or more properly, Cincinnati. Symmes City, which was laid out near the mouth of the Great Miami, and which he vainly strove to make the city of the future, Marietta and Columbia, all suffered severely by this flood, the greatest, the Indians said, ever known. The site of Cincinnati was not overflowed, and hence attracted the attention of the settlers. Denman's warrants had designated his purchase as opposite the mouth of the Licking; and that point escaping the overflow, late in December the place was visited by Israel Ludlow, Symmes' surveyor, Mr. Patterson and Mr. Denman, and about fourteen others, who left Maysville to "form a station and lay off a town opposite the Licking." The river was filled with ice "from shore to shore;" but, says Symmes in May, 1789, "Perseverance triumphing over difficulty, and they landed safe on a most delightful bank of the Ohio, where they founded the town of Losantiville, which populates considerably." The settlers of Losantiville built a few log huts and block-houses, and proceeded to improve the town. Symmes, noticing the location, says: "Though they placed their dwellings in the most marked position, yet they suffered nothing from the freshet." This would seem to give credence to Judge Burnett's notes regarding the origin of Cincinnati, who states the settlement was made at this time, and not at the time mentioned when

Mr. Filson named the town. It is further to be noticed, that, before the town was located by Mr. Ludlow and Mr. Patterson, Mr. Filson had been killed by the Miami Indians, and, as he had not paid for his one-third of the site, the claim was sold to Mr. Ludlow, who thereby became one of the original owners of the place. Just what day the town was laid out is not recorded. All the evidence tends to show it must have been late in 1788, or early in 1789.

While the settlements on the north side of the Ohio were thus progressing, south of it fears of the Indians prevailed, and the separation sore was kept open. The country was, however, so torn by internal factions that no plan was likely to succeed, and to this fact, in a large measure, may be credited the reason it did not secede, or join the Spanish or French faction, both of which were intriguing to get the commonwealth. During this year the treasonable acts of James Wilkinson came into view. For a while he thought success was in his grasp, but the two governments were at peace with America, and discountenanced any such efforts. Wilkinson, like all traitors, relapsed into nonentity, and became mistrusted by the governments he attempted to befriend. Treason is always odious.

It will be borne in mind, that in 1778 preparations had been made for a treaty with the Indians, to secure peaceful possession of the lands owned in the West. Though the whites held these by purchase and treaty, yet many Indians, especially the Wabash and some of the Miami Indians, objected to their occupation, claiming the Ohio boundary as the original division line. Clarke endeavored to obtain, by treaty at Fort Harmar, in 1778, a confirmation of these grants, but was not able to do so till January, 9, 1789. Representatives of the Six Nations, and of the Wyandots, Delawares, Ottawas, Chippewas, Pottawatomies and Sacs, met him at this date, and confirmed and extended the treaties of Fort Stanwix and Fort McIntosh, the one in 1784, the other in 1785. This secured peace with the most of them, save a few of the Wabash Indians, whom they were compelled to conquer by arms. When this was accomplished, the borders were thought safe, and Virginia proposed to withdraw her aid in support of Kentucky. This opened old troubles, and the separation dogma came out afresh. Virginia offered to allow the erection of a separate State, providing Kentucky would assume part of the old debts. This the young commonwealth would not

do, and sent a remonstrance. Virginia withdrew the proposal, and ordered a ninth convention, which succeeded in evolving a plan whereby Kentucky took her place among the free States of the Union.

North of the Ohio, the prosperity continued. In 1789, Rev. Daniel Story, who had been appointed missionary to the West, came out as a teacher of the youth and a preacher of the Gospel. Dr. Cutler had preceded him, not in the capacity of a minister, though he had preached; hence Mr. Story is truly the first missionary from the Protestant Church who came to the Ohio Valley in that capacity. When he came, in 1789, he found nine associations on the Ohio Company's purchase, comprising two hundred and fifty persons in all; and, by the close of 1790, eight settlements had been made: two at Belpre (belle prairie), one at Newbury, one at Wolf Creek, one at Duck Creek, one at the mouth of Meigs' Creek, one at Anderson's Bottom, and one at Big Bottom. An extended sketch of all these settlements will be found farther on in this volume.

Symmes had, all this time, strenuously endeavored to get his city—called Cleves City—favorably noticed, and filled with people. He saw a rival in Cincinnati. That place, if made military headquarters to protect the Miami Valley, would out-rival his town, situated near the bend of the Miami, near its mouth. On the 15th of June, Judge Symmes received news that the Wabash Indians threatened the Miami settlements, and as he had received only nineteen men for defense, he applied for more. Before July, Maj. Doughty arrived at the "Slaughter House"—as the Miami was sometimes called, owing to previous murders that had, at former times, occurred therein. Through the influence of Symmes, the detachment landed at the North Bend, and, for awhile, it was thought the fort would be erected there. This was what Symmes wanted, as it would secure him the headquarters of the military, and aid in getting the headquarters of the civil government. The truth was, however, that neither the proposed city on the Miami—North Bend, as it afterward became known, from its location—or South Bend, could compete, in point of natural advantages, with the plain on which Cincinnati is built. Had Fort Washington been built elsewhere, after the close of the Indian war, nature would have asserted her advantages, and insured the growth of a city, where even the ancient and mysterious dwellers of the Ohio had reared the earthen

walls of one of their vast temples. Another fact is given in relation to the erection of Fort Washington at Losantiville, which partakes somewhat of romance. The Major, while waiting to decide at which place the fort should be built, happened to make the acquaintance of a black-eyed beauty, the wife of one of the residents. Her husband, noticing the affair, removed her to Losantiville. The Major followed; he told Symmes he wished to see how a fort would do there, but promised to give his city the preference. He found the beauty there, and on his return Symmes could not prevail on him to remain. If the story be true, then the importance of Cincinnati owes its existence to a trivial circumstance, and the old story of the ten years' war which terminated in the downfall of Troy, which is said to have originated owing to the beauty of a Spartan dame, was re-enacted here. Troy and North Bend fell because of the beauty of a woman; Cincinnati was the result of the downfall of the latter place.

About the first of January, 1790, Governor St. Clair, with his officers, descended the Ohio River from Marietta to Fort Washington. There he established the county of Hamilton, comprising the immense region of country contiguous to the Ohio, from the Hocking River to the Great Miami; appointed a corps of civil and military officers, and established a Court of Quarter Sessions. Some state that at this time, he changed the name of the village of Losantiville to Cincinnati, in allusion to a society of that name which had recently been formed among the officers of the Revolutionary army, and established it as the seat of justice for Hamilton. This latter fact is certain; but as regards changing the name of the village, there is no good authority for it. With this importance attached to it, Cincinnati began at once an active growth, and from that day Cleves' city declined. The next summer, frame houses began to appear in Cincinnati, while at the same time forty new log cabins appeared about the fort.

On the 8th of January, the Governor arrived at the falls of the Ohio, on his way to establish a government at Vincennes and Kaskaskia. From Clarksville, he dispatched a messenger to Major Hamtramck, commander at Vincennes, with speeches to the various Indian tribes in this part of the Northwest, who had not fully agreed to the treaties. St. Clair and Sargent followed in a few days, along an Indian trail to Vincennes, where he organized the county of Knox, comprising all the

country along the Ohio, from the Miami to the Wabash, and made Vincennes the county seat. Then they proceeded across the lower part of Illinois to Kaskaskia, where he established the county of St. Clair (so named by Sargent), comprising all the country from the Wabash to the Mississippi. Thus the Northwest was divided into three counties, and courts established therein. St. Clair called upon the French inhabitants at Vincennes and in the Illinois country, to show the titles to their lands, and also to defray the expense of a survey. To this latter demand they replied through their priest, Pierre Gibault, showing their poverty, and inability to comply. They were confirmed in their grants, and, as they had been good friends to the patriot cause, were relieved from the expense of the survey.

While the Governor was managing these affairs, Major Hamtramck was engaged in an effort to conciliate the Wabash Indians. For this purpose, he sent Antoine Gamelin, an intelligent French merchant, and a true friend of America, among them to carry messages sent by St. Clair and the Government, and to learn their sentiments and dispositions. Gamelin performed this important mission in the spring of 1790 with much sagacity, and, as the

French were good friends of the natives, he did much to conciliate these half-hostile tribes. He visited the towns of these tribes along the Wabash and as far north and east as the Miami village, Ke-ki-ong-ga—St. Mary's—at the junction of the St. Mary's and St. Joseph's Rivers (Fort Wayne).

Gamelin's report, and the intelligence brought by some traders from the Upper Wabash, were conveyed to the Governor at Kaskaskia. The reports convinced him that the Indians of that part of the Northwest were preparing for a war on the settlements north of the Ohio, intending, if possible, to drive them south of it; that river being still considered by them as the true boundary. St. Clair left the administration of affairs in the Western counties to Sargent, and returned at once to Fort Washington to provide for the defense of the frontier.

The Indians had begun their predatory incursions into the country settled by the whites, and had committed some depredations. The Kentuckians were enlisted in an attack against the Scioto Indians. April 18, Gen. Harmar, with 100 regulars, and Gen. Scott, with 230 volunteers, marched from Limestone, by a circuitous route, to the Scioto, accomplishing but little. The savages had fled.

CHAPTER VII.

THE INDIAN WAR OF 1795—HARMAR'S CAMPAIGN—ST. CLAIR'S CAMPAIGN—WAYNE'S CAMPAIGN—CLOSE OF THE WAR.

A GREAT deal of the hostility at this period was directly traceable to the British. They yet held Detroit and several posts on the lakes, in violation of the treaty of 1783. They alleged as a reason for not abandoning them, that the Americans had not fulfilled the conditions of the treaty regarding the collection of debts. Moreover, they did all they could to remain at the frontier and enjoy the emoluments derived from the fur trade. That they aided the Indians in the conflict at this time, is undeniable. Just *how*, it is difficult to say. But it is well known the savages had all the ammunition and fire-arms they wanted, more than they could have obtained from American and French renegade traders. They were also well supplied with clothing, and were able to prolong the war some time. A great confederation was on the eve of formation. The leading spirits were

Cornplanter, Brant, Little Turtle and other noted chiefs, and had not the British, as Brant said, "encouraged us to the war, and promised us aid, and then, when we were driven away by the Americans, shut the doors of their fortresses against us and refused us food, when they saw us nearly conquered, we would have effected our object."

McKee, Elliott and Girty were also actively engaged in aiding the natives. All of them were in the interest of the British, a fact clearly proven by the Indians themselves, and by other traders.

St. Clair and Gen. Harmar determined to send an expedition against the Maumee towns, and secure that part of the country. Letters were sent to the militia officers of Western Pennsylvania, Virginia and Kentucky, calling on them for militia to co-operate with the regular troops in the campaign. According to the plan of the campaign,

300 militia were to rendezvous at Fort Steuben (Jeffersonville), march thence to Fort Knox, at Vincennes, and join Maj. Hamtramck in an expedition up the Wabash; 700 were to rendezvous at Fort Washington to join the regular army against the Maumee towns.

While St. Clair was forming his army and arranging for the campaign, three expeditions were sent out against the Miami towns. One against the Miami villages, not far from the Wabash, was led by Gen. Harmar. He had in his army about fourteen hundred men, regulars and militia. These two parts of the army could not be made to affiliate, and, as a consequence, the expedition did little beyond burning the villages and destroying corn. The militia would not submit to discipline, and would not serve under regular officers. It will be seen what this spirit led to when St. Clair went on his march soon after.

The Indians, emboldened by the meager success of Harmar's command, continued their depredations against the Ohio settlements, destroying the community at Big Bottom. To hold them in check, and also punish them, an army under Charles Scott went against the Wabash Indians. Little was done here but destroy towns and the standing corn. In July, another army, under Col. Wilkinson, was sent against the Eel River Indians. Becoming entangled in extensive morasses on the river, the army became endangered, but was finally extricated, and accomplished no more than either the other armies before it. As it was, however, the three expeditions directed against the Miamis and Shawanees, served only to exasperate them. The burning of their towns, the destruction of their corn, and the captivity of their women and children, only aroused them to more desperate efforts to defend their country and to harass their invaders. To accomplish this, the chiefs of the Miamis, Shawanees and the Delawares, Little Turtle, Blue Jacket and Buckongahelas, were engaged in forming a confederacy of all the tribes of the Northwest, strong enough to drive the whites beyond the Ohio. Pontiac had tried that before, even when he had open allies among the French. The Indians now had secret allies among the British, yet, in the end, they did not succeed. While they were preparing for the contest, St. Clair was gathering his forces, intending to erect a chain of forts from the Ohio, by way of the Miami and Maumee valleys, to the lakes, and thereby effectually hold the savages in check. Washington warmly seconded this plan, and designated the

junction of the St. Mary's and St. Joseph's Rivers as an important post. This had been a fortification almost from the time the English held the valley, and only needed little work to make it a formidable fortress. Gen. Knox, the Secretary of War, also favored the plan, and gave instructions concerning it. Under these instructions, St. Clair organized his forces as rapidly as he could, although the numerous drawbacks almost, at times, threatened the defeat of the campaign. Through the summer the arms and accouterments of the army were put in readiness at Fort Washington. Many were found to be of the poorest quality, and to be badly out of repair. The militia came poorly armed, under the impression they were to be provided with arms. While waiting in camp, habits of idleness engendered themselves, and drunkenness followed. They continued their accustomed freedom, disdain to drill, and refused to submit to the regular officers. A bitter spirit broke out between the regular troops and the militia, which none could heal. The insubordination of the militia and their officers, caused them a defeat afterward, which they in vain attempted to fasten on the busy General, and the regular troops.

The army was not ready to move till September 17. It was then 2,300 strong. It then moved to a point upon the Great Miami, where they erected Fort Hamilton, the first in the proposed chain of fortresses. After its completion, they moved on forty-four miles farther, and, on the 12th of October, began the erection of Fort Jefferson, about six miles south of the present town of Greenville, Darke County. On the 24th, the army again took up its line of march, through a wilderness, marshy and boggy, and full of savage foes. The army rapidly declined under the hot sun; even the commander was suffering from an indisposition. The militia deserted, in companies at a time, leaving the bulk of the work to the regular troops. By the 3d of November, the army reached a stream twelve yards wide, which St. Clair supposed to be a branch of the St. Mary of the Maumee, but which in reality was a tributary of the Wabash. Upon the banks of that stream, the army, now about fourteen hundred strong, encamped in two lines. A slight protection was thrown up as a safeguard against the Indians, who were known to be in the neighborhood. The General intended to attack them next day, but, about half an hour before sunrise, just after the militia had been dismissed from parade, a sudden attack was made upon them. The militia were thrown

into confusion, and disregarded the command of the officers. They had not been sufficiently drilled, and now was seen, too late and too plainly, the evil effects of their insubordination. Through the morning the battle waged furiously, the men falling by scores. About nine o'clock the retreat began, covered by Maj. Cook and his troops. The retreat was a disgraceful, precipitate flight, though, after four miles had been passed, the enemy returned to the work of scalping the dead and wounded, and of pillaging the camp. Through the day and the night their dreadful work continued, one squaw afterward declaring "her arm was weary scalping the white men." The army reached Fort Jefferson a little after sunset, having thrown away much of its arms and baggage, though the act was entirely unnecessary. After remaining here a short time, it was decided by the officers to move on toward Fort Hamilton, and thence to Fort Washington.

The defeat of St. Clair was the most terrible reverse the Americans ever suffered from the Indians. It was greater than even Braddock's defeat. His army consisted of 1,200 men and 86 officers, of whom 714 men and 63 officers were killed or wounded. St. Clair's army consisted of 1,400 men and 86 officers, of whom 890 men and 16 officers were killed or wounded. The comparative effects of the two engagements very inadequately represent the crushing effect of St. Clair's defeat. An unprotected frontier of more than a thousand miles in extent was now thrown open to a foe made merciless, and anxious to drive the whites from the north side of the Ohio. Now, settlers were scattered along all the streams, and in all the forests, exposed to the cruel enemy, who stealthily approached the homes of the pioneer, to murder him and his family. Loud calls arose from the people to defend and protect them. St. Clair was covered with abuse for his defeat, when he really was not alone to blame for it. The militia would not be controlled. Had Clarke been at their head, or Wayne, who succeeded St. Clair, the result might have been different. As it was, St. Clair resigned; though ever after he enjoyed the confidence of Washington and Congress.

Four days after the defeat of St. Clair, the army, in its straggling condition, reached Fort Washington, and paused to rest. On the 9th, St. Clair wrote fully to the Secretary of War. On the 12th, Gen. Knox communicated the information to Congress, and on the 26th, he laid before the President two reports, the second containing suggestions regarding future operations. His sugges-

tions urged the establishment of a strong United States Army, as it was plain the States could not control the matter. He also urged a thorough drill of the soldiers. No more insubordination could be tolerated. General Wayne was selected by Washington as the commander, and at once proceeded to the task assigned to him. In June, 1792, he went to Pittsburgh to organize the army now gathering, which was to be the ultimate argument with the Indian confederation. Through the summer he was steadily at work. "Train and discipline them for the work they are meant for," wrote Washington, "and do not spare powder and lead, so the men be made good marksmen." In December, the forces, now recruited and trained, gathered at a point twenty-two miles below Pittsburgh, on the Ohio, called Legionville, the army itself being denominated the Legion of the United States, divided into four sub-legions, and provided with the proper officers. Meantime, Col. Wilkinson succeeded St. Clair as commander at Fort Washington, and sent out a force to examine the field of defeat, and bury the dead. A shocking sight met their view, revealing the deeds of cruelty enacted upon their comrades by the savage enemy.

While Wayne's army was drilling, peace measures were pressed forward by the United States with equal perseverance. The Iroquois were induced to visit Philadelphia, and partially secured from the general confederacy. They were wary, however, and, expecting aid from the British, held aloof. Brant did not come, as was hoped, and it was plain there was intrigue somewhere. Five independent embassies were sent among the Western tribes, to endeavor to prevent a war, and win over the inimical tribes. But the victories they had won, and the favorable whispers of the British agents, closed the ears of the red men, and all propositions were rejected in some form or other. All the ambassadors, save Putnam, suffered death. He alone was able to reach his goal—the Wabash Indians—and effect any treaty. On the 27th of December, in company with Heckewelder, the Moravian missionary, he reached Vincennes, and met thirty-one chiefs, representing the Weas, Piankeshaws, Kaskaskias, Peorias, Illinois, Pottawatomies, Mascoutins, Kickapoos and Eel River Indians, and concluded a treaty of peace with them.

The fourth article of this treaty, however, contained a provision guaranteeing to the Indians their lands, and when the treaty was laid before Congress, February 13, 1793, that body, after much discussion, refused on that account to ratify it.

A great council of the Indians was to be held at Auglaize during the autumn of 1792, when the assembled nations were to discuss fully their means of defense, and determine their future line of action. The council met in October, and was the largest Indian gathering of the time. The chiefs of all the tribes of the Northwest were there. The representatives of the seven nations of Canada, were in attendance. Cornplanter and forty-eight chiefs of the New York (Six Nations) Indians repaired thither. "Besides these," said Cornplanter, "there were so many nations we cannot tell the names of them. There were three men from the Gora nation; it took them a whole season to come; and," continued he, "twenty-seven nations from beyond Canada were there." The question of peace or war was long and earnestly debated. Their future was solemnly discussed, and around the council fire native eloquence and native zeal shone in all their simple strength. One nation after another, through their chiefs, presented their views. The deputies of the Six Nations, who had been at Philadelphia to consult the "Thirteen Fires," made their report. The Western boundary was the principal question. The natives, with one accord, declared it must be the Ohio River. An address was prepared, and sent to the President, wherein their views were stated, and agreeing to abstain from all hostilities, until they could meet again in the spring at the rapids of the Maumee, and there consult with their white brothers. They desired the President to send agents, "who are men of honesty, not proud land-jobbers, but men who love and desire peace." The good work of Penn was evidenced here, as they desired that the ambassadors "be accompanied by some Friend or Quaker."

The armistice they had promised was not, however, faithfully kept. On the 6th of November, a detachment of Kentucky cavalry at Fort St. Clair, about twenty-five miles above Fort Hamilton, was attacked. The commander, Maj. Adair, was an excellent officer, well versed in Indian tactics, and defeated the savages.

This infraction of their promises did not deter the United States from taking measures to meet the Indians at the rapids of the Maumee "when the leaves were fully out." For that purpose, the President selected as commissioners, Charles Carroll and Charles Thompson, but, as they declined the nomination, he appointed Benjamin Lincoln, Beverly Randolph and Timothy Pickering, the 1st of March, 1793, to attend the convention, which,

it was thought best, should be held at the Sandusky outpost. About the last of April, these commissioners left Philadelphia, and, late in May, reached Niagara, where they remained guests of Lieut. Gov. Simcoe, of the British Government. This officer gave them all the aid he could, yet it was soon made plain to them that he would not object to the confederation, nay, even rather favored it. They speak of his kindness to them, in grateful terms. Gov. Simcoe advised the Indians to make peace, but not to give up any of their lands. That was the pith of the whole matter. The British rather claimed land in New York, under the treaty of 1783, alleging the Americans had not fully complied with the terms of that treaty, hence they were not as anxious for peace and a peaceful settlement of the difficult boundary question as they sometimes represented.

By July, "the leaves were fully out," the conferences among the tribes were over, and, on the 15th of that month, the commissioners met Brant and some fifty natives. In a strong speech, Brant set forth their wishes, and invited them to accompany him to the place of holding the council. The Indians were rather jealous of Wayne's continued preparations for war, hence, just before setting out for the Maumee, the commissioners sent a letter to the Secretary of War, asking that all warlike demonstrations cease until the result of their mission be known.

On 21st of July, the embassy reached the head of the Detroit River, where their advance was checked by the British authorities at Detroit, compelling them to take up their abode at the house of Andrew Elliott, the famous renegade, then a British agent under Alexander McKee. McKee was attending the council, and the commissioners addressed him a note, borne by Elliott, to inform him of their arrival, and asking when they could be received. Elliott returned on the 29th, bringing with him a deputation of twenty chiefs from the council. The next day, a conference was held, and the chief of the Wyandots, Sa-wagh-da-wunk, presented to the commissioners, in writing, their explicit demand in regard to the boundary, and their purposes and powers. "The Ohio must be the boundary," said he, "or blood will flow."

The commissioners returned an answer to the proposition brought by the chiefs, recapitulating the treaties already made, and denying the Ohio as the boundary line. On the 16th of August, the council sent them, by two Wyandot runners, a final answer, in which they recapitulated their

former assertions, and exhibited great powers of reasoning and clear logic in defense of their position. The commissioners reply that it is impossible to accept the Ohio as the boundary, and declare the negotiation at an end.

This closed the efforts of the Government to negotiate with the Indians, and there remained of necessity no other mode of settling the dispute but war. Liberal terms had been offered them, but nothing but the boundary of the Ohio River would suffice. It was the only condition upon which the confederation would lay down its arms. "Among the rude statesmen of the wilderness, there was exhibited as pure patriotism and as lofty devotion to the good of their race, as ever won applause among civilized men. The white man had, ever since he came into the country, been encroaching on their lands. He had long occupied the regions beyond the mountains. He had crushed the conspiracy formed by Pontiac, thirty years before. He had taken possession of the common hunting-ground of all the tribes, on the faith of treaties they did not acknowledge. He was now laying out settlements and building forts in the heart of the country to which all the tribes had been driven, and which now was all they could call their own. And now they asked that it should be guaranteed to them, that the boundary which they had so long asked for should be drawn, and a final end be made to the continual aggressions of the whites; or, if not, they solemnly determined to stake their all, against fearful odds, in defense of their homes, their country and the inheritance of their children. Nothing could be more patriotic than the position they occupied, and nothing could be more noble than the declarations of their council."*

They did not know the strength of the whites, and based their success on the victories already gained. They hoped, nay, were promised, aid from the British, and even the Spanish had held out to them assurances of help when the hour of conflict came.

The Americans were not disposed to yield even to the confederacy of the tribes backed by the two rival nations, forming, as Wayne characterized it, a "hydra of British, Spanish and Indian hostility." On the 16th of August, the commissioners received the final answer of the council. The 17th, they left the mouth of the Detroit River, and the 23d, arrived at Fort Erie, where they immediately

dispatched messengers to Gen. Wayne to inform him of the issue of the negotiation. Wayne had spent the winter of 1792-93, at Legionville, in collecting and organizing his army. April 30, 1793, the army moved down the river and encamped at a point, called by the soldiers "Hobson's choice," because from the extreme height of the river they were prevented from landing elsewhere. Here Wayne was engaged, during the negotiations for peace, in drilling his soldiers, in cutting roads, and collecting supplies for the army. He was ready for an immediate campaign in case the council failed in its object.

While here, he sent a letter to the Secretary of War, detailing the circumstances, and suggesting the probable course he should follow. He remained here during the summer, and, when apprised of the issue, saw it was too late to attempt the campaign then. He sent the Kentucky militia home, and, with his regular soldiers, went into winter quarters at a fort he built on a tributary of the Great Miami. He called the fort Greenville. The present town of Greenville is near the site of the fort. During the winter, he sent a detachment to visit the scene of St. Clair's defeat. They found more than six hundred skulls, and were obliged to "scrape the bones together and carry them out to get a place to make their beds." They buried all they could find. Wayne was steadily preparing his forces, so as to have everything ready for a sure blow when the time came. All his information showed the faith in the British which still animated the doomed red men, and gave them a hope that could end only in defeat.

The conduct of the Indians fully corroborated the statements received by Gen. Wayne. On the 30th of June, an escort of ninety riflemen and fifty dragoons, under command of Maj. McMahon, was attacked under the walls of Fort Recovery by a force of more than one thousand Indians under charge of Little Turtle. They were repulsed and badly defeated, and, the next day, driven away. Their mode of action, their arms and ammunition, all told plainly of British aid. They also expected to find the cannon lost by St. Clair November 4, 1791, but which the Americans had secured. The 26th of July, Gen. Scott, with 1,600 mounted men from Kentucky, joined Gen. Wayne at Fort Greenville, and, two days after, the legion moved forward. The 8th of August, the army reached the junction of the Auglaize and Maumee, and at once proceeded to erect Fort Defiance, where the waters meet. The Indians had abandoned

* Annals of the West.

their towns on the approach of the army, and were congregating further northward.

While engaged on Fort Defiance, Wayne received continual and full reports of the Indians—of their aid from Detroit and elsewhere; of the nature of the ground, and the circumstances, favorable or unfavorable. From all he could learn, and considering the spirits of his army, now thoroughly disciplined, he determined to march forward and settle matters at once. Yet, true to his own instincts, and to the measures of peace so forcibly taught by Washington, he sent Christopher Miller, who had been naturalized among the Shawanees, and taken prisoner by Wayne's spies, as a messenger of peace, offering terms of friendship.

Unwilling to waste time, the troops began to move forward the 15th of August, and the next day met Miller with the message that if the Americans would wait ten days at Auglaize the Indians would decide for peace or war. Wayne knew too well the Indian character, and answered the message by simply marching on. The 18th, the legion had advanced forty-one miles from Auglaize, and, being near the long-looked-for foe, began to take some measures for protection, should they be attacked. A slight breastwork, called Fort Deposit, was erected, wherein most of their heavy baggage was placed. They remained here, building their works, until the 20th, when, storing their baggage, the army began again its march. After advancing about five miles, they met a large force of the enemy, two thousand strong, who fiercely attacked them. Wayne was, however, prepared, and in the short battle that ensued they were routed, and large numbers slain. The American loss was very slight. The horde of savages were put to flight, leaving the Americans victorious almost under the walls of the British garrison, under Maj. Campbell. This officer sent a letter to Gen. Wayne, asking an explanation of his conduct in fighting so near, and in such evident hostility to the British. Wayne replied, telling him he was in a country that did not belong to him, and one he was not authorized to hold, and also charging him with aiding the Indians. A spirited correspondence followed, which ended in the American commander marching on, and devastating the Indian country, even burning McKee's house and stores under the muzzles of the English guns.

The 14th of September, the army marched from Fort Defiance for the Miami village at the junction of the St. Mary's and St. Joseph Rivers. It

reached there on the 17th, and the next day Gen. Wayne selected a site for a fort. The 22d of October, the fort was completed, and garrisoned by a detachment under Maj. Hamtramck, who gave to it the name of Fort Wayne. The 14th of October, the mounted Kentucky volunteers, who had become dissatisfied and mutinous, were started to Fort Washington, where they were immediately mustered out of service and discharged. The 28th of October, the legion marched from Fort Wayne to Fort Greenville, where Gen. Wayne at once established his headquarters.

The campaign had been decisive and short, and had taught the Indians a severe lesson. The British, too, had failed them in their hour of need, and now they began to see they had a foe to contend whose resources were exhaustless. Under these circumstances, losing faith in the English, and at last impressed with a respect for American power, after the defeat experienced at the hands of the "Black Snake," the various tribes made up their minds, by degrees, to ask for peace. During the winter and spring, they exchanged prisoners, and made ready to meet Gen. Wayne at Greenville, in June, for the purpose of forming a definite treaty, as it had been agreed should be done by the preliminaries of January 24.

During the month of June, 1795, representatives of the Northwestern tribes began to gather at Greenville, and, the 16th of the month, Gen. Wayne met in council the Delawares, Ottawas, Pottawatomies and Eel River Indians, and the conferences, which lasted till August 10, began. The 21st of June, Buckongahelas arrived; the 23d, Little Turtle and other Miamis; the 13th of July, Tarhe and other Wyandot chiefs; and the 18th, Blue Jacket, and thirteen Shawanees and Massas with twenty Chippewas.

Most of these, as it appeared by their statements, had been tampered with by the English, especially by McKee, Girty and Brant, even after the preliminaries of January 24, and while Mr. Jay was perfecting his treaty. They had, however, all determined to make peace with the "Thirteen Fires," and although some difficulty as to the ownership of the lands to be ceded, at one time seemed likely to arise, the good sense of Wayne and the leading chiefs prevented it, and, the 30th of July, the treaty was agreed to which should bury the hatchet forever. Between that day and the 3d of August, it was engrossed, and, having been signed by the various nations upon the day last named, it was finally acted upon the 7th, and the presents from

the United States distributed. The basis of this treaty was the previous one made at Fort Harmar. The boundaries made at that time were re-affirmed; the whites were secured on the lands now occupied by them or secured by former treaties; and among all the assembled nations, presents, in value not less than one thousand pounds, were distributed to each through its representatives, many thousands in all. The Indians were allowed to remove and

punish intruders on their lands, and were permitted to hunt on the ceded lands.

"This great and abiding peace document was signed by the various tribes, and dated August 3, 1795. It was laid before the Senate December 9, and ratified the 22d. So closed the old Indian wars in the West."*

* *Annals of the West.*"

CHAPTER VIII.

JAY'S TREATY—THE QUESTION OF STATE RIGHTS AND NATIONAL SUPREMACY—EXTENSION OF OHIO SETTLEMENTS—LAND CLAIMS—SPANISH BOUNDARY QUESTION.

WHILE these six years of Indian wars were in progress, Kentucky was admitted as a State, and Pinckney's treaty with Spain was completed. This last occurrence was of vital importance to the West, as it secured the free navigation of the Mississippi, charging only a fair price for the storage of goods at Spanish ports. This, though not all that the Americans wished, was a great gain in their favor, and did much to stop those agitations regarding a separation on the part of Kentucky. It also quieted affairs further south than Kentucky, in the Georgia and South Carolina Territory, and put an end to French and Spanish intrigue for the Western Territory. The treaty was signed November 24, 1794. Another treaty was concluded by Mr. John Jay between the two governments, Lord Greenville representing the English, and Mr. Jay, the Americans. The negotiations lasted from April to November 19, 1795, when, on that day, the treaty was signed and duly recognized. It decided effectually all the questions at issue, and was the signal for the removal of the British troops from the Northwestern outposts. This was effected as soon as the proper transfers could be made. The second article of the treaty provided that, "His Majesty will withdraw all his troops and garrisons from all posts and places within the boundary lines assigned by the treaty of peace to the United States. This evacuation shall take place on or before the 1st day of June, 1796, and all the proper measures shall be taken, in the interval, by concert, between the Government of the United States and His Majesty's Governor General in America, for settling the previous arrangements

which may be necessary respecting the delivery of the said posts; the United States, in the mean time, at their discretion, extending their settlements to any part within the said boundary line, except within the precincts or jurisdiction of any of the said posts.

"All settlers and all traders within the precincts or jurisdiction of the said posts shall continue to enjoy, unmolested, all their property of every kind, and shall be protected therein. They shall be at full liberty to remain there or to remove with all, or any part, of their effects, or retain the property thereof at their discretion; such of them as shall continue to reside within the said boundary lines, shall not be compelled to become citizens of the United States, or take any oath of allegiance to the Government thereof; but they shall be at full liberty so to do, if they think proper; they shall make or declare their election one year after the evacuation aforesaid. And all persons who shall continue therein after the expiration of the said year, without having declared their intention of remaining subjects to His Britannic Majesty, shall be considered as having elected to become citizens of the United States."

The Indian war had settled all fears from that source; the treaty with Great Britain had established the boundaries between the two countries and secured peace, and the treaty with Spain had secured the privilege of navigating the Mississippi, by paying only a nominal sum. It had also bound the people of the West together, and ended the old separation question. There was no danger from that now. Another difficulty arose, however, relating to the home rule, and the organization of

the home government. There were two parties in the country, known as Federalist and Anti-Federalist. One favored a central government, whose authority should be supreme; the other, only a compact, leaving the States supreme. The worthlessness of the old colonial system became, daily, more apparent. While it existed no one felt safe. There was no prospect of paying the debt, and, hence, no credit. When Mr. Hamilton, Secretary of the Treasury, offered his financial plan to the country, favoring centralization, it met, in many places, violent opposition. Washington was strong enough to carry it out, and gave evidence that he would do so. When, therefore, the excise law passed, and taxes on whisky were collected, an open revolt occurred in Pennsylvania, known as the "Whisky Insurrection." It was put down, finally, by military power, and the malcontents made to know that the United States was a government, not a compact liable to rupture at any time, and by any of its members. It taught the entire nation a lesson. Centralization meant preservation. Should a "compact" form of government prevail, then anarchy and ruin, and ultimate subjection to some foreign power, met their view. That they had just fought to dispel, and must it all go for naught? The people saw the rulers were right, and gradually, over the West, spread a spirit antagonistic to State supremacy. It did not revive till Jackson's time, when he, with an iron hand and iron will, crushed out the evil doctrine of State supremacy. It revived again in the late war, again to be crushed. It is to be hoped that ever thus will be its fate. "The Union is inseparable," said the Government, and the people echoed the words.

During the war, and while all these events had been transpiring, settlements had been taking place upon the Ohio, which, in their influence upon the Northwest, and especially upon the State, as soon as it was created, were deeply felt. The Virginia and the Connecticut Reserves were at this time peopled, and, also, that part of the Miami Valley about Dayton, which city dates its origin from that period.

As early as 1787, the reserved lands of the Old Dominion north of the Ohio were examined, and, in August of that year, entries were made. As no good title could be obtained from Congress at this time, the settlement practically ceased until 1790, when the prohibition to enter them was withdrawn. As soon as that was done, surveying began again. Nathaniel Massie was among the

foremost men in the survey of this tract, and locating the lands, laid off a town about twelve miles above Maysville. The place was called Manchester, and yet exists. From this point, Massie continued through all the Indian war, despite the danger, to survey the surrounding country, and prepare it for settlers.

Connecticut had, as has been stated, ceded her lands, save a tract extending one hundred and twenty miles beyond the western boundary of Pennsylvania. Of this Connecticut Reserve, so far as the Indian title was extinguished, a survey was ordered in October, 1786, and an office opened for its disposal. Part was soon sold, and, in 1792, half a million of acres were given to those citizens of Connecticut who had lost property by the acts of the British troops during the Revolutionary war at New London, New Haven and elsewhere. These lands thereby became known as "Fire lands" and the "Sufferer's lands," and were located in the western part of the Reserve. In May, 1795, the Connecticut Legislature authorized a committee to dispose of the remainder of the Reserve. Before autumn the committee sold it to a company known as the Connecticut Land Company for \$1,200,000, and about the 5th of September quit-claimed the land to the Company. The same day the Company received it, it sold 3,000,000 acres to John Morgan, John Caldwell and Jonathan Brace, in trust. Upon these quit-claim titles of the land all deeds in the Reserve are based. Surveys were commenced in 1796, and, by the close of the next year, all the land east of the Cuyahoga was divided into townships five miles square. The agent of the Connecticut Land Company was Gen. Moses Cleveland, and in his honor the leading city of the Reserve was named. That township and five others were reserved for private sale; the balance were disposed of by lottery, the first drawing occurring in February, 1798.

Dayton resulted from the treaty made by Wayne. It came out of the boundary ascribed to Symmes, and for a while all such lands were not recognized as sold by Congress, owing to the failure of Symmes and his associates in paying for them. Thereby there existed, for a time, considerable uneasiness regarding the title to these lands. In 1799, Congress was induced to issue patents to the actual settlers, and thus secure them in their pre-emption.

Seventeen days after Wayne's treaty, St. Clair's Wilkinson, Jonathan Dayton and Israel Ludlow contracted with Symmes for the seventh and eighth

ranges, between Mad River and the Little Miami. Three settlements were to be made: one at the mouth of Mad River, one on the Little Miami, in the seventh range, and another on Mad River. On the 21st of September, 1795, Daniel C. Cooper started to survey and mark out a road in the purchase, and John Dunlap to run its boundaries, which was completed before October 4. On November 4, Mr. Ludlow laid off the town of Dayton, which, like land in the Connecticut Reserve, was sold by lottery.

A gigantic scheme to purchase eighteen or twenty million acres in Michigan, and then procure a good title from the Government—who alone had such a right to procure land—by giving members of Congress an interest in the investment, appeared shortly after Wayne's treaty. When some of the members were approached, however, the real spirit of the scheme appeared, and, instead of gaining ground, led to the exposure, resulting in the reprimanding severely of Robert Randall, the principal mover in the whole plan, and in its speedy disappearance.

Another enterprise, equally gigantic, also appeared. It was, however, legitimate, and hence successful. On the 20th of February, 1795, the North American Land Company was formed in Philadelphia, under the management of such patriots as Robert Morris, John Nicholson and James Greenleaf. This Company purchased large tracts in the West, which it disposed of to actual settlers, and thereby aided greatly in populating that part of the country.

Before the close of 1795, the Governor of the Territory, and his Judges, published sixty-four statutes. Thirty-four of these were adopted at Cincinnati during June, July and August of that year. They were known as the Maxwell code, from the name of the publisher, but were passed by Governor St. Clair and Judges Symmes and Turner. Among them was that which provided that the common law of England, and all its statutes, made previous to the fourth year of James the First, should be in full force within the Territory. "Of the system as a whole," says Mr. Case, "with its many imperfections, it may be doubted that any colony, at so early a period after its first establishment, ever had one so good and applicable to all."

The Union had now safely passed through its most critical period after the close of the war of independence. The danger from an irruption of its own members; of a war or alliance of its West-

ern portion with France and Spain, and many other perplexing questions, were now effectually settled, and the population of the Territory began rapidly to increase. Before the close of the year 1796, the Northwest contained over five thousand inhabitants, the requisite number to entitle it to one representative in the national Congress.

Western Pennsylvania also, despite the various conflicting claims regarding the land titles in that part of the State, began rapidly to fill with emigrants. The "Triangle" and the "Struck District" were surveyed and put upon the market under the act of 1792. Treaties and purchases from the various Indian tribes, obtained control of the remainder of the lands in that part of the State, and, by 1796, the State owned all the land within its boundaries. Towns were laid off, land put upon the market, so that by the year 1800, the western part of the Keystone State was divided into eight counties, viz., Beaver, Butler, Mercer, Crawford, Erie, Warren, Venango and Armstrong.

The ordinance relative to the survey and disposal of lands in the Northwest Territory has already been given. It was adhered to, save in minor cases, where necessity required a slight change. The reservations were recognized by Congress, and the titles to them all confirmed to the grantees. Thus, Clarke and his men, the Connecticut Reserve, the Refugee lands, the French inhabitants, and all others holding patents to land from colonial or foreign governments, were all confirmed in their rights and protected in their titles.

Before the close of 1796, the upper Northwestern posts were all vacated by the British, under the terms of Mr. Jay's treaty. Wayne at once transferred his headquarters to Detroit, where a county was named for him, including the northwestern part of Ohio, the northeast of Indiana, and the whole of Michigan.

The occupation of the Territory by the Americans gave additional impulse to emigration, and a better feeling of security to emigrants, who followed closely upon the path of the army. Nathaniel Massie, who has already been noticed as the founder of Manchester, laid out the town of Chillicothe, on the Scioto, in 1796. Before the close of the year, it contained several stores, shops, a tavern, and was well populated. With the increase of settlement and the security guaranteed by the treaty of Greenville, the arts of civilized life began to appear, and their influence upon pioneers, especially those born on the frontier,

began to manifest itself. Better dwellings, schools, churches, dress and manners prevailed. Life began to assume a reality, and lost much of that recklessness engendered by the habits of a frontier life.

Cleveland, Cincinnati, the Miami, the Muskingum and the Scioto Valleys were filling with people. Cincinnati had more than one hundred log cabins, twelve or fifteen frame houses and a population of more than six hundred persons. In 1796, the first house of worship for the Presbyterians in that city was built.

Before the close of the same year, Manchester contained over thirty families; emigrants from Virginia were going up all the valleys from the Ohio; and Ebenezer Zane had opened a bridle-path from the Ohio River, at Wheeling, across the country, by Chillicothe, to Limestone, Ky. The next year, the United States mail, for the first time, traversed this route to the West. Zane was given a section of land for his path. The population of the Territory, estimated at from five to eight thousand, was chiefly distributed in lower valleys, bordering on the Ohio River. The French still occupied the Illinois country, and were the principal inhabitants about Detroit.

South of the Ohio River, Kentucky was progressing favorably, while the "Southwestern Territory," ceded to the United States by North Carolina in 1790, had so rapidly populated that, in 1793, a Territorial form of government was allowed. The ordinance of 1787, save the clause prohibiting slavery, was adopted, and the Territory named Tennessee. On June 6, 1796, the Territory contained more than seventy-five thousand inhabitants, and was admitted into the Union as a State. Four years after, the census showed a population of 105,602 souls, including 13,584 slaves and persons of color. The same year Tennessee became a State, Samuel Jackson and Jonathan Sharpless erected the Redstone Paper Mill, four miles east of Brownsville, it being the first manufactory of the kind west of the Alleghanies.

In the month of December, 1796, Gen. Wayne, who had done so much for the development of the West, while on his way from Detroit to Philadelphia, was attacked with sickness and died in a cabin near Erie, in the north part of Pennsylvania. He was nearly fifty-one years old, and was one of

the bravest officers in the Revolutionary war, and one of America's truest patriots. In 1809, his remains were removed from Erie, by his son, Col. Isaac Wayne, to the Radnor churchyard, near the place of his birth, and an elegant monument erected on his tomb by the Pennsylvania Cincinnati Society.

After the death of Wayne, Gen. Wilkinson was appointed to the command of the Western army. While he was in command, Carondelet, the Spanish governor of West Florida and Louisiana, made one more effort to separate the Union, and set up either an independent government in the West, or, what was more in accord with his wishes, effect a union with the Spanish nation. In June, 1797, he sent Power again into the Northwest and into Kentucky to sound the existing feeling. Now, however, they were not easily won over. The home government was a certainty, the breaches had been healed, and Power was compelled to abandon the mission, not, however, until he had received a severe reprimand from many who saw through his plan, and openly exposed it. His mission closed the efforts of the Spanish authorities to attempt the dismemberment of the Union, and showed them the coming downfall of their power in America. They were obliged to surrender the posts claimed by the United States under the treaty of 1795, and not many years after, sold their American possessions to the United States, rather than see a rival European power attain control over them.

On the 7th of April, 1798, Congress passed an act, appointing Winthrop Sargent, Secretary of the Northwest Territory, Governor of the Territory of the Mississippi, formed the same day. In 1801, the boundary between America and the Spanish possessions was definitely fixed. The Spanish retired from the disputed territory, and henceforward their attempts to dissolve the American Union ceased. The seat of the Mississippi Territory was fixed at Loftus Heights, six miles north of the thirty-first degree of latitude.

The appointment of Sargent to the charge of the Southwest Territory, led to the choice of William Henry Harrison, who had been aid-de-camp to Gen. Wayne in 1794, and whose character stood very high among the people of the West, to the Secretaryship of the Northwest, which place he held until appointed to represent that Territory in Congress.

CHAPTER IX.

FIRST TERRITORIAL REPRESENTATIVES IN CONGRESS—DIVISION OF THE TERRITORY—FORMATION OF STATES—MARIETTA SETTLEMENT—OTHER SETTLEMENTS—SETTLEMENTS IN THE WESTERN RESERVE—SETTLEMENT OF THE CENTRAL VALLEYS—FURTHER SETTLEMENTS IN THE RESERVE AND ELSEWHERE.

THE ordinance of 1787 provided that as soon as there were 5,000 persons in the Territory, it was entitled to a representative assembly. On October 29, 1798, Governor St. Clair gave notice by proclamation, that the required population existed, and directed that an election be held on the third Monday in December, to choose representatives. These representatives were required, when assembled, to nominate ten persons, whose names were sent to the President of the United States, who selected five, and with the advice and consent of the Senate, appointed them for the legislative council. In this mode the Northwest passed into the second grade of a Territorial government.

The representatives, elected under the proclamation of St. Clair, met in Cincinnati, January 22, 1799, and under the provisions of the ordinance of 1787, nominated ten persons, whose names were sent to the President. On the 2d of March, he selected from the list of candidates, the names of Jacob Burnet, James Findlay, Henry Vanderburgh, Robert Oliver and David Vance. The next day the Senate confirmed their nomination, and the first legislative council of the Northwest Territory was a reality.

The Territorial Legislature met again at Cincinnati, September 16, but, for want of a quorum, was not organized until the 24th of that month. The House of Representatives consisted of nineteen members, of whom seven were from Hamilton County, four from Ross—erected by St. Clair in 1798; three from Wayne—erected in 1796; two from Adams—erected in 1797; one from Jefferson—erected in 1797; one from Washington—erected in 1788; and one from Knox—Indiana Territory. None seem to have been present from St. Clair County (Illinois Territory).

After the organization of the Legislature, Governor St. Clair addressed the two houses in the Representatives' Chamber, recommending such measures as, in his judgment, were suited to the condition of the country and would advance the safety and prosperity of the people.

The Legislature continued in session till the 19th of December, when, having finished their business, they were prorogued by the Governor, by their own request, till the first Monday in November, 1800. This being the first session, there was, of necessity, a great deal of business to do. The transition from a colonial to a semi-independent form of government, called for a general revision as well as a considerable enlargement of the statute-book. Some of the adopted laws were repealed, many others altered and amended, and a long list of new ones added to the code. New offices were to be created and filled, the duties attached to them prescribed, and a plan of ways and means devised to meet the increased expenditures, occasioned by the change which had now occurred.

As Mr. Burnet was the principal lawyer in the Council, much of the revision, and putting the laws into proper legal form, devolved upon him. He seems to have been well fitted for the place, and to have performed the laborious task in an excellent manner.

The whole number of acts passed and approved by the Governor, was thirty-seven. The most important related to the militia, the administration of justice, and to taxation. During the session, a bill authorizing a lottery was passed by the council, but rejected by the Legislature, thus interdicting this demoralizing feature of the disposal of lands or for other purposes. The example has always been followed by subsequent legislatures, thus honorably characterizing the Assembly of Ohio, in this respect, an example Kentucky and several other States might well emulate.

Before the Assembly adjourned, they issued a congratulatory address to the people, enjoining them to "Inculcate the principles of humanity, benevolence, honesty and punctuality in dealing, sincerity and charity, and all the social affections." At the same time, they issued an address to the President, expressing entire confidence in the wisdom and purity of his government, and their warm attachment to the American Constitution.

The vote on this address proved, however, that the differences of opinion agitating the Eastern States had penetrated the West. Eleven Representatives voted for it, and five against it.

One of the important duties that devolved on this Legislature, was the election of a delegate to Congress. As soon as the Governor's proclamation made its appearance, the election of a person to fill that position excited general attention. Before the meeting of the Legislature public opinion had settled down on William Henry Harrison, and Arthur St. Clair, Jr., who eventually were the only candidates. On the 3d of October, the two houses met and proceeded to a choice. Eleven votes were cast for Harrison, and ten for St. Clair. The Legislature prescribed the form of a certificate of the election, which was given to Harrison, who at once resigned his office as Secretary of the Territory, proceeded to Philadelphia, and took his seat, Congress being then in session.

"Though he represented the Territory but one year," says Judge Burnett, in his notes, "he obtained some important advantages for his constituents. He introduced a resolution to sub-divide the surveys of the public lands, and to offer them for sale in smaller tracts; he succeeded in getting that measure through both houses, in opposition to the interest of speculators, who were, and who wished to be, the retailers of the land to the poorer classes of the community. His proposition became a law, and was hailed as the most beneficent act that Congress had ever done for the Territory. It put in the power of every industrious man, however poor, to become a freeholder, and to lay a foundation for the future support and comfort of his family. At the same session, he obtained a liberal extension of time for the pre-emptioners in the northern part of the Miami purchase, which enabled them to secure their farms, and eventually to become independent, and even wealthy."

The first session, as has been noticed, closed December 19. Gov. St. Clair took occasion to enumerate in his speech at the close of the session, eleven acts, to which he saw fit to apply his veto. These he had not, however, returned to the Assembly, and thereby saved a long struggle between the executive and legislative branches of the Territory. Of the eleven acts enumerated, six related to the formation of new counties. These were mainly disapproved by St. Clair, as he always sturdily maintained that the power to erect new counties was vested alone in the Executive. This free exercise of the veto power, especially in relation to new

counties, and his controversy with the Legislature, tended only to strengthen the popular discontent regarding the Governor, who was never fully able to regain the standing he held before his inglorious defeat in his campaign against the Indians.

While this was being agitated, another question came into prominence. Ultimately, it settled the powers of the two branches of the government, and caused the removal of St. Clair, then very distasteful to the people. The opening of the present century brought it fully before the people, who began to agitate it in all their assemblies.

The great extent of the Territory made the operations of government extremely uncertain, and the power of the courts practically worthless. Its division was, therefore, deemed best, and a committee was appointed by Congress to inquire into the matter. This committee, the 3d of March, 1800, reported upon the subject that, "In the three western counties, there has been but one court having cognizance of crimes in five years. The immunity which offenders experience, attracts, as to an asylum, the most vile and abandoned criminals, and, at the same time, deters useful and virtuous citizens from making settlements in such society. The extreme necessity of judiciary attention and assistance is experienced in civil as well as criminal cases. The supplying to vacant places such necessary officers as may be wanted, such as clerks, recorders and others of like kind, is, from the impossibility of correct notice and information, utterly neglected. This Territory is exposed as a frontier to foreign nations, whose agents can find sufficient interest in exciting or fomenting insurrection and discontent, as thereby they can more easily divert a valuable trade in furs from the United States, and also have a part thereof on which they border, which feels so little the cherishing hand of their proper government, or so little dreads its energy, as to render their attachment perfectly uncertain and ambiguous.

"The committee would further suggest, that the law of the 3d of March, 1791, granting land to certain persons in the western part of said Territory, and directing the laying-out of the same, remains unexecuted; that great discontent, in consequence of such neglect, is excited in those who are interested in the provisions of said laws, which require the immediate attention of this Legislature. To minister a remedy to these evils, it occurs to this committee, that it is expedient

that a division of said Territory into two distinct and separate governments should be made; and that such division be made by a line beginning at the mouth of the great Miami River, running directly north until it intersects the boundary between the United States and Canada."*

The recommendations of the committee were favorably received by Congress, and, the 7th of May, an act was passed dividing the Territory. The main provisions of the act are as follows:

"That, from and after the 4th of July next, all that part of the territory of the United States northwest of the Ohio River, which lies to the westward of a line beginning at the Ohio, opposite to the mouth of the Kentucky River, and running thence to Fort Recovery, and thence north until it intersects the territorial line between the United States and Canada, shall, for the purpose of temporary government, constitute a separate Territory, and be called the Indiana Territory.

"There shall be established within the said Territory a government, in all respects similar to that provided by the ordinance of Congress passed July 13, 1797."†

The act further provided for representatives, and for the establishment of an assembly, on the same plan as that in force in the Northwest, stipulating that until the number of inhabitants reached five thousand, the whole number of representatives to the General Assembly should not be less than seven, nor more than nine; apportioned by the Governor among the several counties in the new Territory.

The act further provided that "nothing in the act should be so construed, so as in any manner to affect the government now in force in the territory of the United States northwest of the Ohio River, further than to prohibit the exercise thereof within the Indiana Territory, from and after the aforesaid 4th of July next.

"Whenever that part of the territory of the United States, which lies to the eastward of a line beginning at the mouth of the Great Miami River, and running thence due north to the territorial line between the United States and Canada, shall be erected into an independent State, and admitted into the Union on an equal footing with the original States; thenceforth said line shall become and remain permanently, the boundary line between such State and the Indiana Territory."

It was further enacted, "that, until it shall be otherwise enacted by the legislatures of the said territories, respectively, Chillicothe, on the Scioto River, shall be the seat of government of the territory of the United States northwest of the Ohio River; and that St. Vincent's, on the Wabash River, shall be the seat of government for the Indiana Territory."*

St. Clair was continued as Governor of the old Territory, and William Henry Harrison appointed Governor of the new.

Connecticut, in ceding her territory in the West to the General Government, reserved a portion, known as the Connecticut Reserve. When she afterward disposed of her claim in the manner narrated, the citizens found themselves without any government on which to lean for support. At that time, settlements had begun in thirty-five of the townships into which the Reserve had been divided; one thousand persons had established homes there; mills had been built, and over seven hundred miles of roads opened. In 1800, the settlers petitioned for acceptance into the Union, as a part of the Northwest; and, the mother State releasing her judiciary claims, Congress accepted the trust, and granted the request. In December, of that year, the population had so increased that the county of Trumbull was erected, including the Reserve. Soon after, a large number of settlers came from Pennsylvania, from which State they had been driven by the dispute concerning land titles in its western part. Unwilling to cultivate land to which they could only get a doubtful deed, they abandoned it, and came where the titles were sure.

Congress having made Chillicothe the capital of the Northwest Territory, as it now existed, on the 3d of November the General Assembly met at that place. Gov. St. Clair had been made to feel the odium cast upon his previous acts, and, at the opening of this session, expressed, in strong terms, his disapprobation of the censure cast upon him. He had endeavored to do his duty in all cases, he said, and yet held the confidence of the President and Congress. He still held the office, notwithstanding the strong dislike against him.

At the second session of the Assembly, at Chillicothe, held in the autumn of 1801, so much outspoken enmity was expressed, and so much abuse heaped upon the Governor and the Assembly, that a law was passed, removing the capital to Cincinnati

* Land Laws.

again. It was not destined, however, that the Territorial Assembly should meet again anywhere. The unpopularity of the Governor caused many to long for a State government, where they could choose their own rulers. The unpopularity of St. Clair arose partly from the feeling connected with his defeat; in part from his being connected with the Federal party, fast falling into disrepute; and, in part, from his assuming powers which most thought he had no right to exercise, especially the power of subdividing the counties of the Territory.

The opposition, though powerful out of the Assembly, was in the minority there. During the month of December, 1801, it was forced to protest against a measure brought forward in the Council, for changing the ordinance of 1787 in such a manner as to make the Scioto, and a line drawn from the intersection of that river and the Indian boundary to the western extremity of the Reserve, the limits of the most eastern State, to be formed from the Territory. Had this change been made, the formation of a State government beyond the Ohio would have been long delayed. Against it, Representatives Worthington, Langham, Darlington, Massie, Dunlavy and Morrow, recorded their protest. Not content with this, they sent Thomas Worthington, who obtained a leave of absence, to the seat of government, on behalf of the objectors, there to protest, before Congress, against the proposed boundary. While Worthington was on his way, Massie presented, the 4th of January, 1802, a resolution for choosing a committee to address Congress in respect to the proposed State government. This, the next day, the House refused to do, by a vote of twelve to five. An attempt was next made to procure a census of the Territory, and an act for that purpose passed the House, but the Council postponed the consideration of it until the next session, which would commence at Cincinnati, the fourth Monday of November.

Meanwhile, Worthington pursued the ends of his mission, using his influence to effect that organization, "which, terminating the influence of tyranny," was to "meliorate the circumstances of thousands, by freeing them from the domination of a despotic chief." His efforts were successful, and, the 4th of March, a report was made to the House in favor of authorizing a State convention. This report was based on the assumption that there were now over sixty thousand inhabitants in the proposed boundaries, estimating that emigration had

increased the census of 1800, which gave the Territory forty-five thousand inhabitants, to that number. The convention was to ascertain whether it were expedient to form such a government, and to prepare a constitution if such organization were deemed best. In the formation of the State, a change in the boundaries was proposed, by which all the territory north of a line drawn due east from the head of Lake Michigan to Lake Erie was to be excluded from the new government about to be called into existence.

The committee appointed by Congress to report upon the feasibility of forming the State, suggested that Congress reserve out of every township sections numbered 8, 11, 26 and 29, for their own use, and that Section 16 be reserved for the maintenance of schools. The committee also suggested, that, "religion, education and morality being necessary to the good government and happiness of mankind, schools and the means of education shall be forever encouraged."

Various other recommendations were given by the committee, in accordance with which, Congress, April 30, passed the resolution authorizing the calling of a convention. As this accorded with the feelings of the majority of the inhabitants of the Northwest, no opposition was experienced; even the Legislature giving way to this embryo government, and failing to assemble according to adjournment.

The convention met the 1st of November. Its members were generally Jeffersonian in their national politics, and had been opposed to the change of boundaries proposed the year before. Before proceeding to business, Gov. St. Clair proposed to address them in his official character. This proposition was resisted by several of the members; but, after a motion, it was agreed to allow him to speak to them as a citizen. St. Clair did so, advising the postponement of a State government until the people of the original eastern division were plainly entitled to demand it, and were not subject to be bound by conditions. This advice, given as it was, caused Jefferson instantly to remove St. Clair, at which time his office ceased.* "When the vote was taken," says Judge Burnet, "upon doing what

* After this, St. Clair returned to his old home in the Ligonier Valley, Pennsylvania, where he lived with his children in almost abject poverty. He had lost money in his public life, as he gave close attention to public affairs, to the detriment of his own business. He presented a claim to Congress, afterward, for supplies furnished to the army, but the claim was outlawed. After trying in vain to get the claim allowed, he returned to his home. Pennsylvania, learning of his distress, granted him an annuity of \$350, afterward raised to \$690. He lived to enjoy this but a short time, his death occurring August 31, 1818. He was eighty-four years of age.

he advised them not to do, but one of thirty-three (Ephraim Cutler, of Washington County) voted with the Governor."

On one point only were the proposed boundaries of the new State altered.

"To every person who has attended to this subject, and who has consulted the maps of the Western country extant at the time the ordinance of 1787 was passed, Lake Michigan was believed to be, and was represented by all the maps of that day as being, very far north of the position which it has since been ascertained to occupy. I have seen the map in the Department of State which was before the committee of Congress who framed and reported the ordinance for the government of the Territory. On that map, the southern boundary of Michigan was represented as being above the forty-second degree of north latitude. And there was a pencil line, said to have been made by the committee, passing through the southern bend of the lake to the Canada line, which struck the strait not far below the town of Detroit. The line was manifestly intended by the committee and by Congress to be the northern boundary of our State; and, on the principles by which courts of chancery construe contracts, accompanied by plats, it would seem that the map, and the line referred to, should be conclusive evidence of our boundary, without reference to the real position of the lakes.

"When the convention sat, in 1802, the understanding was, that the old maps were nearly correct, and that the line, as defined in the ordinance, would terminate at some point on the strait above the Maumee Bay. While the convention was in session, a man who had hunted many years on Lake Michigan, and was well acquainted with its position, happened to be in Chillicothe, and, in conversation with one of the members, told him that the lake extended much farther south than was generally supposed, and that a map of the country which he had seen, placed its southern bend many miles north of its true position. This information excited some uneasiness, and induced the convention to modify the clause describing the north boundary of the new State, so as to guard against its being depressed below the most northern cape of the Maumee Bay."*

With this change and some extension of the school and road donations, the convention agreed to the proposal of Congress, and, November 29,

their agreement was ratified and signed, as was also the constitution of the State of Ohio—so named from its river, called by the Shawannces Ohio, meaning beautiful—forming its southern boundary. Of this nothing need be said, save that it bore the marks of true democratic feeling—of full faith in the people. By them, however, it was never voted for. It stood firm until 1852, when it was superseded by the present one, made necessary by the advance of time.

The General Assembly was required to meet at Chillicothe, the first Tuesday of March, 1803. This change left the territory northwest of the Ohio River, not included in the new State, in the Territories of Indiana and Michigan. Subsequently, in 1816, Indiana was made a State, and confined to her present limits. Illinois was made a Territory then, including Wisconsin. In 1818, it became a State, and Wisconsin a Territory attached to Michigan. This latter was made a State in 1837, and Wisconsin a separate Territory, which, in 1847, was made a State. Minnesota was made a Territory the same year, and a State in 1857, and the five contemplated States of the territory were complete.

Preceding pages have shown how the territory north of the Ohio River was peopled by the French and English, and how it came under the rule of the American people. The war of the Revolution closed in 1783, and left all America in the hands of a new nation. That nation brought a change. Before the war, various attempts had been made by residents in New England to people the country west of the Alleghanies. Land companies were formed, principal among which were the Ohio Company, and the company of which John Cleves Symmes was the agent and chief owner. Large tracts of land on the Scioto and on the Ohio were entered. The Ohio Company were the first to make a settlement. It was organized in the autumn of 1787, November 27. They made arrangements for a party of forty-seven men to set out for the West under the supervision of Gen. Rufus Putnam, Superintendent of the Company. Early in the winter they advanced to the Youghiogheny River, and there built a strong boat, which they named "Mayflower." It was built by Capt. Jonathan Devol, the first ship-builder in the West, and, when completed, was placed under his command. The boat was launched April 2, 1788, and the band of pioneers, like the Pilgrim Fathers, began their voyage. The 7th of the month, they arrived at the mouth of the Muskingum,

* Historical Transactions of Ohio.—JUDGE BURNETT.

their destination, opposite Fort Harmar,* erected in the autumn of 1785, by a detachment of United States troops, under command of Maj. John Doughty, and, at the date of the Mayflower's arrival in possession of a company of soldiers. Under the protection of these troops, the little band of men began their labor of laying out a town, and commenced to erect houses for their own and subsequent emigrants' occupation. The names of these pioneers of Ohio, as far as can now be learned, are as follows:

Gen. Putnam, Return Jonathan Meigs, Winthrop Sargeant (Secretary of the Territory), Judges Parsons and Varnum, Capt. Dana, Capt. Jonathan Devol, Joseph Barker, Col. Battelle, Maj. Tyler, Dr. True, Capt. Wm. Gray, Capt. Lunt, the Bridges, Ebenezer and Thomas Cory, Andrew McClure, Wm. Mason, Thomas Lord, Wm. Gridley, Gilbert Devol, Moody Russels, Deavens, Oakes, Wright, Clough, Green, Shipman, Doranee, the Masons, and others, whose names are now beyond recall.

On the 19th of July, the first boat of families arrived, after a nine-weeks journey on the way. They had traveled in their wagons as far as Wheeling, where they built large flat-boats, into which they loaded their effects, including their cattle, and thence passed down the Ohio to their destination. The families were those of Gen. Tupper, Col. Ichabod Nye, Col. Cushing, Maj. Coburn, and Maj. Goodale. In these titles the reader will observe the preponderance of military distinction. Many of the founders of the colony had served with much valor in the war for freedom, and were well prepared for a life in the wilderness.

They began at once the construction of houses from the forests about the confluence of the rivers, guarding their stock by day and penning it by night. Wolves, bears and Indians were all about them, and, here in the remote wilderness, they were obliged to always be on their guard. From the ground where they obtained the timber to erect their houses, they soon produced a few vegetables, and when the families arrived in August, they were able to set before them food raised for the

*The outlines of Fort Harmar formed a regular pentagon, embracing within the area about three-fourths of an acre. Its walls were formed of large horizontal timbers, and the bastions of large upright timbers about fourteen feet in height, fastened to each other by strips of timber, tree-nailed into each picket. In the rear of the fort Maj. Doughty laid out fine gardens. It continued to be occupied by United States troops until September 1790, when they were ordered to Cincinnati. A company, under Capt. Haskell, continued to make the fort their headquarters during the Indian war, occasionally assisting the colonists at Marietta, Belpre and Waterford against the Indians. When not needed by the troops, the fort was used by the people of Marietta.

first time by the hand of American citizens in the Ohio Valley. One of those who came in August, was Mr. Thomas Guthrie, a settler in one of the western counties of Pennsylvania, who brought a bushel of wheat, which he sowed on a plat of ground cleared by himself, and from which that fall he procured a small crop of wheat, the first grown in the State of Ohio.

The Marietta settlement was the only one made that summer in the Territory. From their arrival until October, when Governor St. Clair came, they were busily employed making houses, and preparing for the winter. The little colony, of which Washington wrote so favorably, met on the 2d day of July, to name their newborn city and its public squares. Until now it had been known as "The Muskingum" simply, but on that day the name Marietta was formally given to it, in honor of Marie Antoinette. The 4th of July, an ovation was held, and an oration delivered by James M. Varnum, who, with S. H. Parsons and John Armstrong, had been appointed Judges of the Territory. Thus, in the heart of the wilderness, miles away from any kindred post, in the forests of the Great West, was the Tree of Liberty watered and given a hearty growth.

On the morning of the 9th of July, Governor St. Clair arrived, and the colony began to assume form. The ordinance of 1787 had provided for a form of government under the Governor and the three Judges, and this form was at once put into force. The 25th, the first law relating to the militia was published, and the next day the Governor's proclamation appeared, creating all the country that had been ceded by the Indians, east of the Scioto River, into the county of Washington, and the civil machinery was in motion. From that time forward, this, the pioneer settlement in Ohio, went on prosperously. The 2d of September, the first court in the Territory was held, but as it related to the Territory, a narrative of its proceedings will be found in the history of that part of the country, and need not be repeated here.

The 15th of July, Gov. St. Clair had published the ordinance of 1787, and the commissions of himself and the three Judges. He also assembled the people of the settlement, and explained to them the ordinance in a speech of considerable length. Three days after, he sent a notice to the Judges, calling their attention to the subject of organizing the militia. Instead of attending to this important matter, and thus providing for their safety should trouble with the Indians arise, the

Judges did not even reply to the Governor's letter, but sent him what they called a "project" of a law for dividing real estate. The bill was so loosely drawn that St. Clair immediately rejected it, and set about organizing the militia himself. He divided the militia into two classes, "Senior" and "Junior," and organized them by appointing their officers.

In the Senior Class, Nathan Cushing was appointed Captain; George Ingersol, Lieutenant, and James Backus, Ensign.

In the Junior Class, Nathan Goodale and Charles Knowles were made Captains; Watson Casey and Samuel Stebbins, Lieutenants, and Joseph Lincoln and Arnold Colt, Ensigns.

The Governor next erected the Courts of Probate and Quarter Sessions, and proceeded to appoint civil officers. Rufus Putnam, Benjamin Tupper and Winthrop Sargeant were made Justices of the Peace. The 30th of August, the day the Court of Quarter Sessions was appointed, Archibald Cary, Isaac Pierce and Thomas Lord were also appointed Justices, and given power to hold this court. They were, in fact, Judges of a Court of Common Pleas. Return Jonathan Meigs was appointed Clerk of this Court of Quarter Sessions. Ebenezer Sproat was appointed Sheriff of Washington County, and also Colonel of the militia; William Callis, Clerk of the Supreme Court; Rufus Putnam, Judge of the Probate Court, and R. J. Meigs, Jr., Clerk. Following these appointments, setting the machinery of government in motion, St. Clair ordered that the 25th of December be kept as a day of thanksgiving by the infant colony for its safe and propitious beginning.

During the fall and winter, the settlement was daily increased by emigrants, so much so, that the greatest difficulty was experienced in finding them lodging. During the coldest part of the winter, when ice covered the river, and prevented navigation, a delay in arrivals was experienced, only to be broken as soon as the river opened to the beams of a spring sun. While locked in the winter's embrace, the colonists amused themselves in various ways, dancing being one of the most prominent. At Christmas, a grand ball was held, at which there were fifteen ladies, "whose grace," says a narrator, "equaled any in the East." Though isolated in the wilderness, they knew a brilliant prospect lay before them, and lived on in a joyous hope for the future.

Soon after their arrival, the settlers began the erection of a stockade fort (Campus Martius),

which occupied their time until the winter of 1791. During the interval, fortunately, no hostilities from the Indians were experienced, though they were abundant, and were frequent visitors to the settlement.

From a communication in the *American Pioneer*, by Dr. S. P. Hildreth, the following description of Campus Martius is derived. As it will apply, in a measure, to many early structures for defense in the West, it is given entire:

"The fort was made in the form of a regular parallelogram, the sides of each being 180 feet. At each corner was erected a strong block-house, surmounted by a tower, and a sentry box. These houses were twenty feet square below and twenty-four feet square above, and projected six feet beyond the walls of the fort. The intermediate walls were made up with dwelling-houses, made of wood, whose ends were whip-sawed into timbers four inches thick, and of the requisite width and length. These were laid up similar to the structure of log houses, with the ends nicely dove-tailed together. The whole were two stories high, and covered with shingle roofs. Convenient chimneys were erected of bricks, for cooking, and warming the rooms. A number of the dwellings were built and owned by individuals who had families. In the west and south fronts were strong gateways; and over the one in the center of the front looking to the Muskingum River, was a belfry. The chamber beneath was occupied by Winthrop Sargeant, as an office, he being Secretary to the Governor, and performing the duties of the office during St. Clair's absence. This room projected over the gateway, like a block-house, and was intended for the protection of the gate beneath, in time of an assault. At the outer corner of each block-house was erected a bastion, standing on four stout timbers. The floor of the bastion was a little above the lower story of the block-house. They were square, and built up to the height of a man's head, so that, when he looked over, he stepped on a narrow platform or "banquet" running around the sides of the bulwark. Port-holes were made, for musketry as well as for artillery, a single piece of which was mounted in the southwest and northeast bastions. In these, the sentries were regularly posted every night, as more convenient than the towers; a door leading into them from the upper story of the block-houses. The lower room of the southwest block-house was occupied as a guard-house.

"Running from corner to corner of the block-houses was a row of palisades, sloping outward,

and resting on stout rails. Twenty feet in advance of these, was a row of very strong and large pickets, set upright in the earth. Gateways through these, admitted the inmates of the garrison. A few feet beyond the row of outer palisades was placed a row of abattis, made from the tops and branches of trees, sharpened and pointing outward, so that it would have been very difficult for an enemy to have penetrated within their outworks. The dwelling-houses occupied a space from fifteen to thirty feet each, and were sufficient for the accommodation of forty or fifty families, and did actually contain from two hundred to three hundred persons during the Indian war.

"Before the Indians commenced hostilities, the block-houses were occupied as follows: The southwest one, by the family of Gov. St. Clair; the northeast one as an office for the Directors of the Company. The area within the walls was one hundred and forty-four feet square, and afforded a fine parade ground. In the center, was a well eighty feet in depth, for the supply of water to the inhabitants, in case of a siege. A large sun-dial stood for many years in the square, placed on a handsome post, and gave note of the march of time.

"After the war commenced, a regular military corps was organized, and a guard constantly kept night and day. The whole establishment formed a very strong work, and reflected great credit on the head that planned it. It was in a manner impregnable to the attacks of Indians, and none but a regular army with cannon could have reduced it. The Indians possessed no such an armament.

"The garrison stood on the verge of that beautiful plain overlooking the Muskingum, on which are seated those celebrated remains of antiquity, erected probably for a similar purpose—the defense of the inhabitants. The ground descends into shallow ravines on the north and south sides; on the west is an abrupt descent to the river bottoms or alluvium, and the east passed out to a level plain. On this, the ground was cleared of trees beyond the reach of rifle shots, so as to afford no shelter to a hidden foe. Extensive fields of corn were grown in the midst of the standing girdled trees beyond, in after years. The front wall of palisades was about one hundred and fifty yards from the Muskingum River. The appearance of the fort from without was imposing, at a little distance resembling the military castles of the feudal ages. Between the outer palisades and the river were laid out neat gardens for the use of Gov. St. Clair

and his Secretary, with the officers of the Company.

"Opposite the fort, on the shore of the river, was built a substantial timber wharf, at which was moored a fine cedar barge for twelve rowers, built by Capt. Jonathan Devol, for Gen. Putnam; a number of pirogues, and the light canoes of the country; and last, not least, the Mayflower, or 'Adventure Galley,' in which the first detachments of colonists were transported from the shores of the 'Yohiogany' to the banks of the Muskingum. In these, especially the canoes, during the war, most of the communications were carried on between the settlements of the Company and the more remote towns above on the Ohio River. Traveling by land was very hazardous to any but the rangers or spies. There were no roads, nor bridges across the creeks, and, for many years after the war had ceased, the traveling was nearly all done by canoes on the river."

Thus the first settlement of Ohio provided for its safety and comfort, and provided also for that of emigrants who came to share the toils of the wilderness.

The next spring, the influx of emigration was so great that other settlements were determined, and hence arose the colonies of Belpre, Waterford and Duck Creek, where they began to clear land, sow and plant crops, and build houses and stockades. At Belpre (French for "beautiful meadow"), were built three stockades, the upper, lower and middle, the last of which was called "Farmers' Castle," and stood on the banks of the Ohio, nearly opposite an island, afterward famous in Western history as Blennerhasset's Island, the scene of Burr's conspiracy. Among the persons settling at the upper stockade, were Capts. Dana and Stone, Col. Bent, William Browning, Judge Foster, John Rowse, Israel Stone and a Mr. Keppel. At the Farmers' Castle, were Cols. Cushing and Fisher, Maj. Haskell, Aaron Waldo Putnam, Mr. Sparhawk, and, it is believed, George and Israel Putnam, Jr. At the lower, were Maj. Goodale, Col. Rice, Esquire Pierce, Judge Israel Loring, Deacon Miles, Maj. Bradford and Mr. Goodenow. In the summer of 1789, Col. Ichabod Nye and some others, built a block-house at Newberry, below Belpre. Col. Nye sold his lot there to Aaron W. Clough, who, with Stephen Guthrie, Joseph Leavins, Joel Oakes, Eleazer Curtis, Mr. Denham J. Littleton and Mr. Brown, was located at that place.

"Every exertion possible," says Dr. Hildreth, who has preserved the above names and incidents,

"for men in these circumstances, was made to secure food for future difficulties. Col. Oliver, Maj. Hatfield White and John Dodge, of the Waterford settlement, began mills on Wolf Creek, about three miles from the fort, and got them running; and these, the first mills in Ohio, were never destroyed during the subsequent Indian war, though the proprietors removed their families to the fort at Marietta. Col. E. Sproat and Enoch Shepherd began mills on Duck Creek, three miles from Marietta, from the completion of which they were driven by the Indian war. Thomas Stanley began mills farther up, near the Duck Creek settlement. These were likewise unfinished. The Ohio Company built a large horse mill near Campus Martius, and soon after a floating mill."

The autumn before the settlements at Belpre, Duck Creek and Waterford, were made, a colony was planted near the mouth of the Little Miami River, on a tract of ten thousand acres, purchased from Symmes by Maj. Benjamin Stites. In the preceding pages may be found a history of Symmes' purchase. This colony may be counted the second settlement in the State. Soon after the colony at Marietta was founded, steps were taken to occupy separate portions of Judge Symmes' purchase, between the Miami Rivers. Three parties were formed for this purpose, but, owing to various delays, chiefly in getting the present colony steadfast and safe from future encroachments by the savages, they did not get started till late in the fall. The first of these parties, consisting of fifteen or twenty men, led by Maj. Stites, landed at the mouth of the Little Miami in November, 1788, and, constructing a log fort, began to lay out a village, called by them Columbia. It soon grew into prominence, and, before winter had thoroughly set in, they were well prepared for a frontier life. In the party were Cols. Spencer and Brown, Majs. Gano and Kibbey, Judges Goforth and Foster, Rev. John Smith, Francis Dunlavy, Capt. Flinn, Jacob White, John Riley, and Mr. Hubbell.

All these were men of energy and enterprise, and, with their comrades, were more numerous than either of the other parties, who commenced their settlements below them on the Ohio. This village was also, at first, more flourishing; and, for two or three years, contained more inhabitants than any other in the Miami purchase.

The second Miami party was formed at Limestone, under Matthias Denham and Robert Patterson, and consisted of twelve or fifteen persons. They landed on the north bank of the Ohio, oppo-

site the mouth of the Licking River, the 24th of December, 1788. They intended to establish a station and lay out a town on a plan prepared at Limestone. Some statements affirm that the town was to be called "*Los-anti-ville*," by a romantic school-teacher named Filson. However, be this as it may, Mr. Filson was, unfortunately for himself, not long after, slain by the Indians, and, with him probably, the name disappeared. He was to have one-third interest in the proposed city, which, when his death occurred, was transferred to Israel Ludlow, and a new plan of a city adopted. Israel Ludlow surveyed the proposed town, whose lots were principally donated to settlers upon certain conditions as to settlement and improvement, and the embryo city named Cincinnati. Gov. St. Clair very likely had something to do with the naming of the village, and, by some, it is asserted that he changed the name from Losantiville to Cincinnati, when he created the county of Hamilton the ensuing winter. The original purchase of the city's site was made by Mr. Denham. It included about eight hundred acres, for which he paid 5 shillings per acre in Continental certificates, then worth, in specie, about 5 shillings per pound, gross weight. Evidently, the original site was a good investment, could Mr. Denham have lived long enough to see its present condition.

The third party of settlers for the Miami purchase, were under the care of Judge Symmes, himself. They left Limestone, January 29, 1789, and were much delayed on their downward journey by the ice in the river. They reached the "Bend," as it was then known, early in February. The Judge had intended to found a city here, which, in time, would be the rival of the Atlantic cities. As each of the three settlements aspired to the same position, no little rivalry soon manifested itself. The Judge named his proposed city North Bend, from the fact that it was the most northern bend in the Ohio below the mouth of the Great Kanawha. These three settlements antedated, a few months, those made near Marietta, already described. They arose so soon after, partly from the extreme desire of Judge Symmes to settle his purchase, and induce emigration here instead of on the Ohio Company's purchase. The Judge labored earnestly for this purpose and to further secure him in his title to the land he had acquired, all of which he had so far been unable to retain, owing to his inability to meet his payments.

All these emigrants came down the river in the flat-boats of the day, rude affairs, sometimes called

"Arks," and then the only safe mode of travel in the West.

Judge Symmes found he must provide for the safety of the settlers on his purchase, and, after earnestly soliciting Gen. Harmar, commander of the Western posts, succeeded in obtaining a detachment of forty-eight men, under Capt. Kearsey, to protect the improvements just commencing on the Miami. This detachment reached Limestone in December, 1788. Part was at once sent forward to guard Maj. Stites and his pioneers. Judge Symmes and his party started in January, and, about February 2, reached Columbia, where the Captain expected to find a fort erected for his use and shelter. The flood on the river, however, defeated his purpose, and, as he was unprepared to erect another, he determined to go on down to the garrison at the falls at Louisville. Judge Symmes was strenuously opposed to his conduct, as it left the colonies unguarded, but, all to no purpose; the Captain and his command, went to Louisville early in March, and left the Judge and his settlement to protect themselves. Judge Symmes immediately sent a strong letter to Maj. Willis, commanding at the Falls, complaining of the conduct of Capt. Kearsey, representing the exposed situation of the Miami settlements, stating the indications of hostility manifested by the Indians, and requesting a guard to be sent to the Bend. This request was at once granted, and Ensign Luce, with seventeen or eighteen soldiers, sent. They were at the settlement but a short time, when they were attacked by Indians, and one of their number killed, and four or five wounded. They repulsed the savages and saved the settlers.

The site of Symmes City, for such he designed it should ultimately be called, was above the reach of water, and sufficiently level to admit of a convenient settlement. The city laid out by Symmes was truly magnificent on paper, and promised in the future to fulfill his most ardent hopes. The plat included the village, and extended across the peninsula between the Ohio and Miami Rivers. Each settler on this plat was promised a lot if he would improve it, and in conformity to the stipulation, Judge Symmes soon found a large number of persons applying for residence. As the number of these adventurers increased, in consequence of this provision and the protection of the military, the Judge was induced to lay out another village six or seven miles up the river, which he called South Bend, where he disposed of some donation

lots, but the project failing, the village site was deserted, and converted into a farm.

During all the time these various events were transpiring, but little trouble was experienced with the Indians. They were not yet disposed to evince hostile feelings. This would have been their time, but, not realizing the true intent of the whites until it was too late to conquer them, they allowed them to become prepared to withstand a warfare, and in the end were obliged to suffer their hunting-grounds to be taken from them, and made the homes of a race destined to entirely supersede them in the New World.

By the means sketched in the foregoing pages, were the three settlements on the Miami made. By the time those adjacent to Marietta were well established, these were firmly fixed, each one striving to become the rival city all felt sure was to arise. For a time it was a matter of doubt which of the rivals, Columbia, North Bend or Cincinnati, would eventually become the chief seat of business.

In the beginning, Columbia, the eldest of the three, took the lead, both in number of its inhabitants and the convenience and appearance of its dwellings. For a time it was a flourishing place, and many believed it would become the great business town of the Miami country. That apparent fact, however, lasted but a short time. The garrison was moved to Cincinnati, Fort Washington built there, and in spite of all that Maj. Stites, or Judge Symmes could do, that place became the metropolis. Fort Washington, the most extensive garrison in the West, was built by Maj. Doughty, in the summer of 1789, and from that time the growth and future greatness of Cincinnati were assured.

The first house in the city was built on Front street, east of and near Main street. It was simply a strong log cabin, and was erected of the forest trees cleared away from the ground on which it stood. The lower part of the town was covered with sycamore and maple trees, and the upper with beech and oak. Through this dense forest the streets were laid out, and their corners marked on the trees.

The settlements on the Miami had become sufficiently numerous to warrant a separate county, and, in January, 1790, Gov. St. Clair and his Secretary arrived in Cincinnati, and organized the county of Hamilton, so named in honor of the illustrious statesman by that name. It included all the country north of the Ohio, between the Miamis, as far as a line running "due east from the

Standing Stone forks" of Big Miami to its intersection with the Little Miami. The erection of the new county, and the appointment of Cincinnati to be the seat of justice, gave the town a fresh impulse, and aided greatly in its growth.

Through the summer, but little interruption in the growth of the settlements occurred. The Indians had permitted the erection of defensive works in their midst, and could not now destroy them. They were also engaged in traffic with the whites, and, though they evinced signs of discontent at their settlement and occupation of the country, yet did not openly attack them. The truth was, they saw plainly the whites were always prepared, and no opportunity was given them to plunder and destroy. The Indian would not attack unless success was almost sure. An opportunity, unfortunately, came, and with it the horrors of an Indian war.

In the autumn of 1790, a company of thirty-six men went from Marietta to a place on the Muskingum known as the Big Bottom. Here they built a block-house, on the east bank of the river, four miles above the mouth of Meigs Creek. They were chiefly young, single men, but little acquainted with Indian warfare or military rules. The savages had given signs that an attack on the settlement was meditated, and several of the knowing ones at the strongholds strenuously opposed any new settlements that fall, advising their postponement until the next spring, when the question of peace or war would probably be settled. Even Gen. Putnam and the Directors of the Ohio Company advised the postponement of the settlement until the next spring.

The young men were impatient and restless, and declared themselves able to protect their fort against any number of assailants. They might have easily done so, had they taken the necessary precautions; but, after they had erected a rude block-house of unchinked logs, they began to pass the time in various pursuits; setting no guard, and taking no precautionary measures, they left themselves an easy prey to any hostile savages that might choose to come and attack them.

About twenty rods from the block-house, and a little back from the bank of the river, two men, Francis and Isaac Choate, members of the company, had erected a cabin, and commenced clearing lots. Thomas Shaw, a hired laborer, and James Patten, another of the associates, lived with them. About the same distance below the block-house was an old "Tomahawk Improvement" and a

small cabin, which two men, Asa and Elcazur Bullard, had fitted up and occupied. The Indian war-path, from Sandusky to the mouth of the Muskingum, passed along the opposite shore of the river.

"The Indians, who, during the summer," says Dr. Hildreth, "had been hunting and loitering about the Wolf Creek and Plainfield settlements, holding frequent and friendly intercourse with the settlers, selling them venison and bear's meat in exchange for green corn and vegetables, had withdrawn and gone up the river, early in the autumn, to their towns, preparatory to going into winter quarters. They very seldom entered on any warlike expeditions during the cold weather. But they had watched the gradual encroachment of the whites and planned an expedition against them. They saw them in fancied security in their cabins, and thought their capture an easy task. It is said they were not aware of the Big Bottom settlement until they came in sight of it, on the opposite shore of the river, in the afternoon. From a high hill opposite the garrison, they had a view of all that part of the bottom, and could see how the men were occupied and what was doing about the block-house. It was not protected with palisades or pickets, and none of the men were aware or prepared for an attack. Having laid their plans, about twilight they crossed the river above the garrison, on the ice, and divided their men into two parties—the larger one to attack the block-house, the smaller one to capture the cabins. As the Indians cautiously approached the cabin they found the inmates at supper. Part entered, addressed the whites in a friendly manner, but soon manifesting their designs, made them all prisoners, tying them with leather thongs they found in the cabin."

At the block-house the attack was far different. A stout Mohawk suddenly burst open the door, the first intimation the inmates had of the presence of the foe, and while he held it open his comrades shot down those that were within. Rushing in, the deadly tomahawk completed the onslaught. In the assault, one of the savages was struck by the wife of Isaac Woods, with an ax, but only slightly injured. The heroic woman was immediately slain. All the men but two were slain before they had time to secure their arms, thereby paying for their failure to properly secure themselves, with their lives. The two excepted were John Stacy and his brother Philip, a lad sixteen years of age. John escaped to the roof,

where he was shot by the Indians, while begging for his life. The firing at the block-house alarmed the Bullards in their cabin, and hastily barring the door, and securing their arms and ammunition, they fled to the woods, and escaped. After the slaughter was over, the Indians began to collect the plunder, and in doing so discovered the lad Philip Stacy. They were about to dispatch him, but his entreaties softened the heart of one of the chiefs, who took him as a captive with the intention of adopting him into his family. The savages then piled the dead bodies on the floor, covered them with other portions of it not needed for that purpose, and set fire to the whole. The building, being made of green logs, did not burn, the flames consuming only the floors and roof, leaving the walls standing.

There were twelve persons killed in this attack, all of whom were in the prime of life, and valuable aid to the settlements. They were well provided with arms, and had they taken the necessary precautions, always pressed upon them when visited by the older ones from Marietta, they need not have suffered so terrible a fate.

The Indians, exultant over their horrible victory, went on to Wolf's mills, but here they found the people prepared, and, after reconnoitering the place, made their retreat, at early dawn, to the great relief of the inhabitants. Their number was never definitely known.

The news reached Marietta and its adjacent settlements soon after the massacre occurred, and struck terror and dismay into the hearts of all. Many had brothers and sons in the ill-fated party, and mourned their loss. Neither did they know what place would fall next. The Indian hostilities had begun, and they could only hope for peace when the savages were effectually conquered.

The next day, Capt. Rogers led a party of men over to the Big Bottom. It was, indeed, a melancholy sight to the poor borderers, as they knew not now how soon the same fate might befall themselves. The fire had so disfigured their comrades that but two, Ezra Putnam and William Jones, were recognized. As the ground was frozen outside, a hole was dug in the earth underneath the block-house floor, and the bodies consigned to one grave. No further attempt was made to settle here till after the peace of 1795.

The outbreak of Indian hostilities put a check on further settlements. Those that were established were put in a more active state of defense, and every preparation made that could be made

for the impending crisis all felt sure must come. Either the Indians must go, or the whites must retreat. A few hardy and adventurous persons ventured out into the woods and made settlements, but even these were at the imminent risk of their lives, many of them perishing in the attempt.

The Indian war that followed is given fully in preceding pages. It may be briefly sketched by stating that the first campaign, under Gen Harmer, ended in the defeat of his army at the Indian villages on the Miami of the lake, and the rapid retreat to Fort Washington. St. Clair was next commissioned to lead an army of nearly three thousand men, but these were furiously attacked at break of day, on the morning of November 4, 1791, and utterly defeated. Indian outrages sprung out anew after each defeat, and the borders were in a continual state of alarm. The most terrible sufferings were endured by prisoners in the hands of the savage foe, who thought to annihilate the whites.

The army was at once re-organized, Gen. Anthony Wayne put in command by Washington, and a vigorous campaign inaugurated. Though the savages had been given great aid by the British, in direct violation of the treaty of 1783, Gen. Wayne pursued them so vigorously that they could not withstand his army, and, the 20th of August, 1794, defeated them, and utterly annihilated their forces, breaking up their camps, and laying waste their country, in some places under the guns of the British forts. The victory showed them the hopelessness of contending against the whites, and led their chiefs to sue for peace. The British, as at former times, deserted them, and they were again alone, contending against an invincible foe. A grand council was held at Greenville the 3d day of August, 1795, where eleven of the most powerful chiefs made peace with Gen. Wayne on terms of his own dictation. The boundary established by the old treaty of Fort McIntosh was confirmed, and extended westward from Loramie's to Fort Recovery, and thence southwest to the mouth of the Kentucky River. He also purchased all the territory not before ceded, within certain limits, comprehending, in all, about four-fifths of the State of Ohio. The line was long known as "The Greenville Treaty line." Upon these, and a few other minor conditions, the United States received the Indians under their protection, gave them a large number of presents, and practically closed the war with the savages.

The only settlement of any consequence made during the Indian war, was that on the plat of Hamilton, laid out by Israel Ludlow in December, 1794. Soon after, Darius C. Oreutt, John Green, William McClellan, John Sutherland, John Torrence, Benjamin F. Randolph, Benjamin Davis, Isaac Wiles, Andrew Christy and William Hubert, located here. The town was laid out under the name of Fairfield, but was known only a short time by that name. Until 1801, all the lands on the west side of the Great Miami were owned by the General Government; hence, until after that date, no improvements were made there. A single log cabin stood there until the sale of lands in April, 1801, when a company purchased the site of Rossville, and, in March, 1804, laid out that town, and, before a year had passed, the town and country about it was well settled.

The close of the war, in 1795, insured peace, and, from that date, Hamilton and that part of the Miami Valley grew remarkably fast. In 1803, Butler County was formed, and Hamilton made the county seat.

On the site of Hamilton, St. Clair built Fort Hamilton in 1791. For some time it was under the command of Maj. Rudolph, a cruel, arbitrary man, who was displaced by Gen. Wayne, and who, it is said, perished ignobly on the high seas, at the hands of some Algerine pirates, a fitting end to a man who caused, more than once, the death of men under his control for minor offenses.

On the return of peace, no part of Ohio grew more rapidly than the Miami Valley, especially that part comprised in Butler County.

While the war with the Indians continued, but little extension of settlements was made in the State. It was too perilous, and the settlers preferred the security of the block-house or to engage with the army. Still, however, a few bold spirits ventured away from the settled parts of the Territory, and began life in the wilderness. In tracing the histories of these settlements, attention will be paid to the *order* in which they were made. They will be given somewhat in detail until the war of 1812, after which time they become too numerous to follow.

The settlements made in Washington—Marietta and adjacent colonies—and Hamilton Counties have already been given. The settlement at Gallia is also noted, hence, the narration can be resumed where it ends prior to the Indian war of 1795. Before this war occurred, there were three small settlements made, however, in addition to

those in Washington and Hamilton Counties. They were in what are now Adams, Belmont and Morgan Counties. They were block-house settlements, and were in a continual state of defense. The first of these, Adams, was settled in the winter of 1790–91 by Gen. Nathaniel Massie, near where Manchester now is. Gen. Massie determined to settle here in the Virginia Military Tract—in the winter of 1790, and sent notice throughout Kentucky and other Western settlements that he would give to each of the first twenty-five families who would settle in the town he proposed laying out, one in-lot, one out-lot and one hundred acres of land. Such liberal terms were soon accepted, and in a short time thirty families were ready to go with him. After various consultations with his friends, the bottom on the Ohio River, opposite the lower of the Three Islands, was selected as the most eligible spot. Here Massie fixed his station, and laid off into lots a town, now called Manchester. The little confederacy, with Massie at the helm, went to work with spirit. Cabins were raised, and by the middle of March, 1791, the whole town was inclosed with strong pickets, with block-houses at each angle for defense.

This was the first settlement in the bounds of the Virginia District, and the fourth one in the State. Although in the midst of a savage foe, now inflamed with war, and in the midst of a cruel conflict, the settlement at Manchester suffered less than any of its cotemporaries. This was, no doubt, due to the watchful care of its inhabitants, who were inured to the rigors of a frontier life, and who well knew the danger about them. "These were the Beasleys, Stouts, Washburns, Ledoms, Edgingtons, Denings, Ellisons, Utts, McKenzies, Wades, and others, who were fully equal to the Indians in all the savage arts and stratagems of border war."

As soon as they had completed preparations for defense, the whole population went to work and cleared the lowest of the Three Islands, and planted it in corn. The soil of the island was very rich, and produced abundantly. The woods supplied an abundance of game, while the river furnished a variety of excellent fish. The inhabitants thus found their simple wants fully supplied. Their nearest neighbors in the new Territory were at Columbia, and at the French settlement at Gallipolis; but with these, owing to the state of the country and the Indian war, they could hold little, if any, intercourse.

The station being established, Massie continued to make locations and surveys. Great precautions were necessary to avoid the Indians, and even the closest vigilance did not always avail, as the ever-watchful foe was always ready to spring upon the settlement, could an unguarded moment be observed. During one of the spring months, Gen. Massie, Israel Donalson, William Lytle and James Little, while out on a survey, were surprised, and Mr. Donalson captured, the others escaping at great peril. Mr. Donalson escaped during the march to the Indian town, and made his way to the town of Cincinnati, after suffering great hardships, and almost perishing from hunger. In the spring of 1793, the settlers at Manchester commenced clearing the out-lots of the town. While doing so, an incident occurred, which shows the danger to which they were daily exposed. It is thus related in Howe's Collections :

"Mr. Andrew Ellison, one of the settlers, cleared an out-lot immediately adjoining the fort. He had completed the cutting of the timber, rolled the logs together, and set them on fire. The next morning, before daybreak, Mr. Ellison opened one of the gates of the fort, and went out to throw his logs together. By the time he had finished the job, a number of the heaps blazed up brightly, and, as he was passing from one to the other, he observed, by the light of the fires, three men walking briskly toward him. This did not alarm him in the least, although, he said, they were dark-skinned fellows; yet he concluded they were the Wades, whose complexions were very dark, going early to hunt. He continued to right his log-heaps, until one of the fellows seized him by the arms, calling out, in broken English, 'How do? how do?' He instantly looked in their faces, and, to his surprise and horror, found himself in the clutches of three Indians. To resist was useless.

"The Indians quickly moved off with him in the direction of Paint Creek. When breakfast was ready, Mrs. Ellison sent one of her children to ask its father home; but he could not be found at the log-heaps. His absence created no immediate alarm, as it was thought he might have started to hunt, after completing his work. Dinner-time arrived, and, Ellison not returning, the family became uneasy, and began to suspect some accident had happened to him. His gun-rack was examined, and there hung his rifles and his pouch. Gen. Massie raised a party, made a circuit around the place, finding, after some search, the trails of four men, one of whom had on shoes; and the

fact that Mr. Ellison was a prisoner now became apparent. As it was almost night at the time the trail was discovered, the party returned to the station. Early the next morning, preparations were made by Gen. Massie and his friends to continue the search. In doing this, they found great difficulty, as it was so early in the spring that the vegetation was not grown sufficiently to show plainly the trail made by the savages, who took the precaution to keep on high and dry ground, where their feet would make little or no impression. The party were, however, as unerring as a pack of hounds, and followed the trail to Paint Creek, when they found the Indians gained so fast on them that pursuit was useless.

"The Indians took their prisoner to Upper Sandusky, where he was compelled to run the gantlet. As he was a large, and not very active, man, he received a severe flogging. He was then taken to Lower Sandusky, and again compelled to run the gantlet. He was then taken to Detroit, where he was ransomed by a British officer for \$100. The officer proved a good friend to him. He sent him to Montreal, whence he returned home before the close of the summer, much to the joy of his family and friends, whose feelings can only be imagined."

"Another incident occurred about this time," says the same volume, "which so aptly illustrates the danger of frontier life, that it well deserves a place in the history of the settlements in Ohio. John and Asahel Edgington, with a comrade, started out on a hunting expedition toward Brush Creek. They camped out six miles in a northeast direction from where West Union now stands, and near the site of Treber's tavern, on the road from Chillicothe to Maysville. They had good success in hunting, killing a number of deer and bears. Of the deer killed, they saved the skins and hams alone. They fleeced the bears; that is, they cut off all the meat which adhered to the hide, without skinning, and left the bones as a skeleton. They hung up the proceeds of their hunt, on a scaffold out of the reach of wolves and other wild animals, and returned to Manchester for pack-horses. No one returned to the camp with the Edgingtons. As it was late in December, few apprehended danger, as the winter season was usually a time of repose from Indian incursions. When the Edgingtons arrived at their camp, they alighted from their horses and were preparing to start a fire, when a platoon of Indians fired upon them at a distance of not more than twenty paces. They had

evidently found the results of the white men's labor, and expected they would return for it, and prepared to waylay them. Asabel Edgington fell dead. John was more fortunate. The sharp crack of the rifles, and the horrible yells of the savages as they leaped from their place of ambush, frightened the horses, who took the track for home at full speed. John was very active on foot, and now an opportunity offered which required his utmost speed. The moment the Indians leaped from their hiding-place, they threw down their guns and took after him, yelling with all their power. Edgington did not run a booty race. For about a mile, the savages stepped in his tracks almost before the bending grass could rise. The uplifted tomahawk was frequently so near his head that he thought he felt its edge. He exerted himself to his utmost, while the Indians strove with all their might to catch him. Finally, he began to gain on his pursuers, and, after a long race, distanced them and made his escape, safely reaching home. This, truly, was a most fearful and well-contested race. The big Shawanee chief, Capt. John, who headed the Indians on this occasion, after peace was made, in narrating the particulars, said, "The white man who ran away was a smart fellow. The white man run; and I run. He run and run; at last, the white man run clear off from me."

The settlement, despite its dangers, prospered, and after the close of the war continued to grow rapidly. In two years after peace was declared, Adams County was erected by proclamation of Gov. St. Clair, the next year court was held, and in 1804, West Union was made the county seat.

During the war, a settlement was commenced near the present town of Bridgeport, in Belmont County, by Capt. Joseph Belmont, a noted Delaware Revolutionary officer, who, because his State could furnish only one company, could rise no higher than Captain of that company, and hence always maintained that grade. He settled on a beautiful knoll near the present county seat, but ere long suffered from a night attack by the Indians, who, though unable to drive him and his companions from the cabin or conquer them, wounded some of them badly, one or two mortally, and caused the Captain to leave the frontier and return to Newark, Del. The attack was made in the spring of 1791, and a short time after, the Captain, having provided for the safety of his family, accepted a commission in St. Clair's army, and lost his life at the defeat of the General in

November. Shortly after the Captain settled, a fort, called Dillie's Fort, was built on the Ohio, opposite the mouth of Grave Creek. About two hundred and fifty yards below this fort, an old man, named Tato, was shot down at his cabin door by the Indians, just as he was in the act of entering the house. His body was pulled in by his daughter-in-law and grandson, who made an heroic defense. They were overpowered, the woman slain, and the boy badly wounded. He, however, managed to secrete himself and afterward escaped to the fort. The Indians, twelve or thirteen in number, went off unmolested, though the men in the fort saw the whole transaction and could have punished them. Why they did not was never known.

On Captina Creek in this same county, occurred, in May, 1794, the "battle of Captina," a famous local skirmish between some Virginians from Fort Baker, and a party of Indians. Though the Indians largely outnumbered the whites, they were severely punished, and compelled to abandon the contest, losing several of their bravest warriors.

These were the only settlements made until 1795, the close of the war. Even these, as it will be observed from the foregoing pages, were temporary in all cases save one, and were maintained at a great risk, and the loss of many valuable lives. They were made in the beginning of the war, and such were their experiences that further attempts were abandoned until the treaty of Greenville was made, or until the prospects for peace and safety were assured.

No sooner, however, had the prospect of quiet been established, than a revival of emigration began. Before the war it had been large, now it was largely increased.

Wayne's treaty of peace with the Indians was made at Greenville, in what is now Darke County, the 3d of August, 1795. The number of Indians present was estimated at 1,300, divided among the principal nations as follows: 180 Wyandots, 381 Delawares, 143 Shawanees, 45 Ottawas, 46 Chippewas, 240 Pottawatomies, 73 Miamis and Eel River, 12 Weas and Piankeshaws, and 10 Kickapoos and Kaskaskias. The principal chiefs were Tarle, Buckongahelas, Black Hoof, Blue Jacket and Little Turtle. Most of them had been tampered with by the British agents and traders, but all had been so thoroughly chastised by Wayne, and found that the British only used them as tools, that they were quite anxious to make peace with the "Thirteen Fires." By the treaty, former ones

were established, the boundary lines confirmed and enlarged, an exchange and delivery of prisoners effected, and permanent peace assured.

In the latter part of September, after the treaty of Greenville, Mr. Bedell, from New Jersey, selected a site for a home in what is now Warren County, at a place since known as "Bedell's Station," about a mile south of Union Village. Here he erected a block-house, as a defense against the Indians, among whom were many renegades as among the whites, who would not respect the terms of the treaty. Whether Mr. Bedell was alone that fall, or whether he was joined by others, is not now accurately known. However that may be, he was not long left to himself; for, ere a year had elapsed, quite a number of settlements were made in this part of the Territory. Soon after his settlement was made, Gen. David Sutton, Capt. Nathan Kelley and others began pioneer life at Deerfield, in the same locality, and, before three years had gone by, a large number of New Jersey people were established in their homes; and, in 1803, the county was formed from Hamilton. Among the early settlers at Deerfield, was Capt. Robert Benham, who, with a companion, in 1779, sustained themselves many days when the Captain had lost the use of his legs, and his companion his arms, from musket-balls fired by the hands of the Indians. They were with a large party commanded by Maj. Rodgers, and were furiously attacked by an immense number of savages, and all but a few slain. The event happened during the war of the Revolution, before any attempt was made to settle the Northwest Territory. The party were going down the Ohio, probably to the falls, and were attacked when near the site of Cincinnati. As mentioned, these two men sustained each other many days, the one having perfect legs doing the necessary walking, carrying his comrade to water, driving up game for him to shoot, and any other duties necessary; while the one who had the use of his arms could dress his companion's and his own wounds, kill and cook the game, and perform his share. They were rescued, finally, by a flat-boat, whose occupants, for awhile, passed them, fearing a decoy, but, becoming convinced that such was not the case, took them on down to Louisville, where they were nursed into perfect health.

A settlement was made near the present town of Lebanon, the county seat of Warren County, in the spring of 1796, by Henry Taylor, who built a mill one mile west of the town site, on Turtle

Creek. Soon after, he was joined by Ichabod Corwin, John Osbourn, Jacob Vorhees, Samuel Shaw, Daniel Bonte and a Mr. Manning. When Lebanon was laid out, in 1803, the two-story log house built in 1797 by Ichabod Corwin was the only building on the plat. It was occupied by Ephraim Hathaway as a tavern. He had a black horse painted on an immense board for a sign, and continued in business here till 1810. The same year the town was laid out, a store was opened by John Huston, and, from that date, the growth of the county was very prosperous. Three years after, the *Western Star* was established by Judge John McLain, and the current news of the day given in weekly editions. It was one of the first newspapers established in the Territory, outside of Cincinnati.

As has been mentioned, the opening of navigation in the spring of 1796 brought a great flood of emigration to the Territory. The little settlement made by Mr. Bedell, in the autumn of 1795, was about the only one made that fall; others made preparations, and many selected sites, but did not settle till the following spring. That spring, colonies were planted in what are now Montgomery, Ross, Madison, Mahoning, Trumbull, Ashtabula and Cuyahoga Counties, while preparations were in turn made to occupy additional territory that will hereafter be noticed.

The settlement made in Montgomery County was begun early in the spring of 1796. As early as 1788, the land on which Dayton now stands was selected by some gentlemen, who designed laying out a town to be named Venice. They agreed with Judge Symmes, whose contract covered the place, for the purchase of the lands. The Indian war which broke out at this time prevented an extension of settlements from the immediate neighborhood of the parent colonies, and the project was abandoned by the purchasers. Soon after the treaty of 1795, a new company, composed of Gens. Jonathan Dayton, Arthur St. Clair, James Wilkinson, and Col. Israel Ludlow, purchased the land between the Miamis, around the mouth of Mad River, of Judge Symmes, and, the 4th of November, laid out the town. Arrangements were made for its settlement the ensuing spring, and donations of lots, with other privileges, were offered to actual settlers. Forty-six persons entered into engagements to remove from Cincinnati to Dayton, but during the winter most of them scattered in different directions, and only nineteen fulfilled their contracts. The first families who

made a permanent residence here, arrived on the first day of April, 1796, and at once set about establishing homes. Judge Symmes, however, becoming unable soon after to pay for his purchase, the land reverted to the United States, and the settlers in and about Dayton found themselves without titles to their lands. Congress, however, came to the aid of all such persons, wherever they had purchased land of Symmes, and passed a pre-emption law, under which they could enter their lands at the regular government price. Some of the settlers entered their lands, and obtained titles directly from the United States; others made arrangements with Daniel C. Cooper to receive their deeds from him, and he entered the residue of the town lands. He had been the surveyor and agent of the first company of proprietors, and they assigned to him certain of their rights of pre-emption, by which he became the titular owner of the land.

When the State government was organized in 1803, Dayton was made the seat of justice for Montgomery County, erected the same year. At that time, owing to the title question, only five families resided in the place, the other settlers having gone to farms in the vicinity, or to other parts of the country. The increase of the town was gradual until the war of 1812, when its growth was more rapid until 1820, when it was again checked by the general depression of business. It revived in 1827, at the commencement of the Miami Canal, and since then its growth has always been prosperous. It is now one of the best cities in Ohio. The first canal boats from Cincinnati arrived at Dayton January 25, 1829, and the first one from Lake Erie the 24th of June, 1845. In 1825, a weekly line of stages was established between Columbus and Cincinnati, via Dayton. One day was occupied in coming from Cincinnati to Dayton.

On the 18th of September, 1808, the *Dayton Repertory* was established by William McClure and George Smith. It was printed on a foolscap sheet. Soon after, it was enlarged and changed from a weekly to a daily, and, ere long, found a number of competitors in the field.

In the lower part of Miamisburg, in this county, are the remains of ancient works, scattered about over the bottom. About a mile and a quarter southeast of the village, on an elevation more than one hundred feet above the level of the Miami, is the largest mound in the Northern States, excepting the mammoth mound at Grave Creek, on the Ohio, below Wheeling, which it nearly equals

in dimensions. It is about eight hundred feet around the base, and rises to a height of nearly seventy feet. When first known it was covered with forest trees, whose size evidenced great age. The Indians could give no account of the mound. Excavations revealed bones and charred earth, but what was its use, will always remain a conjecture.

One of the most important early settlements was made cotemporary with that of Dayton, in what is now Ross County. The same spring, 1796, quite a colony came to the banks of the Scioto River, and, near the mouth of Paint Creek, began to plant a crop of corn on the bottom. The site had been selected as early as 1792, by Col. Nathaniel Massie* and others, who were so delighted with the country, and gave such glowing descriptions of it on their return—which accounts soon circulated through Kentucky—that portions of the Presbyterian congregations of Caneridge and Concord, in Bourbon County, under Rev. Robert W. Finley, determined to emigrate thither in a body. They were, in a measure, induced to take this step by their dislike to slavery, and a desire for freedom from its baleful influences and the uncertainty that existed regarding the validity of the land titles in that State. The Rev. Finley, as a preliminary step, liberated his slaves, and addressed to Col. Massie a letter of inquiry, in December, 1794, regarding the land on the Scioto, of which he and his people had heard such glowing accounts.

"The letter induced Col. Massie to visit Mr. Finley in the ensuing March. A large concourse of people, who wished to engage in the enterprise, assembled on the occasion, and fixed on a day to meet at the Three Islands, in Manchester, and proceed on an exploring expedition. Mr. Finley also wrote to his friends in Western Pennsylvania

* Nathaniel Massie was born in Goochland County, Va., December 28, 1763. In 1780, he engaged, for a short time, in the Revolutionary war. In 1783, he left for Kentucky, where he acted as a surveyor. He was afterward made a Government surveyor, and labored much in that capacity for early Ohio proprietors, being paid in lands, the amounts graded by the danger attached to the survey. In 1791, he established the settlement at Manchester, and a year or two after, continued his surveys up the Scioto. Here he was continually in great danger from the Indians, but knew well how to guard against them, and thus preserved himself. In 1796, he established the Chillicothe settlement, and made his home in the Scioto Valley, being now an extensive land owner by reason of his long surveying service. In 1807, he and Return J. Meigs were competitors for the office of Governor of Ohio. Meigs was elected, but Massie contested his eligibility to the office, on the grounds of his absence from the State and insufficiency of time as a resident, as required by the Constitution. Meigs was declared ineligible by the General Assembly, and Massie declared Governor. He, however, resigned the office at once, not desiring it. He was often Representative afterward. He died November 13, 1813.

informing them of the time and place of rendezvous.

"About sixty men met, according to appointment, who were divided into three companies, under Massie, Finley and Falenash. They proceeded on their route, without interruption, until they struck the falls of Paint Creek. Proceeding a short distance down that stream, they suddenly found themselves in the vicinity of some Indians who had encamped at a place, since called Reeve's Crossing, near the present town of Bainbridge. The Indians were of those who had refused to attend Wayne's treaty, and it was determined to give them battle, it being too late to retreat with safety. The Indians, on being attacked, soon fled with the loss of two killed and several wounded. One of the whites only, Joshua Robinson, was mortally wounded, and, during the action, a Mr. Armstrong, a prisoner among the savages, escaped to his own people. The whites gathered all their plunder and retreated as far as Scioto Brush Creek, where they were, according to expectation, attacked early the next morning. Again the Indians were defeated. Only one man among the whites, Allen Gilfillan, was wounded. The party of whites continued their retreat, the next day reached Manchester, and separated for their homes.

"After Wayne's treaty, Col. Massie and several of the old explorers again met at the house of Rev. Finley, formed a company, and agreed to make a settlement in the ensuing spring (1796), and raise a crop of corn at the mouth of Paint Creek. According to agreement, they met at Manchester about the first of April, to the number of forty and upward, from Mason and Bourbon Counties. Among them were Joseph McCoy, Benjamin and William Rodgers, David Shelby, James Harrod, Henry, Bazil and Reuben Abrams, William Jamison, James Crawford, Samuel, Anthony and Robert Smith, Thomas Dick, William and James Kerr, George and James Kilgrove, John Brown, Samuel and Robert Templeton, Ferguson Moore, William Nicholson and James B. Finley, later a prominent local Methodist minister. On starting, they divided into two companies, one of which struck across the country, while the other came on in pirogues. The first arrived earliest on the spot of their intended settlement, and had commenced erecting log huts above the mouth of Paint Creek, at the 'Prairie Station,' before the others had come on by water. About three hundred acres of the prairie were cultivated in corn that season.

"In August, of this year—1796—Chillicothe* was laid out by Col. Massie in a dense forest. He gave a lot to each of the first settlers, and, by the beginning of winter, about twenty cabins were erected. Not long after, a ferry was established across the Scioto, at the north end of Walnut street. The opening of Zano's trace produced a great change in travel westward, it having previously been along the Ohio in keel-boats or canoes, or by land, over the Cumberland Mountains, through Crab Orchard, in Kentucky.

"The emigrants brought corn-meal in their pirogues, and after that was gone, their principal meal, until the next summer, was that pounded in hominy mortars, which meal, when made into bread, and anointed with bear's-oil, was quite palatable.

"When the settlers first came, whisky was \$4.50 per gallon; but, in the spring of 1797, when the keel-boats began to run, the Monongahela whisky-makers, having found a good market for their fire-water, rushed it in, in such quantities, that the cabins were crowded with it, and it soon fell to 50 cents. Men, women and children, with some exceptions, drank it freely, and many who had been respectable and temperate became inebriates. Many of Wayne's soldiers and camp-women settled in the town, so that, for a time, it became a town of drunkards and a sink of corruption. There was, however, a little leaven, which, in a few months, began to develop itself.

"In the spring of 1797, one Brannon stole a great coat, handkerchief and shirt. He and his wife absconded, were pursued, caught and brought back. Samuel Smith was appointed Judge, a jury impanneled, one attorney appointed by the Judge to manage the prosecution, and another the defense; witnesses were examined, the case argued, and the evidence summed up by the Judge. The jury, having retired a few moments, returned with a verdict of guilty, and that the culprit be sentenced according to the discretion of the Judge. The Judge soon announced that the criminal should have ten lashes on his naked back, or that he should sit on a bare pack-saddle on his pony, and that his wife, who was supposed to have had some agency in the theft, should lead the pony to every house in the village, and proclaim, 'This is

*Chillicothe appears to have been a favorite name among the Indians, as many localities were known by that name. Col. John Johnston says: "Chillicothe is the name of one of the principal tribes of the Shawanees. They would say, *Chil-i-cothe-otany*, i. e., Chillicothe town. The Wyandots would say, for Chillicothe town, *Tat-a-ra-ra, Do-tia*, or town at the leaning of the bank."

Brannon, who stole the great coat, handkerchief and shirt; and that James B. Finley, afterward Chaplain in the State Penitentiary, should see the sentence faithfully carried out. Brannon chose the latter sentence, and the ceremony was faithfully performed by his wife in the presence of every cabin, under Mr. Finley's care, after which the couple made off. This was rather rude, but effective jurisprudence.

"Dr. Edward Tiffin and Mr. Thomas Worthington, of Berkley County, Va., were brothers-in-law, and being moved by abolition principles, liberated their slaves, intending to remove into the Territory. For this purpose, Mr. Worthington visited Chillicothe in the autumn of 1797, and purchased several in and out lots of the town. On one of the former, he erected a two-story frame house, the first of the kind in the village. On his return, having purchased a part of a farm, on which his family long afterward resided, and another at the north fork of Paint Creek, he contracted with Mr. Joseph Yates, a millwright, and Mr. George Haines, a blacksmith, to come out with him the following winter or spring, and erect for him a grist and saw mill on his north-fork tract. The summer, fall and following winter of that year were marked by a rush of emigration, which spread over the high bank prairie, Pea-pea, Westfall and a few miles up Paint and Deer Creeks.

"Nearly all the first settlers were either regular members, or had been raised in the Presbyterian Church. Toward the fall of 1797, the leaven of piety retained by a portion of the first settlers began to diffuse itself through the mass, and a large log meeting-house was erected near the old graveyard, and Rev. William Speer, from Pennsylvania, took charge. The sleepers at first served as seats for hearers, and a split-log table was used as a pulpit. Mr. Speer was a gentlemanly, moral man, tall and cadaverous in person, and wore the cocked hat of the Revolutionary era.

"Thomas Jones arrived in February, 1798, bringing with him the first load of bar-iron in the Scioto Valley, and about the same time Maj. Elias Langham, an officer of the Revolution, arrived. Dr. Tiffin, and his brother, Joseph, arrived the same month from Virginia and opened a store not far from the log meeting-house. A store had been opened previously by John McDougal. The 17th of April, the families of Col. Worthington and Dr. Tiffin arrived, at which time the first marriage in the Scioto Valley was celebrated. The parties were George Kilgore and Elizabeth Cochran. The

ponies of the attendants were hitched to the trees along the streets, which were not then cleared out, nearly the whole town being a wilderness. Joseph Yates, George Haines, and two or three others, arrived with the families of Tiffin and Worthington. On their arrival there were but four shingled roofs in town, on one of which the shingles were fastened with pegs. Col. Worthington's house was the only one having glass windows. The sash of the hotel windows was filled with greased paper.

"Col. Worthington was appointed by Gen. Rufus Putnam, Surveyor General of the Northwest Territory, surveyor of a large district of Congress lands, on the east side of the Scioto, and Maj. Langham and a Mr. Matthews, were appointed to survey the residue of the lands which afterward composed the Chillicothe land district.

"The same season, settlements were made about the Walnut Plains by Samuel McCulloh and others; Springer, Osbourn, Dyer, and Thomas and Elijah Chenowith, on Darly Creek; Lamberts and others on Sippo; on Foster's Bottom, the Fosters. Samuel Davis and others, while the following families settled in and about Chillicothe: John Crouse, William Keys, William Lamb, John Carlisle, John McLanberg, William Chandless, the Stoctons, Greggs, Bates and some others.

"Dr. Tiffin and his wife were the first Methodists in the Scioto Valley. He was a local preacher. In the fall, Worthington's grist and saw mills on the north fork of Paint Creek were finished, the first mills worthy the name in the valley.

"Chillicothe was the point from which the settlements diverged. In May, 1799, a post office was established here, and Joseph Tiffin made Postmaster. Mr. Tiffin and Thomas Gregg opened taverns; the first, under the sign of Gen. Anthony Wayne, was at the corner of Water and Walnut streets; and the last, under the sign of the 'Green Tree,' was on the corner of Paint and Water streets. In 1801, Nathaniel Willis moved in and established the *Scioto Gazette*, probably, the second paper in the Territory."^{*}

In 1800, the seat of government of the Northwest Territory was removed, by law of Congress, from Cincinnati to Chillicothe. The sessions of the Territorial Assembly for that and the next year were held in a small two-story, hewed-log house, erected in 1798, by Basil Abrams. A wing was added to the main part, of two stories in

^{*} Recollections of Hon. Thomas Scott, of Chillicothe—Howe's Annals of Ohio.

height. In the lower room of this wing, Col. Thomas Gibson, Auditor of the Territory, kept his office, and in the upper room a small family lived. In the upper room of the main building a billiard table was kept. It was also made a resort of gamblers and disreputable characters. The lower room was used by the Legislature, and as a court room, a church or a school. In the war of 1812, the building was a rendezvous and barracks for soldiers, and, in 1840, was pulled down.

The old State House was commenced in 1800, and finished the next year for the accommodation of the Legislature and the courts. It is said to be the first public stone edifice erected in the Territory. Maj. William Rutledge, a Revolutionary soldier, did the mason work, and William Guthrie, the carpenter. In 1801, the Territorial Legislature held their first session in it. In it was also held the Constitutional Convention of Ohio, which began its sessions the first Monday in November, 1802. In March, 1803, the first State Legislature met in the house, and continued their sessions here until 1810. The sessions of 1810-11, and 1811-12, were held in Zanesville, and from there removed back to Chillicothe and held in the old State House till 1816, when Columbus became the permanent capital of the State.

Making Chillicothe the State capital did much to enhance its growth. It was incorporated in 1802, and a town council elected. In 1807, the town had fourteen stores, six hotels, two newspapers, two churches—both brick buildings—and over two hundred dwellings. The removal of the capital to Columbus checked its growth a little, still, being in an excellent country, rapidly filling with settlers, the town has always remained a prominent trading center.

During the war of 1812, Chillicothe was made a rendezvous for United States soldiers, and a prison established, in which many British prisoners were confined. At one time, a conspiracy for escape was discovered just in time to prevent it. The plan was for the prisoners to disarm the guard, proceed to jail, release the officers, burn the town, and escape to Canada. The plot was fortunately disclosed by two senior British officers, upon which, as a measure of security, the officers and chief conspirators were sent to the penitentiary at Frankfort, Kentucky.

Two or three miles northwest of Chillicothe, on a beautiful elevation, commanding an extensive view of the valley of the Scioto, Thomas Worth-

ington,* one of the most prominent and influential men of his day, afterward Governor of the State, in 1806, erected a large stone mansion, the wonder of the valley in its time. It was the most elegant mansion in the West, crowds coming to see it when it was completed. Gov. Worthington named the place Adena, "Paradise"—a name not then considered hyperbolic. The large panes of glass, and the novelty of papered walls especially attracted attention. Its architect was the elder Latrobe, of Washington City, from which place most of the workmen came. The glass was made in Pittsburgh, and the fireplace fronts in Philadelphia, the latter costing seven dollars per hundred pounds for transportation. The mansion, built as it was, cost nearly double the expense of such structures now. Adena was the home of the Governor till his death, in 1827.

Near Adena, in a beautiful situation, is Fruit Hill, the seat of Gen. Duncan McArthur,† and later of ex-Gov. William Allen. Like Adena, Fruit Hill is one of the noted places in the Scioto Valley. Many of Ohio's best men dwelt in the valley; men who have been an honor and ornament to the State and nation.

Another settlement, begun soon after the treaty of peace in 1795, was that made on the Licking River, about four miles below the present city of Newark, in Licking County. In the fall of 1798, John Ratliff and Elias Hughes, while prospecting on this stream, found some old Indian cornfields, and determined to locate. They were from Western Virginia, and were true pioneers, living mainly by hunting, leaving the cultivation of their small cornfields to their wives, much after the style of

* Gov. Worthington was born in Jefferson County, Va., about the year 1769. He settled in Ohio in 1798. He was a firm believer in liberty and came to the Territory after liberating his slaves. He was one of the most efficient men of his day; was a member of the Constitutional Convention, and was sent on an important mission to Congress relative to the admission of Ohio to the Union. He was afterward a Senator to Congress, and then Governor. On the expiration of his gubernatorial term, he was appointed a member of the Board of Public Works, in which capacity he did much to advance the canals and railroads, and other public improvements. He remained in this office till his death.

† Gen. McArthur was born in Dutchess County, N. Y., in 1772. When eight years of age, his father removed to Western Pennsylvania. When eighteen years of age, he served in Harnar's campaign. In 1792, he was a very efficient soldier among the frontiersmen, and gained their approbation by his bravery. In 1793, he was connected with Gen. Massie, and afterward was engaged in land speculations and became very wealthy. He was made a member of the Legislature, in 1805; in 1806, a Colonel, and in 1808, a Major General of the militia. In this capacity he was in Hull's surrender at Detroit. On his return he was elected to Congress, and in 1813 commissioned Brigadier General. He was one of the most efficient officers in the war of 1812, and held many important posts. After the war, he was again sent to the Legislature; in 1822 to Congress, and in 1830 elected Governor of the State. By an unfortunate accident in 1836, he was maimed for life, and gradually declined till death came a few years after.

their dusky neighbors. They were both inveterate Indian-haters, and never allowed an opportunity to pass without carrying out their hatred. For this, they were apprehended after the treaty; but, though it was clearly proven they had murdered some inoffensive Indians, the state of feeling was such that they were allowed to go unpunished.

A short time after their settlement, others joined them, and, in a few years, quite a colony had gathered on the banks of the Licking. In 1802, Newark was laid out, and, in three or four years, there were twenty or thirty families, several stores and one or two hotels.

The settlement of Granville Township, in this county, is rather an important epoch in the history of this part of the State. From a sketch published by Rev. Jacob Little in 1848, in Howe's Collections, the subjoined statements are taken:

"In 1804, a company was formed at Granville, Mass., with the intention of making a settlement in Ohio. This, called the *Scioto Company*, was the third of that name which effected settlements in Ohio. The project met with great favor, and much enthusiasm was elicited, in illustration of which a song was composed and sung to the tune of 'Pleasant Ohio' by the young people in the house and at labor in the field. We annex two stanzas, which are more curious than poetical:

"When rambling o'er these mountains
And rocks where ivies grow
Thick as the hairs upon your head,
'Mongst which you cannot go—
Great storms of snow, cold winds that blow,
We scarce can undergo—
Says I, my boys, we'll leave this place
For the pleasant Ohio.

"Our precious friends that stay behind,
We're sorry now to leave;
But if they'll stay and break their shins,
For them we'll never grieve.
Adieu, my friends!—Come on, my dears,
This journey we'll forego,
And settle Licking Creek,
In yonder Ohio."

"The Scioto Company consisted of one hundred and fourteen proprietors, who made a purchase of twenty-eight thousand acres. In the autumn of 1805, two hundred and thirty-four persons, mostly from East Granville, Mass., came on to the purchase. Although they had been forty-two days on the road, their first business, on their arrival, having organized a church before they left the East, was to hear a sermon. The first tree cut was that

by which public worship was held, which stood just in front of the Presbyterian church.

On the first Sabbath, November 16, although only about a dozen trees had been felled, they held divine service, both forenoon and afternoon, on that spot. The novelty of worshipping in the woods, the forest extending hundreds of miles each way; the hardships of the journey, the winter setting in, the thoughts of home, with all the friends and privileges left behind, and the impression that such must be the accommodations of a new country, all rushed on their minds, and made this a day of varied interest. When they began to sing, the echo of their voices among the trees was so different from what it was in the beautiful meeting-house they had left, that they could no longer restrain their tears. *They wept when they remembered Zion.* The voices of part of the choir were, for a season, suppressed with emotion.

"An incident occurred, which many said Mrs. Sigourney should have put into verse. Deacon Theophilus Reese, a Welsh Baptist, had, two or three years before, built a cabin, a mile and a half north, and lived all this time without public worship. He had lost his cattle, and, hearing a lowing of the oxen belonging to the Company, set out toward them. As he ascended the hills overlooking the town plot, he heard the singing of the choir. The reverberation of the sound from hill-tops and trees, threw the good man into a serious dilemma. The music at first seemed to be behind, then in the tree-tops, or in the clouds. He stopped, till, by accurate listening, he caught the direction of the sound; went on and passing the brow of the hill, he saw the audience sitting on the level below. He went home and told his wife that 'the promise of God is a bond'; a Welsh proverb, signifying that we have security, equal to a bond, that religion will prevail everywhere. He said: 'These must be good people. I am not afraid to go among them.' Though he could not understand English, he constantly attended the reading meeting. Hearing the music on that occasion made such an impression on his mind that, when he became old and met the first settlers, he would always tell over this story. The first cabin built was that in which they worshiped succeeding Sabbaths, and, before the close of the winter, they had a schoolhouse and a school. That church, in forty years, received more than one thousand persons into its membership.

"Elder Jones, in 1806, preached the first sermon in the log church. The Welsh Baptist

Church was organized in the cabin of David Thomas, September 4, 1808. April 21, 1827, the Granville members were organized into the Granville Church, and the corner-stone of their house of worship laid September 21, 1829. In the fall of 1810, the first Methodist sermon was preached here, and, soon after, a class organized. In 1824, a church was built. An Episcopal church was organized in May, 1827, and a church consecrated in 1838. In 1849, there were in this township 405 families, of whom 214 sustain family worship; 1431 persons over fourteen years of age, of whom over 800 belong to church. The town had 150 families, of whom 80 have family worship. In 1846, the township furnished 70 school teachers, of whom 62 prayed in school. In 1846, the township took 621 periodical papers, besides three small monthlies. The first temperance society west of the mountains was organized July 15, 1828, in this township; and, in 1831, the Congregational Church passed a by-law to accept no member who trafficked in or used ardent spirits."

It is said, not a settlement in the entire West could present so moral and upright a view as that of Granville Township; and nowhere could so perfect and orderly a set of people be found. Surely, the fact is argument enough in favor of the religion of Jesus.

The narrative of Mr. Little also states that, when Granville was first settled, it was supposed that Worthington would be the capital of Ohio, between which and Zanesville, Granville would make a great half-way town. At this time, wild animals, snakes and Indians abounded, and many are the marvelous stories preserved regarding the destruction of the animals and reptiles—the Indians being bound by their treaty to remain peaceful. Space forbids their repetition here. Suffice it to say that, as the whites increased, the Indians, animals and snakes disappeared, until now one is as much a curiosity as the other.

The remaining settlement in the southwestern parts of Ohio, made immediately after the treaty—fall of 1795 or year of 1796—was in what is now Madison County, about a mile north of where the village of Amity now stands, on the banks of the Big Darby. This stream received its name from the Indians, from a Wyandot chief, named Darby, who for a long time resided upon it, near the Union County line. In the fall of 1795, Benjamin Springer came from Kentucky and selected some land on the banks of the Big Darby, cleared

the ground, built a cabin, and returned for his family. The next spring, he brought them out, and began his life here. The same summer he was joined by William Lapin, Joshua and James Ewing and one or two others.

When Springer came, he found a white man named Jonathan Alder, who for fifteen years had been a captive among the Indians, and who could not speak a word of English, living with an Indian woman on the banks of Big Darby. He had been exchanged at Wayne's treaty, and, neglecting to profit by the treaty, was still living in the Indian style. When the whites became numerous about him his desire to find his relatives, and adopt the ways of the whites, led him to discard his squaw—giving her an unusual allowance—learn the English language, engage in agricultural pursuits, and become again civilized. Fortunately, he could remember enough of the names of some of his parents' neighbors, so that the identity of his relatives and friends was easily established, and Alder became a most useful citizen. He was very influential with the Indians, and induced many of them to remain neutral during the war of 1812. It is stated that in 1800, Mr. Ewing brought four sheep into the community. They were strange animals to the Indians. One day when an Indian hunter and his dog were passing, the latter caught a sheep, and was shot by Mr. Ewing. The Indian would have shot Ewing in retaliation, had not Alder, who was fortunately present, with much difficulty prevailed upon him to refrain.

While the southern and southwestern parts of the State were filling with settlers, assured of safety by Wayne's victories, the northern and eastern parts became likewise the theater of activities. Ever since the French had explored the southern shores of the lake, and English traders had carried goods thither, it was expected one day to be a valuable part of the West. It will be remembered that Connecticut had ceded a large tract of land to the General Government, and as soon as the cession was confirmed, and land titles became assured, settlers flocked thither. Even before that time, hardy adventurers had explored some of the country, and pronounced it a "goodly land," ready for the hand of enterprise.

The first settlement in the Western Reserve, and, indeed, in the northern part of the State, was made at the mouth of Conneaut* Creek, in Ash-tabula County, on the 4th of July, 1796. That

* Conneaut, in the Seneca language, signifies "many fish."

day, the first surveying party landed at the mouth of this creek, and, on its eastern bank, near the lake shore, in tin cups, pledged—as they drank the limpid waters of the lake—their country's welfare, with the ordnance accompaniment of two or three fowling-pieces, discharging the required national salute.

The whole party, on this occasion, numbered fifty-two persons, of whom two were females (Mrs. Stiles and Mrs. Gunn) and a child, and all deserve a lasting place in the history of the State.

The next day, they began the erection of a large log building on the sandy beach on the east side of the stream. When done, it was named "Stow Castle," after one of the party. It was the dwelling, storehouse and general habitation of all the pioneers. The party made this their headquarters part of the summer, and continued busily engaged in the survey of the Reserve. James Kingsbury, afterward Judge, arrived soon after the party began work, and, with his family, was the first to remain here during the winter following, the rest returning to the East, or going southward. Through the winter, Mr. Kingsbury's family suffered greatly for provisions, so much so, that, during the absence of the head of the family in New York for provisions, one child, born in his absence, died, and the mother, reduced by her sufferings and solitude, was only saved by the timely arrival of the husband and father with a sack of flour he had carried, many weary miles, on his back. He remained here but a short time, removing to Cleveland, which was laid out that same fall. In the spring of 1798, Alexander Harper, William McFarland and Ezra Gregory, with their families, started from Harpersfield, Delaware Co., N. Y., and arrived the last of June, at their new homes in the Far West. The whole population on the Reserve then amounted to less than one hundred and fifty persons. These were at Cleveland, Youngstown and at Mentor. During the summer, three families came to Burton, and Judge Hudson settled at Hudson. All these pioneers suffered severely for food, and from the fever induced by chills. It took several years to become acclimated. Sometimes the entire neighborhood would be down, and only one or two, who could wait on the rest "between chills," were able to do anything. Time and courage overcame, finally.

It was not until 1798, that a permanent settlement was made at the mouth of Conneaut Creek. Those who came there in 1796 went on with their surveys, part remaining in Cleveland, laid out that

summer. Judge Kingsbury could not remain at Conneaut, and went nearer the settlements made about the Cuyahoga. In the spring of 1798, Thomas Montgomery and Aaron Wright settled here and remained. Up the stream they found some thirty Indian cabins, or huts, in a good state of preservation, which they occupied until they could erect their own. Soon after, they were joined by others, and, in a year or two, the settlement was permanent and prosperous.

The site of the present town of Austinburg in Ashtabula County was settled in the year 1799, by two families from Connecticut, who were induced to come thither, by Judge Austin. The Judge preceded them a short time, driving, in company with a hired man, some cattle about one hundred and fifty miles through the woods, following an old Indian trail, while the rest of the party came in a boat across the lake. When they arrived, there were a few families at Harpersburg; one or two families at Windsor, twenty miles southwest; also a few families at Elk Creek, forty miles northeast, and at Vernon, the same distance southeast. All these were in a destitute condition for provisions. In 1800, another family moved from Norfolk, Conn. In the spring of 1801, several families came from the same place. Part came by land, and part by water. During that season, wheat was carried to an old mill on Elk Creek, forty miles away, and in some instances, half was given for carrying it to mill and returning it in flour.

Wednesday, October 21, 1801, a church of sixteen members was constituted in Austinburg. This was the first church on the Reserve, and was founded by Rev. Joseph Badger, the first missionary there. It is a fact worthy of note, that in 1802, Mr. Badger moved his family from Buffalo to this town, in the first wagon that ever came from that place to the Reserve. In 1803, noted revivals occurred in this part of the West, attended by the peculiar bodily phenomenon known as the "shakes" or "jerks."

The surveying party which landed at the mouth of Conneaut Creek, July 4, 1796, soon completed their labors in this part of the Reserve, and extended them westward. By the first of September, they had explored the lake coast as far west as the outlet of the Cuyahoga* River, then considered

*Cuyahoga, in the Indian language, signifies "crooked."—*Howe's Collections.*

"The Indians called the river 'Cuyahoghan-uk,' 'Lake River' It is, emphatically, a Lake river. It rises in lakes and empties into a lake."—*Atwater's History of Ohio.*

by all an important Western place, and one destined to be a great commercial mart. Time has verified the prophecies, as now the city of Cleveland covers the site.

As early as 1755, the mouth of the Cuyahoga River was laid down on the maps, and the French had a station here. It was also considered an important post during the war of the Revolution, and later, of 1812. The British, who, after the Revolution, refused to abandon the lake country west of the Cuyahoga, occupied its shores until 1790. Their traders had a house in Ohio City, north of the Detroit road, on the point of the hill near the river, when the surveyors arrived in 1796. Washington, Jefferson, and all statesmen of that day, regarded the outlet of the Cuyahoga as an important place, and hence the early attempt of the surveyors to reach and lay out a town here.

The corps of surveyors arrived early in September, 1796, and at once proceeded to lay out a town. It was named Cleveland, in honor of Gen. Moses Cleveland, the Land Company's agent, and for years a very prominent man in Connecticut, where he lived and died. By the 18th of October, the surveyors had completed the survey and left the place, leaving only Job V. Stiles and family, and Edward Paine, who were the only persons that passed the succeeding winter in this place. Their residence was a log cabin that stood on a spot of ground long afterward occupied by the Commercial Bank. Their nearest neighbors were at Conneaut, where Judge Kingsbury lived; at Fort McIntosh, on the south or east, at the mouth of Big Beaver, and at the mouth of the river Raisin, on the west.

The next season, the surveying party came again to Cleveland, which they made their headquarters. Early in the spring, Judge Kingsbury came over from Conneaut, bringing with him Elijah Guun, who had a short time before joined him. Soon after, Maj. Lorenzo Carter and Ezekiel Hawley came with their families. These were about all who are known to have settled in this place that summer. The next year, 1798, Rodolphus Edwards and Nathaniel Doane and their families settled in Cleveland. Mr. Doane had been ninety-two days on his journey from Chatham, Conn. In the latter part of the summer and fall, nearly every person in the settlement was down with the bilious fever or with the ague. Mr. Doane's family consisted of nine persons, of whom Seth, a lad sixteen years of age, was the only one able to care for

them. Such was the severity of the fever, that any one having only the ague was deemed quite fortunate. Much suffering for proper food and medicines followed. The only way the Doane family was supplied for two months or more, was through the exertions of this boy, who went daily, after having had one attack of the chills, to Judge Kingsbury's in Newburg—five miles away, where the Judge now lived—got a peck of corn, mashed it in a hand-mill, waited until a second attack of the chills passed over, and then returned. At one time, for several days, he was too ill to make the trip, during which turnips comprised the chief article of diet. Fortunately, Maj. Carter, having only the ague, was enabled with his trusty rifle and dogs to procure an abundance of venison and other wild game. His family, being somewhat acclimated, suffered less than many others. Their situation can hardly now be realized. "Destitute of a physician, and with few medicines, necessity taught them to use such means as nature had placed within their reach. They substituted pills from the extract of the bitternut bark for calomel, and dogwood and cherry bark for quinine."

In November, four men, who had so far recovered as to have ague attacks no oftener than once in two or three days, started in the only boat for Walnut Creek, Penn., to obtain a winter's supply of flour. When below Euclid Creek, a storm drove them ashore, broke their boat, and compelled their return. During the winter and summer following, the settlers had no flour, except that ground in hand and coffee mills, which was, however, considered very good. Not all had even that. During the summer, the Connecticut Land Company opened the first road on the Reserve, which commenced about ten miles south of the lake shore, on the Pennsylvania State line, and extended to Cleveland. In January, 1799, Mr. Doane moved to Doane's Corners, leaving only Maj. Carter's family in Cleveland, all the rest leaving as soon as they were well enough. For fifteen months, the Major and his family were the only white persons left on the town site. During the spring, Wheeler W. Williams and Maj. Wyatt built the first grist-mill on the Reserve, on the site of Newburg. It was looked upon as a very valuable accession to the neighborhood. Prior to this, each family had its own hand-mill in one of the corners of the cabin. The old mill is thus described by a pioneer:

"The stones were of the common grindstone grit, about four inches thick, and twenty in diame-

ter. The runner, or upper, was turned by hand, by a pole set in the top of it, near the outer edge. The upper end of the pole was inserted into a hole in a board fastened above to the joists, immediately over the hole in the verge of the runner. One person fed the corn into the eye—a hole in the center of the runner—while another turned. It was very hard work to grind, and the operators alternately exchanged places."

In 1800, several settlers came to the town and a more active life was the result. From this time, Cleveland began to progress. The 4th of July, 1801, the first ball in town was held at Major Carter's log cabin, on the hill-side. John and Benjamin Wood, and R. H. Blinn were managers; and Maj. Samuel Jones, musician and master of ceremonies. The company numbered about thirty, very evenly divided, for the times, between the sexes. "Notwithstanding the dancers had a rough puncheon floor, and no better beverage to enliven their spirits than sweetened whisky, yet it is doubtful if the anniversary of American independence was ever celebrated in Cleveland by a more joyful and harmonious company than those who danced the scamper-down, double-shuffle, western-swing and half-moon, that day, in Maj. Carter's cabin." The growth of the town, from this period on, remained prosperous. The usual visits of the Indians were made, ending in their drunken carousals and fights. Deer and other wild animals furnished abundant meat. The settlement was constantly augmented by new arrivals, so that, by 1814, Cleveland was incorporated as a town, and, in 1836, as a city. Its harbor is one of the best on the lakes, and hence the merchandise of the lakes has always been attracted thither. Like Cincinnati and Chillicothe, it became the nucleus of settlements in this part of the State, and now is the largest city in Northern Ohio.

One of the earliest settlements made in the Western Reserve, and by some claimed as the first therein, was made on the site of Youngstown, Mahoning County, by a Mr. Young, afterward a Judge, in the summer of 1796. During this summer, before the settlements at Cuyahoga and Conneaut were made, Mr. Young and Mr. Wilcott, proprietors of a township of land in Northeastern Ohio, came to their possessions and began the survey of their land. Just when they came is not known. They were found here by Col. James Hillman, then a trader in the employ of Duncan & Wilson, of Pittsburgh, "who had been forwarding goods across the country by pack-saddle horses since

1786, to the mouth of the Cuyahoga, thence to be shipped on the schooner Mackinaw to Detroit. Col. Hillman generally had charge of all these caravans, consisting sometimes of ninety horses and ten men. They commonly crossed the Big Beaver four miles below the mouth of the Shenango, thence up the left bank of the Mahoning—called by the Indians "*Mahoni*" or "*Mahonick*," signifying the "lick" or "at the lick"—crossing it about three miles below the site of Youngstown, thence by way of the Salt Springs, over the sites of Milton and Ravenna, crossing the Cuyahoga at the mouth of Breakneck and again at the mouth of Tinker's Creek, thence down the river to its mouth, where they had a log hut in which to store their goods. This hut was there when the surveyors came, but at the time unoccupied. At the mouth of Tinker's Creek were a few log huts built by Moravian Missionaries. These were used only one year, as the Indians had gone to the Tuscarawas River. These and three or four cabins at the Salt Springs were the only buildings erected by the whites prior to 1796, in Northeastern Ohio. Those at the Salt Springs were built at an early day for the accommodation of whites who came from Western Pennsylvania to make salt. The tenants were dispossessed in 1785 by Gen. Harmar. A short time after, one or two white men were killed by the Indians here. In 1788, Col. Hillman settled at Beavertown, where Duncan & Wilson had a store for the purpose of trading with the Indians. He went back to Pittsburgh soon after, however, owing to the Indian war, and remained there till its close, continuing in his business whenever opportunity offered. In 1796, when returning from one of his trading expeditions alone in his canoe down the Mahoning River, he discovered a smoke on the bank near the present town of Youngstown, and on going to the spot found Mr. Young and Mr. Wolcott, as before mentioned. A part of Col. Hillman's cargo consisted of whisky, a gallon or so of which he still had. The price of "fire-water" then was \$1 per quart in the currency of the country, a deerskin being legal tender for \$1, and a doeskin for 50 cents. Mr. Young proposed purchasing a quart, and having a frolic on its contents during the evening, and insisted on paying Hillman his customary price. Hillman urged that inasmuch as they were strangers in the country, civility required him to furnish the means for the entertainment. Young, however, insisted, and taking the deerskin used for his bed—the only one he had—

paid for his quart of whisky, and an evening's frolic was the result.

"Hillman remained a few days, when they accompanied him to Beaver Town to celebrate the 4th, and then all returned, and Hillman erected a cabin on the site of Youngstown. It is not certain that they remained here at this time, and hence the priority of actual settlement is generally conceded to Conneaut and Cleveland. The next year, in the fall, a Mr. Brown and one other person came to the banks of the Mahoning and made a permanent settlement. The same season Uriah Holmes and Titus Hayes came to the same locality, and before winter quite a settlement was to be seen here. It proceeded quite prosperously until the wanton murder of two Indians occurred, which, for a time, greatly excited the whites, lest the Indians should retaliate. Through the efforts of Col. Hillman, who had great influence with the natives, they agreed to let the murderers stand a trial. They were acquitted upon some technicality. The trial, however, pacified the Indians, and no trouble came from the unwarranted and unfortunate circumstance, and no check in the emigration or prosperity of the colony occurred."*

As soon as an effective settlement had been established at Youngstown, others were made in the surrounding country. One of these was begun by William Fenton in 1798, on the site of the present town of Warren, in Trumbull County. He remained here alone one year, when he was joined by Capt. Ephraim Quimby. By the last of September, the next year, the colony had increased to sixteen, and from that date on continued prosperously. Once or twice they stood in fear of the Indians, as the result of quarrels induced by whisky. Sagacious persons generally saved any serious outbreak and pacified the natives. Mr. Badger, the first missionary on the Reserve, came to the settlement here and on the Mahoning, as soon as each was made, and, by his earnest labors, succeeded in forming churches and schools at an early day. He was one of the most efficient men on the Reserve, and throughout his long and busy life, was well known and greatly respected. He died in 1846, aged eighty-nine years.

The settlements given are about all that were made before the close of 1797. In following the narrative of these settlements, attention is paid to the chronological order, as far as this can be done. Like those settlements already made, many which

are given as occurring in the next year, 1798, were actually begun earlier, but were only temporary preparations, and were not considered as made until the next year.

Turning again to the southern portion of Ohio, the Scioto, Muskingum and Miami Valleys come prominently into notice. Throughout the entire Eastern States they were still attracting attention, and an increased emigration, busily occupying their verdant fields, was the result. All about Chillicothe was now well settled, and, up the banks of that stream, prospectors were selecting sites for their future homes.

In 1797, Robert Armstrong, George Skidmore, Lucas Sullivan, William Domigan, James Marshall, John Dill, Jacob Grubb, Jacob Overdier, Arthur O'Hara, John Brickell, Col. Culbertson, the Deardorfs, McElvains, Selles and others, came to what is now Franklin County, and, in August, Mr. Sullivan and some others laid out the town of Franklinton, on the west bank of the Scioto, opposite the site of Columbus. The country about this locality had long been the residence of the Wyandots, who had a large town on the city's site, and cultivated extensive fields of corn on the river bottoms. The locality had been visited by the whites as early as 1780, in some of their expeditions, and the fertility of the land noticed. As soon as peace was assured, the whites came and began a settlement, as has been noted. Soon after Franklinton was established, a Mr. Springer and his son-in-law, Osborn, settled on the Big Darby, and, in the summer of 1798, a scattering settlement was made on Alum Creek. About the same time settlers came to the mouth of the Gahannah, and along other water-courses. Franklinton was the point to which emigrants came, and from which they always made their permanent location. For several years there was no mill, nor any such commodity, nearer than Chillicothe. A hand-mill was constructed in Franklinton, which was commonly used, unless the settlers made a trip to Chillicothe in a canoe. Next, a horse-mill was tried; but not till 1805, when Col. Kilbourne built a mill at Worthington, settled in 1803, could any efficient grinding be done. In 1789, a small store was opened in Franklinton, by James Scott, but, for seven or eight years, Chillicothe was the nearest post office. Often, when the neighbors wanted mail, one of their number was furnished money to pay the postage on any letters that might be waiting, and sent for the mail. At first, as in all new localities, a great deal of sickness, fever and ague, prevailed.

* Recollections of Col. Hillman.—*Hove's Annals.*

As the people became acclimated, this, however, disappeared.

The township of Sharon in this county has a history similar to that of Granville Township in Licking County. It was settled by a "Scioto Company," formed in Granby, Conn., in the winter of 1801-02, consisting at first of eight associates. They drew up articles of association, among which was one limiting their number to forty, each of whom must be unanimously chosen by ballot, a single negative being sufficient to prevent an election. Col. James Kilbourne was sent out the succeeding spring to explore the country and select and purchase a township for settlement. He returned in the fall without making any purchase, through fear that the State Constitution, then about to be formed, would tolerate slavery, in which case the project would have been abandoned. While on this visit, Col. Kilbourne compiled from a variety of sources the first map made of Ohio. Although much of it was conjectured, and hence inaccurate, it was very valuable, being correct as far as the State was then known.

"As soon as information was received that the constitution of Ohio prohibited slavery, Col. Kilbourne purchased the township he had previously selected, within the United States military land district, and, in the spring of 1803, returned to Ohio, and began improvements. By the succeeding December, one hundred settlers, mainly from Hartford County, Conn., and Hampshire County, Mass., arrived at their new home. Obeying to the letter the agreement made in the East, the first cabin erected was used for a schoolhouse and a church of the Protestant Episcopal denomination; the first Sabbath after the arrival of the colony, divine service was held therein, and on the arrival of the eleventh family a school was opened. This early attention to education and religion has left its favorable impress upon the people until this day. The first 4th of July was uniquely and appropriately celebrated. Seventeen gigantic trees, emblematical of the seventeen States forming the Union, were cut, so that a few blows of the ax, at sunrise on the 4th, prostrated each successively with a tremendous crash, forming a national salute novel in the world's history."*

The growth of this part of Ohio continued without interruption until the establishment of the State capital at Columbus, in 1816. The town was laid out in 1812, but, as that date is considered re-

mote in the early American settlements, its history will be left to succeeding pages, and there traced when the history of the State capital and State government is given.

The site of Zanesville, in Muskingum County, was early looked upon as an excellent place to form a settlement, and, had not hostilities opened in 1791, with the Indians, the place would have been one of the earliest settled in Ohio. As it was, the war so disarranged matters, that it was not till 1797 that a permanent settlement was effected.

The Muskingum country was principally occupied, in aboriginal times, by the Wyandots, Delawares, and a few Senecas and Shawanees. An Indian town once stood, years before the settlement of the country, in the vicinity of Duncan's Falls, in Muskingum County, from which circumstance the place is often called "Old Town." Near Dresden, was a large Shawanee town, called Wakatomaca. The graveyard was quite large, and, when the whites first settled here, remains of the town were abundant. It was in this vicinity that the venerable Maj. Cass, father of Lewis Cass, lived and died. He owned 4,000 acres, given him for his military services.

The first settlers on the site of Zanesville were William McCulloh and Henry Crooks. The locality was given to Ebenezer Zane, who had been allowed three sections of land on the Scioto, Muskingum and Hockhocking, wherever the road crossed these rivers, provided other prior claims did not interfere, for opening "Zane's trace." When he located the road across the Muskingum, he selected the place where Zanesville now stands, being attracted there by the excellent water privileges. He gave the section of land here to his brother Jonathan Zane, and J. McIntire, who leased the ferry, established on the road over the Muskingum, to William McCulloh and Henry Crooks, who became thereby the first settlers. The ferry was kept about where the old upper bridge was afterward placed. The ferry-boat was made by fastening two canoes together with a stick. Soon after a flat-boat was used. It was brought from Wheeling, by Mr. McIntire, in 1797, the year after the ferry was established. The road cut out through Ohio, ran from Wheeling, Va., to Maysville, Ky. Over this road the mail was carried, and, in 1798, the first mail ever carried wholly in Ohio was brought up from Marietta to McCulloh's cabin by Daniel Convers, where, by arrangement of the Postmaster General, it met a mail from Wheeling and one from Maysville.

*Howe's Collections.

McCulloh, who could hardly read, was authorized to assort the mails and send each package in its proper direction. For this service he received \$30 per annum; but owing to his inability to read well, Mr. Convers generally performed the duty. At that time, the mails met here once a week. Four years after, the settlement had so increased that a regular post office was opened, and Thomas Dowden appointed Postmaster. He kept his office in a wooden building near the river bank.

Messrs. Zane and McIntire laid out a town in 1799, which they called Westbourn. When the post office was established, it was named Zanesville, and in a short time the village took the same name. A few families settled on the west side of the river, soon after McCulloh arrived, and as this locality grew well, not long after a store and tavern was opened here. Mr. McIntire built a double log cabin, which was used as a hotel, and in which Louis Philippe, King of France, was once entertained. Although the fare and accommodations were of the pioneer period, the honorable guest seems to have enjoyed his visit, if the statements of Lewis Cass in his "Camp and Court of Louis Philippe" may be believed.

In 1804, Muskingum County was formed by the Legislature, and, for a while, strenuous efforts made to secure the State capital by the citizens of Zanesville. They even erected buildings for the use of the Legislature and Governor, and during the session of 1810-11, the temporary seat of government was fixed here. When the permanent State capital was chosen in 1816, Zanesville was passed by, and gave up the hope. It is now one of the most enterprising towns in the Muskingum Valley.

During the summer of 1797, John Knoop, then living four miles above Cincinnati, made several expeditions up the Miami Valley and selected the land on which he afterward located. The next spring Mr. Knoop, his brother Benjamin, Henry Garard, Benjamin Hamlet and John Tildus established a station in what is now Miami County, near the present town of Staunton Village. That summer, Mrs. Knoop planted the first apple-tree in the Miami* country. They all lived together for greater safety for two years, during which time they were occupied clearing their farms and erecting dwellings. During the summer, the site of Piqua was settled, and three young men located at a place known as "Freeman's Prairie." Those who

settled at Piqua were Samuel Hilliard, Job Garard, Shadrac Hudson, Jonah Rollins, Daniel Cox, Thomas Rich, and a Mr. Hunter. The last named came to the site of Piqua first in 1797, and selected his home. Until 1799, these named were the only ones in this locality; but that year emigration set in, and very shortly occupied almost all the bottom land in Miami County. With the increase of emigration, came the comforts of life, and mills, stores and other necessary aids to civilization, were ere long to be seen.

The site of Piqua is quite historic, being the theater of many important Indian occurrences, and the old home of the Shawanees, of which tribe Tecumseh was a chief. During the Indian war, a fort called Fort Piqua was built, near the residence of Col. John Johnston, so long the faithful Indian Agent. The fort was abandoned at the close of hostilities.

When the Miami Canal was opened through this part of the State, the country began rapidly to improve, and is now probably one of the best portions of Ohio.

About the same time the Miami was settled, a company of people from Pennsylvania and Virginia, who were principally of German and Irish descent, located in Lawrence County, near the iron region. As soon as that ore was made available, that part of the State rapidly filled with settlers, most of whom engaged in the mining and working of iron ore. Now it is very prosperous.

Another settlement was made the same season, 1797, on the Ohio side of the river, in Columbiana County. The settlement progressed slowly for a while, owing to a few difficulties with the Indians. The celebrated Adam Poe had been here as early as 1782, and several localities are made locally famous by his and his brother's adventures.

In this county, on Little Beaver Creek, near its mouth, the second paper-mill west of the Alleghanies was erected in 1805-6. It was the pioneer enterprise of the kind in Ohio, and was named the Ohio Paper-Mill. Its proprietors were John Bever and John Coulter.

One of the most noted localities in the State is comprised in Greene County. The Shawanee town, "Old Chillicothe," was on the Little Miami, in this county, about three miles north of the site of Xenia. This old Indian town was, in the annals of the West, a noted place, and is frequently noticed. It is first mentioned in 1773, by Capt. Thomas Bullitt, of Virginia, who boldly advanced alone into the town and obtained the consent of

* The word Miami in the Indian tongue signified mother. The Miami's were the original owners of the valley by that name, and affirmed they were created there.

the Indians to go on to Kentucky and make his settlement at the falls of the Ohio. His audacious bravery gained his request. Daniel Boone was taken prisoner early in 1778, with twenty-seven others, and kept for a time at Old Chillicothe. Through the influence of the British Governor, Hamilton, who had taken a great fancy to Boone, he and ten others were sent to Detroit. The Indians, however, had an equal fancy for the brave frontiersman, and took him back to Chillicothe, and adopted him into their tribe. About the 1st of June he escaped from them, and made his way back to Kentucky, in time to prevent a universal massacre of the whites. In July, 1779, the town was destroyed by Col. John Bowman and one hundred and sixty Kentuckians, and the Indians dispersed.

The Americans made a permanent settlement in this county in 1797 or 1798. This latter year, a mill was erected in the confines of the county, which implies the settlement was made a short time previously. A short distance east of the mill two block-houses were erected, and it was intended, should it become necessary, to surround them and the mill with pickets. The mill was used by the settlers at "Dutch Station," in Miami County, fully thirty miles distant. The richness of the country in this part of the State attracted a great number of settlers, so that by 1803 the county was established, and Xenia laid out, and designated as the county seat. Its first court house, a primitive log structure, was long preserved as a curiosity. It would indeed be a curiosity now.

Zane's trace, passing from Wheeling to Maysville, crossed the Hoekhoeking* River, in Fairfield County, where Lancaster is now built. Mr. Zane located one of his three sections on this river, covering the site of Lancaster. Following this trace in 1797, many individuals noted the desirableness of the locality, some of whom determined to return and settle. "The site of the city had in former times been the home of the Wyandots, who had a town here, that, in 1790, contained over 500 wigwams and more than 1,000 souls. Their town was called *Tarhee*, or, in English, the *Crane-town*, and derived its name from the princi-

pal chief of that tribe. Another portion of the tribe then lived at Toby-town, nine miles west of Tarhe-town (now Royaltown), and was governed by an inferior chief called Toby. The chief's wigwam in Tarhe stood on the bank of the prairie, near a beautiful and abundant spring of water, whose outlet was the river. The wigwams of the Indians were built of the bark of trees, set on poles, in the form of a sugar-camp, with one square open, fronting a fire, and about the height of a man. The Wyandot tribe that day numbered about 500 warriors. By the treaty of Greenville, they ceded all their territory, and the majority, under their chief, removed to Upper Sandusky. The remainder lingered awhile, loath to leave the home of their ancestors, but as game became scarce, they, too, left for better hunting-grounds."*

In April, 1798, Capt. Joseph Hunter, a bold, enterprising man, settled on Zane's trace, on the bank of the prairie, west of the crossings, at a place since known as "Hunter's settlement." For a time, he had no neighbors nearer than the settlers on the Muskingum and Scioto Rivers. He lived to see the country he had found a wilderness, full of the homes of industry. His wife was the first white woman that settled in the valley, and shared with him all the privations of a pioneer life.

Mr. Hunter had not been long in the valley till he was joined by Nathaniel Wilson, John and Allen Green, John and Joseph McMullen, Robert Cooper, Isaae Shaefer, and a few others, who erected cabins and planted corn. The next year, the tide of emigration came in with great force. In the spring, two settlements were made in Greenfield Township, each settlement containing twenty or more families. One was called the Forks of the Hoekhoeking, the other, Yankeetown. Settlements were also made along the river below Hunter's, on Rush Creek, Raccoon and Indian Creeks, Pleasant Run, Felter's Run, at Tobeytown, Muddy Prairie, and on Clear Creek. In the fall, —1799—Joseph Loveland and Hezekiah Smith built a log grist-mill at the Upper Falls of the Hoekhoeking, afterward known as Rock Mill. This was the first mill on this river. In the latter part of the year, a mail route was established over the trace. The mail was carried through on horseback, and, in the settlements in this locality, was left at the cabin of Samuel Coates, who lived on the prairie at the crossings of the river.

* The word Hoek-hock-ing in the Delaware language signifies a bottle; the Shawanees have it *Wen-tha-kugh-qua sepe*, i.e.; bottle river. John White in the American Pioneer says: "About seven miles north-west of Lancaster, there is a fall in the Hoekhoeking of about twenty feet. Above the fall for a short distance, the creek is very narrow and straight forming a neck, while at the falls it suddenly widens on each side and swells into the appearance of the body of a bottle. The whole, when seen from above, appears exactly in the shape of a bottle, and from this fact the Indians called the river Hoek-hock-ing."—*Howe's Collections*.

* Lecture of George Sanderson.—*Howe's Collections*.

In the fall of the next year, Ebenezer Zane laid out Lancaster, which, until 1805, was known as New Lancaster. The lots sold very rapidly, at \$50 each, and, in less than one year, quite a village appeared. December 9, the Governor and Judges of the Northwest Territory organized Fairfield County, and made Lancaster the county seat. The year following, the Rev. John Wright, a minister of the Presbyterian Church, came, and from that time on schools and churches were established and thereafter regularly maintained at this place.

Not far from Lancaster are immense mural escarpments of sandstone formation. They were noted among the aborigines, and were, probably, used by them as places of outlook and defense.

The same summer Fairfield County was settled, the towns of Bethel and Williamsburg, in Clermont County, were settled and laid out, and in 1800, the county was erected.

A settlement was also made immediately south of Fairfield County, in Hocking County, by Christian Westenhaver, a German, from near Hagerstown, Md. He came in the spring of 1798, and was soon joined by several families, who formed quite a settlement. The territory included in the county remained a part of Ross, Athens and Fairfield, until 1818, when Hocking County was erected, and Logan, which had been laid out in 1816, was made the county seat.

The country comprised in the county is rather broken, especially along the Hoekhocking River. This broken country was a favorite resort of the Wyandot Indians, who could easily hide in the numerous grottoes and ravines made by the river and its affluents as the water cut its way through the sandstone rocks.

In 1798, soon after Zane's trace was cut through the country, a Mr. Graham located on the site of Cambridge, in Guernsey County. His was then the only dwelling between Wheeling and Zanesville, on the trace. He remained here alone about two years, when he was succeeded by George Beymer, from Somerset, Penn. Both these persons kept a tavern and ferry over Will's Creek. In April, 1803, Mr. Beymer was succeeded by John Beatty, who came from Loudon, Va. His family consisted of eleven persons. The Indians hunted in this vicinity, and were frequent visitors at the tavern. In June, 1806, Cambridge was laid out, and on the day the lots were offered for sale, several families from the British Isle of Guernsey, near the coast of France, stopped here on their

way to the West. They were satisfied with the location and purchased many of the lots, and some land in the vicinity. They were soon followed by other families from the same place, all of whom settling in this locality gave the name to the county when it was erected in 1810.

A settlement was made in the central part of the State, on Darby Creek, in Union County, in the summer of 1798, by James and Joshua Ewing. The next year, they were joined by Samuel and David Mitchell, Samuel Mitchell, Jr., Samuel Kirkpatrick and Samuel McCullough, and, in 1800, by George and Samuel Reed, Robert Snodgrass and Paul Hodgson.

"James Ewing's farm was the site of an ancient and noted Mingo town, which was deserted at the time the Mingo towns, in what is now Logan County, were destroyed by Gen. Logan, of Kentucky, in 1786. When Mr. Ewing took possession of his farm, the cabins were still standing, and, among others, the remains of a blacksmith's shop, with coal, cinders, iron-dross, etc. Jonathan Alder, formerly a prisoner among the Indians, says the shop was carried on by a renegade white man, named Butler, who lived among the Mingoos. Extensive fields had formerly been cultivated in the vicinity of the town."*

Soon after the settlement was established, Col. James Curry located here. He was quite an influential man, and, in 1820, succeeded in getting the county formed from portions of Delaware, Franklin, Madison and Logan, and a part of the old Indian Territory. Marysville was made the county seat.

During the year 1789, a fort, called Fort Steuben, was built on the site of Steubenville, but was dismantled at the conclusion of hostilities in 1795. Three years after, Bezaleel Wells and Hon. James Ross, for whom Ross County was named, located the town of Steubenville about the old fort, and, by liberal offers of lots, soon attracted quite a number of settlers. In 1805, the town was incorporated, and then had a population of several hundred persons. Jefferson County was created by Gov. St. Clair, July 29, 1797, the year before Steubenville was laid out. It then included the large scope of country west of Pennsylvania; east and north of a line from the mouth of the Cuyahoga; southwardly to the Muskingum, and east to the Ohio; including, in its territories, the cities of Cleveland, Canton, Steubenville and War-

* Howe's Collections.

ren. Only a short time, however, was it allowed to retain this size, as the increase in emigration rendered it necessary to erect new counties, which was rapidly done, especially on the adoption of the State government.

The county is rich in early history, prior to its settlement by the Americans. It was the home of the celebrated Mingo chief, Logan, who resided awhile at an old Mingo town, a few miles below the site of Steubenville, the place where the troops under Col. Williamson rendezvoused on their infamous raid against the Moravian Indians; and also where Col. Crawford and his men met, when starting on their unfortunate expedition.

In the Reserve, settlements were often made remote from populous localities, in accordance with the wish of a proprietor, who might own a tract of country twenty or thirty miles in the interior. In the present county of Geauga, three families located at Burton in 1798. They lived at a considerable distance from any other settlement for some time, and were greatly inconvenienced for the want of mills or shops. As time progressed, however, these were brought nearer, or built in their midst, and, ere long, almost all parts of the Reserve could show some settlement, even if isolated.

The next year, 1799, settlements were made at Ravenna, Deerfield and Palmyra, in Portage County. Hon. Benjamin Tappan came to the site of Ravenna in June, at which time he found one white man, a Mr. Honey, living there. At this date, a solitary log cabin occupied the sites of Buffalo and Cleveland. On his journey from New England, Mr. Tappan fell in with David Hudson, the founder of the Hudson settlement in Summit County. After many days of travel, they landed at a prairie in Summit County. Mr. Tappan left his goods in a cabin, built for the purpose, under the care of a hired man, and went on his way, cutting a road to the site of Ravenna, where his land lay. On his return for a second load of goods, they found the cabin deserted, and evidences of its plunder by the Indians. Not long after, it was learned that the man left in charge had gone to Mr. Hudson's settlement, he having set out immediately on his arrival, for his own land. Mr. Tappan gathered the remainder of his goods, and started back for Ravenna. On his way one of his oxen died, and he found himself in a vast forest, away from any habitation, and with one dollar in money. He did not falter a moment, but sent his hired man, a faithful fellow, to Erie, Penn., a distance of one hundred miles through the wilderness, with the compass for his

guide, requesting from Capt. Lyman, the commander at the fort there, a loan of money. At the same time, he followed the township lines to Youngstown, where he became acquainted with Col. James Hillman, who did not hesitate to sell him an ox on credit, at a fair price. He returned to his load in a few days, found his ox all right, hitched the two together and went on. He was soon joined by his hired man, with the money, and together they spent the winter in a log cabin. He gave his man one hundred acres of land as a reward, and paid Col. Hillman for the ox. In a year or two he had a prosperous settlement, and when the county was erected in 1807, Ravenna was made the seat of justice.

About the same time Mr. Tappan began his settlement, others were commenced in other localities in this county. Early in May, 1799, Lewis Day and his son Horatio, of Granby, Conn., and Moses Tibbals and Green Frost, of Granville, Mass., left their homes in a one-horse wagon, and, the 29th of May, arrived in what is now Deerfield Township. Theirs was the first wagon that had ever penetrated farther westward in this region than Canfield. The country west of that place had been an unbroken wilderness until within a few days. Capt. Caleb Atwater, of Wallingford, Conn., had hired some men to open a road to Township No. 1, in the Seventh Range, of which he was the owner. This road passed through Deerfield, and was completed to that place when the party arrived at the point of their destination. These emigrants selected sites, and commenced clearing the land. In July, Lewis Ely arrived from Granville, and wintered here, while those who came first, and had made their improvements, returned East. The 4th of March, 1800, Alva Day (son of Lewis Day), John Campbell and Joel Thrall arrived. In April, George and Robert Taylor and James Laughlin, from Pennsylvania, with their families, came. Mr. Laughlin built a grist-mill, which was of great convenience to the settlers. July 29, Lewis Day returned with his family and his brother-in-law, Maj. Rogers, who, the next year, also brought his family.

"Much suffering was experienced at first on account of the scarcity of provisions. They were chiefly supplied from the settlements east of the Ohio River, the nearest of which was Georgetown, forty miles away. The provisions were brought on pack-horses through the wilderness. August 22, Mrs. Alva Day gave birth to a child—a female—the first child born in the township.

November 7, the first wedding took place. John Campbell and Sarah Ely were joined in wedlock by Calvin Austin, Esq., of Warren. He was accompanied from Warren, a distance of twenty-seven miles, by Mr. Pease, then a lawyer, afterward a well-known Judge. They came on foot, there being no road; and, as they threaded their way through the woods, young Pease taught the Justice the marriage ceremony by oft repetition.

"In 1802, Franklin Township was organized, embracing all of Portage and parts of Trumbull and Summit Counties. About this time the settlement received accessions from all parts of the East. In February, 1801, Rev. Badger came and began his labors, and two years later Dr. Shadrac Bostwick organized a Methodist Episcopal church.* The remaining settlement in this county, Palmyra, was begun about the same time as the others, by David Daniels, from Salisbury, Conn. The next year he brought out his family. Soon after he was joined by E. N. and W. Bacon, E. Cutler, A. Thurber, A. Preston, N. Bois, J. T. Baldwin, T. and C. Gilbert, D. A. and S. Waller, N. Smith, Joseph Fisher, J. Tuttle and others.

"When this region was first settled, there was an Indian trail commencing at Fort McIntosh (Beaver, Penn.), and extending westward to Sandusky and Detroit. The trail followed the highest ground. Along the trail, parties of Indians were frequently seen passing, for several years after the whites came. It seemed to be the great aboriginal thoroughfare from Sandusky to the Ohio River. There were several large piles of stones on the trail in this locality, under which human skeletons have been discovered. These are supposed to be the remains of Indians slain in war, or murdered by their enemies, as tradition says it is an Indian custom for each one to cast a stone on the grave of an enemy, whenever he passes by. These stones appear to have been picked up along the trail, and cast upon the heaps at different times.

"At the point where this trail crosses Silver Creek, Fredrick Daniels and others, in 1814, discovered, painted on several trees, various devices, evidently the work of Indians. The bark was carefully shaved off two-thirds of the way around, and figures cut upon the wood. On one of these was delineated seven Indians, equipped in a particular manner, one of whom was without a head. This was supposed to have been made by a party on their return westward, to give intelligence to

their friends behind, of the loss of one of their party at this place; and, on making search, a human skeleton was discovered near by."*

The celebrated Indian hunter, Brady, made his remarkable leap across the Cuyahoga, in this county. The county also contains Brady's Pond, a large sheet of water, in which he once made his escape from the Indians, from which circumstance it received its name.

The locality comprised in Clark County was settled the same summer as those in Summit County. John Humphries came to this part of the State with Gen. Simon Kenton, in 1799. With them came six families from Kentucky, who settled north of the site of Springfield. A fort was erected on Mad River, for security against the Indians. Fourteen cabins were soon built near it, all being surrounded by a strong picket fence. David Lowery, one of the pioneers here, built the first flat-boat, to operate on the Great Miami, and, in 1800, made the first trip on that river, coming down from Dayton. He took his boat and cargo on down to New Orleans, where he disposed of his load of "five hundred venison hams and bacon."

Springfield was laid out in March, 1801. Griffith Foss, who came that spring, built a tavern, which he completed and opened in June, remaining in this place till 1814. He often stated that when emigrating West, his party were four days and a half getting from Franklinton, on the Scioto, to Springfield, a distance of forty-two miles. When crossing the Big Darby, they were obliged to carry all their goods over on horseback, and then drag their wagons across with ropes, while some of the party swam by the side of the wagon, to prevent its upsetting. The site of the town was of such practical beauty and utility, that it soon attracted a large number of settlers, and, in a few years, Springfield was incorporated. In 1811, a church was built by the residents for the use of all denominations.

Clark County is made famous in aboriginal history, as the birthplace and childhood home of the noted Indian, Tecumseh.† He was born in

* Howe's Collections.

† Tecumseh, or Tecumshe, was a son of Puckeshinwa, a member of the Kiscopoke tribe, and Methoataske, of the Turtle tribe of the Shawnee nation. They removed from Florida to Ohio soon after their marriage. The father, Puckeshinwa, rose to the rank of a chief, and fell at the battle of Point Pleasant, in 1774. After his death, the mother, Methoata-ke, returned to the south, where she died at an advanced age. Tecumseh was born about the year 1768. He early showed a passion for war, and, when only 27 years of age, was made a chief. The next year he removed to Deer Creek, in the vicinity of Urbana, and from there to the site of Piqua, on the Great Miami. In 1798 he accepted the invitation of the Delawares in the vicinity of White River, Indiana, and from that time made

* Howe's Collections.

the old Indian town of Piqua, the ancient Piqua of the Shawanees, on the north side of Mad River, about five miles west of Springfield. The town was destroyed by the Kentucky Rangers under Gen. George Rogers Clarke in 1780, at the same time he destroyed "Old Chillicothe." Immense fields of standing corn about both towns were cut down, compelling the Indians to resort to the hunt with more than ordinary vigor, to sustain themselves and their wives and children. This search insured safety for some time on the borders. The site of Cadiz, in Harrison County, was settled in April, 1799, by Alexander Henderson and his family, from Washington County, Penn. When they arrived, they found neighbors in the persons of Daniel Peterson and his family, who lived near the forks of Short Creek, and who had preceded them but a very short time. The next year, emigrants began to cross the Ohio in great numbers, and in five or six years large settlements could be seen in this part of the State. The county was erected in 1814, and Cadiz, laid out in 1803, made the county seat.

While the settlers were locating in and about Cadiz, a few families came to what is now Monroe County, and settled near the present town of Beallsville. Shortly after, a few persons settled on the Clear Fork of the Little Muskingum, and a few others on the east fork of Duck Creek. The

next season all these settlements received additions and a few other localities were also occupied. Before long the town of Beallsville was laid out, and in time became quite populous. The county was not erected until 1813, and in 1815 Woodsfield was laid out and made the seat of justice.

The opening of the season of 1800—the dawn of a new century—saw a vast emigration westward. Old settlements in Ohio received immense increase of emigrants, while, branching out in all directions like the *radii* of a circle, other settlements were constantly formed until, in a few years, all parts of the State knew the presence of the white man.

Towns sprang into existence here and there; mills and factories were erected; post offices and post-routes were established, and the comforts and conveniences of life began to appear.

With this came the desire, so potent to the mind of all American citizens, to rule themselves through representatives chosen by their own votes. Hitherto, they had been ruled by a Governor and Judges appointed by the President, who, in turn, appointed county and judicial officers. The arbitrary rulings of the Governor, St. Clair, had arrayed the mass of the people against him, and made the desire for the second grade of government stronger, and finally led to its creation.

CHAPTER X.

FORMATION OF THE STATE GOVERNMENT—OHIO A STATE—THE STATE CAPITALS—LEGISLATION—THE "SWEEPING RESOLUTIONS"—TERRITORIAL AND STATE GOVERNORS.

SETTLEMENTS increased so rapidly in that part of the Northwest Territory included in Ohio, during the decade from 1788 to 1798, despite the Indian war, that the demand for an election of a Territorial Assembly could not be ignored by Gov. St. Clair, who, having ascertained that 5,000 free males resided within the limits of the Territory, issued his proclamation October 29, 1798, directing the electors to elect representatives to a General Assembly. He ordered the election

to be held on the third Monday in December, and directed the representatives to meet in Cincinnati January 22, 1799.

On the day designated, the representatives* assembled at Cincinnati, nominated ten persons, whose names were sent to the President, who selected five to constitute the Legislative Council,

his home with them. He was most active in the war of 1812 against the Americans, and from the time he began his work to unite the tribes, his history is so closely identified therewith that the reader is referred to the history of that war in succeeding pages.

It may not be amiss to say that all stories regarding the manner of his death are considered erroneous. He was undoubtedly killed in the outset of the battle of the Thames in Canada in 1814, and his body secretly buried by the Indians.

*Those elected were: from Washington County, Return Jonathan Meigs and Paul Fearing; from Hamilton County, William Goforth, William McMillan, John Smith, John Ludlow, Robert Benham, Aaron Caldwell and Isaac Martiu; from St. Clair County (Illinois), Shadrach Bond; from Knox County (Indiana), John Small; from Randolph County (Illinois), John Edgar; from Wayne County, Solomon Sibley, Jacob Visgar and Charles F. Chabert de Joncaire; from Adams County, Joseph Darlington and Nathaniel Massie; from Jefferson County, James Pritchard; from Ross County, Thomas Worthington, Elias Langham, Samuel Findley and Edward Tiffin. The five gentlemen, except Vanderburgh, chosen as the Upper House were all from counties afterward included in Ohio.

or Upper House. These five were Jacob Burnet, James Findley, Henry Vanderburgh, Robert Oliver and David Vance. On the 3d of March, the Senate confirmed their nomination, and the Territorial Government of Ohio*—or, more properly, the Northwest—was complete. As this comprised the essential business of this body, it was prorogued by the Governor, and the Assembly directed to meet at the same place September 16, 1799, and proceed to the enactment of laws for the Territory.

That day, the Territorial Legislature met again at Cincinnati, but, for want of a quorum, did not organize until the 24th. The House consisted of nineteen members, seven of whom were from Hamilton County, four from Ross, three from Wayne, two from Adams, one from Jefferson, one from Washington and one from Knox. Assembling both branches of the Legislature, Gov. St. Clair addressed them, recommending such measures to their consideration as, in his judgment, were suited to the condition of the country. The Council then organized, electing Henry Vanderburgh, President; William C. Schenek, Secretary; George Howard, Doorkeeper, and Abraham Carey, Sergeant-at-arms.

The House also organized, electing Edward Tiffin, Speaker; John Reilly, Clerk; Joshua Rowland, Doorkeeper, and Abraham Carey, Sergeant-at-arms.

This was the first legislature elected in the old Northwestern Territory. During its first session, it passed thirty bills, of which the Governor vetoed eleven. They also elected William Henry Harrison, then Secretary of the Territory, delegate to Congress. The Legislature continued in session till December 19, having much to do in forming new laws, when they were prorogued by the Governor, until the first Monday in November, 1800. The second session was held in Chillicothe, which had been designated as the seat of government by Congress, until a permanent capital should be selected.

May 7, 1800, Congress passed an act establishing Indiana Territory, including all the country west of the Great Miami River to the Mississippi, and appointed William Henry Harrison its Governor. At the autumn session of the Legislature

*Ohio never existed as a Territory proper. It was known, both before and after the division of the Northwest Territory, as the "Territory northwest of the Ohio River." Still, as the country comprised in its limits was the principal theater of action, the short resume given here is made necessary in the logical course of events. Ohio, as Ohio, never existed until the creation of the State in March, 1803.

of the eastern, or old part of the Territory, William McMillan was elected to the vacancy caused by this act. By the organization of this Territory, the counties of Knox, St. Clair and Randolph, were taken out of the jurisdiction of the old Territory, and with them the representatives, Henry Vanderburgh, Shadrach Bond, John Small and John Edgar.

Before the time for the next Assembly came, a new election had occurred, and a few changes were the result. Robert Oliver, of Marietta, was chosen Speaker in the place of Henry Vanderburgh. There was considerable business at this session; several new counties were to be erected; the country was rapidly filling with people, and where the scruples of the Governor could be overcome, some organization was made. He was very tenacious of his power, and arbitrary in his rulings, affirming that he, alone, had the power to create new counties. This dogmatic exercise of his veto power, his rights as ruler, and his defeat by the Indians, all tended against him, resulting in his displacement by the President. This was done, however, just at the time the Territory came from the second grade of government, and the State was created.

The third session of the Territorial Legislature continued from November 24, 1801, to January 23, 1802, when it adjourned to meet in Cincinnati, the fourth Monday in November, but owing to reasons made obvious by subsequent events, was never held, and the third session marks the decline of the Territorial government.

April 30, 1802, Congress passed an act "to enable the people of the eastern division of the territory northwest of the Ohio River, to form a constitution and State government, and for the admission of such States into the Union on an equal footing with the original States, and for other purposes." In pursuance of this act, an election had been held in this part of the Territory, and members of a constitutional convention chosen, who were to meet at Chillicothe, November 1, to perform the duty assigned them.

The people throughout the country contemplated in the new State were anxious for the adoption of a State government. The arbitrary acts of the Territorial Governor had heightened this feeling; the census of the Territory gave it the lawful number of inhabitants, and nothing stood in its way.

The convention met the day designated and proceeded at once to its duties. When the time arrived for the opening of the Fourth Territorial

Legislature, the convention was in session and had evidently about completed its labors. The members of the Legislature (eight of whom were members of the convention) seeing that a speedy termination of the Territorial government was inevitable, wisely concluded it was inexpedient and unnecessary to hold the proposed session.

The convention concluded its labors the 29th of November. The Constitution adopted at that time, though rather crude in some of its details, was an excellent organic instrument, and remained almost entire until 1851, when the present one was adopted. Either is too long for insertion here, but either will well pay a perusal. The one adopted by the convention in 1802 was never submitted to the people, owing to the circumstances of the times; but it was submitted to Congress February 19, 1803, and by that body accepted, and an act passed admitting Ohio to the Union.

The Territorial government ended March 3, 1803, by the organization, that day, of the State government, which organization defined the present limits of the State.

"We, the people of the Eastern Division of the Territory of the United States, Northwest of the River Ohio, having the right of admission into the General Government as a member of the Union, consistent with the Constitution of the United States, the Ordinance of Congress of one thousand seven hundred and eighty-seven, and of the law of Congress, entitled 'An act to enable the people of the Eastern Division of the Territory of the United States Northwest of the River Ohio, to form a Constitution and a State Government, and for the admission of such State into the Union on an equal footing with the original States, and for other purposes;' in order to establish justice, promote the welfare and secure the blessings of liberty to ourselves and our posterity, do ordain and establish the following Constitution or form of government; and do mutually agree with each other to form ourselves into a free and independent State, by the name of the State of Ohio."*—*Preamble, Constitution of 1802.*

When the convention forming the Constitution, completed its labors and presented the results to Congress, and that body passed the act forming

* The name of the State is derived from the river forming its southern boundary. Its origin is somewhat obscure, but is commonly ascribed to the Indians. On this point, Col. Johnston says: "The Shawanoese called the Ohio River '*Kis-ke-pi-la, Sepe, i. e., 'Eagle River.'*' The Wyandots were in the country generations before the Shawanoese, and, consequently, their name of the river is the primitive one and should stand in preference to all others. Ohio may be called an improvement on the expression, '*O-he-zuh,*' and was, no doubt, adopted by the early French voyagers in their boat-songs, and is substantially the same word as used by the Wyandots: the meaning applied by the French, fair and beautiful '*la belle river,*' being the same precisely as that meant by the Indians—'great, grand and fair to look upon.'"—*Howe's Collections.*

Webster's Dictionary gives the word as of Indian origin, and its meaning to be, "Beautiful."

the State, the territory included therein was divided into nine counties, whose names and dates of erection were as follows:

Washington, July 27, 1788; Hamilton, January 2, 1790; (owing to the Indian war no other counties were erected till peace was restored); Adams, July 10, 1797; Jefferson, July 29, 1797; Ross, August 20, 1798; Clermont, Fairfield and Trumbull, December 9, 1800; Belmont, September 7, 1801. These counties were the thickest-settled part of the State, yet many other localities needed organization and were clamoring for it, but owing to St. Clair's views, he refused to grant their requests. One of the first acts on the assembling of the State Legislature, March 1, 1803, was the creation of seven new counties, viz., Gallia, Scioto, Geauga, Butler, Warren, Greene and Montgomery.

Section Sixth of the "Schedule" of the Constitution required an election for the various officers and Representatives necessary under the new government, to be held the second Tuesday of January, 1803, these officers to take their seats and assume their duties March 3. The Second Article provided for the regular elections, to be held on the second Tuesday of October, in each year. The Governor elected at first was to hold his office until the first regular election could be held, and thereafter to continue in office two years.

The January elections placed Edward Tiffin in the Governor's office, sent Jeremiah Morrow to Congress, and chose an Assembly, who met on the day designated, at Chillicothe. Michael Baldwin was chosen Speaker of the House, and Nathaniel Massie, of the Senate. The Assembly appointed William Creighton, Jr., Secretary of State; Col. Thomas Gibson, Auditor; William McFarland, Treasurer; Return J. Meigs, Jr., Samuel Huntington and William Sprigg, Judges of the Supreme Court; Francis Dunlevy, Wyllys Silliman and Calvin Pease, President Judges of the First, Second and Third Districts, and Thomas Worthington and John Smith, United States Senators. Charles Willing Byrd was made the United States District Judge.

The act of Congress forming the State, contained certain requisitions regarding public schools, the "salt springs," public lands, taxation of Government lands, Symmes' purchase, etc., which the constitutional convention agreed to with a few minor considerations. These Congress accepted, and passed the act in accordance thereto. The First General Assembly found abundance of work

to do regarding these various items, and, at once, set themselves to the task. Laws were passed regarding all these; new counties created; officers appointed for the same, until they could be elected, and courts and machinery of government put in motion. President Judges and lawyers traveled their circuits holding courts, often in the open air or in a log shanty; a constable doing duty as guard over a jury, probably seated on a log under a tree, or in the bushes. The President Judge instructed the officers of new counties in their duties, and though the whole keeping of matters accorded with the times, an honest feeling generally prevailed, inducing each one to perform his part as effectually as his knowledge permitted.

The State continually filled with people. New towns arose all over the country. Excepting the occasional sicknesses caused by the new climate and fresh soil, the general health of the people improved as time went on. They were fully in accord with the President, Jefferson, and carefully nurtured those principles of personal liberty engrafted in the fundamental law of 1787, and later, in the Constitution of the State.

Little if any change occurred in the natural course of events, following the change of government until Burr's expedition and plan of secession in 1805 and 1806 appeared. What his plans were, have never been definitely ascertained. His action related more to the General Government, yet Ohio was called upon to aid in putting down his insurrection—for such it was thought to be—and defeated his purposes, whatever they were. His plans ended only in ignominious defeat; the breaking-up of one of the finest homes in the Western country, and the expulsion of himself and all those who were actively engaged in his scheme, whatever its imports were.

Again, for a period of four or five years, no exciting events occurred. Settlements continued; mills and factories increased; towns and cities grew; counties were created; trade enlarged, and naught save the common course of events transpired to mark the course of time. Other States were made from the old Northwest Territory, all parts of which were rapidly being occupied by settlers. The danger from Indian hostilities was little, and the adventurous whites were rapidly occupying their country. One thing, however, was yet a continual source of annoyance to the Americans, viz., the British interference with the Indians. Their traders did not scruple, nor fail on every opportunity, to aid these sons of the

forest with arms and ammunition as occasion offered, endeavoring to stir them up against the Americans, until events here and on the high seas culminated in a declaration of hostilities, and the war of 1812 was the result. The deluded red men found then, as they found in 1795, that they were made tools by a stronger power, and dropped when the time came that they were no longer needed.

Before the opening of hostilities occurred, however, a series of acts passed the General Assembly, causing considerable excitement. These were the famous "Sweeping Resolutions," passed in 1810. For a few years prior to their passage, considerable discontent prevailed among many of the legislators regarding the rulings of the courts, and by many of these embryo law-makers, the legislative power was considered omnipotent. They could change existing laws and contracts did they desire to, thought many of them, even if such acts conflicted with the State and National Constitutions. The "Sweeping Resolutions" were brought about mainly by the action of the judges in declaring that justices of the peace could, in the collection of debts, hold jurisdiction in amounts not exceeding fifty dollars without the aid of a jury. The Constitution of the United States gave the jury control in all such cases where the amount did not exceed twenty dollars. There was a direct contradiction against the organic law of the land—to which every other law and act is subversive, and when the judges declared the legislative act unconstitutional and hence null and void, the Legislature became suddenly inflamed at their independence, and proceeded at once to punish the administrators of justice. The legislature was one of the worst that ever controlled the State, and was composed of many men who were not only ignorant of common law, the necessities of a State, and the dignity and true import of their office, but were demagogues in every respect. Having the power to impeach officers, that body at once did so, having enough to carry a two-thirds majority, and removed several judges. Further maturing their plans, the "Sweepers," as they were known, construed the law appointing certain judges and civil officers for seven years, to mean seven years from the organization of the State, whether they had been officers that length of time or not. All officers, whether of new or old counties, were construed as included in the act, and, utterly ignoring the Constitution, an act was passed in January, 1810, removing every civil officer in the State.

February 10, they proceeded to fill all these vacant offices, from State officers down to the lowest county office, either by appointment or by ordering an election in the manner prescribed by law.

The Constitution provided that the office of judges should continue for seven years, evidently seven years from the time they were elected, and not from the date of the admission of the State, which latter construction this headlong Legislature had construed as the meaning. Many of the counties had been organized but a year or two, others three or four years; hence an indescribable confusion arose as soon as the new set of officers were appointed or elected. The new order of things could not be made to work, and finally, so utterly impossible did the injustice of the proceedings become, that it was dropped. The decisions of the courts were upheld, and the invidious doctrine of supremacy in State legislation received such a check that it is not likely ever to be repeated.

Another act of the Assembly, during this period, shows its construction. Congress had granted a township of land for the use of a university, and located the township in Symmes' purchase. This Assembly located the university on land outside of this purchase, ignoring the act of Congress, as they had done before, showing not only ignorance of the true scope of law, but a lack of respect unbecoming such bodies.

The seat of government was also moved from Chillicothe to Zanesville, which vainly hoped to be made the permanent State capital, but the next session it was again taken to Chillicothe, and commissioners appointed to locate a permanent capital site.

These commissioners were James Findley, Joseph Darlington, Wylls Silliman, Reason Beall, and William McFarland. It is stated that they reported at first in favor of Dublin, a small town on the Scioto about fourteen miles above Columbus. At the session of 1812-13, the Assembly accepted the proposals of Col. James Johnston, Alexander McLaughlin, John Kerr, and Lyne Starling, who owned the site of Columbus. The Assembly also decreed that the temporary seat of government should remain at Chillicothe until the buildings necessary for the State officers should be

erected, when it would be taken there, forever to remain. This was done in 1816, in December of that year the first meeting of the Assembly being held there.

The site selected for the capital was on the east bank of the Scioto, about a mile below its junction with the Olentangy. Wide streets were laid out, and preparations for a city made. The expectations of the founders have been, in this respect, realized. The town was laid out in the spring of 1812, under the direction of Moses Wright. A short time after, the contract for making it the capital was signed. June 18, the same day war was declared against Great Britain, the sale of lots took place. Among the early settlers were George McCormick, George B. Harvey, John Shields, Michael Patton, Alexander Patton, William Altman, John Collett, William McElvain, Daniel Kooser, Peter Putnam, Jacob Hare, Christian Heyl, Jarvis, George and Benjamin Pike, William Long, and Dr. John M. Edminson. In 1814, a house of worship was built, a school opened, a newspaper—*The Western Intelligencer* and *Columbus Gazette*, now the *Ohio State Journal*—was started, and the old State House erected. In 1816, the "Borough of Columbus" was incorporated, and a mail route once a week between Chillicothe and Columbus started. In 1819, the old United States Court House was erected, and the seat of justice removed from Franklinton to Columbus. Until 1826, times were exceedingly "slow" in the new capital, and but little growth experienced. The improvement period revived the capital, and enlivened its trade and growth so that in 1834, a city charter was granted. The city is now about third in size in the State, and contains many of the most prominent public institutions. The present capitol building, one of the best in the West, is patterned somewhat after the national Capitol at Washington City.

From the close of the agitation of the "Sweeping Resolutions," until the opening of the war of 1812, but a short time elapsed. In fact, scarcely had one subsided, ere the other was upon the country. Though the war was national, its theater of operations was partly in Ohio, that State taking an active part in its operations. Indeed, its liberty depended on the war.

LIST OF TERRITORIAL AND STATE GOVERNORS,

From the organization of the first civil government in the Northwest Territory (1788 to 1802), of which the State of Ohio was a part, until the year 1880.

NAME.	COUNTY.	Term Commenced.	Term Ended.
(a) Arthur St. Clair.....		July 13, 1788	Nov. 1802

Richard M. Bishop.....	Hamilton.....	Jan. 14, 1878	Jan. 14, 1880
Charles Foster.....	Sandusky.....	Jan. 14, 1880	

(a) Arthur St. Clair, of Pennsylvania, was Governor of the Northwest Territory, of which Ohio was a part, from July 13, 1788, when the first civil government was established in the Territory, until about the close of the year 1802, when he was removed by the President.

*Secretary of the Territory, and was acting Governor of the Territory after the removal of Gov. St. Clair.

(b) Resigned March 3, 1807, to accept the office of U. S. Senator.

(c) Return Jonathan Meigs was elected Governor on the second Tuesday of October, 1807, over Nathaniel Massie, who contested the election of Meigs, on the ground that "he had not been a resident of this State for four years next preceding the election, as required by the Constitution," and the General Assembly, in joint convention, declared that he was not eligible. The office was not given to Massie, nor does it appear, from the records that he claimed it, but Thomas Kirker, acting Governor, continued to discharge the duties of the office until December 12, 1808, when Samuel Huntington was inaugurated, he having been elected on the second Tuesday of October in that year.

(d) Resigned March 25, 1814, to accept the office of Postmaster-General of the United States.

(e) Resigned January 4, 1822, to accept the office of United States Senator.

(f) Resigned April 13, 1844, to accept the office of Minister to Mexico.

(g) The result of the election in 1848 was not finally determined in joint convention of the two houses of the General Assembly until January 19, 1849, and the inauguration did not take place until the 22d of that month.

(h) Resigned July 15, 1853 to accept the office of Consul to Valparaiso.

(j) Elected in October, 1853, for the regular term, to commence on the second Monday of January, 1854.

(k) Died August 29, 1865.

† Acting Governor.

† Acting Governor, vice Wilson Shannon, resigned.

‡ Acting Governor, vice Reuben Wood, resigned.

‡ Acting Governor, vice John Brough, deceased.

(l) Resigned March 2, 1877, to accept the office of President of the United States.

(m) Vice Rutherford B. Hayes, resigned.

CHAPTER XI.

THE WAR OF 1812—GROWTH OF THE STATE—CANAL, RAILROADS AND OTHER IMPROVEMENTS
—DEVELOPMENT OF STATE RESOURCES.

IN June, 1812, war was declared against Great Britain. Before this, an act was passed by Congress, authorizing the increase of the regular army to thirty-five thousand troops, and a large force of volunteers, to serve twelve months. Under this act, Return J. Meigs, then Governor of Ohio, in April and May, 1812, raised three regiments of troops to serve twelve months. They rendezvoused at Dayton, elected their officers, and prepared for the campaign. These regiments were numbered First, Second and Third. Duncan McArthur was Colonel of the First; James Findlay, of the Second, and Lewis Cass, of the Third. Early in June these troops marched to Urbana, where they were joined by Boyd's Fourth Regiment of regular troops, under command of Col. Miller, who had been in the battle of Tippecanoe. Near the middle of June, this little army of about twenty-five hundred men, under command of Gov. William Hull, of Michigan, who had been authorized by Congress to raise the troops, started on its northern march. By the end of June, the army had reached the Maumee, after a very severe march, erecting, on the way, Forts McArthur, Necessity and Findlay. By some carelessness on the part of the American Government, no official word had been sent to the frontiers regarding the war, while the British had taken an early precaution to prepare for the crisis. Gov. Hull was very careful in military etiquette, and refused to march, or do any offensive acts, unless commanded by his superior officers at Washington. While at the Maumee, by a careless move, all his personal effects, including all his plans, number and strength of his army, etc., fell into the hands of the enemy. His campaign ended only in ignominious defeat, and well-nigh paralyzed future efforts. All Michigan fell into the hands of the British. The commander, though a good man, lacked bravery and promptness. Had Gen. Harrison been in command no such results would have been the case, and the war would have probably ended at the outset.

Before Hull had surrendered, Charles Scott, Governor of Kentucky, invited Gen. Harrison,

Governor of Indiana Territory, to visit Frankfort, to consult on the subject of defending the Northwest. Gov. Harrison had visited Gov. Scott, and in August, 1812, accepted the appointment of Major General in the Kentucky militia, and, by hasty traveling, on the receipt of the news of the surrender of Detroit, reached Cincinnati on the morning of the 27th of that month. On the 30th he left Cincinnati, and the next day overtook the army he was to command, on its way to Dayton. After leaving Dayton, he was overtaken by an express, informing him of his appointment by the Government as Commander-in-Chief of the armies of the Indiana and Illinois Territories. The army reached Piqua, September 3. From this place Harrison sent a body of troops to aid in the defense of Fort Wayne, threatened by the enemy. On the 6th he ordered all the troops forward, and while on the march, on September 17, he was informed of his appointment as commander of the entire Northwestern troops. He found the army poorly clothed for a winter campaign, now approaching, and at once issued a stirring address to the people, asking for food and comfortable clothing. The address was not in vain. After his appointment, Gen. Harrison pushed on to Auglaize, where, leaving the army under command of Gen. Winchester, he returned to the interior of the State, and establishing his headquarters at Franklinton, began active measures for the campaign.

Early in March, 1812, Col. John Miller raised, under orders, a regiment of infantry in Ohio, and in July assembled his enlisted men at Chillicothe, where, placing them—only one hundred and forty in number—under command of Captain Angus Lewis, he sent them on to the frontier. They erected a block-house at Piqua and then went on to Defiance, to the main body of the army.

In July, 1812, Gen. Edward W. Tupper, of Gallia County, raised one thousand men for six months' duty. Under orders from Gen. Winchester, they marched through Chillicothe and Urbana, on to the Maumee, where, near the lower end of the rapids, they made an ineffectual attempt to drive off the enemy. Failing in this, the enemy

attacked Tupper and his troops, who, though worn down with the march and not a little disorganized through the jealousies of the officers, withstood the attack, and repulsed the British and their red allies, who returned to Detroit, and the Americans to Fort McArthur.

In the fall of 1812, Gen. Harrison ordered a detachment of six hundred men, mostly mounted, to destroy the Indian towns on the Missisquoi River, one of the head-waters of the Wabash. The winter set in early and with unusual severity. At the same time this expedition was carried on, Bonaparte was retreating from Moscow. The expedition accomplished its design, though the troops suffered greatly from the cold, no less than two hundred men being more or less frost bitten.

Gen. Harrison determined at once to retake Michigan and establish a line of defense along the southern shores of the lakes. Winchester was sent to occupy Forts Wayne and Defiance; Perkins' brigade to Lower Sandusky, to fortify an old stockade, and some Pennsylvania troops and artillery sent there at the same time. As soon as Gen. Harrison heard the results of the Missisquoi expedition, he went to Chillicothe to consult with Gov. Meigs about further movements, and the best methods to keep the way between the Upper Miami and the Maumee continually open. He also sent Gen. Winchester word to move forward to the rapids of the Maumee and prepare for winter quarters. This Winchester did by the middle of January, 1813, establishing himself on the northern bank of the river, just above Wayne's old battle-ground. He was well fixed here, and was enabled to give his troops good bread, made from corn gathered in Indian corn-fields in this vicinity.

While here, the inhabitants of Frenchtown, on the Raisin River, about twenty miles from Detroit, sent Winchester word claiming protection from the threatened British and Indian invasion, avowing themselves in sympathy with the Americans. A council of war decided in favor of their request, and Col. Lewis, with 550 men, sent to their relief. Soon after, Col. Allen was sent with more troops, and the enemy easily driven away from about Frenchtown. Word was sent to Gen. Winchester, who determined to march with all the men he could spare to aid in holding the post gained. He left, the 19th of January, with 250 men, and arrived on the evening of the 20th. Failing to take the necessary precaution, from some unexplained reason, the enemy came up in the night, established his batteries, and, the next day, sur-

prised and defeated the American Army with a terrible loss. Gen. Winchester was made a prisoner, and, finally, those who were intrenched in the town surrendered, under promise of Proctor, the British commander, of protection from the Indians. This promise was grossly violated the next day. The savages were allowed to enter the town and enact a massacre as cruel and bloody as any in the annals of the war, to the everlasting ignominy of the British General and his troops.

Those of the American Army that escaped, arrived at the rapids on the evening of the 22d of January, and soon the sorrowful news spread throughout the army and nation. Gen. Harrison set about retrieving the disaster at once. Delay could do no good. A fort was built at the rapids, named Fort Meigs, and troops from the south and west hurriedly advanced to the scene of action. The investment and capture of Detroit was abandoned, that winter, owing to the defeat at Frenchtown, and expiration of the terms of service of many of the troops. Others took their places, all parts of Ohio and bordering States sending men.

The erection of Fort Meigs was an obstacle in the path of the British they determined to remove, and, on the 28th of February, 1813, a large band of British and Indians, under command of Proctor, Tecumseh, Walk-in-the-water, and other Indian chiefs, appeared in the Maumee in boats, and prepared for the attack. Without entering into details regarding the investment of the fort, it is only necessary to add, that after a prolonged siege, lasting to the early part of May, the British were obliged to abandon the fort, having been severely defeated, and sailed for the Canadian shores.

Next followed the attacks on Fort Stephenson, at Lower Sandusky, and other predatory excursions, by the British. All of these failed of their design; the defense of Maj. Croghan and his men constituting one of the most brilliant actions of the war. For the gallant defense of Fort Stephenson by Maj. Croghan, then a young man, the army merited the highest honors. The ladies of Chillicothe voted the heroic Major a fine sword, while the whole land rejoiced at the exploits of him and his band.

The decisive efforts of the army, the great numbers of men offered—many of whom Gen. Harrison was obliged to send home, much to their disgust—Perry's victory on Lake Erie, September 10, 1813—all presaged the triumph of the American arms, soon to ensue. As soon as the battle on the lake was over, the British at Malden burned

their stores, and fled, while the Americans, under their gallant commander, followed them in Perry's vessel to the Canada shore, overtaking them on the River Thames, October 5. In the battle that ensued, Tecumseh was slain, and the British Army routed.

The war was now practically closed in the West. Ohio troops had done nobly in defending their northern frontier, and in regaining the Northwestern country. Gen. Harrison was soon after elected to Congress by the Cincinnati district, and Gen. Duncan McArthur was appointed a Brigadier General in the regular army, and assigned to the command in his place. Gen. McArthur made an expedition into Upper Canada in the spring of 1814, destroying considerable property, and driving the British farther into their own dominions. Peace was declared early in 1815, and that spring, the troops were mustered out of service at Chilliscothe, and peace with England reigned supreme.

The results of the war in Ohio were, for awhile, similar to the Indian war of 1795. It brought many people into the State, and opened new portions, before unknown. Many of the soldiers immediately invested their money in lands, and became citizens. The war drove many people from the Atlantic Coast west, and as a result much money, for awhile, circulated. Labor and provisions rose, which enabled both workmen and tradesmen to enter tracts of land, and aided emigration. At the conclusion of Wayne's war in 1795, probably not more than five thousand people dwelt in the limits of the State; at the close of the war of 1812, that number was largely increased, even with the odds of war against them. After the last war, the emigration was constant and gradual, building up the State in a manner that betokened a healthful life.

As soon as the effects of the war had worn off, a period of depression set in, as a result of too free speculation indulged in at its close. Gradually a stagnation of business ensued, and many who found themselves unable to meet contracts made in "flush" times, found no alternative but to fail. To relieve the pressure in all parts of the West, Congress, about 1815, reduced the price of public lands from \$2 to \$1.25 per acre. This measure worked no little hardship on those who owned large tracts of lands, for portions of which they had not fully paid, and as a consequence, these lands, as well as all others of this class, reverted to the Government. The general market was in New

Orleans, whither goods were transported in flat-boats built especially for this purpose. This commerce, though small and poorly repaid, was the main avenue of trade, and did much for the slow prosperity prevalent. The few banks in the State found their bills at a discount abroad, and gradually becoming drained of their specie, either closed business or failed, the major part of them adopting the latter course.

The steamboat began to be an important factor in the river navigation of the West about this period. The first boat to descend the Ohio was the Orleans, built at Pittsburg in 1812, and in December of that year, while the fortunes of war hung over the land, she made her first trip from the Iron City to New Orleans, being just twelve days on the way. The second, built by Samuel Smith, was called the Comet, and made a trip as far south as Louisville, in the summer of 1813. The third, the Vesuvius, was built by Fulton, and went to New Orleans in 1814. The fourth, built by Daniel French at Brownsville, Penn., made two trips to Louisville in the summer of 1814. The next vessel, the *Ætna*, was built by Fulton & Company in 1815. So fast did the business increase, that, four years after, more than forty steamers floated on the Western waters. Improvements in machinery kept pace with the building, until, in 1838, a competent writer stated there were no less than four hundred steamers in the West. Since then, the erection of railways has greatly retarded ship-building, and it is altogether probable the number has increased but little.

The question of canals began to agitate the Western country during the decade succeeding the war. They had been and were being constructed in older countries, and presaged good and prosperous times. If only the waters of the lakes and the Ohio River could be united by a canal running through the midst of the State, thought the people, prosperous cities and towns would arise on its banks, and commerce flow through the land. One of the firmest friends of such improvements was De Witt Clinton, who had been the chief man in forwarding the "Clinton Canal," in New York. He was among the first to advocate the feasibility of a canal connecting Lake Erie and the Ohio River, and, by the success of the New York canals, did much to bring it about. Popular writers of the day all urged the scheme, so that when the Assembly met, early in December, 1821, the resolution, offered by Micajah T. Williams, of Cincinnati,

for the appointment of a committee of five members to take into consideration so much of the Governor's message as related to canals, and see if some feasible plan could not be adopted whereby a beginning could be made, was quickly adopted.

The report of the committee, advising a survey and examination of routes, met with the approval of the Assembly, and commissioners were appointed who were to employ an engineer, examine the country and report on the practicability of a canal between the lakes and the river. The commissioners employed James Geddes, of Onondaga County, N. Y., as an engineer. He arrived in Columbus in June, 1822, and, before eight months, the corps of engineers, under his direction, had examined one route. During the next two summers, the examinations continued. A number of routes were examined and surveyed, and one, from Cleveland on the lake, to Portsmouth on the Ohio, was recommended. Another canal, from Cincinnati to Dayton, on the Miami, was determined on, and preparations to commence work made. A Board of Canal Fund Commissioners was created, money was borrowed, and the morning of July 4, 1825, the first shovelful of earth was dug near Newark, with imposing ceremonies, in the presence of De Witt Clinton, Governor of New York, and a mighty concourse of people assembled to witness the auspicious event.

Gov. Clinton was escorted all over the State to aid in developing the energy everywhere apparent. The events were important ones in the history of the State, and, though they led to the creation of a vast debt, yet, in the end, the canals were a benefit.

The main canal—the Ohio and Erie Canal—was not completed till 1832. The Maumee Canal, from Dayton to Cincinnati, was finished in 1834. They cost the State about \$6,000,000. Each of the main canals had branches leading to important towns, where their construction could be made without too much expense. The Miami and Maumee Canal, from Cincinnati northward along the Miami River to Piqua, thence to the Maumee and on to the lake, was the largest canal made, and, for many years, was one of the most important in the State. It joined the Wabash Canal on the eastern boundary of Indiana, and thereby saved the construction of many miles by joining this great canal from Toledo to Evansville.

The largest artificial lake in the world, it is said, was built to supply water to the Miami Canal. It exists yet, though the canal is not much used. It

is in the eastern part of Mercer County, and is about nine miles long by from two to four wide. It was formed by raising two walls of earth from ten to thirty feet high, called respectively the east and west embankments; the first of which is about two miles in length; the second, about four. These walls, with the elevation of the ground to the north and south, formed a huge basin, to retain the water. The reservoir was commenced in 1837, and finished in 1845, at an expense of several hundred thousand dollars. When first built, during the accumulation of water, much malarial disease prevailed in the surrounding country, owing to the stagnant condition of the water. The citizens, enraged at what they considered an innovation of their rights, met, and, during a dark night, tore out a portion of the lower wall, letting the water flow out. The damage cost thousands of dollars to repair. All who participated in the proceedings were liable to a severe imprisonment, but the state of feeling was such, in Mercer County, where the offense was committed, that no jury could be found that would try them, and the affair gradually died out.

The canals, so efficacious in their day, were, however, superseded by the railroads rapidly finding their way into the West. From England, where they were early used in the collieries, the transition to America was easy.

The first railroad in the United States was built in the summer of 1826, from the granite quarry belonging to the Bunker Hill Monument Association to the wharf landing, three miles distant. The road was a slight decline from the quarry to the wharf, hence the loaded cars were propelled by their own gravity. On their return, when empty, they were drawn up by a single horse. Other roads, or tramways, quickly followed this. They were built at the Pennsylvania coal mines, in South Carolina, at New Orleans, and at Baltimore. Steam motive power was used in 1831 or 1832, first in America on the Baltimore & Ohio Railroad, and in Charlestown, on a railroad there.

To transfer these highways to the West was the question of but a few years' time. The prairies of Illinois and Indiana offered superior inducements to such enterprises, and, early in 1835, they began to be agitated there. In 1838, the first rail was laid in Illinois, at Meredosia, a little town on the Illinois River, on what is now the Wabash Railway.

"The first railroad made in Ohio," writes Caleb Atwater, in his "History of Ohio," in 1838, "was finished in 1836 by the people of Toledo, a town

some two years old then, situated near the mouth of Maumee River. The road extends westward into Michigan and is some thirty miles in length. There is a road about to be made from Cincinnati to Springfield. This road follows the Ohio River up to the Little Miami River, and there turns northwardly up its valley to Xenia, and, passing the Yellow Springs, reaches Springfield. Its length must be about ninety miles. The State will own one-half of the road, individuals and the city of Cincinnati the other half. This road will, no doubt, be extended to Lake Erie, at Sandusky City, within a few short years."

"There is a railroad," continues Mr. Atwater, "about to be made from Painesville to the Ohio River. There are many charters for other roads, which will never be made."

Mr. Atwater notes also, the various turnpikes as well as the famous National road from Baltimore westward, then completed only to the mountains. This latter did as much as any enterprise ever enacted in building up and populating the West. It gave a national thoroughfare, which, for many years, was the principal wagon-way from the Atlantic to the Mississippi Valley.

The railroad to which Mr. Atwater refers as about to be built from Cincinnati to Springfield, was what was known as the Mad River Railroad. It is commonly conceded to be the first one built in Ohio.* Its history shows that it was chartered March 11, 1836, that work began in 1837; that it was completed and opened for business from Cincinnati to Milford, in December, 1842; to Xenia, in August, 1845, and to Springfield, in August, 1846. It was laid with strap rails until about 1848, when the present form of rail was adopted.

One of the earliest roads in Ohio was what was known as the Sandusky, Mansfield & Newark Railroad. It was chartered at first as the Monroeville & Sandusky City Railroad, March 9, 1835. March 12, 1836, the Mansfield & New Haven road was chartered; the Columbus & Lake Erie, March 12, 1845, and the Huron & Oxford, February 27, 1846. At first it ran only from Sandusky to Monroeville, then from Mansfield to Huron. These

* Hon. E. D. Mansfield states, in 1873, that the "first actual piece of railroad laid in Ohio, was made on the Cincinnati & Sandusky Railroad; but, about the same time we have the Little Miami Railroad, which was surveyed in 1836 and 1837. If this, the generally accepted opinion, is correct, then Mr. Atwater's statement as given, is wrong. His history is, however, generally conceded to be correct. Written in 1838, he surely ought to know whereof he was writing, as the railroads were then only in construction; but few, if any, in operation.

two were connected and consolidated, and then extended to Newark, and finally, by connections, to Columbus.

It is unnecessary to follow closely the history of these improvements through the years succeeding their introduction. At first the State owned a share in nearly all railroads and canals, but finally finding itself in debt about \$15,000,000 for such improvements, and learning by its own and neighbors' experiences, that such policy was detrimental to the best interests of the people, abandoned the plan, and allowed private parties entire control of all such works. After the close of the Mexican war, and the return to solid values in 1854 or thereabouts, the increase of railroads in all parts of Ohio, as well as all parts of the West, was simply marvelous. At this date there are more than ten thousand miles of railroads in Ohio, alongside of which stretch innumerable lines of telegraph, a system of swift messages invented by Prof. Morse, and adopted in the United States about 1851.

About the time railroad building began to assume a tangible shape, in 1840, occurred the celebrated political campaign known in history as the "Hard Cider Campaign." The gradual encroachments of the slave power in the West, its arrogant attitude in the Congress of the United States and in several State legislatures: its forcible seizure of slaves in the free States, and the enactment and attempted enforcement of the "fugitive slave" law all tended to awaken in the minds of the Northern people an antagonism, terminating only in the late war and the abolishment of that hideous system in the United States.

The "Whig Party" strenuously urged the abridgment or confinement of slavery in the Southern States, and in the contest the party took a most active part, and elected William Henry Harrison President of the United States. As he had been one of the foremost leaders in the war of 1812, a resident of Ohio, and one of its most popular citizens, a log cabin and a barrel of cider were adopted as his exponents of popular opinion, as expressive of the rule of the common people represented in the cabin and cider, in turn representing their primitive and simple habits of life. He lived but thirty days after his inauguration, dying on the 9th of April, 1841, when John Tyler, the Vice President, succeeded him as Chief Executive of the nation.

The building of railroads; the extension of commerce; the settlement of all parts of the State; its growth in commerce, education, religion and

population, are the chief events from 1841 to the Mexican war. Hard times occurred about as often as they do now, preceded by "flush" times, when speculation ran rife, the people all infatuated with

an insane idea that something could be had for nothing. The bubble burst as often as inflated, ruining many people, but seemingly teaching few lessons.

CHAPTER XII.

MEXICAN WAR—CONTINUED GROWTH OF THE STATE—WAR OF THE REBELLION—OHIO'S PART IN THE CONFLICT.

THE Mexican War grew out of the question of the annexation of Texas, then a province of Mexico, whose territory extended to the Indian Territory on the north, and on up to the Oregon Territory on the Pacific Coast. Texas had been settled largely by Americans, who saw the condition of affairs that would inevitably ensue did the country remain under Mexican rule. They first took steps to secede from Mexico, and then asked the aid of America to sustain them, and annex the country to itself.

The Whig party and many others opposed this, chiefly on the grounds of the extension of slave territory. But to no avail. The war came on, Mexico was conquered, the war lasting from April 20, 1846, to May 30, 1848. Fifty thousand volunteers were called for the war by the Congress, and \$10,000,000 placed at the disposal of the President, James K. Polk, to sustain the army and prosecute the war.

The part that Ohio took in the war may be briefly summed up as follows: She had five volunteer regiments, five companies in the Fifteenth Infantry, and several independent companies, with her full proportion among the regulars. When war was declared, it was something of a crusade to many; full of romance to others; hence, many more were offered than could be received. It was a campaign of romance to some, yet one of reality, ending in death, to many.

When the first call for troops came, the First, Second and Third Regiments of infantry responded at once. Alexander Mitchell was made Colonel of the First; John B. Weller its Lieutenant Colonel; and Major L. Giddings, of Dayton, its Major, Thos. L. Hamer, one of the ablest lawyers in Ohio, started with the First as its Major, but, before the regiment left the State, he was made a Brigadier General of Volunteers, and, at the battle of Monterey, distinguished himself; and there contracted

disease and laid down his life. The regiment's Colonel, who had been wounded at Monterey, came home, removed to Minnesota, and there died. Lieut. Col. Weller went to California after the close of the war. He was United States Senator from that State in the halls of Congress, and, at last, died at New Orleans.

The Second Regiment was commanded by Col. George W. Morgan, now of Mount Vernon; Lieut. Col. William Irwin, of Lancaster, and Maj. William Wall. After the war closed, Irwin settled in Texas, and remained there till he died. Wall lived out his days in Ohio. The regiment was never in active field service, but was a credit to the State.

The officers of the Third Regiment were, Col. Samuel R. Curtis; Lieut. Col. G. W. McCook and Maj. John Love. The first two are now dead; the Major lives in McConnellsville.

At the close of the first year of the war, these regiments (First, Second and Third) were mustered out of service, as their term of enlistment had expired.

When the second year of the war began, the call for more troops on the part of the Government induced the Second Ohio Infantry to re-organize, and again enter the service. William Irwin, of the former organization, was chosen Colonel; William Latham, of Columbus, Lieutenant Colonel, and William H. Link, of Circleville, Major. Nearly all of them are now dead.

The regular army was increased by eight Ohio companies of infantry, the Third Dragoons, and the Voltigeurs—light-armed soldiers. In the Fifteenth Regiment of the United States Army, there were five Ohio companies. The others were three from Michigan, and two from Wisconsin. Col. Morgan, of the old Second, was made Colonel of the Fifteenth, and John Howard, of Detroit, an old artillery officer in the regular army, Lieutenant Colonel. Samuel Wood, a captain in the Sixth

United States Infantry, was made Major; but was afterward succeeded by — Mill, of Vermont. The Fifteenth was in a number of skirmishes at first, and later in the battles of Contreras, Cherubusco and Chapultepec. At the battle of Cherubusco, the Colonel was severely wounded, and Maj. Mill, with several officers, and a large number of men, killed. For gallant service at Contreras, Col. Morgan, though only twenty-seven years old, was made a Brevet Brigadier General in the United States Army. Since the war he has delivered a number of addresses in Ohio, on the campaigns in Mexico.

The survivors of the war are now few. Though seventy-five thousand men from the United States went into that conflict, less than ten thousand now survive. They are now veterans, and as such delight to recount their reminiscences on the fields of Mexico. They are all in the decline of life, and ere a generation passes away, few, if any, will be left.

After the war, the continual growth of Ohio, the change in all its relations, necessitated a new organic law. The Constitution of 1852 was the result. It re-affirmed the political principles of the "ordinance of 1787" and the Constitution of 1802, and made a few changes necessitated by the advance made in the interim. It created the office of Lieutenant Governor, fixing the term of service at two years. This Constitution yet stands notwithstanding the prolonged attempt in 1873-74 to create a new one. It is now the organic law of Ohio.

From this time on to the opening of the late war, the prosperity of the State received no check. Towns and cities grew; railroads multiplied; commerce was extended; the vacant lands were rapidly filled by settlers, and everything tending to the advancement of the people was well prosecuted. Banks, after much tribulation, had become in a measure somewhat secure, their only and serious drawback being their isolation or the confinement of their circulation to their immediate localities. But signs of a mighty contest were apparent. A contest almost without a parallel in the annals of history; a contest between freedom and slavery; between wrong and right; a contest that could only end in defeat to the wrong. The Republican party came into existence at the close of President Pierce's term, in 1855. Its object then was, principally, the restriction of the slave power; ultimately its extinction. One of the chief exponents and supporters of this growing party in Ohio, was Salmon P.

Chase; one who never faltered nor lost faith; and who was at the helm of State; in the halls of Congress; chief of one the most important bureaus of the Government, and, finally, Chief Justice of the United States. When war came, after the election of Abraham Lincoln by the Republican party, Ohio was one of the first to answer to the call for troops. Mr. Chase, while Governor, had re-organized the militia on a sensible basis, and rescued it from the ignominy into which it had fallen. When Mr. Lincoln asked for seventy-five thousand men, Ohio's quota was thirteen regiments. The various chaotic regiments and militia troops in the State did not exceed 1,500 men. The call was issued April 15, 1861; by the 18th, two regiments were organized in Columbus, whither these companies had gathered; before sunrise of the 19th the *first* and *second* regiments were on their way to Washington City. The President had only asked for thirteen regiments; *thirty* were gathering; the Government, not yet fully comprehending the nature of the rebellion, refused the surplus troops, but Gov. Dennison was authorized to put ten additional regiments in the field, as a defensive measure, and was also authorized to act on the defensive as well as on the offensive. The immense extent of southern border made this necessary, as all the loyal people in West Virginia and Kentucky asked for help.

In the limits of this history, it is impossible to trace all the steps Ohio took in the war. One of her most talented sons, now at the head of one of the greatest newspapers of the world, says, regarding the action of the people and their Legislature:

"In one part of the nation there existed a gradual growth of sentiment against the Union, ending in open hostility against its integrity and its Constitutional law; on the other side stood a resolute, and determined people, though divided in minor matters, firmly united on the question of national supremacy. The people of Ohio stood squarely on this side. Before this her people had been divided up to the hour when—

"That fierce and sudden flash across the rugged blackness broke,
 And, with a voice that shook the land, the guns of Sumter spoke;
 * * * * *
 And whereso'er the summons came, there rose the angry din,
 As when, upon a rocky coast, a stormy tide sets in."

"All waverings then ceased among the people and in the Ohio Legislature. The Union must be

preserved. The white heat of patriotism and fealty to the flag that had been victorious in three wars, and had never met but temporary defeat then melted all parties, and dissolved all hesitation, and, April 18, 1861, by a unanimous vote of ninety-nine Representatives in its favor, there was passed a bill appropriating \$500,000 to carry into effect the requisition of the President, to protect the National Government, of which sum \$450,000 were to purchase arms and equipments for the troops required by that requisition as the quota of Ohio, and \$50,000 as an extraordinary contingent fund for the Governor. The commissioners of the State Sinking Fund were authorized, by the same bill, to borrow this money, on the 6 per cent bonds of the State, and to issue for the same certificates, freeing such bonds from taxation. Then followed other such legislation that declared the property of volunteers free from execution for debt during their term of service; that declared any resident of the State, who gave aid and comfort to the enemies of the Union, guilty of treason against the State, to be punished by imprisonment at hard labor for life; and, as it had become already evident that thousands of militia, beyond Ohio's quota of the President's call, would volunteer, the Legislature, adopting the sagacious suggestion of Gov. Dennison, resolved that all excess of volunteers should be retained and paid for service, under direction of the Governor. Thereupon a bill was passed, authorizing the acceptance of volunteers to form ten regiments, and providing \$500,000 for their arms and equipments, and \$1,500,000 more to be disbursed for troops in case of an invasion of the State. Then other legislation was enacted, looking to and providing against the shipment from or through the State of arms or munitions of war, to States either assuming to be neutral or in open rebellion; organizing the whole body of the State militia; providing suitable officers for duty on the staff of the Governor; requiring contracts for subsistence of volunteers to be let to the lowest bidder, and authorizing the appointment of additional general officers.

"Before the adjournment of that Legislature, the Speaker of the House had resigned to take command of one of the regiments then about to start for Washington City; two leading Senators had been appointed Brigadier Generals, and many, in fact nearly all, of the other members of both houses had, in one capacity or another, entered the military service. It was the first war legislature ever elected in Ohio, and, under sudden pressure,

nobly met the first shock, and enacted the first measures of law for war. Laboring under difficulties inseparable from a condition so unexpected, and in the performance of duties so novel, it may be historically stated that for patriotism, zeal and ability, the Ohio Legislature of 1861 was the equal of any of its successors; while in that exuberance of patriotism which obliterated party lines and united all in a common effort to meet the threatened integrity of the United States as a nation, it surpassed them both.

"The war was fought, the slave power forever destroyed, and under additional amendments to her organic law, the United States wiped the stain of human slavery from her escutcheon, liberating over four million human beings, nineteen-twentieths of whom were native-born residents.

"When Lee surrendered at Appomattox Court House, Ohio had two hundred regiments of all arms in the National service. In the course of the war, she had furnished two hundred and thirty regiments, besides twenty-six independent batteries of artillery, five independent companies of cavalry, several companies of sharpshooters, large parts of five regiments credited to the West Virginia contingent, two regiments credited to the Kentucky contingent, two transferred to the United States colored troops, and a large proportion of the rank and file of the Fifty-fourth and Sixty-fifth Massachusetts Regiments, also colored men. Of these organizations, twenty-three were infantry regiments furnished on the first call of the President, an excess of nearly one-half over the State's quota; one hundred and ninety-one were infantry regiments, furnished on subsequent calls of the President—one hundred and seventeen for three years, twenty-seven for one year, two for six months, two for three months, and forty-two for one hundred days. Thirteen were cavalry, and three artillery for three years. Of these three-years troops, over twenty thousand re-enlisted, as veterans, at the end of their long term of service, to fight till the war would end."

As original members of these organizations, Ohio furnished to the National service the magnificent army of 310,654 actual soldiers, omitting from the above number all those who paid commutation money, veteran enlistments, and citizens who enlisted as soldiers or sailors in other States. The count is made from the reports of the Provost Marshal General to the War Department. Pennsylvania gave not quite 28,000 more, while Illinois fell 48,000 behind; Indiana, 116,000 less;

Kentucky, 235,000, and Massachusetts, 164,000. Thus Ohio more than maintained, in the National army, the rank among her sisters which her population supported. Ohio furnished more troops than the President ever required of her; and at the end of the war, with more than a thousand men in the camp of the State who were never mustered into the service, she still had a credit on the rolls of the War Department for 4,332 soldiers, beyond the aggregate of all quotas ever assigned to her; and, besides all these, 6,479 citizens had, in lieu of personal service, paid the commutation; while Indiana, Kentucky, Pennsylvania and New York were all from five to one hundred thousand behind their quotas. So ably, through all those years of trial and death, did she keep the promise of the memorable dispatch from her first war Governor: "If Kentucky refuses to fill her quota, Ohio will fill it for her."

"Of these troops 11,237 were killed or mortally wounded in action, and of these 6,563 were left dead on the field of battle. They fought on well-nigh every battle-field of the war. Within forty-eight hours after the first call was made for troops, two regiments were on the way to Washington. An Ohio brigade covered the retreat from the first battle of Bull Run. Ohio troops formed the bulk of army that saved to the Union the territory afterward erected into West Virginia; the bulk of the army that kept Kentucky from seceding; a large part of the army that captured Fort Donelson and Island No. 10; a great part of the army that from Stone River and Chickamauga, and Mission Ridge and Atlanta, swept to the sea and captured Fort McAllister, and north through the Carolinas to Virginia."

When Sherman started on his famous march to the sea, some one said to President Lincoln, "They will never get through; they will all be captured, and the Union will be lost." "It is impossible," replied the President; "it cannot be done. *There is a mighty sight of fight in one hundred thousand Western men.*"

Ohio troops fought at Pea Ridge. They charged at Wagner. They helped redeem North Carolina. They were in the sieges of Vicksburg, Charleston, Mobile and Richmond. At Pittsburg Landing, at Antietam, Gettysburg and Corinth, in the Wilderness, at Five Forks, before Nashville and Appomattox Court House; "their bones, reposing on the fields they won and in the graves they fill, are a perpetual pledge that no flag shall ever wave over their graves but that flag they died to maintain."

Ohio's soil gave birth to, or furnished, a Grant, a Sherman, a Sheridan, a McPherson, a Rosecrans, a McClellan, a McDowell, a Mitchell, a Gilmore, a Hazen, a Sill, a Stanley, a Steadman, and others—all but one, children of the country, reared at West Point for such emergencies. Ohio's war record shows one General, one Lieutenant General, twenty Major Generals, twenty seven Brevet Major Generals, and thirty Brigadier Generals, and one hundred and fifty Brevet Brigadier Generals. Her three war Governors were William Dennison, David Todd, and John Brough. She furnished, at the same time, one Secretary of War, Edwin M. Stanton, and one Secretary of the Treasury, Salmon P. Chase. Her Senators were Benjamin F. Wade and John Sherman. At least three out of five of Ohio's able-bodied men stood in the line of battle. On the head stone of one of these soldiers, who gave his life for the country, and who now lies in a National Cemetery, is inscribed these words:

"We charge the living to preserve that Constitution we have died to defend."

The close of the war and return of peace brought a period of fictitious values on the country, occasioned by the immense amount of currency afloat. Property rose to unheard-of values, and everything with it. Ere long, however, the decline came, and with it "hard times." The climax broke over the country in 1873, and for awhile it seemed as if the country was on the verge of ruin. People found again, as preceding generations had found, that real value was the only basis of true prosperity, and gradually began to work to the fact. The Government established the specie basis by gradual means, and on the 1st day of January, 1879, began to redeem its outstanding obligations in coin. The effect was felt everywhere. Business of all kinds sprang anew into life. A feeling of confidence grew as the times went on, and now, on the threshold of the year 1880, the State is entering on an era of steadfast prosperity; one which has a sure and certain foundation.

Nearly four years have elapsed since the great Centennial Exhibition was held in Philadelphia; an exhibition that brought from every State in the Union the best products of her soil, factories, and all industries. In that exhibit Ohio made an excellent display. Her stone, iron, coal, cereals, woods and everything pertaining to her welfare were all represented. Ohio, occupying the middle ground of the Union, was expected to show to foreign nations what the valleys of the Mississippi and Ohio

could produce. The State nobly stood the test and ranked foremost among all others. Her centennial building was among the first completed and among the neatest and best on the grounds. During the summer, the Centennial Commission extended invitations to the Governors of the several States to appoint an orator and name a day for his

delivery of an address on the history, progress and resources of his State. Gov. Hayes named the Hon. Edward D. Mansfield for this purpose, and August 9th, that gentleman delivered an address so valuable for the matter which it contains, that we here give a synopsis of it.

CHAPTER XIII.

OHIO IN THE CENTENNIAL—ADDRESS OF EDWARD D. MANSFIELD, LL. D., PHILADELPHIA, AUGUST 9, 1876.

ONE hundred years ago, the whole territory, from the Alleghany to the Rocky Mountains was a wilderness, inhabited only by wild beasts and Indians. The Jesuit and Moravian missionaries were the only white men who had penetrated the wilderness or beheld its mighty lakes and rivers. While the thirteen old colonies were declaring their independence, the thirteen new States, which now lie in the western interior, had no existence, and gave no sign of the future. The solitude of nature was unbroken by the steps of civilization. The wisest statesman had not contemplated the probability of the coming States, and the boldest patriot did not dream that this interior wilderness should soon contain a greater population than the thirteen old States, with all the added growth of one hundred years.

Ten years after that, the old States had ceded their Western lands to the General Government, and the Congress of the United States had passed the ordinance of 1785, for the survey of the public territory, and, in 1787, the celebrated ordinance which organized the Northwestern Territory, and dedicated it to freedom and intelligence.

Fifteen years after that, and more than a quarter of a century after the Declaration of Independence, the State of Ohio was admitted into the Union, being the seventeenth which accepted the Constitution of the United States. It has since grown up to be great, populous and prosperous under the influence of those ordinances. At her admittance, in 1803, the tide of emigration had begun to flow over the Alleghanies into the Valley of the Mississippi, and, although no steamboat, no railroad then existed, nor even a stage coach helped the immigrant, yet the wooden "ark" on the Ohio, and the heavy wagon, slowly winding over

the mountains, bore these tens of thousands to the wilds of Kentucky and the plains of Ohio. In the spring of 1788—the first year of settlement—four thousand five hundred persons passed the mouth of the Muskingum in three months, and the tide continued to pour on for half a century in a widening stream, mingled with all the races of Europe and America, until now, in the hundredth year of America's independence, the five States of the Northwestern Territory, in the wilderness of 1776, contain ten millions of people, enjoying all the blessings which peace and prosperity, freedom and Christianity, can confer upon any people. Of these five States, born under the ordinance of 1787, Ohio is the first, oldest, and, in many things, the greatest. In some things it is the greatest State in the Union. Let us, then, attempt, in the briefest terms, to draw an outline portrait of this great and remarkable commonwealth.

Let us observe its physical aspects. Ohio is just one-sixth part of the Northwestern Territory—40,000 square miles. It lies between Lake Erie and the Ohio River, having 200 miles of navigable waters, on one side flowing into the Atlantic Ocean, and on the other into the Gulf of Mexico. Through the lakes, its vessels touch on 6,000 miles of interior coast, and, through the Mississippi, on 36,000 miles of river coast; so that a citizen of Ohio may pursue his navigation through 42,000 miles, all in his own country, and all within navigable reach of his own State. He who has circumnavigated the globe, has gone but little more than half the distance which the citizen of Ohio finds within his natural reach in this vast interior.

Looking upon the surface of this State, we find no mountains, no barren sands, no marshy wastes, no lava-covered plains, but one broad, compact

body of arable land, intersected with rivers and streams and running waters, while the beautiful Ohio flows tranquilly by its side. More than three times the surface of Belgium, and one-third of the whole of Italy, it has more natural resources in proportion than either, and is capable of ultimately supporting a larger population than any equal surface in Europe. Looking from this great arable surface, where upon the very hills the grass and the forest trees now grow exuberant and abundant, we find that underneath this surface, and easily accessible, lie 10,000 square miles of coal, and 4,000 square miles of iron—coal and iron enough to supply the basis of manufacture for a world! All this vast deposit of metal and fuel does not interrupt or take from that arable surface at all. There you may find in one place the same machine bringing up coal and salt water from below, while the wheat and the corn grow upon the surface above. The immense masses of coal, iron, salt and freestone deposited below have not in any way diminished the fertility and production of the soil.

It has been said by some writer that the character of a people is shaped or modified by the character of the country in which they live. If the people of Switzerland have acquired a certain air of liberty and independence from the rugged mountains around which they live; if the people of Southern Italy, or beautiful France, have acquired a tone of ease and politeness from their mild and genial clime, so the people of Ohio, placed amidst such a wealth of nature, in the temperate zone, should show the best fruits of peaceful industry and the best culture of Christian civilization. Have they done so? Have their own labor and arts and culture come up to the advantages of their natural situation? Let us examine this growth and their product.

The first settlement of Ohio was made by a colony from New England, at the mouth of the Muskingum. It was literally a remnant of the officers of the Revolution. Of this colony no praise of the historian can be as competent, or as strong, as the language of Washington. He says, in answer to inquiries addressed to him: "No colony in America was ever settled under such favorable auspices as that which has just commenced at the Muskingum. Information, prosperity and strength will be its characteristics. I know many of the settlers personally, and there never were men better calculated to promote the welfare of such a community;" and he adds that if he were a young man, he knows no country in which he

would sooner settle than in this Western region." This colony, left alone for a time, made its own government and nailed its laws to a tree in the village, an early indication of that law-abiding and peaceful spirit which has since made Ohio a just and well-ordered community. The subsequent settlements on the Miami and Scioto were made by citizens of New Jersey and Virginia, and it is certainly remarkable that among all the early immigration, there were no ignorant people. In the language of Washington, they came with "information," qualified to promote the welfare of the community.

Soon after the settlement on the Muskingum and the Miami, the great wave of migration flowed on to the plains and valleys of Ohio and Kentucky. Kentucky had been settled earlier, but the main body of emigrants in subsequent years went into Ohio, influenced partly by the great ordinance of 1787, securing freedom and schools forever, and partly by the greater security of titles under the survey and guarantee of the United States Government. Soon the new State grew up, with a rapidity which, until then, was unknown in the history of civilization. On the Muskingum, where the buffalo had roamed; on the Scioto, where the Shawanees had built their towns; on the Miami, where the great chiefs of the Miamis had reigned; on the plains of Sandusky, yet red with the blood of the white man; on the Maumee, where Wayne, by the victory of the "Fallen Timbers," had broken the power of the Indian confederacy—the emigrants from the old States and from Europe came in to cultivate the fields, to build up towns, and to rear the institutions of Christian civilization, until the single State of Ohio is greater in numbers, wealth, and education, than was the whole American Union when the Declaration of Independence was made.

Let us now look at the statistics of this growth and magnitude, as they are exhibited in the census of the United States. Taking intervals of twenty years, Ohio had: In 1810, 230,760; in 1830, 937,903; in 1850, 1,980,329; in 1870, 2,665,260. Add to this the increase of population in the last six years, and Ohio now has, in round numbers, 3,000,000 of people—half a million more than the thirteen States in 1776; and her cities and towns have to-day six times the population of all the cities of America one hundred years ago. This State is now the third in numbers and wealth, and the first in some of those institutions which mark the progress of

mankind. That a small part of the wilderness of 1776 should be more populous than the whole Union was then, and that it should have made a social and moral advance greater than that of any nation in the same time, must be regarded as one of the most startling and instructive facts which attend this year of commemoration. If such has been the social growth of Ohio, let us look at its physical development; this is best expressed by the aggregate productions of the labor and arts of a people applied to the earth. In the census statistics of the United States these are expressed in the aggregate results of agriculture, mining, manufactures, and commerce. Let us simplify these statistics, by comparing the aggregate and ratios as between several States, and between Ohio and some countries of Europe.

The aggregate amount of grain and potatoes—farinaceous food, produced in Ohio in 1870 was 134,938,413 bushels, and in 1874, there were 157,323,597 bushels, being the largest aggregate amount raised in any State but one, Illinois, and larger per square mile than Illinois or any other State in the country. The promises of nature were thus vindicated by the labor of man; and the industry of Ohio has fulfilled its whole duty to the sustenance of the country and the world. She has raised more grain than ten of the old States together, and more than half raised by Great Britain or by France. I have not the recent statistics of Europe, but McGregor, in his statistics of nations for 1832—a period of profound peace—gives the following ratios for the leading countries of Europe: Great Britain, area 120,324 miles; amount of grain, 262,500,000 bushels; rate per square mile, 2,190 to 1; Austria—area 258,603 miles; amount of grain, 366,800,000 bushels; rate per square mile, 1,422 to 1; France—area 215,858 miles; amount of grain, 233,847,300 bushels; rate per square mile, 1,080 to 1. The State of Ohio—area per square miles, 40,000; amount of grain, 150,000,000 bushels; rate per square mile, 3,750. Combining the great countries of Great Britain, Austria, and France, we find that they had 594,785 square miles and produced 863,147,300 bushels of grain, which was, at the time these statistics were taken, 1,450 bushels per square mile, and ten bushels to each one of the population. Ohio, on the other hand, had 3,750 bushels per square mile, and fifty bushels to each one of the population; that is, there was five times as much grain raised in Ohio, in proportion to the people, as in these great countries of Europe.

As letters make words, and words express ideas, so these dry figures of statistics express facts, and these facts make the whole history of civilization.

Let us now look at the statistics of domestic animals. These are always indicative of the state of society in regard to the physical comforts. The horse must furnish domestic conveyances; the cattle must furnish the products of the dairy, as well as meat, and the sheep must furnish wool.

Let us see how Ohio compares with other States and with Europe: In 1870, Ohio had 8,818,000 domestic animals; Illinois, 6,925,000; New York, 5,283,000; Pennsylvania, 4,493,000; and other States less. The proportion to population in these States was, in Ohio, to each person, 3.3; Illinois, 2.7; New York, 1.2; Pennsylvania, 1.2.

Let us now see the proportion of domestic animals in Europe. The results given by McGregor's statistics are: In Great Britain, to each person, 2.44; Russia, 2.00; France, 1.50; Prussia, 1.02; Austria, 1.00. It will be seen that the proportion in Great Britain is only two-thirds that of Ohio; in France, only one-half; and in Austria and Prussia only one-third. It may be said that, in the course of civilization, the number of animals diminishes as the density of population increases; and, therefore, this result might have been expected in the old countries of Europe. But this does not apply to Russia or Germany, still less to other States in this country. Russia in Europe has not more than half the density of population now in Ohio. Austria and Prussia have less than 150 to the square mile. The whole of the north of Europe has not so dense a population as the State of Ohio, still less have the States of Illinois and Missouri, west of Ohio. Then, therefore, Ohio showing a larger proportion of domestic animals than the north of Europe, or States west of her, with a population not so dense, we see at once there must be other causes to produce such a phenomenon.

Looking to some of the incidental results of this vast agricultural production, we see that the United States exports to Europe immense amounts of grain and provisions; and that there is manufactured in this country an immense amount of woolen goods. Then, taking these statistics of the raw material, we find that Ohio produces *one-fifth* of all the wool; *one-seventh* of all the cheese; *one-eighth* of all the corn, and *one-tenth* of all the wheat; and yet Ohio has but a *fourteenth* part of the population, and *one-eightieth* part of the surface of this country.

Let us take another—a commercial view of this matter. We have seen that Ohio raises five times as much grain per square mile as is raised per square mile in the empires of Great Britain, France and Austria, taken together. After making allowance for the differences of living, in the working classes of this country, at least two-thirds of the food and grain of Ohio are a surplus beyond the necessities of life, and, therefore, so much in the commercial balance of exports. This corresponds with the fact, that, in the shape of grain, meat, liquors and dairy products, this vast surplus is constantly moved to the Atlantic States and to Europe. The money value of this exported product is equal to \$100,000,000 per annum, and to a solid capital of \$1,500,000,000, after all the sustenance of the people has been taken out of the annual crop.

We are speaking of agriculture alone. We are speaking of a State which began its career more than a quarter of a century after the Declaration of Independence was made. And now, it may be asked, what is the real cause of this extraordinary result, which, without saying anything invidious of other States, we may safely say has never been surpassed in any country? We have already stated two of the advantages possessed by Ohio. The first is that it is a compact, unbroken body of arable land, surrounded and intersected by water-courses, equal to all the demands of commerce and navigation. Next, that it was secured forever to freedom and intelligence by the ordinance of 1787. The intelligence of its future people was secured by immense grants of public lands for the purpose of education; but neither the blessings of nature, nor the wisdom of laws, could obtain such results without the continuous labor of an intelligent people. Such it had, and we have only to take the testimony of Washington, already quoted, and the statistical results I have given, to prove that no people has exhibited more steady industry, nor has any people directed their labor with more intelligence.

After the agricultural capacity and production of a country, its most important physical feature is its mineral products; its capacity for coal and iron, the two great elements of material civilization. If we were to take away from Great Britain her capacity to produce coal in such vast quantities, we should reduce her to a third-rate position, no longer numbered among the great nations of the earth. Coal has smelted her iron, run her steam engines, and is the basis of her manufactures. But when we compare the coal fields of Great

Britain with those of this country, they are insignificant. The coal fields of all Europe are small compared with those of the central United States. The coal district of Durham and Northumberland, in England, is only 880 square miles. There are other districts of smaller extent, making in the whole probably one-half the extent of that in Ohio. The English coal-beds are represented as more important, in reference to extent, on account of their thickness. There is a small coal district in Lancashire, where the workable coal-beds are in all 150 feet in thickness. But this involves, as is well known, the necessity of going to immense depths and incurring immense expense. On the other hand, the workable coal-beds of Ohio are near the surface, and some of them require no excavating, except that of the horizontal lead from the mine to the river or the railroad. In one county of Ohio there are three beds of twelve, six and four feet each, within fifty feet of the surface. At some of the mines having the best coal, the lead from the mines is nearly horizontal, and just high enough to dump the coal into the railroad cars. These coals are of all qualities, from that adapted to the domestic fire to the very best quality for smelting or manufacturing iron. Recollecting these facts, let us try to get an idea of the coal district of Ohio. The bituminous coal region descending the western slopes of the Alleghenies, occupies large portions of Western Pennsylvania, West Virginia, Ohio, Kentucky and Tennessee. I suppose that this coal field is not less than fifty thousand square miles, exclusive of Western Maryland and the southern terminations of that field in Georgia and Alabama. Of this vast field of coal, exceeding anything found in Europe, about one-fifth part lies in Ohio. Prof. Mather, in his report on the geology of the State (first Geological Report of the State) says:

“The coal-measures within Ohio occupy a space of about one hundred and eighty miles in length by eighty in breadth at the widest part, with an area of about ten thousand square miles, extending along the Ohio from Trumbull County in the north to near the mouth of the Scioto in the south. The regularity in the dip, and the moderate inclination of the strata, afford facilities to the mines not known to those of most other countries, especially Great Britain, where the strata in which the coal is imbedded have been broken and thrown out of place since its deposit, occasioning many slips and faults, and causing much labor and expense in again recovering the bed. In Ohio there is very

little difficulty of this kind, the faults being small and seldom found."

Now, taking into consideration these geological facts, let us look at the extent of the Ohio coal field. It occupies, wholly or in part, thirty-six counties, including, geographically, 14,000 square miles; but leaving out fractions, and reducing the Ohio coal field within its narrowest limits, it is 10,000 square miles in extent, lies near the surface, and has on an average twenty feet thickness of workable coal-beds. Let us compare this with the coal mines of Durham and Northumberland (England), the largest and best coal mines there. That coal district is estimated at 850 square miles, twelve feet thick, and is calculated to contain 9,000,000,000 tons of coal. The coal field of Ohio is twelve times larger and one-third thicker. Estimated by that standard, the coal field of Ohio contains 180,000,000,000 tons of coal. Marketed at only \$2 per ton, this coal is worth \$360,000,000,000, or, in other words, ten times as much as the whole valuation of the United States at the present time. But we need not undertake to estimate either its quantity or value. It is enough to say that it is a quantity which we can scarcely imagine, which is tenfold that of England, and which is enough to supply the entire continent for ages to come.

After coal, iron is beyond doubt the most valuable mineral product of a State. As the material of manufacture, it is the most important. What are called the "precious metals" are not to be compared with it as an element of industry or profit. But since no manufactures can be successfully carried on without fuel, coal becomes the first material element of the arts. Iron is unquestionably the next. Ohio has an iron district extending from the mouth of the Scioto River to some point north of the Mahoning River, in Trumbull County. The whole length is nearly two hundred miles, and the breadth twenty miles, making, as near as we can ascertain, 4,000 square miles. The iron in this district is of various qualities, and is manufactured largely into bars and castings. In this iron district are one hundred furnaces, forty-four rolling-mills, and fifteen rail-mills, being the largest number of either in any State in the Union, except only Pennsylvania.

Although only the seventeenth State in its admission, I find that, by the census statistics of 1870, it is the third State in the production of iron and iron manufactures. Already, and within the life of one man, this State begins to show what must in future time be the vast results of coal and iron,

applied to the arts and manufactures. In the year 1874, there were 420,000 tons of pig iron produced in Ohio, which is larger than the product of any State, except Pennsylvania. The product and the manufacture of iron in Ohio have increased so rapidly, and the basis for increase is so great, that we may not doubt that Ohio will continue to be the greatest producer of iron and iron fabrics, except only Pennsylvania. At Cincinnati, the iron manufacture of the Ohio Valley is concentrating, and at Cleveland the ores of Lake Superior are being smelted.

After coal and iron, we may place salt among the necessaries of life. In connection with the coal region west of the Alleghanies, there lies in Pennsylvania, West Virginia, and Ohio, a large space of country underlain by the salt rock, which already produces immense amounts of salt. Of this, Ohio has its full proportion. In a large section of the southeastern portion of the State, salt is produced without any known limitation. At Pomeroy and other points, the salt rock lies about one thousand feet below the surface, but salt water is brought easily to the surface by the steam engine. There, the salt rock, the coal seam, and the noble sandstone lie in successive strata, while the green corn and the yellow wheat bloom on the surface above. The State of Ohio produced, in 1874, 3,500,000 bushels of salt, being one-fifth of all produced in the United States. The salt section of Ohio is exceeded only by that of Syracuse, New York, and of Saginaw, Michigan. There is no definite limit to the underlying salt rock of Ohio, and, therefore, the production will be proportioned only to the extent of the demand.

Having now considered the resources and the products of the soil and the mines of Ohio, we may properly ask how far the people have employed their resources in the increase of art and manufacture. We have two modes of comparison, the rate of increase within the State, and the ratio they bear to other States. The aggregate value of the products of manufacture, exclusive of mining, in the last three censuses were: in 1850, \$62,692,000; in 1860, \$121,691,000; in 1870, \$269,713,000.

The ratio of increase was over 100 per cent in each ten years, a rate far beyond that of the increase of population, and much beyond the ratio of increase in the whole country. In 1850, the manufactures of Ohio were one-sixteenth part of the aggregate in the country; in 1860, one-fifteenth

part; in 1870, one-twelfth part. In addition to this, we find, from the returns of Cincinnati and Cleveland, that the value of the manufactured products of Ohio in 1875, must have reached \$400,000,000, and, by reference to the census tables, it will be seen that the ratio of increase exceeded that of the great manufacturing States of New York, Massachusetts and Connecticut. Of all the States admitted into the Union prior to Ohio, Pennsylvania alone has kept pace in the progress of manufacture. Some little reference to the manufacture of leading articles may throw some light on the cause of this. In the production of agricultural machinery and implements, Ohio is the first State; in animal and vegetable oils and in pig iron, the second; in cast iron and in tobacco, the third; in salt, in machinery and in leather, the fourth. These facts show how largely the resources of coal, iron and agriculture have entered into the manufactures of the State. This great advance in the manufactures of Ohio, when we consider that this State is, relatively to its surface, the first agricultural State in the country, leads to the inevitable inference that its people are remarkably industrious. When, on forty thousand square miles of surface, three millions of people raise one hundred and fifty million bushels of grain, and produce manufactures to the amount of \$269,000,000 (which is fifty bushels of breadstuff to each man, woman and child, and \$133 of manufacture), it will be difficult to find any community surpassing such results. It is a testimony, not only to the State of Ohio, but to the industry, sagacity and energy of the American people.

Looking now to the commerce of the State, we have said there are six hundred miles of coast line, which embraces some of the principal internal ports of the Ohio and the lakes, such as Cincinnati, Cleveland, Toledo and Portsmouth, but whose commerce is most wholly inland. Of course, no comparison can be made with the foreign commerce of the ocean ports. On the other hand, it is well known that the inland trade of the country far exceeds that of all its foreign commerce, and that the largest part of this interior trade is carried on its rivers and lakes. The materials for the vast consumption of the interior must be conveyed in its vessels, whether of sail or steam, adapted to these waters. Let us take, then, the ship-building, the navigation, and the exchange trades of Ohio, as elements in determining the position of this State in reference to the commerce of the country. At the ports of Cleveland, Toledo, Sandusky and Cin-

cinnati, there have been built one thousand sail and steam vessels in the last twenty years, making an average of fifty each year. The number of sail, steam and all kinds of vessels in Ohio is eleven hundred and ninety, which is equal to the number in all the other States in the Ohio Valley and the Upper Mississippi.

When we look to the navigable points to which these vessels are destined, we find them on all this vast coast line, which extends from the Gulf of Mexico to the Yellowstone, and from Duluth to the St. Lawrence.

Looking again to see the extent of this vast interior trade which is handled by Ohio alone, we find that the imports and exports of the principal articles of Cincinnati, amount in value to \$500,000,000; and when we look at the great trade of Cleveland and Toledo, we shall find that the annual trade of Ohio exceeds \$700,000,000. The lines of railroad which connect with its ports, are more than four thousand miles in length, or rather more than one mile in length to each ten square miles of surface. This great amount of railroads is engaged not merely in transporting to the Atlantic and thence to Europe, the immense surplus grain and meat in Ohio, but in carrying the largest part of that greater surplus, which exists in the States west of Ohio, the granary of the West. Ohio holds the gateway of every railroad north of the Ohio, from the Mississippi to the Atlantic, and hence it is that the great transit lines of the country pass through Ohio.

Let us now turn from the progress of the arts to the progress of ideas; from material to intellectual development. It is said that a State consists of men, and history shows that no art or science, wealth or power, will compensate for the want of moral or intellectual stability in the minds of a nation. Hence, it is admitted that the strength and perpetuity of our republic must consist in the intelligence and morality of the people. A republic can last only when the people are enlightened. This was an axiom with the early legislators of this country. Hence it was that when Virginia, Connecticut and the original colonies ceded to the General Government that vast and then unknown wilderness which lay west of the Alleghenies, in the valleys of the Ohio and Mississippi, they took care that its future inhabitants should be an educated people. The Constitution was not formed when the celebrated ordinance of 1787 was passed.

That ordinance provided that, "Religion, morality, and knowledge being necessary to good

government and the happiness of mankind, schools and the means of education shall be forever encouraged;" and by the ordinance of 1785 for the survey of public lands in the Northwestern Territory, Section 16 in each township, that is, one thirty-sixth part, was reserved for the maintenance of public schools in said townships. As the State of Ohio contained a little more than twenty-five millions of acres, this, together with two special grants of three townships to universities, amounted to the dedication of 740,000 acres of land to the maintenance of schools and colleges. It was a splendid endowment, but it was many years before it became available. It was sixteen years after the passage of this ordinance (in 1803), when Ohio entered the Union, and legislation upon this grant became possible. The Constitution of the State pursued the language of the ordinance, and declared that "schools and the means of education shall forever be encouraged by legislative provision." The Governors of Ohio, in successive messages, urged attention to this subject upon the people; but the thinness of settlement, making it impossible, except in few districts, to collect youth in sufficient numbers, and impossible to sell or lease lands to advantage, caused the delay of efficient school system for many years. In 1825, however, a general law establishing a school system, and levying a tax for its support, was passed.

This was again enlarged and increased by new legislation in 1836 and 1846. From that time to this, Ohio has had a broad, liberal and efficient system of public instruction. The taxation for schools, and the number enrolled in them at different periods, will best show what has been done. In 1855 the total taxation for school purposes was \$2,672,827. The proportion of youth of schoolable age enrolled was 67 per cent. In 1874 the amount raised by taxation was \$7,425,135. The number enrolled of schoolable age was 70 per cent, or 707,943.

As the schoolable age extends to twenty-one years, and as there are very few youth in school after fifteen years of age, it follows that the 70 per cent of schoolable youths enrolled in the public schools must comprehend nearly the whole number between four and fifteen years. It is important to observe this fact, because it has been inferred that, as the whole number of youth between five and twenty-one have not been enrolled, therefore they are not educated. This is a mistake; nearly all over fifteen years of age have been in the public schools, and all the native

youth of the State, and all foreign born, young enough, have had the benefit of the public schools. But in consequence of the large number who have come from other States and from foreign countries, there are still a few who are classed by the census statistics among the "illiterate;" the proportion of this class, however, is less in proportion than in twenty-eight other States, and less in proportion than in Connecticut and Massachusetts, two of the oldest States most noted for popular education. In fact, every youth in Ohio, under twenty-one years of age, may have the benefit of a public education; and, since the system of graded and high schools has been adopted, may obtain a common knowledge from the alphabet to the classics. The enumerated branches of study in the public schools of Ohio are thirty-four, including mathematics and astronomy, French, German and the classics. Thus the State which was in the heart of the wilderness in 1776, and was not a State until the nineteenth century had begun, now presents to the world, not merely an unrivaled development of material prosperity, but an unsurpassed system of popular education.

In what is called the higher education, in the colleges and universities, embracing the classics and sciences taught in regular classes, it is the popular idea, and one which few dare to question, that we must look to the Eastern States for superiority and excellence; but that also is becoming an assumption without proof; a proposition difficult to sustain. The facts in regard to the education of universities and colleges, their faculties, students and course of instruction, are all set forth in the complete statistics of the Bureau of Education for 1874. They show that the State of Ohio had the largest number of such institutions; the largest number of instructors in their faculties, except one State, New York; and the largest number of students in regular college classes, in proportion to their population, except the two States of Connecticut and Massachusetts. Perhaps, if we look at the statistics of classical students in the colleges, disregarding preparatory and irregular courses, we shall get a more accurate idea of the progress of the higher education in those States which claim the best. In Ohio, 36 colleges, 258 teachers, 2,139 students, proportion, 1 in 124; in Pennsylvania, 27 colleges, 239 teachers, 2,359 students, proportion, 1 in 150; in New York, 26 colleges, 343 teachers, 2,764 students, proportion, 1 in 176; in the six New England States, 17 colleges, 252 teachers, 3,341 students, proportion, 1 in 105; in Illi-

nois, 24 colleges, 219 teachers, 1,701 students, proportion, 1 in 140.

This shows there are more collegiate institutions in Ohio than in all New England; a greater number of college teachers, and only a little smaller ratio of students to the population; a greater number of such students than either in New York or Pennsylvania, and, as a broad, general fact, Ohio has made more progress in education than either of the old States which formed the American Union. Such a fact is a higher testimony to the strength and the beneficent influence of the American Government than any which the statistician or the historian can advance.

Let us now turn to the moral aspects of the people of Ohio. No human society is found without its poor and dependent classes, whether made so by the defects of nature, by acts of Providence, or by the accidents of fortune. Since no society is exempt from these classes, it must be judged not so much by the fact of their existence, as by the manner in which it treats them. In the civilized nations of antiquity, such as Greece and Rome, hospitals, infirmaries, orphan homes, and asylums for the infirm, were unknown. These are the creations of Christianity, and that must be esteemed practically the most Christian State which most practices this Christian beneficence. In Ohio, as in all the States of this country, and of all Christian countries, there is a large number of the infirm and dependent classes; but, although Ohio is the third State in population, she is only the fourteenth in the proportion of dependent classes. The more important point, however, was, how does she treat them? Is there wanting any of all the varied institutions of benevolence? How does she compare with other States and countries in this respect? It is believed that no State or country can present a larger proportion of all these institutions which the benevolence of the wise and good have suggested for the alleviation of suffering and misfortune, than the State of Ohio. With 3,500 of the insane within her borders, she has five great lunatic asylums, capable of accommodating them all. She has asylums for the deaf and dumb, the idiotic, and the blind. She has the best hospitals in the country. She has schools of reform and houses of refuge. She has "homes" for the boys and girls, to the number of 800, who are children of soldiers. She has penitentiaries and jails, orphan asylums and infirmaries. In every county there is an infirmary, and in every public institution, except the penitentiary, there is a

school. So that the State has used every human means to relieve the suffering, to instruct the ignorant, and to reform the criminal. There are in the State 80,000 who come under all the various forms of the infirm, the poor, the sick and the criminal, who, in a greater or less degree, make the dependent class. For these the State has made every provision which humanity or justice or intelligence can require. A young State, developed in the wilderness, she challenges, without any invidious comparison, both Europe and America, to show her superior in the development of humanity manifested in the benefaction of public institutions.

Intimately connected with public morals and with charitable institutions, is the religion of a people. The people of the United States are a Christian people. The people of Ohio have manifested their zeal by the erection of churches, of Sunday schools, and of religious institutions. So far as these are outwardly manifested, they are made known by the social statistics of the census. The number of church organizations in the leading States were: In the State of Ohio, 6,488; in the State of New York, 5,627; in the State of Pennsylvania, 5,984; in the State of Illinois, 4,298. It thus appears that Ohio had a larger number of churches than any State of the Union. The number of sittings, however, was not quite as large as those in New York and Pennsylvania. The denominations are of all the sects known in this country, about thirty in number, the majority of the whole being Methodists, Presbyterians and Baptists. Long before the American Independence, the Moravians had settled on the Mahoning and Tuscarawas Rivers, but only to be destroyed; and when the peace with Great Britain was made, not a vestige of Christianity remained on the soil of Ohio; yet we see that within ninety years from that time the State of Ohio was, in the number of its churches, the first of this great Union.

In the beginning of this address, I said that Ohio was the oldest and first of these great States, carved out of the Northwestern Territory, and that it was in some things the greatest State of the American Union. I have now traced the physical, commercial, intellectual and moral features of the State during the seventy-five years of its constitutional history. The result is to establish fully the propositions with which I began. These facts have brought out:

1. That Ohio is, in reference to the square miles of its surface, the first State in agriculture

of the American Union; this, too, notwithstanding it has 800,000 in cities and towns, and a large development of capital and products in manufactures.

2. That Ohio has raised more grain per square mile than either France, Austria, or Great Britain. They raised 1,450 bushels per square mile, and 10 bushels to each person. Ohio raised 3,750 bushels per square mile, and 50 bushels to each one of the population; or, in other words, five times the proportion of grain raised in Europe.

3. Ohio was the first State of the Union in the production of domestic animals, being far in advance of either New York, Pennsylvania or Illinois. The proportion of domestic animals to each person in Ohio was three and one-third, and in New York and Pennsylvania less than half that. The largest proportion of domestic animals produced in Europe was in Great Britain and Russia, neither of which come near that of Ohio.

4. The coal-field of Ohio is vastly greater than that of Great Britain, and we need make no comparison with other States in regard to coal or iron; for the 10,000 square miles of coal, and 4,000 square miles of iron in Ohio, are enough to supply the whole American continent for ages to come.

5. Neither need we compare the results of commerce and navigation, since, from the ports of Cleveland and Cincinnati, the vessels of Ohio touch on 42,000 miles of coast, and her 5,000 miles of railroad carry her products to every part of the American continent.

6. Notwithstanding the immense proportion and products of agriculture in Ohio, yet she has more than kept pace with New York and New England in the progress of manufactures during the last twenty years. Her coal and iron are producing their legitimate results in making her a great manufacturing State.

7. Ohio is the first State in the Union as to the proportion of youth attending school; and the States west of the Alleghenies and north of the Ohio have more youth in school, proportionably, than New England and New York. The facts on this subject are so extraordinary that I may be excused for giving them a little in detail.

The proportion of youth in Ohio attending school to the population, is 1 in 4.2; in Illinois, 1 in 4.3; in Pennsylvania, 1 in 4.8; in New York, 1 in 5.2; in Connecticut and Massachusetts, 1 in 8.7.

These proportions show that it is in the West, and not in the East, that education is now advanc-

ing; and it is here that we see the stimulus given by the ordinance of 1787, is working out its great and beneficent results. The land grant for education was a great one, but, at last, its chief effort was in stimulating popular education; for the State of Ohio has taxed itself tens of millions of dollars beyond the utmost value of the land grant, to found and maintain a system of public education which the world has not surpassed.

We have seen that above and beyond all this material and intellectual development, Ohio has provided a vast benefaction of asylums, hospitals, and infirmaries, and special schools for the support and instruction of the dependent classes. There is not within all her borders a single one of the deaf, dumb, and blind, of the poor, sick, and insane, not an orphan or a vagrant, who is not provided for by the broad and generous liberality of the State and her people. A charity which the classic ages knew nothing of, a beneficence which the splendid hierarchies and aristocracies of Europe cannot equal, has been exhibited in this young State, whose name was unknown one hundred years ago, whose people, from Europe to the Atlantic, and from the Atlantic to the Ohio, were, like Adam and Eve, cast out—"the world before them where to choose."

Lastly, we see that, although the third in population, and the seventeenth in admission to the Union, Ohio had, in 1870, 6,400 churches, the largest number in any one State, and numbering among them every form of Christian worship. The people, whose fields were rich with grain, whose mines were boundless in wealth, and whose commerce extended through thousands of miles of lakes and rivers, came here, as they came to New England's rock-bound coast—

"With freedom to worship God."

The church and the schoolhouse rose beside the green fields, and the morning bells rang forth to cheerful children going to school, and to a Christian people going to the church of God.

Let us now look at the possibilities of Ohio in the future development of the American Republican Republic. The two most populous parts of Europe, because the most food-producing, are the Netherlands and Italy, or, more precisely, Belgium and ancient Lombardy; to the present time, their population is, in round numbers, three hundred to the square mile. The density of population in England proper is about the same. We may assume, therefore, that three hundred to the square

mile is, in round numbers, the limit of comfortable subsistence under modern civilization. It is true that modern improvements in agricultural machinery and fertilization have greatly increased the capacity of production, on a given amount of land, with a given amount of labor. It is true, also, that the old countries of Europe do not possess an equal amount of arable land with Ohio in proportion to the same surface. It would seem, therefore, that the density of population in Ohio might exceed that of any part of Europe. On the other hand, it may be said with truth that the American people will not become so dense as in Europe while they have new lands in the West to occupy. This is true; but lands such as those in the valley of the Ohio are now becoming scarce in the West, and we think that, with her great capacity for the production of grain on one hand, and of illimitable quantities of coal and iron to manufacture with on the other, that Ohio will, at no remote period, reach nearly the density of Belgium, which will give her 10,000,000 of people. This seems extravagant, but the tide of migration, which flowed so fast to the West, is beginning to ebb, while the manufactures of the interior offer greater inducements.

With population comes wealth, the material for education, the development of the arts, advance in all the material elements of civilization, and the still grander advancements in the strength and elevation of the human mind, conquering to itself new realms of material and intellectual power, acquiring in the future what we have seen in the past, a wealth of resources unknown and undreamed of when, a hundred years ago, the fathers of the republic declared their independence. I know how easy it is to treat this statement with easy incredulity, but statistics is a certain science; the elements of civilization are now measured, and we know the progress of the human race as we know

that of a cultivated plant. We know the resources of the country, its food-producing capacity, its art processes, its power of education, and the undefined and illimitable power of the human mind for new inventions and unimagined progress. With this knowledge, it is not difficult nor unsafe to say that the future will produce more, and in a far greater ratio, than the past. The pictured scenes of the prophets have already been more than fulfilled, and the visions of beauty and glory, which their imagination failed fully to describe, will be more than realized in the bloom of that garden which republican America will present to the eyes of astonished mankind. Long before another century shall have passed by, the single State of Ohio will present fourfold the population with which the thirteen States began their independence, more wealth than the entire Union now has; greater universities than any now in the country, and a development of arts and manufacture which the world now knows nothing of. You have seen more than that since the Constitution was adopted, and what right have you to say the future shall not equal the past?

I have aimed, in this address, to give an exact picture of what Ohio is, not more for the sake of Ohio than as a representation of the products which the American Republic has given to the world. A State which began long after the Declaration of Independence, in the then unknown wilderness of North America, presents to-day the fairest example of what a republican government with Christian civilization can do. Look upon this picture and upon those of Assyria, of Greece or Rome, or of Europe in her best estate, and say where is the civilization of the earth which can equal this. If a Roman citizen could say with pride, "*Civis Romanus sum*," with far greater pride can you say this day, "I am an American citizen."

CHAPTER XIV.

EDUCATION*—EARLY SCHOOL LAWS—NOTES—INSTITUTES AND EDUCATIONAL JOURNALS—
SCHOOL SYSTEM—SCHOOL FUNDS—COLLEGES AND UNIVERSITIES.

WHEN the survey of the Northwest Territory was ordered by Congress, March 20, 1785, it was decreed that every sixteenth section of land should be reserved for the "maintenance of public schools within each township." The ordinance of 1787—thanks to the New England Associates—proclaimed that, "religion, morality and knowledge being essential to good government, schools and the means of education should forever be encouraged." The State Constitution of 1802 declared that "schools and the means of instruction should be encouraged by legislative provision, not inconsistent with the rights of conscience." In 1825, through the persevering efforts of Nathan Guilford, Senator from Hamilton County, Ephraim Cutler, Representative from Washington County, and other friends of education, a bill was passed, "laying the foundation for a general system of common schools." This bill provided a tax of one-half mill, to be levied by the County Commissioners for school purposes; provided for school examiners, and made Township Clerks and County Auditors school officers. In 1829, this county tax was raised to three-fourths of a mill; in 1834 to one mill, and, in 1836, to one and a half mills.

In March, 1837, Samuel Lewis, of Hamilton County, was appointed State Superintendent of Common Schools. He was a very energetic worker, traveling on horseback all over the State, delivering addresses and encouraging school officers and teachers. Through his efforts much good was done, and

many important features engrafted on the school system. He resigned in 1839, when the office was abolished, and its duties imposed on the Secretary of State.

The most important adjunct in early education in the State was the college of teachers organized in Cincinnati in 1831. Albert Pickett, Dr. Joseph Ray, William H. McGuffey—so largely known by his Readers—and Milo G. Williams, were at its head. Leading men in all parts of the West attended its meetings. Their published deliberations did much for the advancement of education among the people. Through the efforts of the college, the first convention held in Ohio for educational purposes was called at Columbus, January 13, 1836. Two years after, in December, the first convention in which the different sections of the State were represented, was held. At both these conventions, all the needs of the schools, both common and higher, were ably and fully discussed, and appeals made to the people for a more cordial support of the law. No successful attempts were made to organize a permanent educational society until December, 1847, when the Ohio State Teachers' Association was formed at Akron, Summit County, with Samuel Galloway as President; T. W. Harvey, Recording Secretary; M. D. Leggett, Corresponding Secretary; William Bowen, Treasurer, and M. F. Cowdrey, Chairman of the Executive Committee. This Association entered upon its work with commendable earnestness, and has since

* From the School Commissioners' Reports, principally those of Thomas W. Harvey, A. M.

NOTE 1.—The first school taught in Ohio, or in the Northwestern Territory, was in 1791. The first teacher was Maj. Austin Tupper, eldest son of Gen. Benjamin Tupper, both Revolutionary officers. The room occupied was the same as that in which the first Court was held, and was situated in the northwest block-house of the garrison, called the stockade, at Marietta. During the Indian war school was also taught at Fort Harmar, Point Marietta, and at other settlements. A meeting was held in Marietta, April 29, 1797, to consider the erection of a school building suitable for the instruction of the youth, and for conducting religious services. Resolutions were adopted which led to the erection of a building called the Muskingum Academy. The building was of frame, forty feet long and twenty-four feet wide, and is yet (1878) standing. The building was twelve feet high, with an arched ceiling. It stood upon a stone foundation, three steps from the ground. There were two chimneys and a lobby projection. There was a cellar under the whole building. It stood upon a beautiful lot, fronting the Muskingum River, and about sixty feet back from the street. Some large trees were

upon the lot and on the street in front. Across the street was an open common, and beyond that the river. Immediately opposite the door, on entering, was a broad aisle, and, at the end of the aisle, against the wall, was a desk or pulpit. On the right and left of the pulpit, against the wall, and fronting the pulpit, was a row of slips. On each side of the door, facing the pulpit, were two slips, and, at each end of the room, one slip. These slips were stationary, and were fitted with desks that could be let down, and there were boxes in the desks for holding books and papers. In the center of the room was an open space, which could be filled with movable seats. The first school was opened here in 1800."—*Letter of A. T. Nye.*

NOTE 2.—Another evidence of the character of the New England Associates is the founding of a public library as early as 1796, or before. Another was also established at Belpre about the same time. Abundant evidence proves the existence of these libraries, all tending to the fact that the early settlers, though conquering a wilderness and a savage foe, would not allow their mental faculties to lack for food. The character of the books shows that "solid" reading predominated.

never abated its zeal. Semi-annual meetings were at first held, but, since 1858, only annual meetings occur. They are always largely attended, and always by the best and most energetic teachers. The Association has given tone to the educational interests of the State, and has done a vast amount of good in popularizing education. In the spring of 1851, Lorin Andrews, then Superintendent of the Massillon school, resigned his place, and became a common-school missionary. In July, the Association, at Cleveland, made him its agent, and instituted measures to sustain him. He remained zealously at work in this relation until 1853, when he resigned to accept the presidency of Kenyon College, at Gambier. Dr. A. Lord was then chosen general agent and resident editor of the *Journal of Education*, which positions he filled two years, with eminent ability.

The year that Dr. Lord resigned, the ex officio relation of the Secretary of State to the common schools was abolished, and the office of school commissioner again created. H. H. Barney was elected to the place in October, 1853. The office has since been held by Rev. Anson Smyth, elected in 1856, and re-elected in 1859; E. E. White, appointed by the Governor, November 11, 1863, to fill the vacancy caused by the resignation of C. W. H. Cathcart, who was elected in 1862; John A. Norris, in 1865; W. D. Henkle, in 1868; Thomas W. Harvey, in 1871; C. S. Smart, in 1875, and the present incumbent, J. J. Burns, elected in 1878, his term expiring in 1881.

The first teachers' institute in Northern Ohio was held at Sandusky, in September, 1845, conducted by Salem Town, of New York, A. D. Lord and M. F. Cowdrey. The second was held at Chardon, Geauga Co., in November of the same year. The first institute in the southern part of the State was held at Cincinnati, in February, 1837; the first in the central part at Newark, in March, 1848. Since then these meetings of teachers have occurred annually, and have been the means of great good in elevating the teacher and the public in educational interests. In 1848, on petition of forty teachers, county commissioners were authorized to pay lecturers from surplus revenue, and the next year, to appropriate \$100 for institute purposes, upon pledge of teachers to raise half that amount. By the statutes of 1864, applicants for teachers were required to pay 50 cents each as an examination fee. One-third of the amount thus raised was allowed the use of examiners as traveling expenses, the remainder to be applied to in-

stitute instruction. For the year 1871, sixty-eight teachers' institutes were held in the State, at which 308 instructors and lecturers were employed, and 7,158 teachers in attendance. The expense incurred was \$16,361.99, of which \$10,127.13 was taken from the institute fund; \$2,730.34, was contributed by members; \$680, by county commissioners, and the balance, \$1,371.50, was obtained from other sources. The last report of the State Commissioners—1878—shows that eighty-five county institutes were held in the State, continuing in session 748 days; 416 instructors were employed; 11,466 teachers attended; \$22,531.47 were received from all sources, and that the expenses were \$19,587.51, or \$1.71 per member. There was a balance on hand of \$9,460.74 to commence the next year, just now closed, whose work has been as progressive and thorough as any former year. The State Association now comprises three sections; the general association, the superintendents' section and the ungraded school section. All have done a good work, and all report progress.

The old State Constitution, adopted by a convention in 1802, was supplemented in 1851 by the present one, under which the General Assembly, elected under it, met in 1852. Harvey Rice, a Senator from Cuyahoga County, Chairman of Senate Committee on "Common Schools and School Lands," reported a bill the 29th of March, to provide "for the re-organization, supervision and maintenance of common schools." This bill, amended in a few particulars, became a law March 14, 1853. The prominent features of the new law were: The substitution of a State school tax for the county tax; creation of the office of the State School Commissioner; the creation of a Township Board of Education, consisting of representatives from the subdistricts; the abolition of rate-bills, making education free to all the youth of the State; the raising of a fund, by a tax of one-tenth of a mill yearly, "for the purpose of furnishing school libraries and apparatus to all the common schools." This "library tax" was abolished in 1860, otherwise the law has remained practically unchanged.

School journals, like the popular press, have been a potent agency in the educational history of the State. As early as 1838, the *Ohio School Director* was issued by Samuel Lewis, by legislative authority, though after six months' continuance, it ceased for want of support. The same year the *Pestalozzian*, by E. L. Sawtell and H. K. Smith, of Akron, and the *Common School*

Advocate, of Cincinnati, were issued. In 1846, the *School Journal* began to be published by A. D. Lord, of Kirtland. The same year saw the *Free School Clarion*, by W. Bowen, of Massillon, and the *School Friend*, by W. B. Smith & Co., of Cincinnati. The next year, W. H. Moore & Co., of Cincinnati, started the *Western School Journal*. In 1851, the *Ohio Teacher*, by Thomas Rainey, appeared; the *News and Educator*, in 1863, and the *Educational Times*, in 1866. In 1850, Dr. Lord's *Journal of Education* was united with the *School Friend*, and became the recognized organ of the teachers in Ohio. The Doctor remained its principal editor until 1856, when he was succeeded by Anson Smyth, who edited the journal one year. In 1857, it was edited by John D. Caldwell; in 1858 and 1859, by W. T. Coggeshall; in 1860, by Anson Smyth again, when it passed into the hands of E. E. White, who yet controls it. It has an immense circulation among Ohio teachers, and, though competed by other journals, since started, it maintains its place.

The school system of the State may be briefly explained as follows: Cities and incorporated villages are independent of township and county control, in the management of schools, having boards of education and examiners of their own. Some of them are organized for school purposes, under special acts. Each township has a board of education, composed of one member from each sub-district. The township clerk is clerk of this board, but has no vote. Each subdistrict has a local board of trustees, which manages its school affairs, subject to the advice and control of the township board. These officers are elected on the first Monday in April, and hold their offices three years. An enumeration of all the youth between the ages of five and twenty-one is made yearly. All public schools are required to be in session at least twenty-four weeks each year. The township clerk reports annually such facts concerning school affairs as the law requires, to the county auditor, who in turn reports to the State Commissioner, who collects these reports in a general report to the Legislature each year.

A board of examiners is appointed in each county by the Probate Judge. This board has power to grant certificates for a term not exceeding two years, and good only in the county in which they are executed; they may be revoked on sufficient cause. In 1864, a State Board of Examiners was created, with power to issue life cer-

tificates, valid in all parts of the State. Since then, up to January 1, 1879, there have been 188 of these issued. They are considered an excellent test of scholarship and ability, and are very creditable to the holder.

The school funds, in 1865, amounted to \$3,271,275.66. They were the proceeds of appropriations of land by Congress for school purposes, upon which the State pays an annual interest of 6 per cent. The funds are known as the Virginia Military School Fund, the proceeds of eighteen quarter-townships and three sections of land, selected by lot from lands lying in the United States Military Reserve, appropriated for the use of schools in the Virginia Military Reservation; the United States Military School Fund, the proceeds of one thirty-sixth part of the land in the United States Military District, appropriated "for the use of schools within the same;" the Western Reserve School Fund, the proceeds from fourteen quarter-townships, situated in the United States Military District, and 37,758 acres, most of which was located in Defiance, Williams, Paulding, Van Wert and Putnam Counties, appropriated for the use of the schools in the Western Reserve; Section 16, the proceeds from the sixteenth section of each township in that part of the State in which the Indian title was not extinguished in 1803; the Moravian School Fund, the proceeds from one thirty-sixth part of each of three tracts of 4,000 acres situated in Tuscarawas County, originally granted by Congress to the Society of United Brethren, and reconveyed by this Society to the United States in 1824. The income of these funds is not distributed by any uniform rule, owing to defects in the granting of the funds. The territorial divisions designated receive the income in proportion to the whole number of youth therein, while in the remainder of the State, the rent of Section 16, or the interest on the proceeds arising from its sale, is paid to the inhabitants of the originally surveyed townships. In these territorial divisions, an increase or decrease of population must necessarily increase or diminish the amount each youth is entitled to receive; and the fortunate location or judicious sale of the sixteenth section may entitle one township to receive a large sum, while an adjacent township receives a mere pittance. This inequality of benefit may be good for localities, but it is certainly a detriment to the State at large. There seems to be no legal remedy for it. In addition to the income from the before-mentioned funds, a variable revenue is received

from certain fines and licenses paid to either county or township treasurers for the use of schools; from the sale of swamp lands (\$25,720.07 allotted to the State in 1850), and from personal property escheated to the State.

Aside from the funds, a State school tax is fixed by statute. Local taxes vary with the needs of localities, are limited by law, and are contingent on the liberality and public spirit of different communities.

The State contains more than twenty colleges and universities, more than the same number of female seminaries, and about thirty normal schools and academies. The amount of property invested in these is more than \$6,000,000. The Ohio University is the oldest college in the State.

In addition to the regular colleges, the State controls the Ohio State University, formerly the Agricultural and Mechanical College, established from the proceeds of the land scrip voted by Congress to Ohio for such purposes. The amount realized from the sale was nearly \$500,000. This is to constitute a permanent fund, the interest only to be used. In addition, the sum of \$300,000 was voted by the citizens of Franklin County, in consideration of the location of the college in that county. Of this sum \$111,000 was paid for three hundred and fifteen acres of land near the city of Columbus, and \$112,000 for a college building,

the balance being expended as circumstances required, for additional buildings, laboratory, apparatus, etc. Thorough instruction is given in all branches relating to agriculture and the mechanical arts. Already excellent results are attained.

By the provisions of the act of March 14, 1853, township boards are made bodies politic and corporate in law, and are invested with the title, care and custody of all school property belonging to the school district or township. They have control of the central or high schools of their townships; prescribe rules for the district schools; may appoint one of their number manager of the schools of the township, and allow him reasonable pay for his services; determine the text-books to be used; fix the boundaries of districts and locate schoolhouse sites; make estimates of the amount of money required; apportion the money among the districts, and are required to make an annual report to the County Auditor, who incorporates the same in his report to the State Commissioner, by whom it reaches the Legislature.

Local directors control the subdistricts. They enumerate the children of school age, employ and dismiss teachers, make contracts for building and furnishing schoolhouses, and make all necessary provision for the convenience of the district schools. Practically, the entire management rests with them.

CHAPTER XV.

AGRICULTURE—AREA OF THE STATE—EARLY AGRICULTURE IN THE WEST—MARKETS—LIVE STOCK—NURSERIES, FRUITS, ETC.—CEREALS—ROOT AND CUCURBITACEOUS CROPS—AGRICULTURAL IMPLEMENTS—AGRICULTURAL SOCIETIES—POMOLOGICAL AND HORTICULTURAL SOCIETIES.

"Oft did the harvest to their sickles yield,
Their furrow oft the stubborn glebe has broke;
How jocund did they drive their teams afield!
How bowed the woods beneath their sturdy stroke."

THE majority of the readers of these pages are farmers, hence a resume of agriculture in the State, would not only be appropriate, but valuable as a matter of history. It is the true basis of national prosperity, and, therefore, justly occupies a foremost place.

In the year 1800, the Territory of Ohio contained a population of 45,365 inhabitants, or a little more than one person to the square mile. At

this date, the admission of the Territory into the Union as a State began to be agitated. When the census was made to ascertain the legality of the act, in conformity to the "Compact of 1787," no endeavor was made to ascertain additional statistics, as now; hence, the cultivated land was not returned, and no account remains to tell how much existed. In 1805, three years after the admission of the State into the Union, 7,252,856 acres had been purchased from the General Government. Still no returns of the cultivated lands were made. In 1810, the population of Ohio was 230,760, and the land purchased from the Gov-

ernment amounted to 9,933,150 acres, of which amount, however, 3,569,314 acres, or more than one-third, was held by non-residents. Of the lands occupied by resident land-owners, there appear to have been 100,968 acres of first-rate, 1,929,600 of second, and 1,538,745 acres of third rate lands. At this period there were very few exports from the farm, loom or shop. The people still needed all they produced to sustain themselves, and were yet in that pioneer period where they were obliged to produce all they wanted, and yet were opening new farms, and bringing the old ones to a productive state.

Kentucky, and the country on the Monongahela, lying along the western slopes of the Alleghany Mountains, having been much longer settled, had begun, as early as 1795, to send considerable quantities of flour, whisky, bacon and tobacco to the lower towns on the Mississippi, at that time in the possession of the Spaniards. At the French settlements on the Illinois, and at Detroit, were being raised much more than could be used, and these were exporting also large quantities of these materials, as well as peltries and such commodities as their nomadic lives furnished. As the Mississippi was the natural outlet of the West, any attempt to impede its free navigation by the various powers at times controlling its outlet, would lead at once to violent outbreaks among the Western settlers, some of whom were aided by unscrupulous persons, who thought to form an independent Western country. Providence seems to have had a watchful eye over all these events, and to have so guided them that the attempts with such objects in view, invariably ended in disgrace to their perpetrators. This outlet to the West was thought to be the only one that could carry their produce to market, for none of the Westerners then dreamed of the immense system of railways now covering that part of the Union. As soon as ship-building commenced at Marietta, in the year 1800, the farmers along the borders of the Ohio and Muskingum Rivers turned their attention to the cultivation of hemp, in addition to their other crops. In a few years sufficient was raised, not only to furnish cordage to the ships in the West, but large quantities were worked up in the various rope-walks and sent to the Atlantic cities. Iron had been discovered, and forges on the Juniata were busy converting that necessary and valued material into implements of industry.

By the year 1805, two ships, seven brigs and three schooners had been built and rigged by the

citizens of Marietta. Their construction gave a fresh impetus to agriculture, as by means of them the surplus products could be carried away to a foreign market, where, if it did not bring money, it could be exchanged for merchandise equally valuable. Captain David Devoll was one of the earliest of Ohio's shipwrights. He settled on the fertile Muskingum bottom, about five miles above Marietta, soon after the Indian war. Here he built a "floating mill," for making flour, and, in 1801, a ship of two hundred and fifty tons, called the Muskingum, and the brig Eliza Greene, of one hundred and fifty tons. In 1804, he built a schooner on his own account, and in the spring of the next year, it was finished and loaded for a voyage down the Mississippi. It was small, only of seventy tons burden, of a light draft, and intended to run on the lakes east of New Orleans. In shape and model, it fully sustained its name, Nonpareil. Its complement of sails, small at first, was completed when it arrived in New Orleans. It had a large cabin to accommodate passengers, was well and finely painted, and sat gracefully on the water. Its load was of assorted articles, and shows very well the nature of exports of the day. It consisted of two hundred barrels of flour, fifty barrels of kiln-dried corn meal, four thousand pounds of cheese, six thousand of bacon, one hundred sets of rum puncheon shooks, and a few grindstones. The flour and meal were made at Captain Devoll's floating mill, and the cheese made in Belpre, at that date one of Ohio's most flourishing agricultural districts. The Captain and others carried on boating as well as the circumstances of the days permitted, fearing only the hostility of the Indians, and the duty the Spaniards were liable to levy on boats going down to New Orleans, even if they did not take it into their erratic heads to stop the entire navigation of the great river by vessels other than their own. By such means, merchandise was carried on almost entirely until the construction of canals, and even then, until modern times, the flat-boat was the main-stay of the shipper inhabiting the country adjoining the upper Ohio and Mississippi Rivers.

Commonly, very little stock was kept beyond what was necessary for the use of the family and to perform the labor on the farm. The Scioto Valley was perhaps the only exception in Ohio to this general condition. Horses were brought by the emigrants from the East and were characteristic of that region. In the French settlements in Illinois and about Detroit, French ponies, marvels of

endurance, were chiefly used. They were impracticable in hauling the immense emigrant wagons over the mountains, and hence were comparatively unknown in Ohio. Until 1828, draft horses were chiefly used here, the best strains being brought by the "Tunkers," "Mennonites," and "Ornish,"—three religious sects, whose members were invariably agriculturists. In Stark, Wayne, Holmes, and Richland Counties, as a general thing, they congregated in communities, where the neatness of their farms, the excellent condition of their stock, and the primitive simplicity of their manners, made them conspicuous.

In 1828, the French began to settle in Stark County, where they introduced the stock of horses known as "Selim," "Florizel," "Post Boy" and "Timolen." These, crossed upon the descents of the Norman and Conestoga, produced an excellent stock of farm horses, now largely used.

In the Western Reserve, blooded horses were introduced as early as 1825. John I. Van Meter brought fine horses into the Scioto Valley in 1815, or thereabouts. Soon after, fine horses were brought to Steubenville from Virginia and Pennsylvania. In Northern Ohio the stock was more miscellaneous, until the introduction of improved breeds from 1815 to 1835. By the latter date the strains of horses had greatly improved. The same could be said of other parts of the State. Until after 1825, only farm and road horses were required. That year a race-course—the first in the State—was established in Cincinnati, shortly followed by others at Chillicothe, Dayton and Hamilton. From that date the race-horse steadily improved. Until 1838, however, all race-courses were rather irregular, and, of those named, it is difficult to determine which one has priority of date over the others. To Cincinnati, the precedence is, however, generally given. In 1838, the Buckeye Course was established in Cincinnati, and before a year had elapsed, it is stated, there were fifteen regular race-courses in Ohio. The effect of these courses was to greatly stimulate the stock of racers, and rather detract from draft and road horses. The organization of companies to import blooded horses has again revived the interest in this class, and now, at annual stock sales, these strains of horses are eagerly sought after by those having occasion to use them.

Cattle were brought over the mountains, and, for several years, were kept entirely for domestic uses. By 1805, the country had so far settled that the surplus stock was fattened on corn and

fodder, and a drove was driven to Baltimore. The drove was owned by George Renick, of Chillicothe, and the feat was looked upon as one of great importance. The drove arrived in Baltimore in excellent condition. The impetus given by this movement of Mr. Renick stimulated greatly the feeding of cattle, and led to the improvement of the breed, heretofore only of an ordinary kind.

Until the advent of railroads and the shipment of cattle thereon, the number of cattle driven to eastern markets from Ohio alone, was estimated at over fifteen thousand annually, whose value was placed at \$600,000. Besides this, large numbers were driven from Indiana and Illinois, whose boundless prairies gave free scope to the herding of cattle. Improved breeds, "Short Horns," "Long Horns" and others, were introduced into Ohio as early as 1810 and 1815. Since then the stock has been gradually improved and acclimated, until now Ohio produces as fine cattle as any State in the Union. In some localities, especially in the Western Reserve, cheesemaking and dairy interests are the chief occupations of whole neighborhoods, where may be found men who have grown wealthy in this business.

Sheep were kept by almost every family, in pioneer times, in order to be supplied with wool for clothing. The wool was carded by hand, spun in the cabin, and frequently dyed and woven as well as shaped into garments there, too. All emigrants brought the best household and farming implements their limited means would allow, so also did they bring the best strains of horses, cattle and sheep they could obtain. About the year 1809, Mr. Thomas Rotch, a Quaker, emigrated to Stark County, and brought with him a small flock of Merino sheep. They were good, and a part of them were from the original flock brought over from Spain, in 1801, by Col. Humphrey, United States Minister to that country. He had brought 200 of these sheep, and hoped, in time, to see every part of the United States stocked with Merinos. In this he partially succeeded only, owing to the prejudice against them. In 1816, Messrs. Wells & Dickenson, who were, for the day, extensive woolen manufacturers in Steubenville, drove their fine flocks out on the Stark County Plains for the summer, and brought them back for the winter. This course was pursued for several years, until farms were prepared, when they were permanently kept in Stark County. This flock was originally derived from the Humphrey importation. The failure of Wells & Dickenson, in 1824, placed

a good portion of this flock in the hands of Adam Hildebrand, and became the basis of his celebrated flock. Mr. T. S. Humrickhouse, of Coshocton, in a communication regarding sheep, writes as follows:

"The first merinos brought to Ohio were doubtless by Seth Adams, of Zanesville. They were Humphrey's Merinos—undoubtedly the best ever imported into the United States, by whatever name called. He kept them part of the time in Washington, and afterward in Muskingum County. He had a sort of partnership agency from Gen. Humphrey for keeping and selling them. They were scattered, and, had they been taken care of and appreciated, would have laid a better foundation of flocks in Ohio than any sheep brought into it from that time till 1852. The precise date at which Adams brought them cannot now be ascertained; but it was prior to 1813, perhaps as early as 1804."

"The first Southdowns," continues Mr. Humrickhouse, "New Leicester, Lincolnshire and Cotswold sheep I ever saw, were brought into Coshocton County from England by Isaac Maynard, nephew of the famous Sir John, in 1834. There were about ten Southdowns and a trio of each of the other kinds. He was offered \$500 for his Lincolnshire ram, in Buffalo, as he passed through, but refused. He was selfish, and unwilling to put them into other hands when he went on a farm, all in the woods, and, in about three years, most of them had perished."

The raising and improvement of sheep has kept steady tread with the growth of the State, and now Ohio wool is known the world over. In quantity it is equal to any State in America, while its quality is unequaled.

The first stock of hogs brought to Ohio were rather poor, scrawny creatures, and, in a short time, when left to themselves to pick a livelihood from the beech mast and other nuts in the woods, degenerated into a wild condition, almost akin to their originators. As the country settled, however, they were gathered from their lairs, and, by feeding them corn, the farmers soon brought them out of their semi-barbarous state. Improved breeds were introduced. The laws for their protection and guarding were made, and now the hog of today shows what improvement and civilization can do for any wild animal. The chief city of the State has become famous as a slaughtering place; her bacon and sides being known in all the civilized world.

Other domestic animals, mules, asses, etc., have been brought to the State as occasion required. Wherever their use has been demanded, they have been obtained, until the State has her complement of all animals her citizens can use in their daily labors.

Most of the early emigrants brought with them young fruit trees or grafts of some favorite variety from the "old homestead." Hence, on the Western Reserve are to be found chiefly—especially in old orchards—New England varieties, while, in the localities immediately south of the Reserve, Pennsylvania and Maryland varieties predominate; but at Marietta, New England fruits are again found, as well as throughout Southeastern Ohio. One of the oldest of these orchards was on a Mr. Dana's farm, near Cincinnati, on the Ohio River bank. It consisted of five acres, in which apple seeds and seedlings were planted as early as 1790. Part of the old orchard is yet to be seen, though the trees are almost past their usefulness. Peaches, pears, cherries and apples were planted by all the pioneers in their gardens. As soon as the seed produced seedlings, these were transplanted to some hillside, and the orchard, in a few years, was a productive unit in the life of the settler. The first fruit brought, was, like everything else of the pioneers, rather inferior, and admitted of much cultivation. Soon steps were taken by the more enterprising settlers to obtain better varieties. Israel Putnam, as early as 1796, returned to the East, partly to get scions of the choicest apples, and, partly, on other business. He obtained quite a quantity of choice apples, of some forty or fifty varieties, and set them out. A portion of them were distributed to the settlers who had trees, to ingraft. From these old grafts are yet to be traced some of the best orchards in Ohio. Israel Putnam was one of the most prominent men in early Ohio days. He was always active in promoting the interests of the settlers. Among his earliest efforts, that of improving the fruit may well be mentioned. He and his brother, Aaron W. Putnam, living at Belpre, opposite Blennerhasset's Island, began the nursery business soon after their arrival in the West. The apples brought by them from their Connecticut home were used to commence the business. These, and the apples obtained from trees planted in their gardens, gave them a beginning. They were the only two men in Ohio engaged in the business till 1817.

In early times, in the central part of Ohio, there existed a curious character known as "Johnny

Appleseed." His real name was John Chapman. He received his name from his habit of planting, along all the streams in that part of the State, apple-seeds from which sprang many of the old orchards. He did this as a religious duty, thinking it to be his especial mission. He had, it is said, been disappointed in his youth in a love affair, and came West about 1800, and ever after followed his singular life. He was extensively known, was quite harmless, very patient, and did, without doubt, much good. He died in 1847, at the house of a Mr. Worth, near Fort Wayne, Indiana, who had long known him, and often befriended him. He was a minister in the Swedenborgian Church, and, in his own way, a zealous worker.

The settlers of the Western Reserve, coming from New England, chiefly from Connecticut, brought all varieties of fruit known in their old homes. These, whether seeds or grafts, were planted in gardens, and as soon as an orchard could be cleared on some favorable hillside, the young trees were transplanted there, and in time an orchard was the result. Much confusion regarding the kinds of fruits thus produced arose, partly from the fact that the trees grown from seeds did not always prove to be of the same quality as the seeds. Climate, soil and surroundings often change the character of such fruits. Many new varieties, unknown to the growers, were the result. The fruit thus produced was often of an inferior growth, and when grafts were brought from the old New England home and grafted into the Ohio trees, an improvement as well as the old home fruit was the result. After the orchards in the Reserve began to bear, the fruit was very often taken to the Ohio River for shipment, and thence found its way to the Southern and Eastern seaboard cities.

Among the individuals prominent in introducing fruits into the State, were Mr. Dille, of Euclid, Judge Fuller, Judge Whittlesey, and Mr. Lindley. George Hoadly was also very prominent and energetic in the matter, and was, perhaps, the first to introduce the pear to any extent. He was one of the most persistent and enthusiastic amateurs in horticulture and pomology in the West. About the year 1810, Dr. Jared Kirtland, father of Prof. J. P. Kirtland, so favorably known among horticulturists and pomologists, came from Connecticut and settled in Poland, Mahoning County, with his family. This family has done more than any other in the State, perhaps, to

advance fruit culture. About the year 1824, Prof. J. P. Kirtland, in connection with his brother, established a nursery at Poland, then in Trumbull County, and brought on from New England above a hundred of their best varieties of apples, cherries, peaches, pears, and smaller fruits, and a year or two after brought from New Jersey a hundred of the best varieties of that State; others were obtained in New York, so that they possessed the largest and most varied stock in the Western country. These two men gave a great impetus to fruit culture in the West, and did more than any others of that day to introduce improved kinds of all fruits in that part of the United States.

Another prominent man in this branch of industry was Mr. Andrew H. Ernst, of Cincinnati. Although not so early a settler as the Kirtlands, he was, like them, an ardent student and propagator of fine fruits. He introduced more than six hundred varieties of apples and seven hundred of pears, both native and foreign. His object was to test by actual experience the most valuable sorts for the diversified soil and climate of the Western country.

The name of Nicholas Longworth, also of Cincinnati, is one of the most extensively known of any in the science of horticulture and pomology. For more than fifty years he made these his especial delight. Having a large tract of land in the lower part of Cincinnati, he established nurseries, and planted and disseminated every variety of fruits that could be found in the United States—East or West—making occasional importations from European countries of such varieties as were thought to be adapted to the Western climate. His success has been variable, governed by the season, and in a measure by his numerous experiments. His vineyards, cultivated by tenants, generally Germans, on the European plan, during the latter years of his experience paid him a handsome revenue. He introduced the famous Catawba grape, the standard grape of the West. It is stated that Mr. Longworth bears the same relation to vineyard culture that Fulton did to steam navigation. Others made earlier effort, but he was the first to establish it on a permanent basis. He has also been eminently successful in the cultivation of the strawberry, and was the first to firmly establish it on Western soil. He also brought the Ohio Ever-bearing Raspberry into notice in the State, and widely disseminated it throughout the country.

Other smaller fruits were brought out to the West like those mentioned. In some cases fruits

indigenous to the soil were cultivated and improved, and as improved fruits, are known favorably wherever used.

In chronology and importance, of all the cereals, corn stands foremost. During the early pioneer period, it was the staple article of food for both man and beast. It could be made into a variety of forms of food, and as such was not only palatable but highly nutritious and strengthening.

It is very difficult to determine whether corn originated in America or in the Old World. Many prominent botanists assert it is a native of Turkey, and originally was known as "Turkey wheat." Still others claimed to have found mention of maize in Chinese writings antedating the Turkish discovery. Grains of maize were found in an Egyptian mummy, which goes to prove to many the cereal was known in Africa since the earliest times. Maize was found in America when first visited by white men, but of its origin Indians could give no account. It had always been known among them, and constituted their chief article of vegetable diet. It was cultivated exclusively by their squaws, the men considering it beneath their dignity to engage in any manual labor. It is altogether probable corn was known in the Old World long before the New was discovered. The Arabs or Crusaders probably introduced it into Europe. How it was introduced into America will, in all probability, remain unknown. It may have been an indigenous plant, like many others. Its introduction into Ohio dates with the settlement of the whites, especially its cultivation and use as an article of trade. True, the Indians had cultivated it in small quantities; each lodge a little for itself, but no effort to make of it a national support began until the civilization of the white race became established. From that time on, the increase in crops has grown with the State, and, excepting the great corn States of the West, Ohio produces an amount equal to any State in the Union. The statistical tables printed in agricultural reports show the acres planted, and bushels grown. Figures speak an unanswerable logic.

Wheat is probably the next in importance of the cereals in the State. Its origin, like corn, is lost in the mists of antiquity. Its berry was no doubt used as food by the ancients for ages anterior to any historical records. It is often called corn in old writings, and under that name is frequently mentioned in the Bible.

"As far back in the vistas of ages as human records go, we find that wheat has been cultivated,

and, with corn, aside from animal food, has formed one of the chief alimentary articles of all nations; but as the wheat plant has nowhere been found wild, or in a state of nature, the inference has been drawn by men of unquestioned scientific ability, that the original plant from which wheat has been derived was either totally annihilated, or else cultivation has wrought so great a change, that the original is by no means obvious, or manifest to botanists."

It is supposed by many, wheat originated in Persia. Others affirm it was known and cultivated in Egypt long ere it found its way into Persia. It was certainly grown on the Nile ages ago, and among the tombs are found grains of wheat in a perfectly sound condition, that unquestionably have been buried thousands of years. It may be, however, that wheat was grown in Persia first, and thence found its way into Egypt and Africa, or, vice versa. It grew first in Egypt and Africa and thence crossed into Persia, and from there found its way into India and all parts of Asia.

It is also claimed that wheat is indigenous to the island of Sicily, and that from there it spread along the shores of the Mediterranean into Asia Minor and Egypt, and, as communities advanced, it was cultivated, not only to a greater extent, but with greater success.

The goddess of agriculture, more especially of grains, who, by the Greeks, was called Demeter, and, by the Romans, Ceres—hence the name cereals—was said to have her home at Enna, a fertile region of that island, thus indicating the source from which the Greeks and Romans derived their *Cereal*. Homer mentions wheat and spelt as bread; also corn and barley, and describes his heroes as using them as fodder for their horses, as the people in the South of Europe do at present. Rye was introduced into Greece from Thrace, or by way of Thrace, in the time of Galen. In Cæsar's time the Romans grew a species of wheat enveloped in a husk, like barley, and by them called "Far."

During the excavations of Herculaneum and Pompeii, wheat, in an excellent state of preservation, was frequently found.

Dr. Anson Hart, Superintendent, at one time, of Indian Affairs in Oregon, states that he found numerous patches of wheat and flax growing wild in the Yackemas country, in Upper Oregon. There is but little doubt that both cereals were introduced into Oregon at an early period by the Hudson Bay, or other fur companies. Wheat was also

found by Dr. Boyle, of Columbus, Ohio, growing in a similar state in the Carson Valley. It was, doubtless, brought there by the early Spaniards. In 1530, one of Cortez's slaves found several grains of wheat accidentally mixed with the rice. The careful negro planted the handful of grains, and succeeding years saw a wheat crop in Mexico, which found its way northward, probably into California.

Turn where we may, wherever the foot of civilization has trod, there will we find this wheat plant, which, like a monument, has perpetuated the memory of the event; but nowhere do we find the plant wild. It is the result of cultivation in bygone ages, and has been produced by "progressive development."

It is beyond the limit and province of these pages to discuss the composition of this important cereal; only its historic properties can be noticed. With the advent of the white men in America, wheat, like corn, came to be one of the staple products of life. It followed the pioneer over the mountains westward, where, in the rich Mississippi and Illinois bottoms, it has been cultivated by the French since 1690. When the hardy New Englanders came to the alluvial lands adjoining the Ohio, Muskingum or Miami Rivers, they brought with them this "staff of life," and forthwith began its cultivation. Who sowed the first wheat in Ohio, is a question Mr. A. S. Guthrie answers, in a letter published in the *Agricultural Report of 1857*, as follows:

"My father, Thomas Guthrie, emigrated to the Northwest Territory in the year 1788, and arrived at the mouth of the Muskingum in July, about three months after Gen. Putnam had arrived with the first pioneers of Ohio. My father brought a bushel of wheat with him from one of the frontier counties of Pennsylvania, which he sowed on a lot of land in Marietta, which he cleared for that purpose, on the second bottom or plain, in the neighborhood of where the Court House now stands."

Mr. Guthrie's opinion is corroborated by Dr. Samuel P. Hildreth, in his "*Pioneer Settlers of Ohio*," and is, no doubt, correct.

From that date on down through the years of Ohio's growth, the crops of wheat have kept pace with the advance and growth of civilization. The soil is admirably adapted to the growth of this cereal, a large number of varieties being grown, and an excellent quality produced. It is firm in body, and, in many cases, is a successful rival of wheat

produced in the great wheat-producing regions of the United States—Minnesota, and the farther Northwest.

Oats, rye, barley, and other grains were also brought to Ohio from the Atlantic Coast, though some of them had been cultivated by the French in Illinois and about Detroit. They were at first used only as food for home consumption, and, until the successful attempts at river and canal navigation were brought about, but little was ever sent to market.

Of all the root crops known to man, the potato is probably the most valuable. Next to wheat, it is claimed by many as the staff of life. In some localities, this assumption is undoubtedly true. What would Ireland have done in her famines but for this simple vegetable? The potato is a native of the mountainous districts of tropical and subtropical America, probably from Chili to Mexico; but there is considerable difficulty in deciding where it is really indigenous, and where it has spread after being introduced by man. Humboldt, the learned savant, doubted if it had ever been found wild, but scholars no less famous, and of late date, have expressed an opposite opinion. In the wild plant, as in all others, the tubers are smaller than in the cultivated. The potato had been cultivated in America, and its tubers used for food, long before the advent of the Europeans. It seems to have been first brought to Europe by the Spaniards, from the neighborhood of Quito, in the beginning of the sixteenth century, and spread through Spain, the Netherlands, Burgundy and Italy, cultivated in gardens as an ornament only and not for an article of food. It long received through European countries the same name with the batatas—sweet potato, which is the plant meant by all English writers down to the seventeenth century.

It appears that the potato was brought from Virginia to Ireland by Hawkins, a slave-trader, in 1565, and to England by Sir Francis Drake, twenty years later. It did not at first attract much notice, and not until it was a third time imported from America, in 1623, by Sir Walter Raleigh, did the Europeans make a practical use of it. Even then it was a long time before it was extensively cultivated. It is noticed in agricultural journals as food for cattle only as late as 1719. Poor people began using it, however, and finding it highly nutritious, the Royal Geographical Society, in 1663, adopted measures for its propagation. About this time it began to be used in Ireland as

food, and from the beginning of the eighteenth century, its use has never declined. It is now known in every quarter of the world, and has, by cultivation, been greatly improved.

The inhabitants of America learned its use from the Indians, who cultivated it and other root crops—rutabagas, radishes, etc., and taught the whites their value. When the pioneers of Ohio came to its fertile valleys, they brought improved species with them, which by cultivation and soil, are now greatly increased, and are among the standard crops of the State.

The cucurbitaceous plants, squashes, etc., were, like the potato and similar root crops, indigenous to America—others, like the melons, to Asia—and were among the staple foods of the original inhabitants. The early French missionaries of the West speak of both root crops and cucurbitaceous plants as in use among the aboriginal inhabitants. "They are very sweet and wholesome," wrote Marquette. Others speak in the same terms, though some of the plants in this order had found their way to these valleys through the Spaniards and others through early Atlantic Coast and Mexican inhabitants. Their use by the settlers of the West, especially Ohio, is traced to New England, as the first settlers came from that portion of the Union. They grow well in all parts of the State, and by cultivation have been greatly improved in quality and variety. All cucurbitaceous plants require a rich, porous soil, and by proper attention to their cultivation, excellent results can be attained.

Probably the earliest and most important implement of husbandry known is the plow. Grain, plants and roots will not grow well unless the soil in which they are planted be properly stirred, hence the first requirement was an instrument that would fulfill such conditions.

The first implements were rude indeed; generally, stout wooden sticks, drawn through the earth by thongs attached to rude ox-yokes, or fastened to the animal's horns. Such plows were in use among the ancient Egyptians, and may yet be found among uncivilized nations. The Old Testament furnishes numerous instances of the use of the plow, while, on the ruins of ancient cities and among the pyramids of Egypt, and on the buried walls of Babylon, and other extinct cities, are rude drawings of this useful implement. As the use of iron became apparent and general, it was utilized for plow-points, where the wood alone would not penetrate the earth. They got their plow-

shares sharpened in Old Testament days, also coulters, which shows, beyond a doubt, that iron-pointed plows were then in use. From times mentioned in the Bible, on heathen tombs, and ancient catacombs, the improvement of the plow, like other farming tools, went on, as the race of man grew in intelligence. Extensive manors in the old country required increased means of turning the ground, and, to meet these demands, ingenious mechanics, from time to time, invented improved plows. Strange to say, however, no improvement was ever made by the farmer himself. This is accounted for in his habits of life, and, too often, the disposition to "take things as they are." When America was settled, the plow had become an implement capable of turning two or three acres per day. Still, and for many years, and even until lately, the mold-board was entirely wooden, the point only iron. Later developments changed the wood for steel, which now alone is used. Still later, especially in prairie States, riding plows are used. Like all other improvements, they were obliged to combat an obtuse public mind among the ruralists, who surely combat almost every move made to better their condition. In many places in America, wooden plows, straight ax handles, and a stone in one end of the bag, to balance the grist in the other, are the rule, and for no other reason in the world are they maintained than the laconic answer:

"My father did so, and why should not I? Am I better than he?"

After the plow comes the harrow, but little changed, save in lightness and beauty. Formerly, a log of wood, or a brush harrow, supplied its place, but in the State of Ohio, the toothed instrument has nearly always been used.

The hoe is lighter made than formerly, and is now made of steel. At first, the common iron hoe, sharpened by the blacksmith, was in constant use. Now, it is rarely seen outside of the Southern States, where it has long been the chief implement in agriculture.

The various small plows for the cultivation of corn and such other crops as necessitated their use are all the result of modern civilization. Now, their number is large, and, in many places, there are two or more attached to one carriage, whose operator rides. These kinds are much used in the Western States, whose rootless and stoneless soil is admirably adapted to such machinery.

When the grain became ripe, implements to cut it were in demand. In ancient times, the sickle

was the only instrument used. It was a short, curved iron, whose inner edge was sharpened and serrated. In its most ancient form, it is doubtful if the edge was but little, if any, serrated. It is mentioned in all ancient works, and in the Bible is frequently referred to.

"Thrust in the sickle, for the harvest is ripe," wrote the sacred New Testament, while the Old chronicles as early as the time of Moses: "As thou beginnest to put the sickle to the corn."

In more modern times, the handle of the sickle was lengthened, then the blade, which in time led to the scythe. Both are yet in use in many parts of the world. The use of the scythe led some thinking person to add a "finger" or two, and to change the shape of the handle. The old cradle was the result. At first it met considerable opposition from the laborers, who brought forward the old-time argument of ignorance, that it would cheapen labor.

Whether the cradle is a native of America or Europe is not accurately decided; probably of the mother country. It came into common use about 1818, and in a few years had found its way into the wheat-producing regions of the West. Where small crops are raised, the cradle is yet much used. A man can cut from two to four acres per day, hence, it is much cheaper than a reaper, where the crop is small.

The mower and reaper are comparatively modern inventions. A rude reaping machine is mentioned by Pliny in the first century. It was pushed by an ox through the standing grain. On its front was a sharp edge, which cut the grain. It was, however, impracticable, as it cut only a portion of the grain, and the peasantry preferred the sickle. Other and later attempts to make reapers do not seem to have been successful, and not till the present century was a machine made that would do the work required. In 1826, Mr. Bell, of Scotland, constructed a machine which is yet used in many parts of that country. In America, Mr. Hussey and Mr. McCormick took out patents for reaping machines of superior character in 1833 and 1834. At first the cutters of these machines were various contrivances, but both manufacturers soon adopted a serrated knife, triangular shaped, attached to a bar, and driven through "finger guards" attached to it, by a forward and backward motion. These are the common ones now in use, save that all do not use serrated knives. Since these pioneer machines were introduced into the

harvest fields they have been greatly improved and changed. Of late years they have been constructed so as to bind the sheaves, and now a good stout boy, and a team with a "harvester," will do as much as many men could do a few years ago, and with much greater ease.

As was expected by the inventors of reapers, they met with a determined resistance from those who in former times made their living by harvesting. It was again absurdly argued that they would cheapen labor, and hence were an injury to the laboring man. Indeed, when the first machines were brought into Ohio, many of them were torn to pieces by the ignorant hands. Others left fields in a body when the proprietor brought a reaper to his farm. Like all such fallacies, these, in time, passed away, leaving only their stain.

Following the reaper came the thresher. As the country filled with inhabitants, and men increased their possessions, more rapid means than the old flail or roller method were demanded. At first the grain was trodden out by horses driven over the bundles, which were laid in a circular inclosure. The old flail, the tramping-out by horses, and the cleaning by the sheet, or throwing the grain up against a current of air, were too slow, and machines were the result of the demand. In Ohio the manufacture of threshers began in 1846, in the southwestern part. Isaac Tobias, who came to Hamilton from Miamisburg that year, commenced building the threshers then in use. They were without the cleaning attachment, and simply hulled the grain. Two years later, he began manufacturing the combined thresher and cleaner, which were then coming into use. He continued in business till 1851. Four years after, the increased demand for such machines, consequent upon the increased agricultural products, induced the firm of Owens, Lane & Dyer to fit their establishment for the manufacture of threshers. They afterward added the manufacture of steam engines to be used in the place of horse power. Since then the manufacture of these machines, as well as that of all other agricultural machinery, has greatly multiplied and improved, until now it seems as though but little room for improvement remains. One of the largest firms engaged in the manufacture of threshers and their component machinery is located at Mansfield—the Aultman & Taylor Co. Others are at Massillon, and at other cities in the West.

Modern times and modern enterprise have developed a marvelous variety of agricultural implements

—too many to be mentioned in a volume like this. Under special subjects they will occasionally be found. The farmer's life, so cheerless in pioneer times, and so full of weary labor, is daily becoming less laborious, until, if they as a class profit by the advances, they can find a life of ease in farm pursuits, not attainable in any other profession. Now machines do almost all the work. They sow, cultivate, cut, bind, thresh, winnow and carry the grain. They cut, rake, load, mow and dry the hay. They husk, shell and clean the corn. They cut and split the wood. They do almost all; until it seems as though the day may come when the farmer can sit in his house and simply guide the affairs of his farm.

Any occupation prospers in proportion to the interest taken in it by its members. This interest is always heightened by an exchange of views, hence societies and periodicals exercise an influence at first hardly realized. This feeling among prominent agriculturists led to the formation of agricultural societies, at first by counties, then districts, then by States, and lastly by associations of States. The day may come when a national agricultural fair may be one of the annual attractions of America.

Without noticing the early attempts to found such societies in Europe or America, the narrative will begin with those of Ohio. The first agricultural society organized in the Buckeye State was the Hamilton County Agricultural Society. Its exact date of organization is not now preserved, but to a certainty it is known that the Society held public exhibitions as a County Society prior to 1823. Previous to that date there were, doubtless, small, private exhibitions held in older localities, probably at Marietta, but no regular organization seems to have been maintained. The Hamilton County Society held its fairs annually, with marked success. Its successor, the present Society, is now one of the largest county societies in the Union.

During the legislative session of 1832-33, the subject of agriculture seems to have agitated the minds of the people through their representatives, for the records of that session show the first laws passed for their benefit. The acts of that body seem to have been productive of some good, for, though no records of the number of societies organized at that date exist, yet the record shows that "many societies have been organized in conformity to this act," etc. No doubt many societies held fairs from this time, for a greater or less

number of years. Agricultural journals* were, at this period, rare in the State, and the subject of agricultural improvement did not receive that attention from the press it does at this time; and, for want of public spirit and attention to sustain these fairs, they were gradually discontinued until the new act respecting their organization was passed in 1846. However, records of several county societies of the years between 1832 and 1846 yet exist, showing that in some parts of the State, the interest in these fairs was by no means diminished. The Delaware County Society reports for the year 1833—it was organized in June of that year—good progress for a beginning, and that much interest was manifested by the citizens of the county.

Ross County held its first exhibition in the autumn of that year, and the report of the managers is quite cheerful. Nearly all of the exhibited articles were sold at auction, at greatly advanced prices from the current ones of the day. The entry seems to have been free, in an open inclosure, and but little revenue was derived. Little was expected, hence no one was disappointed.

Washington County reports an excellent cattle show for that year, and a number of premiums awarded to the successful exhibitors. This same year the Ohio Importation Company was organized at the Ross County fair. The Company began the next season the importation of fine cattle from England, and, in a few years, did incalculable good in this respect, as well as make considerable money in the enterprise.

These societies were re-organized when the law of 1846 went into effect, and, with those that had gone down and the new ones started, gave an impetus to agriculture that to this day is felt. Now every county has a society, while district, State and inter-State societies are annually held; all promotive in their tendency, and all a benefit to every one.

The Ohio State Board of Agriculture was organized by an act of the Legislature, passed February 27, 1846. Since then various amendments to the organic law have been passed from time to time as

* The *Western Tiller* was published in Cincinnati, in 1826. It was "miscellaneous," but contained many excellent articles on agriculture.

The *Farmers' Record* was published in Cincinnati, in 1831, and continued for several years.

The *Ohio Farmer* was published at Batavia, Clermont County, in 1833, by Hon. Samuel Medary.

These were the early agricultural journals, some of which yet survive, though in new names, and under new management. Others have, also, since been added, some of which have an exceedingly large circulation, and are an influence for much good in the State.

the necessities of the Board and of agriculture in the State demanded. The same day that the act was passed creating the State Board, an act was also passed providing for the erection of county and district societies, under which law, with subsequent amendments, the present county and district agricultural societies are managed. During the years from 1846 down to the present time, great improvements have been made in the manner of conducting these societies, resulting in exhibitions unsurpassed in any other State.

Pomology and horticulture are branches of industry so closely allied with agriculture that a brief resume of their operations in Ohio will be eminently adapted to these pages. The early planting and care of fruit in Ohio has already been noticed. Among the earliest pioneers were men of fine tastes, who not only desired to benefit themselves and their country, but who were possessed with a laudable ambition to produce the best fruits and vegetables the State could raise. For this end they studied carefully the topography of the country, its soil, climate, and various influences upon such culture, and by careful experiments with fruit and vegetables, produced the excellent varieties now in use. Mention has been made of Mr. Longworth and Mr. Ernst, of Cincinnati; and Israel and Aaron W. Putnam, on the Muskingum River; Mr. Dille,

Judges Fuller and Whittlesey, Dr. Jared Kirtland and his sons, and others—all practical enthusiasts in these departments. At first, individual efforts alone, owing to the condition of the country, could be made. As the State filled with settlers, and means of communication became better, a desire for an interchange of views became apparent, resulting in the establishment of periodicals devoted to these subjects, and societies where different ones could meet and discuss these things.

A Horticultural and Pomological Society was organized in Ohio in 1866. Before the organization of State societies, however, several distinct or independent societies existed; in fact, out of these grew the State Society, which in turn produced good by stimulating the creation of county societies. All these societies, aids to agriculture, have progressed as the State developed, and have done much in advancing fine fruit, and a taste for æsthetic culture. In all parts of the West, their influence is seen in better and improved fruit; its culture and its demand.

To-day, Ohio stands in the van of the Western States in agriculture and all its kindred associations. It only needs the active energy of her citizens to keep her in this place, advancing as time advances, until the goal of her ambition is reached.

CHAPTER XVI.

CLIMATOLOGY—OUTLINE—VARIATION IN OHIO—ESTIMATE IN DEGREES—RAINFALL—AMOUNT—VARIABILITY.

THE climate of Ohio varies about four degrees. Though originally liable to malaria in many districts when first settled, in consequence of a dense vegetation induced by summer heats and rains, it has become very healthful, owing to clearing away this vegetation, and proper drainage. The State is as favorable in its sanitary characteristics as any other in its locality. Ohio is remarkable for its high productive capacity, almost every thing grown in the temperate climates being within its range. Its extremes of heat and cold are less than almost any other State in or near the same latitude, hence Ohio suffers less from the extreme dry or wet seasons which affect all adjoining States. These modifications are mainly due to the influence of the Lake Erie waters. These not

only modify the heat of summer and the cold of winter, but apparently reduce the profusion of rainfall in summer, and favor moisture in dry periods. No finer climate exists, all conditions considered, for delicate vegetable growths, than that portion of Ohio bordering on Lake Erie. This is abundantly attested by the recent extensive development there of grape culture.

Mr. Lorin Blodget, author of "American Climatology," in the agricultural report of 1853, says; "A district bordering on the Southern and Western portions of Lake Erie is more favorable in this respect (grape cultivation) than any other on the Atlantic side of the Rocky Mountains, and it will ultimately prove capable of a very liberal extension of vine culture."

Experience has proven Mr. Blodget correct in his theory. Now extensive fields of grapes are everywhere found on the Lake Erie Slope, while other small fruits find a sure footing on its soil.

"Considering the climate of Ohio by isothermal lines and rain shadings, it must be borne in mind," says Mr. Blodget, in his description of Ohio's climate, from which these facts are drawn, "that local influences often require to be considered. At the South, from Cincinnati to Steubenville, the deep river valleys are two degrees warmer than the hilly districts of the same vicinity. The lines are drawn intermediate between the two extremes. Thus, Cincinnati, on the plain, is 2° warmer than at the Observatory, and 4° warmer for each year than Hillsboro, Highland County—the one being 500, the other 1,000, feet above sea-level. The immediate valley of the Ohio, from Cincinnati to Gallipolis, is about 75° for the summer, and 54° for the year; while the adjacent hilly districts, 300 to 500 feet higher, are not above 73° and 52° respectively. For the summer, generally, the river valleys are 73° to 75°; the level and central portions 72° to 73°, and the lake border 70° to 72°. A peculiar mildness of climate belongs to the vicinity of Kelley's Island, Sandusky and Toledo. Here, both winter and summer, the climate is 2° warmer than on the highland ridge extending from Norwalk and Oberlin to Hudson and the northeastern border. This ridge varies from 500 to 750 feet above the lake, or 850 to 1,200 feet above sea level. This high belt has a summer temperature of 70°, 27° for the winter, and 49° for the year; while at Sandusky and Kelley's Island the summer is 72°, the winter 29°, and the year 50°. In the central and eastern parts of the State, the winters are comparatively cold, the average falling to 32° over the more level districts, and to 29° on the highlands. The Ohio River valley is about 35°, but the highlands near it fall to 31° and 32° for the winter."

As early as 1824, several persons in the State began taking the temperature in their respective localities, for the spring, summer, autumn and winter, averaging them for the entire year. From time to time, these were gathered and published, inducing others to take a step in the same direction. Not long since, a general table, from about forty local-

ities, was gathered and compiled, covering a period of more than a quarter of a century. This table, when averaged, showed an average temperature of 52.4°, an evenness of temperature not equaled in many bordering States.

Very imperfect observations have been made of the amount of rainfall in the State. Until lately, only an individual here and there throughout the State took enough interest in this matter to faithfully observe and record the averages of several years in succession. In consequence of this fact, the illustration of that feature of Ohio's climate is less satisfactory than that of the temperature. "The actual rainfall of different months and years varies greatly," says Mr. Blodget. "There may be more in a month, and, again, the quantity may rise to 12 or 15 inches in a single month. For a year, the variation may be from a minimum of 22 or 25 inches, to a maximum of 50 or even 60 inches in the southern part of the State, and 45 to 48 inches along the lake border. The average is a fixed quantity, and, although requiring a period of twenty or twenty-five years to fix it absolutely, it is entirely certain and unchangeable when known. On charts, these average quantities are represented by depths of shading. At Cincinnati, the last fifteen years of observation somewhat reduce the average of 48 inches, of former years, to 46 or 47 inches."

Spring and summer generally give the most rain, there being, in general, 10 to 12 inches in the spring, 10 to 14 inches in the summer, and 8 to 10 inches in the autumn. The winter is the most variable of all the seasons, the southern part of the State having 10 inches, and the northern part 7 inches or less—an average of 8 or 9 inches.

The charts of rainfall, compiled for the State, show a fall of 30 inches on the lake, and 46 inches at the Ohio River. Between these two points, the fall is marked, beginning at the north, 32, 34, 36 and 38 inches, all near the lake. Farther down, in the latitude of Tuscarawas, Monroe and Mercer Counties, the fall is 40 inches, while the southwestern part is 42 and 44 inches.

The clearing away of forests, the drainage of the land, and other causes, have lessened the rainfall, making considerable difference since the days of the aborigines.

CHAPTER XVII.*

PUBLIC LANDS OF OHIO—THE MYSTERIES OF THE EARLY SURVEYS—THE NEW CONNECTICUT—ITS ORIGIN AND ORGANIZATION.

TO the inexperienced student of the history of Ohio, nothing is more perplexing and unsatisfactory, than the account of its public lands. Held theoretically by the conflicting claims of colonies, each jealous of the other's prestige, and practically controlled by the determined assertion of his claim by the Indian, its territory came under the acknowledged control of the General Government in a fragmentary way, and in the early surveys it lacks that regular arrangement which marks the larger part of the old Northwestern Territory. But, to the early colonist, Ohio was the land of promise. The reports of the early explorers who had been sent to spy out the land were such as to stimulate the rapacity of greedy adventurers to the highest pitch, and Ohio became at once the center of attraction, not only to that class, but also to the pioneer settlements of the East. The spirit of land speculation was fostered by the system of royal charters and favoritism, and colonial officials were rapidly acquiring titles to large tracts of the fertile lands of the Northwest. Lord Dunmore, who represented the crown in Virginia, had made arrangements to secure a large portion of this territory, which were only frustrated by the precipitation of the Revolutionary struggle. In all these operations the rights or interests of the Indians were ignored. Might was the measure of the white man's right, and, in the face of formal treaties very favorable to the whites, the lands reserved to the natives were shamelessly bought and sold. Titles thus secured were obviously of no value if the integrity of solemn treaties were to be respected, but, so generally had the public mind been corrupted by the greed for gain, that this consideration offered no hindrance whatever to this sort of traffic in land titles. In 1776, however, the colonies having renounced their allegiance to the mother country, and having assumed a position as sovereign and independent States, a summary end was put to this speculation, and all persons were forbidden to locate in this territory, until its ownership and jurisdiction should

be determined. Each State claimed the right of soil, the jurisdiction over the district of country embraced by the provisions of its charter, and the privilege of disposing of the land to subserve its own interests. The States, on the contrary, which had no such charter, insisted that these lands ought to be appropriated for the benefit of all the States, as the title to them, if secured at all, would be by the expenditure of the blood and moneys of all alike. The treaty of peace with England was signed at Paris, September 3, 1783, and Congress at once became urgent in seconding this demand of the non charter-holding States. Under the charters held by the individual State, the General Government was powerless to fulfill its agreement with the troops, to grant land to each soldier of the war, and the general dissatisfaction occasioned by this state of things, formed a powerful influence which finally brought about a general cession of these unappropriated lands, held by the different States. In March, 1784, Virginia ceded her territory situated northwest of the River Ohio, reserving the tract now known as the Virginia Military Lands. In 1786, Connecticut ceded her territory, save the "Western Reserve;" reserved cessions were made by Massachusetts in 1785, and by New York in 1780.

When Ohio was admitted into the Federal Union in 1803, as an independent State, one of the terms of admission was, that the fee simple to all the lands within its limits, excepting those previously granted or sold, should vest in the United States. A large portion of the State, however, had been granted or sold to various individuals, companies and bodies politic before this, and subsequent dispositions of Ohio public lands have generally been in aid of some public State enterprise. The following are the names by which the principal bodies of land are designated, taking their titles from the different forms of transfer:

1. Congress Lands.
2. United States Military Lands.
3. Ohio Company's Purchase.
4. Donation Tract.

*Compiled from Howe's Historical Collections of Ohio, and a pamphlet by Judge W. W. Boynton, of the Supreme Court of Ohio.

5. Symmes' Purchase.
6. Refugee Tract.
7. French Grant.
8. Dohrman's Grant.
9. Moravian Lands.
10. Zane's Grant.
11. Maumee Road Lands.
12. Turnpike Lands.
13. Ohio Canal Lands.
14. School Lands.
15. College Lands.
16. Ministerial Lands.
17. Salt Sections.
18. Virginia Military Lands.
19. Western Reserve.
20. Fire Lands.

These grants, however, may properly be divided into three general classes—Congress Lands, the Virginia Reserve and the Connecticut Reserve; the former including all lands of the State, not known as the Virginia Military Land or the Western Reserve. Previous to any grants of this territory, the Indian title had to be acquired. Although the United States has succeeded to the rights acquired by the English from the Iroquois, there were numerous tribes that disputed the right of the dominant nation to cede this territory, and a treaty was accordingly made at Fort Stanwix, in 1784, and in the following year at Fort McIntosh, by which the Indians granted all east of a line drawn from the mouth of the Cuyahoga River to the Ohio, and all south of what subsequently became known as the Greenville Treaty line, or Indian boundary line. By this treaty, this line extended from the Portage, between the Cuyahoga and the Tuscarawas Branch of the Muskingum, "thence down that branch, to the crossing above Fort Laurens, then westerly to the Portage of the Big Miami, which runs into the Ohio, at the mouth of which the fort stood, which was taken by the French in 1752; thence along said Portage to the Great Miami, or Omece River," whence the line was extended westward, by the treaty of Greenville, in 1795, to Fort Recovery, and thence southwest to the mouth of the Kentucky River.

Congress Lands are so called because they are sold to purchasers by the immediate officers of the General Government, conformably to such laws as are, or may be, from time to time, enacted by Congress. They are all regularly surveyed into townships of six miles square each, under the authority and at the expense of the National Govern-

ment. All these lands, except Marietta and a part of Steubenville districts, are numbered as follows:

6	5	4	3	2	1
7	8	9	10	11	12
18	17	16	15	14	13
19	20	21	22	23	24
30	29	28	27	26	25
31	32	33	34	35	36

The seven Ranges, Ohio Company's Purchase, and Symmes' Purchase are numbered as here exhibited:

36	30	24	18	12	6
35	29	23	17	11	5
34	28	22	16	10	4
33	27	21	15	9	3
32	26	20	14	8	2
31	25	19	13	7	1

The townships are again subdivided into sections of one mile square, each containing 640 acres, by lines running parallel with the township and range lines. The sections are numbered in two different modes, as exhibited in the preceding figures or diagrams.

In addition to the foregoing division, the sections are again subdivided into four equal parts, called the northeast quarter-section, southeast quarter section, etc. And again by a law of Congress, which went into effect July, 1820, these quarter-sections are also divided by a north-and-

south line into two equal parts, called the east half quarter-section No. —, and west half quarter-section No. —, which contain eighty acres each. The minimum price was reduced by the same law from \$2 to \$1.25 per acre, cash down.

In establishing the township and sectional corners, a post was first planted at the point of intersection; then on the tree nearest the post, and standing within the section intended to be designated, was numbered with the marking iron the range, township, and number of the section, thus :

R 21	R 20	
T 4	T 4	
S 30 4	1 S 31	The quarter corners are marked
—	—	1—4 south, merely.
R 21 3	2 R 20	
T 3	T 3	
S 1	S 6	

Section No. 16 of every township is perpetually reserved for the use of schools, and leased or sold out, for the benefit of schools, under the State government. All the others may be taken up either in sections, fractions, halves, quarters, or half-quarters.

For the purpose of selling out these lands, they were divided into eight several land districts, called after the names of the towns in which the land offices are kept, viz., Wooster, Steubenville, Zanesville, Marietta, Chillicothe, etc., etc.

In May, 1785, Congress passed an ordinance for ascertaining the mode of disposing of these lands. Under that ordinance, the *first seven ranges*, bounded on the north by a line drawn due west from the Pennsylvania State line, where it crosses the Ohio River, to the United States Military Lands, forty-two miles; and, on the west, by the same line drawn thence south to the Ohio River, at the southeast corner of Marietta Township, and on the east and south by the Ohio River, were surveyed in 1786–87, and in the latter year, and sales were effected at New York, to the amount of \$72,974. In 1796, further portions of these lands were disposed of at Pittsburgh, to the amount of \$43,446, and at Philadelphia, amounting to \$5,120. A portion of these lands were located under United States Military land warrants, and the rest was disposed of at the Steubenville Land Office, which was opened July 1, 1801.

United States Military Lands are so called from the circumstance of their having been appropriated, by an act of Congress of the 1st of June, 1796, to satisfy certain claims of the officers and

soldiers of the Revolutionary war. This tract of country, embracing these lands, is bounded as follows: Beginning at the northwest corner of the original seven ranges of townships, thence south fifty miles, thence west to the Scioto River, thence up said river to the Greenville treaty line, thence northeasterly with said line to old Fort Laurens, on the Tuscarawas River, thence due east to the place of beginning, including a tract of about 4,000 square miles, or 2,560,000 acres of land. It is, of course, bounded on the north by the Greenville treaty line, east by the "seven ranges of townships," south by the Congress and Refugee lands, and west by the Scioto River.

These lands are surveyed into townships of five miles square; these townships were then again, originally, surveyed into quarter townships, of two and a half miles square, containing 4,000 acres each; and, subsequently, some of these quarter-townships were subdivided into forty lots, of 100 acres each, for the accommodation of those soldiers holding warrants for only 100 acres each. And again, after the time originally assigned for the location of these warrants had expired, certain quarter-townships, which had not then been located, were divided into sections of one mile square each, and sold by the General Government, like the main body of Congress lands.

The quarter-townships are numbered as exhibited in the accompanying figure, the top being considered north. The place of each township is ascertained by numbers and ranges, the same as Congress lands; the ranges being numbered from east to west, and the numbers from south to north.

Ohio Company's Purchase is a body of land containing about 1,500,000 acres; including, however, the donation tract, school lands, etc., lying along the Ohio River; and including Meigs, nearly all of Athens, and a considerable part of Washington and Gallia Counties. This tract was purchased by the General Government in the year 1787, by Manasseh Cutler and Winthrop Sargeant, from the neighborhood of Salem, in Massachusetts, agents for the "Ohio Company," so called, which had then been formed in Massachusetts, for the purpose of a settlement in the Ohio country. Only 964,285 acres were ultimately paid for, and, of course, patented. This body of land was then apportioned out into 817 shares, of 1,173 acres each, and a town lot of one-third of an acre to each share. These shares were made

2	1
3	4

up to each proprietor in tracts, one of 640 acres, one of 262, one of 160, one of 100, one of 8, and another of 3 acres, besides the before-mentioned town lot. Besides every section 16, set apart, as elsewhere, for the support of schools, every Section 29 is appropriated for the support of religious institutions. In addition to which were also granted two six-mile-square townships for the use of a college. But, unfortunately for the Ohio Company, owing to their want of topographical knowledge of the country, the body of land selected by them, with some partial exceptions, is the most hilly and sterile of any tract of similar extent in the State.

Donation Tract is a body of 100,000 acres, set off in the northern limits of the Ohio Company's tract, and granted to them by Congress, provided they should obtain one actual settler upon each hundred acres thereof, within five years from the date of the grant; and that so much of the 100,000 acres aforesaid, as should not thus be taken up, shall revert to the General Government.

This tract may, in some respects, be considered a part of the Ohio Company's purchase. It is situated in the northern limits of Washington County. It lies in an oblong shape, extending nearly seventeen miles from east to west, and about seven and a half north to south.

Symmes' Purchase is a tract of 311,682 acres of land in the southwestern quarter of the State, between the Great and Little Miami Rivers. It borders on the Ohio River a distance of twenty-seven miles, and extends so far back from the latter between the two Miamis as to include the quantity of land just mentioned. It was patented to John Cleves Symmes, in 1794, for 67 cents per acre. Every sixteenth section, or square mile, in each township, was reserved by Congress for the use of schools, and Sections 29 for the support of religious institutions, besides fifteen acres around Fort Washington, in Cincinnati. This tract of land is now one of the most valuable in the State.

Refugee Tract, a body of 100,000 acres of land, granted by Congress to certain individuals who left the British Provinces during the Revolutionary war and espoused the cause of freedom, is a narrow strip of country, four and a half miles broad from north to south, and extending eastwardly from the Scioto River forty-eight miles. It has the United States twenty ranges of military or army lands north, twenty-two ranges of Congress lands south. In the western borders of this tract is situated the town of Columbus.

French Grant is a tract of 24,000 acres of land, bordering upon the Ohio River, in the southeastern quarter of Scioto County. A short time after the Ohio Company's purchase began to be settled, an association was formed under the name of the Scioto Land Company. A contract was made for the purchase of a part of the lands included in the Ohio Company's purchases. Plats and descriptions of the land contracted for were made out, and Joel Barlow was sent as an agent to Europe to make sales of the lands for the benefit of the company; and sales were effected of a considerable part of the land to companies and individuals in France. On February 19, 1791, two hundred and eighteen of these purchasers left Havre de Grace, in France, and arrived in Alexandria, D. C., on the 3d of May following. On their arrival, they were told that the Scioto Company owned no land. The agent insisted that they did, and promised to secure them good titles thereto, which he did, at Winchester, Brownsville and Charleston (now Wellsburg). When they arrived at Marietta, about fifty of them landed. The rest of the company proceeded to Gallipolis, which was laid out about that time, and were assured by the agent that the place lay within their purchase. Every effort to secure titles to the lands they had purchased having failed, an application was made to Congress, and in March, 1795, the above grant was made to these persons. Twelve hundred acres additional, were afterward granted, adjoining the above-mentioned tract at its lower end, toward the mouth of the Little Scioto River.

Dohrman's Grant is one six-mile-square township of 23,040 acres, granted to Arnold Henry Dohrman, formerly a wealthy Portuguese merchant in Lisbon, for and in consideration of his having, during the Revolutionary war, given shelter and aid to the American cruisers and vessels of war. It is located in the southeastern part of Tuscarawas County.

Moravian Lands are three several tracts of 4,000 acres each, originally granted by the old Continental Congress in July, 1787, and confirmed by act of Congress of June 1, 1796, to the Moravian brethren at Bethlehem, in Pennsylvania, in trust and for the use of the Christianized Indians living thereon. They are laid out in nearly square farms, on the Muskingum River, in what is now Tuscarawas County. They are called by the names of the Shoenbrun, Gnadenhutzen and Salem tracts.

Zane's Tracts are three several tracts of one mile

square each—one on the Muskingum River, which includes the town of Zanesville—one at the cross of the Hocking River, on which the town of Lancaster is laid out, and the third on the left bank of the Scioto River, opposite Chillicothe. They were granted by Congress to one Ebenezer Zane, in May, 1786, on condition that he should open a road through them, from Wheeling, Va., to Maysville, Ky.

There are also three other tracts, of one mile square each, granted to Isaac Zane, in the year 1802, in consideration of his having been taken prisoner by the Indians, when a boy, during the Revolutionary war, and living with them most of his life; and having during that time performed many acts of kindness and beneficence toward the American people. These tracts are situated in Champaign County, on King's Creek, from three to five miles northwest from Urbana.

The Maumee Road's Lands are a body of lands averaging two miles wide, lying along one mile on each side of the road, from the Maumee River, at Perysburg, to the western limits of the Western Reserve, a distance of about forty-six miles, and comprising nearly 60,000 acres. They were originally granted by the Indian owners, at the treaty of Brownstown, in 1808, to enable the United States to make a road on the line just mentioned. The General Government never moved into the business until February, 1823, when Congress passed an act making over the aforesaid lands to the State of Ohio, provided she should, within four years thereafter, make and keep in repair a good road throughout the aforesaid route of forty-six miles. This road the State government has already made, obtained possession, and sold most of the land.

Turnpike Lands are forty-nine sections, amounting to 31,360 acres, situated along the western side of the Columbus and Sandusky turnpike, in the eastern parts of Seneca, Crawford and Marion Counties. They were originally granted by an act of Congress on March 3, 1827, and more specifically by a supplementary act the year following. The considerations for which these lands were granted were that the mail stages and all troops and property of the United States, which should ever be moved and transported along this road should pass free from toll.

The Ohio Canal Lands are granted by Congress to the State of Ohio, to aid in constructing her extensive canals. These lands comprise over one million of acres.

School Lands—By compact between the United States and the State of Ohio, when the latter was admitted into the Union, it was stipulated, for and in consideration that the State of Ohio should never tax the Congress lands until after they should have been sold five years, and in consideration that the public lands would thereby more readily sell, that the one-thirty-sixth part of all the territory included within the limits of the State should be set apart for the support of common schools therein. And for the purpose of getting at lands which should, in point of quality of soil, be on an average with the whole land in the country, they decreed that it should be selected by lots, in small tracts each, to wit: That it should consist of Section No. 16, let that section be good or bad, in every township of Congress land, also in the Ohio Company's and in Symmes' Purchases, all of which townships are composed of thirty-six sections each; and for the United States military lands and Connecticut Reserve, a number of quarter-townships, two and a half miles square each (being the smallest public surveys therein, then made), should be selected by the Secretary of the Treasury in different townships throughout the United States military tract, equivalent in quantity to the one-thirty-sixth part of those two tracts respectively; and, for the Virginia military tract, Congress enacted that a quantity of land equal to the one-thirty-sixth part of the estimated quantity of land contained therein, should be selected by lot, in what was then called the "New Purchase," in quarter-township tracts of three miles square each. Most of these selections were accordingly made, but in some instances, by the carelessness of the officers conducting the sales, or from some other cause, a few Sections 16 have been sold, in which case Congress, when applied to, has generally granted other lands in lieu thereof, as, for instance, no Section 16 was reserved in Montgomery Township, in which Columbus is situated, and Congress afterward granted therefor Section 21, in township cornering thereon to the southwest.

College Townships are three six-mile-square townships, granted by Congress; two of them to the Ohio Company, for the use of a college to be established within their purchase, and one for the use of the inhabitants of Symmes' Purchase.

Ministerial Lands—In both the Ohio Company and the Symmes' Purchase every Section 29 (equal to every one-thirty-sixth part of every township)

is reserved as a permanent fund for the support of a settled minister. As the purchasers of these two tracts came from parts of the Union where it was customary and deemed necessary to have a regular settled clergyman in every town, they therefore stipulated in this original purchase that a permanent fund in lands should thus be set apart for this purchase. In no other part of the State, other than these two purchases, are any lands set apart for this object.

The Connecticut Western Reserve and the Fire Lands are surveyed into townships of about five miles square each; and these townships are then subdivided into four quarters; and these quarter-townships are numbered as in the accompanying figure, the top being considered north. And for individual convenience, these are again subdivided,

3	2
4	1

by private surveys, into lots of from fifty to five hundred acres each, to suit individual purchasers.

In its history, the Western Reserve is far more important than any other of the early arbitrary divisions of the State. It was peopled by a dominant class that brought to this wilderness social forms and habits of thought that had been fostered in the Puritan persecutions of England, and crystallized by nearly half a century of pioneer life in Connecticut, into a civilization that has not yet lost its distinctive characteristics. Dating their history back to the early part of the seventeenth century, the true descendant of the Puritan points with pride to the permanency of their traditions, to the progressive character of their institutions, and marks their influence in the commanding power of the schoolhouse and church.

The earliest measure which may be said to have affected the history of the Reserve, originated in 1609. In this year, James I, granted to a company called the London Company, a charter, under which the entire claim of Virginia to the soil northwest of the Ohio was asserted. It was clothed with corporate powers, with most of its members living in London. The tract of country embraced within this charter was immense. It commenced its boundaries at Point Comfort, on the Atlantic, and ran south 200 miles, and thence west across the continent to the Pacific; commencing again at Point Comfort, and running 200 miles north, and from this point northwest to the sea. This line ran through New York and Pennsylvania, crossing the eastern end of Lake Erie, and terminated in the Arctic Ocean. The

vast empire lying between the south line, the east line, the diagonal line to the northwest, and the Pacific Ocean, was claimed by virtue of this charter. It included over half of the North American Continent. Notwithstanding the charter of the London Company included all the territory now embraced within the boundaries of Ohio, James I, on the 3d of November, 1620, by royal letters patent, granted to the Duke of Lenox and others, to be known as the Council of Plymouth, all the territory lying between the fortieth and forty-eighth degrees of north latitude, and bounded on the east by the Atlantic, and on the west by the Pacific. This description embraced a large tract of the lands granted to the Virginia or London Company. In 1630, a portion of the same territory was granted to the Earl of Warwick, and afterward confirmed to him by Charles I. In 1631, the Council of Plymouth, acting by the Earl of Warwick, granted to Lord Brook and Viscounts Say and Seal, what were supposed to be the same lands, although by a very imperfect description. In 1662, Charles II granted a charter to nineteen patentees, with such associates as they should from time to time elect. This association was made a body corporate and politic, by the name of the Governor and Company of the English Colony of Connecticut. This charter constituted the organic law of the State for upward of one hundred and fifty years. The boundaries were Massachusetts on the north, the sea on the south, Narragansett River or Bay on the east, and the South Sea (Pacific Ocean) on the west. This description embraced a strip of land upward of six miles wide, stretching from the Atlantic to the Pacific, including a part of New York and New Jersey, and all the territory now known as the Western Reserve.

In 1681, for the consideration of £16,000 and a fealty of two beaver skins a year, Charles II granted to William Penn a charter embracing within its limits the territory constituting the present State of Pennsylvania. This grant included a strip of territory running across the entire length of the State on the north, and upward of fifty miles wide, that was embraced within the Connecticut charter. Massachusetts, under the Plymouth Charter, claimed all the land between the forty-first and forty-fifth degrees, of north latitude. In 1664, Charles II ceded to his brother, the Duke of York, afterward James II, by letters patent, all the country between the St. Croix and the Delaware. After the overthrow of the gov-

ernment of "New Netherlands," then existing upon that territory, it was claimed that the grant of the Duke of York extended west into the Mississippi Valley.

Thus matters stood at the commencement of the Revolution. Virginia claimed all the territory northwest of the Ohio. Connecticut strenuously urged her titles to all lands lying between the parallels 41° and $42^{\circ} 2'$ of north latitude, from the Atlantic to the Pacific. Pennsylvania, under the charter of 1681, had taken possession of the disputed land lying in that State, and had granted much of it to actual settlers. New York and Massachusetts were equally emphatic in the assertion of ownership to land between those lines of latitude. The contention between claimants under the Connecticut and Pennsylvania charters, on the Susquehanna, frequently resulted in bloodshed. The controversy between those two States was finally submitted to a Court of Commissioners, appointed by Congress, upon the petition of Pennsylvania, under the ninth article of the confederation, which gave Congress power to establish a Court of Commissioners, to settle disputed boundaries between States, in case of disagreement. The court decided in favor of Pennsylvania, and this decision terminated the controversy. The question of the title to lands lying west of Pennsylvania, was not involved in this adjudication, but remained a subject for future contention. A party sprung up during the war that disputed the title of the States asserting it, to lands outside of State limits, and which insisted upon the right of the States by whose common treasure, dominion was to be secured, to participate in the benefits and results arising from the joint and common effort for independence. This party was particularly strong in the smaller States. Those colonies that had not been the favored recipients of extensive land grants, were little inclined to acquiesce in claims, the justice of which they denied, and which could be secured to the claimants, only by the success of the Revolution.

There is little doubt, that the conflict in the early charters, respecting boundaries, grew out of the ignorance of the times in which they were granted, as to the breadth or inland extent of the American Continent. During the reign of James I, Sir Francis Drake reported, that, from the top of the mountains on the Isthmus of Panama, he had seen both oceans. This led to the supposition that the continent, from east to west, was of no considerable extent, and that the South

Sea, by which the grants were limited on the west, did not lie very far from the Atlantic; and as late as 1740, the Duke of Newcastle addressed his letters to the "Island of New England." Hence it was urged as an argument against the claims of those States asserting title to Western lands, that the term, in the grants, of South Sea, being, by mutual mistake of the parties to the charter, an erroneous one—the error resulting from misinformation or want of certainty concerning the locality of that sea—the claiming State ought not to insist upon an ownership resting upon such a footing, and having its origin in such a circumstance. Popular feeling on the subject ran so high, at times, as to cause apprehension for the safety of the confederation. In 1780, Congress urged upon the States having claims to the Western country, the duty to make a surrender of a part thereof to the United States.

The debt incurred in the Revolutionary contest, the limited resources for its extinguishment, if the public domain was unavailable for the purpose, the existence of the unhappy controversy growing out of the asserted claims, and an earnest desire to accommodate and pacify conflicting interests among the States, led Congress, in 1784, to an impressive appeal to the States interested, to remove all cause for further discontent, by a liberal cession of their domains to the General Government, for the common benefit of all the States. The happy termination of the war found the public mind in a condition to be easily impressed by appeals to its patriotism and liberality. New York had, in 1780, ceded to the United States, the lands that she claimed, lying west of a line running south from the west bend of Lake Ontario; and, in 1785, Massachusetts relinquished her claim to the same lands—each State reserving the same 19,000 square miles of ground, and each asserting an independent title to it. This controversy between the two States was settled by an equal division between them, of the disputed ground. Virginia had given to her soldiers of the Revolutionary war, and of the war between France and England, a pledge of bounties payable in Western lands; and, reserving a sufficient amount of land to enable her to meet the pledge thus given, on the 1st of March, 1784, she relinquished to the United States, her title to all other lands lying northwest of the Ohio. On the 14th day of September, 1786, the delegates in Congress, from the State of Connecticut, being authorized and directed so to do, relinquished to the United States, all the right, title, interest, jurisdic-

tion and claim that she possessed to the lands lying west of a line running north from the 41° north latitude, to 42° 2', and being 120 miles west of the western line of Pennsylvania. The territory lying west of Pennsylvania, for the distance of 120 miles, and between the above-named degrees of latitude, although not in terms reserved by the instrument of conveyance, was in fact reserved—not having been conveyed—and by reason thereof, was called the Western Reserve of Connecticut. It embraces the counties of Ashtabula, Trumbull, Portage, Geauga, Lake, Cuyahoga, Medina, Lorain, Huron, Erie, all of Summit, save the townships of Franklin and Greene; the two northern tiers of townships of Mahoning; the townships of Sullivan, Troy and Ruggles, of Ashland; and the islands lying north of Sandusky, including Kelley's and Put-in-Bay.

During the Revolution, the British, aided by Benedict Arnold, made incursions in the heart of Connecticut, and destroyed a large amount of property in the towns of Greenwich, Norwalk, Fairfield, Danbury, New and East Haven, New London, Richfield and Groton. There were upward of 2,000 persons and families that sustained severe losses by the depredations of the enemy. On the 10th of May, 1792, the Legislature of that State set apart and donated to the suffering inhabitants of these towns, 500,000 acres of the west part of the lands of the Reserve, to compensate them for the losses sustained. These lands were to be bounded on the north by the shore of Lake Erie, south by the base line of the Reserve, west by its western line, and east by a line parallel with the western line of Pennsylvania, and so far from the west line of the Reserve as to include within the described limits the 500,000 acres. These are the lands now embraced within the counties of Huron and Erie, and the Township of Ruggles, in Ashland County. The islands were not included. The lands so given were called "Sufferers' Lands," and those to whom they were given were, in 1796, by the Legislature of Connecticut, incorporated by the name of the "Proprietors of the half-million acres of land lying south of Lake Erie." After Ohio had become an independent State, this foreign corporation was not found to work well here, not being subject to her laws, and, to relieve the owners of all embarrassment, on the 15th of April, 1803, the Legislature of this State conferred corporate power on the owners and proprietors of the "Half-million acres of land lying south of Lake Erie," in the

county of Trumbull, called "Sufferers' Land." An account of the losses of the inhabitants had been taken in pounds, shillings and pence, and a price placed upon the lands, and each of the sufferers received land proportioned to the extent of his loss. These lands subsequently took the name of "Fire Lands," from the circumstance that the greater part of the losses suffered resulted from fire.

In 1795, the remaining portion of the Reserve was sold to Oliver Phelps and thirty-five others, who formed what became known as the "Connecticut Land Company." Some uneasiness concerning the validity of the title arose from the fact that, whatever interest Virginia, Massachusetts or New York may have had in the lands reserved, and claimed by Connecticut, had been transferred to the United States, and, if neither of the claiming States had title, the dominion and ownership passed to the United States by the treaty made with England at the close of the Revolution. This condition of things was not the only source of difficulty and trouble. The Reserve was so far from Connecticut as to make it impracticable for that State to extend her laws over the same, or ordain new ones for the government of the inhabitants; and, having parted with all interest in the soil, her right to provide laws for the people was not only doubted, but denied. Congress had provided by the ordinance of 1787 for the government of the territory northwest of the Ohio; but to admit jurisdiction in the United States to govern this part of that territory, would cast grave doubt upon the validity of the company's title. It was therefore insisted that the regulations prescribed by that instrument for the government of the Northwest Territory had no operation or effect within the limits of the Reserve. To quiet apprehension, and to remove all cause of anxiety on the subject, Congress, on April 28, 1800, authorized the President to execute and deliver, on the part of the United States, letters patent to the Governor of Connecticut, whereby the United States released, for the uses named, all right and title to the soil of the Reserve, and confirmed it unto those who had purchased it from that State. The execution and delivery, however, of the letters patent were upon the condition that Connecticut should forever renounce and release to the United States entire and complete civil jurisdiction over the territory released. This condition was accepted, and thereupon Connecticut transferred her jurisdiction to the United States, and the

United States released her claim and title to the soil

While this controversy was going on, there was another contestant in the field, having the advantage of actual occupancy, and in no wise inclined to recognize a title adverse to his, nor yield, upon mere invitation, a possession so long enjoyed. This contestant was the Indian. By the treaty at Greenville in 1795, preceding treaties were confirmed, and the different tribes released their claims to all territory east of the line of the Cuyahoga River and south of the Indian boundary line. This left the larger part of the territory of the Western Reserve still in the hands of the savage. On July 4, 1805, a treaty was made at Fort Industry with the chiefs and warriors of the different nations settled in the northern and western sections of the State, by which the Indian title to all the lands of the Reserve, lying west of the Cuyahoga, was extinguished. By this treaty all the lands lying between the Cuyahoga and the Meridian, one hundred and twenty miles west of Pennsylvania, were ceded by the Indians for \$20,000 in goods, and a perpetual annuity of \$9,500, payable in goods at first cost. The latter clause has become a dead letter, because there is no one to claim it. Since this treaty, the title to the land of the Reserve has been set at rest.

The price for which this vast tract of land was sold to the Connecticut Land Company was \$1,200,000, the subscriptions to the purchase fund ranging from \$1,683, by Sylvanus Griswold, to \$168,185, by Oliver Phelps. Each dollar subscribed to this fund entitled the subscriber to one twelve hundred thousandth part in common and undivided of the land purchased. Having acquired the title, the Company, in the following spring, commenced to survey the territory lying east of the Cuyahoga, and during the years of 1796 and 1797, completed it. The first surveying party arrived at Conneaut, in New Connecticut, July 4, 1796, and proceeded at once to celebrate the twentieth anniversary of American Independence. There were fifty persons in the party, under the lead of Gen. Moses Cleveland, of Canterbury, Conn. There will be found in Whittlesey's *Early History of Cleveland* an extract from the journal of Cleveland, describing the particulars of the celebration. Among other things noted by him was the following: "The day, memorable as the birthday of American Independence and freedom from British tyranny, and commemo-

rated by all good, freeborn sons of America, and memorable as the day on which the settlement of this new country was commenced, and (which) in time may raise her head among the most enlightened and improved States" — a prophecy already more than fulfilled.

For the purposes of the survey, a point where the 41st degree of north latitude intersected the western line of Pennsylvania, was found, and from this degree of latitude, as a base line, meridian lines, five miles apart, were run north to the lake. Lines of latitude were then run, five miles apart, thus dividing the territory into townships five miles square. It was not until after the treaty of 1805 that the lands lying west of the Cuyahoga were surveyed. The meridians and parallels were run out in 1806, by Abraham Tappan and his assistants. The base and western lines of the Reserve were run by Seth Pease, for the Government. The range of townships were numbered progressively west, from the western boundary of Pennsylvania. The first tier of townships, running north and south, lying along the border of Pennsylvania, is Range No. 1; the adjoining tier west is range No. 2, and so on throughout the twenty-four ranges. The township lying next north of the 41st parallel of latitude in each range, is Township No. 1 of that range. The township next north is No. 2, and so on progressively to the lake. It was supposed that there were 4,000,000 acres of land between Pennsylvania and the Fire Lands. If the supposition had proved true, the land would have cost 30 cents per acre; as it resulted, there were less than 3,000,000 acres. The miscalculation arose from the mistaken assumption that the south shore of Lake Erie bore more nearly west than it does, and also in a mistake made in the length of the east-and-west line. The distance west from the Pennsylvania line, surveyed in 1796-97, was only fifty-six miles, the survey ending at the Tuscarawas River. To reach the western limits of the Reserve a distance of sixty-four miles was to be made. Abraham Tappan and Anson Sessions entered into an agreement with the Land Company, in 1805, to complete the survey of the lands between the Fire Lands and the Cuyahoga. This they did in 1806, and, from the width of Range 19, it is very evident that the distance from the east to the west line of the Reserve is less than one hundred and twenty miles. This range of townships is gore-shaped, and is much less than five miles wide, circumstances leading the company to divide all below

Township 6 into tracts for the purpose of equalization. The west line of Range 19, from north to south, as originally run, bears to the west, and between it and Range 20, as indicated on the map, there is a strip of land, also gore-shaped, that was left in the first instance unsurveyed, the surveyors not knowing the exact whereabouts of the eastern line of the "half-million acres" belonging to the sufferers. In 1806, Amos Spafford, of Cleveland, and Almon Rugales, of Huron, were agreed on by the two companies to ascertain and locate the line between the Fire Lands and the lands of the Connecticut Company. They first surveyed off the "half-million acres" belonging to the "sufferers," and, not agreeing with Seth Pease, who had run out the base and west lines, a dispute arose between the two companies, which was finally adjusted before the draft, by establishing the eastern line of the Fire Lands where it now is. This left a strip of land east of the Fire Lands, called surplus lands, which was included in range 19, and is embraced in the western tier of townships of Lorain County.

The mode of dividing the land among the individual purchasers, was a little peculiar, though evidently just. An equalizing committee accompanied the surveyors, to make such observations and take such notes of the character of the townships as would enable them to grade them intelligently, and make a just estimate and equalization of their value. The amount of purchase-money was divided into 400 shares of \$3,000 a share. Certificates were issued to each owner, showing him to be entitled to such proportion of the entire land, as the amount he paid, bore to the purchase price of the whole. Four townships of the greatest value were first selected from that part of the Western Reserve, to which the Indian title had been extinguished, and were divided into lots. Each township was divided into not less than 100 lots. The number of lots into which the four townships were divided, would, at least, equal the 400 shares, or a lot to a share, and each person or company of persons entitled to one or more shares of the Reserve—each share being one four-hundredth part of the Reserve—was allowed to participate in the draft that was determined upon for the division of the joint property. The committee appointed to select the four most valuable townships for such division, was directed to select of the remaining townships, a sufficient number, and of the best quality and greatest value, to be used for equalizing purposes. After this selection was made, they were to choose the best remaining township, and *this* township was

the one, to the value of which all others were brought by the equalizing process of annexation, and if there were several of equal value with the one so selected, no annexations were to be made to them. The equalizing townships were cut up into parcels of various size and value, and these parcels were annexed to townships inferior in value to the *standard township*, and annexations of land from the equalizing townships, were made to the inferior townships, in quantity and quality, sufficient to make all equal in value to the standard adopted. When the townships had thus all been equalized, they were drawn by lot. There were ninety-three equalized parcels drawn east of the Cuyahoga, and forty-six on the west. The draft of the lands east of the river, took place prior to 1800, and of those west of that river, on the 4th day of April, 1807. In the first draft, it required an ownership of \$12,903.23 of the original purchase money, to entitle the owner to a township; and in the second draft, it required an ownership of \$26,087 in the original purchase-money, to entitle the owner to a township.

The same mode and plan were followed in each draft. The townships were numbered, and the numbers, on separate pieces of paper, placed in a box. The names of the proprietors who had subscribed, and were the owners of a sufficient amount of the purchase-money to entitle them to a township, were arranged in alphabetical order, and when it was necessary for several persons to combine, because not owning severally, a sufficient amount of the purchase-money, or number of shares, to entitle them to a township, the name of the person of the company that stood alphabetically first, was used to represent them in the draft, and in case the small owners were unable, from disagreement among themselves, to unite, a committee was appointed to select and class the proprietors, and those selected were required to associate themselves together, for the purpose of the draft. The township, or parcel of land, corresponding to the first number drawn from the box belonged to the person whose name stood first on the list, or to the persons whom he represented; and the second drawn belonged to the second person, and so down through the list. This was the mode adopted to sever the ownership in common, and to secure to each individual, or company of individuals, their interest in severalty. Soon after the conveyance to the land company, to avoid complications arising from the death of its members, and to facilitate the transmission of titles, the company conveyed the

entire purchase, in trust, to John Morgan, John Cadwell and Jonathan Brace; and as titles were wanted, either before or after the division by draft, conveyances were made to the purchasers by these trustees.

Little was known of this country at the time of its purchase by the Land Company. It was formerly inhabited by a nation of Indians called the Erigas or Eries, from which the lake took its name. This nation was at an early date destroyed by the Iroquois. In his "History of New France," published in 1744, in speaking of the south shore of Lake Erie, Charlevoix says: "All this shore is nearly unknown." An old French map, made in 1755, to be seen in the rooms of the Western Reserve Historical Society, in Cleveland, names the country between the Cuyahoga and Sandusky Rivers, as Cauahogue; and east of the Cuyahoga, as Gwahoga. This is also the name given to that river which is made to empty into Cuyahoga Bay; and the country designated as Cauahogue is indicated as the seat of war, the Mart of Trade, and the chief hunting grounds of the Six Nations of the lake. The earliest settlement was on the Reserve, at Warren, in 1798, though salt was made in Weathersfield, Mahoning County, as early as 1755, by whites, who made short sojourns there for that purpose. The number of settlers increased in this section until, in 1800, there were some sixteen families. In 1796, the first surveying party for the Land Company, landed at Conneaut, followed three years later by the first permanent settler. Then followed settlements in Geauga and Cuyahoga, in 1798; in Portage and Lake, in 1799; Summit, in 1800; Lorain, 1807, and Medina, in 1811. "The settlement of the Reserve commenced in a manner somewhat peculiar. Instead of beginning on one side of a county, and progressing gradually into the interior, as had usually been done in similar cases, the proprietors of the Reserve, being governed by different and separate views, began their improvements wherever their individual interests led them. Here we find many of the first settlers immersed in a dense forest, fifteen or twenty miles or more from the abode of any white inhabitants. In consequence of their scattered situation, journeys were sometimes to be performed of twenty or fifty miles, for the sole purpose of having the staple of an ox-yoke mended, or some other mechanical job, in itself trifling, but absolutely essential for the successful prosecution of business. These journeys had to be performed through the wilderness, at a great expense of time, and, in many cases, the

only safe guide to direct their course, were the township lines made by the surveyors. The want of mills to grind the first harvest, was in itself a great evil. Prior to 1800, many families used a small hand-mill, properly called a sweat-mill, which took the hard labor of two hours to supply flour enough for one person a single day. About the year 1800, one or two grist-mills, operating by water-power, were erected. One of these was at Newburg, now in Cuyahoga Co. But the distance of many of the settlements from the mills, and the want of roads, often rendered the expense of grinding a single bushel equal to the value of two or three.* Speaking of the settlement of the Fire Lands, C. B. Squier, late of Sandusky City, says: "The largest sufferers, and, consequently, those who held the largest interest in the Fire Lands, purchased the rights of many who held smaller interests. The proprietors of these lands, anxious that their new territory should be settled, offered strong inducements for persons to settle in this then unknown region. It is quite difficult to ascertain who the first settlers were, upon these lands. As early, if not prior to the organization of the State, several persons had squatted upon the lands at the mouth of the streams and near the shore of the lake, led a hunter's life, and trafficked with the Indians. But they were a race of wanderers, and gradually disappeared before the regular progress of the settlements. Those devoted missionaries, the Moravians, made a settlement, which they called New Salem, as early as 1790, on Huron River, about two miles below Milan. The first regular settlers, however, were Col. J-rard Ward, who came in the spring of 1808, and Almon Ruggles and Jabez Wright, in succeeding autumn." The next year brought a large inflow of immigration, which spread over the greater portion of both Erie and Huron Counties, though the first settlement in Sandusky City was not made until 1817.

It was not until the year 1800 that civil government was organized on the Western Reserve. The Governor and Judges of the Northwest Territory, under the ordinance of 1787, by proclamation in the following year, organized the county of Washington, and included within it all of the Western Reserve east of the Cuyahoga; and in 1796, the year of the first occupation by the whites of the New Connecticut, the county of Wayne was erected, which included over one-half of Ohio, all of the Western Reserve west of the Cuyahoga, with a part of Indiana, all of *Michigan*, and the Ameri-

*Judge Amzi Atwater.

can portion of Lakes Superior, Huron, St. Clair and Erie, to the mouth of the Cuyahoga, with the county seat at Detroit. In 1797, Jefferson County was established, and the Western Reserve, east of the Cuyahoga, became a part of it, by restricting the limits of Washington. Connecticut and the Land Company refused to recognize the right of the General Government to make such disposition of the Reserve. The act of including this territory within the counties of Washington, Jefferson and Wayne, they declared to be unwarranted, and the power of Congress to prescribe rules for the government of the same, they denied, and from the opening settlement in 1796, until the transfer of jurisdiction to the General Government was complete, on May 30, 1800, the new settlers were entirely without municipal laws. There was no regulation governing the transmission of, or success to, property on the decease of the owner; no regulations of any kind securing the protection of rights, or the redress of wrongs. The want of laws for the government of the settlers was seriously felt, and as early as 1796, the company petitioned the Legislature of Connecticut to erect the Reserve into a county, with proper and suitable laws to regulate the internal policy of the territory for a limited period. This petition, however, was not granted, and for upward of four years the intercourse and conduct of the early settlers were regulated and restrained only by their New England sense of justice and right. But on the 10th of July, 1800, after Connecticut had released her jurisdiction to the United States, the Western Reserve was erected into a county, by the name of Trumbull, in honor of the Governor of Connecticut, by the civil authority of Ohio. At the election in the fall of that year, Edward Paine received thirty-eight votes out of the forty-two cast, for member of the Territorial Legislature. The election was held at Warren, the county seat, and was the first participation that the settlers had in the affairs of government here. During the same year the Court of Quarter Sessions, a tribunal that did not survive the Constitution of 1802, was established and organized, and by it the county was divided into eight organized townships. The township of Cleveland was one, and embraced a large portion of territory east of the Cuyahoga, but all the Reserve lying west of that river. On December 1, 1805, Geauga County was erected. It included within its limits, nearly all the present counties of Ashtabula, Geauga, Lake and Cuyahoga. On February 10, 1807, there was a more general di-

vision into counties. That part of the Western Reserve lying west of the Cuyahoga and north of Township No. 4, was attached to Geauga, to be a part thereof until Cuyahoga should be organized. In the same year Ashtabula was erected out of Trumbull and Geauga, to be organized whenever its population would warrant it; also, all that part of Trumbull which lay west of the fifth range of townships, was erected into a county by the name of Portage, all of the Western Reserve west of the Cuyahoga and south of Township No. 5, being attached to it. The county of Cuyahoga was formed out of Geauga, on the same date, February 10, 1807, to be organized whenever its population should be sufficient to require it, which occurred in 1810.

On February 8, 1809, Huron County was erected into a county, covering the Fire Lands, but to remain attached to Geauga and Portage, for the time being, for purposes of government. The eastern boundary of this county was subsequently, in 1811, moved forward to the Black River, but, in the year 1822, it was given its present boundaries, and, in 1838, Erie County was erected, dividing its territory. On the 18th of February, 1812, Medina was formed, and comprised all the territory between the eleventh range of townships and Huron County, and south of Township No. 5. It was attached to Portage, however, until January 14, 1818, when it received an independent organization. Lorain County was formed on the 26th day of December, 1822, from the outlying portions of Huron, Medina and Cuyahoga Counties. It was organized with an independent local administration, January 21, 1824. In 1840, were organized Summit County, on March 3, and Lake County on March 6; the former drawing from Medina and Portage, and taking two townships from Stark County, and the latter being formed from Geauga and Cuyahoga. In 1846, Ashland County was formed, taking three townships of the Reserve, on February 26, and Mahoning, on March 1, taking ten townships from Trumbull, leaving the boundaries of the Reserve as marked at present.

In the history of its social development, the Western Reserve is not less interesting or peculiar than in the beginning of its material interests. The history of the mother State was peculiar, and the Reserve, it was fondly hoped, would be a reproduction of the maternal features and graces, a New Connecticut. A chronicler* of the early

*Charles W. Elliott.

history of New England, writing of the New Haven Colony of 1637, says: "During the first year, little 'government' was needed or exercised. Each man was a lord to himself. On the 4th of June (1638), the settlers met in Mr. Neuman's barn, and bound themselves by a sort of Constitution. * * * They decided to make the Bible their law-book; but by and by new towns were made, and new laws were needed, and they had the good sense to make them. Their State was founded upon their church, thus expressed in their first compact, signed by one hundred and eleven persons: 'That church members' only shall be free Burgesses, and that they only shall choose Magistrates and officers among themselves, to have the power of transacting all publique civil affairs of this plantation, of making and repealing laws, dividing of inheritances, deciding of differences that may arise, and doing all things or businesses of like nature.'" Twenty-seven years later, when circumstances made a union of the two Connecticut Colonies necessary, the greatest and most lasting objection on the part of the New Haven Colony was the lessening of the civil power of the church which would follow the union. In 1680, the Governor of the United Colonies, thus describes the community: "The people are strict Congregationalists. There are four or five Sunday men, and about as many Quakers. We have twenty-six towns and twenty-one churches. Beggars and vagabonds are not suffered, but are bound out to service." These characteristics of Connecticut have been marked by all historians as well as the facts, that she "Early established and supported schools and colleges; her people have, from the outset, been industrious and honest; crime has not abounded; while talent and character, and courage and cleanliness, have been common through all her history." It was to reproduce these characteristics throughout the territory embraced within the provisions of her charter, that the mother State labored. For one hundred and thirty years she followed this purpose with an un-deviating method. "One tract after another, sufficient for a municipal government, was granted to trusty men, who were to form a settlement of well assorted families, with the church, the meeting house, the settled ministry of the Gospel, the school, the local magistracy, and the democratic town-meeting represented in the General Assembly. Under this method, self-governed towns in what is now a part of Pennsylvania, were once represented in the General Assembly at Hartford

and New Haven."* It was with the hope of extending this method to the Reserve that Connecticut so strenuously asserted her jurisdiction to her Western lands; but in the years of rapid growth succeeding the war of the Revolution, the old method proved no longer practicable, and the parent surrendered her offspring to the hands of abler guardians. But there remained a field in which solicitous regard could find action, and the impress of her work in this direction is plainly apparent to this day. It was her method of "missions to the new settlements" which had become crystallized into a system about this time. Of the scope and character of this work, Rev. Leonard Bacon thus speaks: "At first, individual pastors, encouraged by their brethren, and obtaining permission from their churches, performed long and weary journeys on horseback into Vermont and the great wilderness of Central New York, that they might preach the Word and administer the ordinances of religion to such members of their flocks, and others, as had emigrated beyond the reach of ordinary New England privileges. By degrees the work was enlarged, and arrangements for sustaining it were systematized, till in the year 1798, the same year in which the settlement of the Reserve began, the pastors of Connecticut, in their General Association, instituted the Missionary Society of Connecticut. In 1802, one year after the jurisdiction of the old State over the Reserve was formally relinquished, the Trustees of the Missionary Society were incorporated. As early as 1800, only two years after the first few families from Connecticut had planted themselves this side of Northwestern Pennsylvania, the first missionary made his appearance among them. This was the Rev. Joseph Badger, the apostle of the Western Reserve—a man of large and various experience, as well as of native force, and of venerable simplicity in character and manners. In those days the work of the missionary to the new settlements was by no means the same with what is now called 'Home Missionary' work. Our modern Home Missionary has his station and his home; his business is to gather around himself a permanent congregation; his hope is to grow up with the congregation which he gathers, and the aid which he receives is given to help the church support its pastor. But the old-fashioned 'missionary to the new settlements,' was an itinerant. He had no station and no settled home. If he had a family, his work was continually calling

*Address by Leonard Bacon, D. D.

him away from them. He went from one little settlement to another—from one lonely cabin to another—preaching from house to house, and not often spending two consecutive Sabbaths in one place. The nature of the emigration to the wilderness, in those days, required such labors.

“It was soon felt that two missionaries were needed for the work among the scattered settlements. Accordingly, the Rev. Ezekiel J. Chapman was sent. He arrived on the Reserve at the close of the year 1801, and returned to Connecticut in April, 1803. His place was soon supplied by a young man ordained expressly to the work, the Rev. Thomas Robbins, who continued laboring in this field from November, 1803, till April, 1806. In a letter of his, dated June 8, 1805, I find the following statement: ‘Since the beginning of the present year, I have been taking pains to make an actual enumeration of the families in this county.* The work I have just completed. There are one or more families in sixty-four towns. January 1, 1804, the number of families was about 800. The first of last January there were a little more than 1100, of which 450 are Yankees. There were twenty-four schools. There are seven churches, with a prospect that two more will be organized soon, and more than twenty places where the worship of God is regularly maintained on the Sabbath.’” Such was the beginning of an influence to which the people of the Reserve are principally indebted for the early and secure foundation of the church and school, and for that individuality which marks them as a peculiar and envied people in a great commonwealth made up of the chosen intellect and brawn of a whole nation.

Owing to the peculiar relation of the Reserve to the General Government in early years, the history of its public school fund is exceptional. By the ordinance of Congress in 1785, it was declared that Section 16 of every township should be reserved for the maintenance of public schools in the township. The ordinance of 1787, re-affirmed the policy thus declared. The provisions of these ordinances, in this respect, were not applicable to, nor operative over, the region of the Reserve, because of the fact that the United States did not own its soil; and, although the entire amount paid to Connecticut by the Land Company for the terri-

tory of the Reserve was set apart for, and devoted to, the maintenance of public schools in that State, no part of that fund was appropriated to purposes of education here. There was an inequality of advantages between the people of the Reserve and the remainder of the State, in that respect. This inequality was, however, in a measure removed in 1803, by an act of Congress, which set apart and appropriated to the Western Reserve, as an equivalent for Section 16, a sufficient quantity of land in the United States Military District, to compensate the loss of that section, in the lands lying east of the Cuyahoga. This amount was equal to one-thirty-sixth of the land of the reserve, to which the Indian title had before that time been extinguished. The Indian title to the lands of the Reserve west of the Cuyahoga, not then having been extinguished, the matter seemed to drop from public notice, and remain so until 1829. At this date, the Legislature, in a memorial to Congress, directed its attention to the fact, that, by the treaty of Fort Industry, concluded in 1805, the Indian title to the land west of the Cuyahoga, had been relinquished to the United States, and prayed in recognition of the fact, that an additional amount of land lying within the United States Military District, should be set apart for the use of the public schools of the Reserve, and equal in quantity to one thirty-sixth of the territory ceded to the United States by that treaty. The memorial produced the desired result. In 1834, Congress, in compliance with a request of the Legislature, granted such an additional amount of land to the Reserve for school purposes, as to equalize its distribution of lands for such purpose, and in furtherance of its object to carry into effect its determination to donate one thirty-sixth part of the public domain to the purposes of education. The lands first allotted to the Reserve for such purpose, were situated in the Counties of Holmes and Tuscarawas, and in 1831, were surveyed and sold, the proceeds arising from their sale as well as the funds arising from the sale of those subsequently appropriated, being placed and invested with other school funds of the State, and constitute one of the sources from which the people of the Reserve derive the means of supporting and maintaining their common schools.

*Trumbull County then included the whole of the Reserve.

SUMMIT COUNTY COURT HOUSE

PART II.

HISTORY OF SUMMIT COUNTY.

CHAPTER I.*

INTRODUCTORY—DESCRIPTION—TOPOGRAPHY, ETC.—GEOLOGY—ALTITUDES IN THE COUNTY—THE DRIFT—COAL DEPOSITS—AGRICULTURE, ETC.

"And riper eras ask for history's truth."
—*Oliver Wendell Holmes.*

THE advantages resulting from the local history of cities and countries is no longer a matter of doubt. Whether considered solely as objects of interest or amusement, or as having the still wider utility of the places they describe, these records are worthy of high consideration. And although in a country like ours, this department of history can claim to chronicle no great events, nor to relate any of those local traditions that make many of the countries of the Old World so famous in story and song, yet they can fulfill the equal use of directing the attention of those abroad to the rise, progress and present standing of places which may fairly claim, in the future, what has made others great in the past. And in any age, when every energy of the whole brotherhood of man is directed to the future, and when mere utilitarianism has taken the place of romance, it is a matter of more than ordinary interest and value to all, to note the practical advancement, and so to calculate, upon the basis of the past, the probable results of the future of those places which seem to present advantages, either social or pecuniary, to that large class of foreigners and others, who are constantly seeking for homes or means of occupation among us. Nor is it to these alone that such local history is of value. The country already possesses much unemployed capital seeking for investment, while many, having already procured the means of living well, are seeking for homes more congenial to their tastes than the places where they

have lived but for pecuniary profit. To both of these, the history of individual localities is an invaluable aid in helping the one to discover a means of advantageously employing his surplus money, and in aiding the other to find a home possessing those social advantages which will render him comfortable and happy. But it is to the emigrant foreigner that local history is of the greatest benefit. Leaving, as he does, a country, with whose resources, social, moral and political, he is intimately acquainted, for one of which he knows almost nothing, such works, carefully and authentically written, are to him what the guide-books of the Old World are to the wonder-seeking traveler; they present him at once with a faithful view of the land of his adoption, and point out to him every advantage and disadvantage, every chance of profit or of pleasure, every means of gain, every hope of gratification, that is anywhere to be afforded.

Impressed with these opinions, it is proposed to present the citizens of Summit County with an authentic and impartial history; one which may be implicitly relied on in its calculations and statistical details, and which shall present as accurate and faithful a survey as can be obtained from any data known to the writers of the different departments, or attainable by them. With all the care that may be exercised, however, the record will no doubt be found imperfect; incidents and names be left out, and matters escape notice which many will deem unpardonable omissions. This is one of the things which detract from the pleasure of writing local annals. But it is more or less unavoid-

* Contributed by W. H. Perrin.

able, as no one can know and remember everything, and both the time and space allotted to us are limited.

Summit County lies in the northeastern part of the State, with but one county between it and the lake, and is bounded on the north by Cuyahoga County, on the east by Portage, on the south by Stark, on the west by Medina, and embraces within its limits seventeen townships (including Cuyahoga Falls). It is situated on the highlands, or the "summit" (from which it derives the name of Summit), which separate the tributaries of the Ohio from the waters flowing north into Lake Erie, and has an average elevation of about five hundred feet above the lake. "The Cuyahoga River, rising in the northern part of Geauga County, runs for forty miles in a southwesterly direction, then in the center of Summit County turns sharply to the north, and pursues a nearly straight course to the lake. In Geauga and Portage, the Cuyahoga flows on the surface of a plateau composed of the carboniferous conglomerate. At the town of Cuyahoga Falls, in this county, this plateau is cut through in a series of cascades which give rise to much beautiful scenery. The river here falls 220 feet in two miles, so that from the vicinity of Akron to the north line of the county, it flows through a narrow valley or gorge more than three hundred feet deep. At frequent intervals, the Cuyahoga receives tributaries, both from the east and the west, and the valleys of these streams contribute their part to give variety to the topography of the central portion of the county." *

In the geological and physical features of the county, we shall draw our information principally from the State Geological Survey. It is the official report of the State on these subjects, and may be relied on as substantially correct. And as there were but a limited number of them printed, and they are even now becoming scarce, the extracts from them incorporated in this work will be found of interest and value to our readers. We quote further, as follows:

"The highest lands in Summit are the hills most distant from the channels of drainage, in Richfield, Norton, Green, Springfield, Tallmadge, and Hudson. In all these townships, summits rise to the height of 650 above the lake. The

*Geological Survey.

bottom of the Cuyahoga Valley, in the northern part of Northfield, is less than fifty feet above Lake Erie, so that within the county we have differences of level which exceed 600 feet. The altitudes in Summit County are thus officially given: Tallmadge, Long Swamp, above Lake Erie 470 feet; Tallmadge road, east of Center, 543 feet; Tallmadge, Coal No. 1, Newberry's mine, 520 feet; Tallmadge, Coal No. 1, D. Upson's mine, 492 feet; Tallmadge, summit of Coal Hill, 636 feet; Akron, door-sill of court house, 452.65 feet; Akron, railroad depot, 428.13 feet; Akron, summit level, Ohio Canal, highwater, 395 feet; Akron, P. & O. Canal, 370.64 feet; Cuyahoga Falls, railroad depot, 428.13 feet; Monroe Falls, road before Hickok house, 460 feet; Hudson Station, 496 feet; Hudson town, 547 feet; Boston, Ohio Canal, 94.66 feet; Peninsula, Ohio Canal, 125.66 feet; Yellow Creek, Ohio Canal, 180 feet; Old Portage, Ohio Canal, 188 feet; Green, summit of Valley Railroad, 532 feet; New Portage, street in front of tavern, 400 feet; lake, between New Portage and Johnson's Corners, 399 feet; Wolf Creek, below Clark's mill, 390.74 feet; Wolf Creek, in Copley, one mile west of north-and-south center road, 419.78 feet; Little Cuyahoga, Mogadore, 477 feet; Little Cuyahoga, at Gilchrist's mill-dam, 457 feet; Little Cuyahoga, old forge at trestle, 439 feet; Richfield, East Center, 531.80 feet; Richfield, highest land (over), 675 feet; Yellow Creek, one-fourth mile west of Ghent, 371 feet.

"The soil of Summit County is somewhat varied. In the northern part, even where underlaid by the conglomerate in full thickness, the soil derived from the drift contains a great deal of clay, and Northfield, Twinsburg, Hudson, etc., are, as a consequence, dairy towns. The southern half of the county, however, has a loam soil, and the attention of the farmers has been directed more to grain-growing than stock-raising. This difference of soil was clearly indicated by the original vegetable growth. In Hudson and Twinsburg the forest was composed, for the most part, of beech, maple, basswood and elm, while in Stow, Tallmadge, and southward, the prevailing forest growth was oak. In Franklin and Green, the soil is decidedly gravelly; the original timber was oak, in groves and patches, and these townships form part of the famous wheat-growing district of Stark, Wayne, etc. In the central part of the

county, between Akron and Cuyahoga Falls, a few thousand acres, called "The Plains," formerly presented a marked contrast to the rolling and densely timbered surface of all the surrounding area. This is a nearly level district of which the peculiar features are mostly obliterated by cultivation, but when in the state of nature, it had the aspect of the prairies of the West. It was almost destitute of timber, was covered with grass and scrub-oak (*quercus banisteri*), and, in spring, was a perfect flower-garden; for a much larger number of wild flowers were found here than in any other part of the county. The origin of these peculiar features may be traced to the nature of the substructure of the district. This area forms a triangle between the two branches of the Cuyahoga and the coal-hills of Tallmadge; the soil is sandy, and this is underlaid by beds of gravel of unknown depth. It seems that there once existed here a deeply excavated rock basin, which was subsequently partly filled up with drift deposits and partly by water; in other words, that it was, for a time, a lake. The waters of this lake deposited the sand which now forms the soil, and, in its deeper portions, a series of lacustrine clays, which are well shown in the cutting recently made for a road on the north side of the valley of the Little Cuyahoga, near Akron. The sections of these beds are as follows:

FEET. INCHES.

"In another section, exposed nearly in the valley of the Little Cuyahoga, the beds which have been enumerated are seen to be underlaid

by about sixty feet of stratified sand and gravel to the bed of the stream. To what depth they extend is not known. On the opposite side of the Little Cuyahoga, on the main road leading into Akron, the banks of the old valley present a very different section from either of those to which I have referred above. There we find a hill composed of finely washed and irregularly stratified sand, quite free from pebbles. About ten or twelve feet of the upper part is yellow; the lower part, as far as exposed, white; a wavy line separating the two colors. East and north of the locality where the detailed section given above was taken, heavy beds of gravel are seen to occupy the same horizon; from which we may learn that these finely laminated clays were deposited in a basin of water, of which the shore was formed by gravel hills. A portion of the city of Akron is underlaid by thick beds of stratified sand and gravel. These are often cross-stratified, and show abundant evidences of current action. They also contain large angular blocks of conglomerate and many fragments of coal, some of which are of considerable size. We apparently have some of the materials which were cut out of the valleys that separate the isolated outliers of the coal measures which are found in this part of the county. Beds of gravel and sand stretch away southward from Akron, and form part of a belt which extends through Stark County, partially filling the old, deeply-cut valley of the Tuscarawas, and apparently marking the line of the southern extension of the valley of Cuyahoga when it was a channel of drainage from the lake basin to the Ohio. This old and partially obliterated channel has been referred to in the chapter on the physical geography of the State, and it will be more fully described in the chapters on surface geology and those formed by the reports on Stark and Tuscarawas Counties. I will only refer to it, in passing, to say that the line of the Ohio Canal, of which the summit is at Akron, was carried through this old water gap, because it still forms a comparatively low pass. In the western part of the State, the Miami Canal traverses a similar pass, and another, having nearly the same level with those mentioned, in Trumbull County, connects the valleys of Grand River and the Mahoning.

"The thick beds of gravel and sand which underlie the plain and stretch eastward up the

valley of the Little Cuyahoga, through Southern Tallmadge, perhaps form part of the great gravel belt to which I have already alluded, but may be of mere local origin. It seems to me quite possible that the Cuyahoga, in former times, passed eastward of its present course, from Kent or Monroe Falls to Akron; that the falls of the Cuyahoga were then near the 'Old Forge,' and that this excavated basin beneath the 'plains' was scooped out by them. We know that the position of the falls has been constantly changing; that they were once in Cuyahoga County, and have gradually receded to their present position. When they had worked back to the great bend of the Cuyahoga, they seem to have swung round the circle for some time before starting on their present line of progress. In this interval, the river appears to have flowed over a broad front of the conglomerate, and, cutting away the shales below, to have produced the rock basin which has been described. When the falls of the Cuyahoga were at the north line of the county, they must have had a perpendicular height of at least two hundred feet, for the hard layers in the Cuyahoga shale which produce the 'Big Falls' do not extend so far north. The entire mass of the Cuyahoga shale there is soft argillaceous material, which must have been cut out beneath the massive conglomerate, producing a cascade at least equal in height to that of Niagara.

"The north-south portion of the Cuyahoga Valley seems to have been once continued southward, and to have been connected with the old valley of the Tuscarawas, which is excavated far below the bed of the present stream. At the north line of the county, the valley of the Cuyahoga is cut down two hundred and twenty feet below the present river bottom, as we learn by wells bored for oil. The bottom of the valley of the Tuscarawas is, at Canal Dover, one hundred and seventy-five feet below the surface of the stream, and there are many facts which indicate that there was once a powerful current of water passing from the lake basin to the Ohio through this deeply excavated channel. Subsequently, this outlet was dammed up by heavy beds of drift; and the Cuyahoga, cut from its connection with the Tuscarawas, to which it had been a tributary, was forced to turn sharply to the north, forming the abrupt curve that has always been re-

garded as a peculiar feature in the course of this stream. The courses of the tributaries of the Maumee are not unlike that of the Cuyahoga, and are probably dependent upon the same cause, namely, the depression of the lake level and the diversion of the drainage from the Mississippi system, with which it was formerly connected, into the lake basin. The drift clays which underlie the northern part of Summit County are plainly of northern origin, as they contain innumerable fragments of the Huron, Erie and Cuyahoga shales, and no such mass of argillaceous material could be derived from the conglomerate and coal measures which underlie all the country toward the south. The direction of the glacial striæ in the county is nearly northwest and southeast, and these clays are plainly the result of glacial action. It is interesting to note, however, that in the drift clay at Hudson a large number of masses of coal have been found, some of which were several inches in diameter. This fact, taken in connection with the character and history of the drift clays, proves—what we had good reason to believe from other causes—that the coal rocks once extended at least as far north as the northern limits of the county, and that from all the northern townships they were removed and the conglomerate laid bare by glacial erosion. A considerable portion of the drift gravels in the southern part of the county are of foreign and northern origin. As I have elsewhere remarked, these gravels and the associated lands show distinct marks of water action, and have apparently been sorted and stratified by the shore waves of the lake when it stood several hundred feet higher than now. The bowlders which are strewn over the surface in all parts of the county are mostly composed of Laurentian granite from Canada, and I have attributed their transportation to icebergs. In Northampton, many huge bowlders of corniferous limestone are found, and these evidently came from the islands in Lake Erie.

"One of the most striking of the surface features of Summit County is the great number of small lakes which are found here. These are generally beautiful sheets of pure water, enclosed in basins of drift, gravel and sand. They form part of the great series of lake basins which mark the line of the water-shed from Pennsylvania to Michigan, and they have been described, and their origin explained, in the

chapter on 'Physical Geography.' When a resident of Summit County, I mapped and visited nearly one hundred of these little lakes within a circle of twenty miles radius drawn around Cuyahoga Falls. Aside from the variety and beauty which these lakelets give to the surface, they afford many objects of scientific interest. They are usually stocked with excellent fish, and many rare and peculiar plants grow in and about them. They also contain great numbers of shells, some of which are rare. Springfield Lake, for example, is the only known locality of *Melania gracilis*, and Congress Lake contains two species of *Limnaea* (*L. gracilis* and *L. stagnalis*), both of which are found in few, if any, other, localities in the State. Many of these are being gradually filled up by a growth of vegetation that ultimately forms peat. In all those lakes where the shores are marshy and shake under the tread, peat is accumulating. We have evidence, too, that many lakelets have been filled up and obliterated by this process; for we find a large number of marshes in which there is now little water, but the surface is underlaid by peat and shell marl, sometimes to the depth of twenty or thirty feet. Every township contains more or less of these, and some of them are quite extensive. The larger ones are usually known as whortleberry swamps or cranberry marshes, sometimes as tamarack swamps, from the growth of larch which frequently covers the surface. Among the largest of these is that west of Hudson, on Mud Brook, in which the peat is fifteen feet deep. Another lies east of Hudson, near the county line. In Stow, on Mud Brook, is a long peat swamp, in which the peat is not less than thirty feet deep. In Coventry is one in which the peat is said to be thirty or forty feet deep, and from this considerable peat of excellent quality has been manufactured by J. F. Brunot. These peat bogs have excited some interest as possible sources of supply of fuel, and yet, where coal is as cheap and good as in Summit County, it seems hardly probably that peat can be profitably employed as a fuel. The best of peat, when air-dried, contains nearly 20 per cent of water and 20 per cent of oxygen, and has a heating power not greater than half that of our coals, while it occupies double the space. Hence, unless it can be produced at half the price of coal in the markets of Summit County, it can hardly compete with it. Peat is, however, an

excellent fertilizer, and many, even of the smaller peat bogs, may be made very valuable to the agriculturist. In some localities, such deposits of peat have been cleared up and cultivated for many years, without a suspicion that there was anything of interest or value below the surface. Deposits of shell marl are frequently found underlying peat in 'cat swamps' and filled-up lakelets. This marl is composed of the remains of the shells of mollusks, which, after the death of the animals that inhabited them, have accumulated at the bottom of the water. In some instances, these marls are white, and nearly pure lime; in others they are mixed with more or less earthy and vegetable matter. Such deposits occur in nearly every township in the county, but they have attracted little attention, and their valuable fertilizing properties have been very sparingly made available. The deposit of shell marl on the road between Hudson and Stow, on land of Charles Darrow, is at least twelve feet deep and very pure. Similar marl-beds, though less extensive, are known in Hudson, Northampton and other parts of the county. Usually a sheet of peat or muck covers the marl, and it is not likely to be discovered, unless by ditching or special search. The simplest method of exploring marshes for peat or shell marl is with an auger made from an old two-inch or three-inch carpenter's auger welded to a small, square rod of iron, on which a handle is made to slide, and fasten with a key. With this all marshes may be probed to the depth of eight or ten feet with the greatest facility.

"The Erie shale is the lowest formation exposed in Summit County, and is visible only in the bottom of the valley of the Cuyahoga, where it is cut deepest, in the township of Northfield. About one hundred feet of the upper portion of the Erie shale is exposed in the cliffs which border the river, being a continuation of the outcrops which have been fully described in the report on the geology of Cuyahoga County. The same fossils have been found in the Erie shale in Northfield, as those collected in the valleys of Chippewa and Tinker's Creeks.

"The Lower Carboniferous or Waverly group is freely opened in the valley of the Cuyahoga, and we here find some of the most satisfactory sections of this formation that can be seen in the State. It has also yielded, perhaps, as large a number of fossils in Summit County as

have been obtained from this group in any other localities. The Cleveland shale is the bituminous shale which forms the base of the Waverly group, and has been fully described in the reports on the counties which form the northern border of the State. The outcrops of the Cleveland shale which are visible in the valley of the Cuyahoga are continuations southward of those noticed in Cuyahoga County. As the dip of all the strata is here gently southward, and the valley gradually deepens toward its mouth, the Cleveland shale, though on the north line of the county more than 100 feet above the bed of the stream, sinks out of sight near Peninsula, less than ten miles from the county line. The average thickness of the Cleveland shale in Summit County is about fifty feet, and it presents precisely the same lithological characters here as farther north. No fossils have been discovered in it at the localities where it has been examined in this county, but more careful search would undoubtedly result in the discovery of the scales and teeth of fishes similar to those found at Bedford. As in Trumbull, Cuyahoga and Medina Counties, the outcrops of the Cleveland shale in Summit are marked by oil and gas springs, which are plainly produced by the decomposition or spontaneous distillation of the large amounts of carbonaceous matter it contains. The oil and gas springs which have been noticed on the sides of the Cuyahoga Valley at and below Peninsula, are distinctly connected with the Cleveland shale, and have, as a consequence, misled those who have been influenced by them to bore for oil in the bottom of the valley.

The Bedford shale, a member of the Waverly group, is not well exposed in the valley of the Cuyahoga, though visible at a number of localities. It outcrops usually from slopes covered with debris. Where the limits of the formation are concealed, judging from the glimpses obtained of it, the Bedford shale is apparently about seventy feet thick in the valley of the Cuyahoga, and consists mainly of soft, blue, argillaceous strata, similar to those in the gorge of Tinker's Creek, at Bedford. In some localities it is more or less red, and has been here, as elsewhere, used as a mineral paint. In the valley of Brandywine Creek, below the falls, the Bedford shale is fossiliferous, and contains the same species found at Bedford.

Among these, *Syringothyris typa* is the most conspicuous and abundant, and slabs may be obtained here which are thickly set with this fine fossil, forming beautiful specimens for the cabinet.

The Berea sandstone is well exposed in the valley of the Cuyahoga in the northern part of the county, and forms two lines of outcrop—one on each side of the river—running from Peninsula to Independence on the west, and to Bedford and Newburg on the East. At Peninsula, the Berea grit has been extensively quarried for many years. The base of the formation is here from thirty to sixty feet above the canal, so that the quarries are worked with facility, and their product shipped with comparatively, little expense. The entire thickness of the formation in the valley of the Cuyahoga is about sixty feet. The stone it furnishes varies considerably in character in the different localities where it is exposed. At the quarries of Mr. Woods, at Peninsula, it is lighter in color than at Independence, resembling the Berea stone in this respect, as also in hardness. Some layers are nearly white, and a large amount of excellent building stone has been shipped from this locality and used for the construction of various public buildings at Cleveland, Detroit, Buffalo, Oswego, etc. This stone is more firm and durable, but is harder and less homogeneous than that from the Amherst quarries; it is, however, so highly esteemed, that a ready market has been found for all that has been taken from the quarries. During 1871, the stone shipped from Peninsula was equal to 2,800 car loads of ten tons each. Between Peninsula and the county line, the outcrops of the Berea grit have been but imperfectly explored. They are much obscured by the debris of the higher portion of the cliffs, and the examinations necessary to determine the value of the stone would require the expenditure of considerable time and money. There is every probability, however, that good quarries could be opened at a great number of localities, and I think that I am quite safe in predicting that in future years this portion of the valley of the Cuyahoga will be the theater of a very active industry growing out of the quarrying of Berea grit for the Cleveland market. Should the railroad, now proposed, be constructed through the valley, this, with the canal, will supply such facilities for transporta-

tion, that, if the quality of the stone should be found suitable, this district will contribute as largely as any other to the market of the great lakes. From the differences which are everywhere exhibited in the quality of the stone in neighboring outcrops of the Berea grit, the banks of the Cuyahoga should be carefully examined, in order to discover such localities as will furnish stone of a superior quality. It is not too much to expect that some of these will have great pecuniary value. The Berea grit forms the solid stratum that produces the falls of the Brandywine at Brandywine Mills, and it is here considerably more massive than at the outcrops further north on the same side of the Cuyahoga. No fossils have been found in the Berea grit in Summit County. It is elsewhere, as a general rule, remarkably barren, and yet, at Chagrin Falls, fossil fishes have been obtained from it, and at Bedford a *Discina*, a *Lingula* and an *Annularia*. These, and perhaps other fossils, may hereafter be met with in the Cuyahoga Valley.

"The Cuyahoga shale is the upper division of the Waverly group, and is better exhibited in Summit County than in any other part of the State. It has a thickness of from 150 to 200 feet, and has been given the name it bears, because it forms the greater part of the banks of the Cuyahoga, from Cuyahoga Falls, to the north line of the county. A short distance above Peninsula, the Berea grit sinks beneath the river, and the whole thickness of the Cuyahoga shale is revealed in the interval between that rock and the Conglomerate which caps the bluffs. In this part of the valley, the Cuyahoga shale exhibits little variety in composition, and consists of a mass of soft argillaceous material, inter-stratified with thin and local sheets of fine grained sandstone, rarely thick enough to serve as flagging. The surfaces of these sheets are marked with mud furrows, and, occasionally, with the impressions of fucoids. At the 'Big Falls' of the Cuyahoga, eighty feet below the conglomerate, a number of layers of fine-grained sandstone, from six to twelve inches in thickness, and occupying a vertical space of about twenty feet, locally replace the softer material of the Cuyahoga shale, and produce the beautiful waterfall at this locality. These harder strata may be traced for a mile or more down the river, but are not distinguishable in the sections of the

Cuyahoga shale in the northern part of the county. The sandstone of the Big Falls is a compact, homogeneous rock, almost identical in character and utility with the 'blue stone' of the East Cleveland quarries, although lying at a considerably higher level; the East Cleveland stone being a local modification of the lower portion of the Bedford shale. The upper part of the Cuyahoga shale near the Big Falls, has furnished a great number of fine specimens of 'cone-in-cone,' and they are referred to by Dr. Hildreth, in his notes on Cuyahoga Valley, published in *Siliman's Journal* in 1836. This singular structure has given rise to much speculation; it was, at one time, supposed to be organic; subsequently, the result of crystallization, and it is now considered by Prof. O. C. Marsh as of purely mechanical origin. The 'cone-in-cone' consist, as is well known, of a series of hollow cones, like extinguishers, placed one within another, and it sometimes makes up the entire mass of a stratum, several inches in thickness and many feet in lateral extent. It is by no means confined to this horizon, but is found in the older paleozoic rocks, in the coal measures, and is, perhaps, more abundant than anywhere else, in the cretaceous formation in the far West. This structure is apparently confined to rocks of a peculiar chemical composition, viz.: to earthy limestones, or argillaceous shales impregnated with lime. The concretions, which include the great fishes of the Huron shale, not unfrequently exhibit the 'cone-in-cone' structure, and, in some instances, where the calcareous material forms simply a crust on the fossil, that crust still shows more or less of it. From the locality under consideration, in the valley of the Cuyahoga, I have obtained specimens of 'cone-in-cone' enveloping nodules of iron ore, and radiating in all directions from such nuclei. Specimens of this character, and the bones of *Dinichthys*, coated in all their irregularities, with 'cone-in-cone,' seemed to me incompatible with the theory that this structure is the product of mechanical forces, and appear rather to confirm the conclusion that it is an imperfect crystallization. Throughout most of its mass, and in most places, the Cuyahoga shale is very barren of fossils. This, however, is fully compensated for by the extreme richness of some layers and some localities. This is the rock which was excavated in the formation of the canal in the valley of the

Cuyahoga, below the falls, and through which an effort was made to conduct the water of the river to the proposed town of Summit. In this excavation, the formation was fully opened for several miles, and yet, with the most careful search, at various times during the progress of the work, I was only able to obtain a mere handful of fossils. At the base of the formation, however, immediately over the Berea grit, the Cuyahoga shale is sometimes crowded with millions of *Lingula melia* and *Discina Newberryi*. The same species also occur at the 'Big Falls' of the Cuyahoga, and the valley of the Little Cuyahoga, near Akron. In the upper part of the Cuyahoga shale, in various parts of Medina County, and at Richfield, in Summit County, immense numbers of fossils are found, and those which form a long list of species. The Richfield locality is already quite famous, as extensive collections were made there before the commencement of the present survey by Messrs. Meek & Worthen and Dr. Kellogg. Quite a large number of crinoids were discovered here by the latter gentleman, which proved new to science, and were described by Prof. James Hall.

"The carboniferous conglomerate underlies all the higher portions of the county, and forms the surface rock over all the middle and northern portions, except where cut through by the Cuyahoga and its tributaries. Though generally covered and concealed by beds of drift, the conglomerate is exposed and quarried in all of the townships north of Akron. It is, however, best seen in the valley of the Cuyahoga, where it forms cliffs sometimes 100 feet in perpendicular height. The rock is about 100 feet in thickness, generally a coarse-grained, light drab sandstone, but in some localities, and especially near the base of the formation, becoming a mass of quartz-pebbles, with just enough cement to hold them together. There are also some local bands of the conglomerate which are red or brown in color, and furnish a building-stone of great beauty. At Cuyahoga Falls, such a band has been quarried for many years, and has been used for the construction of the best buildings in the town. This stone is brown, contains much iron, and is very strong and durable. At Akron, a similar local stratum in the conglomerate at Wolf's quarry, has a deep, reddish-purple color, and forms, perhaps, the most beautiful building-stone in the

State. This has been quite extensively used in Cleveland. Unfortunately, the quantity of this variety of building stone is not large. Its peculiar color is probably due to the fact that the iron of which it contains a large quantity, is in the condition of anhydrous sesquioxide, and has associated with it a small percentage of manganese. Splendid sections of the conglomerate are seen in the gorge of the Cuyahoga, below Cuyahoga Falls. Here, nearly the entire thickness of the formation is exposed, and vertical and overhanging walls of 100 feet in height give great variety and beauty to the scenery. In descending the valley of the Cuyahoga, the walls of conglomerate recede from the river, of which the immediate banks are formed by the underlying shales. By the washing out of these, the blocks of conglomerate have been undermined and thrown down, and thus the valley has been widened until in Boston and Northfield the conglomerate cliffs are several miles apart. They still preserve their typical character, however, and this is well exemplified by the 'ledges' in Boston, which—like those of Nelson, in Portage County, on the other side of the conglomerate plateau—are favorite places of resort to the lovers of the picturesque. The fossils of the conglomerate are exclusively plants. These are generally broken and floating fragments, but are exceedingly numerous, their casts often making up a large part of the rock. In certain localities we find evidence that they have been gathered by the waves into some receptacle, and heaped up in a confused mass, like driftwood on a shore at the present day. Since the conglomerate is composed of coarse materials which could be only transported by water in rapid motion, it is evident all delicate plants would be destroyed from the trituration they would suffer in the circumstances of its deposition; hence, we only find here the remains of woody plants, and of these usually only fragments. The most common plants are trunks and branches of *Lepidodendron*, *Sigillaria* and *Calamites*, also the nuts which have been described under the name of *Trigonocarpon*. Of all these, the *calamites* are the most common, and they are sometimes entire, showing not only the upper extremity but also the roots. More frequently, however, they are broken, and it is not at all uncommon to find the nuts to which I have referred, in the interior of a calamite, indicating that when floating about

they were washed into the hollow, rush-like stem. Generally, the plants of the conglomerate are represented simply by casts; their carbonaceous matter having been entirely removed. Occasionally, however, a sheet of coal is found, surrounding the east of each, and in some localities every plant is preserved in this way, the amount of coal enveloping the casts corresponding to the quantity of woody matter in the plant. Still more rarely, when many plants have accumulated, their carbon has made an irregular coal seam, but never exceeding a few inches in thickness, and a few rods or feet in extent. These coal seams, however, differ in many respects from coals of the overlying coal measure, as they have no underclays, are very limited in extent, and evidently represent heterogeneous collections of drifted, woody matter. The pebbles of the more pebbly portions of the conglomerate are sometimes as large as one's fist, but more generally range from the size of a hickory nut to that of an egg. They are most always composed of quartz, but in every locality where they are abundant, more or less of them may be found which are composed of quartzite or silicious slate, which shows lines of stratification. Sometimes these quartz pebbles, when in contact with the impressions of plants, are distinctly marked by such impressions. This circumstance has given rise to the theory that they are concretionary in character; *i. e.*, that they have been formed where found, and are not fragments of transported quartz rock. There can be no question, however, that these pebbles are portions of quartz veins, which have been brought hundreds of miles from some area where metamorphic crystalline rocks have suffered erosion. In process of transportation, the attrition to which these fragments were subjected, comminuted all but the most resistant, *viz.*: the quartz. The banded, silicious slates which are represented in the pebbles that accompany those of pure quartz, as well as the internal structure of the quartz-pebbles themselves, afford conclusive evidence that their origin is such as I have described. * * * *

"All the southern part of Summit County is underlaid by the productive coal measures, and workable seams of coal are known to exist in Tallmadge, Springfield, Coventry, Norton, Copley, Franklin and Green Townships. The line of the margin of the coal basin passes from

Portage County into Summit in the northeastern portion of Tallmadge. It then runs westerly nearly to Cuyahoga Falls, and then sweeps round to inclose what is known as Coal Hill; the continuity of the coal measures being severed by 'Long Swamp' and the valley of Camp Brook. On the east side of this stream, the outcrop of the coal rocks passes southward to the valley of the Little Cuyahoga; turning up this to the line of Portage County; thence sweeping back on the south side of the valley across the township of Springfield to the vicinity of Middlebury. It thence runs southwesterly to New Portage, where it crosses the Tuscarawas and strikes northwesterly through Norton and the corner of Copley to the Medina line. There is also a narrow patch of coal-measure rocks forming an isolated hill (Sherbondy Hill) southwest of Akron, on the west side of Summit Lake. Along the line I have traced, we find the outcroppings of only the lowest coal seam—Coal No. 1 (the Briar Hill coal)—and this not with any great constancy, inasmuch as the coal occupies limited basins, and their margins are exceedingly sinuous and irregular. A large part of the territory which holds the place of the coal, fails to hold the coal itself, from one or the other of two causes, which frequently disappoint the miner in this region, as well as in the valley of the Mahoning. These causes are: First, that the lowest seam was formed from peat-like carbonaceous matter which accumulated on the irregular bottom of the old coal marsh, and the margin of this marsh ran into innumerable bights and channels, which were separated by ridges and hummocks where the coal was never deposited; second, in many localities where the coal was once found, it was subsequently removed by erosion. The heavy bed of sandstone which lies a little above Coal No. 1, was deposited by currents of water moving rapidly and with such force as to cut away the coal in many channels, and leave in its place beds of sand, which, subsequently hardened, have become sandstone. These are frequently encountered by the miner, and are designated by him, as *horsbacks*. Hence this excellent stratum of coal has been discovered to be wanting over much of the area where it was supposed to exist, and has therefore been of less value to Summit County than was anticipated in the earlier days of coal mining. The first mineral coal used on the lake

shore was sent to Cleveland by my father, Henry Newberry, from his mines in Tallmadge, in 1828. It was there offered as a substitute for wood in the generation of steam on the lake boats. Wood, however, was so abundant, and the population was so habituated to its use, that it proved very difficult to supplant this by any other fuel; and it was necessary that nearly twenty years should pass before the value of the coal beds of Summit County was fully realized. Then coal-mining began with real vigor, and many thousand tons of excellent coal have since been sent every year to Cleveland from the mines in Tallmadge and Springfield. As has been stated, the coal of these townships proved to be very irregular in its distribution, and variable in thickness and quality. It is restricted to basins of limited extent, and is wanting over much of the area where it was supposed to be present. In the deeper portions of the basins or channels it occupies, the seam is from four and one-half to six feet in thickness, and the coal a bright, handsome open-burning variety, containing little sulphur, and a small percentage of ash. It is softer and more bituminous than the coal of the same seam in Mahoning and Trumbull Counties, but is still capable of being used in the raw state in the furnace, and is very highly valued both as a steam coal and a household fuel. In the southern part of the county, Coal No. 1 is more continuous, and has been proved, by recent researches to exist over a large part of Springfield, Franklin and Green, and to reach into Coventry and Norton. Many mines have been opened in the townships referred to, and about two hundred and fifty thousand tons are now sent from this region annually to Cleveland. Most of this coal is similar in quality to that of Tallmadge, but in some localities, as at Johnson's shaft in Franklin, we find a recurrence of the block character, which distinguishes the coal of the Mahoning Valley. In former years, nearly all of the coal used or exported from the county, was mined in Tallmadge, and this mainly from 'Coal Hill,' which lies between the center of Tallmadge and Cuyahoga Falls. Several mines were once in active operation in this hill. Of these mines, that of Henry Newberry was situated at the north end of the hill, and those of Dr. D. Upson, Asaph Whittlesey and Francis Wright on the east side. On the opposite side of the valley, mines were opened

by Mr. D. Harris and Dr. Amos Wright. In all these mines the coal has been nearly exhausted, as it was found to rise and run out in the interior of the hill. From this fact, a belief has come to be quite general, that the coal is pinched out in the body of this and other hills, by the weight of the superincumbent material; whereas, we have here only an instance of what has been before referred to, of the thinning out of the coal on the margin of the old coal swamp. In the central and eastern portion of Tallmadge, most of the land rises high above the coal level, and basins of coal will doubtless be hereafter discovered there, but the same causes which have rendered coal mining so uncertain heretofore, will undoubtedly limit the productiveness of the nominally large coal area which is included within the township lines. In the southern part of Tallmadge, the surface is occupied by heavy beds of drift, by which the underlying geology is very much obscured. Here, as in the adjoining township of Brimfield, in Portage County, nothing but patient and careful search will determine the limits of the basins of coal which unquestionably exist in this vicinity. As the dip of the coal rocks is toward the south and east, in Springfield, Green and Franklin, Coal No. 1 lies lower than in the more northerly townships where it occurs; hence it can only be reached by boring, and that sometimes to the depth of 100 feet or perhaps even 200 feet. We have every reason to believe, however, that a considerable area in Green Township is underlaid by Coal No. 1, where it lies far below drainage; and it is almost certain that careful search, by boring, will reveal the presence of basins of coal in this township, such as are not now suspected to exist, and such as will contribute largely to the wealth of the county.

"In Summit County the lowest seam of coal is usually separated from the conglomerate by an interval of from twenty-five to fifty feet, which is filled with shale or shaly sandstone, and, immediately beneath the coal, by a seam of fire-clay, from two to six feet in thickness. This fire-clay is, in some places, of good quality, and may be used for fire-brick and pottery, but it is generally more sandy and contains more iron than the under-clay of the higher seam—Coal No. 3—to which I shall have occasion to refer again. Coal No. 1 is usually overlaid immediately by gray shale, from ten

to forty feet in thickness. This shale contains, especially where it forms the roof of the coal, large numbers of fossil plants, which are frequently preserved in great beauty and profusion. About 150 species have already been collected from the shale of Coal No. 1, in the northern part of the State, and nearly all of these are found in Summit County.

“Coal No. 2 is found thirty to fifty feet above Coal No. 1 in many parts of Summit County—as in the Valley of the Mahoning—the second seam of coal in the ascending series, and which we have called Coal No. 2. It is usually from twelve to eighteen inches in thickness, and, though persistent over a large area, is nowhere in Summit County of workable thickness. Above Coal No. 2, and frequently cutting it out, is a bed of massive sandstone, which is a marked feature in the geology of the county. This is well seen in Coal Hill, Tallmadge, and extends through the southern part of the county, passing through Stark, where, in the valley of the Tuscarawas, about and above Massillon, it is quarried in many places along the bank of the canal. The thickness of this sandstone varies very much in different localities, and it may be said to range from forty to one hundred feet. It is also somewhat variable in character, but is often massive, and affords a building-stone of excellent quality. It may generally be distinguished from the sandstones of the carboniferous conglomerate by the absence of quartz pebbles. So far as I know, no pebbles are found in the sandstone over the coal in Summit County. In Trumbull and Medina there are some local exceptions to this rule, for patches of conglomerate are sometimes found there immediately overlying the lowest coal seam. In Summit County the ‘pebble rock,’ found in the explorations for coal, affords infallible evidence, when it is reached, that the horizon of the coal has been passed.

“Coals Nos. 3 and 4 come next in order. Near Mogadore, in Springfield Township; the higher lands are found to be underlain by a stratum of limestone, beneath which are usually a thin seam of coal and a thick stratum of fire-clay, the latter supplying the material from which nearly all the stoneware of the county is manufactured. From twenty-five to forty feet above the limestone to which I have referred, is another, which also overlies a coal seam. Both these may be seen in Green

Township, between Greenburg and Greentown, and they may be traced thence southerly, through Stark, Tuscarawas and Holmes Counties, and, indeed, nearly or quite to the Ohio River. These are the limestone coals that will be found frequently referred to in the reports on the counties that have been mentioned, and those on Portage, Trumbull and Mahoning. The lowest of these limestones lies from 130 to 160 above Coal No. 1; the upper limestone about 150 to 200 feet. Hence they will serve as useful guides in boring for the lower coal seam in those parts of the county where it lies considerably beneath the surface.

“I have already alluded to the former productiveness of the coal mines of Tallmadge, and have mentioned the fact that most of these mines are now abandoned; the basins of coal in which they were located having been practically exhausted. Considerable coal is, however, still produced in the township, and it is altogether probable, that with proper search, other basins will be discovered, from which its coal industry will be revived. The ‘Centre’ and a large area north, south and east of it, lie considerably above the coal level, and as the dip is southeast, there are some localities where the horizon of the coal is nearly one hundred and fifty feet below the surface. Over most of the district I have mentioned, borings should be made to at least the depth of one hundred feet before the search is abandoned. It should be remembered, too, that the basins of Coal No. 1 are frequently narrow, and the territory will only be fairly tested by borings made at frequent intervals. The principal center of coal industry in the county at present, is in Springfield and Coventry. Steer’s Mine, the mines of the Brewster Coal Company, and Brewster Brothers, and the Middlebury Shaft—all located near the line between the above mentioned townships—are now producing a large quantity of coal for shipment to Akron and Cleveland. The maximum thickness of the coal seam here is about five feet, and it thins out on all sides toward the margin of the basin. Doubtless here, as elsewhere, the basins of coal are connected, and future explorations will result in tracing such connection south and east into other important deposits. * * * * *

“At the Franklin Coal Company’s mine, in the Northern part of Franklin, the coal is four and a half feet thick, of good quality, closely

resembling that obtained at Massillon. It lies from sixty to one hundred feet below the surface, the massive sand rock above it ranging from forty to fifty feet in thickness. In the southwest corner of Franklin Township, the coal where opened is not as thick or as good as in the last-mentioned localities. At Steer's new shaft in Coventry, the coal is 4½ feet thick, 90 to 110 feet from the surface, overlaid by 15 feet of black shale and from 30 to 40 feet of sandstone. Little coal has yet been mined here, but it seems to be of excellent quality. A section taken near the north line of Franklin Township includes the following strata :

1. Sandstone.....40 to 60 feet.
2. Shale.....20 to 30 feet.
3. Hard iron ore..... 1 foot.
4. Coal..... 4½ feet.

“On the land of Mr. Thomas Britton, one and a half miles east of Middlebury, is an important deposit of iron ore, which I refer, with some hesitation, to the horizon of Coal No. 1. The drift from which the ore is taken exposes four feet of rock, which includes a thickness of about two feet of ore. Sherbondy Hill, west of Akron, is capped with the coal rocks, but gives no indication of any valuable deposit of coal. A band of iron ore, similar in character to that referred to above, but thinner, is exposed in this locality. A sheet of the coal measures underlies the surface in the west part of Norton Township, and a small area in Copley, but up to the present time no important coal strata have been found there. A boring made half a mile north of the center of Norton revealed the following section :

1. Earth17 feet.
2. Shale.....16 feet.
3. Conglomerate.....75 feet.

All the borings made for coal in the township give similar results, the conglomerate being struck after passing through a thin bed of coal shale.

“The fire-clay which underlies Coal No. 3 has already become one of the important elements of wealth to the county. This deposit, in parts of Summit County, is of unusual thickness and purity, making excellent stoneware and fire-brick. It is estimated that there are produced from this stratum of clay in Springfield Township alone, about one and a half millions of gallons of stoneware each year; and a very large amount of the material is transported into other parts of the county and State. It is of interest

to notice in this connection that this bed of fire-clay is the same with that worked at Atwater, in Portage, and still more extensively in Columbiana County. Over how large an area in Summit County it maintains the dimensions and excellence it exhibits in Springfield, we have, as yet, no means of knowing. At East Liberty it is apparently of good thickness and quality, but in central and southern Stark County—where exposed in the valleys of the Nimshillen and Sandy—it is of less value. The Springfield clay is eminently plastic, and hence better fitted for stoneware than fire-brick, but by mixing it largely with sand, and, still better, with the hard clay of Mineral Point, Mr. J. Parke Alexander, of Akron, has produced fire-brick scarcely inferior in quality to any other made in the State, or even any imported. To get the best results with this clay alone, in making fire-brick, it should be first ground, made into a paste, and this burned, then again coarsely ground and the fragments cemented with one-sixth to one-tenth of fresh plastered clay, molded and burned again.

“The following analyses will give additional information in regard to the useful minerals of this county. They were made by Dr. Wormley, State Chemist, with the exception of No. 4, which was made by Prof. W. W. Mather :

1. Peat—Coventry Peat Company, Coventry.

The foregoing comprises the geology of Summit County, together with its coal deposits and mineral resources. Closely connected with the geology of a country is the science of agriculture. Indeed, "the geology of a country," it has been truthfully said, "determines the character of the industrial vocation of the inhabitants of that country." In accordance with the geological formations, mining, farming, herding flocks, manufacturing, or even fishing, becomes the prominent industry. "From the connection of geology with agriculture, mining and manufactures, it may be said that in its different branches this science lies at the foundation of our modern civilization, inasmuch as the occupations, the wealth and power of communities and nations, in many, we may, perhaps, say in most, instances, depend directly upon the character, structure and resources of that portion of the earth which they inhabit."* From the

* State Report.

wealth, then, of Mother Earth, we draw our sustenance, and when we have run out our span of life, we return to her sheltering bosom.

"Where is the dust that has not been alive?
The spade, the plow, disturb our ancestors;
From human mold we reap our daily bread."

It is said that the agriculture of the State of Ohio may be regarded, in a general sense, as "being of a mixed character." The same may very truthfully be said of Summit County. Its agricultural resources are not only extensive, but the adaptability of the soil in the different sections of the county to agriculture, is to be found in but few counties of the State. In the southern part, wheat is the main staple; in the central and northern portions, grazing, perhaps, predominates, while corn is extensively grown. In the last State Agricultural Report, we find, pertaining to Summit County, the following statistics:

Wheat, 25,955 acres, yielding 518,979 bushels; rye, 352 acres, yielding 5,150 bushels; oats, 14,284 acres, yielding 542,382 bushels; barley, 63 acres, yielding 14,010 bushels; corn, 15,422 acres, yielding 1,077,945 bushels; timothy, 22,788 acres, yielding 31,951 tons of hay; clover, 4,882 acres, yielding 6,910 tons of hay. While much attention is devoted to stock-raising, the breeding of fine stock is not carried to that extent that it is in many sections of Ohio. More attention is given to cattle and sheep than to other stock, and to the two (cattle and sheep) the former is considered of more value in this community, and the dairy business is one of the largest interests of the agricultural class, not only of Summit County but of the Western Reserve. From the State Report above quoted, we extract the following of this county: "Number of cattle, 24,348, value, \$364,184; number of pounds of butter, 775,915; number of pounds of cheese, 1,389,735." The same report has the following in regard to the dairy business of the Reserve: "Already, complaints are made that dairy farming is deteriorating the soil, but this complaint can scarcely be well founded, or, if well founded, must have reference more to the mechanical than the chemical condition of the soil. Soils very similar, geologically considered, have been pastured and tilled in England since the days of the Saxon heptarchy, and no recuperating process practiced until within the past hundred years, and yet these British soils were at no

time barren. There is no distinctive breed of cattle recognized on the Reserve as being peculiarly a dairy breed, but those in highest favor are generally a cross breed, such as short-horn or Devon crossed on the 'native.' * * * The factory system of cheese-making was introduced some years since, and has proved eminently successful. Having no reliable statistics at hand, there is no hazard in stating that there are fully one hundred and fifty factories in active operation at the present time." Our space, however, will not admit of an extended notice in this connection, but the subject will be alluded to again in the several township histories. In addition to the cattle statistics of the county from the same report, we gather the following: Number of horses, 8,552, value, \$469,010; number of mules, 179, value, \$8,750; number of hogs, 11,577, value, \$32,220; number of sheep, 24,965, value, \$58,817; number of pounds of wool shorn, 75,168.

Without going further into this branch of the subject, we will now give place to the following interesting sketch of the Agricultural Society of Summit County, prepared especially for this work by S. A. Lane, Esq., and which will be found of value to our readers:

The loss, by fire, of the records pertaining to the Agricultural Society matters of Summit County prior to 1859, made the task of collating the proper materials for the commencement of this chapter somewhat difficult, there being radical differences in the recollections of the several living participants upon whom the writer called for information. By a patient search of the files of the *Summit County Beacon* of those days, though its columns were far less prolific of local news than now, we have been able to present to the reader a reliable, if not a very attractive, resumé of the matters proper to be here treated of. Though for some years there had been a growing interest in the subject throughout the State, and, under the fostering care and aid given thereto by the Legislature of Ohio, a State Agricultural Society, and quite a number of county societies, had been organized previous to that date, the first move looking to the organization of a society in Summit County, was in 1849. From his position as Auditor of the county, N. W. Goodhue, Esq., had abundant opportunity to ascertain the views of the people of the county upon the subject, and, believing, after consultation

with Col. Simon Perkins and others, that a favorable and hearty response would be made thereto, on the 31st day of October, 1849, Mr. Goodhue caused to be published in the *Beacon* the following notice:

AGRICULTURAL MEETING.

I. N. W. Goodhue, Auditor of Summit County, Ohio, hereby give notice that a public meeting will be held at the court house, in Akron, on the 14th day of November next, at 2 o'clock, P. M., for the purpose of perfecting the organization of a County Agricultural Society, the preliminary steps contemplated in the act of March, 1839, having been already taken.

NATH'L W. GOODHUE,
County Auditor.

Auditor's Office, Summit Co.,)
Akron, October 31, 1849. }

An editorial in the same issue of the *Beacon* thus calls attention to the above notice:

Attention is called to the notice of the Auditor, in another column, issued in pursuance of law, for an agricultural meeting on the 14th proximo. We rejoice that a move has been made in the matter, by the agriculturists of Summit County. The neighboring counties have their agricultural associations in successful operation. They have seen and felt the advantages flowing from them. And while the whole State seems to be awakening to a new interest, and searching after an improved agriculture, it would be mortifying to see the experienced and enterprising farmers of Summit County asleep. Speed the plow! Let the good work go forward in earnest!

In the *Beacon* of November 21, 1849, appears the following official report of the proceedings of this preliminary meeting:

AGRICULTURAL MEETING.

Agreeably to public notice, previously given, a large number of gentlemen met in the court house in Akron, at 2 o'clock P. M., November 14, 1849, for the purpose of perfecting the organization of a County Agricultural Society. The meeting was called to order by the County Auditor. A temporary organization was had by appointing Capt. Amos Seward, President; H. G. Weaver, Vice President and Nathaniel W. Goodhue, Secretary. After the object of the meeting had been stated, the Chair, on motion, appointed a committee of five to report a constitution and code of by-laws for the government of the society, consisting of Lucius W. Hitchcock and William A. Hanford, of Tallmadge; Talman Beardsley, of Coventry; Sylvester H. Thompson, of Hudson, and John Hoy, of Franklin. On motion, a committee of one from each township was appointed to procure members to the society as follows: Bath, William Hale; Boston, Hiram V. Bronson; Copley, Jonathan Starr; Coventry, Avery Spicer; Franklin, John Hoy; Green, Alexander Johnston; Hudson, Van R. Humphrey; Northamp-

ton, Reese Jones; Northfield, John C. Wallace; Norton, Henry Van Hynning; Portage, Lucius V. Bierce; Richfield, Isaac T. Welton; Springfield, Henry G. Weaver; Stow, Edwin Wetmore; Tallmadge, Samuel Treat; Twinsburg, Lyman Chamberlain; Akron, Lucius S. Peck; Middlebury, Nathaniel W. Goodhue; Cuyahoga Falls, Henry Wetmore; Hudson, Sylvester H. Thompson.

On motion, Lucius V. Bierce and Van R. Humphrey, Esqs., were requested to deliver addresses at the next meeting.

On motion, ordered that the proceedings of the meeting be published in the several papers of the county. On motion, adjourned to meet in the courtroom on Wednesday, the 28th inst., at 10 o'clock A. M.

AMOS SEWARD, *President*.
H. G. WEAVER, *Vice President*.
N. W. GOODHUE, *Secretary*.

From a postscript attached to the foregoing report, it is learned, that at this meeting, about seventy names were presented for membership. In the *Beacon* of December 5, 1849, is found the full report of the second meeting of the embryo society, as follows:

AGRICULTURAL MEETING.

The Summit County Agricultural Society met November 28, at 1 o'clock P. M., pursuant to adjournment, and was called to order by Capt. Amos Seward, Chairman. In the absence of Henry G. Weaver, Vice President, Milo Stone, Esq., of Tallmadge, was chosen Vice President.

On motion, a committee of one from each township represented, was appointed by the Chair, to recommend officers for the society.

Committee appointed at former meeting, reported a constitution for the society, as follows:

"ARTICLE 1. This society shall be called the Summit County Agricultural Society.

"ART. 2. The officers of this society shall consist of a President, Vice President, Secretary, Treasurer and five managers, who, together, shall constitute a Board of Directors for the general management of the affairs of the society; they shall be elected annually by the members of the society, and hold their offices until their successors are appointed. The President shall preside at all meetings of the society, and of the Board of Directors; sign orders on the Treasurer for awards of premiums and other appropriations of the Board of Directors. The Vice President, in the absence of the President, shall be the presiding officer of the society and Board. The Secretary shall keep an accurate record of the proceedings of the society, and of the Board of Directors; attend to correspondence ordered by the Board, and report annually to the State Board of Agriculture. The Treasurer shall receive the funds of the society, and pay them in accordance with the awards of the committees on premiums, and the votes of the Board of Directors, upon the order of the President, and shall, at the annual meeting, render a full account of his doings. The Board of Directors shall meet at the call of the

President; a majority shall constitute a quorum for the transaction of business, and the Board shall have power to transact all business for the society, that shall not conflict with this instrument.

"ART. 3. Members of this society must be residents of this county, and pay \$1 annually to the Treasurer of the society.

"ART. 4. All competitors for premiums must be members of the society.

"ART. 5. A list of the premiums offered by the society must be printed in the several newspapers published in the county, at least one month previous to the day of exhibition.

"ART. 6. All articles offered for premiums must be owned by the persons offering the same, or by members of their families, and products of the soil, or manufactured articles, must be produced or manufactured within the county.

"ART. 7. Premiums on grain and grass crops shall not be awarded for less than one acre.

"ART. 8. The awarding committees shall consist of three persons each, and shall be annually appointed by the Directors of the society.

"ART. 9. The annual exhibition of the society shall be held between the 1st day of September and the 1st day of November in each year, of which notice shall be given with the list of premiums offered.

"ART. 10. The annual meeting of this society shall be at the court house, on the third Wednesday in November of each year, at 10 o'clock A. M., at which time officers of the society shall be chosen.

"ART. 11. This Constitution may be amended at any regular meeting, by a majority of the votes cast."

L. V. Bierce, Esq., addressed the meeting.

Committee reported officers for the society, which report was accepted, and the persons recommended were unanimously chosen officers of the society, as follows: Simon Perkins, President; Henry G. Weaver, Vice President; William A. Hanford, Secretary; William H. Dewey, Treasurer; John Hoy, Sylvester H. Thompson, Avery Spicer, Philo C. Stone and James W. Weld, Managers.

On motion—"Resolved: That the thanks of this society be presented to L. V. Bierce, Esq., for his interesting address, and that he be requested to furnish a copy for publication."

Mr. J. Teesdale presented a circular from the State Board of Agriculture, which was referred to the President, Secretary and Capt. Amos Seward for reply. On motion, adjourned.

AMOS SEWARD, *President*.
MILO STONE, *Vice President*.
N. W. GOODHUE, *Secretary*.

Thus was the "Summit County Agricultural Society" duly and legally organized, and entitled to draw from the county treasury, yearly, for its support, the sum of \$137.50, as provided by law. The various officers, directors and committees, together with the people of the county, generally, both farmers and villagers, from this time on worked heartily and cordially for the success of the society, and for the favorable outcome of its first annual fair. In

the *Beacon* of August 21, 1850, appears this announcement:

AGRICULTURAL NOTICE.

The Board of Directors for the Summit County Agricultural Society will meet at the office of L. V. Bierce, Esq., on Thursday, the 22d inst., at 1 o'clock P. M., to appoint committees to award premiums at the Annual Fair, to be held at Akron, on the 2d and 3d days of October next. Those who have obtained members will please forward the names and money to the Auditor's office at Akron.

SIMON PERKINS, *President.*
W. A. HANFORD, *Secretary.*

AKRON, August 19, 1850.

In the *Beacon* of September 11, 1850, appears the premium list, offering premiums ranging from \$1 to \$8 on cattle; from \$3 to \$8 on horses; from \$2 to \$5 on sheep; from \$2 to \$4 on swine; best kept dairy, \$10; best butter, \$3; best cheese, \$3; from \$1 to \$3 on farm implements; from 50 cents to \$3 on domestic manufactures; from \$2 to \$3 on factory flannels and cloths; \$1 on grains and seeds; from \$1 to \$2 on vegetables and fruits; from \$1 to \$5 on field crops. Following is a list of the awarding committees: Cattle—Milo Stone, of Tallmadge; Frederick Baldwin, of Hudson; Marcus Newton, of Richfield. Horses—Thaddeus H. Botsford, of Middlebury; John Hoy, of Franklin; Henry Van Hyning, of Norton. Saxony Sheep—John Brown (old "Ossawatimie" of Harper's Ferry fame), of Portage; Justin P. Goodale, of Middlebury; Anson A. Brewster, of Hudson. Merino and other Sheep—Isaac T. Welton, of Richfield; Jacob Allen, of Akron; Jonathan Starr, of Copley. Swine—Miner Spicer, of Akron; William Wetmore, of Stow; Simon P. Starr, of Copley. Dairies—Edgar B. Ellsworth, of Hudson; John B. Clark, of Hudson; Ethan Alling, of Twinsburg. Butter and Cheese—Mrs. Dana D. Evans, of Akron; Mrs. Daniel Hine, of Tallmadge; Mrs. Amos Avery, of Tallmadge; Mrs. Edwin Wetmore, of Stow. Farm Implements—Samuel Treat, of Tallmadge; Alexander Johnston, of Green; Mills Thompson, of Hudson. Domestic Manufactures—Mrs. Henry G. Weaver, of Springfield; Mrs. George Kirkum, of Akron; Mrs. John Hoy, of Franklin; Mrs. N. W. Goodhue, of Middlebury. Factory Products—Roswell Kent, of Middlebury; Anson A. Brewster, of Hudson; Orlando Hall, of Akron; Grains and Seeds—Nathaniel Finch, of Akron; William Hale, of Bath; Philo Atwood, of Spring-

field. Vegetables and Fruits—Van R. Humphrey, of Hudson; Lucius S. Peck, of Portage; Prof. Seymour, of Hudson. Field Crops—Clark Sackett, of Tallmadge; John Hall, of Springfield; Talmon Beardsley, of Coventry. Non-enumerated Articles—Joseph Hawkins, of Twinsburg; Peter Voris, of Bath; Daniel Hine, of Tallmadge. A "plowing match" was also announced for the second day of the fair; premiums, \$5 and \$3. No trotting nor racing premiums were offered.

The *Beacon* of September 18, 1850, editorially says:

We are gratified to find that much interest is being awakened in the approaching agricultural fair in this county. As there has not been an exhibition of that character in the county since its organization, those who have charge of the arrangements have not the benefit of that amount of experience they would like in the performance of their duty. Still, they have done and will do what they can. The work of preparation should be entered into in earnest. Hundreds can contribute their mite to the interest of the occasion. Let the exhibition be worthy of the object in view, and let there be a gathering which will render the day a memorable one.

The First Fair, October 2 and 3, 1850.—Having no grounds nor buildings of its own, by permission of the County Commissioners, the court house and surrounding grounds were made use of by the society in giving its initial exposition. In the *Beacon* of October 16, 1850, is the official report of President Perkins and Secretary Hanford, together with a full list of the premiums awarded, aggregating about \$100—quite a sum, when it is considered that no entrance fees on articles exhibited were charged, while admission to the fair was also free. "A team of thirty-four yoke of oxen, from Tallmadge, and another of fifteen span of horses, from the same town, attracted considerable attention," says the report. Gen L. V. Bierce, of Akron, delivered the annual address.

The *Beacon* of same date editorially says:

The highest expectations were more than realized. The attendance on both days was very large, several thousand persons being present, all of whom seemed inspired by the happiest spirit, and abundantly compensated for what of labor and care was incident to the exhibition. * * * The display of stock was unexpectedly good, the arrangements being such as to give a fair opportunity for exhibiting the animals brought in. The specimens of fruit, grain and vegetables were exceedingly fine. * * * A variety of farming implements were exhibited. * * *

The court-house was fitted up for the horticultural exhibition and the handiwork of Flora. The highest praise is due to the ladies for their taste in adorning the room, and the myriad evidences of their skill displayed on every hand. The pyramid of flowers, prepared at Mrs. Dodge's, and the various smaller pyramids and rich bouquets exhibited, were the center of attraction, exciting universal praise by their gorgeous display of colors. The display of fancy needle-work would have excited admiration anywhere. Among other things exhibited in the ladies' department, worthy of note, were a variety of bed-quilts; a counterpane, richly worked; worsted work; *a straw-bonnet made from straw raised in this county*; some fancy cotton work, etc., etc. * * * An exhibition terminating so propitiously cannot but lead the way to others, and establish permanently a society whose first fruits are so pleasant to the eye and taste. In the awards of the future the managers of the fair should not be forgotten.

Second Annual Meeting.—The second annual meeting of the society was held at the court house, November 20, 1850. Treasurer Dewey reported: "Total receipts, \$327.53; total payments to date, \$221.86; balance in treasury, \$105.72—\$100 of which is due for premiums." Officers were chosen for the ensuing year, as follows: Simon Perkins, of Portage, President; Amos Seward, of Tallmadge, Vice President; Nelson B. Stone, of Akron, Treasurer; Nathaniel W. Goodhue, of Middlebury, Secretary; Henry Van Hynning, of Norton; Daniel Hine, of Tallmadge; Milo Stone, of Tallmadge; James M. Hale, of Akron, and Harvey Baldwin, of Hudson, Managers. On motion, the thanks of the society were presented to Secretary William A. Hanford, and his assistants, Messrs. N. W. Goodhue and C. B. Bernard, for their services to the society.

Second Annual Fair.—In the *Beacon* of September 10, 1851, appears the notice of President Perkins and Secretary Goodhue, announcing the second annual fair of the society, to be held at the court house in Akron, October 16 and 17, with a somewhat enlarged premium list. Committees as follows: Cattle—John Newton, of Richfield; Perry C. Carothers, of Tallmadge; Frederick Baldwin, of Hudson. Mile Cows—William H. Dewey, of Akron; Joseph Hawkins, of Twinsburg; Clark Sackett, of Tallmadge. Oxen—Perley Mansur, of Hudson; Isaac T. Welton, of Richfield; Ebenezer Pardee, of Norton. Fat Oxen—Dennis A. Hine, of Middlebury; David French, of Green; Henry Van Hynning, of Norton. Best ten yoke oxen in a string, from one township, and best ten span horses—Jedediah D. Commins, of

Akron; Charles W. Brown, of Portage; Charles B. Cobb, of Akron. Horses—Thaddeus H. Botsford, of Middlebury; John Miller, of Norton; Ezra Starkweather, of Twinsburg. Long-wool Sheep—Jacob Allen, of Akron; William Hale, of Bath; Samuel N. Goodale, of Akron. Merinos—James W. Wallace, of Northfield; Jonathan Starr, of Copley; Van R. Humphrey, of Hudson. Saxons—William A. Hanford, of Cuyahoga Falls; Lucius W. Hitchcock, of Tallmadge; Peter A. More, of Copley. Swine—Avery Spicer, of Coventry; George Darrow, of Hudson; John Hoy, of Franklin. Pottery Ware—Allan Hibbard, Lorenzo B. Austin and James Christy, all of Akron. Farming Implements, First Class—Alexander Johnston, of Green; Benjamin Bear, of Franklin; Samuel M. Combs, of Tallmadge. Second Class—John B. Clark, of Hudson; George Lillie, of Northfield; Talmon Beardsley, of Coventry. Harness Work—Jonathan Page, of Richfield; John Johns, of Middlebury; Harvey S. Weld, of Richfield. Boots and Shoes—Zebulon Jones, of Akron; Peter Voris, of Bath; John M. Cutler, of Akron. Stoves, Castings and Machinery—Bradbury T. Blodgett, of Akron; Harrison N. Gillett, of Cuyahoga Falls; William S. Irish, of Middlebury. Carriages, etc.—David A. Scott, Lewis, Benjamin and Nathaniel Finch, all of Akron. Musical Instruments—Amos Wright, of Tallmadge; George P. Ashmun, of Hudson; Henry Bill, of Cuyahoga Falls. Cabinet Ware—Henry S. Abbey, of Akron; Joseph T. Holloway, of Cuyahoga Falls; Henry B. Horton, of Akron. Blank Books, etc.—Elisha N. Sill, of Cuyahoga Falls; Lucius S. Peck and Jared Jennings, of Akron. Flannels, etc.—Mrs. Henry G. Weaver, of Springfield; Mrs. Elias W. Howard, Mrs. George Kirkum and Mrs. Allan Hibbard, of Akron. Linens—Mrs. Louisa A. Baldwin, of Middlebury; Mrs. Harvey Baldwin, of Hudson; Miss Sarah A. Stone, of Tallmadge; Mr. Alvin C. Voris, of Akron. Stockings, etc.—Mrs. Dana D. Evans, of Akron; Mrs. Ira Hawkins, of Portage; Mrs. Daniel Hine and Mrs. Lucius C. Walton, of Tallmadge. Factory Products—Roswell Kent, of Middlebury; Harvey B. Spellman, of Akron, and Ezra S. Comstock, of Cuyahoga Falls. Grains and Seeds—Solomon Markham, of Green; Jeremiah B. Lambert, of Bath; Andrew Harris of Springfield. Vegetables and Fruits—Daniel McNaugh-

ton, of Middlebury; John E. King, and Lucius V. Bierce, of Akron. Crops—Daniel Hine, of Tallmadge; Avery Spicer, of Coventry; Edwin Wetmore, of Stow. Farms—John C. Wallace, of Northfield; James W. Weld, of Richfield; Andrew Hale, of Bath. Butter—Mrs. Samuel M. Combs, of Tallmadge; Mrs. John Hoy, of Franklin; Mrs. William L. Clarke, and Mrs. Frederick Wadsworth of Akron. Cheese—Mrs. Simon Perkins and Mrs. Sebried Dodge, of Portage; Mrs. Mills Thompson, of Hudson; Mrs. William L. Clarke, of Akron. Fancy-work—Mrs. Henry W. King, of Akron; Mrs. Lucius C. Walton, of Tallmadge; Mrs. George E. Pierce, of Hudson; Mrs. Hoyt L. Henry, of Middlebury; Mrs. John B. Clark, of Hudson; Mr. Charles B. Bernard, of Akron.

Of this second exhibition, the *Beacon* of October 22, 1851, says:

The annual fair of the Summit County Agricultural Society was held on Thursday and Friday of last week. They were festive days among the farmers of Summit, and such a congregating together of the true nobility of our county—the toiling masses, whose brows are browned by heaven's sunlight, whose hands are hardened by honest toil, and whose hearts are softened by the kindlier sympathies of humanity—we have rarely seen. The turn-out was tremendous, exceeding largely, it is thought, that of last year. There was a perfect jam in and around the court house throughout each day, rendering it almost impossible to see many objects of interest, and demonstrating the absolute necessity of erecting a suitable building for the future agricultural and mechanical exhibitions of the county. * * * Hon. Van R. Humphrey, of Hudson, delivered an address to the multitude, who were assembled in the court house inclosure for want of a building of sufficient capacity to receive them. It was listened to with interest and profit, and was in keeping with the interest of the occasion. * * * It will afford much gratification to our citizens generally to learn that Col. Simeon Perkins, the President of the society, with a munificence characteristic of the man, has donated to the society several acres south of Akron, admirably adapted for future exhibitions, the erection of suitable buildings, etc., for the use of the society. A subscription was started for inclosing the ground, and we cannot permit ourselves to doubt the success of the laudable enterprise.

In the *Beacon* of November 26, 1851, is the official report of the annual meeting of the society for 1851, held in the court house November 19. The officers elected for the ensuing year were as follows: President, Avery Spicer, of Coventry; Vice President, Daniel Hine, of Tallmadge; Secretary, Nathaniel W. Goodhue, of Middlebury; Treasurer, Nelson B. Stone, of

Akron. Managers—Peter Voris, of Bath; Thomas H. Goodwin, of Akron; Isaac T. Welton, of Richfield; Samuel M. Combs, of Tallmadge; Solomon Markham, of Green. A committee of one from each township and village in the county was appointed "to solicit subscriptions to defray the expenses to be incurred during the coming year in the erection of suitable buildings and fences and preparing other permanent fixtures for the use of the society." Among the proceedings of this meeting is found this highly commendable item:

Resolved, That this society will award no premiums on anything that will intoxicate.

At a meeting of the Directors, held at the court house, it was arranged that the fair for 1852 should be held on Wednesday and Thursday, October 6 and 7, at the court house, the new grounds donated by Col. Perkins not being yet fitted up. The premium list, as published in the *Beacon* of September 8, is about the same as in 1851, and the committees judiciously selected from every portion of the county. The court-room was used solely as a floral and fine-art department. A small admission fee to this department was charged, the receipts being something over \$100. The hall was occupied by a display of fashionable furniture, stoves, etc. On the north side of the building was erected a temporary frame structure, forty by sixty feet, for the display of fancy work, mechanical products, farming implements, vegetables, fruits, etc. Horses, cattle, sheep, hogs, poultry, etc., were grouped, at convenience of exhibitors, in various parts of the inclosure. In its editorial notice of this Third Annual Fair, the *Beacon*, of October 13, 1852, says: "It was attended by a larger number of persons, and, what is equally gratifying, the exhibition, taken as a whole, was, undoubtedly, far in advance of its predecessors. * * * The gorgeous flower-tree, nearly ten feet high, blazing with dahlias of every conceivable shade, was a thing of beauty. * * * From the garden of Hon. E. N. Sill, of Cuyahoga Falls, as also from the gardens of Col. Perkins and Mrs. Dodge, were some of the finest dahlias we have ever seen. A design of cut flowers of every variety, arranged by Mr. Thomas Wills, Mr. Sill's gardener, excited universal admiration. * * * But one opinion was expressed on one point, viz.: the necessity of the immediate erection of suitable buildings

for the agricultural fairs of Summit. It is folly to expend more on temporary buildings. If each township will move and select a good committee-man, as Tallmadge has done, the amount for the buildings, etc., may be raised in a fortnight. Col. Perkins is still ready to donate the use of six acres of land as the site. If the society does not take the work in hand, the Commissioners should do so." The annual address was delivered by Herman Canfield, Esq., of Medina. In their report, the officers of the society say: "The necessity of a permanent building is apparent to all. The officers of the society labor under much embarrassment, and all that is necessary is the co-operation of each township, and the means requisite for inclosing six acres of ground and erecting a large and commodious building, can be raised. We hope that the importance of immediate attention to this matter will be borne in mind, and that measures will be taken immediately for raising whatever sum is necessary."

At the annual meeting of the society held at the court house in Akron, November 17, 1852, officers for the ensuing year were elected as follows: President, Daniel Hine, of Tallmadge; Vice President, Sylvester H. Thompson, of Hudson; Secretary, Nathaniel W. Goodhue, of Akron; Treasurer, Nelson B. Stone, of Akron; Directors, Talmon Beardsley, of Coventry; Andrew Hale, of Bath; William Payne, of Richfield; Lucius W. Hitchcock, of Tallmadge; Henry W. Howe, of Akron. A committee of one in each township was appointed to solicit funds to build permanent buildings for the use of the society.

The *Beacon* of September 7, 1853, editorially says: "The Board of Directors of the Summit County Agricultural Society have contracted for inclosing the new fair grounds of the society, the erection of a suitable hall for future exhibitions, etc. The work is to be completed by October 10; the expense to be paid mainly by subscriptions, the county doing its share." The grounds, six and a half acres, were substantially fenced, a building 40x100 feet was erected, and the grounds otherwise fitted up, at a total expense of about \$1,800, and the fourth annual fair was held there on Wednesday and Thursday October 12 and 13, 1853. Increased interest and attendance were manifested. A small entrance fee of 10 cents was charged, by which between \$700 and \$800 was realized, and,

though somewhat in debt on improvements, the society was at last firmly established on a sound financial basis.

The fifth annual meeting of the society was held at the court house on Wednesday, November 16, 1853. Officers elected—President, Daniel Hine, of Tallmadge; Vice President, James M. Hale, of Akron; Secretary, Nathaniel W. Goodhue; Treasurer, Nelson B. Stone; Directors, Talmon Beardsley, of Coventry; Samuel M. Bronson, of Tallmadge; Henry W. Howe, of Akron; Ethan Alling, of Twinsburg; and Jeremiah B. Lambert, of Bath.

The fifth annual fair was held on the grounds of the society October 11 and 12, 1854. Though the season had been very dry, there was a very fine display of field and garden products, fruits, flowers, etc., and, while stock and other departments were quite largely represented, "Ladies' Equestrianism" was a prominent feature of this exhibition, and added very materially to the interest as well as to the financial results of the fair. Receipts, \$800.

The sixth annual meeting was held on the 22d day of November, 1854, at the court house, officers and Directors of previous year being re-elected.

The sixth annual fair was held October 3, 4 and 5, 1855. Yearly membership badges were sold at \$1 each, and a gate fee of 10 cents was collected, the total receipts with ground rents being \$903. Ladies' horsemanship, both driving and equestrianism, was the chief attraction of the fair; premiums being awarded as follows: Miss Harriet J. More, of Copley, \$20; Miss Anna E. Howe, of Akron, \$15; Miss C. L. Stauffer, of Springfield, \$10. A premium of \$20, donated by spectators, was also awarded to Miss Cordelia Alden, of Medina, for her superior equestrianism, the awards of the society being confined to residents of the county. At this fair also every department in which premiums were offered was a success, both in point of number and quality of animals and articles exhibited.

At the seventh annual meeting held at the court house in Akron November 21, 1855, officers for the ensuing year were elected as follows: President, Talmon Beardsley, of Coventry; Vice President, Andrew Hale, of Bath; Secretary, Henry W. Howe, of Akron; Treasurer, Charles B. Bernard, of Akron; Directors, Wm. B. Ashmun, of Tallmadge; Simon P. Starr,

of Copley; James M. Hale, of Akron; Houston Sisler, of Franklin; Julius Pond, of Hudson.

Secretary Howe announces, in the *Beacon* of September 17, 1856, that the Summit County Agricultural Society have added to their list of premiums, to be awarded at their next annual fair, the following: "Fastest trotting horse owned within the county, \$30; fastest trotting horse, under four years old, owned within the county, \$20. A half-mile ring has been prepared, and a lively competition may be expected." In a subsequent issue, Secretary Howe thus expatiates: "The farmers and mechanics of the county will remember that this is especially their festival, while all the 'rest of mankind' intend to be there to join them. The list of premiums is large, the grounds are beautiful and convenient; the contests, upon two days, between the fast trotting horses, will be spirited; the 'ladies riding,' upon the last day of the fair, will attract all who love 'women and horses,' and the smiling faces of friends will everywhere greet those who are in attendance. * * * Come all who delight in seeing the best of stock, the finest of fruits, grains and vegetables, who have a taste for the products of the 'gude housewife,' and can appreciate the value of churns and cultivators, carpets and carriages. Come all who can admire the beautiful in flowers, in needlework, in painting; or can find pleasure in 'crowds of fair women and brave men,' expecting a rare entertainment, and you need not go away disappointed."

Of this, the Seventh Annual Fair, held on the 8th, 9th and 10th days of October, 1856, the *Beacon* concludes a lengthy and enthusiastic editorial as follows: "On the whole, we are satisfied that the Summit County Fair of 1856, not only surpassed all its former fairs, but, in point of numbers attending and of a substantial excellence of stock, grains, vegetables, mechanical and artistic skill, and whatever else makes up the show, was beyond any county fair of Ohio or any other State. We feel confident that Summit is entitled to the premium. In this judgment, we are supported by the voluntary expressions of many witnesses who were present from abroad." The receipts at this fair were \$1,230.50, which, with receipts from county authorized by law, paid the entire indebtedness of the society, running expenses, premiums, balance due for buildings, etc., and left a surplus in the treasury of \$224.73.

At the Eighth Annual Meeting, held November 19, 1856, the following officers were elected: President, Talmon Beardsley, of Coventry; Vice President, Andrew Hale, of Bath; Secretary, Henry W. Howe, of Akron; Treasurer, Alvin C. Voris, of Akron; Directors, Joseph Hawkins, of Twinsburg; William Johnston, of Copley; Lucius L. Strong, of Tallmadge; Adam Yerrick, of Green; John R. Buchtel, of Coventry.

Eighth Annual Fair held October 7, 8 and 9, 1857.—Increased number of entries, increased interest and increased attendance; nearly three columns in the *Beacon* of October 14 being devoted to an editorial review of the fair. At the Ninth Annual Meeting, held on the 18th of November, 1857, officers were elected as follows: President, Samuel M. Combs, of Tallmadge; Vice President, Andrew Hale, of Bath; Secretary, Dudley Seward, of Akron; Treasurer, Alvin C. Voris, of Akron; Directors, Avery Spicer, of Portage; Lucius L. Strong, of Richfield; William B. Ashmun, of Tallmadge; Joseph Stauffer, of Green; Horace P. Cannon, of Twinsburg.

Ninth Annual Fair, October 6, 7 and 8, 1858.—The crowd upon and about the little six-acre inclosure, with the teams of visitors and animals for exhibition, produced, according to the local reporter, "a perfect jam," and the cry for larger grounds was universal. Total entries for premiums, 965, as follows: Cattle, 105; horses, 152; sheep, 48; swine, 10; poultry, 19; grain and seeds, 64; fruits, 40; garden products, 154; field crops, 9; butter, cheese and sugar, 51; farm implements, 30; domestic productions, 124; flowers and shrubbery, 44; carriages and harness, 17; boots, shoes, etc., 10; bonnets, etc., 7; fine arts, 17; iron and tin ware, 7; miscellaneous, 45; female equestrians, 6. Total receipts, \$1,350.

At the Tenth Annual meeting, November 17, 1858, the following officers were elected: President, Samuel M. Combs, of Tallmadge; Vice President, Horace P. Cannon, of Twinsburg; Secretary, J. Park Alexander, of Akron; Treasurer, John R. Buchtel, of Akron. Directors—Avery Spicer, of Portage; Lucius L. Strong, of Richfield; Lewis Alling, of Twinsburg; Edwin Upson, of Tallmadge; Charles Coe, of Norton. At this meeting, the question of procuring other and more extensive grounds was discussed, and an adjourned meeting for the

further consideration of the subject was held at the office of Edgerton & Sanders, in Akron, January 8, 1859. At this meeting, President Combs, Vice President Cannon and Treasurer Buchtel "were appointed a committee to receive sealed proposals from any of the townships within the county for the site of fair grounds, and that such proposals be established by approved security for the amount subscribed. The attention of those interested is solicited. Proposals to be handed to Mr. Buchtel by October 29."

Of this action, the *Beacon* of January 12, 1859, editorially, says: "The citizens of Cuyahoga Falls, we are informed, propose to give \$6,000 for the permanent location of the fair grounds at or near that village. The question is of importance to local interests as well as to those of the society itself. The latter will be, we doubt not, the governing consideration with those who will decide upon the matter. Other things being equal, the county seat would seem to be the proper location for a county society; but there is some plausibility in the claim that Cuyahoga Falls is more central, and, if the citizens of that village subscribe \$6,000 in good faith for that purpose, they exhibit a high appreciation of the advantages of securing the annual fair as a permanent institution. We commend the consideration of this subject, in all its bearings, to the business men, property-holders and citizens of Akron, only observing that the competition of the people of Cuyahoga Falls is formidable and may be successful."

At an adjourned meeting, held January 29, 1859, the following proposal was submitted: "The society can have the present location of the fair grounds for \$125 per acre by paying \$150 down and \$200 each January following, with 6 per cent annual interest, and that they can have more or less land south of the present grounds, in addition, at \$80 per acre, or an exchange on the opposite side of the road, acre for acre." This proposition was accepted by a vote of forty-nine in favor to ten against. At an adjourned meeting, held February 19, 1859, it was voted "to confine the society to the present location of the grounds."

Thus matters stood until late in the following summer. In the meantime, not only had the contiguous lands been sold to other parties, but there was a rapidly growing conviction in the public mind that the future success of the

society demanded both more room and a more eligible location than the old grounds afforded. So, too, in consequence of the differences of opinion which had obtained as to the matter of location, spirited rivalry had grown up, not only in the two "union" organizations in the north-east corner of the county, at Twinsburg, and the northwest corner of the county, at Richfield, but in the spirited "union" association then being projected at Cuyahoga Falls. These considerations stimulated a number of the most active promoters of the society, in connection with the officers, to a combined and vigorous effort to the accomplishment of the desired change. At this juncture, our public-spirited fellow-citizen, Hon. David L. King, submitted a proposition, which, being at once accepted, placed the society in possession of Summit Grove—nearly thirty acres overlooking the city on the west—the beautiful grounds now occupied by the fine residences of Lewis Miller, Esq., Capt. Arthur L. Conger, and others, on Ash street and Park place, and immediately east of the southern portion of the beautiful grounds of the Akron Rural Cemetery. This fine tract of land was leased to the society for five years, at a reasonable annual rental, Mr King stipulating to either sell the ground to the society, at a price to be named by him, or to pay the society for its buildings, fences, etc., at their appraised value, on the expiration of the lease.

Of these grounds, and the estimation in which they were held by the public, the following extracts from the *Beacon*, of September 7 and 14, 1859, abundantly testify:

The spot has been appropriately named Summit Grove. It is an elevated plateau, with sparse but large spreading oaks, of native growth, furnishing resting-place and shade, free from undergrowth, airy and dry; in short, a natural park. * * * For the purpose of securing and inclosing this elegant piece of ground, erecting the proper buildings, and putting it in order for this and future fairs, the citizens of Akron, responsible business men, have contributed something more than \$1,500. * * * We have never seen so much energy on the part of committees and citizens, in any public enterprise, as has been displayed in preparing the County Fair Grounds at Summit Grove. * * * Not in the East or the West has any society a location more inviting, etc., etc.

The buildings, fences, etc., from the old were removed to the new grounds, which, with the necessary additions, the erection of sheds, sta-

bles, pens, etc., the construction of a superb half-mile track, and other improvements, involved an expense of \$3,128.60, of which amount \$1,870.07 was contributed by the citizens of Akron, and \$1,258.53 was paid by the society; a large amount of labor, of men and teams, also being donated by the people of Akron and contiguous towns, in the fitting-up of the grounds.

From this time forward, the Summit County Fair became, emphatically, *the* Fair of Northern Ohio, not only drawing together, in annual "Harvest Home Festival," in October of each year, the great mass of the people of Summit County, but attracting many visitors from contiguous counties, and even from the more remote portions of the State.

At the annual meeting of November 16, 1859, a new constitution was adopted increasing the number of directors from five to eighteen—one for each township. At this meeting, officers were elected as follows: President, Horace P. Cannon, of Twinsburg; Vice President, William Wise, of Green; Secretary, James Mathews, of Akron; Treasurer, John R. Buchtel, of Akron. Directors: Bath, Andrew Hale; Boston, Edmund H. Cole; Coventry, William Buchtel; Cuyahoga Falls, George Sackett; Copley, Vincent G. Harris; Franklin, Henry Dailey; Green, George Crouse; Hudson, Julius Pond; Middlebury, Charles A. Collins; Northampton, Reese Jones; Northfield, John C. Wallace; Norton, Charles Coe; Portage, Avery Spicer; Richfield, John E. Hurlbut; Springfield, John Ewart; Stow, Virgil M. Thompson; Tallmadge, Clark Sackett; Twinsburg, Lewis Alling.

Resolutions were unanimously adopted expressive of sorrow and condolence at the death of Capt. Amos Seward, of Tallmadge, the first President of the society under its written constitution, and one of its most enthusiastic supporters. Also a resolution tendering to the retiring Secretary, J. Park Alexander, the thanks of the society for his able and efficient services during the preceding year.

At the expiration of the time for which the grounds had been leased, Mr. King, pursuant to his agreement, submitted a proposition to the officers of the society, to sell them the entire tract for \$5,000, on very easy terms of payment, stipulating only, that should the grounds ever cease to be used for fair purposes, they should revert back to him, his heirs, etc. This truly

munificent proposition, unfortunately for the society and the county, was not accepted, a portion of the management, comparing the price named with the value of farming lands less eligibly situated, and more remote from the city, not being able to appreciate the magnificent prize they were letting slip through their fingers until it was too late. The society now leased, for the period of ten years, of Mr. P. D. Hall, about thirty acres of land, covered by a fine grove of original forest trees, in the western part of the city, fronting on Maple street upon the south, and Balch street upon the west, and a short distance northwest of Akron Rural Cemetery. To these grounds was removed the buildings, fences and fixtures from "Summit Grove," and others were added, trotting track graded, etc., at an expense of over \$1,000 to the society, over and above the liberal contributions of both money and labor, from the citizens of Akron and surrounding townships. These grounds were first occupied by the society in October, 1864, the fair of that year not only proving a very great success, but being followed up with such increasing interest, year by year, that the management were enabled to accumulate a fund of several thousand dollars in the treasury of the society, with which to purchase grounds at the expiration of their ten years' lease. In the meantime, however, the rapid growth of the city of Akron had so enhanced the value of the grounds then occupied as to place them entirely beyond the reach of the society, while most of the lands adjacent to the city, suitable for fair purposes, had been taken up and improved, or were held so high as not to be within the supposed ability of the society to purchase.

At the annual meeting in January, 1870, a committee was appointed to select grounds to be purchased by the society, the committee reporting to the Directors March 15, 1870, the propositions which had been made to them, as follows: S. W. Bartges, thirty-five acres of the Mallison farm, on Wooster avenue, at \$500 per acre; S. H. Coburn and Samuel Thornton, thirty acres, south of city limits and west of Main street, at \$400 per acre; A. C. Voris and E. Steinbacher, twenty-six acres, on the south line of city and east of Main street, at \$500 per acre; Messrs. Falor and Allyn, such portion of their lands on the north line of Coventry Township as the society might need, at \$400 per acre; and Mr. J. H. Kramer, a tract of

twenty acres along the Ohio Canal, south of city limits, at \$250 per acre.

June 4, 1870, at a meeting of the society, called to consider these several propositions, the vote to purchase grounds was reconsidered, and the matter for the time being was dropped.

October 24, 1870, another resolution to purchase grounds forthwith was adopted, and the committee, consisting of Edward Craz, of Bath, James Hammond, of Copley, and David S. Alexander, of Akron, were, on motion of King J. Ellet, of Springfield, instructed to purchase the Coburn and Thornton tract, at a price not to exceed \$400 per acre. At the annual meeting, January 18, 1871, the minutes of the October meeting were amended so as to show that a resolution offered by William Wheatley, of Richfield, was adopted, authorizing the committee to look around and purchase grounds which, in their judgment, would be for the best interest of the society; the committee in the meantime having purchased of James McAllister thirty acres off from the east portion of his farm, on the north side of the Medina road, one mile west of Akron, at \$200 per acre, with a cash payment of \$2,000. February 14, 1872, committee reported grounds all paid for, with a balance due the Treasurer of \$153.94.

A very considerable number of the members and patrons of the society, both in the city of Akron and in the eastern, northern and southern townships of the county, dissatisfied with the location which had been selected, had so agitated and discussed the question, that, at the annual meeting of the society, held January 20, 1874, after quite a stormy debate, a resolution offered by Mr. Jacob H. Wise, that it was impracticable for the society to use the McAllister grounds, and that a committee be appointed to sell said grounds and secure others, accessible by railroad running through the county, was referred to the officers of the society, with instructions to report at the next annual meeting. At an adjourned meeting, held February 7, 1874, a resolution was adopted that Nelson V. Wadsworth, of Hudson; John H. Christy, of Akron; Jared Barker, of Bath; King J. Ellet, of Springfield; Daniel Hine, of Tallmadge; James Hammond, of Copley; and Dennis Treat, of Tallmadge, constitute a committee to report to the Directors at their next meeting what, if anything, should be done in the matter of disposing of the McAllister

grounds and purchasing others. April 9, 1874, the committee submitted a majority report in favor of retaining and improving the grounds owned by the society, and a minority report in favor of disposing of those grounds and purchasing the Fouse tract, near Bettes' Corners, northeast of Akron, the majority report being adopted by a vote of ten to six. October 7, 1874, the Directors resolved, by a vote of eight to five, to *proceed at once* to improve the McAllister grounds. January 20, 1875, at the annual meeting of the society, the officers of the society, to whom was referred the resolution offered by Mr. J. H. Wise, at the previous annual meeting, reported in favor of purchasing the Fouse tract, Mr. Fouse submitting a proposition to sell fifty acres to the society at \$200 per acre. Mr. A. T. Burrows also submitted a proposal to sell forty-five acres of his land on the "Chuckery," at \$400 per acre, or the whole tract at \$450 per acre. A ballot on grounds resulted as follows: Burrows tract, 336; McAllister grounds, 218. March 6, 1875, Dennis Treat, John H. Christy and Stephen H. Pitkin were appointed a committee, by ballot, and empowered to purchase the Burrows tract and sell the McAllister grounds. April 24, committee reported that they were unable to either buy or sell. A resolution was then adopted, appointing Dennis Treat, of Tallmadge, and William Wheatly, of Richfield, who, with a third man, to be selected by them from without the county, should finally decide the matter.

May 24, 1875, Mr. Treat reported that Hon. R. P. Cannon, of Portage County, had been selected as the third member of the committee, and that a tract offered by Mr. Jacob H. Wise, on the "Chuckery," had been agreed upon by a majority of the committee, Mr. Wheatly dissenting; but that, since his return home, Mr. Cannon had receded from his action, and declined to make any further report. A resolution was adopted, authorizing the committee to call to their aid Hon. J. P. Robinson, of Cuyahoga County, and that the committee, as thus constituted, proceed to locate grounds. June 19, 1875, Mr. Treat reported that the committee had failed to agree upon a location. Mr. Wheatly reporting that the committee had failed for want of effort, Mr. Treat not aiding him (Mr. W.) in urging Dr. Robinson for an opinion. Letters from Dr. Robinson were read, counseling the society to meet and agree upon a

location. The following resolution was then adopted :

Resolved, That all of the Directors meet June 26, and view all the grounds offered, and then meet at the Secretary's office for a final vote.

June 26, 1875, the Directors visited the Long, Allyn, Howe, Powder, Fouse, Burrows, Wise, Alexander and McAllister tracts, and adjourned to July 3. At the adjourned meeting, July 3, 1875, the Directors proceeded to ballot for location, with the following result: First ballot—McAllister, 7; Fouse, 5; Burrows, 2; Allyn, 1; Powder, 6—21 votes. Second ballot—McAllister, 7; Fouse, 2; Burrows, 1; Alexander, 1; Powder, 10—21 votes. Third ballot—McAllister, 7; Fouse, 3; Alexander, 1; Powder, 10—21 votes. Fourth ballot—McAllister, 8; Fouse, 3; Wise, 1; Powder, 9—21 votes. Fifth ballot—McAllister, 8; Fouse, 1; Wise, 1; Powder, 11—21 votes. The Powder tract having thus received the majority of the ballots cast, it was ordered that the President and Secretary proceed to close a contract for said tract, conveying to the owners thereof the McAllister grounds, and executing the necessary papers to secure to them the balance of the purchase price, \$5,000.

The grounds thus selected, derisively called the "Powder Patch," from the fact that the works of the Austin Powder Company, now of Cleveland, were originally located thereon, is a tract of forty-five acres, in the valley of the Little Cuyahoga River, and within the corporate limits of the city of Akron. It is contiguous to both the New York, Pennsylvania & Ohio, and the Cleveland, Mount Vernon & Columbus Railroads, while the track of the Valley Railway, from Cleveland to Canton, which originally ran on a high trestle, directly through the grounds, has been thrown around the southern edge of the inclosure, thus doing away with one of the main objections which was urged against their selection, while adding very greatly to its accessibility and convenience in the transportation of stock and visitors to and from the fair. It is a romantic and picturesque spot, with the ever-limpid waters of the Little Cuyahoga, meandering through them from southeast to northwest, while innumerable large springs, on the adjacent hills, furnish an abundant supply of water for artificial lakes, fountains, etc.; the name of "Fountain Park" having been given to the grounds

by common consent. A substantial high picket fence incloses the grounds, and commodious floral, commercial, agricultural, mechanical, domestic and dining halls and offices have been erected; an abundant supply of cattle-pens and stables have been provided; one of the finest half-mile trotting tracks in the State has been built; an extensive covered stand with ample seating capacity, erected; thousands of hitching posts provided; ornamental trees and shrubbery planted, and the preliminary work done toward making "Fountain Park," not only one of the most convenient and beautiful fair grounds in the State, but, as contemplated improvements are completed, one of the most desirable pleasure resorts in Summit County.

The first meeting held upon the society's own grounds, in October, 1875, notwithstanding the bitterness of feeling that had been engendered in regard to their selection, was a very decided success, as has been each subsequent yearly exposition of the society, the growth and steadily increasing popularity of its annual fairs, being well illustrated by its semi-decennial gross receipts, from 1850 to 1880, which, in round numbers, were as follows: For 1850, \$327; for 1855, \$903; for 1860, \$2,100; for 1865, \$2,800; for 1870, \$3,698; for 1875, \$5,014; for 1880, \$7,444. This munificent increase of patronage, has not only enabled the society, besides paying its heavy running expenses, premiums, etc., to go steadily forward with the improvement of its grounds, and to pay the interest and very considerably reduce the principal of the debt incurred in the purchase of the original grounds, and the erection of the necessary buildings thereon, but has warranted the management in purchasing between seven and eight acres of additional land at \$200 per acre, the fair grounds, proper, now covering an area of something over fifty-two acres. In 1876, the constitution was so amended as to give a Director to each ward of the city of Akron, thus making the present number of Directors of the society twenty-four.

The space assigned to this chapter not permitting a detailed statement of the proceedings of the successive annual meetings of the society during its entire history, we can only give, in brief, the name, place of residence, and term of service, of the several gentlemen who have filled the offices of President, Vice President, Secretary and Treasurer, from 1860 to the pres-

ent date (1881). Presidents—Perry C. Carothers, Tallmadge, 1861, 1862; Horace P. Cannon, Twinsburg, 1863, 1864; J. Park Alexander, Akron, January, 1865, to March, 1870, when, tendering his resignation, John R. Buchtel, of Akron, was elected to fill the vacancy; James Hammond, Copley, 1871 to 1874, inclusive; Dennis Treat, Tallmadge, 1875, 1876; John F. Moore, Copley, 1877, 1878, 1879; Stephen H. Pitkin, Portage, 1880; Simeon Dickerman, Northampton, 1881. Vice Presidents—Charles Coe, Norton, 1861, 1862, 1863; Dennis Treat, Tallmadge, 1864, 1865, 1866; James Hammond, Copley, 1867 to 1870, inclusive; Dennis Treat, Tallmadge, 1871 to 1874, inclusive; John F. Moore, Copley, 1875, 1876; King J. Ellet, Springfield, 1877, 1878; Wellington Miller, Norton, 1879, 1880, 1881. Secretaries—James Mathews, Akron, 1861, 1862; J. Park Alexander, Akron, 1863, 1864; Hiram Viele, Akron, elected for 1865, but resigning, James Atkins, Akron, appointed to fill vacancy; Jonathan Starr, Akron, 1866, 1867; Othello W. Hale, Bath, Secretary; Hiram S. Falor, Coventry, Assistant Secretary, 1868; George W. Crouse, Akron, Secretary; Hiram S. Falor, Assistant, 1869; Hiram S. Falor, Secretary, 1870; Stephen H. Pitkin, Portage, 1871 to 1879, inclusive; John H. Christy, Akron, 1880, 1881. Treasurers—John R. Buchtel, 1861, 1862; Jacob H. Wise, Akron, 1863; George D. Bates, Akron, 1864 to 1870, inclusive; John H. Christy, Akron, 1871 to 1875, inclusive. Mr. Christy resigning September 15, 1875, John J. Wagoner, Akron, appointed to fill vacancy; John H. Christy again elected for 1876, but again resigning September 6, 1876, William B. Raymond, Akron, elected to fill vacancy, and re-elected for 1877; Herbert A. Peck, Tallmadge, 1878 to 1881, inclusive.

A considerable number of the people of the western, northwestern and southwestern portions of the county being dissatisfied with the selection of the "Powder Patch" by the Summit County Agricultural Society, and honestly believing that the location was not only ineligible and inconvenient, on account of the broken nature of the ground, but absolutely dangerous for stock, because of its proximity to railroads, formed themselves into a joint-stock company, with a capital of \$5,000, leased the Hall grounds, recently vacated by the old society, and, refitting them in good style with

new buildings, fences, sheds, etc., under the name and style of the "Summit County Fair Association," held a very successful fair of four days in September, 1875, with James Hammond, of Copley, President; Frank A. Foster, of Copley, Vice President; Wellington Miller, of Norton, Secretary; and Philander D. Hall, Jr., of Akron, Treasurer. Vigorous efforts were made by the officers and members of the organization to make the "Summit County Fair Association" one of the permanent institutions of the county, and its second exhibition, in September, 1876, was also reasonably successful. Exhibitors and visitors, however, not particularly desiring to contribute equally to the support of two rival fairs so near together in point of time and locality, and the new grounds of the old society rapidly growing into public favor, the interest in the "new fair on the old grounds" gradually died out, and the association disbanded, its affairs being placed in the hands of a receiver for liquidation. The "little unpleasantness" in regard to the selection of grounds by the old society having given way to general good feeling among the agriculturists, manufacturers, merchants and other fair promoters and supporters, it may be safely predicted that all will henceforth vie with each other to make the Summit County Agricultural Society and its truly delightful grounds the model institution of its kind in Ohio.

The great distance of the extreme northeastern and northwestern townships of the county from the county seat, together with the remoteness of contiguous townships in adjoining counties from their respective county seats, led to the formation of prosperous and spirited union fair organizations in the localities indicated, some twenty-five years ago. In 1851, the people of Richfield organized a township society, under the name and style of "Richfield Agricultural Club," the annual exhibitions of which became so popular that, in 1858, six other townships, viz.: Bath and Boston, in Summit; Brecksville and Royalton, in Cuyahoga, and Hinckley and Granger, in Medina, united with her in an association known as the "Union Agricultural and Mechanic Art Society," which was admirably managed for a number of years, the grounds being leased for the period of ten years, and the building, fencing, etc., being largely done by voluntary contributions. On the expiration of its lease, the

association re-organized as a stock company, and purchased the grounds previously occupied, increased vitality and activity following the re-organization for several years. As the county fairs, however, of Summit and adjoining counties, increased their attractions, the interest in the local organization began to wane, and the society disbanded in 1875, selling its grounds and closing up its affairs in 1876. At Twinsburg, also, after a township exhibition upon the public square for two or three successive years, there was organized a "union fair" association, composed of the townships of Twinsburg, Hudson and Northfield, in Summit County; Aurora, in Portage County, and Solon and Bedford, in Cuyahoga County. The first meeting of the society was in September, 1856, and, like the Richfield association, its annual fairs were, for many years, very successful and popular, the society owning its own grounds of some thirteen acres. The patrons and promoters of this fair being largely interested and engaged in dairying, and other kindred industries, a succession of dry and unproductive seasons, together with the decease and removal of a number of its most active supporters, so dampened the ardor of its remaining members that the meetings were at length discontinued, the last fair of the society being held in September, 1871, the grounds being sold and the affairs of the society closed in 1872.

The Summit County Agricultural Society failing to accept the very liberal proposition which had been made by the people of Cuyahoga Falls for the location of the county fair grounds at or near that place, a number of the citizens of that and adjacent townships organized a Union Fair Association in 1859, and fitted up grounds, about a mile north of the village, on the Hudson Road. The first regular fair of the society was held September 1, 2 and 3, 1859, and was in every respect a first-class exhibition, both in point of display and attendance, netting its projectors some \$600 over and above expenses. In addition to the usual list of premiums offered for cattle, horses and other farm stock, agricultural and mechanical products, domestic manufactures, etc., especial encouragement was given to matters pertaining to the turf, many local celebrities in the way of high and fast steppers being attracted thither. The managers, however, failing to secure the attendance of the intended "big card"—the

then greatest of American trotters, Flora Temple—for the regular fair, arranged for a meeting on the 28th day of October, the same year, at which that renowned animal was pitted against another reputed very fast nag, "Ike Cook." The weather proved to be unpropitious and the track heavy, but though the attendance was meager, the match came off on time, the *Beacon* of November 2 recording the result as follows: "Flora Temple, 1, 2, 1; Ike Cook, 2, 1, 2. Time—First heat, 2.28; second heat, 2.34; third heat, 2.33. This enterprise proved a losing venture, absorbing nearly, if not quite, all the profits of the September fair. Again in 1860, September 5, 6 and 7, the regular annual fair of the society was held, also being reasonably successful, though little more, if any, than paying the running expenses. The third annual fair was held upon the grounds of the society September 23, 24 and 25, 1861. The war of the rebellion was then upon us, and military displays at local fairs became very popular. The show was a very fine one, but the attendance was small, except on the last day, the military display and competition drawing together quite a large crowd. There were present the Bath Guards, Capt. Schoonover; the Buckeye Guards, of Copley, Capt. Sackett; and the Cowles Tiger Zouaves, from Bedford, Cuyahoga County; the latter, however, a very fine company, being excluded from competition for the prize by reason of being one member short of the required number. After a drill of thirty minutes each, the first prize, a silk flag, was awarded to the Bath Guards, and the second, a worsted flag, was awarded to the Copley Guards. At the conclusion of the drill, a fantastic cavalry company, consisting of some seventy-five or eighty horsemen (representing the secesh army), came upon the grounds, and after skirmishing around awhile, to the infinite amusement of the crowd, were finally surrounded, and the entire company taken prisoners, by the three companies of "regulars," assisted by the Tallmadge Artillery, Capt. Barnes, and the Young America Gun Squad, of Cuyahoga Falls, who performed the battery service of the occasion. The military and a large number of invited guests were given a free dinner upon the grounds, by the members of the society and the citizens of Cuyahoga Falls, and vicinity. Though a success as a show, this third fair was a financial unsuccess,

the receipts being less than the disbursements, and war matters and other enterprises engaging the attention of its promoters, no further meetings were held, and the affairs of the society were closed.

The writer trusts that no apology is needed from him for the space devoted to the subject of the Agricultural Society matters of Summit County. A careful perusal of the foregoing pages not only forcibly illustrates the value of harmony and unity of purpose, in all efforts to

promote the public welfare, but also clearly shows the inestimable worth of such associations, as educators of the people, not alone in matters of husbandry, manufactures and similar sciences, but also in a social and moral point of view; for who does not acknowledge the benign influences arising from the friendly mingling together of the masses of the people from time to time, in such pleasant and cheerful gatherings as the annual fairs of the Summit County Agricultural Society have grown to be.

CHAPTER II.*

THE EARLY INHABITANTS—A CLASSIFICATION OF THE MOUND-BUILDERS' WORKS—PRE-HISTORIC OCCUPATION AND REMAINS OF SUMMIT COUNTY—SKETCHES OF THE INDIAN TRIBES
—CUYAHOGA VALLEY INDIANS DURING THE BORDER WARS.

"Fought eye to eye, and hand to hand,
Alas! 'twas but to die!
In vain the rifle's deadly flash
Scorched eagle plume and wampum sash—
The hatchet hissed on high;
And down they fell in crimson heaps
Like the ripe corn the sickle reaps."

IN the remote past ages of life upon the earth, at a period that lies wholly within the province of conjecture, and upon which the light of sleepless inquiry fails to fall, a strange and semi-civilized people, whose origin, customs and final fate are enshrouded in comparative obscurity, inhabited almost the entire territory of the Western Continent. All attempts to unravel the mystery enveloping their peculiar lives meet with an uncompromising rebuff, save where the fast-decaying remnants of their works cast a feeble ray of light on the otherwise impenetrable darkness. The first thought that enters the mind of the antiquarian in this department of research, is, Whence originated this peculiar people? So far, no satisfactory answer has been reached. Though many eminent men have devoted the best years of their lives in endeavoring to discover the origin of man, or, more specifically, the origin of the Mound-Builders, yet no word of encouragement comes from the past to cheer on the patient, tireless worker. Accepting the Mosaic account of the creation, we are led to believe that the Mound-Builders were the lineal descendants of Adam. When they came to

America, or how, does not alter the significance and unquestionable correctness of the statement. There were but two persons—Adam and Eve—created, and from them, if we accept the record of Moses, have sprung all the countless hosts that have ever peopled the earth. If the Mosaic account of man's origin be rejected, we are still in darkness, on the sea of conjecture, tossed by the wild waves of doubt and unbelief, without helm or compass and with no land in sight. This perplexing situation is to be met, and what can be said? Is the race of man descended from the lower animals, and through them as intermediate states? or did it spring as a separate growth from the common mother of life—the Earth? Had all life, both animal and vegetable, a common origin, or was each species, of whatever kind, created apart from its fellows? In either case, whence originated the primitive germ or seed from which life first sprung? Was it created by a new condition or relation of its composing elements—by a new relation of the natural laws under which the elements united and quickened into life? In the process of the development of natural laws, acting under new conditions, upon the simple organic and in-organic elements, did that remarkable phenomenon occur, by which the primitive germ of life was created. If so, why is not a repetition of the creative process possible? Has the tide of evolution swept beyond the point at which the conditions of elements and relations could originate life? Is it not true

*Contributed by W. A. Goodspeed.

that spontaneous generation, at one stage of evolution, might have been possible, and that it also, at a later period, might have become extinct from natural causes? All these questions are pertinent in discussing the origin of the Mound-Builders; but no definite answer is received, and even the manner and time of their appearance upon this continent, by whatever means, are problems for coming generations to solve. The most interesting point to be determined regarding these people is, Whether they were created originally in America, or are the descendants of pre-historic Asiatics, who crossed over by way of Behring's Straits. Neither side of the question can be answered. The majority of authorities agree in saying that the Indians had no knowledge, traditional or otherwise, of the Mound-Builders, except what was derived from their works. They denied having any knowledge of the erection of the approximate 10,000 mounds scattered throughout the State, or of the limitless number scattered throughout the continent. It is urged that, inasmuch as the Indians kept no record of events, their meager and short-lived traditions could not cover the lapse of time since the Mound-Builders' occupancy of the soil, and that possibly the former were the descendants of the latter. On the other hand, it seems probable that, if this be true, the Indians would have some traditional or other knowledge of the mounds, fortifications, sepulchers, templar structures and various species of implements, undoubtedly belonging to the earlier race. However, with few exceptions, they profess utter ignorance. In opposition to this view, it is claimed that the Indians have deteriorated in mental power—have lost the use of many arts, etc., known to their alleged remote ancestors. And again, to meet this, it is asserted that many centuries elapsed from the Mound-Builders' period to the Indians, thus precluding the idea that the latter were their descendants. From their works is derived all that we know of their history, habits, modes of life, degree of civilization, knowledge of the arts of peace and war, mental and moral progress; but their fate is wrapped in darkness. Many of their mounds and other earthworks have been found from time to time in Summit County; and so much interest has been aroused regarding this almost unknown race of people, and so much light thrown by patient labor upon their mysterious lives, that

a brief statement will here be given of the progress that has been made in this branch of archaeological research, before entering upon the description of the mounds in this county.

Of all States or countries of the same limit, Ohio furnishes a greater number of earthworks, supposed to have been erected by Mound-Builders, than any other. The extent, variety, magnitude and labyrinthian intricacy of the Ohio mounds have rendered them of great value to antiquarians, who have come in pursuit of knowledge from distant parts of the globe. Here may be seen the perishing remains of gigantic artificial structures, that reared their summits high in the air, long years before the State was covered with its present quality of timber, and unknown years before the Indians' occupancy of the soil. These structures, or mounds, have been properly divided into mounds proper, effigies and inclosures. Mounds proper have been subdivided into sepulchral, templar, sacrificial, memorial and observatory. Effigies are animal, emblematic and symbolical. Inclosures are military, covered or sacred.* The greater portion of the above works were constructed of earth, a few of stone, and fewer still of earth and stone combined. Sepulchral mounds are usually conical, and some of them, notwithstanding the lapse of time, are seventy feet in height. They are more numerous than any other class, and beyond doubt were erected as memorials to the dead. They always contain one or more skeletons, together with implements and ornaments supposed to have been placed there when the individual was buried, for use in the Spirit Land. The mounds are of all sizes, and it has been conjectured that their magnitude bears some relation to the prominence of the persons in whose honor they were erected. Ashes and charcoal are often found in proximity to the skeletons, under conditions which render it probable that fires were used in the burial ceremony. With the skeletons are also found specimens of mica, pottery, bone and copper beads, and animal bones. Though in this class of mounds, ordinarily but one skeleton is found, yet sometimes several are unearthed. A few years ago, a mound, situated in Licking County, was opened, and found to contain, in whole or in part, seventeen skeletons. But the most noteworthy of all the mounds was one in Hardin County, which con-

*Isaac Smucker, in Ohio Statistics.

tained 300 crumbling skeletons. Col. Whittlesey and others, however, entertained the opinion that they belonged to the Indians, who had used the mounds for burial purposes. Templar mounds are few in number, and are ordinarily circular. They are invariably truncated, and are often surrounded with embankments, inclined planes or spiral pathways or steps, leading to the summit. They are found round, square, oblong, oval and octangular, and rest generally upon a large base, but have a limited altitude. It is supposed that these elevations were surmounted with wooden temples, all traces of which have been removed by the ravages of time. These mounds and the buildings at their summits are thought to have been erected for religious purposes. Sacrificial mounds are ordinarily stratified, with convex layers of clay and loam above a stratum of sand. They generally contain ashes, charcoal, igneous stones, calcined animal bones, beads, stone implements, pottery and specimens of rude sculpture. They are often found within inclosures, which are supposed to have been connected with the religious ceremonies of the Mound-Builders. Altars of igneous clay or stone are often found. Evidences of fire upon the altars yet remain, showing that various animals and probably human beings were immolated to secure the favor of the Great Spirit. These mounds infrequently contain skeletons, together with implements of war; mica from the Alleghanies; shells from the Gulf of Mexico; differently colored varieties of obsidian; red, purple and green specimens of porphyry; and silver, copper and other metallic ornaments and utensils. Mounds of observation were apparently designed for alarm-towers or signal stations. Some writers have fancied that they "occur in chains, or regular systems, and that many of them still bear traces of the beacon fires that were once burning upon them." They are often found built like towers from the summits of embankments surrounding inclosures. One of the latter, in Licking County, has a height of twenty-five feet. "Along the Miami River," says Judge Force, "are dotted small mounds or projecting highlands, which seem to have been built to carry intelligence by signals along the valley." Memorial mounds are of that class of *tumuli* intended to commemorate some important event, or to perpetuate the memory of some distinguished character. Most

of the stone mounds belong to this class, and usually contain no bones, for the supposed reason that they were used only for sepulchers. They are thought to correspond in design with the Bunker Hill Monument, and with the beautiful marble column on the field of Gettysburg.

Effigies are elevations of earth in the form of men, beasts, birds, reptiles and, occasionally, of inanimate objects, varying in height from one foot to six feet above the surrounding soil, and often covering many acres of land. Mr. Schoolcraft expresses the belief that this class of mounds was designed for "totems" or tribal symbols; while Prof. Daniel Wilson and other writers of distinction entertain the opinion that they were erected in accordance with the religious belief of the various tribes of Mound-Builders, who worshiped, or in some way venerated, the animals or objects represented by the elevations. A large mound near Newark represents a bird of enormous size, with its wings outspread in the act of flight. Its total length is about 200 feet. An excavation in this effigy disclosed a clay and stone altar, upon which were evidences of fire, together with ashes and charcoal. The surroundings indicated that the altar had been used for sacrificial offerings. It is called "Eagle Mound" from its fancied resemblance to that bird. Another mound near Newark represents a huge alligator, having a total length of 200 feet. Prof. Wilson believes that it "symbolizes some object of special awe and veneration, thus reared on one of the chief 'high places' of the nation, with its accompanying altar, upon which these ancient people of the valley could witness the celebration of the rites of their worship, its site having been obviously selected as the most prominent feature in a populous district abounding with military, civic and religious structures." The greatest breadth of the body is twenty feet, and its body from hind legs to fore legs is fifty feet. Each limb is twenty-five feet long. The principal portions of the animal are elevated about six feet, while other portions are much lower. The most remarkable mound in Ohio is in Adams County. Its form is that of an enormous serpent, more than a thousand feet in length, with body in graceful, anfractuous folds, and tail ending in triple coils. The greatest width of the body is thirty feet, and the effigy is elevated about five feet above the surround-

ing soil "The neck of the figure," says the American Cyclopaedia, "is stretched out and slightly curved, and the mouth is opened wide, as if in the act of swallowing or ejecting an oval figure, which rests partly within the distended jaws. The combined figure has been regarded by some as a representation of the oriental cosmological idea of the serpent and the egg."

Defensive inclosures are irregular in form, and are always on high ground, in positions difficult to approach by a savage foe. "The walls," says the American Cyclopaedia, "generally wind around the borders of the elevations they occupy, and when the nature of the ground renders some points more accessible than others, the height of the wall and the depth of the ditch at these weak points are proportionally increased. The gateways are narrow and few in number, and well guarded by embankments of earth placed a few yards inside of the openings or gateways, and parallel with them, and projecting somewhat beyond them at each end, thus fully covering the entrances, which, in some cases, are still further protected by projecting walls on either side. These works are somewhat numerous, and indicate a clear appreciation of, at least, the elements of fortification, and unmistakably point out the purpose for which they were constructed. A large number of these defensive works consist of a line of ditches and embankments, or several lines, carried across the neck of peninsulas or bluff headlands, formed within the bends of streams—an easy and obvious mode of fortification common to all rude peoples." The embankments of one of this class in Warren County are nearly four miles in length, varying in height from ten to twenty feet to accord with the locality to be protected, and inclose several hundred acres. Covered ways or parallel walls are often found, either connecting different inclosures or portions of the same. They were undoubtedly designed to protect those passing back and forth within. There are large numbers of sacred inclosures in the form of circles, squares, hexagons, octagons, ellipses, parallelograms and others, many of which were designed with surprising geometrical accuracy. They are sometimes found within military inclosures, and very likely were connected with the religious rites and ceremonies of the people, as small elevations are found within them, which were

evidently used for altars, upon which sacrifices of various kinds were offered. Some archæologists maintain that many of the so-called sacred inclosures were intended and used for national games and celebrations, and it is probable that those without the altar were used as such.

The mounds and their contents afford abundant opportunity to speculate as to the character and customs of the ancient people, of whom nothing is left save their crumbling habitations. They were a numerous people, as is clearly proved by the magnitude and elaboration of their works. Their presence here, beyond question, antedates the coming of Columbus, and very probably extends back a thousand years or more. Perhaps a majority of intelligent men who have made the subject a study, place the Mound-Builders' period back to that of the Egyptians, Assyrians and Babylonians—to a period two or three or more thousand years before the Christian era. Many interesting and important considerations, too lengthy to be narrated here, have been discovered in comparing the customs of the Mound-Builders with those of ancient nations in the East. An unaccountable similarity is found in religion, in the arts of war and peace, in character and quality of habitations, in methods of agriculture, in domestic affairs, and in many other essential particulars. The Mound-Builders were unquestionably subservient to rulers, or superiors, who had power to enforce the erection of gigantic structures, which, considering the semi-barbarous condition of the people, their lack of suitable implements of labor, and their imperfect and insufficient knowledge of mechanical principles, are surprisingly vast in extent and ingenious in design. Their works indicate that the people were warlike; that they were familiar with many mathematical and mechanical rules; that they were religious and probably idolatrous; that they were skilled in the manufacture of bone and metallic ornaments and pottery; that they had attained no little degree of perfection in the working of metals; and that they were essentially homogeneous in customs, pursuits, religion and government. They of necessity were an agricultural people, being too numerous to live by the chase alone. They offered burnt and other sacrifices and oblations, to both good and bad spirits. Dr. Foster says they worshiped the elements, such as fire, air and water—also the sun, moon and stars, and

offered human sacrifices to the gods they worshipped. Yet many of these views are speculative, and have but little substantial evidence upon which to rest. Authorities are widely at variance in their views. But little can ever be known of the history of these people, yet throughout all the future, the civilized world will look with awe upon the decaying remnants of their works, and weave the bright fabric of romance about their mysterious lives.

This much has been given on the authority, among others, of Schoolcraft, Wilson, Pidgeon, Smucker, the American Cyclopaedia and others, to prepare the way for the classification and detailed description of the ancient earth and stone works in this county. While almost every township can boast of the presence of these works within its limits, yet they are found in greatest number and magnitude along the valley of the Cuyahoga River, or on the adjacent highlands. It not infrequently happened that Indian villages were built on the sites of these ancient works, and care must be used to prevent confounding Indian earthworks with those of the Mound-Builders. A few of the principal mounds and inclosures in the county have been personally inspected by the writer, and these and all others of sufficient importance will be described. The inclosures usually occupy naturally strong, defensive positions, and, where necessary, are formed by earth embankments, varying in altitude and basal diameter, and protected on the outer side by a deep pit or moat. On the farm of Milton Arthur, Esq., Northfield Township, is an ancient earth fortification, of which the following description is given by Charles Whittlesey: "The engineers who selected the site of this fortification understood very well the art of turning natural advantages to good account. Why they did not embrace in their plan the whole of the level space on the crest of the bluff is not easily explained, unless we presume that their numbers were few, and not sufficient to defend the whole. On all sides, the gullies are from eighty to one hundred and ten feet deep, and are worn by running water into the blue and yellow hard-pan that here forms the bluffs along the Cuyahoga River. The earth is as steep as it will stand, and, in fact, is subject to slides, which leave the soil in terraces, resembling platforms made by art. Before the ground was cultivated, the ditches are said by the owner to have been

so deep that a man standing in them could not look over the wall. In the gully on the north, the water is permanent at all seasons. But the ancient inhabitants appear to have dug wells within the fort at two or more points, and these, as stated by old settlers, were stoned up like our wells. On the western face of the bluff, near where the road descends, is a small spring, not reliable at all seasons. There are double earth embankments on each exposed side of the fortification, though they do not extend entirely across the necks of land, there being in two or three cases a small space left at the ends, apparently for a passage-way. There is one small mound within the inclosure, and another just without. The approach is along a sharp ridge, called a hog's back, nearly broad enough for a single road track, for the distance of thirty rods, and the sides are as steep as any part of the bluffs adjacent. It is not very evident why a few rods of ground were cut off by lines at the southwest angle, nor why part of the ditch was made on the inside on the north and west." It must be observed that inclosures of this character in the county are formed by an earth embankment and a moat or ditch running along its side, sometimes within and sometimes without the fort. There are two or more others in Northfield, similar in construction to the one described. One of these is protected on one side by a steep declivity, while on the exposed sides is a semi-circular embankment in the form of the curved portion of the letter D. Near the residence of John Hovey, in Northampton, is a fort which, in early years, must have been one of the finest in the county. The embankment inclosed several acres, and was five or six feet in height, and near the walls were several low mounds, and small circular excavations, apparently designed for arrow pits. The walls can still be traced, although they have been plowed over many years. Several small forts are to be seen in Boston Township. There are mounds at the farms of Ambrose Bliss, Mr. Wetmore, James Fairweather, Mr. McKay, and the old farm of Watrons Mather. These are usually some five or six feet in height, and twenty or twenty-five feet in diameter at the base. Several have been opened, but nothing noteworthy was discovered. In the western part of Northampton Township, where Hale Run and Furnace Run come quite close together, is perhaps the most important fortifica-

tion of the kind in the county. The streams approach each other, and form a steep, narrow ridge, barely wide enough for the passage of a wagon. This ridge descends some ten feet below the mainland, to which it is connected, and extends about fifteen rods, when it gradually assumes a width of some ten rods, and, finally, after a distance of perhaps eighty rods from the mainland is reached, the bluff terminates perpendicularly to the railroad track. When the ridge begins to widen, it ascends until on a level with the mainland. Beyond the neck or ridge, the summit of the bluff consists of about eight acres, and at the eastern extremity, where, on all sides except the western, the bluff terminates as abruptly as the soil will rest, is a well-defined earth fortification. Back toward the mainland, at a distance to leave at the extremity of the bluff about five acres, an unusually large earth embankment, with its ditch, extends across the ridge at right angles to its course. The embankment is much larger than any other seen by the writer in the county, and at each end is an open space, evidently designed as a passage. On both sides of these two open spaces, are perhaps fifteen small circular excavations, arranged so as to guard the passages, and seemingly intended for arrow pits. The embankment is four or five rods in length, and on the side toward the extremity of the bluff, several of the supposed arrow pits are found at a considerable distance from the open spaces. In fact, proceeding from the embankment toward the termination of the bluff, it becomes at once apparent that arrow pits were dug along the edge of the bluff, to defend the position from an assaulting foe, that might make the effort to ascend the steep sides. At the eastern end of the bluff, within a small area, are some fifteen or twenty more arrow pits, one of them being about eight feet across and three feet deep. This is one of the strongest positions of the kind in the county.

In the same neighborhood are several other forts, two of them being small with quite high, irregular walls, which seem to be strengthened by bastions, though William Hale and others reject this idea as improbable. These inclosures comprise from two to five square rods of land, and the interior has the appearance, as if a party of men, with spades, had thrown up the irregular embankment, leaving the surface extremely uneven. There are, also, in the

same neighborhood, in a cultivated field, eight mounds, one of them, over which the plow has run for many years, being four feet high and eighty feet in diameter at the base. This is said to have been over eight feet high in early years. An Indian skeleton, in a fair state of preservation, was unearthed a number of years ago on the summit about two feet below the surface. An excavation was made to the center of this mound, and a small quantity of crumbled and crumbling bones was found. William Hale, who was present at the time, states that the bones were found in a position to lead to the inference that the party or parties were buried in a sitting posture, as the bones of the body, save those of the arms and legs, were together, while the latter extended out into the sandy soil like lines of chalk. The remains, when found, were sufficiently well preserved to prove beyond doubt that they were bones, though whether they were human bones or not is another question, not quite so well cleared up. The evidence satisfied all present, however, that the remains were those of human beings. The other seven mounds are not quite so large, and those which have been opened contained nothing of importance. It is thought that the large mound contained the crumbling bones of more than one person. The quantity found, and its state of preservation, would lead to this view. One of the small, irregular forts referred to above and found in this neighborhood on quite low land, has a double wall on the side adjoining the river. Another inclosure near this, but on high land, is an irregular octagon in shape, and comprises over half an acre of land. William Hale's residence is situated in a small valley, which, in his opinion, was once a cultivated field. At the earliest settlement, the land was covered with a heavy forest; but, when this was removed and the soil turned up by the plow, various implements were found, among which were arrow and spear heads; fleshing instruments of flint; pestles and mortars; a small, smooth, hard, flat stone, shaped like a diamond, with the central portion elongated and perforated with a hole near each end, supposed to have been used in weaving a coarse cloth; and a rough, irregular stone, six or eight inches in diameter, flat on two sides, on one of which were from one to six artificial holes, about an inch deep and an inch and a half across, the use of which is extremely diffi-

cult to determine. Many of these various kinds are found a few rods north of Botzurn Station, on the extremity of a bluff, through which the railroad cut has been made, in an Indian burying-ground. It comprises about an acre of land, and some forty skeletons, the most of which were in a fair state of preservation, have been unearthed, and many more are yet in the ground. They were first discovered in 1843, when an addition made to the canal disclosed several at the point of the bluff. When the railroad was cut through the center of this burying-ground, thirty or forty skeletons were plowed out in almost as many minutes. They were lying in somewhat irregular rows, which extended north and south, while the individuals lay with their heads some to the east and some to the west. There were skeletons of males and females, and perhaps one-third of these belonged to children. Many crumbled to pieces immediately; but quite a number of skulls and some of the larger bones were preserved for several years—are perhaps in existence yet. The soil where each skeleton lay, was discolored—was black—and in one of the graves was found a stone kettle, four inches deep and eight inches across. Various implements have been found in the soil and on the surface. The skeletons were lying about two feet beneath the surface. The teeth were as sound and white, apparently, as when their owners used them. Very likely many of the owners of these skeletons had been killed during the latter part of the last century, by daring borderers from Virginia and Pennsylvania. Perhaps the grandfathers of those who assisted in unearthing these skeletons, were among these borderers. Probably the most important earth inclosure in the county, is in Copley Township, near the residence of Delos Bosworth. In the center of a swamp of muck and marl and partially formed peat, is a circular island about twenty-five rods across, which is elevated from five to fifteen feet above the surface of the swamp. There is no natural approach to this island. It is surrounded on all sides by twenty or thirty rods of what, in early years, must have been an impassable swamp. On this island and almost covering it, is an artificial inclosure of earth. The embankment is about two feet high, and the ditch is on the outside. There are twelve or fifteen openings in the wall, and a causeway of earth leads from

these across the ditch, down to the edge of the swamp. In some places, as on the south, a distance of three or four rods lies from the swamp to the edge of the wall; but usually the distance is much smaller, and in some cases is reduced to a minimum. Supposing the surrounding swamp to have been extremely wet and nasty (a Saxon word), as it must have been at an early day, the position was practically impregnable. The island is covered with large trees, mostly hard maple, and no critical and extended examination has yet been made of the soil and what it contains. Within the inclosure may be seen numerous small mounds, but these may have been thrown up by trees that were blown down. Several of these have been opened without any important discovery. The mainland approaches closest on the east side, and here is a large gateway in the embankment. A goodly number of arrow-heads have been picked up on the point of mainland closest to the fort. This island is called "Fort Island," and a short distance south of it is another called "Beech Island." On the southern extremity of the last, are a great number of small mounds which Gen. Bierce conceives to be Indians' or Mound-Builders' graves. The writer does not concur in this view, but refers their formation to natural causes, or to beavers. Several have been opened, but nothing was found. Just south of Botzurn Station is a very large mound, some thirty feet in height, and about a hundred feet in diameter at the base. This was opened a few years ago by students from Akron, but nothing was discovered, save evidence from the soil to prove that the mound was a natural formation. The soil was found to be similar to that of the adjacent bluffs, and dissimilar to that in the valley where the mound stands. Three hundred yards west is a very large mound, having a truncated summit. This is connected by a low ridge with the main formation of bluffs, and, in the opinion of the writer, the other mound was once similarly connected to this one, the whole forming a bluff-projection into the valley. The following is kindly furnished by J. M. McCreery, of Akron: "On the land of Thomas Barnes, in Norton Township, the conglomerate sandstone rises into a very high knob, and from the top a view may be had of the country beyond Cuyahoga Falls in one direction, and of that nine miles across the Tuscarawas Valley

in the other, while the view north and south is almost as extended. At the time Mr. Barnes' father settled on this farm, some sixty-five or seventy years ago, there was a mound built of "hardheads" on the highest point of this knob. It was about ten feet long and eight feet wide, and, although some of the top stones had fallen or been thrown down, it was still about three feet high. A chestnut tree, twelve or fourteen inches in diameter, was growing at one corner, and in its growth had thrown the corner down. There seems to be but little doubt that this elevated point was used as a signal station, as a fire on its summit could be seen farther than from any other point for miles around, though whether this is Mound-Builders' work, or that of the Indians, is difficult to determine. Owing to the scarcity of 'hardheads,' or cobble-stones, in the vicinity, the building of this mound was quite a laborious task." Mr. McCreery also says: "Near Turkey-Foot Lake, are two very singular works, which are different from any I have ever seen elsewhere. They are funnel-shaped depressions, some ten or twelve feet across the top and eight or nine feet deep, running to a point at the bottom. They are walled around with small boulders, and unless they were used for fire pits, I am unable to imagine any use to which they could have been put, as the stone work is too loose to suppose they were intended for cisterns."

The principal earthworks in the county have now been described, though there are many others which as yet are comparatively unknown, and which some future searcher may more fully disclose. Quite a number of small circular inclosures and insignificant mounds other than those above described are found throughout the county, more especially along the valley of the Cuyahoga and on the adjacent bluffs. A special description of these is unnecessary, as they are very similar in construction to some of those referred to above. So far as can be determined, all the inclosures in the county belong to the military class. None seem to have been used as sacred or covered. Some of the mounds are certainly sepulchral, and beyond question some were memorial. Those containing bones were sepulchers, wherein were deposited the bodies of distinguished characters, while those without bones and without any evidences that they

once contained bones are probably memorial mounds. The ancient inhabitants had no need to erect mounds of observation in this county, as high bluffs in prominent positions furnished abundant natural facilities for watchfulness over a wide scope of country. There are several places in the county—as at Turkey Foot Lake, at the gigantic truncated mound near Botzurn Station, at the elevated inclosure in northwestern Northampton and at various other places along the Cuyahoga and throughout the county—where, beyond doubt, fires were kindled in ancient times. The stones found at these places reveal this fact, and in some cases ashes and charcoal have been discovered. Of course, it is highly probable that the Indians, and not the mound builders, might have kindled these fires, and possibly erected some of the earthworks. Indian villages were often found on the site of these ancient works, and it is to be presumed that some alterations were made. It is often difficult, and sometimes impossible, to distinguish the individual works of these two people, yet in general no difficulty is experienced by persons well informed on the subject.

It is impossible and unnecessary to give a description of all the ancient implements, ornaments and utensils that have been found in the county. They are numbered by the thousand, and include all the varieties of stone axes, mauls, hammers, celts, mortars, pestles, flint arrow and spear heads, fleshing and skinning instruments, ceremonial stones, shuttles, colored slate ornaments, breast-plates of stone or shell, ornamental charms and totems, shell ornaments, rude and imperfect specimens of pottery, bone and metallic ornaments, igneous stones, and a multitude more of all sizes and shapes, whose uses are unknown. In April, 1877, there was found buried in muck, about three miles west of Akron, a heap of one hundred and ninety-seven flint instruments. Of these, one hundred and eighty-five were evidently designed for arrow and spear heads, though the usual notches at one end are lacking. They are probably unfinished arrow and spear heads. They may be seen in the museum of the city library at Akron. The various implements, ornaments, etc., just referred to, evidently belonged partly to the Indian and partly to the Mound Builder. It may be that both races used the same implements, as it is

quite likely that the Indian would learn something from the scattered remnants of the Mound Builders' works. Will the history of this strange people ever be known? Can research ever clear up the mystery of their origin and fate? Who can say what the human mind will accomplish? May not the evolution of thought into new and numerous fields so widen the human understanding that existing evidences may be sufficient to disperse the gloom enveloping the origin of man? If the theory of evolution be true, and man is spared upon the earth, who can measure the final result? the children of men will come and go upon the earth; imitated ideals will become loftier; excellence in all the arts of mind and spirit will be attained; limitless intelligence will assume startling forms of power and penetration; boundless wisdom will lead to prophecy; prophecy perfected will become a science, by which past and future will be blotted out, and time be measured by the present; new and wonderful faculties of mind will be created by the developing laws of evolution; new perceptions and cognitions and emotions will open broad fields of beauty to the mind that before were beyond the reach of human capabilities; man's capacity will be multiplied a thousand-fold, and evidences will augment in a similar degree; mental conclusions will peer into the sanctuary of creation, and the origin of life will be reached. When this state is reached, the history of the Mound Builders will be read as in a book, but, if it be not reached, their origin and fate will never be known until all mankind shall stand face to face before the bar of God.

The Indian history of Summit County, though somewhat meager as regards prominent events, contains many interesting incidents, the principal of which will be recorded. In the year 1650, the date at which the aboriginal history of Northeastern Ohio begins, a tribe of Indians, called the Eries, inhabited that section of country.* How far their lands extended southward from the lake is somewhat indefinite, although it is probable that they included the greater portion of Summit County, and, possibly, all the soil within its present limits. It is generally admitted that the Eries were a member of

* De Witt Clinton in his Historical Discourse upon the Indians of North America; Louis Hennepin, a Franciscan friar, whose travels in "New France" were published in 1698; Brant, the Mohawk chief, in a letter to Timothy Pickering, November 20, 1794, and Charlevoix, the historian of "New France," all assign the Eries or Ergas to the south shore of Lake Erie.

the Iroquois family, as distinguished from the Algonquin tribes. At the date above given, the Iroquois, consisting of the confederated Mohawks, Oneidas, Onondagas, Cayugas and Senecas, occupied New York and Northern Pennsylvania. These confederated tribes, called the Five Nations, had formed their alliance as early as 1605; and, so powerful had they become, that their lands, acquired by conquest, covered a large tract of country. When the Tuscaroras were added to the alliance, the latter were styled the Six Nations. All other Northern tribes of Indians than those mentioned above were Algonquins. The leading tribe of the latter was the Leni Lenape, or Delaware, whose traditions declare it to be the parent stem whence other Algonquin tribes have sprung. Other tribes of this family were Wyandots, Ottawas, Shawanese, etc. The Iroquois, grown strong and arrogant by years of confederated conquest, steadily enlarged their lands from the spoils of conquered tribes. About the middle of the seventeenth century, they drove the Hurons or Wyandots from their home in Canada, and took possession of their lands. They likewise conquered the Neutral Nation, the Andastes, the Satanas, or Shawanese, and others. "In 1655, they turned against their Erie brethren, and using their canoes as scaling ladders, invaded the Erie strongholds, leaping down like tigers among the defenders and butchering them without mercy."* Those that were not massacred or driven away, were adopted by the conquerors. So powerful had the Iroquois become, that they conquered, with a few exceptions, all the Indian tribes east of the Mississippi. They thus came to own large tracts of country, much of which was afterward ceded by treaty to the colonies. In 1726, they ceded their lands to England under certain specified conditions, and from that time ceased to occupy the arrogant position of conquering tribes. After 1663, when the war broke out between the Iroquois and the Canadian colonists, the former could no longer continue their conquests in Ohio, and several Indian tribes hastened to occupy this beautiful country. In 1750, there were living in Ohio, among others, the following Indian tribes: The Wyandots (called Hurons by the French); the Delawares and Shawanese (both members of the Algon-

*History of the State of Ohio: First Period, 1650-1787, by James W. Taylor.

quin group); the Miamis (also called Twig-twees); the Mingoes (a branch of the Iroquois or Six Nations), and the Ottawas and Chippewas. The Wyandots occupied the country in the vicinity of Sandusky River. The Delawares were established on the Muskingum and Tuscarawas Rivers, and at a few other points. The Shawanese were chiefly found on the Scioto and Mad Rivers. The Miamis were on the Great and Little Miami Rivers. The Mingoes were in great force at Mingo Bottom, near Steubenville and at several other points in Ohio. The Ottawas occupied the valleys of the Maumee and Sandusky Rivers, and the Chippewas, few in number, were confined to the southern shore of Lake Erie. From 1750 to the war of 1812, these Indian tribes were found in different portions of Ohio, and a great portion of the time were engaged in border wars with the daring pioneers. The history of these wars would fill volumes. Parties of savages, dressed in the spangled paraphernalia of war, would hover about the settlements, and, when the venturesome pioneers were off their guard, would swoop down upon them, with horrid yells, to massacre and pillage and carry into hopeless captivity, or for purposes of heart-rending torture. To punish the savages, bands of daring borderers would make incursions into their country, laying waste their homes and slaughtering the inhabitants. Some of these Ohio tribes were almost constantly at war with the whites during the period mentioned. While members of all the tribes mentioned above were found in Ohio, only four tribes were, in numbers, sufficient to merit a special sketch. These are the Wyandots, Delawares, Shawanese and Ottawas.

The Wyandots, as indicated by the idioms and other characteristics of their language, were related to the Iroquois, but about the middle of the seventeenth century they embraced the religious faith of the Roman Catholics, and, for some reason unknown, severed their connection with their relatives, the Iroquois, and cast their lot with the powerful Algonquians.* Their original residence was in Canada, some authorities fixing their location on Georgian Bay, and others, as Mr. Schoolcraft, on Montreal Island. Their number is estimated to have been about 40,000 souls. Some time after this, they be-

came involved in a war with the Iroquois, by whom they were nearly exterminated, after which they removed first to Charity Island and finally to Quebec. They were found south of the great lakes, in 1660, by some French traders, and, ten years later, having become involved in a war with the powerful Sioux, they removed to Michilimackinac, and were accompanied by Father Marquette. Afterward, they established themselves at Detroit, their hunting-grounds extending into Northern Ohio. In 1778, remnants of the tribe were yet in Canada, while that at Detroit was estimated to contain about one hundred and eighty warriors. In 1829, a small band of the tribe was located in Michigan. They numbered about forty, and were provided with annuities by the Government. Immediately after the war of 1812, the principal portion of the Wyandots, numbering about six hundred, was established on the Sandusky River on a tract of land eighteen miles long east and west, and twelve miles wide. In 1835, the Wyandots decided to sell a strip of land five miles wide on the eastern border of their reservation, and the land was accordingly thrown into market, very likely through the influence of the whites, who coveted the possessions of the Indian. In 1843, the Wyandots were transferred to Kansas, where they have since resided, and the land of their reservation was annexed to the adjoining counties.

The Shawanese are an erratic tribe of the Algonquin family. A tradition of recent origin makes them primarily one with the Kickapoo nation; but they moved eastward, and a part are said to have remained, in 1648, along the Fox River, while the main body was met south of Lake Erie by the Iroquois, and was driven to the Cumberland River. Some passed thence to Florida and some to Carolina. One band was in Pennsylvania at the close of the seventeenth century. Those in Florida lived at peace with the Spaniards, and afterward became known as Savannahs, or Yemassee. These retired to the Creeks, and finally joined the Northern Shawanese. The Iroquois claimed sovereignty over the Shawanese, and drove them West. In 1731, they aided the French; but, in 1758, they sided with the English. They joined the conspiracy of Pontiac, and were active in war until subdued by Boquet. In 1774, enraged at the attacks of Col. Cresap, they roused most of the Western tribes, and, in

*From the American Cyclopaedia the sketches of these four Indian tribes have been taken.

October, defeated the Virginians at Pleasant Point, but sued for peace the following year. Col. Bowman, who marched against them in 1779, was twice defeated. They joined the peace of 1786; but took part in the Miami war, in the campaigns against Harmar and St. Clair, but were reduced by Gen. Wayne, and then entered the peace treaty of 1795. The main body was at this time on the Scioto; but a few had gone to Missouri, and another band had moved South. During the war of 1812, urged by Tecumseh and his brother, the Prophet, they endeavored to unite the Western Indians against the Americans; but those in Ohio remained faithful. The Missouri band ceded their land to the Government in 1825, and the Ohio band in 1831. In 1854, the band of Shawanese proper, living in that part of the Indian Territory now included in Kansas, and consisting of 1,600,000 acres, numbered 900; but at this time, or soon after the tribal relation was dissolved by treaty, and the lands were divided in severalty. Besides these, there were, in 1872, 90 in the Quapau Agency, and 663 in the Sac and Fox Agency.

The Ottawas, when first known to the French explorers, were located on the Manitoulin Islands, and on the northwest shore of the Michigan peninsula. They believed in Michabou, "the great hare," a mythical personage, who formed the earth and developed men from animals; in Mirabichi, "god of the water;" in Missabizi, "the great tiger." Soon after 1649, they fled before the Iroquois to Green Bay, thence west beyond the Mississippi to the country of the Sioux, with whom they became involved in war, when they fell back to Chegoimegon, before 1660, and finally to Mackinaw. The tribe became considerably divided here, one of the divisions settling near Detroit, and the one at Mackinaw passing over to Arbre Croche. The greater number of the Ottawas were in the last war with the French, and at its close Pontiac, an Ottawa chief, and one of the ablest Indians of any tribe that ever lived, organized a vast conspiracy for the destruction of the English. They were under English influence during the Revolution, and at this time numbered about 1,500. They participated in the treaties of 1785, 1789 and 1795, and afterward, by other treaties, they acquired a tract of land on the Miami, thirty-four miles square. By the treaty of 1833, they ceded

their land around Lake Michigan for land south of the Missouri River, and soon ceased to be a distinct band. A band of Ottawas at Maumee, in 1836, ceded 49,000 acres to Ohio, and 200 emigrated to the Osage River, locating south of the Shawanese. Some 230 remained and became scattered in detached bands. In 1867, they became citizens, and in 1870 were removed to a reservation of 24,960 acres in Indian Territory. Several thousand are yet living in scattered bands in Michigan and Canada, and all are self-supporting.

The Delawares are a tribe of the Algonquin family, and, when first known to the whites, were dwelling in detached bands, under separate sachems, on the Delaware River. They styled themselves Renappi, or, as now written, Lenape or Lenni Lenape. The Dutch began trading with them in 1616, and enjoyed friendly intercourse with them until 1632, when the settlement at Swanendael was utterly destroyed by a sudden attack, but trade was soon afterward resumed. The Swedes made attempts to Christianize them, and had Luther's Catechism printed in their language. The Delawares claim to have come from the West with the Minguas, who soon afterward reduced them to a state of vassalage, and when they were conquered by the Five Nations, they were termed women by the latter. The Delawares formed three families, or clans—the Turtle, the Turkey and the Wolf. At the time of the "walking treaty" made by Penn, the Delawares complained that they had been defrauded in the interpretation of the treaty, and showed a reluctance to "walk," upon which the authorities called upon the Six Nations, who ordered the Delawares, as women, to retire. The Delawares were now thrown among warring people, and, though previously mild and peaceable, they now became energetic, and conducted their wars with great ferocity. In a war with the Cherokees, they reached the Ohio, where a portion remained until 1773. They took up arms and fought with the French at Braddock's Defeat and elsewhere, but suffered so much from English attacks that they finally treated for peace, part of them in 1757, and the others after the fall of Fort Du Quesne. They then centered on the Susquehanna, and a small number soon afterward settled on the Muskingum. They took up arms in the border war, but were badly defeated at Bushy Run, August, 1763, by Boquet. Their towns on the

Susquehanna were pillaged and burned, many were killed and dispersed, and in 1768, they emigrated to Ohio. In 1774, they were again badly defeated at Pleasant Point, and a part were afterward engaged in the Revolution. In 1772, the Christian Delawares settled on the Muskingum, but were hastily removed to Sandusky, in 1781, by the English. Early the following year, ninety-four who returned were murdered by a party of enraged borderers under Col. Williamson. By the treaty of 1785, the Delawares occupied the soil between the rivers Cuyahoga and Miami. At this time there were many scattered bands of Delawares, several of which were Christian, and at peace with the whites. The main tribe, at Grand Blaze, with 480 warriors, was hostile, and 400 under Buckongahelas were at the defeat of St. Clair, in 1791; but four years later, they joined the peace treaty at Greenville. In 1808, there were 800 at Wapeminskink, a few at Sandusky, a few on the Muskingum, and a large body at Fairfield, Canada. In 1818, the Delawares, 1,800 strong, ceded their lands to the United States and emigrated to Missouri. In 1829, many went to Kansas, and some south of the Red River. In 1853, they sold all their lands to the United States, except that in Kansas. During the last war, out of 201 able-bodied warriors, 170 enlisted and served in the army. They sold their lands, in 1868, to the Missouri Railroad, and settled on the Verdigris and Cone. In 1866, they became citizens, though their clans—Turtle, Turkey and Wolf—still exist.

During the border wars of the last half of the last century, the Indian villages, in what is now Summit County, were actively engaged.*

*When these villages were first established is not definitely known; but from an old map which was published in 1755, by Lewis Evans it is ascertained that at that time there was a Mingo village on the west bank of the river, probably in what is now eastern Bath, and an Ottawa village on the opposite side of the river in Northampton, or perhaps, as some say, in Boston. There is also marked on the map a French trading-house, which was located either in northwestern Boston Township, or on the Cuyahoga, five miles from its mouth. The latter view is rendered improbable, from the fact, among others, that the house on the map is located very near the Ottawa village. The house, beyond reasonable doubt, was located on the bank of the river, about forty rods north of Boston Village. A few old apple trees were found growing near the spot by the early settlers. These were probably planted by the French. When the whites appeared, this place was occupied by the Ottawas, under their Chief Stigwanish, while a half-mile northwest was a Seneca village under the Chief Ponty. There were two other Indian villages, in early years, at Cuyahoga Falls. On the north side of the river was an encampment of Delawares, and on the south, one of the Iroquois. There was a Delaware village in Coventry Township, under Capt. Pipe, or in the Indian language, Tauhange-caupouye, or Hopocan. There were also, at times, temporary encampments in almost every township in the county. The Chippewas were found among others, as were also a few Wyandots.

They sent numerous small bands to Western Pennsylvania to massacre the white pioneers on the border, and destroy their habitations. It is extremely probable that some of the borderers who were captured on these expeditions were tortured to death at the villages in Summit County. Perhaps these spots, now so quiet and peaceful, once echoed with the frenzied death-cries of white men, while around, on every hand, circled the leaping and exulting savages, tearing up with hot iron the bleeding flesh of the despairing sufferers, and filling the air with their dreadful yells of revenge. Here the dusky savages, decked in the gaudy ornaments of border war, invoked the favor of their god before descending like death upon the defenseless settlements. Here could be heard their wild chants—

“Ne-gau nis-sau—ne-gau nissau
Kitchi-mau-li-sau—negau nissau”—
(I will kill—I will kill
The white man—I will kill)—

before they started on those expeditions, of which we read in histories. In 1759, there lived in Cumberland County, Penn., a family named Campbell, consisting of the father and a bright little girl, about seven years old, named Mary. Residing in the same house was another family named Stuart, consisting of the husband and wife, and four or five children, one of these being an infant. One day, when the men were absent, Mrs. Stuart left her children in charge of the little girl Mary, and went a mile or two distant to the house of a neighbor. In her absence, a small band of Delaware Indians took possession of the cabin, and made all the children prisoners, much to the consternation of little Mary, who was old enough to know that some awful calamity was pending. The Indians, knowing that the adult members of the families were not far away, made preparations to receive them. As Mrs. Stuart, on her return, approached the house, she heard the children screaming, and hurried forward, but was instantly made prisoner by the savages, who then thought it best not to await the return of the men, but, with their prisoners, started for their camp in Armstrong County. They soon became tired of carrying the infant, which was fretful, and one of them finally took it, and, in the presence of its shrieking mother, dashed its brains out against a tree, and cast its quivering body in the bushes. The

Indians pushed on rapidly, urging their weary and agonized prisoners to their best pace, and carrying those that finally gave out. A little boy about seven years old, named Sammy, was carried upon the back of one of the Indians until the latter was tired. On the third day, this Indian fell behind the others, and when he again appeared, the little boy was missing, while at his belt Mrs. Stuart recognized the early locks of her little Sammy. The poor mother and her children were hurried on until at last, weary and footsore, they reached the Indian village. Here they were soon separated, and one or more of them was adopted by the Indians. The following year, Netawatwees, the chief of this band, removed with his followers and prisoners to their village at the "Big Falls" of the Cuyahoga, now in Summit County, Ohio. Mary had been adopted by the chief, and was treated with uniform kindness, occupying a position of equality with the Indian children. Here the prisoners remained until 1764, when they were delivered to Col. Boquet, at his fort in Tuscarawas County, and soon afterward were returned to their friends in Pennsylvania. It is very probable that other white prisoners from the Indian villages in Summit County were delivered up at this treaty. Col. Boquet had come out with an army of 1,500 men. The appearance of this force awed the Indians, and they sued for peace in the most abject manner, delivering up at the same time, some 300 white captives. Fathers, brothers and husbands had come out in hopes of finding their lost friends, and when the captives were given up the scene beggars description. "There were seen," says a writer in the Historical Record, "fathers and mothers recognizing and clasping their once captive little ones; husbands hung around their newly-recovered wives; brothers and sisters met after long separation, scarcely able to speak the same language, or to realize that they were children of the same parents! In the interviews, there was inexpressible joy and rapture; while, in some cases, feelings of a very different character were manifested by looks or language. Many were flying from place to place, making eager inquiries after relatives not found, trembling to receive answers to their questions, distracted with doubts, hopes and fears; distressed and grieved on obtaining no information about the friends they sought, and, in some cases, petrified into living monuments

of horror and woe on learning their unhappy fate." "In many cases," Albach says, "strong attachments had grown up between the savages and their captives, so that they were reluctantly surrendered, some even not without tears, accompanied with some token of remembrance." The girl, Mary Campbell, and Mrs. Stuart and her children, were the first white persons known to have lived in what is now Summit County.

During and after the Revolution, the Indians of the Cuyahoga Valley were very troublesome to the Pennsylvania pioneers. The details of their savage barbarity would sicken the heart. All along the Ohio River, on both sides, the Indians and borderers met in terrific conflicts, which resulted in the death or captivity of one of the parties. Almost the entire half of the last century was a succession of border wars. So dreadful and frequent became the attacks of the savages that many expeditions were sent to reduce their villages and slaughter the people or drive them far off into the forest. Young men on the border were trained to the one pursuit of killing Indians, and the names of Poe, Kenton, Wetzel, Brady and a host of others will ever bear a prominent place on the page of the American border wars. The daring and intrepidity of many of these Indian slayers were astonishing. They seemed to delight in the awful work and courted death and torture with a reckless courage that arouses the keenest interest of those who read of their exploits. Hundreds of Indians were killed without any pretext, save the sport afforded the intrepid borderers, or to avenge wrongs done by the savages. Horse-stealing became a great pastime, in which the borderers and their savage foes freely indulged; and many of the fierce personal conflicts, read of all over the country, were occasioned by lawless incursions of this character. Small armies were sent at various times to different portions of Ohio to defeat the Indians or treat with them for peace. Among these were the expeditions of Cols. Bradstreet and Boquet, in 1764, by which comparative peace was secured until 1774, when a border war again slowly broke out. About this time, several unfortunate attacks on the Indians were made, in one of which the inoffensive relatives of Logan, the Mingo chief, were ruthlessly murdered by a small command under Col. Michael Cresap. This barbarous act precipitated events, and the Indians, roused

for vengeance, began scouring the border to murder and pillage. The utmost terror, gloom and consternation pervaded all the frontier settlements. Gen. McIntosh conducted an expedition against the Indians in 1778, and Col. John Bowman the following year. Col. G. R. Clarke marched against them in 1780; Gen. Daniel Broadhead in 1781; Col. Lowry the same year; Col. Williamson in 1782; Col. Crawford the same year; Gen. Clarke again in 1782; Col. Benj. Logan in 1786; and, besides these, there were many others. It became the practice on the border to organize small companies of "rangers," who, when the savages swept down upon some family and either killed or captured the members, would hastily assemble and pursue the enemy, to chastise them and recover the captives. A noted leader of these rangers, in Western Pennsylvania, was Capt. Samuel Brady. He was a man of prodigious size, strength, endurance, activity and courage, and became known to all the Northern Indians, who made desperate attempts to either capture or kill him. A few years previous to this, his father and brother had been killed by the Indians, and he is said to have taken a solemn vow to devote his future life to revenge. The following is quoted from Howe's "Historical Collection:" "Brady's residence was on Chartier Creek, on the south side of the Ohio, and being a man of herculean strength, activity and courage, he was generally selected as the leader of the hardy borderers in all their incursions into the Indian Territory north of the river. In about the year 1780, a large party of warriors from the falls of the Cuyahoga and the adjacent country had made an inroad on the south side of the Ohio, in the lower part of what is now Washington County, on what was then known as the settlement of 'Catfish Camp,' after an old Indian of that name who had lived there when the whites first came into the Monongahela Valley. This party had murdered several families, and with the 'plunder' had recrossed the Ohio before effectual pursuit could be made. Brady immediately selected a few chosen rangers of known courage and activity, perhaps twelve or fifteen or more in number, and hastened on after the Indians, who, having one or two days the start, could not be overtaken in time to prevent their return to their villages. Near the spot where the town of Ravenna now stands, the Indians

separated into two parties, one of which went to the north and the other west to the falls of the Cuyahoga.* Brady's men also divided, a part pursuing the northern trail, and a part going with their commander to the Indian village lying on the river in the present township of Northampton, in Summit County. Although Brady made his approaches with the utmost caution, the Indians, expecting a pursuit, were on the lookout, and ready to receive him with numbers four times as great. When Brady's men were attacked, it was instantly seen that their only safety was in hasty flight, which, from the ardor of the pursuit, soon became a perfect rout. Brady directed his men to separate, and each one to take care of himself; but the Indians knowing Brady, and having a most inveterate hatred and dread of him, from the numerous chastisements he had given them, left all the others, and, with united strength, pursued him alone. The Cuyahoga makes a wide bend just before entering Summit County, thus forming a peninsula of several square miles of surface, within which the pursuit was hotly contested. The Indians, by extending their line to the right and left, forced him on to the bank of the stream. Having, in times of peace, often hunted over this ground with the Indians, and knowing every turn of the Cuyahoga as familiarly as the villager knows the streets of his own hamlet, Brady directed his course to the river at a spot where the width of the stream is compressed by the rocky cliffs, into a narrow channel of only twenty-two feet across the top of the chasm, although it is considerably wider beneath, near the water, and in height more than twice that number of feet above the current. As he approached the chasm, Brady, knowing that life or death was the issue, concentrated his utmost efforts and leaped the river at a single bound. It so happened that on the opposite side, the leap was favored by a low place, into which he dropped, and, grasping the bushes, he was thus enabled to ascend to the top of the cliff. The

*A celebrated Indian war-path, extending from Sandusky to Beaver (Fort McIntosh), passed through Summit County. This was the trail traversed by the Indians of Northern Ohio, in their expeditions against the border settlements in Pennsylvania. The trail crossed the Cuyahoga in Franklin Township, Portage County, at what is called "Standing Stone," and divided at Fish Creek, the northern branch extending across Stow and Northampton Townships, to the Indian village in the latter, thence across the river to the Mingo village in Bath, and thence westward, while the southern branch extending somewhat south of west, led to the villages at Cuyahoga Falls, thence on through Portage and Coventry, to the Tuscarawas River and the Delaware village in Coventry.

Indians, who were in close pursuit, were for a few moments lost in wonder and admiration, and before they had recovered their recollection he was half way up the side of the opposite hill, but still within reach of their rifles. They could easily have shot him at any moment before; but, being bent on taking him alive for torture and to glut their long-delayed revenge, they forbore to use the rifle; but seeing him now likely to escape they all fired upon him, one bullet severely wounding him in the hip, but not so badly as to prevent his progress. The Indians had to make considerable of a circuit before they could cross the river, and by this time Brady had advanced a good distance ahead. His limb was growing stiff from the wound, and, as the Indians were gaining on him, he made for the pond, which now bears his name, and, plunging in, swam under water a considerable distance, and came up under the trunk of a large oak which had fallen into the pond. This, although leaving only a small breathing place to support life, still completely sheltered him from their sight. The Indians, tracing him by blood to the water, made diligent search all around the pond; but, finding no sign of his exit, finally came to the conclusion that he had sunk and was drowned. As they were at one time standing on the very tree beneath which he was concealed—he, understanding their language, was very glad to hear the result of their deliberations, and after they had gone he emerged from his hiding-place, and, weary, lame and hungry, made good his retreat to his own home. His companions also returned in safety. The chasm across which he leaped is in sight of the bridge, where it crosses the Cuyahoga, and is known in all that region as “Brady’s Leap.” The pond where he concealed himself is also known as Brady’s Pond. Just where he was first attacked by the Indians is not definitely known, but it was somewhere in Northampton Township. It is not likely that the Indians, who were expecting an attack, delayed their movement upon the rangers until the latter reached their village. It is probable that they were in ambush not far from their village, and the caution of the rangers alone prevented their being caught in the trap. The savages came on in great numbers, and the rangers very likely kept together for several miles, or until they were somewhere in Stow Township, when they sep-

arated, and each man provided for his own safety. Brady, on another occasion very similar to the one above narrated, leaped a stream in Pennsylvania, twenty-three feet wide, and escaped from a large party of Indians, who were almost upon him.

The Mingo village in Bath was no doubt often visited by Logan, the famous Indian chief. He was the son of Shikellimus, a Cayuga chief, who dwelt at Shamokin, Penn., in 1742. The father was a personal friend of James Logan, the Secretary of the Province, in whose honor the son was named. They came to Ohio about 1772, locating at Mingo Bottom, near Steubenville. Here it was that, about 1774, at the breaking-out of Lord Dunmore’s war, Logan’s relatives were murdered. This roused him to vengeance, and he began an indiscriminate and extensive slaughter of all the whites he met. Within six or eight months, Logan alone murdered twenty or thirty persons. The following speech, though improved by Jefferson and others, was delivered by Logan to John Gibson, an interpreter, who had been sent out by Lord Dunmore to the Indian towns. According to Gibson, Logan asked him to walk out in the woods, and when the two had reached a lonely copse and had sat down, Logan, with many tears, delivered his celebrated speech:

I appeal to any white man to say, if ever he entered Logan’s cabin hungry, and he gave him not meat; if ever he came cold and naked, and he clothed him not. During the course of the last long and bloody war, Logan remained idle in his cabin, an advocate for peace. Such was my love for the whites, that my countrymen pointed as they passed, and said: “Logan is the friend of white men.” I had even thought to have lived with you, but for the injuries of one man. Col. Cresap, the last spring, in cold blood and unprovoked, murdered all the relations of Logan, not even sparing my women and children. There runs not a drop of my blood in the veins of any living creature. This called on me for revenge. I have sought it. I have killed many. I have fully glutted my vengeance. For my country, I rejoice at the beams of peace. But do not harbor a thought that mine is the joy of fear. Logan never felt fear. He will not turn on his heel to save his life. Who is there to mourn for Logan? Not one.

Mr. Jefferson says: “I may challenge the whole orations of Demosthenes and Cicero, and of any more eminent orator, if Europe has furnished any more eminent, to produce a single passage superior to the speech of Logan, the

Mingo chief." It is considered a masterpiece of Indian eloquence. Logan is said to have been one of the noblest specimens of humanity, of any race, that ever lived. He was, as he said, the friend of the whites; but the deliberate murder of his relatives inflamed his savage nature, and he "fully glutted his vengeance." He had a high sense of honor, and when trusted would die sooner than betray the trust. He undoubtedly visited the Mingo village in Bath. At the mouth of Yellow Creek, in Northampton, is an extensive Indian cemetery, which probably belonged to the Mingo. This creek was named for the one down the river from Steubenville, at which was the Mingo village, where Logan's relations were murdered.*

The Delaware villages in Summit County, about the time of Lord Dunmore's war, were well populated; though the larger villages of this tribe, in Eastern Ohio, were on the Muskingum. In the wars between Great Britain and France for an extension of territory in America, great efforts were made by both nations to secure the Indians as allies, for thereby a dreaded and powerful weapon could be wielded. Sometimes the French were successful, and then the English pioneers in Pennsylvania and Virginia experienced the horrors of barbarous border wars. At other times, the English succeeded and the French were made to suffer in a like manner. Many times tribes of Indians remained neutral, while the French and English were struggling for the mastery; or perhaps portions of some tribe would engage in the wars, while others would proclaim their neutrality and remain at peace, cultivating their fields and engaging in the chase. After the murder of the relatives of Logan, several weeks were spent by the hostile Indian tribes to effect a confederation of all the Ohio Indians, for the bloody purpose of an exterminating and universal border war against the American settlers. The Senecas and Shawanese were eager for hostilities to begin; but the Delawares refused to join the confederation as a nation, though many of her young men were induced to take up the hatchet. They could not endure the derisive title—*Showon-*

noks, or white people—which their war-like neighbors threw in their faces. The Delaware bands in Summit County remained at peace, though beyond a doubt many of their young men joined the tide of hostilities. The neutrality of the Delawares, no doubt shortened the war and prevented a concentration of the hostile Indian forces. Just before the Revolution, when it was seen that war was inevitable, great efforts were made by both the British and the Americans to secure the assistance of the Indians. It was estimated that the Indians in New York, Ohio, and near the lakes, could bring 10,000 warriors into the field; and, it was plainly apparent that this large force might turn the pending crisis either way. The English, through their artful emissaries, made great efforts to effect an alliance, and were generally successful. Four out of the six tribes of the Six Nations joined the British; but, a majority of the Delawares and a numerous party of the Shawanese were for neutrality. At the Pittsburgh conference, Capt. White Eyes, a distinguished Delaware chief, boldly advocated the American cause, much to the annoyance of the Senecas, who were for war in the interest of the British. The Wolf faction of the Delawares, under Newalike and Capt. Pipe, withdrew toward Lake Erie to join the British; but Netawatwees, the Delaware chief, one of whose villages was at Cuyahoga Falls, sustained the view of Capt. White Eyes, as did also Big Cat, Capt. John, Killbuck and others. These chiefs sent embassies to all the hostile tribes, exhorting them not to take up the hatchet or to join either side. It will thus be seen that the powerful Delaware tribe was the only one in Ohio, which, as a nation, refused to take up the hatchet. In New York, the friendship of the Oneidas and Tuscaroras was secured. However, the Delawares were afterward swept into the vortex of war, but not until after the French alliance had been consummated, whereby much of the horror on the border was prevented. By 1777, the hostile Indians had begun their work in earnest, and the white settlers sought the protection of the forts, or fled to the colonies in the East. Numerous war parties of savages, under their chiefs, or the white renegades, Girty, McKee, Elliott, and others of their ilk, conducted their dreadful expeditions with such malignant ferocity as to cast gloom and terror over the frontier settlements. The Otta-

*This is not positively known to the writer, though there are numerous evidences to indicate its truth. No one in the county who was interviewed could tell why Yellow Creek was thus named, but from the fact that, after the murder of Logan's relatives, the Mingoos, or at least a large band of them, located in Bath near this stream, it seems highly probable that the stream received its name as stated in the text.

was, Senecas and Mingoos, of Summit County, were active in the war in the cause of the British, and, beyond question, Simon Girty, who became a Seneca by adoption, and George Girty, who became a Delaware, were often at these villages. The Delaware chiefs mentioned above, who advocated neutrality, had been mostly converted by the Moravian missionaries. The venerable Netawatwees, chief of the Turtle branch of the Delawares, was among the number. As near as can be learned, it was a band of the Turtle Delawares that had a village at Cuyahoga Falls; while, very likely, the band in Coventry was under Capt Pipe, or Kogieschquano-heel, the celebrated Delaware war-chief. It was almost wholly due to the missionaries and their converts that the Delaware bands upon the Muskingum refused to take part in the border wars. To these men—these noble missionaries—should be accorded the honor of preventing, in a material degree, many of the direful results of the Indian border wars. Beyond all probability, these missionaries visited the Indian towns, in Summit County, to conduct their good work of spiritual regeneration. Indian villages were strewn all along the valley of the Tuscarawas, and on the portage path in this county. So successful were the missionaries in their efforts to secure peace, that at last the renegades, Girty, McKee and Elliott, complained to the British commandant at Detroit, saying that the Moravians not only prevented the Delawares from joining the British, but held constant communication with the Americans on the state of the war. Immediately after the Coshocton campaign, when the peace-chiefs of the Delawares were subordinated to the war-chiefs, Buckongahelas became the controlling power at the head of this nation, and through his influence the Indians, including many of those who had been converted, took up the hatchet. The Christian Indians were removed to Sandusky; but a number who afterward returned were cruelly murdered; but their death was bitterly avenged by the defeat of Crawford, and the awful death of himself and many of his command.

On the 21st of January, 1785, the treaty of Fort McIntosh (Beaver) was effected, by which the boundary line between the United States and the Delaware and Wyandot nations was fixed as follows: To begin at the mouth of the Cuyahoga, thence up said river to the portage

between it and the Tuscarawas; thence down said branch to the forks above Fort Laurens; thence west to the portage of the Big Miami; thence along said portage to the Ome River, and down the southeast side of the river to its mouth; thence along the south shore of Lake Erie to the mouth of the Cuyahoga. It will thus be seen that the Delawares and Wyandots were confined to the west side of the Cuyahoga, the summit portage path, and the Tuscarawas; while the tribes of the Six Nations were east of this dividing line. This boundary was confirmed by subsequent treaties; but, in 1805, at Fort Industry, the Delawares, Ottawas, Wyandots, Chippewas, Shawanese, Meuses and Potawatomes were removed to the western part of the State, and the celebrated Cuyahoga boundary line became a thing of the past. The Senecas relinquished their rights to the land east of the Cuyahoga in 1796. This brings the Indian annals down to the time of the first appearance of white settlers in the county.

In the year 1800, there were living in what is now Summit County, bands of Delawares, Senecas, Wyandots, Chippewas, Ottawas, Mingoos, and very likely members of other tribes. But six years before, the most of these had been at war with the whites, and it was no wise impossible that the savages might again fall upon the settlers at any moment. All the war-like customs of the tribes were retained and practiced, probably to keep the warriors in trim for another struggle, should it break out. By 1805, many settlers had appeared in the county, and the movements of the Indians began to be closely observed. They mingled freely with the whites, and although many personal encounters occurred, yet no general outbreak was made. It became the custom of the white hunters, many of whom had participated in the fierce border wars, to assemble at the Indian villages to talk with the natives, trade with them, race with them, shoot with them, and silently observe their peculiar customs. The Indians, regardless of the prospect for continued peace, still held their war and scalp dances, and engaged in all their wild and savage customs. The hunters, when present, were often invited to join the revelry, which they frequently did, but not with the peculiar and graceful skill of the natives. Large fires were lighted, and the savages, armed and painted as if for the war-path, surrounded them in circles, and then, with

a wild, monotonous song accompaniment, they began their dance around the fire, springing up and down, first on one foot and then on the other, chanting in the meantime a guttural "he, he, he; haw, haw, haw!" blending their dance with innumerable antics, grimaces and contortions, and interspersing their song with wild whoops, made to quaver at first by the motion of the hand on the lips, but ending with a clearness and force that made the forest ring. Liquor they dearly loved, and, when thirsty, would part with anything they possessed to secure an ample potation of their favorite beverage. Under its influence, their savage and warlike spirit became dominant, and they were ready and anxious to assert their demands, and enforce them if they were denied. They often entered cabins and demanded whisky, and, if it was denied them, they often took it, especially if the men were away from home. In a case of this kind, the women were usually wise enough to get rid of their guests at the earliest possible moment, before the liquor began to assert itself, as otherwise fright, anxiety, danger and, possibly, injury, were sure to result. Sometimes, however, the Indians refused to go, but remained to flourish their scalping-knives and tomahawks around the heads of the children, and terrify the distracted mother by threats of death. Sometimes the husband and father would return while the Indians were at the height of their deviltry, in which case a fight, often accompanied with wounds, was sure to ensue. Numerous instances of this character will be found in the chapters of township history. Capt. Heman Oviatt established a store in Hudson Township, where liquor was kept for sale. The Indians were drawn thither, and numerous drunken brawls occurred in the neighborhood. In the absence of Mr. Oviatt, his wife occupied the position behind the counter (if there was such a piece of furniture), and dealt out goods and liquor to the whites and Indians. On one occasion of this kind, when there was a small temporary encampment of some twenty Indians, under the sub-chief, Wabmung, near the store, and the men were at work in the woods, at a considerable distance from the house, and out of sight, an Indian presented himself, saying that the chief, Wabmung, had sent him to the store to get a small keg of whisky. The credit of the chief was good, and Mrs. Oviatt gave the messenger the liquor.

It occurred to her soon afterward that the chief had not sent for the whisky at all, but that the Indians, having no money nor credit, and desiring a spree, had adopted the ruse to secure the liquor. She instantly made up her mind to regain what was left, at any rate. The Indians were taking on at a great rate, and did not perceive her until she had seized the keg, and had gone some distance, on the run, toward the store. A few half-drunken ones immediately set up a yell and pursued her, but she succeeded in reaching the store before the Indians. Elizabeth Walker, a hired girl, was holding the door, and she slammed it shut as soon as Mrs. Oviatt had entered, but not before the foremost Indian had caught up a frying-pan that was on a bench at the side of the house, and had struck savagely at the hired girl, preventing, at the same time, the complete closing of the door. He began pushing hard at the door, and as the two women saw that he was half-helpless on account of the liquor he had drunk, they suddenly threw the door open, seized the Indian, who had fallen prostrate, dragged him into the room, and closed and barred the door just as several others threw themselves against it. The Indian in the room began kicking and thrashing around, whereupon the two women got some loose ropes and tied him securely. By this time, the Indians on the outside were pounding loudly on the door, demanding admittance; but Mrs. Oviatt caught up a rifle, and pointing it through the window, warned them to leave or she would fire, at which they withdrew a short distance. She directed Betsy Walker to go to the loft and blow the horn for the men, which was promptly done, and soon they appeared, whereupon the Indians beat a retreat. The captive Indian was kept until dark, when his squaw appeared, and asked for the person of her recreant lord, but this was denied until he was completely sober, when he was allowed to depart with the ropes still about his arms. The last seen of the couple was the tumble they took together over a rail fence.* This event is narrated to illustrate a common occurrence, differing only in minor particulars. Sometimes the difficulties resulted in severe fights, but usually all the transactions between the two races were amicable. When the Indians ex-

*This circumstance is narrated on the authority of Mrs. Elizabeth (Walker) Tappan, the hired girl who was present, and who is yet living in Boston Township, at the unusual age of ninety-three years.

pected to have a "loud" time with whisky, it was their custom to give up their weapons to their squaws, so that no lives would be lost. In 1806, their difficulty with Daniel Diver occurred, by which Nicksaw, a son-in-law of the chief, John Bigson, was shot by the Indian slayer, Jonathan Williams, an account of which will be found in another chapter of this volume. The village of Stigwanish was on the Cuyahoga, in Boston Township. Here the tribe had erected a wooden god, probably Missabiza, "the great tiger," and when they departed on their hunting expeditions, they were accustomed to hang their choicest tobacco around his neck. Some of the earliest settlers, knowing this, and being very fond of "the weed" (not altogether an unusual circumstance), often slyly appropriated it. So far as known, no judgment was ever sent against them for the sacrilegious act.

At the time of the Diver difficulty, the Indians held a council, in which some of the warriors insisted that the Indians should begin an indiscriminate slaughter of the whites before the latter had time to unite on a defense. The Indians were thoroughly incensed, but after a time better counsel prevailed. They saw that, while they might have a temporary advantage, and perhaps slay many of the whites, the tide of war was sure to turn against them with overwhelming force. The white hunters often got the Indians drunk for no other purpose than to get the better of them in trade. When their senses returned, the Indians, not recollecting anything of the affair, demanded their property, and, in case of a non-compliance with their demands, a fight was sure to ensue. As winter approached, it was the custom of the Indians to lay in an abundance of wild meat and provisions, and seek the shelter of their larger and permanent villages, there to remain during the cold months in comparative comfort; but when spring came, with her pleasant weather and green leaves and grass, the winter residences became almost deserted, and the tribe, divided into small bands, often comprising the members of but one family, traveled far and near, to spend the warm months in hunting and trapping. They pitched their wigwams on the banks of streams or by some pleasant lake where an abundance of fish could be obtained. It is asserted by the old settlers that the Indians never wantonly slaughtered the game, allowing the meat to lie in quantity

on the ground. On the contrary, they killed only what they expected to use. They were often hired to hunt for the settlers. They would bring in a deer and exchange it for provisions, such as potatoes, turnips, pumpkins, melons, etc. At other times, they would agree to furnish so much game for a specified quantity of whisky, corn meal, flour or money. Stigwanish, the chief of the Ottawas, and John Bigson, his son, are said to have been fine specimens of the North American Indian. The latter was about six feet in height, straight as a reed, possessing an enormous chest; was long-armed and powerfully built, with a pair of coal-black eyes that seemed to see everything at once. In truth, he was as fine a man as was ever pictured on the page of Cooper. Stigwanish is also said to have been a fine old fellow. He possessed some noble traits of character that made him prominent among his tribe, and a model for the imitation of the whites.

Thus the years passed by, until the war of 1812. A great deal of apprehension was felt among the settlers at this time, that the Indians might unite in the war on the side of the British, as they were almost sure to do, in which case a fearful time of blood and death might be expected. They were numerous, and a short time before the war an unusual number of war and scalp dances were held, and the Indians seemed livelier than they had been for ten years before. They would brandish their weapons in a menacing manner, and the settlers were aware that something unusual was about to transpire. Some efforts were made to ward off the coming calamity, and it is said that a block-house was erected in the western part of the county, where a few settlers assembled for protection. During the early summer of 1811, the Indians became very bold and insolent; but finally they all suddenly vanished, and a few days later, news of the battle of Tippecanoe reached the whites. It was afterward ascertained that, if the British had been successful at Tippecanoe, the Indians would have swept in fury upon the borderers. As it was, they were silenced, and departed toward the setting sun. A few afterward returned to the scenes they knew so well, but some of these were killed, and the others dispersed, and the story of the red man is now told as a bright romance of the past.

CHAPTER III.*

EARLY SETTLEMENT OF THE WHITES—ORGANIZATION OF THE COUNTY—PUBLIC BUILDINGS—
COUNTY SEAT QUESTION—SETTLED BY VOTE—COUNTY OFFICIALS—CON-
GRESSMEN AND ELECTORS—THE COUNTY INFIRMARY, ETC.

IN presenting a brief history of Summit County—its early settlement, organization, erection of public buildings, etc.—the writer will not attempt to rehearse the generally well-known early history of Ohio and the Western Reserve, nor give in detail the thrilling experiences of the hardy, enterprising and patriotic pioneers by whom the several townships composing the county were originally settled. It is sufficient for the present purpose to say that the first known settlement of whites, within the present limits of Summit County, was made in Hudson, in the year 1800, followed by Northampton in 1802; Stow in 1804; Boston, Coventry and Springfield in 1806; Northfield and Tallmadge in 1807; Green in 1809; Bath, Norton and Richfield in 1810; Portage in 1811; Copley and Franklin in 1814; and Twinsburg in 1817; and that to the indomitable energy and fortitude, superior intelligence and unswerving integrity of those early settlers, the present owners and occupiers of the finely cultivated farms, and the dwellers in the thriving villages and cities within its borders, are wholly indebted for the priceless heritage which they now enjoy.

Of the sixteen townships composing Summit County, ten—viz., Northfield, Twinsburg, Boston, Hudson, Northampton, Stow, Portage, Tallmadge, Coventry and Springfield—originally belonged to Portage County; four—viz., Richfield, Bath, Copley and Norton—to Medina County; and two—viz., Green and Franklin—to Stark County. Interesting and appropriate sketches of the several townships here enumerated, with biographical sketches of the pioneer settlers and other citizens thereof, will be found elsewhere, under their appropriate titles.

With the opening of the Ohio Canal, finished from Cleveland to Akron in 1827, and through to Portsmouth in 1830, and the greatly increased

facilities for travel and transportation which it afforded, not only were the agricultural interests of the State, along its entire line, very largely stimulated, but a very marked impetus was thereby given to commercial and manufacturing interests, also. Thus, while the very considerable business operations previously existing at Middlebury, and one or two other points in the Cuyahoga Valley, were materially increased thereby, the completion of the canal was immediately followed by the utmost activity at Akron and Cuyahoga Falls, then just springing into existence as manufacturing villages, both being largely supplied with water-power—at that early day the great desideratum in all manufacturing enterprises.

So rapid was the development of these villages, and the several townships contiguous to the great "thoroughfare," that the people soon began to feel that their respective seats of justice, Ravenna, Medina and Canton, where they were compelled to go to serve as jurors and witnesses, and for the payment of their taxes, were too far from their business centers, and, as early as 1835, began to talk "new county." The proposition was not at all kindly received by the county officials, and the people of the more remote portions of Portage, Medina and Stark, out of whose fair proportions the required territory for the new county, if erected, would have to be carved, and nothing was definitely accomplished in that direction until 1840.

In the fall of 1839, by a special effort and united action of the voters—both Whigs and Democrats—of the two tiers of townships which it was proposed to detach from Portage County, Rufus P. Spalding, Esq., then practicing law in Ravenna, and Ephraim B. Hubbard, an influential farmer of Deerfield Township, were elected as Representatives to the State Legislature, both of those gentlemen being Democrats, but pledged to the new county project, thus being

*Contributed by S. A. Lane.

elected over the regular Whig nominees, Portage County at that time, particularly the western portion, being largely Whig, on strict party issues; Simon Perkins, Jr., then as now a resident of Portage Township, a member of the Whig party, being at the time a member of the State Senate.

The Legislature convened and organized on the 2d day of December, 1839, and, on the 17th day of the same month, Hon. James Hoagland, of Holmes County, as Chairman of the committee on new counties, reported to the house "a bill to erect the county of Summit," which was read the first time. The Stark County Representatives, Hons. John Smith and James Welch, the Medina County Representative, Hon. James S. Carpenter and the Lorain County Representative, Hon. Albert A. Bliss, all directly and vigorously opposed the movement; the first three because of the curtailment of their respective counties, in providing the requisite territory for the proposed new county, and the last because of the proposition to transfer the townships of Spencer and Homer from Lorain to Medina, to keep the territory of the latter up to the constitutional requirement, after being shorn of her eastern tier of townships. Representatives of several other counties in different portions of the State, in danger of being dismembered by similar new county projects, also earnestly opposed the measure, so that it had to be fought through inch by inch, passing the House by a majority of three only, on the 6th day of February, 1840.

In the Senate, also, the struggle was equally determined and severe, Senators Hostetter, of Stark, Birch, of Lorain, Nash, of Meigs, and Thomas, of Miami, actively and energetically opposing the bill. Active and influential "lobbyists," both for and against the measure, were also in attendance in full force, and the various tactics and devices resorted to in promoting the measure on the one hand, and retarding it on the other, would make a good-sized volume of "mighty interesting reading" if it could be correctly written up. The progress of the bill through the House and Senate, as briefly recorded in the proceedings of the two Houses, will give the reader a pretty fair idea of the bitterness of the fight, though by no means conveying to the mind anything like an adequate conception of the vast amount of argument, eloquence, repartee, vituperation, ridicule

and fun indulged in during the four months, nearly, that it was under consideration.

On motion of Mr. Spalding, the bill was taken up for consideration, December 21, when, on motion of Mr. Welch, the further consideration of the bill was postponed until the second Thursday in January. Yeas, 42; nays, 28.

On motion of Mr. Spalding, the bill was again taken up, January 11, when Mr. Welch moved to recommit the bill to the Committee on New Counties, with instructions to report the number of petitioners and remonstrants for and against the project—which was agreed to.

The committee having made its report, on motion of Mr. Spalding, the bill was again taken up, January 17, when Mr. Welch moved to postpone the further consideration of the bill until the first Monday of December next, which was lost—yeas, 28; nays 32. The bill was then laid on the table.

Mr. Spalding moved to take the bill from the table, January 27, which was lost—yeas, 25; nays 30.

Feb. 6.—On motion of Mr. Spalding, the bill was again taken up, and, after some delay, caused by Mr. Welch moving a call of the House, was put upon its passage and carried—yeas, 34; nays, 31.

The bill, as received from the House, was read for the first time in the Senate February 7, and February 27, Mr. Hostetter, of Stark, moved to strike out of the bill that part of the territory belonging to Stark County. Lost—yeas, 15; nays, 18.

Mr. Nash, of Meigs, moved to strike out that portion of the bill exempting the people resident in the Stark County townships from taxation for the erection of the public buildings for the proposed new county. Lost—yeas, 14; nays, 19.

On being read the third time, February 28, Mr. Thomas, of Miami, moved to recommit the bill to the Committee on New Counties, with instructions to so amend as to strike out that part exempting Green and Franklin Townships from taxation for public buildings. Lost—yeas, 13; nays, 21.

Mr. Hostetter then moved that the further consideration of the bill be postponed until the first Monday of December next. Lost—yeas, 7; nays, 27.

Mr. Birch, of Lorain, moved to refer the bill to the Judiciary Committee, with instructions

to so amend as to strike out the two Lorain townships. Lost—yeas, 9; nays, 25.

Mr. Hostetter moved to amend so as to leave the matter to the voters of the proposed new county, at the next October election. Lost—yeas, 10; nays, 24.

The question then recurring on the final passage of the bill, Mr. Hostetter demanded the yeas and nays, which were ordered, and were as follows: yeas, 19; nays, 15. The bill as passed is as follows:

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio*, That so much of the counties of Portage, Medina and Stark, as comes within the following boundaries, be, and the same is hereby erected into a separate county, which shall be known by the name of Summit, to wit: Beginning at the northwest corner of the county of Portage; thence east on the county line to the northeast corner of the township of Twinsburg, in said county of Portage; thence south on the line between the ninth and tenth ranges of townships of the Western Reserve to the southeast corner of the township of Springfield, in said county; thence west on the line between the counties of Portage and Stark to the northeast corner of the township of Green, in said Stark County; thence south on the east line of said township of Green, to the southeast corner of the same; thence west on the south line of the townships of Green and Franklin, in said county of Stark, to the southwest corner of said township of Franklin; thence north on the line between the counties of Stark and Wayne to the south line of the county of Medina; thence west on the south line of the county of Medina to the southwest corner of the township of Norton, in said county; thence north on the line between the twelfth and thirteenth ranges of townships of the Western Reserve to the northwest corner of the township of Richfield, in said county; thence east on the north line of said county to the southwest corner of the township of Northfield, in Portage County; thence north on the west line of said Portage County to the place of beginning; and for the purpose of restoring the county of Medina to its constitutional limits; the townships of Spencer and Homer, in the county of Lorain, be, and the same are hereby, attached to, and made a part of, the said county of Medina.

SEC. 2. That all suits, whether of a civil or criminal nature, which shall be pending within the limits of those parts of the counties of Portage, Medina and Stark, so to be set off and erected into a new county previous to the organization of said county of Summit; and all suits pending within the limits of said townships of Spencer and Homer, previous to the taking effect of this act, shall be prosecuted to final judgment and execution within the counties of Portage, Medina, Stark and Lorain, respectively, in the same manner they would have been if said county of Summit had not been erected, and the said townships of Spencer and Homer had not been attached to and made a part of said Medina County; and the Sheriffs, Coroners and Consta-

bles of the said counties, respectively, shall execute all such process as shall be necessary to carry into effect such suits, prosecutions and judgments, and the collectors of the taxes for said counties, respectively, shall collect all taxes that shall be levied and unpaid within the parts of the aforesaid counties, previous to the taking effect of this act.

SEC. 3. That all Justices of the Peace within those parts of the counties of Portage, Medina and Stark, which by this act are erected into a new county; and also within said townships of Spencer and Homer, shall continue to exercise the duties of their offices until their times of service shall expire, in the same manner as if they had been commissioned for the counties of Summit and Medina, respectively.

SEC. 4. That on the first Monday of April next, the legal voters residing within the county of Summit shall assemble within their respective townships at the usual places of holding elections, and proceed to elect their different county officers, who shall hold their offices until the next annual election, and until their successors are elected and qualified.

SEC. 5. That the Courts of Common Pleas and Supreme Court of said county shall be holden at some convenient house in the town of Akron until the permanent seat of justice for said county shall be established.

SEC. 6. That Commissioners shall be appointed agreeably to the act entitled, "An act for the establishment of seats of justice," to fix upon a permanent seat of justice for said county of Summit, agreeably to the provisions of the above-recited act; and the Commissioners aforesaid shall receive a compensation for their services out of the treasury of said county of Summit; and said Commissioners shall be authorized to receive propositions for the erection of suitable county buildings by the citizens of such towns and villages as may desire to have the seat of justice of said county established within their respective limits; and in no event shall any tax for the erection of county buildings for said county of Summit be imposed upon the citizens of the townships of Franklin and Green, which townships are taken from the county of Stark, for and during the term of fifty years from and after the passage of this act.

THOMAS J. BUCHANAN,

Speaker of the House of Representatives.

WILLIAM McLAUGHLIN,

Speaker of the Senate.

MARCH 3, 1840.

The next thing in order was the passage of a joint resolution appointing Commissioners to locate the county seat, which was adopted by the House, February 7, and concurred in by the Senate, February 10, as follows:

Resolved, By the Senate and House of Representatives, that Jacob J. Williard, of Columbiana County, James McConnell, of Holmes County, and Warren Sabin, of Clinton County, be, and they are hereby appointed Commissioners to establish the seat of justice for Summit County, pursuant to an

C. A. Lane,

act entitled "An act establishing seats of justice," passed February 23, 1824.

THOMAS J. BUCHANAN,
Speaker of the House of Representatives.
WILLIAM McLAUGHLIN,
Speaker of the Senate.

The next stage in the proceedings, was the passage of a bill to organize the new county, which passed the House without opposition, on the 4th day of March, 1840, and unanimously concurred in by the Senate, March 10, as follows:

SEC. 1. *Be it enacted by the General Assembly of the State of Ohio:* That the county of Summit be, and the same is hereby organized into a separate and distinct county.

SEC. 2. All Justices of the Peace and Constables within the territory taken from Portage, Medina and Stark Counties, shall continue to discharge the duties of their respective offices until their commissions or terms of office shall expire, and until their successors shall be chosen and qualified; and suits commenced before the taking effect of this act, shall proceed and be prosecuted as though this act had not been passed. *Provided,* That all writs and other legal process to be issued after the first Monday of April next, shall be styled of Summit County, instead of Portage, Medina or Stark County.

SEC. 3. That on the first Monday of April next, the legal voters residing within the limits of the County of Summit, shall assemble in their respective townships, at the usual places of holding elections, and proceed to elect their different county officers in the same manner pointed out in the act to regulate elections, who shall hold their offices until the next annual election, and until their successors are chosen and qualified.

SEC. 4. It shall be the duty of the Commissioners of said county of Summit, on or before the first day of June next, to take charge of all paupers, idiots and insane persons belonging to either of the townships included in said county of Summit, and now supported by either of the counties of Portage, Medina or Stark, and the same to maintain thereafter at the proper expense of said Summit County.

SEC. 5. The county of Summit, for judicial purposes, is hereby attached to the Third Judicial Circuit, and the first Court of Common Pleas to be holden in said county, shall commence its session in the town of Akron, on the second day of July next, and the second term of said court shall commence on the eighth day of December next.

SEC. 6. That the Auditor of State in the re-apportionment of the surplus revenue received from the General Government, according to the enumeration of the year 1839, shall apportion to the county of Summit that amount, which according to the enumeration of the several townships taken from the Counties of Portage, Medina and Stark, said county will be entitled to receive, which revenue shall be paid to the order of the Fund Commissioners of said county on the first day of January, 1841. *Provided,* If within three months from said first day of January, 1841, said Fund Commission-

ers do not draw for said revenue, the Auditor of State shall be governed in the disposition of the same by the first section of the act to provide for the distribution and investment of the State's proportion of the surplus revenue, passed March 28, 1837.

SEC. 7. That in all elections for members of Congress, the county of Summit shall be attached to the Fifteenth Congressional District.

THOMAS J. BUCHANAN,
Speaker of the House of Representatives.
WILLIAM McLAUGHLIN,
Speaker of the Senate.

As soon as the news of the final passage of the bill erecting the new county reached Akron, by the arrival of the overland mail from Columbus, on Monday evening, March 2, 1840, (the bill having passed the Senate the previous Saturday, February 28, though not engrossed and signed by the Speakers of the two houses until March 3), there being no railroads or telegraphs in those days, an impromptu jollification took place, which is thus graphically described in one of the local journals of the day: "With the rapidity of lightning, the news was spread from house to house, and in less than half an hour the whole town was in motion. Cheers, congratulations, bonfires and illuminations were the order of the day, while the deep-toned thunder of our cannon continued to proclaim the birth of the new county to all the surrounding country. Such a spontaneous and universal burst of feeling has seldom been witnessed under any circumstances. It was a scene to be looked upon, but cannot be described; such a noise as the shrouds make at sea in a stiff tempest, as loud, and to as many tunes. Hats, caps and cloaks, I think, flew up, and had their faces then been loose, this night had lost them." In fact, the recollection of the writer is to-day vivid and distinct, looking back through the dim vista of the forty-one intervening years, that through the entire night, "until broad daylight in the morning," both solid and *liquid* jollity and happiness prevailed. Nor did the citizens of Akron confine the rejoicing over the glorious result to themselves alone, but immediately took the initiatory steps for a general new county celebration on Wednesday, March 4. A committee of twelve citizens of Akron and one from each township was appointed, and measures taken to spread the "glad tidings" as widely as possible. Dr. Jedediah D. Commins was made President of the day; Col. James W. Phillips,

Col. Justus Gale and Jacob Brown, Esq., of Akron, and Col. Frederick A. Sprague and Benjamin Rouse, Esq., of Richfield, and Col. Solomon Markham, of Green, Vice Presidents; Gen. Lucius V. Bierce, of Akron, was constituted Chief Marshal, with Col. Erastus Torrey and Maj. Ithiel Mills, of Akron, as assistants. A national salute was fired from the high ground between the two villages, North and South Akron (the present court house site) at sunrise. The military display was very fine, being participated in by the Summit Guards, the Akron Light Infantry and Cavalry, the Copley Light Artillery, the Akron Band, under the leadership of Mr. Henry S. Abbey, and the Military Band, under the lead of Capt. Cleveland. The procession of several thousand men and boys, after marching through several streets, was joined by a large *cortege* of ladies, dressed uniformly alike and carrying parasols, who took their position between the Committee of Arrangements and the military, and marched the balance of the route to the place of feasting, on the present court house grounds. After dinner (abundant and toothsome), the following regular toasts were announced and responded to by the firing of cannon, music and cheers: 1. *The Legislature of Ohio*—They have at length done justice to themselves and us. Better late than never! 2. *Our Senator and Representatives*—Many have done well, but these have excelled them all! 3. *The County of Summit*—An infant Hercules. Give him a wide berth, for he'll be a whopper! 4. *Our Struggle*—Almost another Trojan siege. The pangs and throes it has cost our parents to bring us forth are a certain presage of future greatness. 5. *Akron*—Look at her as she was, as she is, and as she will be! 6. *Our Young County*—The pride of our affections; unsurpassed in the elements of future greatness; already populous and wealthy. If such is its *childhood*, what will it be when it becomes a *man*? 7. *Portage, Stark and Medina*—Among them they have hatched a young eagle, full-fledged and on the wing. She will soar above them all! 8. *The Buckeye State*—A germ of future empire, marching right ahead in the road of prosperity. She will not be turned aside from the high destiny that awaits her. 9. *Our Canals and Public Improvements*—If such things be done in the green tree, what will be done in the dry? 10. *The Late Meeting at*

Ravenna—Malignity feeding on envy; daws pecking at eagles; a striking instance of folly re-acting on itself! 11. *The Memory of Gregory Powers*—We mourn the untimely fate of this patriot, statesman and jurist. His memory will long be cherished in the county of Summit, his native and resting place. 12. *The memory of George Washington*—The greatest and best man ever produced in the tide of time. When nature had formed him, she broke the mold, that he might stand peerless and alone! 13. *The Ladies of Summit*—It is the summit of our ambition to stand in the summit of their affections! At the conclusion of the regular toasts, volunteer toasts were offered by Benjamin Rouse, Esq., of Richfield; Gen. Samuel D. Harris, of Ravenna; Hiram Bowen, Esq., editor of the *Beacon*, Akron; Dr. Joseph Cole, Akron; Col. Justus Gale, Akron; Maj. Ithiel Mills, Akron; Col. Erastus Torrey, Akron; Capt. Philo Chamberlin, Akron; John Hunsberger, Esq., of Green; Dr. Jediah D. Commins, Akron; Julius A. Sumner, of Springfield; Robert K. Dubois, Akron; Col. James W. Phillips, Akron; Dr. Asa Field, Akron, and others. These "sentiments" would, no doubt, be interesting to the readers of these pages, but are altogether too voluminous for the space at our disposal in this chapter. In the evening, a convivial party partook of a very fine supper at the Ohio Exchange (present site of Woods' Block, corner of Main and Market streets), and, says the local reporter, "the day was closed without accident or other untoward circumstance to mar the festivities, amid bonfires and every demonstration of joy. The 4th of March, 1840, will long be remembered in Akron!"

In accordance with the provisions of the bill to organize the new county, an election for county officers was held on the first Monday of April, 1840, both Whigs and Democrats placing tickets in the field, the Whigs securing the ascendancy, and electing their entire ticket as follows:

Commissioners—John Hoy, of Franklin; Jonathan Starr, of Copley, and Augustus E. Foote, of Twinsburg.

Auditor—Birdsey Booth, of Cuyahoga Falls.

Treasurer—William O'Brien, of Hudson.

Recorder—Alexander Johnston, of Green.

Sheriff—Thomas Wilson, of Northfield.

Prosecuting Attorney—George Kirkum, of Akron.

Coroner—Elisha Hinsdale, of Norton.

Real Estate Appraiser—Frederick A. Sprague, of Richfield.

Assistant Appraisers—Milo Stone, of Tallmadge, and Thomas E. Jones, of Franklin.

The Clerk of the Court of Common Pleas, was at that time appointed by the Judges of the Court; the Judges, in turn, being appointees of the Legislature. The offices of Probate Judge and County Surveyors were then unknown among the County officials of Ohio.

Having given the requisite notice, the Commissioners elect, Messrs Hoy, Starr and Foote, met, according to the record, at "McDonald's Tavern," northeast corner of Main and Exchange streets (a portion of the same building still remains standing in the same site), on the 9th day of April, 1840, for the organization of the county offices. The Commissioners having had the usual oath of office administered to them by the one of Justices of the Peace of Portage Township, one of their number administered a similar oath to the other officers elect, and the organization of the county was complete.

At this meeting, proposals for the rent of rooms for county offices and court purposes, pending the permanent location of the seat of justice, and the erection of county buildings, were received from Jacob Brown, Esq., for May's Block, corner of Main and Exchange streets, now the Clarendon Hotel, owned by F. Schumacher, Esq.; Benjamin W. Stephens, Esq., for his three-story brick block on South Main street, now part of Merrill's Pottery, and from Hiram Payne, Esq., for the upper part of the large three-story stone block, corner of Howard and Market streets, on the site now occupied by the fine brick stores of M. W. Henry, Esq., and Major E. Steinbacher.

At a subsequent meeting of the Commissioners, held on the 11th day of May, the proposition of Mr. Payne was accepted, the large room in the third story, afterward for several years known as "Military Hall," being used as a court-room, with entrance from Market street, the southeast corner of the hall being partitioned off for a jail, the county offices being located in other portions of the second and third stories of the building.

The Locating Commissioners, Messrs. Williard, McConnell and Sabin, assembled in Akron and entered upon the task assigned to them about the middle of May, 1840. In the mean-

time, not only had a sharp rivalry sprung up between North and South Akron for the prize, but Cuyahoga Falls also put forth a vigorous effort to wrest it from both, claiming, with a good degree of plausibility and justice, not only superior water-power for manufacturing purposes, but also to be considerably nearer to the geographical center of the county than Akron was; and also claiming for that village superior healthfulness, and a more advantageous location for the building-up of a large manufacturing town or city, while the completion of the Pennsylvania & Ohio Canal, then about to be opened through from Akron to the Ohio River, would give them transportation facilities fully equal to those of Akron.

At that time, too, "The Portage Canal and Manufacturing Company," with a capital stock of \$500,000, was in the full tide of "prospective" prosperity. The managers of that corporation claimed that on the consummation of their project of bringing the entire waters of the Big Cuyahoga River, through the race they were then constructing, to "Summit City," now known under the chaste and classical name of the "Chuckery," just north of the present limits of the city of Akron, and one of its most pleasant suburbs, a great manufacturing town—a second Lowell—would immediately spring into existence. As a compromise, therefore, between Akron and Cuyahoga Falls, as well as in its own behalf, and in the interests of the people of the county at large, the "Chuckery" put in its claim for the location of the seat of justice of the new county within its borders, and, through its officers, urged the advantages of the location upon the attention of the Commissioners.

After visiting and fully examining the several localities named, and patiently listening to the arguments of the several claimants, pro and con, the Commissioners decided unanimously in favor of Akron, and accordingly proceeded, in the presence of a large concourse of interested and jubilant spectators, to stick the stakes for the county buildings upon the "gore" (where they still stand), then a wedge-shaped piece of unplatted land between North and South Akron, belonging to Gen. Simon Perkins, of Warren, the father of our present venerable fellow-citizen, Col. Simon Perkins, of Akron.

The people of Akron were, of course, greatly elated over the decision of the Commissioners

in their favor, and as the buildings had been located upon neutral ground, about as *inconvenient* to the one as to the other, local jealousies were for the time being subordinated to the common weal, and the people of the two rival villages, cordially "shaking hands across the *gore-y* chasm," set themselves vigorously and unanimously at work to raise the necessary amount of money and materials to construct the public buildings, which, together with the grounds, were to be provided free of expense to the tax-payers of the county. The land was donated by Gen. Perkins, by deed received by the Commissioners, July 14, 1840, and the building fund was raised by voluntary contributions; the contract for the erection of the court house and jail being entered into between the County Commissioners and Simon Perkins, Jr., and others, as Trustees, on the 24th day of September, 1840. The sub-contractors, Maj. Ithiel Mills, of Akron, upon the court house, and Sebbens Saxton, of Norton, upon the jail, commenced work at once, the foundations of both structures being completed before the closing in of winter the same year.

The term of Mr. Perkins, as State Senator, having expired, Elisha N. Sill, Esq., of Cuyahoga Falls, was chosen as his successor in October, 1840. Though Mr. Sill, in behalf of the people of Cuyahoga Falls, had made a valiant fight for the location of the seat of justice within the limits of that enterprising village, there was very little if any opposition made to his nomination and election by the people of Akron, for the reason that it was supposed that, the location having been legally and fairly made, and the public buildings commenced, a finality had been reached, and that the arrangement could not be disturbed. Through the influence of Senator Sill, however, aided largely by the same interests, if not the same men, that had opposed the erection of the new county the year before, the question of location was reopened, during the winter of 1840-41, Summit County's Representative in the House, Hon. Henry G. Weaver, of Springfield, making a vigorous but unsuccessful opposition against the scheme. The following is the new act in relation to the matter:

AN ACT TO REVIEW AND ESTABLISH THE SEAT OF JUSTICE OF SUMMIT COUNTY:

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio:* That Jacob C. Hoagland, of

Highland County, Valentine Winters, of Montgomery County, and William Kendall, of Scioto County, be, and they are, hereby appointed Commissioners to review the seat of justice of Summit County; and if, in their opinion, the public interest requires it, to relocate said seat of justice at such point in said county of Summit as they may deem most in accordance with the public interest and convenience; and said Commissioners shall be governed, in all their doings, by an act passed February 3, 1824, establishing seats of justice.

SEC. 2. That if the above-named Commissioners shall, upon review, change the location of said county seat, all subscriptions of money and land, and all bonds shall be void which have been made to the County Commissioners of said Summit County, and which were conditioned upon the location of the county seat at its present location; and all sums of money or other property, if any, which may have been paid on account of said subscriptions to the Commissioners of said Summit County, shall be repaid by the Commissioners to the said subscribers having so paid the same; or if said money or other property has been expended by said Commissioners according to law, the same shall be repaid, as above, out of the subscriptions provided for in the third section of this act; and the property for which said expenditures may have been made shall be appropriated by said Commissioners toward erecting the county buildings of said county where the county seat shall be relocated.

SEC. 3. That the above-named Commissioners shall be authorized to receive subscriptions, payable to the County Commissioners, for the purpose of erecting county buildings for said Summit County, and said Committee of review, hereby appointed, shall relocate said county seat only upon condition that said county buildings shall be erected by such subscriptions at the place where said committee shall so relocate.

SEC. 4. That each of said Commissioners shall receive the sum of \$3 for each day he may be employed in the discharge of his duties under this act, and \$3 for each twenty miles travel in going to and returning from the seat of justice of said county, to be paid out of the treasury of said county.

SEABURY FORD,

Speaker of the House of Representatives.

WILLIAM M. McLAUGHLIN,

Speaker of the Senate.

MARCH 25, 1841.

The reviewing Commissioners, Messrs. Hoagland, Winters and Kendall, came upon the ground early in the summer of 1841. After examining the several localities named, they resolved themselves into a high court of inquiry, at the stone church—then Universalist, now Baptist—on North High street, when the claims of the different points were exhaustively argued before them by the following gentlemen, viz.: Hon. R. P. Spalding, for Akron; Hon. E. N. Sill, for Cuyahoga Falls, and Dr. E. W. Crittenden, for Summit City; the church,

throughout, being crowded to its utmost capacity by the anxious, and, at times, demonstrative, backers of the respective speakers. After listening to the able and eloquent addresses from the gentlemen named, and "sleeping over it" during an intervening night, the committee proceeded the next morning to the "chuckery," and, upon the first narrow bench of level land north of the Little Cuyahoga River, at a point about where the house of Mr. R. A. Grimwood now stands, commenced measuring off the ground and formally sticking the stakes for the county buildings, in the presence of a large crowd of interested, as well as indignant spectators. While thus engaged, Dr. Daniel Upson, of Tallmadge, who, though living and having large property interests somewhat nearer to Cuyahoga Falls than Akron, rather favored the latter place, rode up from the direction of Bettes' Corners. After watching the proceedings for a few minutes, the old Doctor, with the emphatic tone of voice and the peculiar curl of lip, so characteristic of him when aroused, exclaimed: "Nobody but fools or knaves would think of locating county buildings in such a place as that!"

The bluff old Doctor's indignant remark so aroused the ire of the majority of the Commissioners, already probably somewhat prejudiced against Akron, that they forthwith gathered up their locating paraphernalia and drove straight to Cuyahoga Falls, where they struck the stakes for the county buildings, on the very handsome site now occupied by the Congregational Church, on the south side of Broad street, and between Broad and Second streets east and west.

The relocating committee were not unanimous, however, as will be seen by the following extract from the journal of the Court of Common Pleas of July 23, 1841:

In the matter of the *review* and *relocation* of the seat of justice for Summit County, Jacob C. Hoagland and Valentine Winters, two of the Commissioners appointed by the Legislature to review and locate the seat of justice of Summit County, having returned to the office of the Clerk of this Court their joint report, and William Kendall, the other Commissioner, having returned to the Clerk of this Court his separate report, this day George Kirkum, Esq., a citizen and Prosecuting Attorney for said county, presented the same reports to the Court, and moved that the report of said Hoagland and Winters be filed and entered of record. Whereupon, the Commissioners of said county of Summit appear by their

attorney and object to the filing and entering of said reports of record, for various reasons by them set forth, and the parties were heard by counsel, and the Court, being equally divided in opinion: It is ordered that the said George Kirkum, Esq., take nothing by his said motion.

The Court being thus divided as to the legality of the proceedings, and the County Commissioners also being divided in opinion on the same subject, Commissioner Foote favoring the majority report, and Messrs. Starr and Hoy the minority report, the county officers also assuming the prerogative of deciding, each for himself, where his office should be kept, Auditor Booth establishing his headquarters at Cuyahoga Falls, and Treasurer O'Brien having his main office at the Falls, though maintaining a branch office in Akron, no further action was had in regard to the public buildings, the work already commenced in Akron remaining *in statu quo* until the following year.

At the October election, in 1841, the county-seat question being the issue, Rufus P. Spalding and Simon Perkins, Jr., were elected to the Legislature, Summit County that year being entitled to two members of the House. Representatives, under the old constitution, being elected annually, instead of biennially, as now. Senators, then, as now, being elected for two years. Mr. Sill of course held his position during the session of 1841-42. Through the exertions of Messrs. Spalding and Perkins, the following bill, submitting the question to popular vote, was enacted, the filibustering tactics to retard and defeat it being much less determined and persistent in the House than upon the original bill for the erection of the new county, but vigorously opposed in the Senate, the vote standing, in the House, yeas, 45; nays, 19; and in the Senate, yeas, 20; nays, 16, on the final passage of the bill, as follows:

AN ACT TO ESTABLISH PERMANENTLY THE SEAT OF JUSTICE OF SUMMIT COUNTY:

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio:* That the qualified electors of Summit County shall be authorized to express their preference for either Akron, or Cuyahoga Falls, as the seat of justice for said county, by placing on their tickets, at the township elections, to be held on the first Monday of April next, the words: "Seat of Justice at Akron," or, "Seat of Justice at Cuyahoga Falls," as their choice may be; and it shall be the duty of the Trustees or Judges of the Election, in the several townships in said county, to make return of the said votes in regard to the seat of justice within three days thereafter to the Clerk of the

Court of Common Pleas of said county, whose duty it shall be to canvass said votes, in the same manner that by law he is required to canvass votes for State and county officers.

SEC. 2. If either one of said towns shall receive a majority of all the votes given, the same shall be thenceforward the permanent seat of justice for said county of Summit; but if neither shall receive such majority, then, and in that case, the subject shall remain open for the future action of the General Assembly.

SEC. 3. It shall be the duty of said Clerk to return to the Court of Common Pleas of said county, next to be held after the said election, an abstract of said votes, duly certified, that the same may be entered upon the journal of said court.

SEC. 4. Nothing herein contained shall be so construed, as to release, or in any way discharge any subscription of land, money, or materials heretofore made, for the purpose of erecting a court house and jail at the place that may be selected by the people as the permanent seat of justice for said county.

SEC. 5. The electors of Summit County shall be notified of the passage of this act, by publication of the same in some newspaper printed in said county, at least two weeks previous to said election.

RUFUS P. SPALDING,

Speaker of the House of Representatives.

JAMES J. FARAN,

Speaker of the Senate.

MARCH 2, 1842.

On the passage of this bill, a lively electioneering campaign immediately commenced, the different parties in interest holding meetings, making speeches, circulating documents, etc., in every portion of the county, the activity and bitterness of a modern political campaign being moderation and mildness itself compared with it.

The result of the active measures thus taken, was a very full vote, almost two-thirds declaring in favor of Akron, as will be seen by the following abstract taken from the journal of the Court of Common Pleas, May term, 1842, as certified to by Lucian Swift, Esq., Clerk of said court.

To the Honorable, the Court of Common Pleas of the County of Summit, next to be holden in and for said county: I do hereby certify that the following is the abstract of votes given for the seat of justice of said county, at the election held on the first Monday of April, 1842, pursuant to an act of the General Assembly entitled "an act to establish permanently the seat of Justice for Summit County," passed March 2, 1842, as the same were returned to me by the township authorities, respectively, and as the same were canvassed; as witness my hand and seal of office, this sixth day of April A. D. 1842.

LUCIAN SWIFT, *Clerk* [Seal].

STATE OF OHIO, SUMMIT COUNTY, ss.:

We do hereby certify that at an election held on the 4th day of April, inst., in pursuance of a law

passed by the Fortieth General Assembly of the State of Ohio, entitled "An act to establish permanently the seat of justice of Summit County" there were two thousand, nine hundred and seventy-eight votes given for the "seat of justice at Akron;" one thousand, three hundred and eighty-four votes given for the "seat of justice at Cuyahoga Falls;" one hundred and one votes given for the "seat of justice at Summit;" two votes "North Akron" and twenty-two blanks.

H. H. JOHNSON, *Justice of the Peace.*

L. L. HOWARD, *Justice of the Peace.*

LUCIAN SWIFT, *Clerk of Court of Common Pleas for Summit County.*

APRIL 6, A. D. 1842.

Majority for Akron..... 1469

The "vexed question" of location being now definitely settled, the public buildings were again proceeded with; though, building operations not being conducted as rapidly then as now, they were not completed until late in the following year, as will be seen by the following extract from the proceedings of the County Commissioners, under date December 5, 1843:

Dec. 5, 1843. Simon Perkins, Jr., Jedediah D. Commins and Richard Howe, the trustees for building the court house and jail, and Ithiel Mills, the court house contractor, submitted the court house for inspection of the board for their acceptance.

Dec. 6. Having examined the court house, the board proposed, as an offset to the general bad character of the work, which the building trustees

fully admitted, to accept it, if the windows were made to work freely up and down, the doors better hung or fastened, and provided with more suitable latches and locks, and the windows in the Auditor's, Clerk's and Recorder's offices secured by iron blinds or shutters, made and fitted into them.

The contractor on the jail, Mr. Sebbens Saxton, having died in August, 1841, on the final settlement of the question of location the contract was assumed by his younger brother, Mr. Harvey Saxton, and the structure completed by him. Though the jail was accepted by the Commissioners, and though, at the time, it was regarded as well built, and as really a model institution of its kind, it did not prove to be remarkably safe, as the very first batch of prisoners, some eight or nine in number, confined therein, made their escape the very first night, by pushing from the wall one of the blocks of stone of which it was composed. This defect was subsequently remedied by the insertion of iron dowels, and no escapes from that cause have since been made, though often attempted. The jail building remains the same as when constructed, with the exception of the small brick wing upon the north side, added some thirty years ago, and some slight interior improvements. Though the doweling of the walls has prevented the prisoners from pushing out the blocks of stone, as in the instance named, at least a score of escapes have since been effected through other weak spots, and, from the experience which the writer has had therewith, he unhesitatingly affirms that both in a sanitary point of view, as well as in the matter of safety and convenience, a new jail structure is an immediate and pressing public necessity.

The court house, however, has been very materially changed. The two wings, with the porch and sustaining columns in front, have been added upon the west end, and the smaller porch upon the east end, while the court-room and public offices have been correspondingly enlarged, the additions and improvements being authorized by a special act of the Legislature, passed March 29, 1867. The entire space upon the north side of the hall, upon the ground floor, is now occupied by the County Treasurer, greatly to the convenience of that officer, as well of the tax-paying public, the same space having originally been divided up into a grand jury room upon the west, the Sheriff's office upon the east, with the Treasurer's office in the

center, only one-third its present dimensions. On the south side of the hall the Probate Judge formerly occupied the room upon the east end, now occupied by the Sheriff, the entire space now occupied by the Auditor's and Commissioner's offices having been originally about equally divided between the Auditor, Clerk and Recorder. On the upper floor, a stairway, ante-room and jury-room, occupying about twelve feet of the east end of the building, have been thrown into the court-room, greatly to the convenience of the court and bar and all persons having business therein. The upper floor of the north wing is devoted to a jury-room and a consultation-room, and the lower floor to the joint use of the Recorder and Surveyor, while the upper floor of the south wing is occupied by the County Clerk, and the lower floor by the Probate Judge. Notwithstanding these improvements, taking increase of population and a corresponding increase of the public business, the present structure—to say nothing of its yearly increasing condition of dilapidation—is wholly inadequate to the public requirements, and Summit County cannot do itself a more important service than by immediately inaugurating a movement for the erection of a new court house—one that will not only be commensurate with the public necessities, but a credit, also, to the proverbial good taste and public spirit of its people.

On the 5th day of March, 1851, Hosea Paul and others presented to the County Commissioners a numerous signed petition for the creation of the township of Cuyahoga Falls, and the board, being satisfied that the proper preliminary steps had been taken, unanimously granted the petition, the necessary territory, an average of about two miles square, being taken from the northeast corner of Portage, the northwest corner of Tallmadge, the southwest corner of Stow and the southeast corner of Northampton Townships, the incorporated village of Cuyahoga Falls also occupying a portion of said territory.

The township of Middlebury was also, in like manner, erected in March, 1857, the necessary territory being taken from Portage, Tallmadge, Springfield and Coventry. Subsequently, the township of Middlebury became, by legal annexation, the Sixth Ward of the city of Akron, though still retaining a distinctive township organization, to the extent of electing

for itself a Justice of the Peace and one Constable.

Under the old constitution of Ohio, the local judiciary consisted of a Circuit or President Judge, having jurisdiction over from four to twelve counties, with three Associate Judges for each county, all of whom were appointed by the Legislature, their respective terms of office being seven years, "*if so long they behave well.*" All Probate business was at that time transacted by Common Pleas Courts, one or more of the Associate Judges officiating for that purpose, as occasion required, during vacation.

Summit County on its organization became a part of the Third Judicial Circuit, embracing, as reconstructed under the act of April 11, 1840, the counties of Ashtabula, Trumbull, Portage and Summit. Hon. Van R. Humphrey, of Hudson, was the Presiding Judge of the Circuit on the accession of Summit thereto. Hon. Eben Newton, of Canfield, then in Trumbull County, now Mahoning, succeeded Judge Humphrey at the expiration of his term in 1844. Judge Newton resigned his position on the bench in the winter of 1846-47, and was succeeded by Hon. Benjamin F. Wade, of Jefferson, Ashtabula County, who in turn resigned on being elected to the United States Senate March 15, 1851, Gov. Reuben Wood filling the vacancy by the appointment of Hon. George Bliss, of Akron, who held the position only until the taking effect of the new constitution in February, 1852, Common Pleas Judges thereafter being elected by the people, one Judge only sitting in place of the three or four under the old rule.

The first term of the Court of Common Pleas for the new county of Summit, convened in Akron on the 2d day of July, 1840, presided over by Hon. Van R. Humphrey, with Hon. Robert K. Dubois, of Akron, Hon. Charles Sumner, of Middlebury, and Hon. Hugh R. Caldwell, of Franklin, as Associate Judges; though considerable probate and other business, proper to be transacted in vacation, had previously been done by one or the other of the Associate Judges.

In 1845, Judges Sumner and Dubois deceased, the former June 19 and the latter October 14. They were succeeded by Hon. John B. Clark, of Hudson, and Hon. James R. Ford, of Akron; Hon. Sylvester H. Thompson, of Hudson, in turn succeeding Judge Clark, on the resignation of the latter in 1846.

Judge Caldwell was succeeded by Hon. John Hoy, of Franklin, in April, 1847. Hon. Samuel A. Wheeler, of Akron, also succeeding Judge Ford on the death of the latter gentleman, at the April term in 1849.

Judge Wheeler resigning his position on leaving for California in the spring of 1850, Hon. Peter Voris, of Bath, was appointed his successor; Judges Thompson, Hoy and Voris serving thenceforth until the taking effect of the new constitution in February, 1852. Though none of the Associate Judges named were bred lawyers, their duties, often delicate and intricate, were discharged to the general satisfaction of the people of the county during their respective terms of service.

On the taking effect of the new constitution, in 1852, Summit County was attached to the Second Subdivision of the Fourth Judicial District of the State, this subdivision embracing Summit, Medina and Lorain Counties. Hon. Samuel Humphreville, of Medina, was elected Common Pleas Judge, in October, 1851, for five years, serving his full term. Hon. James S. Carpenter, of Akron, was elected Judge in October, 1856, also serving his full term of five years.

There appearing to be an excess of business upon the dockets of the several counties of the subdistrict, on petition of the members of the bar of said counties, an extra judgeship was created for said subdistrict, by an act passed by the Legislature in April, 1858. Hon. William H. Canfield, of Medina, was elected to said extra Judgeship in October, 1858, for five years. Legal business becoming largely diminished, in the earlier years of the war, the extra judgeship was abolished, at the close of Judge Canfield's term, by an act of the Legislature, passed April 16, 1862. Hon. Stephenson Burke, of Elyria, was elected as Judge Carpenter's successor in October, 1861, and re-elected in 1866, but resigned the position and retired from the bench, about two years before the expiration of his second term. Hon. Washington W. Boynton, of Elyria, was appointed by Gov. Rutherford B. Hayes, in the spring of 1869, to fill the vacancy occasioned by the resignation of Judge Burke, and at the expiration of the time for which he was appointed, in October, 1871, was elected for five years, from May, 1872, serving, besides the fraction of Judge Burke's term, a single full term only, because

of his election to the Supreme Bench of Ohio, in October, 1876.

After the close of the war, legal business again began to accumulate, and, at length, became altogether too great for a single Judge to properly perform. An extra judgeship, for the Second Subdivision, was accordingly created by act of the Legislature, in the spring of 1870. Hon. Samuel W. McClure, of Akron, was elected to this new Judgeship, in October, 1870, serving to the end of his term, and declining to be a candidate for a second term. Hon. Newell D. Tibbals, of Akron, as Judge McClure's successor, was elected in October, 1875, for five years, from May, 1876, and re-elected for a second term in October, 1880. Hon. John C. Hale, of Elyria, as Judge Boynton's successor, on the latter's accession to the Supreme Bench, was elected in October, 1876, taking his seat upon the bench in May, 1877, for the term of five years.

It is, perhaps, proper to remark that, while the present judicial system of Ohio has been, generally, and particularly, a very great improvement over the old system, though still very far from perfect, the manner in which its functions have been performed by the several successive Judges of the Second Subdivision of the Fourth Judicial District, will take and hold a commanding rank in the judicial proceedings of Ohio, or any sister State.

As heretofore mentioned, up to the adoption of the new constitution, in 1851, the probate business of the State had been done by the Common Pleas Courts. Charles G. Ladd, of Akron, was elected Probate Judge of Summit County, in October 1851, for the term of three years. Judge Ladd's health failing soon after his election to the office, Alvin C. Voris, Esq., was appointed as his Deputy Clerk, and, for the most part, performed the functions of the office until the death of Judge Ladd, in August, 1852. Roland O. Hammond, of Akron, was appointed by Gov. Reuben Wood, to fill the vacancy occasioned by the death of Judge Ladd, to serve until the next annual election, and until his successor was elected and qualified. Constant Bryan, of Akron, was elected in October, 1852, for the balance of Judge Ladd's term, two years. Noah M. Humphrey, of Richfield, was elected in 1854, and re-elected in 1857, holding the position two full terms, of three years each. William M. Dodge, of Akron, was elected in October, 1860, for three years, but died in July, 1861.

Samuel A. Lane, of Akron, without solicitation on the part of either himself or his friends, was, on the 24th day of July, 1861, appointed and commissioned as Judge Dodge's successor, by Gov. William Dennison, but declined to accept the honor. Asahel H. Lewis, of Akron, on petition of himself and friends, was then appointed to fill the vacancy until the next general election. Stephen H. Pitkin, of Hudson, was elected in October, 1861, for the balance of Judge Dodge's term, two years; re-elected in 1863, and again in 1866, holding the office eight years. Ulysses L. Marvin, of Akron, elected in October, 1869, and re-elected in 1872, serving two full terms of three years each. Samuel C. Williamson, of Akron, elected in October, 1875, and re-elected in 1878.

On the first organization of the Court of Common Pleas, under the old constitution, in 1840, at a special term, held April 9, Rufus P. Spalding, Esq., was appointed Clerk pro tem., and was re-appointed at the first regular session of said court, July 2, 1840; Clerks at that time being appointed by the Judges of the courts in which they were to serve, instead of being elected by the people, as now. Mr. Spalding held the office, his brother-in-law, Mr. Lucian Swift, acting as his deputy, until December 14, 1840, when, tendering his resignation as Clerk pro tem., Mr. Swift was appointed Clerk for the term of seven years, resigning his office ten days before the expiration of his term, on the 3d day of December, 1847. Lucius S. Peck, of Akron, appointed to fill the vacancy occasioned by the resignation of Mr. Swift, December 3, 1847, and also for the full term of seven years. The adoption of the new constitution in 1851 brought Mr. Peck's term of office to a close after a service of about four years. Nelson B. Stone, of Akron, was elected first Clerk under the new Constitution, in October, 1851, for three years, serving one term only. Edwin P. Green, of Akron, elected in October, 1854, and re-elected in 1857, serving two full terms. John A. Means, of Northfield, was elected in October, 1860, for three years. In 1861, Clerk Means entered the army, the duties of the office being performed by his son, Mr. Nathan A. Means, during the remainder of the term. Charles Rinehart, of Franklin, elected in October, 1863, and re-elected in 1866, serving two full terms of three years each. Capt. John A. Means was again

elected in October, 1864, serving a single term only. George W. Weeks, of Copley, was elected in October, 1872, and re-elected in 1875, serving two full terms. Sumner Nash, of Akron, elected in October, 1878, for three years from February, 1879.

William M. Dodge, of Akron, was elected Prosecuting Attorney at the first election for county officers held in the new county, in April, 1840, and re-elected in October of the same year for two years. George Kirkum, of Akron, was elected in October, 1842, serving a single term of two years only. William S. C. Otis, of Akron, was elected in October, 1844, also serving but one term. Samuel W. McClure, of Cuyahoga Falls, was elected in October, 1846, serving but a single term. William H. Upson, of Akron, was elected in October, 1848, holding the position but two years. Harvey Wheedon, of Hudson, was elected in October, 1850, also retiring at the end of two years. Sidney Edgerton, of Akron, was elected in October, 1852, and re-elected in 1854, holding the office four years. Henry McKinney, of Cuyahoga Falls, was elected in October, 1856, and re-elected in 1858. N. D. Tibbals, of Akron, was elected in October, 1860, and re-elected in 1862. Mr. Tibbals going into the 100-days service in 1864, E. P. Green was appointed, and served as Prosecuting Attorney ad interim. Edward Oviatt, of Akron, was elected in October, 1864, and re-elected in 1866. Jacob A. Kohler, of Akron, was elected in October, 1868, and re-elected in 1870. Henry C. Sanford, of Akron, was elected in October, 1872, retaining the office but a single term. James M. Poulson, of Akron, was elected in October, 1874, holding the position but a single term. Edward W. Stuart, of Akron, was elected in October, 1876, and re-elected in 1878, serving two full terms. Charles Baird, of Akron, was elected in October, 1880.

Thomas Wilson, of Northfield, was elected Sheriff in April, 1840, to serve until the next annual election; was re-elected in October, 1840, and again in 1842, serving, in all, four years and seven months, notwithstanding the constitutional provision that no Sheriff shall serve more than four years, in any consecutive six years—a provision for which no reason can be assigned that would not equally apply to any other county or State official. Lewis M. Janes, of Boston, elected in October, 1844: re-elected

in 1846. William L. Clarke, of Middlebury, elected in October, 1848; re-elected in 1850. Dudley Seward, of Tallmadge, elected in October, 1852; re-elected in 1854. Samuel A. Lane, of Akron, elected in October, 1856, and re-elected in 1858. During his first term, the law was changed so as to give Sheriffs elect possession of their offices on the first Monday of January instead of the first Monday of November, after their election, so that the constitution was again "fractured" by this incumbent holding the office four years and two months, though supposed to have been mended by his filing a new bond for the extra two months. Jacob Chisnell, of Green, elected in October, 1860; re-elected in 1862. James Burlison, of Middlebury, elected in October, 1864; re-elected in 1866. Augustus Curtiss, of Portage, elected in October, 1868, and re-elected in 1870. Levi J. McMurray, of Franklin, elected in October, 1872; and re-elected in 1874. Samuel A. Lane, after an interregnum of sixteen years, then sixty-one years of age, was again elected Sheriff in October, 1876, and re-elected in 1878, holding the position, in all, eight years, a distinction accorded to no other incumbent of the office in the history of the county. William McKinney, of Twinsburg, elected in October, 1880.

Birdsey Booth, of Cuyahoga Falls, was elected County Auditor in April, 1840, to serve until the next annual election, and re-elected in October, 1840, for the term of two years. Theron A. Noble, of Middlebury, elected in October, 1842; re-elected in 1844 and again in 1846, serving in all six years. Nathaniel W. Goodhue, of Middlebury, elected in October, 1848; re-elected in 1850. Henry Newberry, of Cuyahoga Falls, elected in October, 1852, serving but a single term. Charles B. Bernard, of Akron, elected in October, 1854; re-elected in 1856. George W. Crouse, of Akron, elected in October, 1858, and re-elected in 1860. Treasurer, Sullivan S. Wilson, having resigned his office, the County Commissioners appointed Mr. Crouse to fill the vacancy, to serve from the 16th of February, 1863, till the first Monday of the following September, Mr. Crouse resigning his position as Auditor on his accession to the treasurership. Sanford M. Burnham, of Akron, elected in October, 1862. Two weeks before the time fixed by law for taking possession, Mr. Burnham was appointed by the County Commis-

sioners to fill the vacancy occasioned by the resignation of Auditor Crouse to take the treasurership. Mr. Burnham was successively re-elected in 1864, 1866 and 1868. By act of the Legislature, passed April 18, 1870, the time for taking possession of the office was changed from the first of March to the second Monday of November, the then incumbents holding over until that time. Before the expiration of his term, as thus extended, Mr. Burnham was chosen to represent the people of Summit County in the State Legislature, and resigned his position as Auditor October 9, 1871, having served in all nearly eight years and eight months. Hosea Paul, of Cuyahoga Falls, was appointed by the Commissioners to fill the vacancy occasioned by the resignation of Auditor Burnham, from October 9 until the second Tuesday in November, 1871; Mr. Burnham, however, continuing to perform the duties of the office as Mr. Paul's clerk, until the close of the term. Edward Buckingham, of Middlebury, was elected in October, 1871, and successively re-elected in 1873, 1875 and 1877, the last time for three years, an act changing the term of service from two to three years, having been passed March 23, 1877, being in continuous service nine years; Aaron Wagener, of Akron, elected in October, 1880.

William O'Brien, of Hudson, was elected County Treasurer, April, 1840, to serve until the next annual election, and re-elected for two years in October, 1840, dying before the expiration of his term, in February, 1842; George Y. Wallace, of Northfield, was appointed by the County Commissioners, February 15, 1842, to fill the vacancy occasioned by the death of Treasurer O'Brien; Milton Arthur, of Northfield, elected in October, 1842, re-elected in 1844, and again in 1846; William H. Dewey, of Akron, elected in October, 1848, holding the office for one term only; Frederick Wadsworth, of Akron, elected in October, 1850, also serving but a single term; Chester W. Rice, of Cuyahoga Falls, elected in October, 1852, one term only; Houston Sisler, of Franklin, elected in October, 1854, and re-elected in 1856; Sullivan S. Wilson, of Northampton, elected in October, 1858, and re-elected in 1860, resigning his office in February, 1863; Treasurers under the law, not taking possession of their offices until the first Monday in September (nearly a year) after their election; George W.

Crouse, of Akron, appointed by the Commissioners to fill the vacancy occasioned by the resignation of Treasurer Wilson, to serve from February 16, 1863, till the first Monday of the following September, a little over seven months; Israel E. Carter, of Akron, elected in October, 1862, and re-elected in 1864; Arthur L. Conger, of Boston, elected in October, 1866, and re-elected in 1868; Schuyler R. Oviatt, of Richfield, elected in October, 1870, and re-elected in 1872; David R. Paige, of Akron, elected in October, 1874, and re-elected in 1876; Henry C. Viele, of Akron, elected in October, 1878, and re-elected in 1880.

[NOTE.—Under the present State Constitution, County Treasurers, like Sheriffs, are prohibited from serving more than four years in any consecutive six years, a provision for which it is difficult to find a good and valid reason.]

Alexander Johnston, of Green, was elected County Recorder in April, 1840, and again for a full term of three years in October, of the same year; Nahum Fay, of Akron, was elected in October, 1843, and re-elected in 1846; Jared Jennings, of New Portage, was elected in October, 1849, serving one term only; Henry Purdy, of Springfield, was elected in October, 1852, and re-elected in 1855; Philip P. Boek, of Akron, elected in October, 1858, and re-elected in 1861; James A. Lantz, of Akron, elected in October, 1864, and re-elected in 1867; Grenville Thorp, of Bath, elected in October, 1870, and died before the expiration of his first term in February, 1872; Henry C. Viele, of Akron, appointed by the County Commissioners to fill the vacancy occasioned by the death of Recorder Thorp, to serve until the next annual election; George H. Payne, of Akron, elected in October, 1872, and re-elected in 1875; Albert A. Bartlett, of Akron, elected in October, 1878.

Russell H. Ashmun, of Tallmadge, was elected County Surveyor, in April, 1840, and again elected for a full term of three years, the following October; Peter Voris, of Bath, elected in October, 1843, serving one term only; Frederick Seward, of Tallmadge, elected in October, 1846, also holding the office but one term; Dwight Newton, of Akron, elected in October, 1849, for one term only; Schuyler R. Oviatt, of Richfield, elected in October, 1852, for a single term only; Hosea Paul, of Cuyahoga Falls, elected in October, 1855, and re-elected successively in

1858. 1861, 1864 and 1867, dying in June, 1870, after continuously holding the office for nearly fifteen years; Robert S. Paul, of Akron, appointed by the Commissioners to fill the vacancy occasioned by the death of his father, Hosea Paul, in June, 1870, and elected to the office in October of the same year; Jacob Mishler, of Springfield, elected in October, 1873, after qualifying, resigned without entering upon the duties of the office; Robert S. Paul, appointed by the Commissioners, February 3, 1874, to fill the vacancy, until the next annual election; John W. Seward, of Tallmadge, elected in October, 1874, serving a single term of three years only; Robert S. Paul, of Akron, elected in October, 1877, and re-elected in 1880.

Elisha Hinsdale, of Norton, was elected County Coroner in April, 1840, and again in the following October for a full term of two years, and re-elected in 1842; Ithiel Mills, of Akron, elected in October 1844, and re-elected in 1846; Joseph T. Holloway, of Cuyahoga Falls, elected in October, 1848, holding a single term only; John Nash, of Middlebury, elected in October, 1850, re-elected in 1852, died September 7, 1853; Oliver E. Gross of Stow, elected in October 1853, serving a single term only; William L. Clarke, of Akron, elected in October, 1855, serving but one term; Noah Ingersoll, of Coventry, elected in October, 1857, and re-elected in 1859; Joseph T. Holloway, of Cuyahoga Falls, elected in October, 1861, holding as before, but a single term; Porter G. Somers, of Cuyahoga Falls, elected in October, 1863, re-elected in 1865, and by reason of a lapse in the election of that officer, in 1867, holding over until the election of his successor in 1868; Oliver E. Gross, of Stow, elected in October, 1868, and re-elected in 1870; Almon Brown, of Middlebury, elected in October, 1872, and successively re-elected in 1874, 1876, 1878 and 1880.

The following gentlemen have served as County Commissioners—Augustus E. Foote, of Twinsburg, from April, 1840, to December, 1843; Jonathan Starr, of Copley, from April, 1840, to December, 1844; John Hoy, of Franklin, from April, 1840, to December, 1845; Mills Thompson, of Hudson, from December, 1843, to December, 1849; James W. Weld, of Richfield, from December, 1844, to December, 1853; Henry G. Weaver, of Springfield, from Decem-

ber, 1845, to December, 1851; Edwin Wetmore, of Stow, from December, 1849, to December, 1858; Hiram Weston, of Middlebury, from December, 1851, to December, 1854; James A. Metlin, of Norton, from December, 1853, to December, 1856; Ambrose W. Bliss, of Northfield, from December, 1854, to December, 1860; John S. Gilerest, of Springfield, from December, 1856, to December, 1862; John McFarlin, of Bath, from December, 1858, to December, 1861; Nelson Upson, of Twinsburg, from December, 1860, to March, 1866, when he resigned; George Buel, of Akron, from December, 1861, to May, 1864, when he resigned; David E. Hill, of Middlebury, from December, 1862, to December, 1868; George D. Bates, of Akron, appointed to fill the vacancy occasioned by the resignation of Mr. Buel, from May, 1864, to December, 1864; Sidney P. Conger, of Boston, appointed to fill the vacancy occasioned by the resignation of Nelson Upson, from May, 1866, to December, 1866; John McFarlin, of Bath, from December, 1864, to December, 1867; John C. Johnston, of Northampton, from December, 1866, to December, 1872; George Sackett, of Cuyahoga Falls, from December, 1867, to December, 1870; Orson M. Oviatt, of Richfield, from December, 1868, to December, 1874; John Hill, of Norton, from December, 1870, to December, 1879; George W. Crouse, of Akron, from December, 1872, to December, 1875; Giles L'Hommedieu, of Cuyahoga Falls, from December, 1874, to December, 1877; William Sisler, of Akron, elected in October, 1875, re-elected in October, 1878; Moses D. Call, of Stow, elected in October, 1877, and re-elected in October, 1880; Hiram Hart, of Richfield, elected in October, 1879.

Summit County has been represented in the State Legislature by the following gentlemen: Rufus P. Spalding and Ephraim B. Hubbard, in office at time of erection of Summit County, winter of 1839-40; Henry G. Weaver, of Springfield, elected October, 1840, term, one year; Rufus P. Spalding and Simon Perkins, of Akron, elected in October, 1841, for one year; Amos Seward, of Tallmadge, elected in October, 1842, for one year; John H. McMillen, of Middlebury, and Augustus E. Foote, of Twinsburg, elected in October, 1843, for one year; George Kirkum, of Akron, elected in October, 1844, for one year; Hiram Bowen, of Akron, elected in October, 1845, for one year; Alex-

ander Johnston, of Green, elected in October, 1846, for one year; Peter Voris, of Bath, and Amos Seward of Tallmadge, elected in October, 1847, for one year, Mr. Seward being elected as a "float," jointly by Summit and Portage Counties; Samuel W. McClure, of Cuyahoga Falls, elected in October, 1848, for one year; Harvey B. Spelman, of Akron, elected in October, 1849, for one year; Nathaniel Finch, of Akron, elected in October, 1850, for one year. The new Constitution of Ohio, adopted in 1851, made the term of office for Representative two years instead of one year, as under the old Constitution. Noah M. Humphrey, of Richfield, elected in October, 1851, for two years; Porter G. Somers, of Cuyahoga Falls, elected in October, 1853, for two years; Mendall Jewett, of Mogadore, elected in October, 1855, for two years; Ira P. Sperry, of Tallmadge, elected in October, 1857, for two years; Sylvester H. Thompson, of Hudson, and Alvin C. Voris, of Akron, elected in 1859, for two years; John Johnston of Middlebury, elected in October, 1861, and re-elected in 1863, four years; John Encell, of Copley, elected in October, 1865, for two years; William Sisler, of Franklin, elected in October, 1867, for two years; Alfred Wolcott, of Boston, elected in October, 1869, for two years; Sanford M. Burnham, of Akron, elected in October, 1871, for two years; Hiram H. Mack, of Bath, elected in October, 1873, for two years; Orrin P. Nichols, of Twinsburg, elected in October, 1875, but died before the expiration of his term, in 1877; Hiram H. Mack, of Bath, again elected in October, 1877, for two years; John Hill, of Norton, and Leonidas S. Ebright, of Akron, elected in October, 1879, for two years.

The following have been State Senators from Summit and Portage Counties: Simon Perkins, Jr., in office at time of erection of Summit County, in the winter of 1839-40; Elisha N. Sill, of Cuyahoga Falls, elected in October, 1840, for two years; John E. Jackson, of Portage County, elected in October, 1842, for two years; William Wetmore, of Stow, elected in October, 1844, for two years; Asahel H. Lewis, of Portage County, elected in October, 1846, for two years; Lucian Swift, of Akron, elected in October, 1848, for two years; Darius Lyman, of Portage County, elected in October, 1850, for two years, but cut off at the end of one year by new constitution; Ransom A. Gillette, of Portage County, elected in October, 1851, for

two years; William H. Upson, of Akron, elected in October, 1853, for two years; Oliver P. Brown, of Portage County, elected in October, 1855, for two years; George P. Ashmun, of Hudson, elected in October, 1857, for two years; James A. Garfield, of Portage County, elected in October, 1859, for two years; Lucius V. Bierce, of Akron, elected in October, 1861, for two years; Luther Day, of Portage County, elected in October, 1863, but, being placed in nomination as a Judge of the Supreme Court, in 1864, resigned his position as State Senator; Alphonso Hart, of Portage County, elected in October, 1864, for one year, to fill vacancy caused by resignation of Senator Day; Newell D. Tibbals, of Akron, elected in October, 1865, for two years; Philo B. Conant, of Portage County, elected in October, 1867, for two years, but resigned after serving one year; William Stedman, of Portage County, elected in October, 1868, for one year, to fill vacancy; Henry McKinney, of Akron, elected in October, 1869, for two years; Alphonso Hart, of Portage County, elected in October, 1871, for two years; Nathaniel W. Goodhue, of Akron, elected in October, 1873, for two years; Marvin Kent, of Portage County, elected in October, 1875, for two years; David Duncan Beebe, of Hudson, elected in October, 1877, and re-elected in October, 1879—the first successive re-election of an incumbent of that office in the district.

Following the county officers and Representatives, it is not inappropriate to mention the names of those who have been called to represent our county in still higher stations of the public service. Of these higher dignitaries, we will notice, first, our Representatives in Congress.

Summit County has been represented in the Lower House of the National Legislature, in common with other counties associated with her in Congressional Districts, as follows: In 1840, Fifteenth District, composed of Cuyahoga, Portage, Summit, Medina and Lorain—Hon. Sherlock J. Andrews, of Cuyahoga, Whig, one term. In 1842-44, Nineteenth District, composed of Trumbull, part of Mahoning, Portage and Summit—Hon. Daniel R. Tilden, of Portage, Whig, two terms. In 1846-48, Nineteenth District, same counties as above—Hon. John Crowell, of Trumbull, Whig, two terms. In 1850, Nineteenth District, same as above—Hon. Eben Newton, of Mahoning, Whig, one term. In

1852, Eighteenth District, composed of Portage, Summit and Stark—Hon. George Bliss, of Summit, Democrat, one term. In 1854-56, Eighteenth District, same as above—Hon. Benjamin F. Leiter, of Stark, Republican, two terms. In 1858-60, Eighteenth District, same as above—Hon. Sidney Edgerton, of Summit, Republican, two terms. In 1862-64-66, Eighteenth District, composed of Lake, Cuyahoga and Summit—Hon. Rufus P. Spalding, of Cuyahoga, Republican, three terms. In 1868-70, Eighteenth District, same as above—Hon. William H. Upson, of Summit, Republican, two terms. In 1872-74-76-78, Eighteenth District, composed of Lorain, Medina, Wayne and Summit—Hon. James Monroe, of Lorain, Republican, four terms. In 1880, Eighteenth District, same as above—Hon. Addison S. McClure, of Wayne, Republican.

Since the organization, in April, 1840, Summit County has been associated, Congressionally, in various combinations, with Cuyahoga, Lake, Portage, Trumbull, part of Mahoning, Stark, Wayne, Medina and Lorain Counties, and in Districts Fifteen, Eighteen and Nineteen. In each of the twelve Presidential elections which have been held, the district to which Summit County was for the time being attached, was represented in the Electoral College by the following-named gentlemen, the political party by which they were elected, and the candidates for President and Vice President for whom they severally voted, also being designated: In 1840, Fifteenth District, composed of Cuyahoga, Portage, Summit, Medina and Lorain. Hon. David King, of Medina, Whig—voted for William Henry Harrison, of Ohio, for President, and John Tyler, of Virginia, for Vice President. In 1844, Nineteenth District, composed of Trumbull, part of Mahoning, Portage and Summit Counties, Hon. Jacob H. Baldwin, of Trumbull, Whig—voted for Henry Clay, of Kentucky, for President, and Theodore Frelinghuysen, of New York, for Vice President. In 1848, Nineteenth District, same counties as above, Hon. John Caldwell, of Trumbull, Democrat—voted for Lewis Cass, of Michigan, for President, and William O. Butler, of Kentucky, for Vice President. In 1852, Eighteenth District, composed of Portage, Summit and Stark Counties, Hon. Samuel D. Harris, of Portage, Democrat—voted for Franklin Pierce, of New Hampshire, for President, and William R. King, of Ala-

bama, for Vice President. In 1856, Eighteenth District, same as above, Hon. John S. Herrick, of Portage, Republican—voted for John C. Fremont, of California, for President, and William L. Dayton, of New Jersey, for Vice President. In 1860, Eighteenth District, same as above, Hon. William K. Upham, of Stark, Republican—voted for Abraham Lincoln, of Illinois, for President, and Hannibal Hamlin, of Maine, for Vice President. In 1864, Eighteenth District, composed of Cuyahoga, Lake and Summit Counties, Hon. Seth Marshall, of Lake, Republican—voted for Abraham Lincoln, of Illinois, for President, and Andrew Johnson, of Tennessee, for Vice President. In 1868, Eighteenth District, same as above, Hon. Stephen H. Pitkin, of Summit, Republican—voted for Ulysses S. Grant, of Illinois, for President, and Schuyler Colfax, of Indiana, for Vice President. In 1872, Eighteenth District, composed of Summit, Wayne, Medina and Lorain Counties, Hon. John R. Buchtel, of Summit, Republican—voted for Ulysses S. Grant for President, and Henry Wilson, of Massachusetts, for Vice President. In 1876, Eighteenth District, same as above, Hon. Samuel G. Barnard, of Medina, Republican—voted for Rutherford B. Hayes, of Ohio, for President, and William A. Wheeler, of New York, for Vice President. In 1880, Eighteenth District, same as above, Hon. Nathaniel W. Goodhue, of Summit, Republican—voted for James A. Garfield, of Ohio, for President, and Chester A. Arthur, of New York, for Vice President.

William S. C. Otis, Esq., of Akron, was Summit County's representative to the State Constitutional Convention of 1850. The convention met on the 6th day of May, 1850, in Columbus. July 9, adjourned to meet in Cincinnati on the first Monday in December. The convention completed its labors and adjourned *sine die* March 10, 1851. The constitution was adopted for twenty years at a special election held on the 21st day of June, 1851, the vote of Summit County standing 2,025 "for" and 2,013 "against," being a majority of twelve only in its favor. Gen. Alvin C. Voris, of Akron, was the Summit County member of the Ohio Constitutional Convention of 1873. The convention met in the House of Representatives, in Columbus, May 13, 1873. On the 8th day of August, the convention adjourned to meet in Cincinnati on the 2d day of December. On concluding its

business, the convention adjourned on the 3d day of February, 1874. The new constitution, as presented by the convention, though regarded by many of the most intelligent people of the State as a great improvement upon the constitution of 1850, was rejected by the people of Ohio at a special election held August 18, 1874, the vote of Summit County standing 2,112 "for" and 2,774 "against," being a negative majority of 662.

In this chapter, devoted as it is to matters pertaining to the county at large, we should not omit an extended mention of the Summit County Infirmary. Up to 1849, the poor of the county had been provided for in the temporary quarters leased for the purpose, but altogether inadequate for the proper accommodation and care of that unfortunate portion of our population. On the 12th day of January, 1849, the County Commissioners, Messrs. Mills Thompson, of Hudson, James W. Weld, of Richfield, and Henry G. Weaver, of Springfield, purchased the McCune farm, one mile west of the corporate limits of Akron, consisting of 147 49-100 acres of land, for the sum of \$3,953.33, payments to be made as follows: \$400 April 1, 1849; \$800 February 1, 1850; \$1,000 February 1, 1851; \$1,000 February 1, 1852; \$753.33 February 1, 1853; interest at the rate of 6 per cent to be paid annually.

On the 21st day of January, 1849, the County Commissioners contracted with Mr. Leander Starr, of Hudson, for the erection of the necessary buildings for the accommodation of the poor of the county for the sum of \$1,958, the work to be completed by the 1st day of July of the same year, the dwelling-house already upon the premises being devoted to the use of the Superintendent of the Infirmary and his assistants. Mr. Starr's job was finished on time, and formally accepted July 10, 1849, with an allowance, in addition to the contract price, of \$8 for extra labor.

On the 11th day of July, 1849, the Commissioners appointed Messrs. Roswell Kent, of Middlebury, Avery Spicer, of Coventry, and Lucius V. Bierce, of Akron, as the first regularly constituted Board of Directors for the management of the farm and the care of the poor of the county, to hold their offices until the next ensuing October election. The board organized by electing Roswell Kent, President, and L. V. Bierce, Clerk, and by the appoint-

ment of Abraham Siehley as Superintendent. Under the fostering care of these four gentlemen, aided by the County Commissioners, the foundation was laid firm and broad for the systematic and liberal care of our poor, which, steadily growing and improving from year to year, has made the Summit County Infirmary one of the very best local charitable institutions in the State.

The buildings originally provided, as above stated, with sundry additions which had been made from time to time as necessity required, becoming considerably dilapidated and, as our population increased, altogether too straitened for the accommodation of the inmates, the County Commissioners and Infirmary Directors, in 1863, determined on the erection of a more commodious and substantial structure. To this end, legislative authority was invoked, resulting in the passage, on the 23d day of March, 1864, of

AN ACT TO AUTHORIZE THE COUNTY OF SUMMIT TO BUILD A COUNTY INFIRMARY, MAKE CONTRACTS AND INCREASE THE TAX LEVY UPON THE TAXABLE PROPERTY OF SAID COUNTY:

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio:* That the County Commissioners of Summit County be, and they are hereby, authorized to build a County Infirmary for the use of said county, at a cost not exceeding \$16,000, upon such plan and in such manner as, in their opinion, will be conducive to the best interests of the county, and make all contracts necessary to carry out the provisions of this act.

SEC. 2. To anticipate the receipts which may come into the County Treasury by virtue of the tax levied under the authority of this act, said Commissioners are hereby authorized to temporarily transfer from moneys in the treasury of said county belonging to the railroad fund, not exceeding \$5,000, and may also use, in the construction of said building, any unexpended money heretofore levied for building purposes in said county.

SEC. 3. That for the purpose of providing money to defray the expenses of building said infirmary, and to re-imburse the money transferred from the railroad fund, so provided in Section 2 of this act, said Commissioners are hereby authorized to increase the tax levy upon the taxable property of said county one half mill on the dollar in each of the years 1864 and 1865.

SEC. 4. This act shall be in force from and after its passage.

The making of the brick was done upon the infirmary farm—most excellent clay for the purpose being found thereon—under the superintendence of Mr. Elijah C. Briggs, of Akron. The farm help, and, so far as practicable, pauper

labor, was employed in the manufacture of brick, not only for the buildings in question, but to a considerable extent for market, several hundred thousand having been sold in and hauled to the city during the progress of the work, thus bringing the material for the work within comparatively low figures. The stone for the foundations, of a most durable quality, were quarried in the neighborhood, and bought by the perch, delivered upon the ground. The mechanical labor upon the foundation and walls was done by the day, under the superintendence of Mr. George Allison, of Tallmadge, a practical brick-mason.

The wood-work was done on contract by Mr. George Thomas, of Akron, the architect being Col. S. C. Porter, of Cleveland, the entire job being completed under the direct supervision of Infirmary Director, Avery Spicer, and County Commissioner David E. Hill, the latter gentleman being constituted general superintendent of the work by a vote of the board, January 4, 1865. The building, being constructed upon the economical plan indicated, was nominally brought within the provisions of the act authorizing its construction, though, by the application of home labor and material, the actual cost was in reality several thousand dollars more. It is of the following general description and dimensions: The main or central building, two stories high, exclusive of basement and attic, is 26x40 feet in size, fronting end to the north; two wings on either side, same height as main building, are each 25x32 feet, with a rear wing 30x32 feet, and a still further rear extension 30x36 feet, for the use of insane patients, and connected with the main rear wing by a covered hall, or archway, eight feet in width. The style of architecture is of a mixed order, approximating to Gothic, with brackets and five large dormer windows in the roof to light the capacious garret. The main building is entered from the north by a flight of cut-stone steps, surmounted by a handsome porch. The front hall is seven feet in width, with stairs leading to the second story and basement. On the right of the hall, on the ground floor, is the parlor, 15x20 feet, with bed-room, 10x12 feet, and store-room, 8x12 feet. On the left of the hall is the sitting-room, 15x20 feet, with bed-room, 12x12 feet, and two closets, each about six feet square. Each side wing has its separate entrance, east and west, with

seven foot hall and stairs, similar to the front hall. Each wing (first floor), contains two bed-rooms, each 9x12 feet, on the north side of hall, and each a sitting-room, 12x24 feet, for the use of the inmates on the south side of halls. The rear wing has, on the main floor, a dining-room, 14x16 feet, two bed-rooms, 8x9 feet; pantry, 6x9 feet, and kitchen, 15x18 feet, besides a stairway extending from the basement to garret. In the basement of the entire structure, besides several commodious cellars for the storage of vegetables, fruits and other supplies, there are two dining-rooms, 12x36 feet each, kitchen, including pantry, 16x28 feet, and wash-room, 15x18 feet. In the second story, on either side of the hall, in main part, are sick-rooms, each 15x20 feet; and in rear, extending into rear wing, two wards, each 13x29 feet, back of which are two 7x9-bed-rooms, with a 6x9 feet linen closet, hall, stairway, etc. On the second floor of each side wing, there are five 9x12 feet bed-rooms, besides halls, stairways, etc. The attic is mainly devoted to storage, drying clothes, etc., though within a few years past, an apartment has been partitioned off and fitted up therein for the use of "tramps" and other transient applicants for food and lodging. In the insane department, at the extreme rear, there are six cells, 5x8 feet, substantially built with heavily grated doors. The corridor, on either side, is lighted by three large windows, one opposite each cell, the whole well ventilated, and as well supplied with sanitary conveniences as the insane habits of the inmates will admit of.

The new infirmary building was not officially accepted by the County Commissioners until the 5th day of March, 1866, though it was occupied and formally opened on the evening of February 3 by a public supper, under the auspices of the Directors and Superintendent Frank T. Husong. A large number of invited guests—representative men and women—from every portion of the county were present, and all expressed themselves as greatly pleased with the building and its appointments, and the investment which had thus been made by them and their fellow-citizens, in the interest of benevolence and humanity. At the close of the supper, the guests organized by appointing George D. Bates, Esq., Chairman, when short approbatory speeches were made by Gen. A. C. Voris, William T. Allen, S. A. Lane, Dr. E. W.

Howard and others. Closing by the unanimous adoption of the following resolution :

Resolved, That the County Commissioners and Directors of the County Infirmary, together with those who have so faithfully aided them in the undertaking, are entitled to the thanks of the citizens of Summit County, for the able manner in which they have planned and prosecuted to completion, the erection of an infirmary edifice, which is at once an ornament and an honor to the county, and a mark of the exalted humanity and liberality of its people.

Director Spicer and Commissioner Hill, duly appreciating the advantages of having an abundance of pure water in and about the infirmary buildings and grounds, entered into negotiations with Mr. James McAllister for the use of the surplus waters from the large spring in front of his residence on the Medina road, and directly north of the infirmary farm. The Directors proposed to properly inclose and protect the spring by a substantial stone house, with conveniences for using the water both by Mr. McAllister and the public, and to convey the surplus water by iron or leaden pipes across the farm of Mr. McAllister to the infirmary grounds and into the basement of the infirmary building. On visiting Mr. McAllister for the purpose of legally perfecting the arrangement, that gentleman receded from the terms that had been named, and seemingly acceded to, and demanded a bonus of \$500 before signing any papers—a larger sum of money than Messrs. Hill and Spicer felt justified in paying for the privilege in question, especially in view of the large outlay that would be required in building the spring-house, and excavating for and laying the pipes for so long a distance, and the project was abandoned. In the meantime Mr. Spicer made a thorough examination of the infirmary farm itself, and on a high knoll some thirty or forty rods southeast of the new building, by digging a few feet only, struck a large spring of pure soft water, not only of sufficient abundance for the wants of the institution, but with sufficient head to carry the water one story higher in the building, while costing far less to fit it up and put in the pipes and fixtures, than the McAllister project would have done.

The Directors have from time to time, as their resources would admit of, besides erecting commodious barns and other outbuildings, beautified the grounds, laying them out into suitable drives and walks, planting with trees, shrubbery, etc., thus rendering them both pleasant to the

inmates and attractive to visitors, while the farm, from the largely wild and uncultivated condition in which it was purchased, has become one of the most tidy and productive farms in the county, and very largely profitable in the way of giving employment to that portion of its unfortunate inmates mentally and physically able to perform manual labor, and through its annual products, rendering the institution largely self-sustaining.

As commodious and as ample as the infirmary buildings erected in 1864-65-66 were supposed to be, they were found at the end of ten years inadequate to the necessities of the county. Accordingly, at the instance of the Board of Directors and the County Commissioners, Senator N. W. Goodhue and Representative Hiram H. Mack, secured the passage of a special law authorizing the building of an addition to said infirmary buildings, the bill becoming a law on the 30th day of March, 1875, and reading as follows :

AN ACT AUTHORIZING THE COUNTY COMMISSIONERS OF THE COUNTY OF SUMMIT TO LEVY TAXES FOR BUILDING AN ADDITION TO THE COUNTY INFIRMARY, AND TO BORROW MONEY AND ISSUE BONDS THEREFOR:

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio:* That the County Commissioners of Summit County be, and they hereby are, empowered and authorized to levy a tax of any amount they may deem necessary, not exceeding \$10,000, upon the taxable property of said county, for the purpose of constructing and furnishing an addition to the County Infirmary of said county, to be collected by the County Treasurer upon the grand duplicate as other taxes, and to be paid out upon the order of the County Commissioners.

SEC. 2. That for the purpose of anticipating the collection of taxes provided for in the first section of this act, the said County Commissioners be, and they are hereby, authorized to borrow any sum, not exceeding \$10,000, at a rate of interest not exceeding eight per cent, and to issue bonds therefor, payable at any time not exceeding two years from the date thereof, and to be sold for not less than their par value.

SEC. 3. This act shall be in force from and after its passage.

In accordance with the provisions of this law, a contract was entered into, on the 27th day of July, 1875, with Messrs. Derhamer, Steese & Co., to erect a building upon the west side, and attached to the west wing transversely, corresponding in general appearance to the central building, for the sum of \$7,294.37, with Jacob Snyder, Esq., as architect, at 3½ per cent on the contract price, for his services in fur-

nishing the plan and superintending the work. This addition was completed substantially according to contract, in a style and finish corresponding to the original structure, and is of the following dimensions: Entire size, 32x42 feet. First floor divided as follows: Hall, 6x30 feet; hall for stairs, 7 feet 6 inches by 14 feet 6 inches; sitting-room, 18x30; bed-room, 9 feet 6 inches by 14 feet 6 inches; bath-room, 6x14 feet 6 inches; store-room, 7x14 feet 6 inches. Second floor: Hall, 6x30; hall for stairs, 7 feet 6 inches by 14 feet 6 inches; three bed-rooms respectively, 9 feet 6 inches by 14 feet 6 inches; 12 feet 6 inches by 14 feet 6 inches; 11x18 feet; sick-room, 18x19 feet. Attic: Hall for stairs, 7x21 feet; two sleeping-rooms, 15x22 feet 6 inches, and 18x30 feet, respectively; wardrobe, 7x22 feet. Basement: Dining-room, 17x30; sitting-room, 12 by 13 feet 6 inches; bed-room, 12x13 feet 6 inches, and hall 6x30 feet. The completion of this fine improvement has enabled the Directors and Superintendent not only to more comfortably arrange and care for the ordinary number of inmates, but to provide for such considerable additions, as, in seasons of unusual severity or distress, may need the benefits of this munificent public charity. In addition, the Directors last year (1880), caused to be erected a separate building for laundry and storage purposes, a few rods east of the rear wing. It is a substantial brick structure, 20x30 feet in size. First floor: Store-room, 10x16 feet; wash-room, 17 feet 6 inches by 18 feet, with boiler and other improved washing conveniences. Second floor: Drying and laundry room, 18 feet 6 inches by 28 feet 6 inches. The average number of inmates during the year 1880, was eighty-seven, though as usual, a large amount of outside assistance was afforded to the needy during inclement portions of the year.

After the purchase of the infirmary farm, the County Commissioners, as before stated, on the 11th day of July, 1849, appointed Roswell Kent, of Middlebury, Avery Spicer of Coventry, and Lucius V. Bierce, of Akron, as Infirmary Directors, to hold their offices until the next ensuing October election. The board organized by the election of Roswell Kent as President and Lucius V. Bierce as Clerk. From among the several applicants for the situation, Abraham Sichley, of Portage, was appointed Superintendent.

In October, 1849, the people of the county elected Timothy L. Miller, of Cuyahoga Falls, Roswell Kent, of Middlebury, and Gibbons J. Ackley, of Akron, Infirmary Directors for one, two and three years, respectively. Mr. Miller declining to serve. Avery Spicer, of Coventry, was appointed by the County Commissioners to fill the vacancy. President of the Board, Roswell Kent; Clerk, Gibbons J. Ackley; Abraham Sichley continued as Superintendent.

In October, 1850, Avery Spicer was elected for three years. Organization as before. Mr. Gibbons J. Ackley having died before the expiration of his term of office. Mr. Joseph E. Wesener, of Akron, was, on the 9th day of August, 1851, appointed by the Commissioners to fill the vacancy until the ensuing October election, Mr. Wesener also, by vote of the board, filling Mr. Ackley's position as Clerk of the Board. In October, 1851, Ira Hawkins, of Portage, was elected for three years, and George D. Bates, of Akron, for one year—the balance of the unexpired term of Mr. Ackley, deceased—Messrs. Kent and Wesener retiring. Spicer, President; Bates, Clerk; Sichley, Superintendent. In October, 1852, George D. Bates, of Akron, was re-elected for three years. Organization same as before. In October, 1853, George Sherbondy, of Portage, was elected for three years. Mr. Spicer, retiring. Hawkins, President; Bates, Clerk; Sichley, Superintendent. In October, 1854, Ira Hawkins, of Portage, was re-elected. Organization same as before. In March, 1855, Mr. William Chandler, of Akron, by vote of the board, succeeded Mr. Sichley as Superintendent of the Infirmary. In October, 1855, Charles Hanscom, of Akron, was elected for three years, Mr. Bates retiring. Hawkins, President; Hanscom, Clerk; Chandler, Superintendent. In October, 1856, David A. Scott, of Akron, was elected for three years, Mr. Sherbondy retiring. Organization as before. In October, 1857, Avery Spicer, of Akron, was elected for three years. Mr. Hawkins retiring. Scott, President; Hanscom, Clerk; Chandler, Superintendent. In October, 1858, William Johnston, of Copley, was elected for three years, Mr. Hanscom retiring. Spicer, President; Scott, Clerk; Chandler, Superintendent. In October, 1859, Richard B. Walker, of Akron, was elected for three years, Mr. Scott retiring. Spicer, President; Walker, Clerk; Chandler, Superintendent.

ent. In October, 1860, Mr. Spicer was re-elected for three years. Organization as before. In January, 1861, Mr. Francis T. Husong, of Copley, succeeded Mr. Chandler as Superintendent of the Infirmary. In October, 1861, Alfred R. Townsend, of Akron, was elected Director for three years, Mr. Johnston retiring. Spicer, President; Walker, Clerk; Husong, Superintendent. In October, 1862, Mr. Walker was re-elected for three years. Organization as before. In October, 1863, Mr. Spicer was re-elected for three years. Organization as before. In October, 1864, Mr. Townsend was re-elected for three years. Organization as before. In October, 1865, Mr. Walker was re-elected for three years. Spicer, President; Townsend, Clerk; Husong, Superintendent. In October, 1866, Jonathan H. Brewster, of Coventry, was elected for three years. Mr. Spicer retiring. Walker, President; Townsend, Clerk; Husong, Superintendent. In October, 1867, William M. Cunningham, of Akron, was elected for three years, Mr. Townsend retiring. Walker, President; Cunningham, Clerk; Husong, Superintendent. In April, 1868, George W. Glines, of Gates' Mills, Cuyahoga County, by appointment of the Directors, superseded Mr. Husong as Superintendent of the Infirmary. In October, 1868, Francis T. Husong, of Akron, was elected Director for three years, Mr. Walker, retiring. Brewster, President; Cunningham, Clerk; Glines, Superintendent. In October, 1869, Mr. Brewster was re-elected for three years. Organization same as before. In October, 1870, Mr. Cunningham was re-elected for three years. Organization same as before. In October, 1871, Webster B. Storer, of Portage, was elected for three years, Mr. Husong retiring. Organization same as before. In October, 1872, Mr. Brewster was re-elected for three years. Storer, President; Cunningham, Clerk; Glines, Superintendent. In October, 1873, A. R. Townsend, of Akron, was again elected for three years, Mr. Cunningham retiring. Storer, President; Townsend, Clerk; Glines, Superintendent. In October, 1875, Clement J. Kolb, of Akron, was elected for three years, Mr. Brewster retiring. Organization same as before. In October, 1876,

Henry Frederick, of Portage, was elected for three years, Mr. Townsend retiring. Herrold, President; Kolb, Clerk; Glines, Superintendent. In October, 1877, A. R. Townsend was again elected for three years, Mr. Herrold retiring. Frederick, President; Kolb, Clerk; Glines, Superintendent. Mr. Glines, whose health had been failing for several years, dying March 4, 1878, his assistant, Mr. George Feichter, was, on the 1st day of April, 1878, temporarily appointed Superintendent by the Directors, Mrs. Glines still continuing in charge as Matron and General Manager. In October, 1878, Mr. Kolb was re-elected for three years. Organization same as before. March 1, 1879, the resignation of Mr. Feichter, as Superintendent, was accepted, and Mrs. Julia F. Glines was appointed to the position, and it is safe to say that the institution has never been more ably conducted than during the past two years' incumbency of Mrs. Glines. In 1879, by reason of his removal from the county, Mr. Townsend resigned his position as Director, and, in October of that year, William Southmayd, of Stow, was elected to fill the vacancy for one year, Mr. Frederick also being re-elected for three years. Frederick, President; Kolb, Clerk; Mrs. Glines, Superintendent. In October, 1880, Mr. Southmayd was re-elected for three years. Southmayd, President; Frederick, Clerk; Mrs. Glines, Superintendent.

Looking to the future necessities and convenience of the institution, in the latter part of 1879, the County Commissioners contracted with Mr. James McAllister for the purchase of $37\frac{5}{100}$ acres off the southwest corner of his farm, and adjoining the western portion of the Infirmary farm upon the north. The price stipulated to be paid was \$112.50 per acre, and on the 9th day of March, 1880, the administrator of Mr. McAllister executed a deed therefor, the total cost of the addition being \$4,223.25. Though the cost per acre was more than four-fold the original purchase, it is still regarded as a highly desirable investment, adding to the farm precisely the quality of land, and in the precise locality where an addition was needed, while if the Commissioners should desire to do so they can at any time dispose of ten or twelve acres off from the east end, the site of the original infirmary buildings, at a figure equal to, if not greater than the cost of the new purchase. Thus does "Little Summit," one of the younger

as well as one of the smaller counties of the State, occupy an exalted position, not only physically and altitudinally, but for the extent and excellence of the provision which she has made for the support and care of the indigent and unfortunate portion of her population.

At the date of its erection and organization, in 1840, Summit County had a total population of 22,469, distributed as follows: Bath, 1,425; Boston, 845; Copley, 1,439; Coventry, 1,308; Franklin, 1,436; Green, 1,536; Hudson, 1,220; Northampton, 963; Northfield, 1,031; Norton, 1,497; Portage (including Akron, then containing 1,664 inhabitants) 2,382; Richfield, 1,108; Stow (including Cuyahoga Falls), 1,533; Springfield (including part of Middlebury), 1,573; Tallmadge (including part of Middlebury), 2,134; Twinsburg, 1,039. The census of 1880 makes the total population of the county 43,788, a gain in forty years of 21,319, about two-thirds of the increase being in Akron alone.

Though one of the smallest counties in the State, territorially, Summit County is more diversified in its productions, and more nearly independent of the "outside world" than, perhaps, any other county in the State, large or small. The two southern tiers of townships are unsurpassed as grain producers, while equally well adapted to the growing of other field crops, fruits, sheep, swine, cattle horses, etc. The eight northern are particularly adapted to, and noted for, their dairy products, and, besides producing large quantities of the finest butter and cheese in the world, and many fine cattle in excess of home requirements, are nearly, if not quite, fully self-sustaining in the matter of cereals, vegetables, fruits, wool, maple sugar, sirup, etc. The middle townships are a happy combination of all the excellent qualities of the two sections named, being equally adapted to the raising of stock, grain, fruits and general farm products; and though some portions of the northern townships, bordering upon the river, are somewhat broken, and a few hundred acres in the southern townships are covered by the waters of the lakes and reservoirs which feed the Ohio Canal and supply water for milling and manufacturing pur-

poses, there is, perhaps, as little waste land in Summit County as in the same area of contiguous territory in any other portion of the State.

But, besides these varied and excellent agricultural advantages, Summit County possesses mineral and manufacturing resources superior to those of any other county in Ohio. Nearly the entire area of at least five townships in the county are underlaid with the very best bituminous coal, large quantities of which are mined yearly, not only for home consumption, but for shipment to Cleveland and the upper lakes. The finest building-stone in the State—both coarse and fine grained sandstones—are largely quarried in the middle and northern townships of the county. Inexhaustible deposits of the very best quality of potter's clay, from which millions of gallons of common and fine stoneware are fabricated yearly, underlie the surface of several of the townships of the county, the same localities furnishing the material from which has grown that immense manufacturing interest that is supplying the vitrified sewer-pipe, from one to thirty inches in diameter, with which the cities of both the East and the West are being so largely and so rapidly honey-combed, in the shape of drains and sewers, at the present time, to say nothing of the immense quantities now being used by the farmers of the country in underdraining their lands, and in the construction of gutters and sluices upon public highways. The materials for building-brick are not only abundant, but the fire-brick and the roofing-tile manufactured here are fast attaining an extensive sale and a national reputation.

Added to the extensive water-power heretofore alluded to, these accessory aids to manufactures have justly earned for Summit County and her "tip-top" capital city, a reputation for snap and push second to no other county or city in the United States. The enumeration of the varied enterprises that go to make up this reputation and this thrift will be given in detail by other writers, in the separate histories of the city of Akron and the several villages and townships of the county elsewhere in this volume.

CHAPTER IV.*

WAR HISTORY—THE REVOLUTIONARY STRUGGLE—SECOND WAR WITH ENGLAND—THE MEXICAN WAR—THE GREAT REBELLION—SUMMIT COUNTY TROOPS—SOLDIERS' MONUMENTS—AID SOCIETIES, ETC., ETC.

"War must be
While men are what they are; while they have
Bad passions to be rous'd up."—*Bailey.*

OVER one hundred years ago, George III and his arrogant cabinet assumed to themselves the right to tax their American colonies at will, and without representation in the home Government. This led to what is known in American history as the "Revolutionary war," a long and sanguinary struggle, which resulted in the colonies throwing off forever the galling yoke of the haughty Briton, and of achieving their liberty and independence. Liberty and Independence! Often as the wheels of time roll on the anniversary of American Independence, so often does the patriotic zeal of the sons of liberty blaze out from one end of the Union to the other, in commemoration of those brave, war-worn veterans

"——— who fell
In Trenton's morning fight,
Who crossed the freezing Delaware,
That cold December night;
When, as the columns onward marched
With firm, unbroken ranks,
The blood-marked footprints thick were left
Upon the wintry banks,"

and the thousands and thousands of others who fought and bled for the liberty we, their descendants, enjoy to-day. When the war was over, and our independence acknowledged by the mother country, our patriot soldiery were paid off in valueless paper or in Western lands. The bankrupt Government had no other means of rewarding her faithful soldiers, and large tracts of land in the then Northwestern Territory (Ohio Territory) were set apart as a remuneration for the long service of her patriotic soldiers. This brought many of these old Revolutionary heroes to the Ohio Territory. How many came to what is now Summit County we are unable to say, but as settlements were made here in less than a score of years after the close of the Revolution, it is more than probable that

a number of them were among the early settlers of Summit County. We have, however, an account of but four: Simeon Prior, who settled in Northampton Township in June, 1802, was a native of Massachusetts, and served in the Revolutionary war, in the old "Bay State Line." He died in 1837, at the age of eighty-four years, and lies buried in Northampton Cemetery. Nathaniel W. Bettis also served in the Revolution. He was one of the early settlers in the western part of Tallmadge Township, and when he died was buried with the honors of war, and the solemn rites of Freemasonry. Another of these veterans was Isaac Seward, the grandfather of Col. Seward, of Akron. And still another, David Galpin, who is buried in Akron Rural Cemetery. William Neal, Capt. John Wright, David Preston and Conrad Boosinger were likewise Revolutionary soldiers, and among the early settlers of Tallmadge Township. But it is not intended to go into a history of the Revolutionary war. It is merely mentioned by way of introduction to other wars in which the county bore an active part.

In our second war with Great Britain, or the war of 1812, although Summit County had not yet been organized, the territory of which it is now composed contained a number of inhabitants. Being near the seat of war, most of the able-bodied male citizens participated in the struggle at some time during the period of its continuation. The opening scenes of this "unpleasantness," were characterized by defeat, disaster and disgrace, but toward the close of the struggle, a series of brilliant achievements made amends for these misfortunes. Says a chronicle of the time: "Croghan's gallant defense of Fort Stephenson; Perry's victory on Lake Erie; the total defeat, by Harrison, of the allied British and savages, under Proctor and Tecumseh, on the Thames; and the great closing triumph of Jackson, at New Orleans, reflected the most brilliant luster on the American arms. In every

*Contributed by W. H. Perrin.

vicissitude of this contest, the conduct of Ohio was eminently patriotic and honorable. When the necessities of the National Government compelled Congress to resort to a direct tax, Ohio, for successive years, cheerfully assumed and promptly paid her quota out of her State Treasury. Her sons volunteered with alacrity their services in the field; and no troops more patiently endured hardship or performed better service. Hardly a battle was fought in the Northwest in which some of these brave citizen soldiers did not seal their devotion to their country with their blood." And what is true, and to the honor of the State at large, is equally true of the soldiers from this particular section.

As a matter of some interest to our modern soldiers, we give the following abstract from the Quartermaster's Department during the war of 1812: Rations: One and a quarter pounds of beef, three-quarters of a pound of pork, thirteen ounces of bread or flour, one gill of whisky. At the rate of two quarts of salt, four quarts of vinegar, four pounds of soap, and one and three-quarter pounds of candles to every 100 rations. And from the Paymaster's Department: Colonel, \$75 per month, five rations and \$12 for forage; Major, \$50 per month and three rations; Captain, \$40 per month and three rations; First Lieutenant, \$30 and two rations; Second Lieutenant, \$20 and two rations; Ensign, \$20 and two rations; Sergeant Major, \$9; Quartermaster's Sergeant \$9; other Sergeants, \$8; Corporals, \$7; Musicians, \$6, and Privates, \$6 per month.

It has been a matter of much difficulty to learn the particulars of this war, so far as the few settlers of this section participated in it. Most of these old veterans have met and conquered the last enemy—death. A very few of them are known to be now living. Nor could the names of all who went from what is now Summit County be obtained, but it is believed that most of the able-bodied men of requisite age took part in this war. Among those who served from this county, we have the names of the following: Col. Riall McArthur, Joseph D. Baird, John Hall, Timothy Holcomb (a Lieutenant), Alexander Hall, James Baird, Lee More, Nathaniel De Haven, Martin Willis, Hiram King (an Ensign), ——— Lusk (a Captain), William Prior, Timothy Sherwood, William Wright, Joseph Foster, Henry Wood, George

Showandy, Timothy Clark, John Ellsworth, ——— McCook, ——— Buck, Alfred Parker, Benjamin Stark, John Dillamater, Andrews May, Israel Lacy and Jacob Harter. A few years ago, when these old veterans were pensioned by the Government, there were then thirty-three living in the county, but, with perhaps two or three exceptions, they are now all gone.

"Soldiers, rest, thy warfare o'er,
Sleep the sleep that knows no waking."

After the close of the war of 1812, our peace was no more disturbed, except by an occasional Indian skirmish, until the war with Mexico. It war with "blood-red tresses deepening in the sun," and "death-shot glowing in his fiery hands," raged in countries of the old world, his thunder came to us but as the "mutterings of a distant cloud, whose lightnings could harm us not."

The Mexican war grew out of the admission of Texas, as a State, into the Federal Union. The circumstances were briefly these: Texas had been a province of Mexico, but had seceded (as she tried to do from Uncle Sam in after years, but with less success), and for years its citizens had been carrying on a kind of guerrilla warfare with the mother country. This warfare had been attended with varying results, sometimes the one party, and sometimes the other, being successful. But in 1836, the famous battle of San Jacinto was fought, in which the Texans were victorious, and captured Santa Anna, then Dictator of Mexico, while his whole army was either killed or made prisoners. Santa Anna was held in strict confinement, and finally induced to sign a treaty acknowledging the independence of Texas. But the Republic of Mexico, in violation of every principle of honor, refused to recognize this treaty, and continued to treat Texas and the Texans just as she had previously done. From this time on, petitions were frequently presented by the Texans to the United States Government, praying admission into the Union. But Mexico, through sheer spite, endeavored to prevent this step, constantly declaring that the admission of Texas would be regarded as a sufficient cause for a declaration of war, of the opinion, doubtless, that this would serve to intimidate the United States.

In the Presidential contest of 1844, between Henry Clay, of Kentucky, and James K. Polk,

of Tennessee, the annexation of Texas was one of the leading questions before the people, and Mr. Polk, whose party (the Democrats) favored the admission of Texas, being elected, this was taken as a public declaration on the subject. After this, Congress had no hesitancy in granting the petition of Texas, and, on the 1st of March, 1845, formally received the "Lone Star" into the sisterhood of States. In her indignation, Mexico at once broke off all diplomatic relations with the United States, calling home her Minister immediately. This, of itself, was a declaration of war, and war soon followed. Congress passed an act authorizing the President to accept the services of 50,000 volunteers (which were to be raised at once), and appropriating \$10,000,000 for the prosecution of the war. In this call for 50,000 troops, Ohio was required to furnish three regiments. With her characteristic patriotism, she filled her quota in a few weeks. Upon the organization of these regiments at Cincinnati, the place of rendezvous, there were almost men enough left to form another regiment. These were furnished transportation to their homes at the expense of the Government. The regiments, as organized, were officered as follows: First Regiment, A. M. Mitchell, of Cincinnati, Colonel; John B. Weller, of Butler County, Lieutenant Colonel; T. L. Hamer, of Brown County, Major. Second Regiment, G. W. Morgan, of Knox County, Colonel; William Irvin, of Fairfield, Lieutenant Colonel; William Hall, of Athens, Major. Third Regiment, S. R. Curtis, of Wayne County, Colonel; G. W. McCook, of Jefferson, Lieutenant Colonel, and J. S. Love, of Morgan, Major. Under a second call for men, which was known as the "Ten Regiments Bill," Ohio filled up her quota without delay. Upon this second call, made just after the fall of Monterey, and in opposition to the war generally, Hon. Thomas Corwin in the United States Senate made one of the ablest speeches of his life. In this speech it was that he used the memorable language, since grown almost into a proverb: "If I were a Mexican I would tell you, 'Have you not room in your own country to bury your dead men? If you come into mine, we will greet you with bloody hands, and welcome you to hospitable graves.'"

The majority of the Whig party, as we have said, opposed the annexation of Texas upon the grounds that it would cause a war between

the United States and Mexico, a war that, they held, would be unjust and uncalled for. As Summit County at that time was largely Whig in its political sentiments, like a great majority of that party it opposed the war, and declined taking any active part in it. Hence, the number of men furnished by the county in the different calls for troops was exceedingly small. We have been enabled to learn the names of only the following: George, Otis and Eliphaz Capron, Oliver P. Barney, Joseph Gouder, — Zettle, William H. and Ezra Tryon and Adam Hart. There were, perhaps others, but diligent inquiries have failed to "materialize" any of them. Of those mentioned, Hart enlisted at Pittsburgh, Penn., and Gouder, in Tennessee. Two of the Caprons and O. P. Barney are dead; Eliphaz Capron lives at Ellis' Corners; Zettle and Gouder live in Akron, and Hart lives in Middlebury. Barney was a Sergeant in the Mexican war, and the following incident is still remembered by many, as having been told by himself: When Gen. Taylor's little army was encamped at Matamoras, Barney was on picket duty, and was lassoed by the Mexicans and pretty roughly handled. The following paragraph in regard to it, is from an old file of the *Akron Democrat*: "We are sorry to observe that Sergt. O. P. Barney of this place has had both his feet frozen during the late cold weather. The gallant Sergeant has seen service on the line between Matamoras and Buena Vista, but he has found a more formidable antagonist in Jack Frost, than in the Mexican troopers and their lassoes." Mr. Barney entered the late war, and some years ago, died at the Soldiers' Home at Dayton.

The great rebellion burst upon the country in the spring of 1861, threatening to sweep everything before it to destruction. Hitherto, we had been called to measure arms with foreign foes, or with the howling savages, but now a war among ourselves was inaugurated—a civil war without parallel in the annals of history:

"O war! begot in pride and luxury,
The child of malice and revengeful hate:
Thou impious good, and good impiety!
Thou art the foul refiner of a State,
Unjust scourge of men's iniquity,
Sharp easer of corruptions desperate!"

Of all the wars that have ever scourged God's

earth, a civil war, wherein "the brother betrays the brother to death, and the father the son, and children rise up against their parents, and cause them to be put to death," is the most dreadful. The rival houses of York and Lancaster, with their emblems of "White" and "Red," shook old England to her center, filling her houses with mourning, her fields with carnage, and wasting the blood of her bravest and best; but compared to our "war between the States," it is dwarfed into insignificance. A perfect history of our great civil war has never been written; it never can be written. Though the "pen of inspiration were dipped in the gloom of earthquake and eclipse," it could not write a true history of those four long dreary years as they were. All the evils of war, and all the horrors of civil war were crowded into them, and the refined cruelties known to the civilization of the enlightened age in which we live, were practiced by the opposing parties. Starvation, the prison-pen, and the tortures incident to the times, were the common doom of the unfortunate who fell into enemy's hands. But after four terrible years of strife, the Goddess of Peace once more waved the olive branch over the land, and the unnatural war was brought to a close. That which had so long been deemed a curse to the country, was developed into a blessing, and it is safe to predict that the same cause will never originate another war on American soil. Now that the trouble is over, and peace and prosperity smile upon the land from one end of the nation to the other, it is a source of congratulation that the cause for strife between the sections is forever removed. In the union of "the Roses" was found the germ of England's future greatness and resplendent glory, and in the harmonious blending of "the Blue" and "the Gray," who shall limit the greatness and the glory of America?

It is highly creditable to Summit County that she was represented in some of the first regiments organized in the spring of 1861. When the news was sent flying over the country that the flag had been insulted, the people were aroused to instant action. Who does not remember the blaze of excitement which followed the bombardment of Sumter, when martial music was heard in every town and hamlet, and tender women, no less than brave men, were wild with enthusiasm? Wives encouraged their husbands to enlist; mothers urged their sons to

patriotic devotion, and sisters tenderly gave their brothers to the cause of their country. But no reminders are necessary to revive a recollection of those stirring scenes, nor to recall the names of the patriots who participated in the struggle; who "fought the good fight unto the end," or, from the prison, the hospital and the battle-field, crossed over to mingle with the grand army beyond the river. Some of them sleep in unknown graves, "in the land of cotton and cane," where the palm-trees wave over their tombs; where the birds carol their matins above them, and where the flowers sweeten the air around them with their fragrance; and it is no reproach to their valor that they fell before foes as brave as themselves. They are held *memoria in aeterna*, and their patriotism is recorded in the nation's history. Those who survived and returned in safety to home and friends, have their reward in the knowledge that the old flag still floats over all the States.

A brief sketch of the regiment, containing organized bodies of men from this county, will now be given, together with all the local facts to be obtained, of the companies recruited here and mustered into the United States service. Every exertion has been made to get the list of county organizations complete. Newspaper files have been examined, ex-officers and soldiers consulted, and all publications on the subject perused with care. And while there may be slight errors and omissions in some cases, we believe, however, that in the main the record will be found substantially correct.

The first regiment in which Summit County was represented was the Nineteenth Infantry. This regiment was originally organized for three months, and drew two companies from this county, viz., G and K. Company G was recruited as "Company A, Akron Light Infantry," but, in organizing the regiment, was changed to G. The original officers were Lewis P. Buckley, Captain; A. J. Fulkerson, First Lieutenant, and G. S. Carpenter, Second Lieutenant. Capt. Buckley was promoted to Major, and, at the expiration of the term of service of the regiment, was appointed Colonel of the Twenty-ninth Infantry. Company K was recruited as "Company B, Akron Union Light Infantry," and, upon organization, became Company K, with the following officers: Andrew J. Konkle, Captain; Paul T. Kirby, First Lieutenant, and James Nelson, Second Lieutenant.

The regiment was filled up by the 15th of May, and on the 27th it left Camp Taylor—the place of rendezvous—for Columbus, and occupied Camp Jackson. Here it elected regimental officers. Companies A and B were armed and equipped and sent to Bellaire, where they were employed guarding the ferry until June 3, while the other eight companies were sent to Camp Goddard, at Zanesville, to perfect themselves in the drill. On the 20th of June, Companies A and B joined the regiment, and, with the Seventeenth and Twentieth, were sent to Parkersburg. At Parkersburg the Nineteenth, Eighth and Tenth Ohio, and Thirteenth Indiana were organized into a brigade, under Brigadier-General W. S. Rosecrans. The regiment, with its brigade, went to Clarksburg on the 25th, and to Buckhannon on the 29th, where it arrived on July 2. It participated in the battle of Rich Mountain on the 7th. The behavior of the Nineteenth in this engagement, won from Gen. Rosecrans the following: "The Nineteenth distinguished itself for the cool and handsome manner in which it held its post against a flank attack, and for the manner in which it came into line and delivered its fire near the close of the action." The term of service expired on the 23d, and it returned to Columbus, Ohio, and was mustered out of the service. Many of the officers busied themselves in recruiting for the three years' service, and with such marked success that by the 26th of September, nine full companies had reported and were mustered in.

In the re-organization of the regiment for three years, Company K was made up of Summit County men, and went into the service with the following officers: Paul T. Kirby, Captain; G. R. Lentz, First Lieutenant, and J. J. Agard, Second Lieutenant. Capt. Kirby resigned December 2, 1862. Lieutenant Lentz resigned August 1, 1862. Lieut. Agard was promoted to First Lieutenant February 9, 1862, to Captain June 19, 1863, and honorably discharged January 27, 1865. Albert Upson was promoted from First Sergeant to Second Lieutenant February 9, 1862, to First Lieutenant January 2, 1863, and to Captain July 25, 1864, and, as such, mustered out with the regiment. Wesley Upson was promoted from Third Sergeant to Second Lieutenant January 2, 1863, and to First Lieutenant July 2, 1864. J. S. Cochran was promoted from

Second Sergeant to Second Lieutenant July 2, 1864. Of other promotions we could obtain no information.

The re-organization of the Nineteenth took place at Camp Dennison, and, by the 7th of November, 1861, it was fully armed and equipped and ready for the field. It left camp on the 16th and proceeded to Louisville, Ky., by way of Cincinnati, and was the first regiment to go into Camp Jenkins, five miles from Louisville. It remained here, in command of Gen. O. M. Mitchell, until the 6th of December, when it moved to Lebanon, Ky., and thence to Columbia, where it arrived on the 10th, and was brigaded with the Fifty-ninth Ohio, Second and Ninth Kentucky Infantry and Haggard's Regiment of Cavalry, Gen. J. T. Boyle commanding.

The following pleasant episode occurred while stationed at Columbia: A beautiful silk flag was received as a present from the ladies of Canton to the Nineteenth. It was presented to the regiment in a neat little speech by Mr. A. Kitt. Capt. Manderson received it, and, in behalf of the Nineteenth, made appropriate acknowledgment.

The Nineteenth, together with the Third Kentucky Infantry, was ordered to the mouth of Renick's Creek, near Burksville, on the Cumberland River, on the 17th of January, 1862, and soon after moved to Jamestown, where they were joined by the Sixth Ohio Battery of Artillery. The battle of Mill Springs took place soon after, resulting in the defeat of the rebels under Gen. Zollicoffer, when the troops returned to Columbia. While lying at Columbia, the men suffered severely from sickness, and a number of the Nineteenth died, among them Lieut. S. Lentz, of Company E. The regiment was finally ordered to Nashville, where it arrived on the 10th of March, and went into camp five miles out on the Murfreesboro Pike. On the 18th of March it left Nashville, with its brigade, for Savannah, on the Tennessee River, and on the 6th of April, when within fourteen miles of that place, the heavy booming of cannon was heard in the direction of Pittsburg Landing, and the troops started on the double-quick, hoping to get there in time to participate in the battle. But owing to a lack of transportation, it was dark before they arrived, and the dreary, rainy night was spent in line on the battle-field. In the second day's

fight, the Nineteenth took an active part. Gen. Boyle, who commanded the brigade, said of the Nineteenth: "The Colonel and Capt. Manderson (acting Major) held their men steady, and deported themselves, as did their officers and men, with coolness and courage, until the Colonel ordered them back to a position from under the fire of the enemy's battery. This position was held until the guns of the enemy were silenced by the well-directed fire of Capt. Bartlett's battery. Maj. Edwards, acting Lieutenant Colonel, was shot dead from his horse, and a number of privates were killed and wounded." Among the killed and wounded of the gallant Nineteenth, were Privates O. T. Powell and Horace H. Bailey, of Company C, and Corporal W. E. Gibson, of Company H, killed; Lieut. William A. Sutherland, of Company H, severely wounded.

The next active duty of the regiment was at the siege of Corinth. It entered that place on the 29th of May, with the army, and on the 3d of June marched in pursuit of the enemy, proceeding as far as Brownsboro, when it returned to Iuka and joined Gen. Buell's forces. It marched with his column to Florence, Ala., and to Battle Creek, where it arrived on the 14th of July. On the 21st of August, it moved to Nashville with Gen. McCook's division, where it became a portion of Gen. Buell's army, and with it made that famous march to Louisville, Ky. The Nineteenth marched out of Louisville on the 1st of October, with Gen. Crittenden's division, and reached Perryville on the 8th, in time to witness a portion of that battle, but not to participate. Upon the retreat of the rebel army from Kentucky, the Nineteenth marched through Somerset and Glasgow, to Gallatin, Tenn., where it remained two weeks on provost duty, then joined its division at the "Hermitage," and, passing through Nashville, went into camp near its old quarters on the Murfreesboro turnpike. It moved with the army on the 26th of December, in the advance on Murfreesboro. In command of Maj. Charles F. Manderson, it was thrown across Stone River on the 31st, with a view of swinging around into Murfreesboro, but the disaster of McCook's right wing compelled its withdrawal, and, recrossing the river, it passed to the right, and by a determined resistance, aided to check the advance of the rebels. Under the personal lead of Gen. Rosecrans, Beatty's brigade

charged the enemy, drove him about three-fourths of a mile, and held the position until relieved by Col. M. B. Walker's brigade. On the 2d of January, 1863, the Nineteenth, with its division, crossed Stone River, and received the charge of the rebel column under Gen. Breckenridge. They were forced to retreat, but the pursuing rebels coming under the range of the masked artillery, were driven back over the river and beyond it with great slaughter. The Nineteenth Ohio and the Ninth Kentucky were the first to cross Stone River, and with the assistance of men of other regiments, captured four pieces of artillery from the famous Washington (La.) battery. The regiment suffered severely in this battle. It entered it with 449 men, rank and file, and lost in killed, wounded and missing, 213, nearly one-half. Upon the fall of Murfreesboro, the regiment went into camp on the Liberty turnpike. The whole army remained at Murfreesboro until the 29th of June, during which time the Nineteenth guarded an ammunition train to Manchester, and thence proceeded to McMinnville, where it remained until the 16th of August. It then crossed the Cumberland Mountains to Pikeville, and with the division passed over Lookout Mountain to Lee & Gordon's Mills, arriving on the 13th of September. At Crawfish Springs, the regiment had a brisk skirmish with the rebels, in which several men were killed and wounded.

In the battle of Chickamauga, the Nineteenth did its part of the hard fighting. On the 18th of September, it was, together with the Seventy-ninth Indiana, supported by the Ninth and Seventeenth Kentucky, ordered to advance upon the enemy. With a cheer they advanced, drove the enemy and captured a rebel battery, with some prisoners. In the second day's battle, the Nineteenth held an important position, and performed its full share of hard fighting. As a proof of the gallantry of the regiment, a private of Company G received severe wounds during the first day's battle. Capt. Irwin received a wound from which he afterward died; Lieut. McHenry was also severely wounded. The aggregate loss was 100 men killed, wounded and missing. At Orchard Knob, on the 23d of November, the Nineteenth lost twenty men killed and wounded. On the 25th, it took part in the charge of the rebel works at the foot of Mission Ridge, where it

lost one man killed and thirteen wounded. It was next sent with Sherman toward Knoxville. This march was one of unexampled severity. The men were ragged and shoeless, and their footprints were marked with blood on the snowy ground. Finding that Gen. Longstreet had raised the siege of Nashville, the army moved to Strawberry Plains and Flat Creek. Here, on the 1st of January, 1864, 400 of the Nineteenth re-enlisted as veteran volunteers, and, upon reaching Chattanooga on the 4th of January, the three years' regiment was mustered out, and the veterans mustered into service for another three years. It then returned home on furlough, reaching Cleveland on the 16th of February. Upon the expiration of their furlough, they returned immediately to the front, arriving at Knoxville on the 24th of March. The first active duty of the Nineteenth was in the Atlanta campaign, which opened on the 6th of May, and the regiment was sent to Parker's Gap, to hold that pass. On the 20th, it rejoined its brigade, and, moving with the column, it participated in the fight at New Hope Church, in which it lost forty-four killed and wounded. Capt. Brewer, of Company E, was killed; Maj. Nash lost his left hand, and Capt. Smith, of Company G, was severely wounded. It was engaged at Kenesaw, at Peach Tree Creek, and at the crossing of the Chattahoochie River, and was under fire daily up to the evacuation of Atlanta. The regiment participated in the action of Lovejoy Station and lost seventy men killed and wounded. Capt. Miller, of Company I, was killed; Col. Manderson was severely wounded, also Capt. Agard, of Company K. The entire loss of the Nineteenth in the Atlanta campaign was, killed, two commissioned officers and twenty-eight men; wounded, six commissioned officers and ninety-six men; missing, thirteen men; total, 145. Lieut. McHenry, of Company I, was killed in front of Atlanta on the 24th of August, and Capt. Fix, of Company B, wounded on the same day.

When Sherman started on his famous march to the sea, the Nineteenth, forming a part of Gen. Thomas' command, left Atlanta and marched toward Nashville to aid in opposing Hood. At the battle of Franklin, on the 29th of October, it was held in reserve. It participated in the battle of Nashville, with slight loss, and then followed in pursuit of the demor-

alized army of Gen. Hood to the Tennessee River. On the 5th of January, 1865, the regiment was at Huntsville, Ala., where comfortable quarters were erected. Col. Manderson resigned March 17, from physical disability, and Col. Stratton having resigned some months earlier, Maj. Nash was promoted to Lieutenant Colonel, and remained in command of the regiment until mustered out. From Huntsville, it moved into East Tennessee, marching as far as the Virginia line, and then returned to Nashville. It formed a part of that body of troops sent to Texas, and arrived at Green Lake July 14, 1865, and at San Antonio on the 23d of September. On the 21st of October, it was mustered out of service at San Antonio, and reached Columbus, Ohio, on the 22d of November, where it was paid off and discharged.

The Twenty-ninth Infantry contained a large number of men from this county, some of whom served in the old Nineteenth under its three months' organization. Of the Twenty-ninth, Companies D, G and H may be termed Summit County companies (as we learn from Capt. Nash), and were recruited almost wholly in the county. Company D was organized with the following commissioned officers: P. C. Hard, Captain; B. F. Perry, First Lieutenant, and J. H. Grinnell, Second Lieutenant. Capt. Hard did not leave camp with the regiment, but resigned early. Lieut. Perry resigned, June 20, 1862. Lieut. Grinnell was promoted to First Lieutenant May 25, 1864, and honorably discharged June 14, 1864. George W. Dice was made First Lieutenant April 13, 1862, promoted to Captain May 25, 1864, and killed June 16, 1864. Company G was organized with John S. Clemmer, Captain; James Treen, First Lieutenant, and J. J. Wright, Second Lieutenant. Capt. Clemmer was promoted to Major December 31, 1861, and resigned December 12, 1862. Lieut. Treen was promoted to Captain October 1, 1862, but, owing to age, was unable to withstand the fatigue incident to soldiering, and resigned May 22, 1863, but left two stalwart sons in the service to represent him. Second Lieut. J. J. Wright was promoted to Captain December 21, 1861, and honorably discharged October 1, 1862. C. H. Russell was promoted to Second Lieutenant April 13, 1862, to First Lieutenant January 24, 1863, and honorably discharged November 30, 1864. W. F. Chamberlain was promoted to Second

Lieutenant January 24, 1862, to First Lieutenant May 25, 1864, to Captain October 12, 1864, and mustered out with the regiment. Company H was organized with Jonas Schoonover, Captain; A. J. Fulkerson, First Lieutenant, and Henry Mack, Second Lieutenant. Capt. Schoonover was at one time transferred to Company E, Seventh Infantry, but afterward back to his own regiment, and was regularly promoted until he became its Colonel, and as such was mustered out with it. Lieut. Fulkerson was discharged August 15, 1864. Second Lieut. Mack, owing to ill health, resigned early, and Thomas F. Nash became Second Lieutenant October 27, 1862. Lieut. Nash was promoted to First Lieutenant May 25, 1864, to Captain October 12, 1864, and transferred to Company E, and was mustered out with the regiment. D. W. Thomas was promoted to First Lieutenant January 6, 1865, to Captain April 10, 1865, and mustered out with regiment. Thomas Folger was promoted to First Lieutenant January 6, 1865, was made adjutant of regiment, and, July 12, 1865, promoted to Captain, but as such was not mustered. James B. Storer, present Postmaster of Akron, was promoted to Second Lieutenant April 13, 1862, to First Lieutenant January 26, 1863, and became Adjutant of the regiment. From wounds received, disabling him for life, Lieut. Storer was honorably discharged November 30, 1864. Jacob Buck was promoted to First Lieutenant July 12, 1865, and as such mustered out.

Lewis P. Buckley, a resident of Akron, and late Major of the Nineteenth Infantry (three months' service) was appointed the first Colonel of the Twenty-ninth. The following sketch of the life of Colonel Buckley is published in a pamphlet descriptive of the Soldiers' Memorial Chapel in the Akron Rural Cemetery, and is given in this connection, as a tribute to a worthy soldier:

Lewis P. Buckley was born at Cayuga Lake, in the State of New York, and became a resident of Akron, Ohio, about the year 1834. Though—having in early life received a military education at West Point—he took considerable interest in the military affairs of Akron and vicinity, at one time holding a commission in one of the independent companies of the village, his entire life, after coming to Akron, was devoted to civil pursuits, until the breaking-out of the rebellion, about two years of the intervening time (from 1849 to 1851) being spent upon the Pacific coast at Sacramento City. On the call of President

Lincoln, in April, 1861, for three months' troops, Mr. Buckley, though the disease which finally terminated his life was even then beginning to develop itself, promptly responded to the call, and raised a company in Akron, with which he reported to Camp Taylor, near Cleveland, about the middle of May. With nine other companies, raised in Northeastern Ohio, one of which was also from Akron, on the 27th of May they proceeded by rail to Camp Jackson, near Columbus, where they were organized into the Nineteenth Regiment of Ohio Volunteer Infantry, Capt. Buckley being elected Major of the regiment. Securing their arms, the regiment proceeded to Camp Goddard, near Zanesville, to perfect themselves in drill. Remaining there until the 20th of June, the Nineteenth proceeded to West Virginia, where it became incorporated in Gen. Rosecrans' Brigade, and a part of Gen. McClellan's "Provisional Army of West Virginia." In his report of the battle of Rich Mountain, Gen. Rosecrans, in one portion, says: "The Nineteenth deployed into line and delivered two splendid volleys, when the enemy broke;" and, in another portion: "The Nineteenth distinguished itself for the cool and handsome manner in which it held its post against a flank attack, and for the manner in which it came into line and delivered its fire, near the close of the action."

On the mustering-out of the three months' men, about the 1st of August, 1861, Maj. Buckley immediately set himself to work, under the auspices of Hon. Joshua R. Giddings, to raise a regiment for the three years' service. So promptly was this done, that the Twenty-ninth Ohio Volunteer Infantry was organized at Camp Giddings, near Jefferson, Ashtabula County, August 26, 1861, with Maj. Buckley as its Colonel. This regiment, as a part of the Army of the Potomac, participated in the battles of Winchester, March 23, 1862; Port Republic, June 9-12, 1862, and Cedar Mountain, August 9, 1862, the gallantry of its Colonel being conspicuous throughout. Following, with his regiment, the varied fortunes of the Army of the Potomac, during the balance of the year 1862, the rapidly declining health of Col. Buckley compelled him to reluctantly resign his command and return home, his resignation taking effect January 26, 1863. * * * * * On returning to Akron, though a constant sufferer from the disease that was preying upon him, he rendered valuable aid during the remainder of the war, at the close of which, on the recommendation of Hon. R. P. Spalding, Col. Buckley received the appointment of Assistant Doorkeeper of the House of Representatives at Washington. He served faithfully in that capacity through the Thirty-ninth Congress, and again entered upon his duties at the beginning of the Fortieth Congress, but soon became so feeble that he was compelled to accept the leave of absence tendered him, and return home to die, struggling bravely and hopefully to the last, his death, from consumption, occurring Thursday, June 25, 1868, at the age of sixty-four years. The funeral of Col. Buckley was the largest and most imposing ever held in Akron. It was attended by the entire Masonic fraternity of Summit and adjoining counties; by the surviving members

of the Nineteenth and Twenty-ninth regiments, and by the representatives of a large number of other regiments, both of infantry, cavalry and artillery, and by almost the entire population of the city and surrounding towns, the immense procession being commanded by Lieut. Col. Edward Hayes, of Warren, one of the original officers of the Twenty-ninth regiment.

Lewis P. Buckley was a faithful friend, a true patriot, a brave soldier. Let us cherish his virtues, by naming after him the Post of which we, as soldiers, are members, and by erecting in his honor, properly inscribed and adorned, a beautiful window in the magnificent memorial chapel which we, as soldiers and citizens, this day dedicate.

The Twenty-ninth* was organized at Camp Giddings, near Jefferson, Ashtabula County, August 26, 1861, and was among the first to answer the President's call for three years' service. Owing to the many difficulties by which it was surrounded, it was the 25th of December before it was ready for the field. It then proceeded to Camp Chase, where it remained until the 17th of January, 1862, when it was ordered to Cumberland, Md. While at Cumberland, it was brigaded with the Fifth, Seventh and Sixty-sixth Ohio, and the One Hundred and Tenth Pennsylvania Regiments, commanded by Col. E. B. Tyler, of the Seventh Ohio. The division to which the brigade belonged was commanded by Gen. Lander until his decease, about the 1st of March, 1862, when the command passed to Gen. Shields. The troops, including the Twenty-ninth, remained but a few weeks at Cumberland, when it joined the Army of the Potomac, and with it participated in the battle of Winchester on the 23d of March, in which the rebels, under "Stonewall" Jackson, were defeated. The brigade to which the Twenty-ninth belonged pursued the enemy all the next day, halting near Cedar Creek, and again on the next day (the 25th) beyond Strasburg some two miles (Nash's notes), when the pursuit was abandoned and the troops returned. On the 9th of June, the regiment participated in the battle of Port Republic, in which a number of prisoners were taken, including Capt. Nash (then Lieutenant in Company H), and taken to Salisbury, North Carolina. Capt. Nash remained a prisoner of war nearly two months, and was then released. He proceeded to Wash-

ington, where he arrived August 20, and, after a short visit home, returned to his regiment. In the battles of Cedar Mountain and the Second Bull Run the Twenty-ninth took part, and acquitted itself with honor. From the latter battle until that of Chancellorsville, the regiment was inactive, except camp routine and an occasional scout or foraging expedition. In May, 1863, occurred the battle of Chancellorsville. The following extracts are from Mr. Caskey's notes:

At this moment the battle of Chancellorsville opened in our front in dead earnest. * * * * * The battle lasted four days—1st, 2d, 3d and 4th days of May. On the 2d, both armies seemed to be planning the best mode of attack and defense. A spy gave reliable information concerning the rebels and their plan of attack. Our artillery opened fire in the direction indicated by the spy, and made openings in the woods at every discharge. Limbs and small trees were falling; sharpshooters who had climbed into the trees were seen tumbling to the ground. The "rebel yell" and the shrieks of the wounded were mingled together. About sunset, Lee came up on our center three lines deep, but was repulsed with heavy loss. * * * * * On the 3d, Lee massed on our right center, in front of the Eleventh Corps, took it by surprise, when it broke and fell back on ours (the Twelfth), and, under a cross-fire from the rebels we suffered severely. But the reserves were brought up and the enemy were checked. * * * * * That night at dark we were in close action. It was very pretty, but rather dangerous fire-works. On Monday night our army commenced to retreat, and fell back to our old camp.

An incident, partaking somewhat of the humorous, is thus related by Mr. Caskey in his "reminiscences" of the Twenty-ninth:

About the last of May we had a grand review of the Potomac Army. Gen. Green was reviewing-officer, and we were marched four miles from camp in the sand on the banks of the Potomac. The weather was hot and dry and the roads dusty. Gen. Green had brought his wife and daughters down from Washington to see us. They were nicely encoined in their carriage, and we were "hoofing" it back and forth through the sand, almost choked for water—for it was a part of the red-tape of the occasion that we were not allowed to leave rank to get water or fill our canteens. Finally, we were ready to pass the reviewing-officer, the line was nearly by, when one of the General's daughters called to him, saying: "Trot 'em round again, papa; I like to see them." I don't know whether it was wicked to swear about that time or not. If it was, the boys were very wicked. We didn't trot round again, all the same.

The Twenty-ninth participated in the battle of Gettysburg, where it did its full duty. This

*We are indebted to Capt. Thomas W. Nash and J. G. Caskey, Esq., members of this gallant old regiment, for the principal facts from which this sketch is compiled. They have both preserved notes and memoranda of the regiment's movements and operations, which they kindly placed at our disposal, and for which they have our thanks.

was one of the severest battles of the entire war. The cannonading commenced early on the morning of July 2, 1863, and for two whole days the fighting continued almost constantly, when, on the morning of the 4th, it was ascertained that the rebels had retreated. This was the last service of the Twenty-ninth in the Army of the Potomac. On the 25th of September, it proceeded via Washington, Columbus, Indianapolis and Louisville, to Chattanooga, Tenn. Its first service in this department was with the army of Gen. Hooker, and on the 24th of November it participated in the battle of Lookout Mountain, the famous "fight above the clouds," where, in the language of Prentice,

" * * * * * they burst
Like spirits of destruction through the clouds,
And mid a thousand hurtling missiles swept
Their foes before them as the whirlwind sweeps
The strong oaks of the forest."

The regiment re-enlisted the latter part of December, 1863, and came home on a furlough of thirty days. At the expiration of that time, it returned to the front, and on the 4th of May, 1864, it joined the Atlanta campaign, and during those days of arduous service, it bore its part with its accustomed bravery. During the entire campaign, until the fall of Atlanta, the regiment was almost constantly under arms, and engaged much of the time in fighting and skirmishing. On the 15th of November, the Twenty-ninth left Atlanta with Sherman on his march to the sea, and bearing its part in all the marches and skirmishes. It remained in North and South Carolina until the close of the war, when, on the 29th of April, 1865, it proceeded to Washington City, via Richmond. In Washington it took part in the grand review, and on the 10th of June started for Louisville, Ky., where it remained in camp until the 13th of July; then went to Cleveland, Ohio, and, on its arrival at Camp Taylor, was paid off and discharged, on the 22d and 23d of July, from the United States service.

The Sixty-fourth Infantry was a regiment in which Summit County was represented, but to what extent we have been unable to learn definitely. Company G was made up wholly or in part in this county, but of its commissioned officers, we could learn but little beyond the fact that R. S. Chamberlain, Dudley C. Carr, Alonzo Hancock, Wilbur F. Sanders and A. M.

Bloom, served as such, the first three named rising to the rank of Captain. Chamberlain was honorably discharged on the 23d of September, 1864; Carr declined to accept a captaincy, and Hancock was mustered out as Captain with the regiment.

This regiment formed part of the brigade raised by Senator Sherman, and was organized at Camp Buckingham, near Mansfield, in November, 1861. The Sixty-fourth and Sixty-fifth Regiments of Infantry, and the Sixth Independent Battery, comprised the Sherman Brigade. The Sixty-fourth served in Kentucky, Tennessee, Alabama, Mississippi, Louisiana and Texas. It witnessed the battle of Perryville, Ky., without being permitted to participate in it. It was at Stone River where it lost heavily. In the Tullahoma campaign, in which it took an active part, it lost over one hundred men. The siege of Knoxville was another service in which it was engaged. The 1st of January, 1864, about three-fourths of the regiment re-enlisted for another three years' service. At the expiration of its veteran furlough, it reported at Chattanooga, and accompanied Gen. Sherman in his Atlanta campaign, participating in all the battles of that stirring period. The Sixty-fourth also took part in the battles of Franklin and Nashville—the closing battles of the war. After the war ended, it was sent to Texas, where it remained on duty until the 3d of December, 1865, and it was then mustered out, sent home, and paid off and discharged.

The One Hundred and Fourth Infantry drew a large number of men from Summit County. Company H, entire, and several other parts of companies were recruited here. Company H entered the field officered as followed: Walter B. Scott, Captain; Hobart Ford, First Lieutenant, and Samuel F. Shaw, Second Lieutenant. Capt. Scott died March 25, 1863, and Lieut. Ford was promoted to Captain in his place, but afterward placed on detached duty on Gen. Cox's staff. Second Lieut. Shaw was promoted to First Lieutenant May 29, 1863, and detached at his own request. First Sergt. B. L. Robertson was promoted to Second Lieutenant February 26, 1863, to First Lieutenant May 9, 1864, and to Captain May 11, 1865, but mustered out as a First Lieutenant. Second Sergeant Abram Paulus was promoted to Second Lieutenant August 19, 1864, and to

First Lieutenant May 11, 1865, but mustered out as Second Lieutenant.

This regiment was organized at Camp Massillon in 1862. It was mostly recruited in the counties of Summit, Stark, Portage and Columbiana, and was mustered into the United States service at Camp Massillon, its place of rendezvous, on the 30th of August, 1862, and on the 1st of September left for the seat of war. The first active duty of the regiment was at Covington, Ky., where, upon its arrival, it went into camp on the Alexandria Turnpike, near that city. The rebel General, Kirby Smith, was then menacing Cincinnati, and the One Hundred and Fourth acted as the outpost of the national forces. In a few days it was sent to Fort Mitchell, near by, where the advanced pickets of the rebel army were met. A slight skirmish followed, in which the regiment lost one man killed and five wounded—the first and only blood spilled in defense of Cincinnati. On the 12th of September, the One Hundred and Fourth marched in pursuit of the rebel army toward Lexington, and being its first march, was very severe on the men. It reached Lexington on the morning of the 15th of October, just after the rear guard of the rebels had evacuated the city. It remained here until the 6th of December, perfecting itself in drill and discipline, and with such success as to carry off the palm in a competitive drill of the forces at that place. On the 6th of December, the regiment, with its brigade, resumed its march, and on the evening of the 7th, arrived at Richmond, Ky., where the command, comprising the One Hundredth, Forty-fourth and One Hundred and Fourth, Ohio, and the Nineteenth Ohio Battery, built quite formidable earthworks. The march was resumed on the 27th of December, and on the 28th the regiment reached Danville. This movement was made for the purpose of intercepting the rebel Gen. Morgan, then maneuvering in that vicinity, but, beyond light skirmishing, nothing occurred. From Danville it went to Frankfort, the State capital, where it performed provost duty, until the 21st of February, 1863. While the brigade was in Frankfort, the Forty-fourth Ohio was mounted. The regiment started for Danville on the 21st of February, and continued to operate in that portion of Kentucky until the first of September, when it joined Gen. Burnside's army in East Tennessee, arriving at

Knoxville about the 5th. Before leaving Kentucky, the One Hundred and Fourth had been placed in the First Brigade, Third Division, Twenty-third Army Corps, under Gen. Hartuff. The regiment, with its brigade, after a short rest at Knoxville, was sent to Cumberland Gap, where it arrived on the 7th of September. Gen. Burnside demanded the surrender of the place, which was complied with by Gen. Frazier, the commandant, who surrendered his entire force as prisoners of war. The One Hundred and Fourth was the first regiment to enter the works, and received the surrender of the rebel force and stores. The regiment, after this, returned to Knoxville, where for a time it was engaged on provost duty. Its next active duty was in the siege of Knoxville by Gen. Longstreet, where it was held in reserve, but being ordered to the south side of Holston River, it had an engagement in which the enemy was repulsed. During the siege it bore its part of active duty, and suffered severely from exposure and privation. Its rations were limited and inferior in quality; the weather was cold, drizzly and disagreeable, and the men, without tents, were compelled to take their rest upon the muddy ground. Says a war chronicler: "The One Hundred and Fourth Ohio, with the national army, joined in the pursuit of Longstreet, and followed him up to Blain's Cross Roads, participating in the various skirmishes of that pursuit. It wintered in this inhospitable region during the whole of that inclement season, and endured hardships and privations like those suffered by our Revolutionary forefathers at Valley Forge. Half-starved, half-clad, those brave boys and self-sacrificing men maintained their integrity to the old flag, and in the midst of these terrible sufferings declared a willingness to enter on another three years' term of service, but their enlistment not expiring within the time specified, they were not allowed to veteranize."

The One Hundred and Fourth took part in the Atlanta Campaign in 1864, and participated in all the general engagements of that stirring period. In the desperate assault at Utoy Creek on the 6th of August, the loss of the brigade was 600 killed and wounded; the One Hundred and Fourth lost twenty-six officers and men killed and wounded. In the latter part of August it proceeded to Jonesboro, and took part in that engagement, and remained in the vicinity

until the fall of Atlanta, when it marched for Decatur. During the month of October it operated against Hood's forces, and on the 6th of November took the cars for Nashville. Until the 26th almost daily skirmishing was had, in which it lost several men. It participated in the battle of Franklin on the 30th, in which it lost sixty men killed and wounded. Lieut. Kimball, of Company C, and Capt. Bard, of Company I, were killed in this battle. After the battle, the regiment marched with the national forces to Nashville, bearing with it eleven battle-flags captured from the enemy. It reached Nashville on the morning of December 1, and took position in the front near Fort Negley. Nothing of note occurred until the 15th, except the intense suffering of the men from cold weather. It moved with the corps to which it belonged, on the 15th, to the right to support the cavalry, and had a brisk skirmish in which several men were killed. After the rebel works were taken, the regiment moved in pursuit of the enemy and did not stop, except a short halt at Columbia, until it reached Clifton, Tenn., on the 6th of January, 1865. It remained in camp here until the 16th, when it embarked on a steamer for Cincinnati, and, on the 22d, took the cars for Washington City, and thence was transferred to North Carolina, arriving at Federal Point on the 9th of February. During the remainder of the month it was actively engaged, skirmishing with the enemy much of the time, and on the 4th of March it made a forced march to Kingston to the relief of Gen. Cox, who was threatened by overpowering numbers.

The regiment proceeded to Goldsboro from Kingston, where it arrived on the 21st of March, and where it remained until the 11th of April, when it went to Raleigh. At the grand review in Raleigh on the 21st of April, the regiment received some high compliments from Gen. Sherman and others for their efficiency in drill and soldierly bearing. It remained in Raleigh until May 2, when it was selected by Gen. Cox, commanding the corps, to repair to Greensboro and receive the arms and stores of Gen. Johnston's army. It remained in Greensboro as provost guard until the 17th of June, 1865, when it was mustered out and ordered to Camp Taylor, near Cleveland, for final pay and discharge. It arrived in Cleveland on the 24th, and, on the 27th of June, was paid off and mustered out.

The One Hundred and Seventh Infantry contained nearly half a company from Summit County. This was a German regiment, and was made up under special authority from Governor Tod, to serve under Gen. Sigel. Company I was made up in this and Tuscarawas County, and of the first commissioned officers the First Lieutenant was from the latter county, while the Captain and Second Lieutenant were from Summit. The company was organized with Richard Federle, Captain; Hamilton Starkweather, First Lieutenant, and W. F. Bechtel, Second Lieutenant. Capt. Federle and Lieut. Starkweather both resigned early; Lieut. Bechtel resigned December 8, 1862. George Billow, of Akron, was promoted to Second Lieutenant November 30, 1862, to First Lieutenant December 1, 1863, and to Captain November 3, 1864, and as such was mustered out at the close of the war. Capt. Billow served but little with his company after his promotion to Captain, but was detached as Brigade Commissary, Post Commissary and as Provost Marshal.

This regiment, as we have said, was composed wholly of Germans, and was organized at Camp Taylor, near Cleveland, in the latter part of August, 1862. It was ordered to Covington, Ky., to repel an expected attack of the rebel Gen. Kirby Smith. In November it was ordered to Virginia, where it was assigned to the Eleventh Army Corps, commanded by Gen. Sigel. It served in Virginia until the 1st of August, 1863, taking part in all the principal battles of that period, including Chancellorsville. It was in this battle that the Eleventh Corps was flanked by Stonewall Jackson, in which disastrous affair the One Hundred and Seventh suffered severely, losing 220 officers and men killed, wounded and prisoners. It also participated in the battle of Gettysburg, where it covered itself with honor. Its total loss in killed, wounded and missing in this battle amounted to over 400, out of 550, rank and file engaged. August 1, 1863, the One Hundred and Seventh was sent to South Carolina, where it performed picket duty until January, 1864. It served in this department, scouting, foraging and skirmishing with the enemy, until the close of the war. While on a scout near Georgetown, S. C., it received the news of the surrender of Lee and Johnston's armies. A few weeks later, it proceeded to Charleston, where

J. Sumner

it performed provost duty, until the 10th of July, 1865, when it was mustered out, sent home to Cleveland, where it was paid off and discharged.

The One Hundred and Fifteenth Infantry was well represented by Summit County men. Companies C and G were raised in this county, with perhaps some twenty men in Company I. The commissioned officers of Company C were John A. Means, Captain; John Eadie, First Lieutenant; and George L. Waterman, Second Lieutenant. Capt. Means was mustered out with regiment at the close of its service. Lieut. Eadie was promoted to Captain, but commission was returned; Lieut. Waterman died of wounds September 19, 1863; John C. Ely was promoted from Third Sergeant to Second Lieutenant February 8, 1865, and was lost on the steamer Sultana. The first commissioned officers of Company G were A. W. Fitch, Captain; D. A. Lowry, First Lieutenant; and A. L. Conger, Second Lieutenant. In the organization of the regiment, Capt. Fitch was promoted to Major. This led to a promotion of the Lieutenants of Company G—Lowry to Captain, and Conger to First Lieutenant. Sumner Nash was made Second Lieutenant. Maj. Fitch was promoted to Lieutenant Colonel July 20, 1864, and resigned January 5, 1865; Capt. Lowry was lost on steamer Sultana April 27, 1865; Lieutenant Conger was mustered out with regiment; Lieut. Nash was promoted to First Lieutenant August 11, 1864, and as such mustered out with the regiment. M. S. Hurd was promoted from First Sergeant, to Second Lieutenant August 11, 1864. Of the men in Company I from this county, Capt. Edward Buckingham, late County Auditor, is the only commissioned officer among them, so far as we can learn. He went out as First Lieutenant, and was promoted to Captain February 8, 1863, and in that position was mustered out at the close of the war.

This regiment was mostly engaged during its term of service on guard and provost duty. It was organized at Camp Massillon in August, 1862, and mustered into the United States service on the 18th of September. October 4, it received orders to report to Gen. Wright at Cincinnati, where, on the 9th, it was divided—five companies, under command of Lieut. Col. Boone, was sent to Columbus (Camp Chase) to perform guard duty. The remaining five

companies, under command of Col. Lucy, remained in Cincinnati, acting as provost guard. The remainder of its history, during its service, is thus given:

In November, 1862, the battalion at Columbus was ordered to Maysville, Ky., under command of Col. Lucy, leaving Lieut. Col. Boone in command of the battalion at Cincinnati. In December, the battalion at Maysville was ordered to Covington, where it performed provost duty until October, 1863. It was then relieved, and ordered to report to Gen. Rosecrans, at Chattanooga, Tenn. Reaching Murfreesboro, it was ordered to report to the Post Commander for duty. Part of the regiment was at once mounted and sent out against the guerrillas, then infesting the country between Nashville and Tullahoma. In June, 1864, that part of the regiment not mounted was stationed on the line of the Nashville & Chattanooga Railroad, in block-houses, to prevent the guerrillas from destroying it. August, 1864, Block-House No. 4, in command of Sergt. Flohr, of Company B, was captured by the forces of the rebel Gen. Wheeler. Block-House No. 5, commanded by Lieut. Orr, of Company B, was attacked at the same time, and three men were killed and seven wounded out of the detachment of forty men. In this attack the rebels were handsomely repulsed, and failed in their desperate attempt to capture the garrison. Shortly after this affair, Company K (mounted), surprised and captured a squad of guerrillas, and lost Sergt. Richmond killed, and three men wounded. During Hood's advance on Nashville, in December, 1864, Block-Houses Nos. 1, 3 and 4 were assaulted by a large force of rebels under Forrest, and their garrisons, consisting of parts of Companies C, F and G, captured. The garrisons of Block-Houses Nos. 5 and 6 were, by order of Gen. Thomas, withdrawn to Murfreesboro. Block-House No. 7 was assaulted and surrounded by the rebels, and for fifteen days the garrison dared not venture outside. The garrison of Block-House No. 2, under command of Lieut. Harter, was assaulted December 9, 1864, by the enemy, with three pieces of rifled artillery, and a continuous fire kept up from 9 o'clock in the morning until dark. Two of the garrison were killed and five wounded. Under cover of the night, the garrison withdrew and reached Nashville in safety. Shortly after this affair, the rebel Gen. Buford made a desperate charge on Murfreesboro, but after five hours of hard fighting was driven back with heavy loss. On the national side there was one killed and three wounded. The garrison of Murfreesboro, at this time, consisted of a battalion of the One Hundred and Fifteenth Ohio, and the Fourth and Twenty-ninth Michigan Regiments, under command of Gen. Rousseau.

On April 25, 1865, the battalion of the One Hundred and Fifteenth Ohio, captured by the rebels at Block-Houses 1, 3 and 4, in December, 1864, was on board the ill-fated steamer Sultana, which exploded on the Mississippi River, near Memphis, Tenn., and Capts. D. N. Lowry and John Eadie, Lieut. J. C. Ely and eighty men were lost. They

belonged to Companies B, C, F and G. These unfortunate men were on their way to Columbus, Ohio, having been paroled for that purpose. The regiment performed garrison duty at Murfreesboro, and guard duty on the line of the Nashville & Chattanooga Railroad, from Nashville to Tullahoma, until the 23d of June, 1865, when it was mustered out of the service, and received its final discharge and pay at Cleveland July 7, 1865.

The One Hundred and Twenty-ninth Infantry contained a fractional part of a company from this county, in which Capt. J. J. Wright, formerly of the Twenty-ninth Infantry, was Second Lieutenant. The regiment was organized in the latter part of the summer of 1863, at Camp Taylor, near Cleveland, and mustered into the service for six months. Its service, during the term of its enlistment, was principally in Southeastern Kentucky and East Tennessee. Although but a six months' regiment, it saw hard service. It was mustered out at Cleveland in March, 1864.

The Fifty-fourth Battalion of the National Guard was made up wholly in Summit County. The three companies forming the battalion, were A, B and C, and were mustered into the service (one hundred days) with the following commissioned officers: Company A—N. L. Everett, Captain; D. W. Storer, First Lieutenant, and C. R. Howe, Second Lieutenant. Company B—D. F. Hunsberger, Captain; N. J. Schroop, First Lieutenant, and D. J. Mettinger, Second Lieutenant. Company C—N. S. Keller, Captain; F. H. Wright, First Lieutenant, and Thomas E. Strong, Second Lieutenant.

Upon the organization at Camp Taylor, the Fifty-fourth Battalion was consolidated with the Forty-ninth Regiment of National Guard from Seneca County. The consolidation was effected on the 6th of May, 1864, and the regiment became the One Hundredth and Sixty-fourth Volunteer Infantry National Guard. It was mustered into the United States service on the 11th of May; was armed and equipped, and on the 14th, left Cleveland for Washington City, where it arrived on the 17th. It was commanded by Col. John Calvin Lee, who was brevetted Brigadier General at the close of the war for meritorious services, and, later, was Lieutenant Governor (two terms) with Gov. (now ex-President) Hayes. Upon the arrival of the regiment in Washington, it took position in the defenses on the south side of the Potomac, and during its one hundred days' service,

garrisoned Forts Smith, Strong, Bennett, Haggarty and other forts. It was very thoroughly drilled, both in infantry and heavy artillery tactics. During Gen. Early's invasion, the One Hundred and Sixty-fourth was kept on duty almost constantly, and every night was spent either on the advance or beside the guns. At the expiration of its term of enlistment, the regiment received the thanks of President Lincoln for the service it had performed, and returned to Cleveland via Baltimore, Harrisburg and Pittsburgh, where, on the 27th of August, it was mustered out of the service and discharged.

The Second Cavalry drew on Summit County for a large number of men. Company A was made up in this county, while several other companies were more or less represented by Summit County recruits. The commissioned officers of Company A were George A. Purington, Captain; Dudley Seward, First Lieutenant, and M. J. Collier, Second Lieutenant. Capt. Purington was promoted to Major September 24, 1861, to Lieutenant Colonel June 25, 1863, and to Colonel, but as such was not mustered, and retired from the service at the end of three years. First Lieut. Seward was promoted to Captain September 30, 1861, to Major September 18, 1862, to Lieutenant Colonel May 9, 1864, and to Colonel June 20, 1865, and as such mustered out with the regiment. Second Lieut. Collier was promoted to First Lieutenant May 10, 1861, and mustered out by the consolidation, and afterward commissioned Major of the Twelfth Cavalry. Henry O. Hampson, Orderly Sergeant, was promoted to Second Lieutenant July 22, 1862, and resigned July 23, 1863. Sergt. A. N. Bernhard was promoted to Second Lieutenant December 20, 1861, to First Lieutenant July 15, 1862, to Captain February 17, 1863, transferred to Company K, and honorably discharged November 29, 1864. Sergt. L. J. McMurray was promoted to Second Lieutenant May 9, 1863, and honorably discharged September 6, 1864. Capt. Purington was in the Nineteenth (three months) Infantry, as Orderly Sergeant, and was promoted to Second Lieutenant; and Seward was in the same regiment as Third Sergeant.

The Second Cavalry saw hard service and a great deal of it. From its organization as a regiment to its muster-out at the close of the war,

its duties were varied, and extended over a vast range of country. Says Whitelaw Reid in his "Ohio in the War :—" "The Second fought under the following general officers: Buell, Wright, Hunter, Denver, Sturgis, Blunt, Salomon, Curtis, Schofield, Burnside, Carter, Gilmore, Shackelford, Foster, Kautz, Sedgwick, Wilson, McIntosh, Torbett, Sheridan, Custer, Meade and Grant. Its horses have drank from, and its troopers have bathed in, the waters of the Arkansas, Osage, Cygnes, Missouri, Mississippi, Ohio, Scioto, Miami, Cumberland, Tennessee, Holston, Potomac, Shenandoah, Rappahannock, Rapidan, Bull Run, Mattapony, Pamunkey, Chickahominy, James, Appomattox, Blackwater, Nottaway and Chesapeake. It has campaigned through thirteen States and a Territory: Kansas, Missouri, Arkansas, Illinois, Indiana, Ohio, Kentucky, Tennessee, Georgia, Alabama, West Virginia, Maryland, Virginia and Indian Territory. It has traveled as a regiment on foot, horseback, by railroad and steamboat, on land, river, bay and ocean. It has marched an aggregate distance of twenty-seven thousand miles; has fought in ninety-seven battles and engagements. It has served in five different armies: The Army of the Frontier, of the Missouri, of the Potomac, of the Ohio, and of the Shenandoah—forming a continuous line of armies from the head-waters of the Arkansas to the mouth of the James; and its dead, sleeping where they fell, form a vidette-line half across the continent, a chain of prostrate sentinals two thousands miles long. Even in their graves, may not these patriotic dead still guard the glory and the integrity of the Republic for which they fell?" No regiment could desire a more glorious record or prouder name.

This regiment was organized in the fall of 1861, under special authority from the Secretary of War. It rendezvoused at Camp Wade, near Cleveland, where, on the 10th day of October, the last company was mustered in, and the regiment was ready for duty. It was recruited wholly in what is known as the "Western Reserve," and, being the second regiment of cavalry raised in the State, and the first in the northern part of the State, it contained "a large proportion of wealth, intelligence, capacity and culture." In the last of November, the regiment was ordered to Camp Dennison, where it received sabers and continued in the drill and discipline which had been begun be-

fore leaving Cleveland. Early in January, 1862, it received orders from the War Department to report to Gen. Hunter at Platte City, Mo., and at once proceeded to that place. Upon its arrival there, it spent several weeks in scouting the Missouri border. On the 22d of February, a scouting party from the Second, consisting of one hundred and twenty men, had a skirmish with a detachment under the notorious Quantrell, in which the latter was defeated. Doubleday's Brigade, to which the Second belonged, proceeded to Fort Scott, Kan., where it arrived on the 1st of March. The regiment was armed, at this time, with sabers, navy pistols and Austrian carbines. The army was concentrated at Fort Scott in the latter part of May, and early in June it moved into the Indian Territory by various roads, concentrating again at Spring River. The entire command soon moved to Baxter Springs, Indian Territory, where three regiments of loyal Indians, mounted on ponies and armed with squirrel rifles, joined the command. Later, the column moved from Baxter's Springs southward, and on the 8th of July went into camp at Flat Creek, Indian Territory, and, shortly after, the Second formed part of the force which captured Fort Gibson. In the early part of August, the command moved to Fort Scott, where it arrived on the 15th and went into camp. At this time, it was found "that there were less than two hundred and fifty serviceable horses in the Second, many of the men were sick, and a number had died on the march of a peculiar brain fever, probably produced by the excessive heat to which they were exposed."* The regiment, in the latter part of August, shared in a forced march of ten days and nights in pursuit of a party of rebel raiders, continually skirmishing, but without loss. About this time, one hundred and fifty men and two officers were detailed from the Second to man, temporarily, a light battery. Six months later, the detail was made a transfer by the War Department, and constituted the Twenty-fifth Ohio Battery. The mounted portion of the Second, early in September, with the Twenty-fifth Battery, moved, with the army of Gen. Blunt, into Missouri and Arkansas, and took an active part in the campaign that ended in the capture of Prairie Grove December 3, 1862. During this campaign, the Second fought at Carthage and New-

*Reid.

tonia, Mo., camped at Pea Ridge, and fought at Cow Hill, Wolf Creek, White River and Prairie Grove. Efforts had been made to have the Second transferred to an Eastern army, which was successful, and the dismounted portion of the regiment, in November, moved by rail to Camp Chase, to remount and refit for the field, and the mounted portion followed in December, after the capture of Prairie Grove. While at Camp Chase, the Second received new arms and equipments, fresh horses and sixty recruits, and, during the winter, made great progress in drill and discipline. In 1863, the original twelve companies were consolidated into eight, and a battalion of four companies raised for the Eighth Cavalry was added to the Second. This battalion was then serving in Kentucky, and Maj. Purington was sent to assume command until it should join the regiment.

The Second left Camp Chase early in April, and proceeded to Somerset, Ky., and, when near Lexington, was joined by the new battalion. With but an occasional reconnaissance, the Second remained quietly in camp at Somerset until the 27th of June. In the early part of June, four companies of the Second formed part of a raiding force, under Gen. Saunders, into East Tennessee, where a large amount of stores were destroyed, and several railroad bridges. "Kautz's brigade, of which the Second was a part, joined in pursuit of the rebel Gen. Morgan on the 1st of July, followed the great raider twelve hundred miles, through three States, marching twenty-four hours out of twenty-four, living wholly upon the gifts of the people for twenty-seven days, and finally sharing in the capture at Buffington's Island. After the raid, the Second re-assembled at Cincinnati, from which point nearly the whole regiment was furloughed by Gen. Burnside, in recognition of its endurance and gallantry." The Second re-assembled and re-fitted at Stanford, Ky., and, in August, moved with the army to East Tennessee. It was here brigaded with the Second East Tennessee, Ninth Michigan, and Seventh Ohio Cavalry, Col. Carter, Second East Tennessee, commanding. On the 5th and 6th of September, the regiment made a forced march to Cumberland Gap, and, after the surrender of the place, returned to Knoxville, whence it was ordered up the valley. It joined the army at Henderson's Station about the 25th,

and, soon after, it received orders to report to Gen. Rosecrans, then in command of the Army of the Cumberland. It marched thirty miles toward Knoxville, when it was suddenly ordered back to the front, and, on its return, found an engagement in progress, in which it at once took part, but without any serious results. A little later, it participated in the battle of Blue Springs. Late in October, as Longstreet advanced, the Second fell back, with other cavalry, to Russellville, and then to the vicinity of Cumberland Gap, and engaged Wheeler's cavalry. During the siege of Knoxville, it operated on the enemy's flank, and, when the siege was raised, joined in the pursuit of the rebels. On the 2d of December, it engaged Longstreet's cavalry at Morristown, and, on the 4th, it formed the advance of a brigade which attacked and fought eighteen regiments for two hours, at Russellville, losing forty men killed and wounded. On the 6th, it was at the front five hours in the battle of Bean Station, and, for the next five days, was almost constantly under fire. After a few days' rest, the cavalry crossed the Holston River and moved to Mossy Creek, where the time was spent in skirmishing and maneuvering until January 1, 1864, when, of 470 men then composing the regiment, 420 re-enlisted, and were sent home on veteran furlough.

The Second re-assembled at Cleveland on the 20th of March, and, with 130 recruits, was again ready for the front. The first objective point was Mount Sterling, Ky., but, soon after, it was ordered to Annapolis, Md., where it arrived on the 29th of March. On the 13th of April, it was reviewed by Lieut. Gen. Grant, Gens. Burnside, Washburn and Meigs. On the 22d, the regiment moved to Camp Stoneman, D. C., and, by the 30th, was mounted, armed and equipped. It moved out of camp on the 1st of May, and on the 3d arrived at Warrenton Junction, where it reported to Gen. Burnside. With the Ninth Corps it moved to Brandy Station, crossed the Rapidan, went into line on the extreme right, and on the 7th engaged Rosser's cavalry with slight loss. During the campaign of the Wilderness, it was employed covering the right flank of the infantry almost constantly, either on picket or skirmishing. By order of Gen. Grant, the Second was transferred from the Ninth Army Corps, and attached permanently to Sheridan's Cavalry Corps, Army

of the Potomac, and on the 29th it reported to Brig. Gen. J. H. Wilson, commanding Third Cavalry Division, and was by him assigned to the First Brigade, commanded by Brig. Gen. J. B. McIntosh. On the 31st, the division crossed the Pamunkey, and the First Brigade advanced on Hanover Court House, where a severe engagement took place, in which the Second bore a prominent part. The next day, a portion of the First Brigade, including the Second Ohio, proceeded to Ashland, where the entire force was soon surrounded by Gen. Fitz Hugh Lee, and a heavy engagement took place, which lasted till sundown, when, under the cover of night, the national forces withdrew, the Second covering the retreat. From this time to the crossing of the James, it was engaged in picketing and fighting on the right of the army from Hanover Court House to Cold Harbor. It crossed the James on the 17th of June, and the next day encamped with the division on the Blackwater. It took an active part in the fights of Nottaway Court House, Stony Creek and Ream Station, losing one hundred men and five officers killed, wounded and missing, and returning to the lines on the 1st of July. Early in August, the division to which the Second belonged went to Washington City, and on the 13th moved to Winchester, in the Shenandoah Valley, where it arrived on the 17th. The division was ordered to act as rear guard, and to hold the town until dark. Gen. Early made an attack at 3 o'clock, P. M., and at sundown, the division fell back; the Second Battalion and two companies of the Third Battalion of the Second Ohio, acting as the rear guard for the whole command, fighting an hour in dense darkness in the streets of Winchester, then joining the main column, and falling back to Summit Point. Gen. Early again attacked on the 19th, and, after a sharp fight, the regiment retired to Charlestown, when it was again attacked by Early, on the 22d, and the Second was closely engaged. From Charlestown, the army retreated to Harper's Ferry. The Second, with its division, went to the right, and was twice engaged with the enemy. The division was, on the 26th of August, ordered to Boonesboro, and the Second encamped twenty-four hours on the South Mountain battle-field, marched over Antietam, and re-crossed the Potomac at Shepherdstown. It was in the skirmish at Berryville, Va., on the 30th, and in

the early part of September was engaged with its division in picket duty on the left of Sheridan's army. On the 13th, Gen. McIntosh's Brigade (including the Second) was ordered toward Winchester. With the Second in front, the brigade charged Early's cavalry, driving it back, and the Second Ohio, with the aid of the Third New Jersey, captured an entire regiment of infantry. The Secretary of War made especial mention of the gallantry of the two regiments in this exploit. McIntosh's brigade at the battle of Opequon, was ordered to capture a line of hills between the Opequon and Winchester, which was accomplished after four hours' hard fighting. In the retreat of Early's army, the Second was the last regiment to leave the pursuit on the Valley Pike. For several weeks it was almost continually engaged fighting and skirmishing. Gen. Custer assumed command of the division to which the Second belonged at Bridgewater. It shared in the battle of Cedar Creek on the 19th of October, and was present on the Valley Pike, when Sheridan came to the front on his "famous ride from Winchester." After the battle, the regiment performed picket duty until the 1st of November, when it fell back to Kernstown. It was engaged in active duty until the 28th of December, when it went into winter quarters on the Romney Pike, one and a half miles from Winchester, where it remained until the 27th of February, 1865.

On the 27th, it started with Sheridan's cavalry on the last raid of the war. Near the town of Waynesboro, Custer's division captured the remainder of Early's army. In this engagement, the Second Ohio captured five pieces of artillery, with a large amount of military stores, together with 650 prisoners, for which it received the thanks of Gen. Custer on the field. It continued to do its share of duty until the 20th of March, when, after resting a few days, Sheridan's cavalry joined the Army of the Potomac, and entered on the closing campaign of the war. After the surrender of Gen. Lee, the regiment, with its division, was ordered to North Carolina, but, upon receiving information of the surrender of Gen. Johnston, it returned to Petersburg. The division soon moved to Washington City, and, immediately after the grand review, the Second Ohio was ordered to report to Gen. Pope, at St. Louis, Mo., where it arrived on the 7th of June. It remained here

a month, when it was ordered to Springfield, Mo., to relieve State troops. The order was received for its muster-out about the 1st of September. It proceeded to St. Louis, where its papers were made out, and then returned to Camp Chase, Ohio, and, on the 11th of October, 1865, was paid off and discharged.

The Sixth Ohio Cavalry drew a number of men from this county, but not enough to form a company. Of the Summit County men, the present Auditor, Mr. Aaron Wagoner, was the only commissioned officer. He was promoted to Second Lieutenant on the 8th of April, 1865. The Sixth was a splendid regiment, and saw much hard service. Reid closes his sketch of it in the following words: "During the last six months of its campaigning, it was under command of a Captain, as it had not a field officer with it, nor in its organization. Nearly all of its veteran officers were mustered out of service in November, 1864,* and not a sufficient number of men were on the rolls to have them replaced; but, in a regiment composed of material like this, it made little difference whether they were commanded by a Captain or a Brevet Brigadier. As a *newspaper regiment*, it has not much history. Its record shows best in the rolls of the killed and wounded, and the long list of its honorable engagements." But our space will not allow of a more extended mention of this gallant regiment.

The Sixth Ohio Independent Battery was made up principally in Summit County, and formed a part of the "Sherman Brigade." The commissioned officers were C. Bradley, Captain; O. H. P. Ayres and J. P. McElroy, First Lieutenants; A. C. Baldwin and E. S. Ferguson, Second Lieutenants. Capt. Bradley was mustered out January 17, 1865; Lieut. Ayres died July 8, 1864, from wounds received in the Atlanta campaign; Lieut. McElroy resigned March 10, 1864; Lieut. Baldwin was promoted to Captain, and as such mustered out with the battery; Lieut. Ferguson resigned November 7, 1862.

This battery was organized at Camp Buckingham, near Mansfield, and mustered into the service on the 20th of November, 1861. It comprised four ten-pound Parrot guns, and two six-pound bronze Rodmans. Capt. Bradley is mentioned as an experienced artillery officer, and had his battery in good trim for active service

*At expiration of three years' service.

before leaving Camp Buckingham. The battery and the brigade to which it belonged moved, on the 15th of December, to Louisville, Ky., and thence by steamer to Nashville, where they reported to Gen. Buell on the 20th. The brigade was here scattered to different localities, and the battery found its way into Camp Gilbert, near the city, where, for some twenty days, it was occupied in perfecting its drill and getting ready for the field. It received orders, on the 12th of January, 1862, to report to Gen. Boyle, at Columbia, Ky., and arrived there on the 15th, where it took a position blockading the Cumberland River. The battery was divided, Lieut. McElroy's section remaining at Columbia, while the other was taken to Jamestown, Ky., there reporting to Col. Thomas E. Bramlette. The battery remained on duty here until the fall of Nashville, when, with the Third Kentucky, Nineteenth Ohio, and Col. Woolford's cavalry, it proceeded to Nashville, where it arrived on the 19th of March. At Nashville, it was placed in the artillery reserve, commanded by Col. Barnet, First Ohio Light Artillery, and marched with the army to Pittsburg Landing, arriving on the 15th of April, and going into camp on the battle-field. It was ordered to report to Brig. Gen. Wood on the 29th of April, with whom it served until the close of the war. It moved with the army on Corinth, and entered that place on the 31st of May, after its evacuation by the rebels. June 1, it moved across Northern Alabama, arriving at Mooresville on the 3d of July. On the 18th, it marched to Stevenson, Ala., where it went into camp on the 21st of August, when it joined Buell's forces in their great race after Bragg to Louisville, Ky. They arrived at Louisville on the 28th of September, and, after a rest of three days, the line of march was again resumed. It proceeded out the Bardstown turnpike and reached Rolling Fork on the 8th of October, where it was saluted with the roar of battle at Perryville, only seven miles distant. Later in the day, it marched with its division to the battle-field, but was compelled to be mere spectators of the battle. After an unsuccessful pursuit of the enemy, the national forces returned to Nashville, arriving on the 26th of November.

At Nashville the army was re-organized by Gen. Rosecrans, and the battery was engaged much of the time in foraging, which several

times brought it in contact with Gen. Wheeler's Rebel Cavalry. It participated in the battle of Stone River, and other battles incident to the capture of Murfreesboro, which was entered on the 4th of January, 1863. In the battle of the 31st of December, the battery lost two of its guns, but had the good fortune to re-capture them. It lost severely in the several days' fighting. After the battle, the following members of the Sixth Battery were specially mentioned for gallantry: First Sergt. G. W. Smelts; Sergts. Hust, Miller, Howard, Casey and Hartman; Corporals Collins, Tool, Kimberk and Scott; Privates Evans, Kirby and Robbinett. In the battle of Chickamauga, which was fought on the 19th of September, the battery participated and again lost heavily. Among the wounded was Lieut. Smelts. During the two days' battle, it expended 383 rounds of ammunition, lost two caissons, a battery-wagon, and had two horses killed. It was dismounted while in Chattanooga (to which the army had fallen back, after the battle of Chickamauga), owing to the want of forage and horses, and thus remained for some time inactive. On the 12th of December two-thirds of the battery re-enlisted as veterans, and started home January 1, 1864, on furlough—the non-veterans being transferred to the Twentieth Ohio Battery. While the veterans were at home on furlough, they added one hundred men to their ranks. Upon the return of the battery to the front, its first active duty was in the Atlanta campaign, in which it operated with Gen. Wood's (Third) Division, Fourth Army Corps, and during the 120 days of that brilliant march, was almost constantly engaged. Corporal William Matthews was mortally wounded at Dallas, and the next day Bugler Whitney was killed by sharpshooters. At Kenesaw Mountain, on the 19th of June, private Alfred Hersh was killed, and three others were wounded. It maintained its position before Kenesaw, and was highly complimented by Gen. O. O. Howard for accurate firing. The battery expended 250 rounds of ammunition in a charge made on the 27th. On the 6th of July, Lieut. Ayres was wounded by a rebel sharp-shooter, from the effects of which he died on the 8th. From the 13th to the 25th, the battery was busily engaged in bombarding the city of Atlanta. August 25, it formed part of the flanking movement to Jonesboro, and took part in all the subsequent operations, and

on the 9th of September it entered Atlanta, and while here was re-equipped for the field. It moved with the Fourth Corps on the 3d of October after Gen. Hood, who had commenced his march to the rear of Atlanta. Capt. Bradley being away on leave of absence, the command of the battery devolved on First Lieut. A. C. Baldwin. It participated in the battle of Franklin on the 15th of December, of which action, says Whitelaw Reid, "Eighteen stands of colors were taken on the battery-front during the battle, and the rebels so crowded the embrasure that Private Jacob Stinebaugh resorted to the use of axes and picks with success. In this battle the battery lost William B. Welch, mortally wounded, and four others slightly. Welch fell into the hands of a Mrs. Bentley, of Franklin, who kindly nursed him, regardless of rebel opposition, and when he died saw him properly buried, with head-board and inscription, and a representation of the flag he so nobly fought under cut upon the board." In the second day's battle before Nashville, the battery went into position in front of Overton's Hill, eight miles from the city, and engaged Sandford's Mississippi rebel Battery, completely silencing it. It joined in the pursuit of the retreating rebels to the banks of the Tennessee River, and then marched for Huntsville, Ala., where it arrived on the 15th of January, 1865. It made a severe march to Eastport, Miss., in February, but before reaching that place, it was ordered back to Huntsville, where it remained in quarters until the close of the war. It returned to Ohio in the latter part of August, and, on the 1st of September, 1865, was mustered out of the service. It lost by death from wounds, sixteen; by disease, twenty-six; discharged by reason of disease, thirty; of wounds, four; by expiration of service, twenty-one; re-enlisted as veterans, sixty-six.

The First Light Artillery (Col. James Barnett, of Cleveland), was represented by a battery or company from this county. Battery D was recruited by Capt. Andrew J. Konkle, and was made up in Summit County. The original commissioned officers of Battery D were Andrew J. Konkle, Captain; Paul F. Rhoerbacher, L. P. Porter, Senior and Junior First Lieutenants; and W. H. Pease, Henry C. Lloyd, Senior and Junior Second Lieutenants. Capt. Konkle was promoted to Major of the First Artillery on the 8th of September, 1863,

and was honorably discharged August 8, 1864. Lieut. Rhoerbacher resigned January 1, 1862; Lieut. Porter resigned August 28, 1863; Lieut. Pease was promoted to First Lieutenant January 1, 1862, to Captain July 30, 1864, and mustered out with battery; Lieut. Lloyd was mustered out October 23, 1863; Sergt. N. M. Newell was promoted to Second Lieutenant January 1, 1862, to First Lieutenant July 13, 1863, and mustered with battery; Sergt. M. G. Ransom, promoted to Second Lieutenant July 13, 1863, and resigned April 15, 1864; Henry C. Grant was promoted to Second Lieutenant March 30, 1863, and transferred to Battery A, to First Lieutenant May 2, 1865, and mustered out with battery; Sergt. Josiah Brown was promoted to Second Lieutenant May 9, 1864, and transferred to Battery E. At the general muster-out, the commissioned officers were Giles J. Cockerill, Captain; J. H. Rees, William Edwards, Senior and Junior First Lieutenants; W. M. Welcher, Cornelius Linehan, Senior and Junior Second Lieutenants.*

The First Artillery was originally organized under the old militia law of 1860. Immediately after the fall of Fort Sumter, it was ordered to Columbus, and thence to Marietta. It was afterward ordered to Virginia, where it served until its expiration of three month's service, when it was ordered to Columbus for muster-out. It was at once re-enlisted for three years, and for this organization it was that Capt. Konkle's Battery D was recruited, and mustered into the service in September, 1861. It left Camp Dennison on the 1st of November, and on the 10th, reported to Gen. Nelson at Mount Sterling, Ky. It was with Nelson until the 29th, when it reported to Gen. A. M. McCook, at Munfordville, Ky. In February, 1862, it was again ordered to report to Gen. Nelson, at Elizabethtown, but soon returned to its old quarters at Munfordville, and thence proceeded with Gen. McCook to Nashville. With the Fourth Division it moved to Pittsburg Landing, thence to Corinth, and on the 30th of June it was at Athens, Ala. July 30, the battery moved from Columbia, Tenn., with Gen. Nelson's command, to Lebanon, Ky., and in September, at Munfordville, it was overwhelmed by the enemy, and its entire force and material captured. The men were pa-

roled and sent home to Ohio, remaining at Camp Chase until January, 1863, when they were exchanged. The battery was re-organized and equipped at Columbus, and joined the Third Brigade of the Fourth Division, Twenty-third Army Corps, at Lexington, Ky., in March. It served in Eastern Kentucky until July, when it marched with Gen. Burnside's army to Cumberland Gap, and took part in the capture of that rebel stronghold. It participated in the siege of Knoxville, and, immediately after the siege was raised, re-enlisted as veterans, and the men were sent home on the usual thirty days' furlough. The ranks were filled up at Cleveland, and early in 1864, it proceeded to Knoxville, Tenn. It was with Sherman in the Atlanta campaign, and participated in all the fighting of that eventful period. It took part in the battles of Franklin and Nashville, the closing struggles of the war. It was finally mustered out of the service at Cleveland, Ohio, on the 15th of July, 1865.

The Ninth Independent Battery was made up principally in this county. The first commissioned officers were H. S. Wetmore, Captain; L. P. Barrows, First Lieutenant, and John M. Hinde, Second Lieutenant. Capt. Wetmore resigned December 12, 1862, and Second Lieut. H. B. York was promoted to Captain, and in that position, mustered out with the battery. This battery was organized at Camp Wood Cleveland, on the 11th of October, 1861. It was first fitted out as a four-gun battery, with two ten-pounders and two twelve-pound howitzers, but afterward became a full six-gun battery. It served in Kentucky until the 1st of January, 1863, and participated in several hard fights. It was at Cumberland Gap and at Mill Springs. For its gallantry at the latter place, it was presented with two six-pound guns, by Gen. Thomas, which had been captured from the enemy at Cumberland Gap. During the retreat of the national forces from the Gap across the State to the Ohio River, in September and October, 1862, the Ninth Battery performed the most arduous duty. Placed in charge of a train, on the safety of which the whole retreat depended, the battery felt like sacrificing themselves to a man rather than permit it to be captured, and on this determination it acted during the whole of that retreat. On the 26th of January, 1863, the battery received orders to report to the Army of the Cumber-

*The local facts pertaining to this battery were furnished us by Capt. H. C. Grant.

land at Nashville, where it arrived on the 1st of February, and where it remained until the 6th of March, when it moved out to Franklin and took position with the right wing of the Army of the Cumberland. On the 21st of November, the battery was assigned to the First Division, Twelfth Corps, Department of the Army of the Cumberland. Four men of the battery were captured by guerrillas on the 23d of December, who treated them inhumanly—tying their hands behind them, shot them and threw their bodies into the Elk River. Two of them, however escaped, by getting their hands loose and swimming to the shore—one died the next day. The other, James W. Foley, of Hudson, was permanently disabled in the right leg.* Under a general order of the Army of the Cumberland, an assessment of \$30,000 on the neighborhood, was made for the benefit of the families of the three murdered men. In February, 1864, about three-fourths of the battery re-enlisted, and returned home on furlough. On the 9th of April it reported at Tullahoma, with an aggregate of 151 men, having received a number of recruits while at home. In May, it acted with Sherman in the Atlanta campaign. It went also with him in his march to the sea. On the 29th of July, 1865, it was mustered out and discharged.

This comprises a sketch of the regiments which were represented by full companies from Summit County, so far as we have been able to learn them. In compiling these sketches of different regiments, we have drawn freely on "Ohio in the War," by Whitelaw Reid. But as it is said to be not wholly free from errors, we have endeavored so far as possible to have members of the regiments noticed look over and correct any errors recognizable, in order that injustice may be done to none.

The number of soldiers contributed by Summit County during the war to the armies of the Union may not be definitely given, but probably exceeded 3,000 men. The different arms of the service, viz., infantry, cavalry and artillery, were each well represented. The *Beacon* of July 24, 1862, published the following list of soldiers, in the army at that time, from the different townships: Bath, 27 men; Boston, 89; Copley, 34; Coventry, 26; Cuyahoga Falls, 55; Franklin, 43; Green, 62; Hud-

son, 58; Middlebury, 26; Northfield, 42; Norton, 15; Northampton, 28; Portage, 203; Richfield, 42; Springfield, 51; Stow, 22; Tallmadge, 44, and Twinsburg, 48—a total of 910 men. The regiments recruited after that date, including drafts and enlistments in old regiments, comprised at least twice as many more. From the *Beacon* we find that the county was twice subjected to a draft, but each time the number selected through the means of "fortune's wheel" was small. The first draft occurred in October, 1862, and resulted as follows, by townships: Bath, 7; Copley, 27; Coventry, 49; Franklin, 59; Green, 26; Hudson, 8; Northampton, 7; Norton, 40; Northfield, 7; Portage, 49; Richfield, 29; Stow, 1; Springfield, 42, and Twinsburg, 7 men. Townships not mentioned made up their respective quotas by voluntary enlistments. The next draft took place on the 7th of May, 1864, as follows: Bath, 2; Cuyahoga Falls, 5; Boston, 3; Copley, 14; Coventry, 1; Franklin, 11; Hudson, 4; Middlebury, 4; Northampton, 13; Norton, 13; Springfield, 2; Stow, 6, and Tallmadge, 4 men. It is no reproach to the valor of Summit County that it was twice drafted. Many loyal and brave counties were drafted more than twice. Calls were made so often for soldiers that it was impossible to fill them as fast as made, and often before one quota was complete, another call was before the people. The great wonder is that men volunteered as freely as they did, notwithstanding the justness of the cause in which they were engaged. When we view the war in its full magnitude, it seems an event well calculated to discourage the most valorous. A war that in four years called for the following troops: April 15, 1861, 75,000 men; July 22, 1861, 500,000; July 2, 1862, 300,000; August 4, 1862 (for nine months), 300,000; June 15, 1863, the militia; October 17, 1863, 500,000; March 14, 1864, 200,000; April 22, 1864, 100 days' militia; July 18, 1864, 500,000; December 19, 1864, 300,000, is without parallel in modern history, and the alacrity with which these calls were responded to is as unparalleled as the gigantic proportions of the war itself. When we take all this into consideration, it is not in the least strange that a few of these calls should be filled by draft; nor is it, as we have said, any reproach or reflection upon the valor of the county.

In commemoration of the services of those

*Reid.

who laid down their lives upon the altar of their country, memorials have been erected in different parts of the county, which are intended to symbolize the affection of surviving friends. These memorials consist of monuments, chapels, etc., and are city or township affairs, and will receive appropriate mention elsewhere in this work. Not being erected by the county at large, a notice of them does not really belong in this chapter, but in the chapters devoted to the townships in which they are located.

An important element that was widely felt throughout the Northern States during the late war deserves more than a mere passing mention. We allude to the active part borne by the noble women of the country. Their deeds deserve to be written in characters of gold. Love and devotion to the unfortunate and heart-felt pity for the woes of suffering humanity, are among their strongest characteristics. Their kindly smiles of sympathy break through the clouds of misfortune, and their gentlest tones rise amid the sighs of suffering and sorrow. Hundreds and thousands of these noble, self-sacrificing women, like ministering angels, took their places in camp and hospital, where many a brave soldier had cause to thank God for their presence. They went forth, braving all the dangers incident to the times and the place, with the expressed sentiment that if they died their loss would not be felt. Noble, but mistaken souls! The world sustains its heaviest loss when such spirits fall. But not alone by those who went forward to nurse and care for the sick and wounded was all the good accomplished that is accredited to female hands. Those who remained at home performed a good work, "the half of which has not yet been told," but the results of which was felt by many a poor worn-out soldier.

The Soldiers' Aid Society, composed of ladies, was an early organization formed for the benefit of the soldiers in the field, and was productive of great good. Says Whitelaw Reid upon this subject: "Efforts of the people in behalf of their soldiers may be gathered from records of their organized action through the medium of aid societies, sanitary commissions, Christian commissions, soldiers' fairs, etc., some names of the fortunate ones whose privilege it was to work as the almoners of the people's bounty; some traces of the more public demonstrations. But the real history of the work

will never be written, never can be written, perhaps never ought to be written. Who shall intrude to measure the love of the mothers, and sisters, and wives, at home for the soldiers in the field? Who shall chronicle the prayers and the labors to shield them from death and disease? Who shall speak worthily of that religious fervor which counted loss and suffering and life as nothing, so that by any means God's work might be done in the battle for liberty and right." The Cincinnati branch of the Sanitary Commission was the most extensive relief association in the State. A soldiers' aid society was a State organization, with branches in each county. It found a ready response among the ladies of Summit County. An organization, auxiliary to the State Aid Society, was formed in Akron, with branches in each township, which was instrumental in accomplishing a noble work. The following extract is from a soldier's letter, published at the time, and is illustrative of this good work: "It was about 5 o'clock in the afternoon when I arrived in the hospital. Soon after my entrance, I was stripped and bathed in a large tub of tepid water, shown to bed, and a nice clean white shirt and a pair of drawers were given me. I soon encased my tired limbs in my new wardrobe, and while doing so my eyes caught sight of the words 'From the Woman's Aid Society,' stamped in black ink on each garment. I lay down, pulled the blanket over my head and thought of my situation. Here I am in a hospital, prostrated with disease, worn out in body and mind, over eight hundred miles from any spot I can call home, my own mother and sister long since dead; but the noble-hearted women of the North—those angels of mercy—are supplying the place of mother and sister, not only to me, but to thousands of suffering soldiers from every State. Presently I felt two large tears coursing down my cheeks and running into my mustache, followed by myriads of others dropping on the sheet under my chin, forming innumerable little salt-water pools. When well, I am a strong man, and it requires some sudden and deep grief to bring me to tears; but tears of gratitude flowed from me that evening as freely as drops of rain from an April cloud; and, like a spoiled child, I cried myself to sleep." This is but one instance, and how many other soldiers of the armies of the Union could tell the same story!

The Ladies' Soldiers' Aid Society was formed in Akron early in the summer of 1861, and continued in active operation until the close of the war. As we have said, the real history of its work can never be written. Funds were raised by fairs, festivals, mite societies, etc., and as soon as raised were invested in such articles as were needed most, and immediately sent to camps and hospitals. Many a blessing upon

the fair ones, and many a prayer for their happiness was breathed by the recipients of these timely favors. But we will not pursue the subject. Full justice to these angels of mercy cannot be done in our limited space. We will only add, in conclusion of the chapter, a hope that their efforts may never again be called into play in a similar contest.

CHAPTER V.*

EARLY CHRISTIANITY—PIONEER MINISTERS—ESTABLISHMENT OF SCHOOLS—EDUCATIONAL STATISTICS—COUNTY NEWSPAPERS—THE PRESS OF TO-DAY—RAILROADS—
—THEIR INVENTION—BENEFIT TO THE COUNTY.

GO ye into all the world, and preach the Gospel to every creature—was the command given over eighteen centuries ago by the Man of Nazareth. Nor was it intended alone for the salvation of those nations who, year after year, brought tribute to Cæsar. With prophetic vision, the world's great Redeemer gazed on nations then unborn, and heard the cry of those who, in all ages, even at the "ends of the earth," groaned beneath the yoke of sin. Then, for the redemption, He gave to His disciples those commands which in later years have caused His people to widely spread God's glorious truth. When from Atlantic's coast, even from Plymouth Rock, the Star of Empire first renewed her journey westward, and the pioneers of a mighty race descended the western slopes of the Alleghanies, then in the van of the great army, the heralds of salvation bore aloft the Cross of Calvary. In the broad valley of the Mississippi, destined to become the home of a greater nation than any Cæsar ever ruled, the solitary settlers rejoiced to hear those early messengers proclaim the "glad tidings of great joy," or wept at the story of Pilate, the crown of thorns, and the agonies of Golgotha and Calvary. The dark and gloomy forests were pierced by the light that shone from the Star of Bethlehem, and the hymns of praise to God were mingled with the music of the woodman's ax. for in those early days, it could well be said that

"The groves were God's first temples."

*Contributed by W. H. Perrin.

The introduction of Christianity into the wilderness of Ohio was coeval with the settlement of the territory. Pioneer preachers and ministers, sent out by missionary societies of the older settled States of the East, wandered to the Ohio Territory, when few human beings, other than Indians, were to be found within its limits. And what is now Summit County was, in this respect, equally blest with other portions of the Western country. With the pioneers themselves, came missionaries, many of whom devoted years of energy and faithful labor to the Indians, teaching them "the way unto eternal life." A case of this kind is recorded of Rev. Mr. Badger, a missionary from Blanford, Mass., who is said to have been the first minister ever on the Reserve, and for years devoted his time equally to his white and red brethren. Gen. Bierce, in his history of Summit County, says: "Mr. Badger came out and examined his field of labor in 1800, and so well pleased was he with the prospect, that he returned, resigned his charge in Blanford, where he had labored fourteen years, and removed his family to the almost trackless wilderness. He divided his labors between the whites of the Reserve and the Indians of Sandusky and Maumee. He was not only a preacher of peace, but a man of war. He was in Harrison's army during the war of 1812, and at the siege of Fort Meigs. In 1835, he tired of increasing civilization, and removed to Wood County, Ohio, where he died in 1846." Rev. Mr. Badger established the first church, of which we have any record, in

Summit County, on the 4th of September, 1802, at the house of Mr. Hudson, in Hudson Township. The society consisted of thirteen persons, not one of whom but has been called to account for "the deeds done in the body." A full history of this pioneer church will be found in the chapter devoted to Hudson.

The pioneers of Summit County had been brought up under the rigid system of Puritanism, imbibed, as it were, from Plymouth Rock itself, and hence, when they came to "New Connecticut," as this region was then called, these religious principles were still held, and most scrupulously guarded. A writer upon this subject, whose ripe scholarship and vast experience entitles his opinion to some weight, says: "They brought to this new land a religious spirit that eagerly seized upon 'The Reserve,' as a means to propagate a theology that had hitherto flourished only within the rock-bound limits of New England. In their native land, hedged about by traditions that had commanded the unquestioning respect of parents and children for many generations; opposition had been thrust out, and the people began to feel, like the Jews of old, that they were especially aided of God, and that they alone had kept the faith undefiled. But, hitherto, it had not been successfully transplanted, and, when the 'Western Reserve' was placed in the control of those 'to the manor born,' a prominent thought in their minds was that now favorable circumstances were to aid in transplanting the Puritan faith to a spot peculiarly guarded, from which its influence, like the light, should dispel the darkness, and make the Church of New England the church universal. Accepting the dogma of 'original sin,' they got beneath the denunciatory preaching of their native land, with a meekness that was satisfied, if, by the rigid rule of practice laid down, they might, peradventure, be saved. But under this quiet exterior, there was a true war-like spirit, and the mind of each member of the church, that had reached maturity of thought, was an arsenal of theological weapons. At church meetings, in the social circles, and on the street, the ponderous themes of 'election,' 'fore-ordination,' 'the perseverance of the saints,' and kindred subjects, were prominent topics, and wielded with a power and an address that vividly recalls the physical combat of mediæval times. On coming to the new country, how-

ever, these characteristics experienced a change. The standing army had been mobilized, and each member was imbued with the enthusiasm of a crusader, but they found here an enemy, to subdue whom their arsenal held no adequate weapon. Their fulminations of the decrees were met with an appeal to common-sense philosophy; dogmas were met with the demand for freedom of thought; and the result here, as in many a physical conflict, was that the light-armed forces completely demoralized those strong only in their defensive armor, and forced them to accept, and, in the end, to champion, that freedom of thought that they had early learned to denounce as heresy."

The early religious history of "The Reserve" would make an interesting volume, and one of considerable magnitude, but our space will not admit of more than a passing glance in this chapter. The early missionaries and pioneer preachers, as we have said, came to the county with the early settlers themselves. Rev. David Bacon was one of these pioneer soldiers of the Cross, and the next minister in this section, perhaps, a Mr. Badger. He established a "Church of Christ," in Tallmadge, in 1809. This early temple of God consisted of ten members, five males and five females, and, "having no meeting-house, they met in private houses and barns." Of the church, established by Mr. Bacon, Gen. Bierce says: "Imbued with the spirit of New England theology, Mr. Bacon conceived the project of transplanting it into the Western world. A religious colony was his favorite theory, in which all should believe alike and be bound to contribute to the support of the Gospel by a tax on the land, which should be tantamount to a mortgage on the property.

* * * Mr. Bacon had previously purchased from Tallmadge & Starr 12,000 acres of land at \$1.50 per acre. * * * This purchase gave him a controlling interest in the township. In all subsequent sales by him, he inserted a clause in the contract charging every one hundred acres of land sold, with a tax of \$2 a year for the support of the Gospel—and none but believers in the Saybrook platform could have any land at any price, or on any condition except that of joining the church." Doubtless the reverend gentleman was looking forward to that good time coming, when "the lamb and the lion shall lie down together," and we shall all see alike and be alike and love

each other like one great family. But the world was not old enough nor ripe enough for so grand and glorious a scheme, and hence Mr. Bacon was doomed to a bitter disappointment. Other individuals and companies holding lands, sold them "unincumbered by restrictions as to religious beliefs," and free of any tax for church or Gospel purposes. The liberality and freedom of these titles, compared to the entailed incumbrance of the Bacon system, soon broke up the latter and the "theory of an exclusive religious community failed." Members who, of their own free-will and accord, were willing to contribute to the support of the Gospel, protested against being driven into support of it, whether they were willing or not, and, as a natural consequence, a spirit of bitterness was engendered in the church "which brought forth anything but holiness." The feeling against Mr. Bacon became so strong that he was finally forced to resign his charge. This he did in the spring of 1812; also, "gave up his land contract and abandoned his Utopian scheme." He was succeeded by Rev. Mr. Woodruff, who, it seems, did not continue in the high esteem of the church for any length of time. His resignation was earnestly sought, and, when tendered, was eagerly accepted. The history of this church will be given more fully in another chapter.

A log meeting house was erected in Tallmadge in 1814, and in 1817 an edifice for church purposes was built in Hudson. Elder Newcomb was an early divine of Copley Township, and preached the first sermon in that division of the county. The first society organized there, however, was by Mr. Pettitt, a Congregational minister, in 1832. Religious meetings were held in Twinsburg in 1820. A Congregational Church was formed in that township in 1828, by Rev. Samuel Bissell. Thus the Gospel spread and churches were organized as the county became peopled by the whites, until now, side by side with the schoolhouse, we find in every section, those

"Steeple towers
And spires, whose silent fingers point to Heaven."

The cause of education received the early attention of the pioneers of Summit County, and among these Connecticut Yankees it found a congenial soil in which it flourished, and has brought forth fruit a hundred fold. In the

early settlement of this part of the State, there were a great many influences that worked against general education. Neighborhoods were thinly settled, money was scarce, and the people generally were poor. There were no schoolhouses, nor was there any public school fund to build schoolhouses, or even to pay teachers. All persons of either sex, who had physical strength enough to labor, were compelled to take their part in the work, the labor of the females being as heavy and important as that of the men; and this strain upon their industry continued for years. Another drawback to education was a lack of teachers and of books. Taking all these facts together, it is a great source of wonder that the pioneers had any schools at all. But the early settlers, who came principally from New England, the seat of learning and the birth-place of liberal education, deserve the highest honors for their prompt and energetic efforts in the establishment of schools. Just as soon as the settlements would at all justify, schools were opened at each one, and any vacant cabin, stable, barn or other outhouse was used as a temple of learning. The schools were paid for by subscription, at the rate of about 50 or 75 cents a month per scholar. Although the people of Ohio and of Summit County displayed this early interest in the cause of education, yet, when the State Legislature passed a law in 1825, making education compulsory, it raised quite a tempest for a time. The taxpayers of the country at large very heartily indorsed the Legislature in passing the Canal Law, which voted away millions of money, but as heartily condemned it for passing a law compelling them to support "pauper schools," and the poorer classes were loud in their condemnation, because the law made "pauper scholars" of their children.

Those who remember the early school-laws of Ohio will remember the frequent changes made in them, and how crude and imperfect they were as compared to the present law. The early laws were changed every session of the Legislature, until they became a perfect chaos of amendments, provisions, etc., which none were wholly able to explain or understand. One district would act under one law, and an adjoining district under altogether a different one. But the adoption of a new Constitution gave the State a revised school law, said, at

the time of its adoption, to be the best and most perfect within the bounds of the Union. And from that day to the present, it has kept its place as the best and most liberal school law of any of the States.

The early schoolhouses, as a general thing, were of the poorest kind. In towns, they were dilapidated buildings, either frame or logs, and in the country they were invariably of logs. Usually but one style of architecture was used in building them. They were erected, not from a regular fund or by subscription, but by labor given. The neighbors would gather together at some place previously agreed upon, and with ax in hand the work was soon done. Logs were cut from sixteen to eighteen feet in length, and of these the walls were raised. Broad boards composed the roof, and a rude fire-place and clapboard door, a puncheon floor, and the cracks filled with "chinks," and these daubed over with mud completed the schoolhouse, with the exception of the windows and the furniture. These were as rude and as primitive as the house itself. The window was made by cutting out a log the full length of the building, and over the opening, in winter, paper, saturated with grease, served to admit the light. Just under this window, two or three stout pins were driven in the log in a slanting direction, on which a log puncheon was fastened, and this was the "writing desk" of the whole school. For seats, they used benches made from small trees, cut in lengths of ten or twelve feet, split open, and in the round side two large holes were bored at each end, and in each a stout pin, fifteen inches, was driven. These pins formed the legs, and on rough and uneven floors, hardly ever more than three of these legs "touched bottom" at one and the same time. And the books! They were as promiscuous as the house and furniture were rude. The New Testament was the most popular reader. "Introduction to the English Reader," "Sequel to the English Reader," and finally the reader itself, were in the collection of school-books of the time. The New England Primer was one of the primary books. The higher spellers were Dilworth's and then Webster's. Grammar was scarcely ever taught; when it was, the text-books used were Murray's and Kirkham's Grammars. But it is unnecessary to follow the description further. Those who have known only the perfect system of schools of

the present can scarcely form an idea of the limited capacity of educational facilities in this favored region fifty to seventy years ago. There are doubtless, however, many still living in Summit County who, from personal experience, know something of pioneer schools and schoolhouses.

The first school taught in Summit County was by George Pease, in the fall and winter of 1801. The house in which it was taught stood on the southwest corner of Lot 56, of Hudson Township, and "near the center of what was then the public square." The next school in this settlement was taught in the same house by Miss Patty Filer. The first school was taught in Norton Township by Sarah Wyatt, in a little log cabin near Johnson's Corners. In 1809, a school was taught in Northampton by Justus Remington, and in Richfield a Mr. Farnum was the pioneer pedagogue. In the winter of 1812, Reuben Upson wielded the birch and ferule in Springfield Township in a little house that stood near Cass' Camp-ground; Miss Lucy Foster performed the same office in Tallmadge Township in 1810, in a small log shanty that stood south of the center. Rachel Hammond, in 1811, taught the first school in Bath Township, in a house belonging to Aaron Miller, and Lois Ann Gear taught the first in Boston Township, in the summer of the same year; in 1817, Joseph Mishler taught the first school in Franklin Township, in a log house that had been built for a church.

From these facts it will be seen that the pioneers of Summit County lost no time in establishing schools in the new country to which they had come. As we have said, there were no free schools then, but all schools were paid for by general subscription.

The county, in addition to its excellent system of common schools, has, at the present time, several colleges, academies and high schools in successful operation. These will be written up fully in the respective townships in which they are located. The educational history of each township will also be given, from the small beginnings already noticed, through its various changes and improvements, to its present perfect state.

The following statistics, from the report of the State Board of Education, will be found of general interest:

MONEY RECEIVED WITHIN THE YEAR.

Balance on hand September 1, 1878....	\$67,558	30
State Tax.....	22,405	26

No. of students in attendance at Western Reserve College—	
Males, 93; females, 6.....	99

The following is from David Ellet, County Examiner, to the State Board of Education: "The schools of this county are slowly and steadily improving in efficiency and usefulness. They will compare favorably with those of the adjoining counties. Many of our teachers desire to know more of teaching as a profession, and, as a result of this, avail themselves largely of the opportunities furnished in this direction by our county institutes. Our schools need more good teachers—teachers better qualified by education, by experience, and by devotion to their work. They want more good school officers, and more earnestness, more enthusiasm, a greater sense of responsibility in all who are connected with the schools. In some localities an improved state of opinion is needed among those who patronize the schools, a more intelligent acquaintance with their present condition, and a more enlarged appreciation of their capabilities." The above is sound doctrine, and should be well considered by those who are concerned in the cause of education.

A few extracts from the annual report of Hon. J. J. Burns, State Commissioner of Schools, appear to us so appropriate in this connection that we give place to them. He

says: "How shall we cause our pupils to make the largest possible attainments in these foundation branches, and also have them, when they leave school, thirsting for more knowledge, and possessing trained mental faculties so that they may acquire it; the organ of these faculties to be contained in a healthy body, while mind and body are under the guidance of correct moral principles? To avoid waste of time and labor is to be able to better do the work in hand, and to apply the savings to something beyond. A search for wastage is a highly practical thing, and economy here, a moral duty. I have often asserted that there is a wastage in having pupils spend time in learning to spell hundreds—yes, thousands—of words which they never have occasion to use outside of the spelling-class, while probably the dictionary, which should be in constant use, rests in pensive quietness on the teacher's desk, if, indeed, there is one in the room. The meaning of words and their pronunciation are of far more moment than their spelling. The best text-books from which to learn these are the reader and dictionary; and the best proofs of progress are correct oral reading and written compositions. Is there anything better than a common spelling-book exercise to cause pupils to think that we learn words for the sake of knowing how to spell them? that we are seeking not kernels but shells? In penmanship, we want more drill in writing from dictation, in having the pupils put their thoughts or recollections upon paper rapidly and neatly. Copying that beautiful line at the top of the page with care and patience is a good exercise, but some better gymnastic is required to fit the writer for hours of real work. In one way and another, language rightly claims a large share of the attention of the teacher. It is the grand characteristic which distinguishes man from the other animals, the most direct product of his inner consciousness.

"The child has begun the study of language before his school life commences. Learning to talk seems as natural as learning to laugh, or cry, or play. But so much of knowledge and of the world is hidden in books, that a key must be found to unlock these treasures, and that key is reading—the power to translate the written word; to recognize it as the graphic symbol of an idea before in possession, so that the ability to reverse the process will follow, and printed

words become the source of ideas. As the pupil masters words and their meaning, he is getting into his possession the tools with which he may dig in books for further knowledge, make his own knowledge more useful to him as a social being, and secure a body for his thoughts, without which incarnation they are as little subject to control as the weird fancies of a dream. The art of silent reading deserves more attention in school—practice in grasping the meaning of a passage in the shortest possible time, and reproducing it with pen or tongue. But along with this, in its earlier stages, and a short time preceding it, is the oral reading exercise, wherein the reader must serve as eyes to the listeners, so that they may, through his voice, see the printed page. How much inspiration is there in this work when each listener has the page before his own eyes? The translation of a written sentence into a spoken sentence is much more than the mere translation, in their right order, of the *words* of the written sentence; and to do this well requires, besides the names of the written characters, culture of voice, training of eye, quickening of emotion. To serve as a medium through which others may know the printed page, catching its syllables upon the ear, is not low art. To breathe life into dead words, and send them into the depths of the moral and intellectual nature of the hearer, and that with power to convince, to arouse, to subdue, greater than if the hearer had been his own interpreter, is high art indeed. We cannot, however, afford the time, even if that were the only obstacle, to train all our school children to be readers in this artistic sense. We must content ourselves with the more modest aim, and remember that, after all, the prime object of the reading exercise in school is not to train the youth to shine as elocutionists, or serve as a mirror for others, but to impart to them the ability to get knowledge from books, and to keep alive a hunger for it, thus 'determinating the pupil to self-activity,' which Hamilton calls the 'primary principle of education.'

"Another language of great value is committing to memory—learning by *heart* well, phrases—choice selections, gems of thought and expression, culled from the best writings of the best writers. These should be judiciously selected, so as not to be too much beyond the easy comprehension of the pupil. They should,

above all other requisites, be pure, healthful, inspiring. The teacher should add interest to the work by relating incidents in the life of the authors. We know with what tenacity the memory clings to the simple rhymes learned in childhood. If this work be continued as it should be, who can deny its lasting effects upon life? A refined taste and quickened intellect may be hoped for as the result of drinking in and assimilating beautiful thoughts in chaste, musical language—words of warning or of approval, flashed by the memory upon the judgment in the time of temptation, of resistance thereto. * * * * *

“One very good result of increased attention to literature in the schools is the marked increase in the amount of wholesome reading—history, biography, travels, poetry, popular science and the lessened demand for dime novels and other low fiction. Few questions are, in their bearing upon the future of our country, more important than this: *What are the boys and girls reading?* I would not, then, have less time spent in our schools upon language, but teachers may well look into the subject, and see whether that time is spent to the best advantage. The public regard arithmetic, par excellence, as *the* practical study. It is the practical educator's strong tower, and we have it taught in season and out. The nine digits seem to have taken the place of the heathen gods, and their demand for offerings knows no cessation. Measured by any definition of the practical, as a means either to fit one directly for bread-getting in the common business of life, or as a means of mental culture and discipline, a large part of arithmetic, as found in our books and taught from them, falls short. Instead of introducing, at an early stage, the science of geometry, we fritter away valuable time upon annuities and alligation, and progression; and, as for interest, one would think that mankind in general made a living by shaving each other's notes. Children begin early to develop the idea of numbers. It concerns matters of their daily life. The elemental steps of writing and reading numbers, or the symbols of numbers, naturally follow, and, usually, are not difficult of acquirement. But there is such a gap between the conditions needed for the ready learning of these things, and the more mature judgment and that knowledge of business and the world, demanded in the intelli-

gent solution of ordinarily difficult problems in discount and certain other branches of applied arithmetic. Back and forth across this stretch the boy's mind must swing like a pendulum, repelled by what it cannot comprehend, and by what it has grown tired of. He marks time, when he could so readily oblique into some other study and march forward. Then, by and by, if these advanced parts of arithmetical science are needed, their acquisition would be easy. Meanwhile, the child may give increased attention to literature and be learning interesting and profitable lessons about this world into which he has come, and in what he came, and how to take care of it. While these priceless practical lessons are in progress, one can fancy that the arithmetic itself would enjoy the rest.

“In the time which can be saved, also a few short steps could be taken in some other branches now much neglected. The reason for, and the practical mode of, doing many things which are to be done in real life by the citizen, the man of business, the manager of a household, might be taught in the schools. Something of the nature of the materials which we eat, drink and wear, and economy in the buying and using, would be excellent lessons. If He is a benefactor of mankind who causes two blades of grass to grow where one grew before, the language does not furnish a name for him or her who shall cause the laboring man to know how to make \$1 produce the good results for which he must now expend two. No matter whether we regard the school as established primarily for the good of the children, or for the preservation of the State, we must admit that the most valuable result of all education, is the building of good characters. This, to speak definitely, is to instill correct principles, and train in right habits. Citizens with these ‘constitute a State.’ Men and women with these are in possession of what best assures rational happiness, the end and aim of human life.”

In his report of 1878, upon the subject of Compulsory Education—a subject which is now receiving considerable attention in many of the States—the State Commissioner says: “Concerning the right of State or Government to pass and carry into effect what is known as Compulsory Laws, and require parents and guardians, even against their will, to send their children to school, there does not appear to be

much diversity of opinion. Concerning the policy thereof, dependent upon so many known and unknown conditions, there is the widest diversity. I can write no history of the results of the act of March 20, 1877, for it does not seem to have any. A great good would be wrought if the wisdom of the General Assembly could devise some means which shall strengthen and supplement the powers of Boards of Education, and enable them to prevent truancy, even if only in cases where parents desire their children to attend school regularly, but parental authority is too weak to secure that end. The instances are not few in which parents would welcome aid in this matter, knowing that truancy is often the first step in a path leading through the dark mazes of idleness, vagabondage and crime.

"Whatever may be said of young children working in mills and factories, youthful idlers upon the streets of towns and cities should be gathered up by somebody and compelled to do something. If they learn nothing else, there will at least be this salutary lesson, that society is stronger than they, and without injuring them, will use its strength to protect itself. While we are establishing reform schools for those who have started in the way to their own ruin, and have donned the uniform of the enemies of civil society, it would be a heavenly importation to provide some way to rescue those who are yet lingering around the camp."

*The Press of Summit County.**—We have been fortunate in finding the very "fountain head" of the copious flow of local literature—polite, political, miscellaneous and otherwise—with which the people of the territory now embraced in Summit County, have been blessed during the past sixty years. In August, 1825, Mr. Laurin Dewey, a young printer from Ravenna, afterward well-known as a prominent Whig politician in Northern Ohio, issued a prospectus for a paper to be published in the village of Middlebury, now the Sixth Ward of Akron, to be called the *Ohio Canal Advocate*. To aid him in this enterprise, a subscription paper was circulated among the people of Middlebury, of which the following is a copy:

"We, the subscribers, being anxious for the prosperity of this section of the country, and the dissemination of useful information generally, do severally agree to pay the sums set op-

posite our respective names, for the purpose of purchasing a printing press, types, etc., and for erecting a printing establishment in the village of Middlebury, under the direction of Mr. Laurin Dewey, who will edit and publish a weekly paper, devoted to the general interests of the country, advertising, etc., the columns to be enriched by foreign and domestic news, religious intelligence, poetry, etc.; the sums so by us paid to be considered in the nature of a loan, to be repaid whenever the editor shall consider himself able to do so."

The names of the signers of this document, with their several contributions to the purchasing fund, are as follows: Charles Sumner, \$10; Erastus Torrey, \$10; Henry Chittenden, \$5; Nathan Gillett, Jr., \$5; Rufus Hart, \$3; Edward Sumner, \$10; Samuel Newton, \$10; Charles W. Brown, \$5; Benajah A. Allen, \$3; Phineas Pettis, \$5; Elijah Mason, \$5; John McMillan, Jr., \$10; Spencer & Morgan, \$15; Alexander C. Lawson, \$2; William McGallard, \$2; D. W. Williams, \$5; Thomas C. Viall, \$2; Jacob Kaufman, \$5; Jesse Allen, \$4; Ithiel Mills, \$3; Amos Spicer, \$4; William Bell, \$3; Roswell Kent & Co., \$5; Henry Squires, \$5; Elisha Farnam, \$5; Joseph W. Brown, \$5; Horatio Howard, \$5; Ambrose S. Cotter, \$5; Henry Rhodes, \$3; William Phelps, \$2; William J. Hart, \$3; R. & S. McClure, \$5; Theophilus Potter, \$2; Joshua Richards, \$2; Bagley & Humphrey, \$10; Leonard Chatfield, \$2; David Jones, \$2; Titus Chapman, \$2; Julius A. Sumner, \$3; Miner Spicer, \$2; Alpheus Hart, \$1; Paul Williams, \$2; Guerdon Geer, \$5. Total amount subscribed, \$204, a sum scarcely adequate to the purchase of a first-class printer's outfit in these latter days. Ozias Bowen, Esq., then a resident of Middlebury (afterward a prominent citizen of Marion, and Judge of the Court of Common Pleas of that county), associated himself with Mr. Dewey in the enterprise, but before the paper was started, Mr. Dewey transferred his interest to Elijah Mason, Esq.

The Portage Journal.—The Ohio Canal question, meantime, having been substantially settled, and needing no further advocacy, Messrs. Bowen and Mason, before the first issue, changed the name of their paper to the *Portage Journal*. The first number was issued on the 28th day of September, 1825. Printing materials were not as readily obtainable then as now,

* Written by Samuel A. Lane.

and, as the utmost economy had to be exercised in making the "plant," the *Cleveland Herald* having just procured a new dress, the old types, rules, chases, stands, cases, etc., purchased from that establishment, together with an old "Ramage" press—the press of Benjamin Franklin—constituted the entire outfit of the *Portage Journal*, the whole concern being transported overland, from Cleveland to Middlebury, in a couple of two-horse wagons. The size of the paper was 19x24 inches, with four columns to the page, the terms of publication being "Two dollars per annum (exclusive of postage), if payment be made within the year, or two dollars and fifty cents if payment be delayed until the year expires. *No paper will be discontinued until arrearages are paid.*" In politics, the *Journal* appears to have been nearly neutral, with a very decided leaning toward the anti-Jackson, or Adams, party. The connection of Mr. Bowen ceased with No. 57, October 27, 1826. Mr. John McMillan, Jr. (father of Mr. George W. McMillan, of Northampton Township, to whom the writer is indebted for a portion of the material for this chapter), purchasing Mr. Bowen's interest, the new firm being McMillan & Mason, who changed the name of the paper to the *Portage Journal and Weekly Advertiser*—a pretty long name for so small a paper. This arrangement continued just one year, Mr. Mason retiring with No. 109, his place being taken by Alvah Hand, Esq., then practicing law in Middlebury, the new firm of McMillan & Hand, with Mr. Hand as editor, continuing its publication until January or February, 1829, when it was discontinued for want of adequate support, the materials of the office being sold to parties in Massillon. Mr. George W. McMillan, at present living among us, vigorous and hearty, and Hon. Hiram Bowen, afterward founder of the *Bacon*, and one term Summit County's Representative in the State Legislature, and still an active business man in the State of Kansas, were both employes in the pioneer printing office of Summit County—the *Portage Journal*.

The Ohio Observer.—The second place in which the newspaper found a "local habitation and a name" within the present limits of Summit County was Hudson. January 20, 1827, a religious paper called the *Western Intelligencer*, was started in Cleveland, edited by Harmon Kingsbury, J. G. and D. B. McLain, and Kings-

bury, being the publishers. August 31, 1827, Rev. Randolph Stone became associate editor, and March 19, 1828, sole editor of the paper, with John G. McLain as publisher, which arrangement continued until the close of 1829, when the publication of the paper was suspended. In March, 1830, a new series was commenced in Hudson, with Warren Isham as editor and proprietor, who at that time changed the name to the *Observer and Telegraph*. December 30, 1830, Lewis Berry, a practical printer, became a partner with Mr. Isham in the concern, but in April, 1832, Mr. Isham again became sole proprietor of the paper. May 10, 1832, the name of Rev. James B. Walker appears joined with Mr. Isham, but was soon afterward dropped, the paper, about this time, taking the name of the *Ohio Observer*. February 26, 1834, R. M. Walker and S. J. Bradstreet became the editors and proprietors of the paper. December 11, 1834, Rev. James B. Walker, afterward Pastor of the Congregational Church in Akron, became sole editor and proprietor. At the close of 1835—about which time the paper was temporarily crippled through the breaking of its press, by a few sturdy blows from a blacksmith's sledge, wielded by a prominent citizen of Hudson, whose moral character the paper had or was about to call in question—Rev. A. R. Clarke became its editor and proprietor, and transferred the paper to Cleveland, uniting it with the *Cleveland Journal*, Rev. O. P. Hoyt being associated with Mr. Clarke as editor. November 1, 1838, the paper was discontinued, but its publication resumed January 9, 1839. April 16, 1840, the paper was returned to Hudson, with Prof. E. P. Barrows as editor, the pecuniary responsibility for its publication being assumed by an association of gentlemen in Hudson and other portions of the Western Reserve. October 2, 1842, Prof. Henry N. Day became associated with Prof. Barrows as one of the editors. February 14, 1844, the office, press, types, fixtures, etc., were destroyed by fire, and, for a short time, the paper was printed at Cuyahoga Falls.

After the fire, the association having charge of the publication of the paper, paid up the balance of its indebtedness and withdrew from the concern. The paper then went into the hands of A. Upson & Co., who published it till January, 1848, at which date it was transferred to W. Skinner & Co., who, in turn, transferred

it to Sawyer, Ingersoll & Co., in January, 1851, Messrs. Barrows and Day continuing to edit the paper until 1852, their services being performed gratuitously, being purely a "labor of love" for mankind in general, and the readers of the *Observer* in particular. J. S. Sawyer was the editor in 1852, and Rev. John C. Hart in 1853. January 11, 1854, the subscription-list of the *Family Visitor* was transferred to the *Observer*, which was continued one year longer, under the name of the *Ohio Observer and Register*, when, upon the failure of the publishers, the paper ceased to exist. The *Observer*, during its many vicissitudes, was always very ably edited. It was a religious, literary and political (non-partisan) family newspaper, specially representing the interests of the Presbyterian and Congregational Churches, under the old plan of union, and, during the nearly thirty years of its existence, its influence for good among the people of the Western Reserve cannot well be over-estimated.

The Family Visitor.—Hudson's second newspaper venture was the *Family Visitor*, commenced January 3, 1850, also in Cleveland, the names of Prof. J. P. Kirtland and O. H. Knapp, appearing as editors. On May 2, 1850, Mr. Knapp's name was dropped, the paper at that time being published simultaneously in Cleveland and Hudson. In January, 1852, the paper was wholly transferred to Hudson, and, in the spring of that year, Prof. Matthew C. Read became its sole editor, continuing to act in that capacity with great acceptance of the patrons and readers of the ever-welcome *Visitor* until January 11, 1854, when its subscription list was transferred to the *Observer and Register*, as before stated. The plan of the publishers and editors of the *Visitor* was to furnish a family paper—scientific, literary, religious and agricultural—of a high moral tone, excluding everything in any respect objectionable. It had subscribers in every State in the Union, who deeply regretted its discontinuance. It was the first of quite a large class of high-toned papers, which have since become successful; but, being in advance of the times, had to be given up, because under the disaster-inviting credit system then prevailing among newspaper publishers, and their so-called "patrons," the proprietors could not afford "to labor and to wait" for the future harvest which was surely coming.

The Hudson Enterprise.—This paper was es-

tablished as an amateur sheet, in connection with a small job office, in May, 1875, by H. M. McDonald. It was a five-column folio, using "patent" outsides, the inside of the paper, only, filled with local and general news, advertising, etc., being printed in the office of publication. The *Enterprise*, which by this time had come to be an indispensable necessity in many of the households of the village and surrounding townships, was bought by Mr. J. H. Meek, in July, 1876, who in turn sold it to Col. Sullivan D. Harris, the former able editor of the *Ohio Cultivator*, in April, 1877. Col. Harris dying a few weeks after his purchase of the paper, it was bought by its present proprietor, Mr. C. G. Guilford, who changed it into a five-column quarto, the entire paper now being "set up" and printed at home. The *Enterprise*, for a purely local journal, is all that its name implies, and is eminently worthy of the increasing prosperity it now enjoys.

College City Venture.—In July, 1856, Mr. E. F. Chittenden, an old compositor on the *Visitor*, established a small weekly paper at Hudson, under this title, calling to his assistance as editor, M. C. Read, Esq., but only a few numbers were issued, though while it did live, it was very ably conducted, indeed.

Hudson Gazette.—In November, 1857, Rev. Alexander Clark, afterward becoming a D. D. and man of note in the Methodist Episcopal Church, in Pennsylvania, now deceased, started a small paper at Hudson under the above title. It was devoted to "Commerce, Education, Agriculture, Arts and News," and was quite ably edited but continued in existence on a few weeks.

The Ohio Review.—The next point, in chronological order, to be illumined by the effulgence supposed to emanate from the printing press, was Cuyahoga Falls. Largely through the influence of Judge Joshua Stow—then the owner of a large proportion of the lands of the village—Horace Canfield and Timothy P. Spencer, a couple of enterprising young printers of Hartford, Conn., were induced to remove to Cuyahoga Falls and open a newspaper and job printing office in 1833. After many delays in getting together the necessary materials, the first number of the *Ohio Review* was issued by Messrs. Canfield & Spencer November 30, 1833. The paper was neatly printed and quite ably conducted, and, being neutral in politics, was well-

liked by the people; but its circulation being necessarily very limited, and the income of the establishment not proving sufficient to meet its current expenses, the *Review*, after an existence of something over one year, was temporarily discontinued December 12, 1834, Messrs. Canfield & Spencer removing to Cleveland, and from there, soon afterward, to Medina. The printing office, however, remaining at the Falls, the publication of the *Review* was soon afterward resumed by "An Association of Gentlemen"—names not given—with Mr. James Lowrey as printer. The exact date of its discontinuance we have been unable to ascertain; but as Mr. Henry Wetmore has a number of the fourth volume, dated April 13, 1837, in his possession, and as an Akron contemporary of May 5, 1838, says: "There are four papers now published at Cuyahoga Falls, three of which are castigators, viz., the *Renovator*, the *Young Buz-zard* and the *Telescope*," the three papers mentioned being ephemeral affairs, it is probable that the *Review* was still in existence at that date, and very likely continued for some years thereafter.

The Cuyahoga Falls Reporter.—In the year 1870, Mr. E. O. KNOX, a practical printer, but with very little money and absolutely no journalistic experience, commenced the publication of a handsome nine-column weekly paper, under the title of the *Cuyahoga Falls Reporter*. Its outside pages are replete with choice literature, interesting miscellany, and carefully collated foreign and domestic news, its inside columns being devoted to local intelligence, advertising, etc. The *Reporter* is edited with ability, and, in point of newsy sprightliness, is far above the average weekly papers of the State. The *Reporter*, now well into the eleventh year of its existence, is steadily growing in public favor and circulation, and is exerting a powerful influence in promoting the industrial interests of the village, and in maintaining the proverbial reputation of Cuyahoga Falls for intelligence, morality and thrift.

The Akron Post was the first paper ever published in Akron proper. It was a five-column weekly sheet, Democratic in politics, and edited and published by Madison H. White, the materials having been imported from Medina. The press was of the "Ramage" persuasion—a wooden-framed affair, with stone bed, wooden platen and screw power, each form requiring

two separate "pulls," the distinctness of the impression depending altogether upon the muscle and avoirdupois of the pressman, the forms being inked with huge sheep-skin balls, stuffed with cotton, even the glue-and-molasses hand-rollers not being used in this far-off country at that time. The first number of the *Post* was issued on the 23d day of March, 1836, and the last number on the 15th day of November of the same year, the duration of its life being a short two-thirds of a year only.

The Akron Journal, also Democratic, was the next candidate for the public favor of the good people of Akron. It was of about the same size and general character as the *Post*, but far more ably conducted, its editor and proprietor being our present venerable, well-preserved fellow-citizen, Judge Constant Bryan. The first number of the *Journal*—printed with the same press and types as its predecessor—was issued on the 1st day of December, 1836, and continued until the 15th day of June, 1837, the period of its existence being six months and two weeks only.

The American Balance, devoted to the interests of the people of Akron, the State of Ohio and the United States in general, and of the Whig party in particular, was started by Horace K. Smith and Gideon G. Galloway on the 19th day of August, 1837. The materials were second-hand, mostly procured in Cleveland, the press being the same on which the *Ohio Observer* had formerly been printed, and which had been broken by an irate citizen of Hudson a year or so before, as previously related, a new bed having been made for it at the foundry and machine-shop of Benjamin R. Manchester, then located on the east side of the Ohio Canal, at Lock 7, in North Akron. Mr. Smith, a man of education and a vigorous writer, was the editor of the *Balance*, while Mr. Galloway, being a practical printer, conducted the mechanical branch of the business. Early in 1838, Hiram Bowen, also a practical printer, as well as a sharp writer, purchased Mr. Galloway's interest in the *Balance*, and, with the care, labor and talent bestowed upon it, Messrs. Smith & Bowen ought to have made the *American Balance* a pecuniary success. But, as with its two Democratic predecessors, the fates were against them, the conspiring causes being, first, in the general stringency of the times, making it next to impossible for publishers anywhere in Ohio to get in

money enough from subscriptions, advertising, etc., to pay running expenses; and second, because Akron, being a mere dependency of Portage County—though then of more commercial importance than its county seat—no official patronage could be brought to the support of any paper outside of Ravenna. While, at the same time, for the same reason, the circulation of the local paper was confined almost exclusively to the immediate vicinity of its publication. The *Balance*, therefore, after a precarious existence of just one year, was discontinued on the 9th day of August, 1838, though the job department of the office was still kept running by Messrs. Smith & Bowen.

The *Akron Buzzard* was next to play its part upon the local newspaper stage. The history of this curiously-named and somewhat notorious sheet may be briefly stated thus: Its projector was a young house and sign painter by the name of Samuel A. Lane—a Connecticut Yankee—whose shop was in a room adjoining the office of the discontinued *Journal*. Akron, at that time being a rapidly growing town, and having some eighteen or twenty locks of the "great thoroughfare"—the Ohio Canal—within its corporate limits, had become a convenient stopping-place, and a favorite resort for divers and sundry vile characters, professional gamblers, counterfeiters, confidence men, etc., whose deprecations upon the public peace and the public morals, the civil authorities were scarcely able to cope with. To aid the officers of the law in ridding the community of these disreputable characters, a number of the young business men of the village informally constituted themselves into a Vigilance Committee for the purpose of obtaining and imparting information in regard to the operations of the gang, and "stirring up the animals" generally, through pointed public discussions, scathing newspaper articles, anonymous circulars, etc. Mr. Lane, having obtained something of a smattering of the "Art Preservative," while acting as editor's assistant in the office of a Georgia newspaper a few months in 1834, conceived the idea that, by making it a specialty, he could more efficiently accomplish the object sought, than could be done through the other channels named alone. Accordingly, getting permission from Judge Bryan to use his types and press, Mr. Lane, in the intervals of his regular business, "unaided and alone," wrote

out, set up, struck off and flung to the breeze the first number of the *Akron Buzzard*, on the 7th day of September, 1838. It was a three-column folio, of 12x17 inches, published semi-monthly at 75 cents a year, but doubled in size at the end of the first year, and the price raised to \$1. From the favor with which the initial number was received, and not doubting its success, arrangements were made with Messrs. Smith & Bowen, for its regular semi-monthly issue from the office of the *American Balance*. The editorial *nom de guerre* assumed by Mr. Lane was "Jedediah Brownbread, Esq., and among his old acquaintances he is, to this day, more commonly saluted by the familiar sobriquet of "Jed" than by his own proper name. The style of composition adopted by the editor was the proverbial Yankee dialect, of which the detestable styles of poor English, bad spelling and worse grammar, more recently used by "Josh Billings," "Artemas Ward," "Parson Nasby" and other so-called humorists, are fair samples. The character of the paper and its object were fully set forth in its "salutatory," which, translated into plain English, is as follows: "The *Buzzard* will be a real jolly, nothing-to-do-with-politics, anti-blackleg paper, devoted to news, popular tales, miscellany, anecdotes, satire, poetry, humor, the correction of the public morals, etc. It will strike at the vices of mankind, with an occasional brush at its follies. It will expose crime, whether committed by the great or the small, and applaud virtuous and noble actions, whether performed by the rich or the poor. It will encourage the honest man in well-doing, and make a transparency of the breast of the hypocrite. In short, it will be to society what the common buzzard is to our Southern cities, viz.: It will pounce upon, and by its influence, endeavor to reform or remove such loafers as are nuisances in the community, by holding them up to the gaze of a virtuous public." Though literally holding his life in his hand, being often greeted with "threatenings dire," laid in wait for by the "fraternity," and several times severely assaulted, the publisher of the *Buzzard* fearlessly stood his ground—meantime conducting his regular business of house and sign painting—for a year and a half, the paper being discontinued on the 25th of February, 1839, not for want of patronage, for it had more than a local circulation, but because its conductor was

about to engage in another branch of business, and because it was believed that the paper had substantially accomplished its mission; and in closing this item, the writer—the veritable “Jedediah Brownbread” himself—desires to express his firm conviction, that though its methods were not approved by all of even the better class of our people during the period of its publication, that Akron and Summit County are better to-day, morally, socially and pecuniarily, because of the publication of the Akron *Buzzard* of 1837, 1838 and 1839, than they otherwise would have been.

The Pestalozzian.—This was a small, neatly printed monthly quarto, edited and published by Horace K. Smith and S. L. Sawtell, the initial number of which appeared on the 14th day of April, 1838. It was devoted to education, science, literature, etc., and though ably conducted—both of the editors being men of talent and culture—being in advance of the times, it was not duly appreciated, and succumbed to the inevitable on the 30th day of September, 1838, after a non-paying existence of less than half a year.

The Ohian and New Era—During a portion of the year 1838, Mr. Jonathan F. Fenn, one of Akron's earliest merchants and manufacturers, published a small folio sheet, devoted to free banking. Though conducted with considerable ability, and though a financial organ, it was not a financial success, and had an existence of a few months only.

The Glad Tidings and Ladies' Universalist Magazine.—This was a neatly printed eight-page paper, published in Akron during the years 1838, 1839 and 1840. It was edited and published by Revs. S. A. Davis, N. Doolittle and J. Whitney. It was a spirited exponent of the doctrine of universal salvation, and was very ably edited indeed. With the close of 1840, the paper was removed to Cincinnati, where, under the name of the *Star in the West*, it has for the past forty years “fought a good fight” in the interests of the denomination, by whom its pioneer file-leader, the *Glad Tidings*, was originally founded in Akron, being discontinued only a few months ago, for reasons to the writer unknown.

The Summit Beacon.—This paper, the legitimate successor of the *American Balance*, was started on the 11th day of April, 1839, by Hiram Bowen, Esq., on a pledge of adequate

support from the business men of Akron, and leading members of the Whig party within the limits of the prospective new county then about to be erected. Like most of the weekly papers of that early day, the *Beacon* had a hard struggle for existence for several years, but finally, as the official organ of the new county, and through the pluck and energy of its founder, its success became assured, and though its office of publication and total contents have three times been consumed by fire, the paper, for the full forty-two years of its existence, has never missed an issue, though sometimes temporarily diminished in size while recovering from its several disasters, and now sturdily stands, where it has ever stood, in the front rank of the weekly papers of Ohio. In or about the year 1845, Mr. Bowen sold the paper to Laurin Dewey, Esq. (formerly editor of the *Ohio Star*, at Ravenna, and Sheriff of Portage County; afterward Warden of the Ohio Penitentiary, and more recently a prominent politician and a member of the Legislature of Iowa, now deceased), and his brother-in-law, Mr. Richard S. Elkins, then a member of the book and drug firm of Beebe & Elkins, and afterward Postmaster of Akron for eight years, under the administration of Abraham Lincoln and Andrew Johnson, Mr. E. now residing on a farm near Ravenna, in the adjoining county of Portage. On the 9th day of June, 1848, the office was destroyed by fire, but immediately re-established, and later in that year, Messrs. Dewey & Elkins sold the paper to John Teesdale, Esq., formerly editor of the *Ohio State Journal*, and since the State Printer for Iowa. Mr. Teesdale soon afterward formed a partnership with Messrs. Beebe & Elkins, uniting the printing with the book and drug business, under the firm name of Elkins, Teesdale & Co., Mr. Teesdale being the sole editor of the paper. He was a graceful, but incisive writer, and under his management, the *Beacon*, becoming with the change of parties in 1854-55, the organ of the Republican party, attained a high degree of popularity. Mr. Teesdale sold his interest to his copartners, Messrs. Beebe & Elkins, February 27, 1856, continuing, however, to act as editor until May 1, of that year, when James S. Carpenter, Esq., became sole editor of the paper. Under the able editorial management of Mr. Carpenter, the high reputation of the *Beacon*, as voicing the advanced sentiment of the Republican party of

the Western Reserve, was fully maintained. On his accession to the bench of the Court of Common Pleas of Summit, Medina and Lorain Counties, Judge Carpenter, on the 22d day of October, 1856, vacated the editorial chair in favor of Hon. Asahel H. Lewis, a former State Senator for Summit and Portage Counties, a thorough scholar and a pungent writer, the name of Mr. R. S. Elkins, one of the publishers, also at this time appearing as associate editor. On the 29th day of September, 1856, the office, together with the book and drug store of its proprietors, was again destroyed by fire, but, Phoenix-like, it once more speedily arose from its ashes in a far more attractive form than ever before. The editorial connection of Mr. Lewis with the *Beacon* continued until January 10, 1861, when he was superseded by Mr. Samuel A. Lane, then just retiring from four years of service as Sheriff of Summit County. Mr. Lane, during the war, did the sole editorial work of the paper, giving especial attention to army correspondence, and of both city and county local news, the weekly circulation increasing during four years of the war, from 1,300 or 1,400 to about 2,500 copies. In January, 1865, Mr. Lane, who had hitherto been working on a salary, bought of Messrs. Beebe & Elkins, a one-third interest in the *Beacon*, another third being bought by Mr. Horace G. Canfield, a practical printer and foreman of the office, the firm name being changed to Elkins, Lane & Co. Two years later, January, 1867, the remaining one-third interest of Beebe & Elkins was purchased by Albertus L. Paine and Denis J. Long, former apprentices in the office, the *Summit County Journal* (noticed elsewhere) published by them being merged in the *Beacon*, the firm name adopted being Lane, Canfield & Co. Mr. Lane continued to act as sole editor of the paper until the winter of 1868-69, when Mr. Thomas C. Raynolds, an Akron boy, freshly graduated from Michigan University, but with decided journalistic proclivities, was employed as assistant editor and local reporter. In 1867, the strictly advance pay system was adopted and rigidly enforced, a feat that but few of the weekly papers of the country had at that time dared to attempt, a feature highly advantageous to both the publishers of the paper and its subscribers.

The Akron Daily Beacon.—In the meantime, Akron had grown from a village of 3,000 inhabitants in 1860, to a city of 10,000 in 1869, with

an augmented commercial and manufacturing business to match, creating a demand for something faster than a weekly paper; and on the 6th day of December, 1869, the first number of the *Akron Daily Beacon*, a seven-column folio, was issued, Mr. Lane, as chief, and Mr. Raynolds, as assistant, doing the entire editorial and reportorial work. Though quite a large advertising patronage was at once accorded to the daily by the liberal-minded business men of Akron, its average daily circulation the first year was only about six hundred. Gradually, however, the people have come to appreciate its worth as a gatherer and disseminator of local as well as fresh general news, and its average daily circulation is now (April, 1881) a little over 2,200. In June, 1870, Mr. Raynolds severed his connection with the paper, Carson Lake, then a compositor in the office, taking his place, and for several weeks during the summer and fall of that year, during the illness and absence of Mr. Lane from the office, performing the entire editorial and reportorial work upon the paper. In December, 1871, the establishment was transferred to the Beacon Publishing Company, Messrs. Canfield and Paine retiring, Messrs. Lane and Long holding their respective one-third and one-sixth shares, as stock in the new corporation, Mr. Lane being elected business manager, and Mr. Long continuing to act as superintendent of the news department, Mr. Raynolds being recalled and placed in charge of the editorial department of the paper, in which capacity, with the exception of one year's interregnum, he has ever since acted, with Mr. Wilson M. Day as his able and faithful associate. In the meantime, the business of the concern had assumed such large proportions, that the four-story 22x60-foot building then occupied was found to be too straitened for the purposes of the company, and in March, 1872, the owner of the building commenced work upon a 60-foot addition in the rear. Before the walls were completed, however, the entire concern was again destroyed by fire on the 27th day of April, 1872. Temporary quarters were procured, and new material ordered by telegraph and express, so that on the fourth day after the fire its regular issue on its own new type was resumed, a smaller sheet being furnished to its subscribers during the intervening three days, through the courtesy of the publishers of the *Akron City Times*. The burned building was

re-erected on the enlarged plan, considerably improved, being 22x117 feet, three-stories high, exclusive of the basement on Howard street, and five stories on Canal street, with stone front, large plate-glass windows, with steam elevator running from the basement to the upper floor, and steam heating apparatus throughout the entire building, the enlarged structure being fitted up with strictly first-class fixtures, machinery and materials from top to bottom. By reason of the heavy loss occasioned by the fire (fully one-half of its \$25,000 capital stock) and the closely following financial and commercial revulsion of 1873, the affairs of the company became so seriously embarrassed that, in January, 1875, the entire stock was sacrificed, and the concern, with its machinery, news and job printing materials, book-binding apparatus, stationery stock, good-will, etc., was transferred to Messrs Thomas C. Reynolds, Frank J. Staral and John H. Auble, in consideration of their assuming and paying its liabilities, enough of the old stock-holders nominally retaining sufficient stock to keep the corporate organization of the company intact. About two years later, Mr. Auble withdrew, leaving Messrs. Reynolds and Staral sole proprietors, under whose auspices the *Beacon* establishment, in all its departments, is at this writing (April, 1881) enjoying a high degree of prosperity. It would be interesting to minutely trace its growth from a few fonts of second-hand type, a patched-up, medium-sized hand press, with a single journeyman printer, and the proverbial printer's "devil," as its entire operative force, to its present magnificent appointments, but space will not permit. Suffice it to say that, besides its full complement of news, job, and book-binding materials, its machinery, run by a finely-built eight-horse power steam engine, consists of one mammoth four-roller Potter cylinder job press, with 32x50-inch bed; one two-roller Potter cylinder job and news press, with 31x46-inch bed; one two-roller Potter job press, with 21x27-inch bed; one No. 1 improved Campbell jobber; one quarto Imperial jobber, and one eighth-medium Gordon card and circular press; two large paper cutters, besides a large-sized Wells hand press, proof presses, card cutters, etc.; the total operative force of the establishment at this writing being forty-six, though at some seasons of the year from fifteen to twenty more hands are

needed in the job and binding departments. The *Beacon*, therefore, may well be considered one of the permanent institutions of Summit County, and taken all in all, is one of the most complete establishments of its kind in the State.

The American Democrat.—On the 10th day of August, 1842, Mr. Horace Canfield issued, in Akron, the first number of the *American Democrat*. With some slight changes of name, the paper—being at one time under the editorial control of Lyman W. Hall, Esq., of Ravenna, for one year, as a Free-Soil paper—finally settling down into the *Democratic Standard*, was continued under that name until the death of Mr. Canfield, December 29, 1853, and for a short time thereafter by his two sons, Thomas and Horace G. Canfield. The office was afterward sold to Mr. H. P. Abel, and the paper re-established, Mr. Abel, in the spring of 1855, also issuing a small daily. The venture, however, was non-successful, Mr. Abel being obliged, soon after, to discontinue both daily and weekly. In the winter of 1855-56, the office was purchased by Mr. W. D. Bien, and the paper re-established under the name of the *Summit Democrat*, afterward, in the winter of 1859-60, passing into the hands of Mr. J. Hays Webb, who continued its publication here until just before the Presidential election of 1860, when the office was removed to Canton, where, under the name of the *True Democrat*, it was run until the spring of 1861. Mr. Webb, on returning to Akron, changed its name to the *Summit Union*, continuing its publication here until the close of the Vallandigham-Brough Gubernatorial campaign, in the fall of 1863, when the paper was discontinued and the office taken to Ravenna.

The Cascade Roarer.—After a peaceful slumber of five years, the *Akron Buzzard* was revived as a Temperance paper, March 15, 1844, by its former proprietor, Mr. Samuel A. Lane, and Mr. William T. Coggeshall, afterward the author of a number of finely-written and intensely interesting literary works; State Librarian under Govs. Chase and Dennison, from 1856 to 1862; and Minister to Ecuador, South America, in 1866, dying of consumption at Quito, in the summer of 1857. The name of the paper was changed to the *Cascade Roarer*—a five-column weekly—which had a successful run of about two years, when Mr. Lane disposed of his interest to Mr. James Drew, the new firm, in the in-

terest of Labor as well as Temperance reform, changing the title of the paper to the *Tectotal Mechanic*. Its publication here was continued until September 24, 1846, when it was removed to Cleveland and merged in the *Ohio Temperance Artisan*, which, after a few months' sickly existence, was finally discontinued.

The Summit County Journal.—In September, 1865, Messrs. Albertus L. Paine and Denis J. Long, two practical printers, who had learned their trade in the office of the *Summit County Beacon*, on their discharge from the army, in which they had faithfully served during the war, started a new Republican weekly paper under the above title, with Judge James S. Carpenter as its editor. The *Journal* was neatly printed, ably edited, and reasonably successful, but, on the accession of Messrs. Paine and Long to a one-third ownership in the *Beacon*, the *Journal* was discontinued, and the subscription-list, good-will, etc., merged with those of the *Beacon*, in January, 1867.

The Akron City Times.—On the 20th day of January, 1867, Mr. J. C. Loveland started a new Democratic paper in Akron, a nine-column weekly, entitled the *Akron City Times*. Mr. Loveland's administration not proving very satisfactory, to either the party upon whom he mainly depended for support or the people of Summit County, the office was transferred to Mr. George C. Crain, in August, 1867. On the 28th day of April, 1868, Mr. Crain was succeeded by R. S. Bean & Co., who in turn transferred the concern to S. L. Everett & Son, in October of the same year. On the death of the senior Mr. Everett, some two or three years later, the entire management of the paper devolved upon the son, Sebastian L. Everett—more generally known by the familiar sobriquet of "Don"—who successfully continued its publication until 1873, when it was transferred to its present genial proprietor, Mr. Richard H. Knight, under whose management, with his son, Mr. Clarence R. Knight, as editor, it is enjoying a high degree of prosperity, and has evidently become one of the fixed and permanent institutions of the city and county, being printed on a cylinder power press, run by steam, and having a well-stocked and liberally patronized job printing office attached.

The Akron Germania.—This is an independent weekly paper, published, as its name implies, in the interests of the German-speaking

portion of our population. It was founded in the fall of 1868, by Mr. H. Gentz, Prof. C. F. Kolbe succeeding to the proprietorship early in the following year. September, 1872, the paper was transferred to the Akron Paper and Printing Company, and early in 1873, was transferred to the Germania Company, with Mr. Stephen Ginther as business manager, and Mr. Paul E. Werner as editor. In October, 1875, Mr. Werner bought and continued to edit the same until 1878, when other duties claiming his entire attention, Mr. Louis Seybold was employed as editor, which position he still ably and efficiently maintains. The paper is now owned by the Germania Printing Company, formed in November, 1880, with Mr. Paul E. Werner as business manager, and commanding a good healthy circulation and a liberal advertising patronage. The business and mechanical departments of the Germania Printing Company are most complete, and, besides having a full supply of the newest styles of job and fancy type and other material, it has six power-presses run by steam in constant operation, viz.: a Cottrell & Babcock cylinder, with 33x46-inch bed; a Cottrell & Babcock, air spring, with 25x38-inch bed; a Potter Pony; a quarter and an eighth medium Liberty jobbers, and a "Model" card press. There is also a book bindery connected with the establishment, which, in all its departments, is at this date (April, 1881), in a highly prosperous condition, with a regular operative force of twenty-five hands, and occasionally demands from ten to fifteen additional.

The Akron Daily Argus.—In March, 1874, the *Akron Daily Argus* was commenced by H. G. Canfield & Co., with Elder John F. Rowe as editor, a semi-weekly edition also being issued by the same firm. It was an independent paper and ably edited. The paper passing into possession of the *Argus* Printing Company, subsequently formed, was, in September, 1874, by a majority vote of the stockholders, changed into a Democratic paper under the editorial management of Sebastian L. Everett—"Don"—formerly of the *City Times*. March 20, 1875, the concern passed into the hands of Elder John F. Rowe, former editor, and his brother, Frank M. Rowe, a practical printer, who under the firm name of Rowe Brothers, again changed its character from a political to an independent paper. It was continued by Rowe Brothers

until December 25, 1876, when the establishment was purchased by Mr. Carson Lake, under whose business and editorial management it was continued as a Democratic paper until July 1, 1879, at which date the office and fixtures were bought by Messrs. Paul E. Werner and B. F. Nelson, by whom the *Argus* was discontinued.

The Sunday Gazette.—This is a six-column quarto, devoted to the general and local news of the week, literature, miscellany, religious intelligence, etc. It was started in December, 1878, by Mr. Paul E. Werner, as publisher, and Prof. Carl F. Kolbe as editor. It was consolidated with the *Weekly* and *Daily Tribune*, on the establishment of those papers, July 26, 1879, the name being changed to *Sunday Tribune*, but, after two or three issues, again changed to *Sunday Gazette*, which name it still bears. On the dissolution of the firm of Werner & Nelson, and the discontinuance of the *Tribune*, on the 2d day of February, 1880, the *Gazette* was continued by Mr. Paul E. Werner, in connection with the *Germania*, until September 25, 1880, when it was sold to Mr. Carson Lake, under whose management it is rapidly increasing in circulation and popularity.

The Akron Commercial.—This is a nine column monthly, devoted largely, as its name imports, to advertising and commercial matters, but furnishing with each issue a large amount of interesting miscellany, with a monthly spicy editorial melange of local and general gossip. It is published and edited by Josiah Jackson Wright (commonly and for short called "Jack Wright") formerly for many years the efficient City Marshal of Akron. It was commenced in the spring of 1874, and is still vigorous and hearty, and apparently one of the fixed newspaper stars of Akron and of Summit County.

The Akron Daily Tribune.—This paper, a seven-column folio, was started on the 26th day of July, 1879, by Paul E. Werner and Benjamin F. Nelson, who also issued a weekly edition in connection therewith. It was Democratic in politics, and ably conducted, under the editorial management of Mr. Nelson, but, by reason of having another longer-established Democratic organ, the *City Times*, and the firmly planted *Daily Beacon*, to compete with, and from other causes, the enterprise was found to be unremunerative, and both the *Daily* and *Weekly Tribune* were discontinued on the 2d day of February, 1880.

The Advance.—A daily paper under the above title, as an organ of the National Greenback Labor party, was started in Cleveland June 6, 1877, by Robert Schilling, a weekly edition also being issued. In May, 1880, the daily was discontinued, and the weekly was transferred to Salem, Columbiana County, an Akron edition also being published, and mailed direct from the office in Salem to its subscribers in Akron. August 4, 1880, Mr. John P. Burns assumed the business and editorial control of the *Advance*, and January 1, 1881, removed the office to Akron. It is a five-column quarto, edited with ability; bids fair to become one of the permanent periodicals of Summit County.

A large number of other periodicals have from time to time been published in Akron during the half-century we have passed over, that we have no space to notice in detail, even if we could recall them all to mind. Among them were the *Rose of the Valley*, a literary monthly, by Allison & Mariner; *Akron Offering*, by Callista Cummings; the *True Kindred*, by a Mrs. Sanford; the *Flail*, a Democratic campaign paper, by L. L. Howard, in 1840; the *Flower of the West*, by Allison & Rumrix, in 1840; the *Free-Soil Platform*, a campaign paper in 1848, by Hiram Bowen; the *Sentinel of Liberty*, a campaign paper, in 1855, by an association of "Young Republicans"; the *Wide Awake*, a Republican campaign paper, in 1860, by D. C. Carr, S. A. Lane and others; the *Summitonian*, a literary monthly, by H. G. Canfield & Co., in 1873; the *Beacon Magazine*, a literary monthly, in 1873, by the Beacon Publishing Co., as a premium to subscribers to the *Weekly Beacon*; and others remembered by name only, such as the *Casket*, the *Sockdologer*, the *Whip*, the *School-Mistress*, the *Sunny Side*, the *Church Journal*, etc.

It will thus be seen that Summit County, if not the very center of the newspaper universe, has been untiring in its efforts to become such. There is no room and no need for comments, except, perhaps, to add that while comparatively few of these ventures have proved remunerative to those who have made them, their influence for good upon the community admits of not a doubt. For where would Summit County have been to-day but for its newspapers, in advertising to the world its manifold advantages; in their advocacy of canals, railroads and other public improvements; in their

encouragement to manufactures, and in the innumerable ways in which the liberal use of printer's ink benefits both individuals and communities.

*Railroads.**—The railway—wholly unknown to the commercial world three-fourths of a century ago—has become the greatest single factor in the development of the material and social progress, not only of the United States and of the other civilized nations of the earth, but its inestimable blessings are being rapidly extended into the hitherto semi-civilized and barbarous portions of the globe. Though some rude tramways had previously been used in the mining regions of England, the first attempt at railroad building in the United States was in 1807—a line of a few hundred yards in length—for transporting gravel from the top of Beacon Hill down into Charles street, in the city of Boston, the rails being entirely of wood, and the propelling power the momentum of the loaded cars, which, in descending, by means of a rope attachment, pulled the empty cars up, a double track, of course, being necessary to the proper working of the road. As late as 1827, the then longest railroad in the United States was from the Mauch Chunk coal mines to the Lehigh River, in Pennsylvania, a distance of nine miles. The loaded cars were run from the mines to the river by their own gravity, and, on being emptied, were drawn back to the mines by mules. From this time on, the American people became deeply interested in railroad enterprises, and, from 1827 to 1830, several short lines, run by horse-power, were constructed, the first locomotive, propelled by steam, to turn a wheel upon the American continent, being a clumsy, uncouth importation from England, called the "Stourbridge Lion," landed in New York in 1829. So slow, however, was the development, that in the winter of 1833-34, it was the privilege of the writer, then a mere boy, to ride over the then longest railroad in the world, running from Charleston, S. C., to Augusta, Ga., a distance of 130 miles, only; the first hundred miles west from Charleston being performed by steam-power, the last thirty miles by negro-power, owing to a sharp incline that the modern engine driver would laugh at, the supposition being that a stationary engine, with the proper hoisting apparatus only, could overcome so heavy a grade. The first locomotive ever built in

America, called the "Best Friend," was used upon this road during its construction. It was built at the "West Point Foundry Shops," in New York, and forwarded to Charleston by ship Niagara, in October, 1830. The first trial trip was made on a small portion of the road out of Charleston, November 2, 1830, running, according to the report of the excursion in the *Charleston Courier*, as "on the wings of the wind, at the varied speed of fifteen to twenty miles an hour; annihilating time and space, and, like the renowned John Gilpin, 'leaving all the world behind.'" The "Best Friend" was daily in service, transporting workmen and materials used in the construction of the road, until the 17th day of June, 1831, when it became disabled by a singular accident, and the road was without a locomotive for several months. Of this disaster to the "Best Friend," the *Charleston Courier* of June 18, 1831, gave the following account: "The locomotive, 'Best Friend,' started yesterday morning to meet the lumber cars at the forks of the road, and while turning on the revolving platform, the steam was suffered to accumulate by the negligence of the fireman, a negro, who, pressing on the safety-valve, prevented the surplus steam from escaping, by which means the boiler burst at the bottom, was forced inward, and injured Mr. Darrell, the engineer, and two negroes. The one had his thigh broken, and the other received a severe cut in the face, and a slight one in the flesh part of the breast. Mr. Darrell was scalded from the shoulder-blade down his back. The boiler was thrown to the distance of twenty-five feet. * * * The accident occurred in consequence of the negro holding down the safety-valve, while Mr. Darrell was assisting to arrange the lumber cars." It will seem strange, to the trained railroad operator of the present day, that such an accident, from such a cause, could have been possible; but it must be remembered that the engineer, himself almost wholly unskilled in locomotive driving, had to perform all the functions of conductor, brakeman, etc., in addition to his own proper duties, his only help being such as above indicated, common unskilled laborers, unable to distinguish between the lever of a safety-valve and the crank of a grindstone. But without further tracing the growth of the railroad system of the United States, now forming a perfect net-work of iron and steel in every portion of the country, on

* Written by Samuel A. Lane.

which daily and nightly and continuously run thousands of locomotives, and tens of thousands of freight and passenger cars, loaded with thousands of tons of the products of the country, with valuable merchandise from every part of the world, and with tens of thousands of precious human beings, dashing with lightning speed from city to city, and from State to State, from the Atlantic to the Pacific, and from the Lakes to the Gulf, representing a capital of at least \$5,000,000,000. we will proceed at once to the subject matter of this chapter—"The Railroads of Summit County." The earliest freight and passenger railroad project, to include any portion of the territory now embraced in Summit County in its route, was the

Cleveland & Pittsburgh Railroad.—A charter was granted for this road by the Legislature of Ohio, on the 14th day of March, 1836. Work upon the road not being commenced within the three years designated in the law, the charter became dormant, and remained so for six years, when, by an act passed March 11, 1845—just nine years after the granting of the original charter—the project was revived and the charter amended. The promoters of the enterprise, though the times were hard and money scarce, prosecuted the work as rapidly as similar enterprises were then built, though very slowly in comparison with more modern railroad operations, the road not being completed on the Cleveland end as far as Hudson, even, until the latter part of the winter of 1851–52. The road enters Summit County on the east, near the southeast corner of the township of Hudson, and running in a northwesterly direction, passes through the village of Hudson, a small portion of the southwest corner of Twinsburg, and through the village of Macedonia, in the eastern portion of Northfield Township, and thence through Bedford and Newburg, in Cuyahoga County, to Cleveland. From the very beginning, the Cleveland & Pittsburgh has been under an able and efficient management, and has never experienced any of those reverses and drawbacks so common to railroad corporations in their earlier days, and so disastrous and unprofitable to the original stockholders and builders.

Akron & Canton Railroad.—The second railroad enterprise to engage the attention of the people of Summit County, was the Akron & Canton Railroad, incorporated by act of the

Legislature February 21, 1845. Its capital stock was \$200,000, to be divided into shares of \$25 each; but, by the provisions of the charter, it was not to commence operations till \$100,000 was subscribed, the company being prohibited from contracting debts or liabilities to an amount greater than the stock subscribed and held by responsible parties and remaining unexpended, together with its means on hand and that which might reasonably be expected to accrue within three years from the time of the making of the contract. The company was also authorized to extend its road to some point on the Ohio River, if deemed advisable, and to increase its capital to an amount sufficient for that object. This charter, both liberal and illiberal in its provisions, was, through the stringency of the times and the indifference of the people along the route, permitted to lapse before anything definite was accomplished, and the Akron & Canton Railroad, proper, was never built except on paper.

Akron Branch Railroad.—The approaching completion of the Cleveland & Pittsburgh road through one corner of Summit County, its nearest approach to the county seat being some fifteen miles, aroused our people to the importance of having more direct and rapid communication with the outer world than canals and mud roads afforded. Accordingly, a number of the enterprising citizens of Akron, Hudson and Cuyahoga Falls—one of the most active among them being Col. Simon Perkins, of Akron—took the matter in hand, and, in conjunction with the officers of the Cleveland & Pittsburgh Railroad, obtained an amendment to its charter, by an act passed February 19, 1851, authorizing the construction, under said charter, of "a branch railroad from some convenient point on the Cleveland & Pittsburgh Railroad, in Hudson, Summit County, through Cuyahoga Falls and Akron to Wooster, or some other point on the Ohio & Pennsylvania Railroad, between Massillon and Wooster, and to connect with the said Ohio & Pennsylvania Railroad, or any other railroad running in the direction of Columbus," and increasing the capital stock of the Cleveland & Pittsburgh Company \$1,000,000.

The bill also stipulated that the subscribers to the stock of this branch road might form a separate organization under the name of "The Akron Branch of the Cleveland & Pittsburgh Railroad Company, entitled to all the privileges

and subject to all the restrictions and liabilities granted or imposed by the original charter and amendments thereto."

In the meantime, a railroad had been chartered to run from Cleveland to Zanesville, by the way of Medina, Wooster, Millersburg, etc. This, our people at once saw, or thought, would, if completed, leave Summit County "out in the cold," at least, for many years, for railroad enterprises were not then as readily promoted as in later years. A delegation of the "Branch," headed by Col. Perkins, accordingly visited Wooster to endeavor to get them to make a diversion of their road from that point via Doylestown, Wadsworth, Akron and Cuyahoga Falls to Hudson, instead of going direct through to Cleveland, as contemplated. To these overtures, however, the Woosterites turned a deaf ear, and "The Cleveland, Wooster & Zanesville Railroad" was never built. The failure of the Akron Branch to thus "pool" its interests with the Wooster project was truly a godsend to the people of Summit County, as the present more convenient railroad system of the county most clearly demonstrates.

The organization of "The Akron Branch Railroad" was effected March 11, 1851, with Simon Perkins, Milton W. Henry and John W. McMillen, of Akron; Horace A. Miller, of Cuyahoga Falls; James Butler and Henry N. Day, of Hudson, and John Carey, of Millersburg, as Directors. Simon Perkins was elected President; Henry N. Day, Secretary, and John W. McMillen, Treasurer. George Robinson was appointed Chief Engineer, and Isaiah Linton, Assistant Engineer, by whom the original survey and estimates from Hudson to Akron were made. Messrs. Robinson and Linton subsequently withdrawing from the road, their places were filled by W. H. Grant, of the Hudson River Railroad, as Chief Engineer, and M. W. Kellogg, as Assistant. The contracts were awarded June 20, 1851, and the work commenced immediately thereafter.

As the project was one which it was believed would largely benefit every property owner in the county, in addition to the amount raised along the line of the road by voluntary stock subscriptions, a special law was passed by the Legislature on the 24th day of March, 1851, authorizing and requiring the County Commissioners, with the consent of the legal voters of the county, to subscribe to the capital stock of

said company "any sum not exceeding \$100,000, and to borrow the necessary amount of money for the payment of such stock subscription, bonds for the amount so subscribed to be issued in sums of not less than \$100 each, bearing interest a rate not exceeding 7 per cent, payable annually, or semi-annually, redeemable at such time as may be deemed expedient," etc. This proposition was voted on at the special election for the adoption of the New Constitution of Ohio, June 21, 1851, the vote "for subscription" and "against subscription," in the several townships of the county, being as follows:

	For Subscription.	Against Subscription.

Majority for subscription.	827.	

In accordance with the authority thus given them, the County Commissioners, Messrs. Edwin Wetmore, of Stow, James W. Weld, of Richfield, and Hiram Weston, of Middlebury, proceeded, "For and in the name of Summit County," to subscribe for \$100,000 of the stock of said railroad, issuing therefor 100 bonds of \$1,000 each, payable to the order of John W. McMillen, in fifteen years, with thirty interest coupons attached, at the rate of 7 per cent, payable semi-annually. The Commissioners, at the same time, in accordance with the provisions of the act authorizing such stock subscription, added to the rate of taxation an amount sufficient not only to meet the interest as it should fall due, but to also gradually create a sinking fund for the final payment of the bonds themselves.

The aid thus furnished, together with the prompt payment of individual stock subscrip-

tions along the line, enabled the Board of Directors to push the work forward so vigorously that, on the 1st day of January, 1852—less than ten months after the organization of the company, and only about six months after the contracts were awarded—the completion of the road to that village was celebrated by the people of Cuyahoga Falls, its completion to Akron, five miles further, being celebrated on the 4th of July of the same year. The work south from Akron was also pushed vigorously forward, and the line speedily completed to Millersburg, in Holmes County, thus forming a connection with the Ohio & Pennsylvania (now the Pittsburgh, Fort Wayne & Chicago) Railroad at Orrville, in Wayne County, and giving us an outlet in the direction of Columbus, Cincinnati, and the Western and Southern States.

Although so heavy a vote was polled against the subscription to the stock of this road by the county, and though there was very much grumbling by a portion of the tax-payers of the county from year to year, while the interest was being paid and the fund provided for the payment of the bonds themselves, all now admit that it was the best investment of money ever made by the property-owners of Summit County, there not being a single foot of land within the limits of the county that was not enhanced in value from ten to twenty fold the amount of special tax thus paid upon it, while an impetus was given to the trade, manufactures and agricultural operations of the county that could have been attained in no other way.

The Cleveland, Zanesville & Cincinnati Railroad.—With the view of extending the road south from Millersburg to Zanesville, to form a connection with Cincinnati via the Cincinnati, Wilmington & Zanesville Railroad, application was made to the Court of Common Pleas of Summit County, at the March term, 1853, for a change of name to the "Cleveland, Zanesville & Cincinnati Railroad," which was accordingly done. Embarrassments subsequently falling upon the road, the contemplated extension was indefinitely postponed. On the 22d day of August, 1861, suit was brought, in the Common Pleas Court of Summit County, by the creditors of the road, for foreclosure of mortgage and sale of the road, Col. Simon Perkins being appointed Receiver by the court, to run the road pending litigation. By decree of

court, the road and its franchises were sold by the Receiver at public auction at the door of the court house, in Akron, on the 2d day of November, 1864, George W. Cass and John J. Marvin, of Pittsburgh, being the purchasers, Col. Simon Perkins being appointed Superintendent of the road by the new owners. On the 1st day of July, 1865, George W. Cass and John J. Marvin, by deed, conveyed the road and property pertaining thereto to the Pittsburgh, Fort Wayne & Chicago Railway Company. July 1, 1869, the road passed, with the lease of the Pittsburgh, Fort Wayne & Chicago Railway, into the hands of the Pennsylvania Railroad Company. November 4, 1869, the Pennsylvania Railroad Company and the Pittsburgh, Fort Wayne & Chicago Railway Company sold and transferred, by deed, to the Pittsburgh, Mount Vernon, Columbus & London Railroad Company, the entire Cleveland, Zanesville & Cincinnati Railroad, extending from Hudson, in Summit County, to the coal mines southwest of Millersburg, in Holmes County—a distance of sixty-five miles—with all its rolling stock, machinery and fixtures, for the consideration of 22,000 shares of fully paid-up capital stock of said Pittsburgh, Mount Vernon, Columbus & London Railroad Company, the par value of the same being \$1,100,000. December 1, 1869, Gen. Goshorn A. Jones, of Mount Vernon, was appointed Superintendent of the road, Col. Simon Perkins retiring. On the 20th day of December, 1869, by a decree of the Court of Common Pleas of Knox County, the name of the Pittsburgh, Mount Vernon, Columbus & London Railroad Company was changed to Cleveland, Mount Vernon & Delaware Railroad Company. Under the new management, measures were immediately taken, and vigorously prosecuted, to build the road through to its final destination, Delaware, but soon so far modified as to make Columbus, instead of Delaware, the southern terminus. The road was completed and the first passenger train from Hudson to Mount Vernon was run June 25, 1872, and, on the 23d day of November, 1873, the road was opened through to Columbus, regular trains commencing at that day and continuing to the present. Various causes having combined to prevent the road, though doing a fair business, from meeting its liabilities, the owners of the first mortgage bonds of the road, at the September term, 1880, of the Court of Common

Pleas of Summit County, commenced a suit for foreclosure and sale, Gen. G. A. Jones, by order of court, being appointed and qualified as Receiver September 27, 1880. At the present writing (April, 1881), there are strong hopes that the Receiver may be able to relieve the road of its embarrassments, the court having already ordered the building of about three miles of additional track to Fox Lake Coal Mines, the purchase of four new locomotives, four new passenger coaches and six miles of steel rails. The officers of the road, at the time of its transfer to the present company, were as follows: Directors, R. C. Hurd, Charles Cooper, S. Israel, Mount Vernon; M. White, of Gambier; I. Harpster, of Millersburg; William M. Orr, of Orrville; and Thomas D. Messler, of Pittsburgh, Penn.; President, R. C. Hurd; Secretary, J. S. Davis; Treasurer, J. D. Thompson; Auditor, E. Mize; Superintendent, G. A. Jones; Master Machinist, J. W. Holloway. Present officers of the road are as follows: Directors, Thomas D. Messler and William Shaw, of Pittsburgh; George B. Roberts, of Philadelphia; Hon. J. R. Swan, of Columbus; S. Israel and Charles Cooper, of Mount Vernon; William M. Orr, of Orrville; I. Harpster, of Millersburg; M. White, of Gambier; President, Thomas D. Messler; Superintendent, G. A. Jones; Auditor, E. Mize; Treasurer, J. D. Thompson; Secretary, J. S. Davis; Master Machinist, J. W. Holloway; General Freight and Ticket Agent, J. A. Tilton; Messrs. Mize, Thompson, Holloway and Tilton also acting in their respective positions, under the appointment of Receiver Jones; Messrs. Mize and Holloway having been connected with the road nearly, if not quite, from its first completion as the "Akron Branch."

The Massillon Branch.—As an adjunct to the Cleveland, Columbus & Delaware road, the Massillon & Cleveland Railroad (commonly called the Massillon Branch) was built by the Massillon & Cleveland Railroad Company, and runs from Clinton, in Summit County, to Massillon, in Stark County, a distance of some eight or ten miles, only. This road was leased to the Pittsburgh, Fort Wayne & Chicago Railway Company June 22, 1869; lease assigned by that company to the Pennsylvania Railroad Company July 1, 1869; and by that company and the Pittsburgh, Fort Wayne & Chicago Railway Company lease assigned to the Pittsburgh,

Mount Vernon, Columbus & London Railway Company (now Cleveland, Mount Vernon & Delaware Railroad Company), November 4, 1869. The road is owned by the Massillon & Cleveland Railroad Company, and is now (1881) operated by the Pennsylvania Railroad Company, operating the Pittsburgh, Fort Wayne & Chicago Railway. Both the Cleveland, Mount Vernon & Delaware, and the "Massillon Branch" run through some of the most prolific coal regions of the State, large shipments of coal and other minerals daily passing over their tracks.

Other Early Railroad Projects.—About the time the Cleveland & Pittsburgh and the Akron Branch were being projected and built, three other lines, centering in Hudson, were chartered and a commendable degree of progress made in their construction, viz.: The "Clinton Line," the "Clinton Line Extension," and the "Hudson & Painesville." As early as 1830, Col. De Witt Clinton, Jr., then of the United States Topographical Engineers, reconnoitered and recommended the construction of a railway from the Atlantic to Council Bluffs, on the Missouri River, on a route that would bring the territory now embraced in Summit County upon its line. To this end, a number of charters had been secured, companies organized and work commenced in the States of New York, Pennsylvania, Ohio, Indiana and Illinois, from 1840 to 1853, the several links, when completed, to be consolidated into one "grand continental line," to be designated "The American Central Railway," with the further plan in view of ultimately continuing the line through to the Pacific Coast.

The Clinton Line Railroad.—As one of the links of this great through line, in 1852, the "Clinton Line Railroad Company" was chartered and organized, so named in honor of the originator and promoter of the Erie Canal, the greatest topographical and civil engineering project of his time, De Witt Clinton. The most active and liberal promoters of this road were citizens of Hudson, with Prof. Henry N. Day as its President. The line extended from Hudson east to the Pennsylvania State line, a distance of fifty-five miles, running through Portage and Trumbull Counties, and connecting at the State line, in the Township of Kiasman, with the Venango Railroad, then under contract and in process of construction. The Pitts-

Charles Sumner

burgh & Erie, also, had the project in contemplation of building a branch road to connect with the Clinton line at Kinsman, thus giving the Clinton line the choice of two very desirable routes to the Atlantic seaboard.

The Clinton Line Extension.—In 1853, the Clinton Line Extension Railroad, from Hudson west to Tiffin, in Seneca County, was organized, with Prof. Henry N. Day, also, as its President, and Hon. Van R. Humphrey, of Hudson, as one of its directors. The distance from Hudson to Tiffin, by the line of this road, is about 94 miles. The Clinton Line Extension was to connect at Tiffin with the Tiffin & Fort Wayne Railroad, organized the same year, which road, in turn, was to connect at Fort Wayne with the Fort Wayne & Mississippi Railroad, organized in 1853, which road was, through short intermediate links, to connect with the Philadelphia, Fort Wayne & Platte River Air Line Railroad, chartered in 1853, under the laws of the State of Iowa, and extending from New Boston, on the Mississippi River, to Council Bluffs, on the Missouri River. At a convention of the officers of the several roads which were to form this great through line, held at Fort Wayne in December, 1855, President Day reported of the Clinton Line and the Clinton Line Extension as follows: "On the Clinton Line, forty per cent of the grading, masonry and bridging has been done; contracts have recently been closed for the completion of the road-bed not already under contract, and also for the superstructure and equipment of the road, to be finished in about a year. The company, about a month since, commenced an effort to increase the local cash subscription to its capital stock, which has been carried far enough to assure the entire success of the effort within a very few weeks. The estimated cost of the road, under the prices of the contracts, inclusive of equipments, station buildings, fencing, telegraph, interest and discounts, is \$1,700,000.

"The Clinton Line Extension Company commenced work on the heavier sections of the road (contiguous to the Cuyahoga River in Summit County), with a view to the completion of the entire road at the same time; after expending about \$70,000 on the eastern division, they were induced by the financial embarrassments of the time to confine their operations to the western division—from Tiffin about forty-one miles to New London, on the Cleveland, Co-

lumbus & Cincinnati Railroad—this division being of easier construction, and completing, in connection with other lines, a very promising line of itself to Cleveland. Contracts have recently been made for the completion of the entire road for operation—the western division in about one year, the eastern in a year afterward. The cost of the road is estimated, on the basis of the contract prices, at \$3,200,000, inclusive of equipments, station buildings, fencing, telegraph, interest and discounts."

The "effort to increase the local cash subscription to its capital stock" did not prove as successful as President Day anticipated, and other embarrassments falling upon the organizations, work was entirely suspended upon both lines early in 1856 and never resumed; the two promising enterprises falling through for want of the necessary funds to carry them forward to completion, bringing also disaster and financial embarrassment to many of the citizens of Hudson, and very seriously affecting, for the time being, the prosperity of the village itself.

The Hudson & Painesville Railroad.—In 1853, also, the Hudson & Painesville Railroad Company was chartered and organized, with Hon. Van R. Humphrey as its President. This road was intended to be a direct continuation of the Cleveland, Zanesville & Cincinnati Railroad to Lake Erie. To this enterprise, also, the people of Hudson, in common with those of Painesville and intermediate towns, subscribed liberally. Though a large portion of the grading and other work was completed, or nearly so, in the general financial stringency which caused the suspension of work upon the Clinton Line, and Clinton Line Extension, and collapsed the railroad enterprises of the country generally, the Hudson & Painesville had to succumb to the inevitable, and go into liquidation. This route, however, is still regarded with favor by many, and it is not improbable that within a few years, the "Hudson & Painesville Railroad" may become a fixed, if not profitable fact.

The Atlantic & Great Western Railway.—To Hon. Marvin Kent, of the enterprising village of Kent (then known as Franklin Mills), in the neighboring county of Portage, is mainly, if not solely, due the credit of projecting the Atlantic & Great Western Railroad, which has, for several years past, so largely engaged the attention of the railway, financial and legal magnates of both Europe and America. As early as 1850,

Mr. Kent, then, though comparatively a young man, quite an extensive mill owner and manufacturer of that village, moved thereto, perhaps by the fact that the management of the Cleveland & Pittsburgh road, then in process of construction, in getting from Ravenna to Hudson, had run its track some two and a half miles north of the village, conceived the idea of forming a direct through broad-gauge line from New York to St. Louis, a distance of nearly 1,200 miles, by connections with the New York & Erie, at Salamanca, and, through the Dayton & Hamilton, with the Ohio & Mississippi, at Cincinnati. Having carefully traced upon the map the route to be traversed, and duly considered the feasibility of the project, Mr. Kent set himself quietly but vigorously at work to perfect his plans for the accomplishment of his object. In order not to arouse the jealousy and opposition of competing lines, great caution and secrecy had to be observed, and considerable strategy employed. Confiding his plans to a few confidential advisers only, with a bill drafted by his own hand, Mr. Kent proceeded to Columbus, in the winter of 1850-51, where he secured the hearty co-operation of Hon. Milton Sutliff, State Senator from the Trumbull District, and Chairman of Committee on Railroads, through whose influence the modest bill, for the charter of a seemingly local road, under the modest title of the "Coal Hill Railroad"—quietly changed, previous to its final passage, to the still modest title of the "Franklin & Warren Railroad"—as written by Mr. Kent, was passed March 10, 1851, as follows:

AN ACT TO INCORPORATE THE FRANKLIN & WARREN RAILROAD COMPANY.

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio:* That Thomas Earl, Zenas Kent, O. L. Drake, A. V. Horr, Cyrus Prentiss and Marvin Kent, of the county of Portage; Simon Perkins, Lucius V. Bierce, Harvey B. Spelman and Daniel Upson, of Summit County, and Charles Smith, Frederick Kinsman, Jacob Perkins, C. G. Sutliff and Rufus P. Ramey, of the county of Trumbull, and their associates, successors and assigns, be, and they are hereby created a body corporate and politic, by the name and style of the Franklin & Warren Railroad Company, with perpetual succession; and by that name and style shall be entitled to have and enjoy, and are hereby invested with all the rights, privileges and franchises, and be subject to all the restrictions of the act entitled "An Act Regulating Railroad Companies," passed February 11, 1848, and the act amendatory thereto, except so far as the same may be modified or changed by this act.

SEC. 2. The capital stock of this company may be any amount not exceeding two millions of dollars, and said company shall have power to construct a railroad from the village of Franklin, in the county of Portage, to Warren, in the county of Trumbull, and from thence to the east line of Ohio, and may continue the same from its place of beginning, in a westerly or southwesterly direction, to connect with any other railroad within this State, which the directors of said company may deem advisable.

SEC. 3. That said company shall be, and is hereby authorized to connect with any other railroad company, and to consolidate its capital stock with the capital stock of such company, upon terms to be agreed upon between the said companies, and to have and use the name and style of such other company, and constitute a part of the same; and any other company may, in like manner, connect with, and become a part of, the company hereby incorporated.

SEC. 4. Said company shall have power to mortgage, or in any other way create a lien in favor of any person or persons or company, for materials, labor, or other thing necessary for said road; and said company shall be authorized to sell its own or other corporate bonds at such rate of discount as they may deem proper to further the objects of said company, and said bonds may bear such rate of interest as said company may deem advisable, and said bonds may be sold in or out of the State, which sales shall be valid.

SEC. 5. Said company may, and they are hereby authorized to, commence and complete any part of said railroad from the place of beginning to any point on the route which the interests of said company may require, and to employ and use said part constructed, and to demand and receive suitable rates of toll for the transportation of persons and property thereon, according to the provisions of the charter of said company, as fully as if the entire work were completed and in operation; and as soon as twenty thousand dollars shall have been subscribed to the stock of said company, the persons named in the first section, or any five of them, shall call a meeting of the stockholders for the election of directors for the government of said company.

SEC. 6. That the track of the railroad hereby authorized to be constructed, may be made of such width as may be necessary to conform to the width of any railroad with which it may connect.

JOHN F. MORSE,

Speaker of the House of Representatives.

CHARLES C. CONVERS,

Speaker of the Senate.

March 10, 1851.

This remarkably liberal charter having been secured, Mr. Kent immediately addressed himself to the task of working up an interest in the project, and procuring subscriptions to the capital stock of the road. His progress was at first very slow, Mr. Kent himself finally subscribing the entire \$20,000 named in the charter as a prerequisite to its organization, and pledging himself to a number of other gentle-

men, whom he induced to take a sufficient number of shares to make up the proper complement of directors and officers, to take the stock off their hands if the venture should prove unsatisfactory or unsuccessful. Thus the organization of the Franklin & Warren Railroad Company was perfected on the 19th day of June, 1851, at which time Zenas Kent, Sylvester Huggins, Frederick Whipple and Marvin Kent, of Franklin; L. J. Iddings, of Warren; Daniel Upson, of Tallmadge, and William Porter, of Milton, Ohio, were elected Directors. At a meeting of the Directors, held July 8, 1851, Marvin Kent was chosen President; Joel W. Tyler, Secretary, and Sylvester Huggins, Treasurer.

In his first report made to the stockholders of the new road, at a meeting held at Franklin, July 19, 1853, President Kent said: "In its earlier operations, delays were interposed to the commencement of the work by the policy of a neighboring State, which, apparently, presented a hostile attitude to its advancement, and somewhat embarrassed the operations of its Directors. Fortunately, these embarrassments have been removed, and the company is placed in that position which insures a speedy completion of the great end it has in view. The second year of its existence opened a new era in its prospects. The general interests of the country require a great Eastern and Western railway communication, and the idea of a continuous route from the Atlantic to the Pacific shores, took possession of the public mind. Our enterprise, gentlemen, is no less than a link (and an important one) in this great chain of inter-communication. * * * At present, the board proposes to locate the road from a point in the eastern line of the State of Ohio, northeast of Warren, in Trumbull County, to Dayton, * * * passing through and securing the trade and traffic of all the most important business points in thirteen of the most productive counties in the State. * * * The town of Akron alone, manufactured, during the past season, 180,000 barrels of flour for shipment. During the same period, fifty thousand barrels were manufactured at the village of Franklin. With this new means of transit during the winter months, and the increasing prosperity of the country, the quantity would undoubtedly be increased 100 per cent. * * * As for the through passenger business, it embraces

the East and the Great West, and your road may therefore be emphatically denominated the Atlantic & Great Western Railway."

In accordance with this hint, by due legal process, the name of the corporation was changed from the Franklin & Warren, to the Atlantic & Great Western Railroad Company, during the year 1854. In December of the same year, the capital stock of the company was increased from \$2,000,000 to \$4,000,000. In the meantime, parties interested in the success of the enterprise, being unable to secure from the Pennsylvania Legislature a direct charter for the intermediate connecting link through that State, bought, for \$400,000, the existing charter and franchises of the Pittsburgh & Erie road, having sufficient branching powers to enable them to span the State, and connect with the Ohio branch upon the West, and the New York branch upon the East. Subsequently, such legislative action was had in the States of Pennsylvania and New York, as to authorize the organization of a company in each State, under the same title as in Ohio, with a separate Board of Directors for each, the three companies uniting under the general title of the Atlantic & Great Western Railway Company, with a Central Board of Directors, President, Secretary and Treasurer, with its headquarters at Meadville, Penn. The Ohio Board was represented in the Central Board by Marvin Kent and Dr. W. S. Streater. Large local subscriptions were worked up through the efforts of President Kent, Secretary Earl and others of Franklin; John H. Chamberlin, Jacob Allen and others of Akron, and Dr. Daniel Upson and others of Tallmadge (Akron and Summit County furnishing their full quota, \$100,000), and work was commenced by the contractor, Mr. Henry Doolittle, on the Ohio Division, at Franklin Mills, July 4, 1853, President Marvin Kent removing the first earth. Mr. Doolittle's contract embraced the entire Ohio division, from the Pennsylvania State line to Dayton, a distance of 240 miles, and amounted to nearly \$7,000,000 (\$1,000,000 of which was to be paid in stock), the largest contract which, up to that time, had ever been taken by one man, either in America or Europe. Grading and other work was pretty evenly distributed in the several counties from the State line to Dayton, one of the conditions of the subscription being that the money should be expended in the counties where raised. Con-

siderable progress was made all along the line in 1853 and 1854 ; but, like most contemporaneous railroad enterprises, it was beset with such serious financial embarrassments that work was practically suspended in 1855, though, not entirely stopped until 1858. Meanwhile, however, the organization was kept intact, and its plucky President, and the faithful few who manfully stood by him, in both Portage and Summit Counties, relaxed not one jot or tittle of their zeal, their persevering efforts being rewarded by the enlistment of James McHenry, Esq., of London, and other capitalists in London, Paris and Madrid, in the enterprise, Mr. McHenry contracting in March, 1861, to complete the entire line from Salamanca, N. Y., to Dayton, Ohio, the original contractor, Mr. Henry Doolittle, having in the meantime deceased. Though the contract stipulated that work should be resumed in June, 1861, owing to the breaking-out of the civil war in the United States, and the complications with foreign nations, temporarily resulting therefrom, no great progress was made until the spring of 1862. The work was done under the immediate personal supervision of Chief Engineer, Thomas W. Kennard, of London, England, and was pushed through so energetically that the palace car of Engineer Kennard, with the officers and Directors of the road, drove into Akron on the 17th day of April, 1863, to the great delight of our entire populace.

Of this event, the *Beacon* of April 23, 1863, says : "As we stated in our last issue that this grand enterprise was to be completed to this place during the last week, without fail, we are now happy to state that the track was completed to within a few rods of the Cleveland, Zanesville & Cincinnati Company's depot, on Saturday evening last. On Friday afternoon, according to announcement, Chief Engineer Kennard arrived within the limits of the corporation, direct from New York, with his magnificent passenger car and engine, accompanied by several gentlemen from Warren, Ravenna and other points along the road. Their advent into town was greeted by the liveliest enthusiasm of our people, expressed through the soul-stirring music of our most excellent band, and by a general visit to the 'pioneer train' and the track-laying operations just around the bend."

Owing to the enhanced cost of labor and materials—incident to the war—the capital stock

of the company was found, even with the large amount of bonds it was authorized to issue, to be altogether inadequate to the finishing and furnishing of the road, and on the 5th day of November, 1863, at a stock-holders' meeting called for that purpose, it was voted to increase the stock from \$4,000,000 to \$6,000,000. Under the vigorous management of Engineer Kennard, the road was pushed through to Dayton, and its completion to that, its Western terminal point, was duly celebrated on the 21st day of June, 1864, in the presence of a large company of railroad magnates of both the East and the West. From the long and full report of the proceedings, published in the *Dayton Journal* of June 22, 1864, we give the following interesting items : "President Kent announced the object of the meeting, and T. W. Kennard, Chief Engineer ; William Reynolds, President of the New York & Pennsylvania Divisions ; H. F. Sweetser, General Superintendent, and Mr. Kent, proceeded to lay the last rails. The ceremony of spiking was introduced with considerable merriment, Mr. Kennard driving the first spike in the last rail at four sturdy blows. Others followed in succession, one only—an Irish track-layer—excelling Mr. Kennard, by making the drive with one less blow, besides President Kent, who, in driving the last spike, with a nery grasp, struck straight—one, two, three, and the welkin rang with applause. The work was well done—and the last rail of the Atlantic & Great Western Railway was laid, the last spike driven to the head."

Thus, after many delays, trials and tribulations, was completed one of the finest lines of railway in the United States, and one which, though financially disastrous to a majority of its earliest promoters and supporters, has been of incalculable benefit to the entire section of country through which it passes—especially to the people of Summit County and its wide-awake capital city. Space will not permit a detailed history of this road from the time of its completion, in 1864, to the present time. Suffice it to say, that, by reason of unforeseen complications—largely, no doubt, growing out of the several branches built, purchased, leased, etc., as tributaries and extensions, together with the franchises, fixtures, property and liabilities connected therewith—though always doing a heavy freight and passenger business, such embarrassments were experienced that on the 7th

day of April, 1869, suit, in foreclosure of the consolidated mortgage, was begun in the Summit County Court of Common Pleas, at which time Jay Gould and William Archibald O. Daugherty, of New York, were appointed Receivers. It afterward transpiring that those gentlemen were either ineligible by reason of their location, or were unsatisfactory to other parties in interest, their resignation was filed on the 26th day of November, 1869, and Hon. Reuben Hitchcock, of Painesville, Lake County, Ohio, was appointed Receiver of the road. The affairs of the road were most admirably managed by Judge Hitchcock, until the 26th day of July, 1871, when it was sold by the Receiver, acting as Special Master Commissioner, under a decree of the court, at the door of the court house, in Akron, to Gen. George B. McClellan, Senator Allen G. Thurman and William Butler Duncan, Esq., as Trustees for certain creditors of the company, the purchasers organizing under the name and style of the Atlantic & Great Western Railroad Company, as distinguished from its predecessor, the Atlantic & Great Western Railway Company. The price paid for the road was as follows: Ohio Division, subject to the lien of the first mortgage thereon (about \$2,400,000) including the lease of its Mahoning Branch, sold for \$4,435,500; Pennsylvania Division, with its various branches, \$600,000; New York Division, \$655,000; total, \$5,690,000. The new company did not, however, long enjoy smooth sailing, new suits, with almost infinite complications, being commenced, also in the Court of Common Pleas, of Summit County, on the 18th day of December, 1874, the President of the road, Mr. John H. Devereux, being appointed Receiver. The litigation in this second suit extended over a period of more than five years, and was probably the most complicated and closely contested railroad suit ever tried and determined in the United States, many millions of dollars being involved, and the most eminent legal talent of both Europe and America being employed by the various parties in interest. In these two suits, at different stages in the proceedings, arguments were made before Judges Washington W. Boynton, Samuel W. McClure and Newell D. Tibbals, by Hon. Samuel J. Tilden and W. W. McFarland, Esq., of New York; Hon. Morrison R. Waite (late Chief Justice of the Supreme Court of the United States);

Hon. Stanley Mathews and Hon. George Hoadley, of Cincinnati; Hon. Rufus P. Ranney, Hon. Stephenson Burke and James M. Adams, Esq., of Cleveland, and other distinguished attorneys from abroad, important interests being represented in the two suits by Hon. William H. Upson, Tibbals & McKinney, Oviatt & Allen, and other members of the Summit County bar.

On the final determination of the matters in issue, the road was again sold by Receiver Devereux, acting as Special Master Commissioner, at the door of the court house in Akron, on the 6th day of January, 1880, for \$6,000,000, to S. A. Strang and R. G. Rolsten, as trustees for a new organization, composed principally of the foreign bondholders of the road, the name and style of the new organization being "The New York, Pennsylvania & Ohio Railroad Company." Since the transfer of the road to its new management, the track of the road has been reduced from six feet to the standard gauge of four feet eight and one-half inches, the rolling stock, of course, having been correspondingly changed. The old complications and embarrassments of the road having been thus cleared away, and the financial and commercial embarrassments of the country having also disappeared, it is to be hoped that this road, notwithstanding the heavy liabilities assumed by the new company on becoming the purchasers thereof, may, in common with all other lines of railway passing through Summit County, enjoy long years of uninterrupted prosperity. We have not the data at hand to give the names of all the citizens of Summit County who have held official relations with this road, but, in the published reports before us, we find among the names of the different boards of directors the names of Daniel Upson, of Tallmadge, and Jacob Allen, Lucius V. Bierce, John H. Chamberlin and William H. Upson, of Akron. July 1, 1863, Mr. Upson was appointed attorney for the road, at a meeting of the directors, at which time the company executed to him a deed, in trust, of the Ohio division of the road, for the purpose of securing a loan of \$4,000,000, with which to finish and equip the road. Mr. Upson's relations to the road as its attorney, at that time, existed only about a year and a half; but he was again appointed in 1873, and has ever since acted in that capacity, and still holds that relation to

the new organization, the New York, Pennsylvania & Ohio Railroad Company.

The Baltimore & Ohio Extension.—In the spring of 1870, a proposition was made to extend the Baltimore & Ohio Railroad, and its intermediate connection, the Pittsburgh & Connellsville Railroad, westward from Pittsburgh to Chicago, and to make Akron, in Summit County, a point upon the line on certain conditions, which are fully set forth in the subscription books opened in Akron in the summer of that year, as follows :

Whereas, the Baltimore & Ohio Railroad Company, and the Pittsburgh & Connellsville Railroad Company propose to construct a railroad from Pittsburgh, Penn., westward through Akron, Summit County, Ohio, and to secure the location of said road through Akron, it is necessary for the citizens of Akron to subscribe to the stock of such proposed railroad company, the sum of \$300,000, and, for certain persons, on behalf of the subscribers, prior to the incorporation of said proposed company, to pledge to said Baltimore & Ohio and Pittsburgh & Connellsville Companies said sum of \$300,000, to aid them in locating and constructing said proposed railroad through Akron, aforesaid. Therefore, we, the subscribers, on the succeeding pages of this book, for the purpose of authorizing David L. King, Lewis Miller and Charles Brown, to pledge and guarantee to said Baltimore & Ohio and Pittsburgh & Connellsville Railroad Companies, said sum of \$300,000, and to save them harmless, by reason of said pledge and guarantee, and for the further purpose and consideration of securing the location of said proposed railroad through Akron for our mutual benefit, we do agree with said David L. King, Lewis Miller and Charles Brown, and with each other, to subscribe to the stock of said company, when organized, under whatever name the same may be incorporated, and to pay the several amounts by us here respectively subscribed, on the succeeding pages of this book, to such company or persons as may be legally authorized to receive the same, payable 10 per cent when said railroad is located through Akron, and the stock-books of said proposed railroad are legally opened, and the balance in monthly installments of 5 per cent each, as the work progresses in Summit County. And we authorize said King, Miller and Brown, to pledge to said Baltimore & Ohio and Pittsburgh & Connellsville Railroad Companies, or either of them, said sum of \$300,000 for the purpose aforesaid, and to the extent of our respective subscriptions we severally agree to save them harmless from the payment of said sum. And we hereby authorize the corporators of said proposed company, when duly incorporated, under whatsoever name, when said road is located through Akron, to transfer to the stock-books of said company, when opened, our respective subscriptions here made, and agree that they shall have the same force and effect as if said company was now incorporated, and said amounts

respectively signed and entered by us in said stock-books, after they were formally opened by the corporators of said company for that purpose.

Through public meetings and personal solicitation on the part of Messrs. King, Miller, Brown and others, the full amount, \$300,000, with a sufficient margin to cover contingencies, was speedily subscribed by the enterprising citizens of Akron, all classes, from the largest manufacturer, merchant, banker, etc., to the humblest mechanic and laboring man, contributing to the guarantee fund in proportion to his several ability. Then came long days of waiting, expectation and suspense, until, finally, in the spring of 1871, for reasons never satisfactorily explained to its Akron promoters, the project was indefinitely postponed, leaving the subscribers to the above document free to transfer their subscriptions to such new railroad projects as they might deem advisable.

The Valley Railway.—To David L. King, Esq., are the people of Summit County more largely indebted for the inception, prosecution and completion of the Valley Railway, running diagonally through our county, from northwest to southeast, than to any other man. As early as 1869, largely through the instrumentality of Mr. King, a charter was obtained for the Akron & Canton Railway, which afterward developed into the larger and more important enterprise, the Valley Railway, duly incorporated on the 21st day of August, 1871, the incorporators being Henry Chisholm, Nathan P. Payne, James Farmer, Warwick Price and S. A. Fuller, of Cleveland, and David L. King, of Akron. The authorized capital stock of the company was \$3,000,000, the road to run from Cleveland, in Cuyahoga County, via Akron, in Summit County, Canton, in Stark County, through Tuscarawas and Carroll Counties to Bowerston, in Harrison County, on the Pan Handle Railroad. The first great movement for the promotion of the enterprise was made at a meeting held at the Academy of Music, in Akron, on the 4th day of January, 1872. Representatives from Cleveland, Canton, Wheeling and intermediate points on the contemplated route were in attendance, together with a very large number of business men of Akron and other towns in Summit County. The meeting was presided over by James A. Saxton, Esq., of Canton, with Mr. R. H. Cochran, of Wheeling, as Secretary, and Hon. Stephen H. Pitkin, of Akron, as Assistant Secre-

retary. David L. King, Esq., of Akron, briefly stated the objects of the meeting, saying that the project of a road down the valley of the Cuyahoga, from Akron to Cleveland, and south from Akron to Canton and Wheeling, was no new project. Such a road, Mr. King said, would develop large quantities of coal and other minerals south of Akron, and a locomotive, after drawing an ordinary train to Akron, could by reason of continuous down grade, draw as many loaded cars from Akron to Cleveland, as the same locomotive could draw empty cars back. Mr. King concluded his remarks by moving the appointment of committeemen at different points on the route to aid in raising the necessary stock. Committeemen for Summit County were appointed as follows: Northfield, Lucian Bliss; Boston, Frederick Wood, Frederick B. Wadhams, John Douds; Richfield, Orson M. Oviatt, William C. Weld; Bath, William Barker, Andrew Hale; Northampton, James R. Brown, William Hardy, John C. Johnston; Portage, S. W. Miller; Akron, Jacob H. Wise; Middlebury, Thomas H. Peckham; Coventry, Alexander Brewster; Springfield, Cyrus Yerrick, Robert V. Sawyer, Frank W. Myers; Green, Alexander Johnston. Speeches were made by Messrs. Newell D. Tibbals, Alvin C. Voris, Charles Brown, Stephen H. Pitkin, Lewis Miller, David L. King and others, of Akron; James Farmer, of Cleveland; R. H. Cochran of Wheeling; James A. Saxton and Josiah Hartzell, of Canton, and William McNeil, of Peninsula. The importance and feasibility of the road was conceded by all, the discussion being mainly over the question of gauge, estimates being presented showing the comparative cost of both the standard, four feet eight and one-half inches, and the narrow, three feet tracks. At the conclusion of the discussion, the following resolution was unanimously adopted:

Resolved, That it be the sense of this meeting that all our efforts be devoted to raising stock for the ordinary four-foot eight and one-half inch gauge.

Subscription books were opened at Cleveland, Akron, Canton and intermediate points on the 15th day of January, 1872, and a vigorous campaign opened "all along the line," for raising the necessary funds to build the road. Cleveland parties were pledged to raise \$500,000, the quota assigned to Akron and Canton being \$150,000 each, with such additional amounts as could be raised at intermediate points in the

several counties interested. Meetings were held, speeches were made and subscriptions were obtained with commendable celerity, so that by the 20th of March, \$60,000 of Akron's quota had been subscribed. Canton was the first to announce that her full share was raised, Akron coming in soon afterward with a similar good report. Cleveland, however, was backward, trusting to the plan of raising the requisite amount, under the Boesel law, by a tax upon the city. The proposition, however, was voted down, precious time being thus wasted, though the amount pledged was subsequently raised by voluntary subscriptions to the capital stock of the company through the vigorous efforts of her soliciting committees. Other localities also subscribed more or less liberally, so that the total amount subscribed in each of the three counties was as follows: Cuyahoga, \$508,250; Summit, \$191,700; Stark, \$149,750. The first stockholders' meeting was held April 24, 1872, at which James Farmer, Ambrose B. Stone and Nathan P. Payne, of Cleveland; David L. King and John F. Seiberling, of Akron, and James A. Saxton and George Cook, of Canton, were elected Directors. At a subsequent meeting of the Directors the same day, James Farmer was elected President; David L. King, Vice President, and Warwick Price, Secretary and Treasurer. At a meeting of the Directors, held May 10, 1872; Plymouth H. Dudley, then Akron's most efficient City Engineer, was appointed Chief Engineer for the new road. Two routes from Akron to Cleveland were surveyed, one directly down the valley of the Cuyahoga River, the other "overland," through Bath, Richfield, Brecksville, etc., liberal subscriptions being pledged along the latter route, should the location be determined in their favor. The valley route was finally adopted, and the contract for building the entire line from Cleveland to Bowerstown was awarded to Messrs. Nicholas E. Vansickle and Arthur L. Conger, of Akron, on the 3d day of February, 1873.

At a meeting of the stockholders, April 16, 1873, David L. King and John F. Seiberling were chosen as Summit County's representatives in the Board of Directors, Mr. King being continued as Vice President and Mr. Dudley as Chief Engineer, Stillman Witt, of Cleveland, being elected President. Ground was broken in Springfield Township, Summit County, early in March, 1873. The contractors immediately

went vigorously to work, the result of the first four months' operations being thus tersely stated by Engineer Dudley, in his report of the progress of construction made to the Directors on the 15th day of August, 1873, as follows: "On the line between Cleveland and Canton, a distance of fifty-seven miles, the graduation was commenced last March; but on account of the wet weather in April and May, and other causes, has not proceeded as fast as could be desired. All the bridges are under contract, and part of them up. I am, however, pleased to say that nearly two-thirds of the distance from Cleveland to Canton is graded, and, should the weather continue favorable, I see no reason to prevent the completion of the remainder, ready to commence laying track in October. This would give you the use of the road most of the coming winter, which would be an advantage you no doubt fully appreciate."

The Engineer's anticipations, however, were not realized, and the winter of 1873-74 set in without witnessing the laying of the track or the completion of the grading, bridging, etc. On the 24th day of April, 1874, Hon. Reuben Hitchcock, of Painesville, Lake County, was elected President, Mr. King being continued as Vice President and Mr. Dudley as Engineer. Owing to differences of opinion between the Directors and the contractors, Messrs. Vansickle and Conger, the contract was canceled and the work suspended on the 16th day of May, 1874. President Hitchcock, on account of failing health, having tendered his resignation, David L. King, of Akron, was elected President on the 25th day of September, 1874, with James Farmer, of Cleveland, as Vice President. The general stagnation of business, and especially of all new railroad enterprises, growing out of the panic of September, 1873, with the failure of Jay Cooke & Co., having rendered the immediate resumption of work impossible, the Directors, as a condition precedent to Mr. King's acceptance of the Presidency, individually assumed the entire liabilities of the company, which, owing to inability to collect stock subscriptions, amounted to over \$150,000—a burden from which the devoted Directors were not relieved until April, 1879. But, by the self-sacrificing assumption of this responsibility, the life of the company was saved through the long period of financial distress the country was then experiencing. Failing,

through the stringency of the times, to secure aid in this country to complete the road, at the earnest solicitation of the board, Mr. King sailed for England, on the 6th day of February, 1875, to present the advantages of the investment to the capitalists of London. After weeks of patient effort, struggle and disappointment, he finally succeeded in securing a proposition for the sale of the company's bonds on highly advantageous terms, and a time was fixed for the execution of the contract. On the morning of the day agreed upon for closing the matter up, the publication, in the London papers, of the report of a committee of the House of Commons, discrediting the value of American securities in general, and railroad securities in particular, together with a cable dispatch received from New York, published in the same papers, that the Wabash & Western Railroad (a very large amount of the bonds of this road being held in London) had passed into the hands of a Receiver, presented so discouraging a prospect for the placing of American securities of any kind, as to cause the withdrawal of the proposition and the non-execution of the contract. By the advice of the parties with whom he had been in negotiation, Mr. King returned home without having accomplished the object of his mission, to "await the logic of events," as it was considered damaging to future sales, on the return of prosperity at home, to urge the bonds of the company further upon the attention of English capitalists at that time. The merits of the line were, from time to time, brought by President King before the capitalists of Cleveland and the East, and a succession of struggles to keep the enterprise alive were continued for three weary years longer, happily resulting in placing the bonds on highly favorable terms at home with Cleveland and New York capitalists, the capital stock having in the meantime (April 13, 1876) been increased from \$3,000,000 to \$6,500,000. On the 7th day of August, 1878, the work on the line between Cleveland and Canton was resumed by the new contractors, Messrs. Walsh and Moynahan, the first rail upon the line being laid and the first spike driven by President King, at Akron, at a point near the "Old Forge," at 12 o'clock, M., on the 26th day of October, 1878, track-laying being immediately proceeded with from this point both ways, and also commenced in Cleveland a few days there-

after. The operations of the new contractors not proving satisfactory to the company, the contract with them was annulled on the 25th day of January, 1879, and the work again temporarily suspended. Subsequently, a new contract was made with Messrs. Strong and Cary, and work resumed on the 3d day of June, 1879. The road was finally completed through from Cleveland to Canton, in the winter of 1879-80. The first continuous train from Cleveland to Canton, with the officers, Directors, and other friends and promoters of the road on board, started from Cleveland at 9:30 A. M., January 28, 1880. Making short stops at the several stations on the route, the train arrived at Canton about 1 o'clock, P. M. Starting from Canton on the return trip at 3 o'clock, P. M., the run from Canton to Akron, twenty-two miles, was made in thirty-eight minutes, the entire trip from Canton to Cleveland, fifty-seven miles, being made in two hours—a remarkable run, considering the newness of the road, and evincing a very excellent degree of work in the laying of the track and the ballasting of the road-bed. The first regular trains commenced running February 2, 1880, and have continued uninterruptedly to the present time, with constantly increasing freight and passenger traffic, and though, by reason of the partial occupation of the ground by other similar enterprises and prospective connections, the extension of the road beyond Canton has been indefinitely postponed, the Valley Railway may well be considered a successful venture for its promoters, and a very valuable acquisition to the travel and transportation facilities of the people all along the line, as well as a material addition to the enterprise and prosperity of the city of Akron, and of Summit County generally.

Officers of the road from the beginning to the present date (April 1, 1881), as follows: President—James Farmer, from April 24, 1872, to April 5, 1873; Stillman Witt, from April 15, 1873, to April 24, 1874; Reuben Hitchcock, April 24, 1874, to September 25, 1874; David L. King, September 24, 1874, to April 16, 1879; J. H. Wade, April 16, 1879, to date. Vice President—David L. King, from April 24, 1872, to September 25, 1874; James Farmer, September 25, 1874, to April 16, 1879; S. T. Everett, from April 16, 1879, to date. Treasurer and Secretary—Warwick Price, from April 24,

1872, to April 15, 1873. Treasurer—S. T. Everett, from April 20, 1873, to date. Secretary—S. T. Everett, from April 20, 1873, to May 13, 1873. Secretary and Auditor—L. D. Clarke, from May 13, 1873, to April 17, 1878; William B. Porter, from April 17 to date. Superintendent—Sam Briggs, from November 1, 1879, to date. Present Board of Directors—J. H. Wade, H. B. Payne, John Tod, W. J. Boardman and L. M. Coe, of Cleveland; David L. King, of Akron; L. V. Bockius, of Canton; and H. M. Flagler, of New York.

The Tuscarawas Valley Railroad.—This road, a comparatively new enterprise, running from Lake Erie, at Black River, in Lorain County, to Bridgeport, opposite Wheeling, W. Va., on the Ohio River, via Grafton, in Lorain County; Medina and Seville, in Medina County; Clinton, in Summit County; Massillon, in Stark County; New Philadelphia and Urichville, in Tuscarawas County; passes through about three-fourths of a mile of the township of Franklin, in Summit County, having a station at its junction with the Cleveland, Mount Vernon & Columbus road, called Warwick, a short distance south of the village of Clinton. This road is 157½ miles in length, and is one of the principal coal roads of the State, and beneficial to the people of Summit County in reaching sundry points between Akron and Wheeling, and in the shipment of coal and other articles to points west of Cleveland on the lakes.

The Connotton Valley Railway.—The latest accession to the railroad system of Summit County is the Connotton Valley Railway. It is strictly a narrow-gauge road (three feet) and though intended more especially for the transportation of coal, its complement of rolling-stock embraces an adequate supply of box freight cars, and elegantly finished and furnished passenger coaches. The southern terminus of the road is at Bowerstown, on the Pan Handle road, in Harrison County, and its northern terminus, the city of Cleveland. The line passes through Carrollton, in Carroll County; Canton in Stark County; Mogadore, in Summit and Portage Counties; Kent and Streetsboro, in Portage County; Twinsburg, in Summit County, and Bedford and Newburg in Cuyahoga County. The capital stock of the company is \$3,000,000, the funds being furnished mainly by Boston capitalists, though a majority of the directors

and officers are residents of Ohio. The present officers of the road are as follows: William J. Rotch, of New Bedford, Mass., President; Samuel Allen, of Del Roy, Carroll County, Vice President; A. B. Proal, of Canton, Stark County, Secretary and Treasurer; W. N. Moffett, formerly of the Pittsburgh, Fort Wayne & Chicago Railroad, Superintendent, and Robert Leamouth, formerly of the Pan Handle road, Roadmaster. The machine and repair shops, and the general offices of the company, are located at Canton. The entire length of the road is 118 miles, sixty-two miles of which is now (April, 1881) in running order, being completed as far north as Mogadore, and as far south as Del Roy, in Carroll County, and it is expected that cars will be running over the entire line by July of the present year. This road passes through from sixteen to twenty miles of valuable coal fields, fine beds of iron ore, potters' clay, building-stone, etc., besides having on its line some of the most enterprising manufacturing cities and villages in Northern Ohio. At Mogadore, the road passes on the Portage County side of the village, but strikes into Summit County for a short distance, in circling around a hill just north of the village, thence bearing north-easterly to reach the village of Kent, and thence, in a northerly and northwesterly direction, again strikes into Summit County on the east line of Twinsburg Township, running diagonally across the township, and passing the village about one-fourth of a mile east of the public square. The Connotton Valley will prove especially valuable to the people of Mogadore, in furnishing them an inlet for the large quantities of coal which they consume yearly, and an outlet for the immense quantities of stoneware which they yearly manufacture, which has hitherto required a haul of eight miles, over (at times) the very muddiest kind of mud roads, to the nearest railroad shipping-point, Akron. The road will also give the people of Twinsburg facilities, not hitherto enjoyed, in reaching a market with their dairy products,

and the invaluable building stone so abundant in that township, and in obtaining their needed supplies from Cleveland and other portions of the outside world.

The Pittsburgh, Youngstown & Chicago Railroad.—This road was projected early in 1881, by Chauncey H. Andrews, Esq., and other wealthy men of Youngstown, with other outside backing. The company fully organized March 18, 1881, with Mr. Andrews as President, when \$1,500,000 of the \$2,000,000 authorized capital was reported to be subscribed. The plan is to build the road from Pittsburgh, through Youngstown and Akron, direct to Chicago, the line, as surveyed, to enter Summit County at Mogadore, and, passing down the valley of the Little Cuyahoga River, entering Akron via the Sixth Ward upon the east, and Wolf Ledge Valley in the south part of the city. Though not yet actually commenced, there is at this writing (April 1, 1881), great confidence in railroad and business circles that this road will soon be put under contract and speedily constructed. Other important railroad projects, to pass through Summit County when built, are being talked up, but for the time being held in abeyance. Without our railroads, where would Akron, nay, where would Summit County have been to-day? Not a manufacturing establishment, other than our water-power mills, limited to some half-dozen in number—with diminished usefulness at that, by reason of a lack of speedy transportation facilities—would exist among us, and, instead of a city of 17,000 population, Akron would have been the mere village of 2,000 inhabitants that it was thirty years ago, if, indeed, it had not retrograded in the meantime for want of proper communication with the outside world. So, too, with the county at large—farming lands, instead of being worth from \$75 to \$300 per acre, as they now are, would have remained, like those of the other non-railroad-penetrating counties of the State, at from \$25 to \$60 per acre.

CHAPTER VI.*

THE PROFESSIONS—LEGAL LORE IN THE PIONEER DAYS—GREGORY POWERS—OTHER EARLY LAWYERS—THE PRESENT SUMMIT COUNTY BAR—MEDICAL—PIONEER PHYSICIANS—DIFFERENT SYSTEMS—MEDICAL SOCIETIES, ETC.

THE history of the County would not be considered complete, without a sketch of the professions—legal and medical.

The following on the Summit County bar is by Judge Carpenter, and is as follows:—[ED.]

In the summer of 1832, the writer, a stranger in Ohio, alert for information touching its people, laws, soil, products and topography, took the mail coach at Ravenna for Hudson. There was sitting on the back seat a man whose look would have taken his attention anywhere. A green bag filled with books lay by his side. He was considerably under thirty, tall and slim, but with limbs and contour so round and trim as to suggest an embodiment of muscular vigor, agility and toughness. His dress was simple but fitted with faultless neatness to his elegant figure.

Conversation began at once. The writer's various questions were answered with a precision which evinced a thorough acquaintance with Ohio, its public interests, its heterogeneous inhabitants, their different habits and peculiarities. Unquestionably that fellow-passenger was a man of keen observation. But his easy flow of intelligence bore not the slightest show of vanity or ostentation. His mastery of language, the complete finish of every sentence, his faultless pronunciation and the grammatical accuracy and purity of his English, might mark him for a college professor. On reaching Stow Corners, he took the road to Middlebury on foot, green bag in hand.

When the writer returned to Ravenna he inquired of Mr. Coolman, the hotel keeper, the name of his fellow-passenger, remarking that he had been very pleasantly entertained by him, and had set him down as a man of mark who had traveled considerably with his eyes and ears wide open. Mr. Coolman, who

was himself an invaluable treasury of what open eyes and ears could gather up, smiled at the remark and replied: "That gentleman, sir, is Gregory Powers. He is becoming a very distinguished lawyer, and is, in truth, a rising man; but as to his traveling, he was born and brought up here in the woods, and I doubt whether he was ever out of Ohio." It is true that he had then seen little of the world outside of Ohio; and that his acquaintance had rarely extended beyond the Western Reserve.

In his profession, Mr. Powers was not a voluminous reader. His library was not at all extensive, and his reading was mostly elementary. His practice at the bar was earnest, grave, strictly honorable and always courteous. Advocates had not in those days acquired the art of inspiring jurors by blowing in their faces. They stood at a distance of six or eight yards from the jury-box, and maintained a manliness of deportment superior to the more recent practice.

But it was not oratory that most distinguished the forensic efforts of Mr. Powers. It was his ability by quick and clear analysis to disentangle the most covert and complex transactions among men, and follow them to their legal consequences. And it was matter of curious observation to a listener that his high tension of voice and feeling was more frequent and intense in his arguments to the court on some abstract point of law, than in unraveling facts to the jury. In the latter case, his highest ascents of voice and manner were more mild and of a more even tenor, intensely pressing the high claims of right and justice. He was born in the township of Stow, then in Portage County, in 1805. His father was a native of Naples, Italy, and had been a sea captain. His mother was a lady of Middletown, Conn., and died in 1811. Some-

*By Judge James S. Carpenter and Dr. Alvin K. Fouser.

time after his mother's death, Gregory entered Burton Academy and continued there two years, making rapid progress in all studies which he took in hand, being especially distinguished in Latin and still more in mathematics. On leaving the academy he began the study of law, in the office of Judge Van R. Humphrey, in Hudson. As a student at law, Judge Humphrey said he was not a rapid reader. He habitually quarreled with what he was reading—turned back and read over and over again, till he was master of the text, and thus reconciled it to his sense of right as he went along.

In 1832, Mr. Powers was elected by the Clay men and Anti-Masons of Portage County, to the House of Representatives of Ohio. In 1833, he was a candidate for re-election, but political alternations had fixed that year for the Democratic party, and Mr. Powers was succeeded by Roan Clarke. In 1838, Mr. Powers was elected by the Whigs to the Senate of Ohio. In both branches of the Legislature his course was marked by the same high ability which had given him such eminence at the bar. He came home from the Senate apparently overworked and suffering at the heart, which brought him to his death at the age of thirty-four, July 10, 1839, ending a career, which, had it continued to the common limit of old age, must have set him among the loftiest characters of our country.

Van R. Humphrey was born at Goshen, Conn., July 28, 1800. His educational training was wholly at the common school of his native place, but it seems to have been so thorough that he became a successful teacher of a common school while in his teens. At what time he commenced the study of law is not ascertained, but a certificate of Theodore North, attorney and counselor at law, dated Goshen, May 11, 1821, says: "He pursued his course of legal studies in my office with uncommon attention and diligence." A copy of the record of the Court of Common Pleas of Litchfield County, Conn., duly certified by Frederick Wolcott, Clerk, shows that in September, 1820, he was admitted an attorney and counselor at law before all the Courts of Common Pleas in Connecticut.

April 17, 1821, he was married to Stella

Beach, of Goshen, and settled in Hudson, Ohio, the same year, where he continued his residence through life. An official certificate of S. Day, Clerk, shows that at a term of the Supreme Court of Ohio, on the 1st day of July, 1822, present the Hon. Calvin Pease and Peter Hitchcock, Judges, Van R. Humphrey was duly examined, admitted and sworn as an attorney and counselor at law and solicitor in chancery, within the State of Ohio. In 1824, he was elected, commissioned and qualified as Justice of the Peace for the township of Hudson. December 26, 1828, he was admitted to practice in the District Court of the United States, within the State of Ohio. In the year 1828, he was elected to the House of Representatives of the Legislature of Ohio, and was re-elected to the same office in 1829. He was elected by the Legislature of Ohio President Judge of the Court of Common Pleas of the Third Judicial District for the term of seven years, beginning in 1836 and ending in 1843.

From 1830, or perhaps a little earlier, till Judge Humphrey took his seat upon the bench, he and Gregory Powers were pitted against each other in most of the important cases in Portage and Medina Counties. They were both men of commanding presence, yet standing at the opposite extremes of manly dignity and beauty. Powers tall, lithe and excitable, yet always self-possessed. Humphrey cool and imperturbable, tall, large, though not unwieldy or fleshy, but full and rounded out at every point—a manifest embodiment of muscular strength. His manner was deliberate; his voice loud, clear, of large compass and never harsh. His sarcasm, not frequent, and seeming ever to be held back in reserve, and never sought after, always hit its mark. His humor was inexhaustible and spontaneous, and his wit forthcoming at will. His imagination was splendid, but would have been improved by early discipline. His arguments were not distinguished for consecutive reasoning, but they seemed to be guided by a kind of insight into the essential elements of his case, so that, if his imagination at any time outstripped his logic, there was an inner light that still lured him back to the essential points which he seldom failed so to group together and enlighten as to give

them effect. While Powers went directly to the leading points of his case and pressed them to their inevitable sequence, Humphrey swept in much of the surrounding mass, which, under his glowing imagination, took the color of his leading points. In a word, Judge Humphrey had just that broad foundation for a mental structure which early intellectual training would have made more readily available for logical argument.

And yet, as Judge of the Court of Common Pleas, his decisions were remarkably correct. His quick and penetrative insight stood him in good stead there. His invariable kindness and impartiality, and the apparent ease with which he disposed of business, gave to his administration a general and hearty approval.

Christopher P. Wolcott was born in 1821, probably in Steubenville, Jefferson Co., Ohio. His father removed from Connecticut to that place some time prior to that date, it is believed. However, that may be, Steubenville was the home of his childhood and youth. His education, which was thoroughly classical, was received at several institutions, but lastly, at Jefferson College, Pennsylvania. He studied law under the Hon. Edwin M. Stanton, our distinguished Secretary of war during the rebellion. In the spring of 1846, he formed a partnership with W. S. C. Otis, Esq., of Akron, to which place he immediately removed his residence. The chief indications he then gave of the eminence which he afterward attained, were his accurate knowledge of legal principles, the completeness of whatever pleading or other written document came from his hands, and the very careful preparation of his briefs. It was apparent that he distrusted himself before a jury and felt far more confidence in his ability to address the court. In truth, diffidence of his own powers was then his besetting impediment. Indeed, it was not till he had toiled under tortured sensibilities through a busy and laborious practice of several years that he had so shaken off this nightmare as to give full play to his forensic powers. He had given proof in many cases of ability to go through an extended statement of logical inferences with extraordinary clearness and force on questions of law, yet his efforts before a jury had always seemed constrained

and painful. But at length in the libel case of Wilson vs. Blake, in Common Pleas, November term, 1852, he broke entirely away from his self-consciousness, and abandoned himself with burning energy to the full flow of a warm imagination. The court and bar were taken by surprise, and the verdict showed that nothing had been wasted on the jury.

The trial of Parks for murder, in December, 1853, was the next occasion that aroused the energies of Mr. Wolcott to their highest pitch. For him it was simply a medium of thought; and in his handling it became as transparent as the air. But the argument which stands, and forever must stand, as the monument of Mr. Wolcott's intellectual power and of his high attainments as a lawyer, was delivered as Attorney General of Ohio before the Judges of our Supreme Court at Chambers on two writs of *habeas corpus*, in the cases *ex parte* Bushnell and *ex parte* Langston, in May, 1859. It is reported in 9 Ohio State reports, page 97, covering eighty-three pages.

In the summer of 1856, Mr. Wolcott was appointed Attorney General of this State by the Governor, to fill a vacancy in that office occasioned by the death of F. D. Kimball. He was elected to the same office in 1857, and continued to discharge his duties with distinguished ability until February, 1860. On the breaking out of the rebellion in 1861, the enlistment of volunteers for the military service was an easy matter. - But in a movement so sudden, so extensive and multitudinous, it was no easy matter to bring order and system out of chaos and irrepressible haste and confusion. In this emergency, Mr. Wolcott spent much of that year in aiding Gov. Dennison to regulate and systematize the military operations of our State. Early in 1862 his brother-in-law, Hon. Edwin M. Stanton, having been appointed Secretary of War, Mr. Wolcott was appointed Assistant Secretary of War. It would be superfluous to speak of the labors which the war of the rebellion imposed upon that department of the Government. Mr. Wolcott's sleepless devotion to his official duties—the indefatigable energy with which he plied both mind and body in that service, soon wore him out. He died in the summer of 1862, a martyr to his country's cause.

Isaiah Humphrey, after serving a term in the United States Army in fighting Indians and passing through the various vicissitudes of guarding our Western frontiers, settled down upon a farm in the township of Boston, some fifteen miles from Akron. In the process of clearing up his land and applying his labors as a new farm exacts them of a husbandman, he thought there were minutes and interstices of time, which without damage to his agriculture, he could devote to the enlargement of his mind. He had a retentive memory, was a natural humorist, had a keen sense of the ludicrous, a perpetual fountain of ready wit, a rare knack at narration whether of anecdotes or of sober facts, and a good understanding, which, with persevering effort, could be disciplined for logical reasoning. Here was a foundation for a lawyer. The distance of his residence from the county seat and its proximity to the Ohio Canal where law-suits within a justices' jurisdiction were necessarily frequent, would of course often put in requisition a combination of such mental qualities in aid of distressed litigants. Amid importunities of this kind, Mr. Humphrey took up the study of the law under his brother, Judge Van R. Humphrey, of Hudson. Meanwhile his farm and his family occupied his time as usual. His legal studies having been pursued some miles from Judge Humphrey's office, it very naturally happened that on his admission to the bar he found himself much abler in the general principles of the law than in matters of legal practice, which require skill that comes only with use.

It followed, of course, that in the Common Pleas Mr. Humphrey's pleadings were often defective and involved in perplexities. But his imperturbable coolness, good nature and tact got the better of them with occasional loss of time, which to the court and bar was amply compensated by the interludes of wit and humor that seemed to flash out in proportion as perplexities thickened. He did not leave his farm, but with his farming went through many a lively wrangle in his profession. He died about April, 1877, sincerely lamented by his brethren of the bar.

Wolsey Wells' card is found in the Portage *Journal* then published at Middlebury in 1827,

giving notice that he had opened a law office at Akron in the hotel. The same paper informs us that the first boat on the Ohio Canal reached Akron July 2, 1827, having on board Gov. Trimble on his way to celebrate the opening of the canal to navigation, at Cleveland on the 4th of July. Gov. Trimble was welcomed to Akron in a speech by Wolsey Wells, Esq. In 1835, Mr. Wells was in law practice in company with Harvey Birch, Esq., at Elyria. After some years, practice at Elyria, he migrated to one of the northwestern counties of Ohio, as agent of the State for the sale of public lands. It is reported that he died there a few years since. He was a lawyer of fine abilities and the strictest integrity. He took an active part in the anti-slavery and temperance reforms, in which he was outspoken and disdained all compromise.

George Bliss was a native of Vermont and came to Ohio quite young. He commenced the study of law about 1841, in the office of Hand & Cartter, and was admitted to the bar about 1843. His examination for admission was, with several other candidates, in the Supreme Court at Medina; and his thorough understanding of legal principles and practice was remarked on by the committee in their retirement as pre-eminent among the candidates, and as the harbinger of certain success in his profession. He very soon rose to distinction and formed a partnership with D. K. Cartter (now Judge of the Supreme Court of the District of Columbia), their office being in Akron. He had a voice of remarkable smoothness. It was of the kind which Cicero seems to have meant by his *vox argentea*. It was a ringing, metallic voice, sliding through gradations so easily and coming forth in full volume with such apparent spontaneity, that it never wearied the hearer however long continued.

A vacancy occurring in the Common Pleas judgeship of this district in 1850, Mr. Bliss was a candidate for election to that office by the Legislature of 1849-50. There were two other candidates. After numerous fruitless votes were taken, no candidate having received a majority, the Legislature gave the election the go by, and adjourned leaving the vacancy unfilled. The Governor of Ohio being then of

the Democratic party, appointed Mr. Bliss to the office. The short time he held it was long enough to fix the general opinion of the bar that his administration of it, if continued for another term, would give general satisfaction.

In 1852, Mr. Bliss was elected to the House of Representatives in Congress by the Democratic party. He continued his residence in Akron until about 1860, when he removed to Wooster. He continued the practice of his profession there until his death about 1875.

Lucius V. Bierce was born in Connecticut. He came to Ohio with his father's family when a lad. He entered the Ohio University at Athens, in Athens County, where he graduated at the termination of the customary college course. He taught some years in one or more of the Southern States, and then returned to Ohio and studied law. On being admitted to the bar he opened a law office at Ravenna, in Portage County. He was a very fluent and rapid speaker, had great facility in drafting and readiness in the dispatch of business. He soon became very popular as a lawyer, and was elected Prosecuting Attorney several terms in succession. About the year 1836, he removed his office to Akron, which was then in Portage County, where he continued his professional practice until the war of the rebellion broke out.

Gen. Bierce was neither an extensive nor a profound reader of law. His chief characteristic as a lawyer lay in his extraordinary tact and ingenuity in putting his adversary in a false position. When his opponent had made out a clear case and set down with confidence that it was standing in such blazing sunlight that no mists could be conjured up to darken it. Gen. Bierce was on his feet. Of all occasions for calling up his magic skill that was the one. Then all sorts of odd combinations of the law and facts which could make the false resemble the true were held up to the gaze of the jury. Hints, suggestions, imaginings, possibilities outside and inside of the case—the winged missives seemed to fill the air and flap in every juror's face, and it was good luck for justice and innocence if some of them did not lodge in the breast of many a juryman and puzzle the whole panel, in spite

a lucid charge from the court and all the sunshine that had blazed upon the case. Yet, take him as he was, no member of the Summit bar was so dreaded before a jury as Gen. Bierce. He was never thrown off his guard—never discomposured. The most threatening discomfiture found him on his feet ready to repel the onset.

In 1861, he was elected to the Senate of Ohio by the Republicans of Summit and Portage Counties. He took a very active part in raising troops for the Union in the late war; and in 1863 he was appointed Assistant Adjutant General of Ohio, and discharged the arduous duties of that office with faultless exactitude. As a citizen and neighbor, Gen. Bierce was public-spirited, obliging and generous. He died November, 1876, and was buried with military honors.

John Harris, Jr., was born at Canton, Stark County, November 26, 1823. He was classically educated at Western Reserve College, of which he was a graduate. He studied law under his father's tuition at Canton, and opened a law office at Akron about 1845. His health was delicate. He, however, showed himself fully competent in his profession. With abundant intellectual power to carry him through a contest, he shrank from the rough collisions which coarser natures often invited. Experience, however, would have given to his sensibility a recoil against coarse and ill-tempered thrusts all the more wounding to an aggressor, because it came unsuspected, from a keen and concealed weapon. Had he lived, he would have taken a high stand in the profession, which all his practice would have tended to dignify and refine. He died at Canton March 12, 1855.

Harvey Whedon was born at Litchfield, Conn., in 1812. He opened a law office in Hudson, Ohio, probably in 1835. He soon acquired a good office practice, and a reasonable share of practice in the courts of this county. A well-read, industrious lawyer, of good judgment, he was often consulted, and acquired a reputation of a safe counselor. He was elected Prosecuting Attorney of Summit County in 1852, and faithfully discharged the duties of that office for the constitutional term of two years. Mr. Whedon was a man of undoubted

integrity and of solid worth. He died of typhoid fever August 29, 1855.

W. S. C. Otis was born in Cummington, Mass. He entered Williams College, where he took a high stand as a scholar, but left the college some time in his senior year, and, for awhile, followed teaching. In 1831, he entered the law office of Whittlesey & Newton, at Canfield, Mahoning County, and continued there with unremitting application till he was admitted to the practice of law in Ohio in 1833. Soon after his admission, he became a partner in his profession with Hon. Jonathan Sloane, of Ravenna. Mr. Otis' strength lay in his keenly discriminative perceptions, his ample powers of deduction, and the tenacity with which he held to the controlling points in his case, drawing from them alone its ultimate conclusions, and guarding every such point as no one could do who had not viewed and reviewed every phase of the matter in hand. As an advocate, his voice and action brought him little aid. He had great earnestness, a ready memory, spoke fluently and always to the point, though somewhat wordily. His facts and arguments were laid out with rare skill and judgment. To the court and the bar, however, he was much better known as a lawyer than as an advocate. In argument, whether to the court or jury, he was fond of making historical or classical allusions, which were always well selected and came in with happy effect. His ambition, when he began his profession, was very high, and, so far as eminence at the bar went, it was certainly not disappointed.

Mr. Otis was elected Prosecuting Attorney for Summit County, in 1844, and, in 1850, he was elected as a delegate from this county to the Constitutional Convention which framed the Constitution of Ohio now in force. Outside of his profession, he was a man of large intelligence—a diligent reader of history, of the current literature of the times, of the classics, both ancient and modern, and of the Book above all books. He always kept up a close acquaintance with the ancient authors, both Greek and Latin, in their original tongues. Not long before his last illness, he published a pamphlet containing an examination into the common translation of a passage in one of

the epistles of the New Testament, drawing his conclusions from a critical acquaintance with the original Greek. In truth, from the beginning of his professional life, and we know not how much longer, he made the study of the Bible a specialty.

About 1842, Mr. Otis removed his residence from Ravenna to Akron, where he continued his professional practice. He was elected President of the first bank established in Akron, and held that office for some years. About 1875, he suffered from a paralytic shock, from which he so far recovered as to give attention to his extensive business till 1877, when a second stroke of palsy gave warning that his work was done. He died leaving his widow and family amply provided for.

William M. Dodge was born January 2, 1805, in the State of New York. He obtained a good English education at the common schools of his native place. He came to Ohio probably about 1828; studied law in Geauga County, and was admitted to the bar probably in 1830. Not long afterward, he took up his residence at Middlebury, and there opened a law office. After a short residence there, he settled in Akron, where he continued his professional business until he was elected Probate Judge of Summit County, in 1860. He had before then held the office of Prosecuting Attorney for Summit County, having been elected to it in 1842, and discharged its duties satisfactorily through the term. Mr. Dodge was a public-spirited citizen. He took a very active part in the organization of the Akron school system. He was especially efficient as a member of the Board of Directors, in all that pertained to building, or otherwise providing schoolhouses. In all such matters, he was a man of first-rate judgment, and he bent himself to the gratuitous work with untiring zeal. He died July 22, 1861.

William H. Gaston had been a school-teacher. At what time or where he studied law, or was admitted to the bar, is not known. In 1844, he was doing business as a lawyer, in company with W. S. C. Otis, at Akron. He gave himself to the work of the law office with unremitting diligence. He was a lawyer of a clear head, and of power to grasp and handle a matter of manifold complications in chan-

ery and was ambitious to rise in his profession. But a fatal disease seized upon his lungs and took him from the jarring crowds of suitors and lawyers, and jurors, and courts, and all the varied tumults of earthly things.

James D. Taylor was born at Youngstown, Mahoning County, November 24, 1816. He was admitted to the bar at Gallipolis, whither he rode on horseback for that purpose. About 1845, he entered into partnership with Henry W. King, Esq., of Akron, where he immediately fixed his residence. The firm carried on a prosperous business till about 1850, when, the health of both partners declining, their partnership was dissolved. Mr. Taylor's illness was pulmonary. He spent some time in the Southern States, in hopes, by help of a favorable climate, to overcome the malady which was wasting him away. It was sadly in vain. He died at Enterprise, Fla., March 23, 1855. While residing at Akron, he was married to Miss Isabella Howard, now Mrs. James Mathews, of Akron. Mr. Taylor was an industrious, clear-headed lawyer. He had a sprightly imagination, a keen, well-disciplined intellect. A comely person, a good memory and ready command of language, an easy delivery, free but always graceful and appropriate gestures, a soft though not very sonorous voice, an animated countenance, and a wit that could make a home-thrust almost in a whisper, made him one of the most winning speakers of the time.

But, better than all, a keen sense of honor and integrity above suspicion, seemed to add security and a high and commanding value to all the mental qualities of the man. His death, and its melancholy surroundings—far from home, where his wife was detained with a sick child—shed a deep and lasting sorrow throughout his acquaintance.

Charles G. Ladd was a native of Vermont. He came to Ohio in his youth, and read law with his brother-in-law, Gen. L. V. Bierce, with whom, after being admitted to practice, he became a partner, in the firm of Bierce & Ladd. With no shining advantages, Mr. Ladd soon began to show what influence can be obtained over common minds by self-assurance, and apparently an undoubting confidence that one's own knowledge is one's own exclusively,

and can be shared in by others only as he himself imparts it. This quality of unflinching boldness he used with the address and tact of a master. He entered the arena of politics simultaneously with that of his profession, youthful as he was, and very soon passed through a succession of minor trusts and offices, all of which he discharged faithfully and with fair ability.

On the adoption of our present constitution, in 1851, he was elected to the office of Probate Judge of Summit County in October of that year, but died in the following winter, without entering upon the duties of the office.

Rolland O. Hammond was born in Bath Township, in Summit County. He displayed in his childhood rare aptness in learning—so much so that his parents singled him out from among a large family of children for a liberal education. He fitted for entering a college course at the Preparatory Department of the Western Reserve College, which he entered in due time, and, in the regular progress of classical and mathematical studies, showed brilliant powers of acquisition. Chafing against the common restraints of a college upon his irregularities, he left that institution and entered Oberlin College. Finding the restraints there quite as stringent as those at Western Reserve, he took leave of Oberlin some time in his junior year. Not long afterward, in the winter of 1846-47, he commenced the study of law in the office of Carpenter & McClure, at Akron. He mastered the customary textbooks with great facility, and, at the end of the statutory two years of law-reading, was admitted to the bar.

A brief run of practice revealed in him the elements of a fine legal mind, and a ready tact at picking up business and inspiring confidence in his clients. But such guaranties of success were weakened by a ceaseless itching for office and the wonted intrigues to secure it. In mid-career, however, a fatal disease settled upon his brain, from which, after a lingering illness, he died, in 1866, leaving a widow and one daughter, and his memory for their heritage.

George Kirkum was a native of Connecticut. He was for many years Clerk of the Court of Common Pleas of Portage County, before the erection of Summit. His skill in putting

in order and systematizing the affairs of the office of Clerk of the Court of Common Pleas was of public utility. In 1838, Mr. Kirkum was elected to the House of Representatives of Ohio, from the county of Portage. The special interest his election was expected to subserve was the erection of Summit County out of Portage, Stark, Wayne and Medina Counties. Though a man of large influence in a popular body, so strong was the opposition that his indefatigable labors failed to carry the measure through the Legislature.

About the same time, Mr. Kirkum took up his residence in Akron, where he opened a law office and practiced his calling for several years. His health failing, he moved his residence to his farm in Norton Township, which he managed for a few years, and then moved to another farm in the vicinity of Cleveland. All the while, his inevitable tormentor, dyspepsia, followed him up, till he died at his last-mentioned home some years since.

Frederick S. Hanford was born at Cuyahoga Falls, and was educated at Western Reserve College, where he graduated with distinguished honors. He studied law in the office of McKinney & Tibbals in Akron, and at the Columbia Law School in New York City, where he was admitted to practice May 12, 1869. He entered into a law partnership with Hon. S. C. Williamson (now Probate Judge of Summit County), and afterward with Hon. N. D. Tibbals (now Judge of the Court of Common Pleas). He rose rapidly in practice. But, suffering from hemorrhage of the lungs, he spent some months in Colorado in hopes of invigorating his health by change of climate. On returning to professional labor, hemorrhages followed from time to time with fatal effect. He died at the home of his father-in-law in Ashland, Ohio, January 29, 1879.

Henry William King, son of the late Hon. Leicester King, of Ohio, was born at Westfield, Mass., September 24, 1815. He was brought to Warren, Trumbull County, when his parents settled there, in 1817. He was fitted for college partly at Warren and partly at Hartford, Conn., where he entered Washington (now Trinity) College, and graduated August 4, 1836. He studied law with the late Hon. Milton Sutliff at Warren, and also at the Cin-

cinnati Law School, under Judge Walker. He was admitted to the bar at Gallipolis in February, 1839. In the fall of the same year, he opened a law office at Akron, Summit County. June 1, 1844, he formed a law partnership with James D. Taylor, which was dissolved June 1, 1849, on account of the failing health of Mr. Taylor, who immediately removed to Peru, Ill., where, his health improving, he carried on a very prosperous law business for a few years, until his pulmonary weakness could undergo the wear of strife no longer.

Meanwhile, Mr. King entered into partnership with his brother, David L. King, and vigorously pursued the business of the profession. In 1850, the Legislature of Ohio elected him Secretary of State. The duties of this office he discharged for two years with his customary exactness and punctuality. Mr. King was an indefatigable worker. He shrank from no legal drudgery. This intense labor, however, bore down upon a constitution never strong, until 1853, when his health gave way, and he was therefore compelled to relinquish his professional practice. As a means of recovering, he betook himself to a more active life in open air, at Suamico, in the lumber regions of Wisconsin. He also tried a sea voyage, one or more, at mackerel fishing, and a voyage to the Bermudas. But his malady had laid fast hold on his life, and, in spite of remedies, and hopeful friends, and their tenderest cares, and the watchful nursing of her who for years had held her own life second to his, on the 20th of November, 1857, he left all for another and a better life.

The following are the names of lawyers who once practiced in Summit County, but who are still living elsewhere, or of whose decease we have no certain knowledge: Rufus P. Spalding, a native of Connecticut, graduate of Yale College, was one of the Supreme Judges of Ohio, when our State constitution took effect in 1851. He represented this district in Congress three successive terms, beginning in 1862; and now enjoys a healthy old age in Cleveland. Daniel R. Tilden, a native of Connecticut, began business as a lawyer in Portage County about 1836; was twice elected to Congress from this district.

He opened a law office in Akron about the winter of 1847-48; removed to Cleveland about 1850; was elected Probate Judge of Cuyahoga County in 1851, and has held that office without interruption ever since. Abel B. Berry, a native of New Hampshire, graduate at Dartmouth College, and was admitted to practice in New England; came to Akron in 1844; read law one year in the office of Judge Spalding, and was admitted to practice in Ohio in 1845. He opened a law office in Akron, and after a few years returned to New England, and is now practicing law in Boston, Mass. Alvah Hand opened a law office in Akron about 1827; removed to Oshkosh, Wis., many years since. Seneca L. Hand kept a law office in Middlebury (now Sixth Ward, Akron), from about 1828 till about 1851, when he moved to Dubuque, Iowa. Frederick A. Nash was for some years a partner in law business with Seneca L. Hand; afterward with N. W. Goodhue, Esq., and still later with Messrs. King & Green. For the last twelve years or so, he has resided at Brattleboro, Vt. Philemon Bliss, a native of Central New York, and liberally educated there, opened a law office at Cuyahoga Falls about 1841. After a practice there of some three or four years, he removed to Elyria, Lorain County, and there continued his law practice. While residing there he was twice elected to Congress. After some years' service in a Territorial judgeship, he took up his residence in Missouri and became one of the Supreme Judges of that State. He has recently published a book of some note on code pleading, and is Professor of Law in the Missouri State University. H. H. Johnson kept a law office some years in Akron, but, upon the erection of the county of Ashland, he took up his residence and pursued his law practice at Ashland, the county seat of that county, where he was soon afterward elected to the House of Representatives in Congress. David K. Carter is a native of Western New York, where he was admitted to the bar. He opened a law office in Akron about 1837, and removed to Massillon, Stark County, about 1845. He was elected to Congress in 1848, and again in 1850. Early in Mr. Lincoln's administration he was appointed Chief Justice of the Su-

preme Court of the District of Columbia; and is still the incumbent of that office. Henry McKinney was born in Portage County, Ohio; studied law under Judge S. W. McClure at Cuyahoga Falls, was admitted to the bar and entered into partnership with him in 1850. After some years he removed his residence to Akron, where he formed a partnership with Judge N. D. Tibbals. He was elected to the Senate of Ohio in 1869, and, in 1871, he removed his residence to Cleveland. John A. Pleasants is a native of Virginia. He settled in Akron in 1848, where he practiced law for several years, and then returned to Virginia. Charles Baldwin entered into a law partnership with Gen. L. V. Bierce, of Arkon, about 1859 or 1860. He continued in that partnership till the General's appointment to the office of Assistant Adjutant General, when he a few years later removed to Omaha, Neb. Wilbur F. Sanders was born in New York, and read law under Hon. Sidney Edgerton, at Akron. He was admitted to practice and formed a law partnership with Gov. Edgerton in 1857. Upon Gov. Edgerton's appointment as Judge for the Territory of Idaho, Mr. Sanders became a resident of that part of the Territory now included in Montana, where he has been in practice as a lawyer ever since. Charles Rhinehart was born in Hopkinton, N. Y. He was elected Clerk of the Court of Common Pleas of Summit County in 1863; and was re-elected in 1866. At the end of the second term of that office, he opened a law office in Akron, where he continued practice till the fall of 1880, when he removed to Denver, Colo. Eugene Pardee was born in Wadsworth, Medina Co., Ohio; read law under Judge Van R. Humphrey at Hudson. He resided respectively in Wadsworth, Wooster and Akron, where he practiced his profession, and, in 1880, again removed to Wooster, where at present he resides.

[This closes the sketch of the bar of the past, of Summit County, and brings us down to those now living. As the present members of the bar have biographical sketches in another department of this work, we deem it unnecessary to repeat the same in this chapter. One of the oldest representatives of the present bar is Judge McClure, and to whose biograph-

ical sketch the reader is referred, as unto most of the others following.—Ed.]

Judge James S. Carpenter studied law with Camp & Canfield, at Medina, Ohio, and was admitted to the bar May 29, 1838, at Springfield, Ohio. He came to Akron in 1846, and has practiced here ever since. Judge C. Bryan located in Akron in the fall of 1833, and was admitted to the bar in Columbus in 1834. Hon. Sidney Edgerton. (See biographical sketch.) Judge S. H. Pitkin studied law in Fulton County, Ill., and was admitted to the bar at Lewiston (same county) about 1836, and came to this county in 1852. William H. Upson (see biographical sketch), was admitted to the bar at Cleveland in September, 1845; Edward Oviatt, in September, 1846, at Medina; N. W. Goodhue, at the September term of the Supreme Court, at Akron, in 1847; Edwin P. Greene, at Akron, in September, 1852; Judge N. D. Tibballs, at Akron, in September, 1855; John J. Hall, at Canton, Ohio, in May, 1857; Gen. A. C. Voris (see biographical sketch elsewhere); J. A. Kohler was admitted to the bar in 1859; H. W. Ingersoll, at Columbus, March 29, 1859; Judge U. S. Marvin, in May, 1860; Gen. Thomas F. Wilde, at Cincinnati, in 1866; Calvin P. Humphrey was admitted to the bar in the fall of 1866; Edwin W. Stuart, at Cleveland, in 1866; H. C. Sanford, at Ravenna, in April, 1868; George T. Ford, in 1869; Newton Chalker graduated from the Law Department of the University of Albany in 1869; James M. Poulson was admitted to the bar in the fall of 1870; G. K. Pardee, in 1870; George S. May, in 1872; Richard P. Marvin, in May, 1873; John H. Campbell graduated from the Law Department of the Michigan University in 1873; Charles Baird was admitted to the bar about the year 1874; John M. Frazee, at Louisville, Ky., in 1874; Charles R. Grant, in December, 1874; Newton Ford, at Akron, in August, 1876; Noah Hodge was admitted to practice in the Superior Court of Mississippi, in January, 1875; John C. Means was admitted to the bar in the District Court of Summit County, in August, 1876; John Johnston was admitted to the bar in 1876; James McNaughten was admitted to the bar in 1876; Charles Robinson, at Columbus, in December, 1877; E. T. Voris, at Cleveland, in October, 1877; J. V.

Welsh, at New Lisbon, Ohio, May 26, 1877; L. D. Seward, in 1878; R. J. Young, in June, 1879; Rolin W. Saddler, in April, 1878; Frank D. Cassidy, in March, 1879; Charles W. Foote, at Wooster, in June, 1879; L. D. Watters, March 17, 1879; D. A. Doyle, in May, 1880; F. M. Atterholt, October 5, 1880; A. F. Bartges (see sketch).

[The following sketch of the medical profession of Summit County, is by Dr. A. K. Fouser.—Ed.]

The history of the medical profession in Summit County dates back to the year 1800, or the time of the earliest settlements, the demands for a doctor's services being then as now proportionate with the spread of civilization. The New England and Middle States having furnished most if not all of our earliest physicians, we have only to look at the history of the profession in those States to become acquainted with the material which made up the pioneer doctors of this county. At, and previous to, the period before mentioned, the greater number of the physicians in the East were what are called "regulars"—those who bled, blistered, gave calomel, jalap, tartar-emetic and the like. Homeopathy was scarcely known on this side of the Atlantic, while Thomsonianism, hydropathy, physiopathy, thermalism, magnetism and kindred dogmas had not yet found their way into the world.

But without entering into an extended description of the different systems in vogue, then and now, we will pass to the local history of the different towns and townships, giving as nearly as possible the succession of physicians who have practiced in each with as much of their personal history as could be ascertained concerning the dead, and all that would be expedient of the living.

Dr. Titus Chapman was probably the first physician who practiced in the vicinity of what is now known as Akron. He came to Middlebury, now Sixth Ward of Akron, soon after the war of 1812, and practiced there about thirty years, after which he went to Tallmadge and thence to Oberlin where he died.

Dr. Luther Hanchett was born and educated in Connecticut, and after practicing in New York State a few years, came to Ohio, locating

in the vicinity of Middlebury while that place was yet in its infancy. He was born in 1778, and probably came to Akron about 1815. After practicing about twenty years, he removed to Michigan where he died in 1840. Dr. Elijah Hanchett, a brother, was born in Connecticut in 1776, and began practice in Saratoga County, N. Y., in 1798, where he remained until 1832, when at the solicitation of his brother, he came to Middlebury. He then practiced in the vicinity of Middlebury until 1836, when he removed to Tallmadge where he died in 1843.

Dr. Joseph Cole was probably the first regular practitioner of medicine in what was at that time Akron proper, and for many years was the "old stand-by" of the profession. He was born in Winfield, Herkimer Co., N. Y., in 1795, and lived on a farm until the age of twenty. He then began the study of and a few years later graduated from Fairfield Medical College in his native State. In 1824, he came to Ohio and located at Old Portage, in this county, where he practiced until 1827, at which time he came to Akron where he remained in practice until near the time of his death—1861.

Dr. Richmond came from Taunton, Mass., and settled in Akron about 1833. After practicing here for three or four years, he fell a victim to consumption, went to Kentucky and died soon afterward; his idea of going South was, "to die among strangers," as he expressed it. Dr. E. F. Bryan, brother of Judge Bryan, came to Akron in the summer of 1833, and remained until 1836 or 1837, going then to Granville, Licking County. He was a native of Delaware County, N. Y., and received his medical education at Yale College. Dr. Ackley came from Rochester, N. Y., about 1834, and practiced in Akron for a few years, going from here to Cleveland, where he became quite prominent in his profession, and in his connection with the medical college. Dr. Crosby came to Middlebury some time about 1835, and remained there and in Akron for a number of years. Though originally of the regular school of medicine, he latterly embraced the homœopathic faith and made some pretensions toward practicing it. However, medicine was a secondary matter to him,

as most of his time and energies were spent in speculations of different kinds. Dr. Cleveland practiced in Akron between 1830 and 1840. Dr. D. D. Evans was a native of New York State; came to Akron in 1836, and practiced here until the time of his death which occurred in December, 1849. He was a doctor of more than ordinary ability for the time in which he lived, enjoyed a good reputation and an extensive practice; was universally esteemed, and for many years was the leading man in the profession of this section of the State. In connection with the death of Dr. Evans, a sad but very interesting circumstance is related, which in substance is as follows: While treating a case of malignant erysipelas at Cuyahoga Falls, Dr. Evans in some manner became infected with the poison and died within a few days thereafter. A post-mortem examination of Dr. Evans was made at which quite a number of physicians were present, and among them were Drs. Huntington and Angel, both of whom either became inoculated or absorbed the virus, the former dying within a few weeks, while the latter suffered immediate sloughing of one arm, and died from the poison a few years later. Nor was this all. A Mr. Chapman, a brother-in-law of Dr. Huntington, while nursing the doctor in his sickness, also absorbed the virus and died from its effects.

Dr. Kendrick came to Middlebury about 1837, and remained a few years. Dr. J. O. Wade practiced in Middlebury about the same time. Dr. Wyrant West was also one of the early doctors in Middlebury. Dr. E. L. Munger, a native of Vermont, located in Akron about 1838, but after a few years removed to Portage County. Dr. Kilbourne (Botanic), came to Akron about 1838, and, after practicing about fifteen years, removed into Coventry Township and began farming. Some time after this his mind became somewhat deranged, and in a fit of temporary insanity he committed suicide on his own farm. Dr. W. T. Huntington, a native of Connecticut, located in Akron in 1839, and continued in practice until early in the year 1850, when he died as stated above.

Dr. Mendall Jewett was born in Greenwich, Mass., in 1815, and came to Ohio in 1836. He soon afterward began the study of medi-

cine with Drs. Noble and Town, of Hudson, and, in 1839, began practicing in Mogadore, then in Portage County, where he remained until 1858, in the meantime having taken a course of lectures at Willoughby Medical College, and graduated after that college had removed to Cleveland. He spent two years—1850 and 1851—in California, and, from 1855 to 1857, represented this county in the State Legislature. Since 1858 up to the present time, he has lived in Middlebury (Sixth Ward of Akron), and has during all this time followed his profession, besides being engaged in other business.

Dr. William P. Cushman was born at Randolph, Vt., in 1810, and up to the age of twenty-two he worked on a farm during most of the time. In 1832, he went to New York State and taught school, and, in 1834, came to Ohio and attended school at Oberlin, at the same time reading medicine with Dr. Dascom. He afterward attended the Cincinnati Medical College, and, in 1838, began practicing his profession in Elyria, remaining there two years and then coming to Akron. He still lives in Akron, but has retired from practice entirely.

Dr. E. W. Howard was born in Andover, Windsor Co., Vt., in 1816, and until the age of nineteen lived with his parents on a farm, securing in the meantime a liberal education at the Chester Academy. He then took a trip West, during which he visited his cousin, Prof. R. L. Howard, at Elyria, Ohio, and was by him persuaded to study medicine. He at once began reading in the office of his cousin, where he continued until the following year, when he attended a course of lectures in Pittsfield, Mass. He then went home and read two years with Dr. L. G. Whiting, and, in 1838, graduated from the Berkshire Medical College, Pittsfield, Mass. After practicing one year with his preceptor, he came to Akron in 1839, and has since practiced here up to the present time, being now the oldest practitioner in the city. During the late war, he was sent South by Gov. Tod, and served several months in the hospitals at Frederick City, Md., and Nashville, Tenn.

Dr. Edwin Angel was born in Providence, R. I., in 1802, but when a few years old

removed with his parents to Canandaigua, N. Y. At the age of fourteen, he entered Union College at Schenectady, and graduated two years later. He then began the study of medicine with his father, and soon afterward attended lectures, finishing his course at the age of nineteen years. He then practiced some as an assistant to Dr. Valentine Mott, and on becoming of age received his degree after which he returned to Canandaigua, and assisted his father. In 1840, he came to Akron, where he practiced until the time of his death, September, 1855. With his death passed away the last physician in a family which, for at least four generations, had been represented in the regular profession.

Dr. Samuel W. Bartges (Uriscopist), was born in Union City, Penn., in 1814, and, in 1833, came with his parents to Columbiana County, Ohio, where he was engaged for a few years in a general merchandise store. In 1837, he began reading medicine with Dr. John Dellenbaugh, with whom he remained for five years, during the last two of which he practiced to some extent. In 1842, he came to Akron, where he has continued to practice until the present time. Dr. Perkins Wallace came to Akron in 1843, and practiced here a short time.

Dr. William Sisler was born in Lycoming County, Penn., in 1819, and at the age of twenty-one came to Manchester, in this county, where for several years he was engaged in teaching school and working on a farm. In 1843, he began reading medicine with Dr. Fernando Dalwick, of Canal Fulton, Stark Co., Ohio, and continued there until about 1846, when he returned to Manchester and began practicing. His brother, Adam, joined him soon after, and while one carried on their practice the other attended lectures, William graduating from Cleveland Medical College in 1851, and Adam in 1852. They then continued in practice together until 1873, when William came to Akron and engaged in the drug business which he carried on until 1879, when he sold out and since then has been practicing some in Akron besides being engaged in other business. He served three months in the hospitals during the late war, under the call of Gov. Tod, and, in 1867, was elected on the

Republican ticket as Representative in the State Legislature, serving one term.

Dr. John Weimer was born in Alsace, France, in 1813, and at the age of nineteen came to America. After working in a store several months in Buffalo, he went to Baltimore, Stark Co., Ohio, and began the study of medicine with Dr. W. Underwood, with whom he read two years, and then one year with Dr. Breisacher, of Canton, Ohio. In 1836, he located in Uniontown, Stark Co., Ohio, where he continued in practice until 1847, coming then to Akron, where he has continued to the present day.

Dr. J. W. Hamilton, now Professor of Surgery in Columbus Medical College, practiced in Akron a short time about 1850. Dr. Joseph Stanton, brother of Prof. Dr. Byron Stanton, of Cincinnati, came to Akron about 1850: practiced four or five years and died. Dr. Alexander Fisher, for several years a practitioner of Western Star, came to Akron soon after the death of Dr. Evans, and remained several years. He then went West and is now in Chicago. Dr. J. P. Peck read medicine with Drs. Evans and Angel: graduated from Cleveland Medical College, and located in Akron about 1852. He practiced here several years in partnership with Dr. Fisher, and then went West, being at present a resident of Omaha. Dr. J. S. Wilson came to Akron about 1856 or 1857, as a successor to Dr. Fisher, and remained a few years. Dr. J. J. Smith was born in Springfield Township, this county, in 1820. Graduated from Medical Department of University of Michigan in 1855. Practiced six months in Toledo, and located in Akron in 1856.

Dr. William Bowen was born in Genesee County, N. Y., in 1805. As soon as he had attained a suitable age, he was apprenticed to a carpenter, and, at the completion of his service, came West and settled in Stark County, Ohio, where for several years he worked at his trade, at the same time improving his spare moments in acquiring an education. Having attended school a short time, he began teaching and soon afterward took up the study of medicine with Dr. Estep, but, owing to limited means, was obliged to continue his teaching in connection with his pro-

fessional reading. In 1832, he began practice in Doylestown, Wayne County, where he remained until 1835. He then attended lectures and graduated at the Medical College of Ohio, receiving his degree in 1836. He then practiced two years in Canton, Ohio, going next to Massillon, where he practiced nearly twenty years, gaining in that time an extensive practice and wide-spread reputation. In 1857, he came to Akron, and continued in active practice until the time of his death, January, 1880.

Dr. George P. Ashmun was a native of St. Lawrence County, N. Y., and, in 1834, came to Tallmadge, in this county. In 1836, he began the study of medicine with Dr. Amos Wright, of that place, and, in 1839, graduated from Cleveland Medical College. Practiced one year in Uniontown, Stark County: five years in Boston, Summit County, and then in Hudson, Summit County, for nine years. In 1862, entered the army and served two years as Surgeon of the Ninety-third Ohio Volunteer Infantry, but, in 1864, resigned and returned home, after which he practiced in Akron till the time of his death, in 1873.

Dr. J. A. Knowlton was born in Vermont in 1824, and received his early education in Rutland. Began reading medicine with Dr. Crittenden, of Kent, Ohio, in 1841, and four years later graduated from Cleveland Medical College. Practiced in Portage County until 1863, and since then has been in Akron. Of late years he has given up the regular practice, and devoted his attention principally to the drug business and treatment of chronic diseases.

Dr. Charles R. Merriman was born in Dalton, Berkshire Co., Mass., in 1829, but while quite young came with his parents to this county. His early education was obtained at the schools of Akron, Farmington and Norwalk, and, in 1847, he began the study of medicine with Dr. Huntington, of Akron. Attended Cleveland Medical College in 1849, after which he practiced in Kentucky and Missouri until 1857, when he returned to Ohio and took another course of lectures, graduating in the spring of 1858. He then practiced a short time at Peninsula and Montrose, and

then went West practicing at Virginia City and Helena until 1865, when he returned to Montrose. Practiced there until 1873, and then removed to Akron, where he has since remained. Dr. Charles R. Pierce came to Akron about 1858, and practiced until 1862, when he entered the service as Assistant Surgeon. Died in 1863.

Dr. B. S. Chase was born in Vermont in 1834, and was brought up on a farm until he became of age, receiving in the meantime a liberal education at the Chester Academy. About 1856, he began reading medicine with Drs. Andrews and Woodman, of Paw Paw, Mich., and after taking one course of lectures came to Akron and continued his studies with his uncle, Dr. E. W. Howard. In 1856, he graduated from University of Michigan, following which he practiced with Dr. Howard until 1862, when he entered the army as Assistant Surgeon of the Sixteenth Ohio Volunteer Infantry. In June, 1863, he was promoted to Surgeon and was transferred to the Fifty-third Mississippi Colored Regiment, with whom he served until the close of the war, becoming very popular as a Surgeon as well as a soldier. He served on the Operating Board at the battles of Chickasaw Bayou, and at the siege of Vicksburg. At the close of the war he located in Akron, where he continued in practice until the time of his death, February, 1878.

Dr. T. M. Leight is a native of Snyder County, Penn., and was born in 1827. When twenty years of age, he began reading medicine, and after four or five years office tuition began practicing at McKees Falls in his native county. He remained here about nine years, within which time he attended lectures in Philadelphia a month or two each year, graduating from Jefferson Medical College in July, 1857. He then practiced about seven years at Mifflin, Penn., after which he came to Akron, where he is at present.

Dr. Thomas McEbright was born at Carlisle, Penn., in 1824, but at an early age came with his parents to Wayne County, Ohio, where he was brought up on a farm until the age of sixteen, after which he attended the Ohio Wesleyan University at Delaware. In 1848, he began reading medicine with Dr. I.

H. Baker, of Wooster, and, in 1850, graduated from Starling Medical College, at Columbus, Ohio. Practiced seven years at Nashville, Ohio, and then removed to Millersburg, where he remained until 1861, going then into the army as Surgeon of the Eighth Ohio Volunteer Infantry. After serving with the regiment two years, he resigned and came home, but soon after raised the Fifty-ninth Battalion, and, upon the call of the "hundred days' men," his battalion was attached to the One Hundred and Sixty-sixth Regiment, of which he was made Colonel, a position which he resigned in favor of Col. Blake, the doctor preferring to be Surgeon. He was afterward made Brigade Surgeon and detailed as Chief of the Operating Board. In 1864, he was mustered out with his regiment and soon afterward came to Akron, where he is still in active practice.

Dr. W. C. Jacobs is a native of Lima, Ohio, and was born in 1840. His early life was spent in his native village and on a farm. At the age of sixteen he was appointed a cadet midshipman, and attended school at Annapolis until 1859, when he resigned and began the study of medicine with Dr. Carson, of Cincinnati. In March, 1862, he graduated from Medical College of Ohio at Cincinnati, and in the following month was appointed Assistant Surgeon of the Fourth Ohio Cavalry, with whom he served until December, when he was promoted to Surgeon and assigned to the Eighty-first Ohio Volunteer Infantry. With this regiment he remained until the close of the war, and during the Atlanta campaign, served on the Operating Board of the Sixteenth Army Corps. In October, 1865, he came to Akron, where he has since followed his profession.

Dr. W. J. Underwood was born in York County, Penn., in 1840, and received his early education in the common and select schools of the period. At the age of twenty, he began reading medicine with Dr. Ira Day, of Mechanicsburg, and the next year attended a course of lectures at Jefferson Medical College. In 1862, he went into the army as Assistant Surgeon, serving with the Nineteenth Pennsylvania Volunteer Militia a short time, and then with the One Hundred and Fifty-first Pennsylvania Volunteers during

the latter's term of enlistment. He then completed his course at Jefferson Medical College, and in the same spring (1864) came to Ohio. Practiced at Canal Fulton two years, and then came to Akron, where he still remains.

Dr. Elizur Hitchcock was born in Tallmadge Township in 1832, and up to the age of eighteen worked on his father's farm and attended the common and select schools of the neighborhood. He then entered the Western Reserve College, where he remained two years, going thence to Yale, graduating from the latter in 1854. After spending several years in teaching, he began reading medicine and graduated from the Cleveland Medical College in 1860. He then practiced three years in Ashtabula County, and, in the spring of 1863, entered the army as Surgeon of the Seventh Ohio Volunteer Infantry, but after a service of six months resigned and came home and located at West Williamsfield, Ashtabula County, continuing there until 1869. He then attended a course of lectures in New York City, and, in 1870, came to Akron, where he has since been practicing.

Dr. A. E. Foltz was born in Wayne County, Ohio, in 1840, and at the age of seventeen began teaching school, in which calling he continued until 1862. In July of the same year, he, with four of his brothers, enlisted in the One Hundred and Second Ohio Volunteer Infantry, serving with the regiment until the close of the war. In 1869, he began reading medicine with his brother, Dr. W. K. Foltz, of Sharon Center, Medina County, and, in 1869, graduated at Charity Hospital Medical College in Cleveland. Practiced one year at Ashland and then came to Akron, where he has since followed his profession.

Dr. L. S. Ebright was born at Royalton, Fairfield County, Ohio, in 1844, and received his early education in the common schools of his native town. He served his country during the rebellion, and after its close began the study of medicine with his uncle, Dr. Thomas McEbright, of Akron, graduating from Charity Hospital Medical College in 1869 or 1870, since which time he has practiced in Akron. Is quite a politician, and is now (1881) a member of the State Legislature.

Dr. S. T. Odell was born at Bellville, Ind., in 1842, and received his preliminary education at Bellville Academy. In 1861, he entered the army, serving until 1863 with the Eleventh Indiana (Zouaves), and the balance of his term with the Fifty-third United States Colored Troops, of which he was First Lieutenant and Adjutant. While connected with the latter regiment, he read medicine with the surgeon, Dr. B. S. Chase, of Akron, and at the close of his service—fall of 1865, attended a course of lectures at Ann Arbor, Mich., and the next year attended his second course at the Rush Medical College, Chicago, graduating in 1867. After practicing a few years in Indiana and Kansas, he came to Akron (Sixth Ward) in 1870, and has since remained there in practice, with the exception of about one year.

Dr. H. C. Howard, son of Dr. E. W. Howard, was born in Akron in 1842, and graduated from the Akron High School in 1863. He then began the study of medicine with his father, graduated from Bellevue Hospital Medical College in 1871, and has since followed the profession with his father.

Dr. W. E. Chamberlin was born in Allegheny City in 1840, and was educated at Marietta (Ohio) High School. In 1854, he began the study of medicine with his father—then of Peninsula, in this county—and, from 1859 to 1861, assisted him in his profession. He then entered the army and served about one year, most of the time being detailed as physician and nurse. At the close of his service, he practiced in Portage County several years, and, in 1865, located at Clinton, in this county, where he remained until 1875, since which time he has practiced in Akron. During his stay in Clinton, he attended one course of lectures at Ann Arbor, Mich., and one at Cleveland Medical College, receiving his degree from the latter in 1869.

Dr. O. E. Brownell was born in St. Lawrence County, N. Y., in 1855, but at an early age came with his parents to this county, receiving his early education in the common schools and Mount Vernon High School. In 1861, he entered the army and served eighteen months. He then read medicine with Dr. Sisler, of Manchester, attended a course of

lectures at Cleveland in 1868, practiced in Greensburg until 1878, and then came to Akron, where he is at present. He now pays most of his attention to dentistry.

Dr. A. F. Chandler was born in St. Lawrence County, N. Y., in 1845, but at an early age removed with his parents to Rockford, Ill. In 1863, he enlisted with the One Hundred and Forty-sixth Illinois Infantry, and served with the regiment until the close of the war. He then attended and graduated from Rockford High School, and, in 1847, began reading medicine with Dr. W. E. Chandler, of his own place. In March, 1871, he graduated from the Chicago Medical College, and in the following month located in Akron, where he has since practiced.

Dr. H. D. Taggart was born in Wayne County, Ohio, in 1851, and received his early education in the common schools and the Hayesville Academy. Began reading medicine in the spring of 1870, with Doctor Roebuck, of his native town, Dalton, and, in 1874, graduated from Jefferson Medical College, Philadelphia. He then located at Easton, Wayne County, remaining there six months, after which he came to Akron, where he has since continued in practice.

Dr. G. G. Baker was born in Norwalk, Ohio, in 1849, and received his education at the common schools of that place and at Western Reserve College. In 1868, he began reading medicine with Drs. Read and Ford, of Norwalk, and, in 1872, came to Akron and entered the office of Dr. Ashmun. In June, 1875, he graduated from the Medical Department of Michigan University, and since that time has been practicing in Akron.

Dr. H. M. Fisher was born in Warren, Penn., in 1848, and received his education in the Franklin and Warren Academies and Allegheny College. In 1867, he began reading medicine with Dr. Stranahan, of his native town, and, in 1872, graduated from Jefferson Medical College, Philadelphia. After practicing in his native town a few months, he came to Akron, where he also remained a few months, going next to Allegheny City. In 1876, he returned to Akron and continues there at this time.

Dr. A. K. Fouser was born in Stark County

in 1854, and graduated from Akron High School in 1873. He then began reading medicine with Drs. Chase and Underwood, and graduated from Medical College of Ohio at Cincinnati in March, 1876, since which time he has practiced in Akron.

Dr. James P. Boyd was born in England in 1850, but came to this country while quite young. Received his education at Jamestown, N. Y., and Ann Arbor, Mich., and, in 1872, began reading medicine with Dr. Haseltine, of Grand Rapids, Mich. In 1875, he graduated from Long Island College Hospital, and in the following year located in Akron, where he now remains.

Dr. F. C. Reed was born in Ashtabula County in 1852, and was educated at the Grand River Institute in his native town—Austinburg. In 1872, he began reading medicine with his brother, Dr. A. B. Reed, of Cleveland, and graduated from Charity Hospital Medical College in 1876, since which time he has followed his profession in the Sixth Ward of Akron.

Dr. C. C. Davison was born in Northampton Township in 1851, and was brought up on a farm. In 1872, he began reading medicine with Dr. E. W. Howard, and graduated from Columbus Medical College in 1877. After practicing several months at Botzum Station, in this county, he came to Sixth Ward, Akron, where he is now practicing.

Dr. A. C. Belden was born at Castile, N. Y., in 1845, but at an early age removed with his parents to Bureau County, Ill., receiving his education at Dover Academy and at Poughkeepsie, N. Y. In 1863, he entered the army and served until the close of the war as private in Sixty-fourth Illinois Infantry. In 1870, he began the study of medicine with Dr. Thompson, of Princeton, Ill., and graduated from Bellevue Hospital Medical College in 1875. In the following year, he came to Akron, and, in July, 1877, began the practice of his profession, in which he has since continued.

Dr. W. K. Foltz was born in Mifflin County, Penn., in 1829, and until the age of eighteen remained at home, alternately working and attending school. He then taught school for several years, and, in 1850, began reading medicine with Dr. Stauber, of Wooster, Ohio.

In 1855, he began practice at La Fayette Center, Medina County, and the following year removed to Sharon Center, where he remained until 1867, in the meantime having attended lectures and graduated at the Eclectic College of Medicine, Cincinnati, in 1859. From 1867 to 1877, he was engaged in the drug business at Ashland, and since then has been practicing in Akron.

Dr. L. S. Sweitzer was born in Tuscarawas County, Ohio, and was educated at Heidelberg College, Tiffin, Ohio. Began reading medicine with Dr. Buchman in 1872, and graduated from Cleveland Medical College in 1875, after which he served eighteen months in the Cleveland Hospital. He then practiced some time in his native county, spent one year in New York City attending lectures, and, in the spring of 1879, located in Akron, where he is at the present time.

Dr. L. J. Proehl was born at Akron in 1850, but at the age of eight removed with his parents into Coventry Township. In 1873, he entered the National Normal School at Lebanon, Ohio, graduating in 1876. He then began the study of medicine with Dr. W. C. Jacobs, and graduated from Medical College of Ohio, at Cincinnati, in 1879, since which time he has practiced in Akron.

Dr. Eli Conn was born in Butler County, Penn., in 1839. In 1861, he entered the army, serving four years, after which he attended Baldwin University, graduating in 1868. Attended lectures at Cleveland Medical College in 1869 and 1871; practiced a short time, and, in 1872, was elected to the office of Prothonotary of his native county, serving four years. In the spring of 1876, he graduated from Charity Hospital Medical College; practiced in Butler County until 1880, when he came to Akron.

Dr. T. K. Jacobs, Jr., was born in Lima in 1856, and, from 1873 to 1876, attended Ohio Wesleyan University, at Delaware, Ohio. He then began reading medicine with his brother, Dr. W. C. Jacobs, graduated from Medical College of Ohio, at Cincinnati, in 1880, and same year began practice with his brother in Akron.

Dr. J. W. Lyon is a native of Copley, and was educated in the common schools of his

neighborhood. Began reading medicine in 1874 with Drs. Chase and Underwood, of Akron. Graduated from Columbus Medical College in 1877. Practiced several years at Clinton, after which he came to Akron and entered the dental profession.

In addition to the above we have the following-named physicians who have practiced in the county, but of whom, for various reasons, no definite notes could be procured.

Dr. B. B. Brashear is a native of Fayette County, Penn., where he was born in 1822. During the late war he served as Surgeon of the Sixteenth Ohio Volunteer Infantry, and, in 1878, came to Akron.

Dr. D. A. Scott was born in Harrison County, Ohio, and, since 1848, has practiced medicine in Akron.

Dr. Frank A. Hanford, a native of Cuyahoga Falls, and graduate of Western Reserve College; read medicine with Dr. T. McEbright, and graduated at Charity Hospital Medical College in 1875. He then practiced in Sixth Ward a short time, but his health failing he went to California, where he soon afterward died of consumption.

Dr. John Wyltenbach practiced in Akron for some years previous to about 1876. He now lives in the South.

Dr. J. K. Holloway came to Akron from Pennsylvania somewhere about 1870, and practiced until the time of his death in 1874.

Dr. W. P. Morrison practiced in Akron a few years in the 70's, and then went to Canada, where he died.

Dr. A. F. Peck came to Akron in the early part of last decade; practiced a few years, and then went to Cleveland where he died in 1877.

Dr. O. D. Childs (Homœopath), was born at Moretown, Vt., in 1840, and up to the age of twenty-one lived at home on a farm, receiving in the meantime a common and high school education. In 1863, he began reading homœopathy at Oshkosh, Wis., and graduated from the Cleveland Homœopathic College in 1867, since which he has practiced in Akron.

Dr. William Murdoch (Homœopath), was born in Scotland in 1842, but at an early age came with his parents to this country and became a resident of Trumbull County, Ohio. His preliminary education was obtained at the

Orvill Normal School, and at Eastman Business College. In 1869, he began the study of homœopathic medicine, and graduated from the Cleveland Homœopathic Hospital College in 1873, since which he has followed his profession; two years at Garrettsville and the balance of the time in Akron.

Dr. J. W. Rockwell (Homœopath), was born at Hudson in 1840, and attended the Akron schools. In 1873, he began the study of medicine with Dr. Childs, graduated from Chicago Hahnemann College in 1877, and since then has practiced in Akron.

Dr. DeWitt G. Wilcox (Homœopath), was born in Akron in 1858, and graduated from the Akron High School in 1876, after which he attended Buchtel College for a few years. He then began the study of medicine with Dr. Murdoch; graduated from Cleveland Homœopathic College in 1880, and since then has practiced in Akron.

Dr. T. R. Grow (Homœopath), practiced in the Sixth Ward of Akron for several years, going thence to Vermont in 1880.

Dr. Whitmore (Homœopath), read medicine with Dr. Grow, and is now practicing in Sixth Ward, Akron.

Dr. C. W. Rice, the first physician who was ever permanently located in Cuyahoga Falls, was born in Middlefield, Otsego Co., N. Y., in 1803; studied medicine with Dr. Spafford, of Cooperstown, N. Y., and graduated from Fairfield College, at Cazenovia, in the same State in 1829. After practicing one year with his preceptor, he came to Cuyahoga Falls in 1830, and there followed his profession until his death, which occurred in 1861. He was a man of very decided character, positive in his likes and dislikes, bitter in his denunciations of homeopathy, and outspoken in his opposition to Freemasonry; but withal was a skillful surgeon as well as a benevolent and highly respected citizen.

Dr. John Davis came to Cuyahoga Falls in 1840. He was well educated in medicine, acquired a good practice and was highly spoken of by the profession as well as by the people generally. He removed to Michigan about 1853.

Dr. P. G. Summers, of what is known as the Thomsonian School of Medicine, practiced in

Cuyahoga Falls a number of years, during which time he attained a good reputation as a physician and was held in high esteem by the people. He served one term in the State Legislature, and held the office of Postmaster under Lincoln and Johnson.

Dr. Foote, an adherent of the botanical system of medicine, practiced in Cuyahoga Falls a number of years. Among those who practiced in this village at some time or other in the past, but of whom nothing definite could be learned, we find the names of Dr. Corry, Dr. S. Perham, Dr. J. S. Newbury, Dr. Hubbard, Dr. Shoemaker and Dr. Henshaw, the last being of the homœopathic school.

Dr. Mary Watson lived in Cuyahoga Falls some twenty years, leaving there in 1870. She claimed to be an Eclectic, and is reported to have had some practice, especially among her own sex, but is probably best remembered on account of her rather eccentric character.

Dr. G. C. Upson, our oldest living practitioner of medicine, was born in Tallmadge Township, Summit County, Ohio, in 1821. He read medicine with Dr. Rice, of Cuyahoga Falls, and attended lectures at the medical department of Western Reserve College, graduating from that institution in 1847. After practicing three years with Dr. Taylor, of Twinsburg, in this county, he located at Cuyahoga Falls, where he has since practiced.

Dr. T. F. Heath was born in Connecticut, but spent most of his early life in Western New York. Attended a course of lectures at the medical college in Pittsfield, Mass., and afterward two courses at the College of Physicians and Surgeons in New York City, graduating from the latter in March, 1851. In July of the same year, he came to Cuyahoga Falls where he has since practiced his profession, besides being of late years connected with the drug business.

Dr. J. M. Crafts was born in 1840, and is the son of Dr. Ambrose S. Crafts, who came to Ravenna in 1860. He graduated from Charity Hospital Medical College, Cleveland, in 1864, and then entered the army as Assistant Surgeon, serving as such for nearly three years. In 1873, he came to Cuyahoga Falls, and is practicing there at the present time.

Dr. W. S. Hough was born in Portage

County, Ohio, in 1844, and served during the late war as a private. At the close of his army life he studied medicine, and graduated from Charity Hospital Medical College in 1866. Practiced ten years with Dr. J. C. Ferguson at Mogadore, and then came to Cuyahoga Falls, where he is now practicing in partnership with Dr. J. M. Crafts.

Dr. A. H. Bill was born in Cuyahoga Falls in 1851. Studied medicine with Dr. C. M. Fitch, of Chicago, and graduated from Rush Medical College in 1875. Practiced in the office of his preceptor until November, 1875, when he returned to his old home, where he is now practicing.

Dr. H. W. Carter (Homœopath), was born in Twinsburg, Summit Co., Ohio, in 1841. Graduated from the Cleveland Homœopathic Medical College in 1869, and after one year of professional experience at Knoxville, Tenn., he located in Cuyahoga Falls, his present place of business.

Dr. Moses Thompson was in all probability the first physician who was ever permanently located in that section of the country now known as Summit County, and to Hudson belongs the credit of furnishing this historical character. He studied medicine in Litchfield County, Conn., with Dr. Everest and Dr. North, and with such training as he got from his worthy preceptors, he went to what is now known as Kinderhook, N. Y., to practice his profession. While here the Connecticut Company's great land purchase and the consequent Western fever attracted him, and being authorized by his father and brother to go and "spy out the land" for them, he came to Hudson with the colony under the guidance of Daniel Hudson. Having selected land for his father and brothers, he went East on foot and brought back his own family and those of his father and two brothers. This was in the year 1800, when he began the practice of his profession in the wilderness, and for some years there was no other physician nearer than Warren, and his ride extended from Cleveland to fifty miles south of Hudson. In 1815, he retired from practice and went into general business, which he followed until his death, which occurred in 1858.

Dr. Jonathan Metcalf, the second physician

to settle in Hudson, was a native of Connecticut, and received his early education at the academies of Franklin and Colchester, and the public schools of the period. In 1807, he went to Middlebury, Vt., and commenced the study of medicine with Dr. Barr, and during his three years stay here he attended two courses of medical lectures at Dartmouth College. After completing his medical education in the spring of 1812, he started on horseback to look up some good field for practice in the West. In this way he came to Aurora, then a settlement of a few years' growth, but not being very favorably impressed with the outlook, he was on the point of returning to Pittsburgh, when he met Mr. Hudson, of the Hudson colony, who persuaded him to visit the latter place, which he did on the 6th of June, and being highly pleased with the prospect he decided to remain, and at once began the practice of his profession. At that time Twinsburg and Streetsboro were not yet settled, but subsequently his practice extended into those places as well as to Aurora, Mantua, Auburn, Troy, Hiram, Brecksville and Bath. He retired from active practice in 1850, and died in 1869.

Dr. Israel Town came from Connecticut to Hudson during the first half of the second decade of present century. Of his early life nothing definite can be obtained, but he is credited with being a well-read and careful practitioner, his counsel in critical cases being especially in demand. He continued in the practice of his profession until within a few years of his death.

Dr. William Everett was a native of Vermont, and came to Hudson some time between 1825 and 1830. He continued in practice until his death, which occurred in 1833. On the occasion of his death, the Congregational Church, of which he was a member, made the following record: "Dr. Everett was chosen to the office of Deacon in November, 1831, which office he well discharged while living. He adorned his profession as a Christian, and died universally lamented."

Dr. L. D. Osborne, after receiving an academic education, entered the Lake Erie Medical College, since merged into the Starling Medical College, Columbus, Ohio; study-

ing in the meanwhile as a private student under Dr. Delemater, a professor in the institution. He graduated in 1845, and, after practicing in various parts of the State, came to Hudson in 1854, where he has since followed his profession up to the present time.

Dr. F. Hodge began his collegiate course in Western Reserve College, subsequently graduating at Yale College. He studied medicine with Dr. Frank Hamilton, now of New York City, and attended lectures at the Buffalo Medical College. In 1864 he settled in Hudson, where he is now practicing.

Dr. A. E. Berbower began the study of medicine with Dr. Baker, of Wooster, Ohio, and subsequently became the private pupil of Prof. Weber, of Cleveland. Graduated from Medical Department of the Wooster University in 1865, after which he practiced his profession until 1880, when he died of consumption.

Dr. G. L. Starr is a native of Hudson, and an alumnus of Western Reserve College, Class of '56. He studied medicine with Dr. Maynard, attended lectures at the Cleveland Medical College, and subsequently graduated from the Bellevue Hospital Medical College in New York City. Located in Hudson in 1878, and continues in his profession to this time.

Dr. J. P. Sobey graduated from the Cleveland High School in 1871, and from the Cleveland Homœopathic Medical College in 1877. Came to Hudson in the following year, and has since followed his profession in that place.

Dr. Harrison Danforth, a native of New Hampshire, came to Hudson about the year 1840 and read medicine with Dr. Town. After several years of study, he adopted the so-called Eclectic system of medicine which he has since continued to practice. In the early years of his practice, he devoted some of his time to farming, but for the past twenty years he has given his entire attention to the practice of his profession in the vicinity of Hudson.

Tallmadge Township, though it claims but a small share in the medical history of the county, yet furnishes one of the most valuable contributions in our whole collection, its special interest being due to the fact that three generations of the same name and family have been regular practitioners of medicine in

the township; the first of whom was one of the earliest settlers, as well as the second physician in the county; the second being now one of the oldest physicians in this section of the country, while the third has but recently entered the profession.

Dr. Amos C. Wright was born in Winsted, Litchfield County, Conn., September 5, 1782. His father, Captain John Wright, was an officer in the Revolutionary war, and a pioneer in the settlement of the northern part of Connecticut. At the age of sixteen, the subject of our sketch began the study of medicine with Dr. Minor, remaining with him about five years, and being in the meantime licensed to practice by the Litchfield County Medical Society. In 1801, he came to Ohio and settled in Vernon, Trumbull County, where he remained about a year and a half practicing and teaching school, after which he went back to Connecticut and was married to Miss Lydia Kinne. Accompanied by his wife and his father's family, he returned to Ohio in 1803, and practiced in Vernon, Trumbull County, until 1808, when, at the solicitation of Rev. David Bacon, he came to Tallmadge. At that time there were only three or four families in the township, and Dr. Thompson, of Hudson, was the only physician in Summit County. In 1812, he was appointed Surgeon to a company of militia which was stationed at Old Portage, by order of Gen. Harrison, until after Perry's victory on Lake Erie. Dr. Wright continued in the practice of his profession until near the close of his life; was successful, had a widespread reputation and was highly esteemed by all who knew him. He died in 1845.

Dr. Amos Wright, the son and successor of Dr. Amos C. Wright, was born in 1808, and was the first white male child born in Tallmadge Township. When nine years of age, he was sent to the academy to study the classics as preparatory to a professional education, and, at the age of nineteen, began the study of medicine under his father. In 1830, he attended his first course of lectures at the Medical College of Ohio, in Cincinnati, and the next year attended the Medical Department of Yale College, receiving his diploma from the last-named institution in the spring of 1832.

He first began practicing medicine in Mid-

dlebury, now the Sixth Ward of Akron, and while there kept the first exclusive drug store in the county. Six months later he went to Vernon, Trumbull County, where he remained three years, gaining quite an extensive practice, but, in 1835, at the earnest solicitation of his father he returned to his native town, where he has been in practice continuously up to the present time.

Dr. Samuel St. John Wright, son of Dr. Amos Wright, was born in Tallmadge and received his education at the common schools and at Western Reserve College. At the age of eighteen he began reading medicine with his father, and a few years later graduated from Cleveland Medical College. He practiced one year in Tallmadge, then removed to Nebraska, where he remained four years, and since that time has practiced with his father in Tallmadge.

Dr. Sperry has for many years been a resident of Tallmadge, but during a considerable portion of the time has been engaged in the manufacturing business. His early history and place of birth were not ascertained. Several more physicians have at various times been located in Tallmadge, but none except those named above have ever remained for any great length of time.

Concerning the early history of medical practice in Norton Township, very little can now be ascertained, but from careful research we find that since 1840 no less than fifteen physicians have at various times been located within its limits for the practice of their profession.

Dr. Alexander Fisher was born in Massachusetts, read medicine with a Dr. Richards in, or near, Skaneateles, N. Y., and came to Western Star sometime between 1840 and 1845, where he remained until about 1852; then practiced in Akron until near the time of the breaking-out of the rebellion, when he went West and is now practicing in Chicago. During his stay in Norton he enjoyed the reputation of being a splendid physician for his time, and had probably more students than any one doctor ever in the township. Among the latter were Drs. Amos Warner, Harry Spellman, A. H. Agard, E. G. Hard, now of Medina, and John Hill, now a member of the Ohio State Legislature.

Dr. M. M. Dickson came to Norton Township in 1852, and began the study of medicine, soon afterward taking his degree from Cleveland Medical College in 1855. The next year he located at Johnson's Corners, where he practiced until 1862, when he entered the service of his country as Assistant Surgeon. Was attached to the Western army under Gen. Rosecrans in the campaign of Stone River and Chattanooga, and thence with "Sherman to the sea." After a service of two years and eight months he returned to Johnson's Corners, where he has continued in the practice of his profession until the present time.

Dr. A. H. Agard succeeded his preceptor, Dr. Fisher, in the practice of medicine at Western Star, but after a stay of only a few years he went West and is now at Sandusky, Ohio.

Dr. Dreher began practicing at Western Star some time near the beginning of the late war, but after a few years removed to Loyal Oak where he remained two years, going next to Smithville where he now resides.

Dr. John Hill was born in Sussex, England, in 1823. His father, Mr. John Hill, came to this country in 1828, and settled near Utica, N. Y., where he was engaged in farming until 1837, when he came to Cuyahoga County, in this State. The subject of this sketch left home at the age of fifteen, and by means of hard work and teaching school, succeeded in acquiring a limited education. In 1847, he began the study of medicine with Dr. Alexander Fisher, of Western Star, and in the two following winters attended lectures in the Cleveland Medical College. In 1850, he went to California where he remained about three years, going from there to Australia, then to London and finally back home again in 1854. During the winter of 1854-55, he attended lectures at Cleveland Medical College, and the following winter went to Jefferson Medical College, Philadelphia, graduating in the spring of 1856. After practicing in Sharon, Medina County, for nearly a year, he settled on a farm near Western Star, where he now resides. For a few years he devoted part of his time to practice, but soon dropped medicine entirely and paid his entire attention to farming. In 1870, he was elected to the office of County Commis-

sioner, which office he held by virtue of re-elections until 1879, when he resigned by reason of his election to a seat in the State Legislature.

Dr. F. F. Falk served during the late war as Hospital Steward of the Sixteenth Ohio Volunteers, and while acting in that capacity read medicine under the preceptorship of Dr. B. S. Chase. After being mustered out of service he attended lectures at Starling Medical College, Columbus, Ohio, receiving his degree in the spring of 1865. He then went to Nashville, Tenn., where for the next six months he did efficient hospital duty under an appointment of Assistant Surgeon United States Army. Upon his return to Ohio, he located at Western Star; but after a few years practice he fell a victim to consumption and died.

Dr. Charles F. H. Willgohs, a native of Germany, settled at Dennison, in Norton Township, about the year 1870, and continued practicing there until about 1878, when he removed to Doylestown, Wayne County, his present home.

Dr. F. W. Swan, a native of Pennsylvania, succeeded Dr. Dreher, as the next physician, at Loyal Oak. He remained but two years.

Dr. William T. Parmele, a native of New York State, came to Loyal Oak in 1875. After practicing in that place about three years, he went to Greensburg, but two years later, in 1880, returned to Norton Township, locating this time in New Portage, where he is now practicing.

Dr. Austin T. Woods read medicine with Dr. J. A. Knowlton and Dr. H. M. Fisher, of Akron, graduated from Cleveland Medical College in 1879, and soon afterward began practicing at Loyal Oak, where he is at the present time.

Dr. A. B. Campbell, Dr. Griesmer, Dr. Zwisler and Dr. Mikesell, each practiced in the township a short time.

Dr. Alpheus Babcock was one of the earliest settlers of Coventry Township, and practiced there for a number of years.

Dr. Elijah Canfield, another of the early settlers, practiced medicine in the township for over thirty years.

Dr. Samuel Austin practiced in the township a few years.

Dr. Jackson Chapman began practicing in Copley about the year 1835, and continued twelve or fifteen years.

Dr. Byron Chapman began the practice of his profession in Copley about 1845, and has continued up to the present time.

The history of Green Township furnishes us with an addition of about fifteen to our already long list of Summit County doctors, but, unfortunately for the reader as well as for future historians, little if anything more than a mere mention of their names can be said of a majority of them at this time.

Dr. Smith, first name not known, was the first man who practiced medicine in this township, and all that can be learned concerning him is that he was an old man in 1830.

Dr. John Thomas was the first physician in the village of Greensburg. He came there about 1838, and remained two years, removing thence to Wood County.

Drs. A. H. Mann, H. Peters, Jacob Musser, Wesley Boden, David Joseph, Benjamin F. Sampson and Garber followed in close succession, each remaining a year or two. Then came Dr. C. A. Perdue, who practiced in the village about six years, though not continuously. Next came Dr. Markam, who remained one year; then Dr. O. E. Brownell, who remained ten years, and is mentioned among the Akron sketches. Following him came Dr. Howland who remained two years, Dr. Parmele, one year, and Dr. Reynolds, who was there at the same time and also remained one year.

East Liberty has had two doctors, L. S. Witwer and Jonathan Buchtel, each of whom remained about six years. The township is without a physician at present.

Richfield Township has for the last fifty years or more been well supplied with medical men, so far at least as numbers are concerned; and from the date of the earliest settlements in the county up to 1840, the surrounding towns to a distance of about eight or ten miles depended upon Richfield doctors.

Dr. Secretary Rawson, the first physician in the township, was born in the town of Warwick, now Franklin Co., Mass., in the year 1796, and received his early education in the common schools of that State. At the age of ten he

received from an uncle a share in a circulating library, which for the next six years occupied his leisure hours: reading mostly at night and by the light of a pitch-pine knot stuck in the chimney corner, which, "as he says," not only gave light and intelligence to the recipient, but to the whole household. When seventeen years old he began a regular course of study at New Salem Academy, where he continued through the summer months of the next four years, his winters in the meanwhile being spent in teaching school. He then entered the office of Dr. Secretary Rawson, of Waterbury, Vt., where he remained two years, going thence to Royalston, Mass., where he spent three years in the office of Dr. Batchelor. During the last two years of his medical course of study he practiced enough to pay his own expenses, and at its close received a diploma from a medical society at Montpelier, Vt. In 1823, he came to Ohio, and after practicing one year in Madison, Geauga County, came to Richfield, where he continued in active practice for the next forty-two years. In 1866, he removed to Des Moines, Iowa, where he still resides. He was always an energetic and well-informed physician, and had the will and ability to defend his opinions with tongue or pen, being then, as he is now, a frequent contributor to the newspapers.

Dr. Bela B. Clark practiced in Richfield from 1830 to 1836, going then to Brunswick, Medina County. Next came Dr. Hiram Wheeler and Dr. William Munson, both of whom did a large business for a number of years. The former died several years ago, and the latter is now living in Independence, Cuyahoga County. Following these came a Dr. Everett, who practiced in the township a few years only.

Dr. Nathan Stevenson read medicine in Richfield with Dr. Munson, and after graduating from a college in New York City, practiced some years with his preceptor. He then removed to Illinois; served as Surgeon during the rebellion, and died some years ago.

Dr. A. E. Ewing came to Richfield in 1850, and has ever since resided there except when his roaming propensity has carried him off to some other field for a short time. He graduated from an old medical college in New En-

gland, but, as he says, "is not considered quite orthodox in medicine or anything else." Dr. H. B. Johnson, now of Beloit, Wis., practiced in the township some years, and served as Surgeon of an Ohio regiment during the rebellion. Dr. I. B. Beach also practiced here a few years in company with his son-in-law, Dr. Johnson. Dr. William Jones studied medicine with Dr. Johnson, and like his preceptor served as Surgeon in the late war. Dr. Craven practiced here about three years in the first half of the present decade. Besides the above a Dr. Jewett was here a short time previous to 1840, and a Dr. Dickerson from about 1860 to 1870. Three or four homœopaths have at different times tried to gain a patronage in the township, but their success has never warranted more than a short residence in the place.

At the present time the health of the township is looked after by Dr. Ewing, Dr. Wesley Pope and Dr. Chamberlin.

In Bath Township there are several doctors practicing at present. Dr. E. K. Nash, at Montrose, and Dr. R. Randall, at Hammond's Corners.

In Franklin Township Dr. Adam Sisler, a native of Pennsylvania, has practiced in Manchester since about 1850. Dr. D. Rowe has practiced in the same place since about 1873 or 1875.

Twinsburg Township has found need for physicians like all the world beside, but very few have ever found it a profitable field for practice.

Dr. Otis Bois, from Blanford, Mass., came to the township about 1834, and practiced medicine about two years in connection with carrying on a general merchandise store. The next was Dr. Taylor, from Aurora, Portage County, who came to Northfield about 1840, and practiced successfully about three or four years. Following Dr. Taylor came Dr. John E. Stevens, who remained a few years and then went to Youngstown, Ohio. About the same time or perhaps a little later, Dr. Selby moved into the township from Colimer, and remained a few years. In 1863, Dr. Collins, of Bedford, came into the township where he practiced for the next three or four years. About the same time Dr. Seth Freeman, who

had privately read homœopathy, began the practice of his profession, and has advanced to a fair business. Not far from the same time Dr. Proctor Clark, after attending lectures in Cleveland began the practice of homœopathy.

Suman Griste, a brother-in-law of Dr. Freeman, studied homœopathy with the latter, and is to-day practicing his profession.

The first physician of whom we have any record as having practiced in Northfield Township was Dr. Hosea Bliss. He graduated from Burlington (Vermont) College, in 1825, and in 1834, came to Northfield where he continued in practice until the time of his death, in 1874.

Dr. Perkins Wallace came to Brandywine, in this township, some time about 1836, and remained one year. After this we find the names of Dr. Caruther, Dr. Jones, Dr. Benjamin, Dr. Haseltine, Dr. Carley, homœopath, and Dr. Crammer, homœopath, each of whom remained about one year.

Next came Dr. H. B. Hart, who remained two years.

Dr. R. S. Hubbard came to the place in 1877, and continues in practice at the present date. He was educated at Baldwin University, and is a graduate of Charity Hospital Medical College.

The only physician who was ever located in Stow Township was Dr. Luther Spaulding. He came from Connecticut and located at what is known as Stow Corners in the spring of 1825, practicing there until August of the same year, when he died.

From Boston Township we get the following brief history: Dr. S. Pixley was born in Franklin County, Mass., in 1816, but came to this county before he was a year old. Having received his preliminary education at the common schools and Wadsworth Academy, he began the study of medicine with Drs. Trask and Leonard, of Stringsville, about the year 1841. He afterward read one year with Dr. Munson, of Richfield. Graduated from Cleveland Medical College in 1847, and since then

has practiced most of the time in Peninsula.

Dr. Humphrey read medicine with Dr. Pixley, and has practiced in Peninsula for fourteen years.

Dr. A. M. Cole also read medicine with Dr. Pixley, and has been in Peninsula for the last six years or more, though engaged in other business than the practice of his profession during most of the time.

Coventry Township has for the most part depended upon Akron and Manchester for its doctors. Dr. William Reed practiced for a number of years in Thomastown, and, about 1876, removed to Mogadore. Dr. J. W. Sorrick was born at Manchester, this county, in 1848, and received his education in the common schools of that place, and the Normal School at Lebanon, Ohio. About 1871, he began reading medicine with Dr. W. C. Jacobs, of Akron, and, in 1875, graduated at medical college of Ohio at Cincinnati. Practiced in Akron until 1878, since which time he has been practicing at Thomastown. Dr. John B. Thomas was reared in the vicinity of Thomastown, read medicine with Drs. Bowen and Foltz; graduated at Charity Hospital Medical College, Cleveland, in 1880, and has since then been practicing at his old home.

It is but appropriate that some notice of the medical societies of Summit County should be made in this sketch of the profession. Our limited space, however, will admit of the very briefest mention. As early as 1842, the members of the medical profession met together and organized a society by adopting a "preamble and constitution," and formally constituting themselves into a regular society. This society continued in existence a number of years, and finally became extinct. Again, in February, 1866, a meeting was held in the office of Dr. J. J. Smith, its object being the re-organization of a medical society, and as a final result the "Summit County Medical Society" was organized. This society is still in existence, and is an institution of considerable interest to the profession of the county.

George Miller

CHAPTER VII.*

PORTAGE TOWNSHIP—INTRODUCTION—TOPOGRAPHY—EARLY SETTLEMENT—CANAL LOTTERY—
THE COUNTERFEITING PLOT—TOWNSHIP OFFICERS, ETC.

THE township of Portage possesses a peculiarly interesting history. Its celebrated "Portage Path" not only furnished a name to the township, but also to the county in which it was situate prior to the erection of Summit County. As the Portage Path has served so many uses as a boundary line, it will not be out of place to here briefly note them. In the first place, it constituted a portion of the ancient line of separation between the confederated Six Nations and the Western Indians. By the treaty of Fort McIntosh, near where is now Beaver, Penn., in 1785, the United States acquired from the Indians all the territory beyond the Ohio River and east of this line. When the great Northwest Territory, including this and more, was established in 1787, by ordinance of the Continental Congress, the Governor and three Judges thereof were appointed by Congress. These men entered upon their duties with headquarters at Campus Martius, now Marietta. Their first act was to create the county of Washington, July 27, 1788, named in honor of Gen. George Washington. Its western boundary was the Cuyahoga River, the old portage path, and the Tuscarawas River as far south as the southern line of the Western Reserve. This was practically the western border of the United States, and so remained until the year 1805. In 1796, August 15, the county of Wayne was set off, having for its eastern limit the same line. July 29, 1797, Jefferson County was erected out of Washington, its western line being so far coincident with that of Washington.

On the 4th of July, 1805, at Fort Industry, on the Maumee River, representatives of both the General Government and the Connecticut Land Company, after much delay and reluctance on the part of the Indians, succeeded in negotiating a treaty with them, by which a final settlement of their unextinguished claim to all lands of the Reserve west of the Cuyahoga River, the portage path and the Tuscarawas

River, was accomplished; all their right and title to the lands in question were thereby ceded to the United States. Thus we see that for a considerable time a portion of what is now the township of Portage was within the United States, while another portion was not. After several further unimportant territorial modifications, the counties of Cuyahoga and Portage were authorized the same day, by act of the Ohio Legislature, February 10, 1807, and were both within a few years erected in accordance with that act. Now, for the first time, the "Portage Path" loses its distinctive service of importance as a dividing line. All the early conveyances of land in its vicinity make frequent reference to it as a well-known monument, and all parcels abutting upon it were so described and bounded. And now, having at such length evolved it historically, let us inquire as to just what the path was. Years before the white man invaded this country, the Indians had been in the habit of traveling across between Lake Erie and the Ohio River. The canoe was their most natural and easy mode of journeying. Ascending the Cuyahoga as far as the great bend, then transporting the boats and luggage by this, the shortest trail, a little more than eight miles in length, over to the headwaters of the Tuscarawas, they could reach the Ohio by way of the Muskingum River without again touching land. Many a burden of those various things in which their traffic consisted has been packed "over the portage," one of the links in this chain of communication and commercial highway. One of the very earliest maps of this section known, is that of Evans', published in Philadelphia in the year 1755. Upon it appears, with tolerable geographic accuracy, the "Cuyahoga" River, the "Portage," and a stream evidently designed to represent the Tuscarawas.

In a publication by Capt. Thomas Hutchins, London, 1788, is a mention, among the "Carrying Places between the Ohio and Lake Erie," as follows: "From Muskingum to Cuyahoga,

* By Charles Whittlesey Foote.

a creek that leads to Lake Erie, which is muddy and not very swift, and nowhere obstructed with falls or rifts, is the best portage between the Ohio and Lake Erie."

Evidences of the location of the path were plainly visible many years after its original followers were sunk again into the retreating forests. In fact, the track may now be observed in places, and the entire course closely followed from end to end. The path was very winding, a characteristic of all Indian trails, avoiding hills wherever possible and sidling up them when they must be climbed. Leaving the Cuyahoga near the present village of Old Portage, perhaps three miles north from Akron, it ran up the hill westwardly a half mile, then south-erly until near Summit Lake, passing just west and outside of the present corporation of Akron City; thence nearly south to the Tuscarawas, which it reached about a mile above New Portage.

In July, 1797, Moses Warren, one of the Connecticut Land Company's surveyors, ran the path from the Cuyahoga southward, meeting Seth Pease, who, with his party, had been running the southern line of the Reserve. He made the length of the path 644.55 chains, or 8 miles 4 chains and 55 links. The path was again surveyed in 1806, by Abraham Tappan.

To Col. Whittlesey's valuable "Early History of Cleveland," we are indebted for the following interesting description of a scheme looking to the improvement of this highway of commerce:

The improvement of the Cuyahoga and Tuscarawas was then (1807) the great idea of this part of the country and of Ohio.

It was thought if \$12,000 could by some means be raised, the channels of those streams could be cleared of logs and trees and the portage path made passable for loaded wagons. Thus, goods might ascend the Cuyahoga in boats to the Old Portage, be hauled seven miles to the Tuscarawas, near New Portage, and thence descend that stream in batteaux. This great object excited so much attention that the Legislature authorized a lottery to raise the money. A copy of the scheme and one of the tickets is here given:

Q

No. 11441

CUYAHOGA AND MUSKINGUM NAVIGATION LOTTERY.

This ticket entitles the bearer to such Prize as shall be drawn against its number (if called for within twelve months after the drawing is completed), subject to a deduction of 12½ per cent.

No. 11441

J. WALWORTH.

Agent for the Board of Commissioners.

SCHEME OF A LOTTERY FOR IMPROVING THE NAVIGATION BETWEEN LAKE ERIE AND THE RIVER OHIO, THROUGH THE CUYAHOGA AND MUSKINGUM.

THE Legislature of the State of Ohio having, at their last Session, granted a Lottery to raise the sum of Twelve Thousand Dollars, for the above-mentioned purpose and appointed the subscribers commissioners to carry the same into effect. They offer the following SCHEME to the public:

FIRST CLASS.

12,800 TICKETS AT \$5 EACH, \$64,000.		
1 Prize of . . . \$5,000 is	\$5,000	\$5,000
2 do 2,500	5,000	5,000
5 do 1,000	5,000	5,000
10 do 500	5,000	5,000
50 do 100	5,000	5,000
100 do 50	5,000	5,000
3400 do 10	34,000	34,000
<hr/>		
3568		\$64,000

Prizes subject to a deduction of twelve and a half per cent.

The drawing of the First Class will commence at Cleveland on the first Monday of January, 1808, or as soon as three-fourths of the tickets shall be sold; and the prizes will be paid in sixty days after the drawing is completed.

Holders of Tickets, drawing prizes of Ten Dollars, may, at their election, receive the money, or two Tickets of Five Dollars each in the Second Class.

For the convenience of the owners of fortunate numbers, Persons will be appointed in Boston, Hartford, New York and Albany, to pay Prizes. Their names, together with a List of Prizes, will be published in some Newspaper printed in each of those places, and in three of the Newspapers printed in the State of Ohio. Persons will also be designated to pay Prizes in Zanesville and Steubenville.

The subscribers have taken the Oath and given the Bonds required by Law, for the faithful discharge of their trust, and they flatter themselves that an object of such extensive importance will not fail to attract the attention and patronage of many, who are not allured by the advantageous prospects held out in the Scheme.

John Walworth, Esq., of Cleveland, is appointed Agent of the Commissioners, to sign the Tickets and transact the business of the Board in their recess.

(Then follow the names of the twelve members of the Board of Commissioners.)

CLEVELAND, May 23d, 1807.

CRAMER, PRINTER.

The drawing never came off. Those who had purchased tickets, many years afterward received their money back without interest.

The price of each ticket was \$5.

The native timber of this section was oak, hickory, maple, chestnut and box, according to

the notes of Moses Warren, Jr., before referred to.

The white man who first settled permanently within this township came from Groton, New London Co., Conn., Maj. Minor Spicer, in the summer of 1810. He purchased from the Connecticut Land Company, whose headquarters were at Hartford, Conn., and who originally bought the entire territory of the Western Reserve from the State of Connecticut (excepting two tracts previously sold, together aggregating something over a half million acres, or about one-sixth part of the whole area). Maj. Spicer's farm consisted of 260 acres of land, two-fifths of a square mile, and was situated about midway between what is now Akron's Sixth Ward and South Akron. From that time to this there have always been members of the Spicer family living upon the site of the original purchase, and "the Spicer settlement" is a well-known section of town. Just what was paid for the land we have been unable to ascertain. It is worth noting, however, that the State of Connecticut, in October of 1786, several years prior to her sale of the Reserve to the Land Company as mentioned above, by resolution fixed the selling price at *three shillings* (50 cents) per acre. With a spirit strongly characteristic of the time and thought, she also provided that 500 acres of land in each township should be reserved to the support of the Gospel ministry (in those days there was no opposition to a union of church and State), 500 acres to the maintenance of schools, and 240 acres to the first minister who should locate within the township. As Connecticut did not succeed in disposing of her land at the figure above given, she once more, in May, 1795, resolved the price at not less than *one-third* of a dollar an acre. The ensuing summer developed only fruitless negotiations, but, finally, on the 2d of September of the same year, a bargain was struck by the terms of which 3,000,000 acres of the Reserve next west from the Pennsylvania line (which was afterward found to be a little in excess of the exact quantity of land then actually remaining within the limitations of the Reserve, after deducting the "Salt Spring Tract" of 24,000 acres already sold to Gen. Samuel H. Parsons, and located in Trumbull County, and the grant of 500,000 acres commonly known as the Fire Lands, from the western end (in 1792), were decided to the Land

Company for the consideration of \$1,200,000, or 40 cents per acre.

To return from our digression: At the time when Maj. Spicer prospected and located his purchase, he was the only white person within the township. About him stretched the unbroken forest with no clearing nor path, save that made by the hostile aborigine. In a sense more literal and forcible than comes to most men, was it true that

"The world was all before him, where to choose
His place of rest."

With admirable judgment he made his selection. After some little labor and improvement, he returned in the fall of the year, to his home and family in the East. Leaving Groton again in June, of 1811, with the sturdy conveyance of an ox team and wagon, and this time accompanied by his family, his brother Amos and Paul Williams, he once more reached the spot that was for more than twoscore years to be his home. Vigorous efforts soon erected a log house, the first in Portage Township, the site of which was but a few rods from the comfortable residence where still lives Avery Spicer, son of Minor, in the dignity of a ripe old age and the assurance of the esteem and respect of an entire community, sprung up beneath his observation, and the recipient of many and substantial favors at his hands. Mrs. Avery Spicer, a daughter of Joshua King, Esq., was born at Old Portage, and was the first white child born in the township.

We subjoin an incident in the life of Maj. Spicer, as we find it narrated in Howe's "Ohio, its History and Antiquities:"

One night just before retiring, he heard some one call in front of his house, and went out and saw a large Indian with two rifles in his hand, and a deer quartered and hung across his horse. Spicer inquired what he wanted. The Indian replied in his own dialect, when the other told him he must speak English or he would unhorse him. He finally gave him to understand that he wished to stay overnight, a request that was reluctantly granted. His rifles were placed in a corner, his venison hung up and his horse put into a large pig-stye, the only stable attached to the premises.

The Indian cut out a piece of venison for Mrs. Spicer to cook for him, which she did in the usual way, with a liberal quantity of pepper and salt. He drew up to the table and ate but a mouthful or two. The family being ready to retire, he placed his scalping knife and tomahawk in the corner with his rifles, and stretched himself upon the hearth before the fire. When he supposed the family were asleep, he raised himself slowly from his reclining

position and sat upright upon the hearth, looking stealthily over his shoulder to see if all was still. He then got up on his feet and stepped lightly across the floor to his implements of death. At this juncture, the feelings of Spicer and his wife may be well imagined, for they were only feigning sleep and were intently watching. The Indian again stood for a moment, to see if he had awakened any one, then slowly drew from its scabbard the glittering scalping knife. At this moment, Spicer was about putting his hand upon his rifle, which stood by his bed to shoot the Indian, but concluded to wait further demonstration, which was an entirely different one from what he had anticipated, for the Indian cut a piece of his venison, weighing about two pounds, and laying it upon the live coals until it was warmed through, devoured it and went to sleep. Mrs. Spicer's cooking had not pleased him, being seasoned too high.

In the year 1811, a large body of Indians, under the leadership of one of their braves, Onondaga George, evidently ill-natured and bent on trouble, suddenly appeared along the Cuyahoga River. A few days later, they as suddenly disappeared. Soon after their departure came tidings of the battle of Tippecanoe. It then became clear that these Indians were plotting to act their part in a great intended tragedy, the massacre of all the frontier whites, but were deterred from carrying the terrible project to an accomplishment by the intelligence, brought them by their fleet runners three days before it reached the settlers, of the disastrous issue of that battle. While they remained hovering about the neighborhood, they kept a lookout stationed upon the high bluff west of the canal lock at Old Portage.

During the war of 1812, a camp was established at Old Portage (or as it was then known and had been since the exploring expedition of the surveyors of 1797, the Upper Headquarters) by Gen. Wadsworth in September. The post was regarded as of great importance throughout the war. In order to reach the immediate scene of action, Gen. Wadsworth's soldiers, not daring to follow the lake shore from Cleveland to Huron on account of the British, ascended the Cuyahoga as far as the Upper Headquarters. Thence they felled trees and cut a road northwesterly through the woods to Camp Avery on the Huron River, not far from where Milan now stands, a distance of sixty-five miles. This road was of great service to the American forces. It was afterward known as the "old Smith road," and portions of it are to this day used for purposes of travel.

The next year, 1813, there were built at Old Portage and floated down to Lake Erie, two vessels, the Portage and the Poreupine, which took a conspicuous part in the ever memorable naval victory achieved by Commodore Perry, September 10.

For a time, Minor Spicer, Amos Spicer and Paul Williams, with their families, constituted the entire settled population of the township. Others, however, began to come in, among them being Charles W. Brown, in 1816, and Talmon Beardsley, Andrews May and Julius Sumner, in 1818.

In 1825, the town of Akron was laid out; the same year work was here begun upon the Ohio Canal, and a great number of laborers were imported for its construction.

Ohio Canal.—We, of a day of steamboats and a multiplicity of railroads with the full and rapid transportation they afford, cannot appreciate the importance to the early pioneers of this enterprise, which was regarded as a wonderful accommodation, inasmuch as by its means the few necessities unobtainable from their wilderness surroundings could be brought from the regions of civilization at the remarkable speed of four miles an hour, and as often as once or twice a week. The Ohio Canal, originally denominated the "Lake Erie and Ohio Canal," was first formally suggested in a resolution brought before the lower body of the Assembly, January 7, 1819.

Six and a half years elapsed before work was actually commenced. Finally, on the 4th of July, 1825, in the presence of Gov. De Witt Clinton, of New York—the man to whom more than any other is to be accredited the honor of the successful accomplishment of the great Erie Canal—and other notables, the first spadeful of earth was upturned upon the Portage summit near Summit Lake. The thing first required was the lowering of the surface of that lake five feet, which was done by means of a ditch cut to about where Lock No. 1 now stands.

It was worth noting, in passing, that the water of Summit Lake flows both north by way of the canal, Lakes Erie and Ontario, and the St. Lawrence River to the Atlantic Ocean, and south via canal, Ohio and Mississippi Rivers and Gulf of Mexico, ultimately reaching the same great depository. The work all along the line from Portage summit to Cleveland (as it

was then spelled), was speedily let to contract and energetically prosecuted. Precisely two years to a day from the practical inception of the work, on the 4th of July, 1827, the first boat—the Allen Trimble—with Gov. Trimble, the Canal Commissioners, and other prominent persons on board, cleared from Akron, passed over the thirty-seven intervening miles of water, and reached Cleveland the same day. Here was an event of no slight moment to the people of Akron and vicinity. It constituted an epoch in the town's history. Henceforward there was to be easy communication with the most considerable town west of Marietta, and Akron's certainty of development was secured.

After many obstacles overcome and vast labor expended, the canal was completed from Cleveland to Portsmouth in the summer of 1833.

The total of the receipts for tolls and water rents at the Akron office for the year 1835 was \$7,028.23, a very creditable showing for so early a day.

Immediately upon the opening of the canal for business between Akron and Cleveland, in 1827, Wolsey Wells was appointed Collector of the Port. He appears to have been a man of versatile talents, or at any rate of varied occupations. Besides his Collectorship, he held the position of Postmaster, and was also attorney at law and a Justice of the Peace. Notwithstanding all these respective duties, a desk of two feet by one and one-half, sufficed to contain all his business papers.

Doubtless every one, during the last year, has read or heard of the early experience, as driver upon a canal, of the man who now fills the highest place within the gift of the American people. James A. Garfield once, when a young man, worked upon this same Ohio Canal, and, as in everything else to which he turned his hand or attention, did his work well. As he was passing down the Valley Railroad one day last fall (1880), in company with President Hayes and others, he pointed out many familiar places along the line of the canal, and regaled his companions with anecdotes and incidents connected with his former acquaintance with it under so diverse circumstances.

The Counterfeiting Plot.—We have also to record as matter of history, a thing which for years rendered the northern portion of Portage Township and vicinity very notorious, and im-

pressed a blight which never has been, and probably never will be, effaced. We refer to the remarkable operations of the gang of counterfeiters, which, through a period of nearly or quite a score of years, made their headquarters and conducted their business at Old Portage and Yellow Creek. Without question, this was the most thorough, daring and successful scheme of the sort ever devised and carried out in this country or any other. The system had its ramifications throughout the whole United States and Canada; not a State or Territory but had its agents, and scarcely a county in any State without them. The head and front of this stupendous complication was one James Brown, a man of rare talent, of wonderful energies, and possessed of a degree of personal attraction and power few men have ever wielded. He was six feet and two inches in height, with a well-proportioned fine physique, of commanding presence, and keen, penetrating eyes, like an eagle's. Just how early he began the work is not known, but early in the thirties he was notorious as the "Prince of counterfeiters" in all the country round. Many marvelous stories are told of his achievements. One of the earliest of his exploits consisted in passing off upon a prominent New England bank a forged draft. Relays of fleetest horses had been previously provided at a series of stations known to himself, and in care of his agents. He departed instantly, rode day and night until he reached home at Yellow Creek. He was arrested, taken East, and, upon trial, established an alibi to the satisfaction of the Court, proving by numerous and trustworthy witnesses that he was seen here so soon after the occurrence at the bank that, as the Court held—"it was utterly impossible that he could have been there so shortly before." In conversation, he seemed to delight in letting fall remarks confirmatory of his general reputation, yet never saying anything distinctly declaring its well-foundedness. A young man, whose youth had been spent in Western New York, and who, like every one else, had heard many tales of the prowess of Jim Brown, became an assistant teller in a Cleveland bank. One day, a tall man of impressive appearance called at the bank, produced a large amount of money and an account book, stating that he wished to make a deposit. Upon the book the clerk noticed the name, James Brown. Half frightened and thrilled to the marrow at sup-

posing that he was at last beholding the veritable genius of the wonderful stories of his boyhood, he stepped to the cashier, and in an awed whisper inquired if this were *the* Jim Brown, and if so, whether he should receive the money. The cashier replied "certainly." The clerk stepped back to the counter, when Brown, who readily guessed the nature of the quick conference, observed, "Young man, you need not be concerned that I should bring anything but good money here!"

He had some traits of character which any man might well emulate. It is said that his word was always as good as a bond. That he should be so rigid in keeping a promise and entertain so high an idea of personal honor, coupled with a profession seemingly so devoid of everything of the kind, was indeed strange. About the year 1832, he was tried in the Medina Court of Common Pleas upon the usual charge of counterfeiting. The confinement of the jail was exceedingly irksome to one of his vigorous, energetic temperament. So great confidence had the Sheriff in Brown's veracity, that, upon his request and a parole promise to return at night, he permitted him every morning to go out, unattended, and spend the day as and where he chose. He never proved recreant to the trust, but returned regularly and voluntarily each evening. He was convicted and sentenced to the penitentiary. The Sheriff started with him for Columbus, but was overtaken by the service of a writ of error at Mt. Vernon, and obliged to return. The judgment of the Court of Common Pleas was reversed. Brown gave bail for his appearance at the proper time, but before the trial came on, two or three essential witnesses had disappeared, and the indictment was nollied.

So great was Brown's popularity in his own neighborhood that he was repeatedly elected to township offices. He held the position of Justice of the Peace several successive terms; in fact, was an incumbent of that office when, in 1846, the first check was put upon his career. It was largely due to this condition of things that it was impossible to secure his conviction by the ordinary methods of the lower courts. This was often attempted and as often failed, until it was generally recognized by every one else as well as himself and friends. Of this immunity he publicly boasted; when at last, by the intervention of Federal processes, he was

brought to bay, he is said to have observed, "Well, boys, now the United States have taken hold of me, I may get floored, but I could have worried out a county." In 1846, William S. C. Otis was the Prosecuting Attorney for Summit County. That year proof was obtained that Brown was at the time engaged in counterfeiting the circulating coin of the United States.

Through the efforts of Otis, Samuel W. McClure, Esq., then a young lawyer of Cuyahoga Falls, was appointed a United States Commissioner for the State of Ohio (the State being then comprised in one district), for the purpose chiefly of instituting proceedings against Brown through the media of the Federal Courts, those of the State being found insufficient, as Commissioner McClure issued a warrant for his arrest. While the warrant was yet in the hands of Sheriff Janes, then Sheriff of Summit County; but, prior to its service, McClure had occasion to represent a party litigant before Brown in his capacity as Justice of the Peace. Brown reserved his decision of the case for further consideration. In the meantime, he was placed under arrest and imprisoned. McClure, in behalf of his client in the case, called upon Brown in the jail, before the day assigned for the preliminary examination. Brown then announced his judgment as Justice in favor of McClure's client, and, at the same time remarked, that when *his* case should come before him (McClure) he hoped *he* would be able to render a judgment in *his* favor. The preliminary examination came on for hearing; the United States was represented by Otis, and the defense by R. P. Spalding, afterward Judge Spalding of the Supreme Bench. The examination was held at the court house and continued several days. It resulted in Brown's being held to bail in the sum of \$20,000 for his appearance before the Circuit Court of the United States at Columbus at its next session. In default of bail, he was returned to jail; but afterward, upon application to a Federal Judge, the bond was reduced to \$5,000. That amount was furnished, and Brown set at liberty. He appeared at Columbus for trial. The District Attorney was assisted by Mr. Otis. Pending the trial, affidavits were filed, satisfying the Judge that if at liberty when the verdict would be rendered, and that verdict should be *guilty*, it was the intention of Brown's friends—of whom Columbus was full—to put him out of the way of the consequences.

A bench warrant was issued, and he was again imprisoned. He was convicted, and, for the first time in his life, incarcerated in the Ohio Penitentiary, though he had run a career of crime for over twenty years. During the short time of Gen. Zachary Taylor's Presidency (March, 1849, to July, 1850), the Asiatic cholera broke out in the Ohio Penitentiary. Brown was himself an attendant in the prison hospital at the time, and such was the courage with which he cared for the cholera patients, and his unwearied attention to them, that he secured the influence of that institution, and some of the State officers, so that President Taylor was induced to and did pardon him. He returned to his former place of residence in Northampton, and was believed to be as extensively engaged in the counterfeiting business as ever, though it was not known that he then dealt in spurious coin. Experience had taught him that it was easier, more profitable, and less liable to detection to manufacture false paper money than coin. It is said that he had a confederate in the very banking house which then stamped for and furnished bills to the United States Bank; that through the agency of this pal, the genuine plates themselves were conveyed into Brown's hands, and immense quantities of the illegal issue (not exactly counterfeit, inasmuch as they were struck from the identical plates with the true, and, therefore, also not discoverable through any peculiarities of impression), particularly of \$100 bills, were accumulated. About this time, James, and a brother Daniel, engaged in the same enterprise, conceived a scheme of bold magnitude, and extremely flattering in promise. This was no less than to procure a suitable ship, load her with this spurious scrip, and visit China and other oriental countries, where United States Bank bills circulated at par, purchasing a cargo of teas, coffees, silks, etc., to be disposed of again in England and upon the continent. They had associated with them in this device a man by the name of Taylor. They proceeded to New Orleans, obtained a vessel, filled it according to programme, and set sail for China. A discovery of their real character, however, was just then made, the vessel overhauled before fairly out of the Mississippi, and the three rogues committed to the "calaboosc." There they were detained some time. Daniel became sick, and finally died, as it was reported, but not generally believed, in

this section of the country. Certain it is, however, that he never appeared hereabouts thereafter, and so, possibly, the report may have been true. The wife of James, who, though believed to have had nothing to do with her husband's operations, remained faithful and devoted to him until some years beyond this period, traveled on horseback from Old Portage to New Orleans in order to be present at the trial, and use her influence in his behalf. Several other witnesses also went down from here to testify in his interest. Brown turned State's evidence, implicated Taylor, and himself escaped. This is one of the few really *mean* incidents related of him.

A few years later he was arrested in Michigan, convicted of the same crime, and sentenced to the Jackson Penitentiary. He there served a full term of three years, whence he returned to Northampton, but returned a broken-down man and a confirmed drunkard. Not until now did his fond wife give him up. His habits of drink rapidly grew upon him; his good traits began to deteriorate, and finally departed altogether; his wife obtained a divorce, and Jim Brown, who, had his abilities been honorably directed, might have been a man of great power and influence, became a perfectly worthless fellow, not even commanding the respect of his associates in crime. Finally, in 1865, as he was one day returning from Cleveland upon a canal boat, he fell from the walking plank to the hold, striking his head upon a beam. The concussion rendered him unconscious; from that state he never rallied, but died two or three days later. So miserably closed the life of a man of whom it was said that "he was as well known by reputation as any President of the United States."

Officers of the Township.—The following is a list of the officers elected on the 2d day of April, A. D. 1838, at a meeting held at the house of Mr. Warren H. Clark.

Trustees.—William B. Mitchell, Simon Perkins, Jr., and George Babcock; Clerk, Horace K. Smith; Treasurer, Samuel A. Wheeler.

Since that time the following persons have been elected and served as Trustees:

1839, William B. Mitchell, Simon Perkins, Jr., John Sherbondy; 1840, Charles W. Brown, Jesse Allen, John Ayres; 1841, Simon Perkins, Jr., Jesse Allen, Charles W. Brown; 1842, Simon Perkins, Jr., Eber Blodget, Charles W.

Brown ; 1843, Simon Perkins, Jr., Eber Blodget, Charles W. Brown ; 1844, Simon Perkins, Jr., Moses Smith, John Sherbondy ; 1845, Simon Perkins, Lucius V. Bierce, Silas M. Wilder ; 1846, Silas M. Wilder, Lucius V. Bierce, Justus Gale ; 1847, Henry Converse, Lucius V. Bierce, George Sherbondy ; 1848, Webster B. Storer, David Miller, John Ayres ; 1849, David Miller, Nathaniel Finch, George Sherbondy. In October, Miller died, and George D. Bates was appointed to fill the vacancy ; 1850, Nathaniel Finch, George Sherbondy, Joseph F. Gilbert ; 1851, Joseph F. Gilbert, Ira Hawkins, Robert Jackson ; 1852, Elias W. Howard, George Sherbondy, Robert Jackson ; 1853, Joseph F. Gilbert, Robert Jackson, George Sherbondy ; 1854, Ira Hawkins, Elias L. Munger, George Sherbondy ; 1855, George W. McNeil, Elias L. Munger, George Sherbondy ; 1856, Benjamin McNaughton, George W. McNeil, Reuben Sherbondy ; 1857, Charles Merriman, Clement J. Kolb, Webster B. Storer ; 1858, George Miller, Melchiah Sherbondy, Jacob Snyder ; 1859, Houston Sisler, Clement J. Kolb, John R. Buchtel ; 1860, Houston Sisler, John R. Buchtel, Clement J. Kolb ; 1861, Houston Sisler, John R. Buchtel, C. Oberholtz ; 1862, Houston Sisler, John R. Buchtel, C. Oberholtz. In June of 1862, Houston Sisler died and Roland O. Hammond was appointed for the unexpired term ; 1863, John R. Buchtel, Simon Perkins, G. F. W. Fisher ; 1864, Simon Perkins, John R. Buchtel, G. F. W. Fisher ; 1865, Simon Perkins, John R. Buchtel, G. F. W. Fisher ; 1866, John R. Buchtel, James F. Scott, Clement J. Kolb ; 1867, John R. Buchtel, F. T. Husong, Joseph Babb ; 1868, Joseph Babb, F. T. Husong, Abraham Sichley ; 1869, F. T. Husong, Joseph Babb, Millard F. Hamlin ; 1870, Joseph Babb, Millard F. Hamlin, N. C. Hawkins ; 1871, Millard F. Hamlin, N. C. Hawkins, Abner C. Caldwell ; 1872, N. C. Hawkins, Millard F. Hamlin, H. Sherbondy ; 1873, H. Sherbondy, Millard F. Hamlin, Frederic Oberholtz ; 1874, A. L. Caldwell, Abraham Sichley, Henry Frederick ; 1875, Henry Frederick, Abraham Sichley, A. L. Caldwell ; 1876, Henry Frederick, A. L. Caldwell, Abraham Sichley ; 1877, Simon Perkins, Hiram Sherbondy, Abraham Sichley ; 1878, Stephen H. Pitkin, Avery Beardsley, John McCausland ; 1879, Stephen H. Pitkin, Albert H. Mallison, Ephraim Erdly. In July, Erdly died and Uriah Sherbondy was ap-

pointed to serve out the term ; 1880, Jacob Carpenter, Albert H. Mallison, Charles W. Brown ; 1881, Jacob Carpenter, Albert H. Mallison, Millard F. Hamlin.

Clerks.—1838, Horace K. Smith ; 1838, Joseph Cole ; 1840, Nahum Fay ; 1841, William H. Dewey ; 1842, H. C. Crosby ; 1843, William H. Dewey ; 1844, Nahum Fay ; 1845, Charles W. Tappan ; 1846, Charles W. Tappan ; 1847, Charles W. Tappan ; 1848, Tillman Wagener ; 1849, Tillman Wageman ; 1850, Edward W. Perrin ; 1851, Edward W. Perrin ; 1852, Roland O. Hammond ; 1853, Roland O. Hammond ; 1854, Roland O. Hammond ; 1855, Roland O. Hammond ; 1856, Roland O. Hammond ; 1857, Newell D. Tibbals ; 1858, Jacob A. Kohler, 1859, Jacob A. Kohler ; 1860, George T. McCurdy ; 1861, George T. McCurdy ; 1862, George T. McCurdy ; 1863, William C. Allen ; 1864, William C. Allen ; 1865, William C. Allen ; 1866, William C. Allen ; 1867, William C. Allen ; 1868, John McGregor ; 1869, John McGregor ; 1870, John McGregor ; 1871, John McGregor ; 1872, G. Tod Ford ; 1873, G. Tod Ford ; 1874, G. Tod Ford ; 1875, G. Tod Ford. In September, Ford resigned and Charles Baird was appointed to the office. 1876, Charles Baird ; 1877, Charles Baird ; 1878, Peter J. Moersch ; 1879, Peter J. Moersch ; 1880, Peter J. Moersch ; 1881, Peter J. Moersch.

Treasurers.—1838, Samuel A. Wheeler ; 1839, Lewis P. Buckley ; 1840, Samuel A. Wheeler ; 1841, Samuel A. Wheeler ; 1842, Samuel A. Wheeler ; 1843, Samuel A. Wheeler ; 1844, Samuel A. Wheeler ; 1845, Samuel A. Wheeler ; 1846, Samuel A. Wheeler ; 1847, Samuel A. Wheeler ; 1848, Zebulon Jones ; 1849, Zebulon Jones ; 1850, Benjamin McNaughton ; 1851, Benjamin McNaughton ; 1852, Benjamin McNaughton ; 1853, Benjamin McNaughton ; 1854, Edward W. Perrin ; 1855, Edward W. Perrin ; 1856, Edward W. Perrin ; 1857, Houston Sisler ; 1858, John T. Good ; 1859, John H. Chamberlin ; 1860, John H. Chamberlin ; 1861, Charles Cranz ; 1862, Charles Cranz ; 1863, Charles Cranz ; 1864, Charles Cranz ; 1865, Charles Cranz ; 1866, Charles Cranz ; 1867, Charles Cranz ; 1868, Charles Cranz ; 1869, Charles Cranz ; 1870, Arthur L. Conger ; 1871, Arthur L. Conger ; 1872, Arthur L. Conger ; 1873, David R. Paige Jr. ; 1874, Jacob H. Wise ; 1875, Frank B. Buchtel ; 1876, Frank B. Buchtel ; 1877, John McGregor ; 1878, John McGregor ;

1879, John McGregor; 1880, John McGregor; 1881, John McGregor.

Assessors.—The first Assessor elected was Minor Spicer in 1841; 1842, Justus Gale; 1843, Justus Gale; 1844, Justus Gale. Gale declined to serve and John H. Crawford was appointed in his stead. 1845, Albert G. Mallison; 1846, Nahum Fay; 1847, Joseph F. Gilbert; 1848, John Sherbondy; 1849, Alfred R. Townsend; 1850, Nahum Fay; 1851, George Howe; 1852, George Howe; 1853, John Sherbondy; 1854, Nahum Fay; 1855, Nelson C. Hawkins; 1856, Ira Hawkins; 1857, Alfred R. Townsend; 1858, Frank Adams; 1859, Alfred R. Townsend; 1860, Nahum Fay; 1861, Jacob H. Wise; 1862, Jacob H. Wise; 1863, Nahum Fay; 1864, Charles Hanscom; 1865, Edward A. Barber; 1866, Edward A. Barber; 1867, Homer C. Ayres; 1868, Augustus Curtis; 1869, John G. Goble; 1870, Aaron Teeple; 1871, Aaron Teeple; 1872, Albert H. Mallison; 1873, George Miller; 1874, Albert H. Mallison; 1875, George Miller; 1876, Hiram Sherbondy; 1877, Randall McAllister; 1878, Randall McAllister; 1879, Randall McAllister; 1880, Joseph Schnee; 1881, H. Sherbondy.

Justices of the Peace.—[The Justice has always been a township officer, and therefore is elected by the voters of the township. His commission is for three years.] Jacob Brown, 1836-39; Seneca L. Hand, 1836-39; Harvey

H. Johnson, 1837-40; Leander L. Howard, 1839-42; Ebenezer Martin, 1839-42; Harvey H. Johnson, 1840-43; William M. Dodge, 1842-45; Lewis P. Buckley, 1842-43; Henry Converse, 1843-46; Jacob Brown, 1843-46; William M. Dodge, 1845-48; George Babcock, 1846-49; Noah M. Green, 1846-49; Joshua C. Berry, 1848-51; George Babcock, 1849-52; Noah M. Green, 1849-52; Abel B. Berry, 1851-54; Daniel B. Hadley, 1852-55; Noah M. Green, 1852-55; Joseph F. Gilbert, 1854-57; John W. Stephens, 1855-58; Noah M. Green, 1855-58; William L. Clark, 1857-60; John W. Stephens, 1858-61; John L. Robertson, 1858-61; Edward Allen (died in June, 1861), 1860-61; John W. Stephens (died in March, 1863), 1861-63; John Lugenbeel, 1861-64; William L. Clark, 1861-64; Lewis N. Janes (died in July, 1865), 1863-66; William L. Clark, 1864-67; William M. Cunningham, 1865-68; William L. Clark, 1867-70; Henry Purdy, 1868-71; William M. Cunningham, 1868-71; William L. Clark, 1870-73; Henry Purdy, 1871-74; Florence Weber, 1871-74; Dudley Seward, 1873-76; Thomas C. Brandon, 1874-77; Thomas H. Goodwin, 1874-77; Dudley Seward, 1876-79; Henry Purdy, 1877-80; Thomas C. Brandon, 1877-80; Dudley Seward, 1879; Henry Purdy, 1880; Thomas C. Brandon, 1880.

CHAPTER VIII.*

CITY OF AKRON—LAYING OUT A TOWN—IMPROVEMENTS—THE CANALS—THE TOWN INCORPORATED—CITY OFFICERS—GROWTH OF AKRON—THE COUNTY SEAT QUESTION—INCIDENTS, ETC., ETC.

AKRON is by some held to be derived from *ἀ* privative and *χρόνος* time, its significance upon this theory being of "the unending," literally, "without time." This highly poetic idea, pregnant with widest intimations of meaning, and so self-satisfying to the good citizen who entertains a generous pride in our county capital, and her flattering promise of growth and development, brought to the crucial test of fact, must give way to the undoubted intent of those who chose and formally declare the name, Akron, from *ἄκρος* summit, this being upon the very ridge-top of the water-shed between Lake Erie on the one hand and the Ohio River on the other. Situated on an average 400 feet above the lake level, and 960 feet above the ocean, Akron is the summit city in point of elevation, the highest incorporated city in the State. More hills she covers than eternal Rome, and extravagant indeed is the man who would think to number or name them all. The surface conformation is rolling. The immediate neighborhood, particularly at the Old Forge, presents a problem of remarkable geologic interest, and one as yet unsolved. To the visitor approaching from the north, east or south, by either of the three railroads here intersecting—the (Cuyahoga) Valley Railway, the Cleveland, Mount Vernon & Columbus, and the New York, Pennsylvania & Ohio—the shifting scenes of the panoramic valley, along whose verge he enters, are strikingly beautiful. This valley, with a depth below the general surface of one to two hundred feet, constitutes the only considerable variation from what we have already designated the rolling contour of the vicinage. It is asserted by careful and competent geologists (and the investigation bestowed upon the topic warrants the acceptance of the belief as more than speculative theorizing) that away back in the past, before that history other than that "in nature's records writ" began, before mankind

peopled this world, during the Champlain period, the nameless river which first excavated the channel whose bed is now so scantily covered by the modern Cuyahoga, like "a pigmy in a giant's clothes," instead of turning to the north at the abrupt bend two miles above the city by which it now almost doubles upon its course, in fact did continue southerly through the broad deep valley before mentioned, eventually losing itself in the synchronous parent of the present Ohio. The ancient channel has been traced from its point of deviation most of the way across the State. Numerous borings along its course have shown that it has been almost filled with earth and soil, the detritus pushed in by the slow grinding glaciers and washed down by the storms of later time, and that, as was to have been expected, within its entire length there is no exposure of rock *in situ*. Such was undoubtedly the origin of this lovely valley; upon the south and west of it the subjacent sandstone conglomerate crops out at frequent intervals, as in the cutting of the Cleveland, Mount Vernon & Columbus road for some distance north of Market street bridge, and along the bed of the Pennsylvania & Ohio Canal, where it circles the crest of the hill near the fair grounds, while upon the north and east there is an extensive table-land of richest soil, with not a rock or stone to be seen except the small rounded boulders so characteristic of the former presence of the ice-river. In fact, north hill appears to have been a terminal moraine, and several of the gravel knolls at the Old Forge, by their stratification, show them to have been local or lateral deposits. The Little Cuyahoga now flows through the valley we have thus minutely described, in a converse direction, a tributary to the river proper. No wonder the Indians called the river "Cuyahoga"—"the winding;" a glance at the map will demonstrate the eminent propriety of the name.

Under our State Constitution of 1802, mu-

* By Charles W. Foote.

nicipal corporations were classified as cities, towns, villages and special road districts. Until the year 1825, Portage Township had been the only territorial distinction recognized. At that time, during the construction of what was then regarded as a great commercial highway—the Ohio Canal—Gen. Simon Perkins and Paul Williams platted and laid out a town which they denominated “Akron,” upon and surrounding the present intersection of Main and Exchange streets, in upper town. The only road in the new town was that one leading to Middlebury, about upon the line where Exchange street now lies. In the fall of that year, 1825, the laborers on the canal put up about a hundred cabins along the line of work and within the town. The canal, when completed, gave a wonderful impetus to business, and at the same time afforded its needed facilities of transportation. South Akron grew rapidly for a few years. In fact until 1832 there was nothing of any consequence outside of that section of the town, but in the year just mentioned several buildings were erected at and near the intersection of Market and Howard streets, and gradually business was diverted to the newer locality.

A very great rivalry had for some time existed between the two villages of North and South Akron. A committee of one, Erastus Torrey, was authorized by a number of the south end people to wait upon Mr. Hall and tender him the use of a large brick block in upper town, free of expense for a term of three years, if he would remove there. Mr. Hall, upon deliberation, declined the kind offer, and has never regretted his conclusion. In the terrible strain of the panic of 1837, Hall's was one of the *three*, out of fourteen stores in North Akron, which escaped a failure. By the time the town was incorporated, in 1836, the two villages of North and South Akron were not far from an equality, and considerable bitterness of feeling was aroused by their jealous rivalry. Upon the northwest corner of Market and Howard streets stood the “Pavilion,” a hotel, and a large wooden building, kept by Charles B. Cobbs, Esq. Two or three years later, Mr. Cobbs became proprietor of the “Ohio Exchange,” a noted landmark upon the site at present occupied by the Paige Brothers' hardware store. Upon the northeast corner of Market and Howard, and from there up to the trench

of the Water Power Company, stood a row of low, wooden buildings. The same was the case also upon the south side of Market street, except upon the corner, where was being erected a fine three-story stone block, and in which were afterward located the county offices, court room and jail, put up and owned by Hiram Payne. Thence southwardly, upon both sides of Howard street, as far as to where Cherry street now enters, were one-story and a story-and-a-half wooden buildings closely contiguous. Then came a gap and a deep gully; and finally, upon the corner of Mill and Howard streets, where the post office now stands, was a two-story wooden building belonging to Lewis P. Buckley. In addition to these was the house of Gen. Bierce, in process of construction, and that of Dr. Bartges, upon opposite corners of Market and High streets, the house which is now the third south from the corner on the east side of High, and one on the corner of Main street and Mill; and with these we have enumerated all of North Akron's buildings. At that time, Leicester King and Gen. Simon Perkins owned pretty much all the land in this part of town. They together had a map published, which represents Akron as it then was, and which is elsewhere referred to quite at length. The house issuing this map was Messrs. Robinson & Co., of Reading, Vt. They had a branch office in Akron under the charge of Mr. Nahum Fay, in Buckley's Block before alluded to. Early in 1837, the Map Publishing Company removed to a building of their own on North High street, upon the lot where James B. Storer now resides, and had a shop in the rear. To the north and east of them, there was only dense woods. When the old stone church (now occupied by the Baptist society, but built and first used by the Universalists) was erected by Charles W. Brown, in 1838, the forest was so thick as that the church could scarcely be seen from Market street.

Akron had remained a “town” by courtesy and general consent, from its platting, in 1825, until 1836. March 12, of that year, there passed the General Assembly, at Columbus, an “Act to incorporate the town of Akron, in the county of Portage.” By this act it was provided:

That so much of the townships of Portage and Chentry, in the county of Portage, as is comprised within the following limits, to wit: Beginning on the south line of tract No. 8, in said township of

Coventry, and at a point in said line which is three-fourths of a mile east of the southeast corner of the south town plat of Akron, as surveyed by John Henshaw; thence north to a line running due east and west, drawn ten rods north of Lock 16, of the Ohio Canal; thence west along such east and west line, one and a half miles; thence south to the south line of Tract No. 8, aforesaid; thence east, along said south line, to the place of beginning, be and the same is hereby created a town corporate, and shall henceforth be known and distinguished by the name of "The town of Akron."

Translating this into a form which shall convey a meaning to other people beside surveyors, and indicating the same points and lines by landmarks recognizable to-day, we should bound and describe as follows: Beginning upon the present southern corporation line—that is, upon South street, at a point a little east of its junction with Spicer street; thence north in a straight line intersecting Spicer street just below Exchange street, passing through the Fourth Ward a little west of Spicer street, through the Second Ward about on Fir street, through the First Ward in a continuation of the same right line, until the present northern boundary of the city is reached, a little beyond the Little Cuyahoga River; thence due west along the northern boundary to the present northwest corner of the corporation; thence south along the present west line of the city to the south line of Tract No. 8—that is, the southwest corner of the corporation; and thence east along said tract line (with which the south side of South street coincides, so far as it extends) to the place of beginning. Thus we see that the original survey of Akron, when incorporated as a town, was a rectangular plat of one mile and a half breadth, east and west, and about two and a quarter miles length, north and south, therefore containing almost three and one-half square miles of area. We note, also, that the western boundary was identical with the present and also considerable portions of both the northern and southern lines. At this date, there were open to use, or platted, the following streets, bearing in a general easterly and westerly direction: Furnace, Tallmadge, Market, Mill, Ash, Quarry, Water (now a portion of Bowery), State, Middlebury, a part of Carroll, Exchange, Cedar, Chestnut, Catherine, Second, Third and Bridge streets; this last corresponding with Thornton street, of the present day. Bearing generally north and south were West street, Maple, Oak, Walnut,

Etna, Locust, Bowery, Water, Canal, Howard, Main, High, Broadway, Summit, and, in the so-called "Eastern Addition," First, Second and Third streets.

About this time, Middlebury and Cuyahoga Falls partook also of the general business activity, and for some years bade fair to push Akron vigorously in a contest as to which should prove the coming metropolis. When, however, the Pennsylvania & Ohio Canal at last passed by on one side, Middlebury received a blow which substantially put her out of the race. From that time destiny seemed to thrust her down to a subordinate rank, and that fate was philosophically accepted. Cuyahoga Falls, however, stoutly maintained her priority, both as to time and station, for the Falls had obtained an incorporation just one week before Akron, on the 7th of March, 1836, the same day that Cleveland was advanced from a village to a city. The Falls people obstinately refused to believe that Akron possessed or could promise any better things than Cuyahoga Falls could offer. They pointed to their practically illimitable water-power, and dilated upon the superior healthfulness of their town, yet, nevertheless, Akron unreasonably insisted upon keeping just a little ahead in point of numbers. So matters went until the new county of Summit was carved out of the adjacent ones of Portage, Stark and Medina, in 1840.

Section 2 of the act incorporating the town of Akron provided for the election, upon the second Tuesday of the next ensuing June, by "the white male inhabitants, who have resided within the aforesaid limits of said town for the space of six months next preceding, etc., etc.," of one Mayor, one Recorder and five Trustees, together constituting a Town Council. In pursuance of this provision, the first election of town officers was held at the house of Asa Larned, June 14, 1836, with the following result: Total number of votes cast, 166, of which for Mayor, Seth Iredell received 91, and Eliakim Crosby, 75; for Recorder, Constant Bryan received 87 votes, Charles W. Howard 75, and H. Johnson 4; Erastus Torrey, Jedediah D. Commins, William B. Mitchell, William E. Wright and Noah M. Green were chosen Trustees. The first meeting of the "Town Council of the town of Akron" convened on Saturday, the 18th of June. After some preliminary business, the first ordinance was passed, entitled, "An Ordinance

nance regulating Exhibitions and Public Shows in the town of Akron." As William B. Mitchell declined the honor of a Trusteeship, at an adjourned meeting held Monday, the 20th of June, Justus Gale was appointed a Trustee in his stead. Samuel A. Wheeler was also appointed Treasurer. At the next Council meeting, Ithiel Mills was elected Marshal. From that time until Akron advanced in grade, becoming a village at the adoption of the State's new constitution in 1852, by virtue of the general act, the officers were as follows :

Mayors—1836, Seth Iredell ; 1837, John C. Singletary, Jr. ; 1838, John C. Singletary, Jr. ; 1839, Lucius V. Bierce ; 1840, Arad Kent ; 1841, Lucius V. Bierce ; 1842, Harvey H. Johnson ; 1843, Harvey H. Johnson ; 1844, Lucius V. Bierce ; 1845, Philo Chamberlin ; 1846, Philo Chamberlin ; 1847, Levi Rawson ; 1848, Israel E. Carter ; 1849, Lucius V. Bierce ; 1850, George Bliss. In April, of 1851, Bliss resigned the position, but no new Mayor was elected until the next regular election in June. 1851, Charles G. Ladd ; 1852, Frederick Wadsworth. Up to this time the Mayor, Recorder, and Trustees had been elected by the people upon the first Monday of June of each year.

Recorders—1836, Constant Bryan ; 1837, William E. Wright ; 1838, William E. Wright ; 1839, Robert K. DuBois ; 1840, Robert K. DuBois ; 1841, Robert K. DuBois ; 1842, Nahum Fay ; 1843, Nahum Fay ; 1844, William H. Dewey ; 1845, William H. Dewey ; 1846, William H. Dewey ; 1847, Nahum Fay ; 1848, Arad Kent ; 1849, Arad Kent ; 1850, Edward W. Perrin ; 1851, Arad Kent ; 1852, Horace Canfield.

Treasurers—1836, Samuel A. Wheeler ; 1837, Horace K. Smith ; 1838, Horace K. Smith ; 1839, Russell Abbey ; 1840, Gibbons I. Ackley ; 1841, Gibbons I. Ackley ; 1842, Gibbons I. Ackley ; 1843, Gibbons I. Ackley ; 1844, Gibbons I. Ackley ; 1845, Gibbons I. Ackley ; 1846, Grove N. Abbey ; 1847, Grove N. Abbey ; 1848, Grove N. Abbey ; 1849, Grove N. Abbey ; 1850, Milton W. Henry ; 1851, Milton W. Henry ; 1852, Milton W. Henry.

Trustees—1836, Erastus Torrey, Jedediah D. Commins, William B. Mitchell, William E. Wright, Noah M. Green ; Mitchell declined to serve, and Justus Gale was appointed to the vacancy. 1837, William K. May, William I. Mather, David D. Evans, Jesse Allen, Eber

Blodget ; in September, May having removed from Akron, his seat was declared vacant, and William Patterson was elected by the other Trustees to succeed him. 1838, Jesse Allen, Ebenezer Martin, Justus Gale, James W. Phillips, Ansel Miller. 1839, Samuel Manning, Seth Iredell, James W. Phillips, Lewis P. Buckley, Ebenezer Martin ; Martin declining. Ansel Miller was appointed instead ; in July, Phillips resigned, and Ithiel Mills succeeded him. 1840, Seth Iredell, Samuel Manning, Ithiel Mills, Samuel A. Wheeler, William E. Wright ; Wheeler resigned in July, and Ansel Miller became his successor. 1841, Seth Iredell, Webster B. Storer, Jacob Allen, Ansel Miller, Leverett J. Ives. 1842, Ansel Miller, Seth Iredell, David Allen, George F. Ray, Horace May ; in January, 1843, Allen died, and James Mathews filled the vacancy. 1843, Seth Iredell, James Mathews, George F. Ray, Horace May, Ansel Miller. 1844, William M. Dodge, Robert K. Du Bois, Nahum Fay, Jesse Allen, Samuel A. Wheeler ; in September, Jesse Allen resigned, and Jacob Allen was appointed. 1845, Robert K. Du Bois, Justus Gale, Lucius V. Bierce, William M. Dodge, James H. Crawford ; Gale refused to serve, and Samuel A. Wheeler was elected to the vacancy. In November, Du Bois died and Horace Canfield succeeded him. 1846, Horace Canfield, Samuel A. Wheeler, Allen Hibbard, Nicholas E. Vansickle, Lucius V. Bierce. 1847, Allen Hibbard, Lucien Swift, Samuel A. Wheeler, Joseph A. Beebe, Ansel Miller. 1848, Ansel Miller, Nathaniel Finch, Benjamin McNaughton, John M. Cutler, George W. Bloom. 1849, Nathaniel Finch, Ansel Miller, Charles Webster, George W. Bloom, Milton N. Henry ; in October, Finch resigned, and the remaining Trustees elected John M. Cutler. 1850, Thomas H. Goodwin, John Howe, Hiram Viele, Robert Jackson, L. C. Parker ; in October, William M. Dodge was elected to the place made vacant by the removal of Howe. 1851, James M. Hale, Benjamin McNaughton, William O. Sanford, Milton W. Henry, D. F. Bruner. 1852, James M. Hale, William O. Sanford, R. P. Myers, Peter Osburn, Ansel Miller.

The total vote upon the occasion of the first town election, in 1836, was 166. At the last town election, in 1852, there were cast 278 votes. The year previous, however, fifteen years after the first vote above mentioned,

there were 334 ballots cast, just two more than double the first vote. From the time that Akron became a village until advanced to a city of the second class, in 1865, the following were officers of the corporation, and were elected by popular vote upon the first Monday of April of each year. The Mayor, Recorder, and the five Trustees together constituted the Village Council :

Mayors—1853, Philip N. Schuyler ; 1854, William T. Allen ; 1855, Nathaniel Finch ; 1856, Nathaniel Finch ; in December, Finch resigned, and in February of 1857, Frederick A. Nash was elected to succeed him ; 1857, Frederick A. Nash ; 1858, Frederick A. Nash ; 1859, George W. McNeil ; 1860, Henry Purdy ; 1861, Henry Purdy ; 1862, Charles A. Collins ; 1863, Henry A. Collins ; 1864, George D. Bates.

Recorders—1853, Horace Canfield ; in December, Canfield died, and the Council elected R. S. Elkins to fill the vacancy thus caused ; 1854, R. S. Elkins ; 1855, Joseph E. Wesener ; 1856, Joseph E. Wesener ; 1857, Ralph P. Waterbury ; 1858, Ralph P. Waterbury ; 1859, Allen Hibbard ; 1860, Alvin Rice ; 1861, James Holmes ; 1862, Alvin Rice ; 1863, Alvin Rice ; 1864, Henry W. Ingersoll.

Trustees—1853, William T. Allen, Daniel H. Wheeler, R. S. Elkins, David A. Scott, George Thomas ; Elkins being appointed Recorder in January of 1854, S. A. Lane was elected to fill the vacant place ; 1854, James B. Taplin, Thomas H. Goodwin, Richard Howe, David Hanscomb, James M. Hale ; 1855, Richard Howe, George Thomas, James B. Taplin, William T. Allen, David A. Scott ; in April, Taplin resigned, and R. S. Elkins succeeded him ; 1856, Henry Purdy, David A. Scott, Thomas H. Goodwin, Henry S. Abbey, Joseph Milligan ; 1857, George Thomas, Henry Fisher, Jr., Henry S. Abbey, Henry Purdy, Charles Cranz ; 1858, Charles Cranz, R. B. Walker, John Cook, Joseph Milligan, Job Pierce ; 1859, William L. Everett, Job Pierce, R. B. Walker, Thomas H. Goodwin, Joseph Milligan ; 1860, Richard Howe, Ferdinand Schumacher, Robert L. Moffatt, James Christy, William S. Panton ; 1861, Robert L. Moffatt, Ferdinand Schumacher, George Buel, John Douglass, Henry Fisher ; in October, Fisher resigned, and, in November, George W. McNeil was chosen by the Council to serve out the term ; 1862, Charles Webster,

John E. Bell, John Douglass, Isaac Harter, George Buel ; 1863, Arad Kent, John E. Bell, J. W. Holloway, Jacob Goldsmith, John H. Wagoner ; 1864, Allen Hibbard, Stephen H. Pitkin, William H. Lapens, Charles W. Bonstedt, James Christy.

Treasurers—1853, Milton W. Henry ; at this time, the election of the Treasurer was transferred from the Council to the people ; 1854, Milton W. Henry ; 1855, Milton W. Henry ; 1856, Milton W. Henry ; 1857, Milton W. Henry ; 1858, John Good ; 1859, John H. Chamberlin ; 1860, John H. Chamberlin ; 1861, Charles Cranz ; 1862, Charles Cranz ; 1863, Charles Cranz ; 1864, Charles Cranz.

In January, 1865, as is set forth more at length elsewhere, Akron became a city of the second class. From that time to the present, her officers have been the following :

Mayors—Elected by the people, term two years : 1865, James Mathews ; 1866, James Mathews ; 1867, Lucius V. Bierce ; 1868, Lucius V. Bierce ; 1869, J. L. Robertson ; 1870, J. L. Robertson ; 1871, J. L. Robertson ; 1872, J. L. Robertson ; 1873, Henry Purdy ; 1874, Henry Purdy ; 1875, Levi S. Herrold ; 1876, Levi S. Herrold ; 1877, James F. Scott ; 1878, James F. Scott ; 1879, James M. Frazee ; 1880, James M. Frazee ; 1881, Samuel A. Lane.

Clerks—Elected by the Council, term one year. The office is that of which the incumbent was formerly denominated Recorder ; 1865, Jerry A. Long ; 1866, Jerry A. Long ; 1867, Mills B. Purdy ; 1868, Mills B. Purdy ; 1869, Mills B. Purdy ; 1870, Mills B. Purdy ; 1871, Mills B. Purdy ; 1872, Mills B. Purdy ; 1873, John A. Means ; 1874, John A. Means ; 1875, John A. Means ; 1876, Mills B. Purdy ; 1877, Adams Emerson ; 1878, Adams Emerson ; 1879, Newton Ford ; 1880, Newton Ford, 1881, Newton Ford.

Members of City Council—Elected by the people. Term two years. After the first election, the six persons elected drew lots as to which ones should serve the full term of two years, and which the half term, until the next election, resulting as follows :

First Ward—Two years, George W. Crouse ; one year, Charles W. Bonstedt. Second Ward—Two years, Henry W. Howe ; one year, John E. Bell. Third Ward—Two years, Lewis Miller ; one year, J. Park Alexander. Each year thereafter there has been elected one from each

ward, as follows : 1866—First Ward, J. J. Wag-
 oner ; Second Ward, J. H. Collins ; Third Ward,
 George Sechrist. 1867—First Ward, George
 W. Crouse ; Second Ward, W. H. Payne ; Third
 Ward, J. A. Long. 1868—First Ward, J. W.
 Holloway ; Second Ward, J. H. Collins ; Third
 Ward, J. Park Alexander. 1869—First Ward,
 C. R. Howe ; Second Ward, W. J. Atwood ;
 Third Ward, Clement J. Kolb. 1870—First
 Ward, William T. Allen ; Second Ward, W. P.
 Cassidy ; Third Ward, J. Park Alexander.
 1871—First Ward, David R. Paige Jr. ; Second
 Ward, John Memmer ; Third Ward, Elias W.
 Howard ; Fourth Ward, Robert McElhinney,
 George Burkhardt ; Fifth Ward, R. F. Palmer,
 Clement J. Kolb. 1872—First Ward, William
 T. Allen ; Second Ward, O. C. Barber ; Third
 Ward, J. Park Alexander ; Fourth Ward, Noah
 N. Leohner ; Fifth Ward, James A. Metlin.
 1873—First Ward, Milton W. Henry ; Second
 Ward, James Christy, H. E. Merrill ; Third
 Ward, H. L. Carr ; Fourth Ward, David Lam-
 parter ; Fifth Ward, A. J. Hamlin ; Sixth
 Ward, J. A. Baldwin, Thomas Johnson. 1874—
 First Ward, William T. Allen ; Second Ward,
 E. H. Merrill ; Third Ward, Elias W. Howard ;
 Fourth Ward, Robert McElhinney ; Fifth Ward,
 James A. Metlin ; Sixth Ward, Enoch Rowley.
 1875—First Ward, Milton W. Henry ; Second
 Ward, A. Brewster ; Third Ward, William A.
 McClellan ; Fourth Ward, J. H. Derhammer ;
 Fifth Ward, Simon Hankey ; Sixth Ward, Da-
 vid E. Hill. 1876—First Ward, William Buch-
 tel ; Second Ward, John W. Baker ; Third
 Ward, John J. Cook ; Fourth Ward, John
 Schott ; Fifth Ward, Christian Vogt ; Sixth
 Ward, Enoch Rowley. 1877—First Ward,
 Charles A. Collins ; Second Ward, James
 Christy ; Third Ward, J. Park Alexander ;
 Fourth Ward, D. W. Morgan ; Fifth Ward, Ed-
 ward A. Lawton ; Sixth Ward, David E. Hill.
 1878—First Ward, L. G. Thorp ; Second Ward,
 W. J. Underwood ; Third Ward, Mason Chap-
 man ; Fourth Ward, John Schott ; Fifth Ward,
 Christian Vogt ; Sixth Ward, Enoch Rowley.
 1879—First Ward, Ulysses L. Marvin ; Second
 Ward, N. A. Carter ; Third Ward, J. Park Alex-
 ander ; Fourth Ward, Estep ; Fifth Ward,
 Edward A. Lawton ; Sixth Ward, F. W. In-
 man. 1880—First Ward, Milton W. Henry ;
 Second Ward, Henry H. Brown ; Third Ward,
 B. F. Goodrich ; Fourth Ward, John Schott ;
 Fifth Ward, Charles F. Ingersoll ; Sixth Ward,

Thomas H. Peckham. 1881—First Ward, Da-
 vid L. King ; Second Ward, N. A. Carter ; Third
 Ward, J. Park Alexander ; Fourth Ward, Philip
 Weber ; Fifth Ward, Edward A. Lawton ; Sixth
 Ward, James Housel.

Pennsylvania & Ohio Canal.—Judge Leices-
 ter King, of Warren, father of David L. King,
 Esq., of this city, was the man to whom, more
 than all others, Akron was indebted for her
 second canal, an enterprise which very mate-
 rially aided in developing the commercial in-
 terests of the growing village. By personal
 effort and influence, Judge King conquered the
 many obstacles in the path, and carried to a
 successful completion, after many years of
 tireless endeavor, the project to which he had
 devoted his energies, and in whose eventual ac-
 complishment he had the fullest confidence.
 An old paper in the possession of Mr. George
 McMillen, of Portage Township, indicates that
 the lobby system obtained in full vigor over
 fifty years ago, and is not, therefore, one of the
 inventions of modern politics. We subjoin a
 copy of a portion of the paper, bearing date of
 "Middlebury, December 12, 1826," and running
 as follows : "We, the subscribers, citizens of
 the villages of Middlebury and Akron and their
 vicinity, confident that inestimable advantages
 would result to our villages and this section of
 the country generally, from a canal connecting
 the Ohio Canal at the Portage Summit with the
 Pennsylvania Canal at Pittsburgh, and anxious
 that an act should pass the Legislature of Ohio
 at their present session, authorizing the con-
 struction of such canal, will pay the sums an-
 nexed to our respective names, to John Mc-
 Millen, Jr., and Peter Bowen, for the purpose
 of defraying the expenses of delegates from the
 aforesaid villages to the Legislature, to assist
 in procuring the passage of such an act. Pay-
 ment to be made at the time of subscribing."
 To this are attached nineteen names. The
 delegates and other supporters of the measure
 proved speedily successful, for the Pennsyl-
 vania & Ohio Canal was incorporated by act of
 the General Assembly of the State of Ohio
 January 10, 1827, which act authorized "the
 construction of a canal to meet or intersect the
 Pennsylvania, or Chesapeake & Ohio Canal, at
 or near the city of Pittsburgh, in the State of
 Pennsylvania." The act was to take effect and
 be in force "whenever the Legislature of Penn-
 sylvania should pass a law giving their assent

to and confirming the provisions of said act of Ohio," etc. Pennsylvania's Legislature subsequently passed the act desired. Hindrances of one sort and another intervened, and, at times, it looked as though the canal would never be built. Finally, in 1836, the State of Ohio was induced to extend a helping hand, which she did by a pledge to take one dollar of stock for every two dollars of private subscription obtained. Mr. King then visited Pittsburgh, Philadelphia and other Eastern cities, and, by dint of earnest solicitation, secured a favorable attention from a number of capitalists, and returned, bringing with him across the mountains many thousands of dollars, in an ordinary hand satchel. Altogether, \$840,000 was secured from private individuals, and the State, in pursuance of her promise, added \$420,000 of stock.

As originally projected, the canal was to have passed through Middlebury, which at that time was about as large and as promising a place as Akron. However, since the connection with the Ohio Canal was to be made "on the Portage Summit," and some difficulty was experienced in accomplishing both these things, by act of the Legislature, March 2, 1836, the State Canal Commissioners were empowered to determine anew the location of the connection. The Board of Canal Commissioners ordered Leander Ransom, Acting Commissioner, to investigate the matter and report. This he did, voluminously, January 29, 1837, fixing the junction "at the north end of the lower basin in South Akron, a few rods from the foot of Lock No. 1 of the Ohio Canal." The canal was at last completed from its eastern terminus at Beaver, Penn., to Akron, and opened throughout in 1841. Late in the fall, the first boat arrived from the East. A number of prominent citizens of Pittsburgh, Philadelphia, New York and other Eastern cities, were on board. Gov. Thomas Corwin, of Ohio, and Gov. David Porter, of Pennsylvania, were specially invited to attend the formal opening. Gov. Corwin was detained at home by sickness, but Gov. Porter was present. When the boat, decorated with flags and banners, and carrying a cannon and a brass band, reached Warren, it met a hearty reception at the hands of the enthusiastic citizens. There Judge King, who was President of the Canal Company, and his son David, then a lad of seventeen, and others interested, joined the party. At every town and village the peo-

ple had turned out with hearty good-will to see the boat go by, and to every such gathering Gov. Porter declaimed his same set speech till all the passengers had memorized it as thoroughly as the speaker. At Ravenna, another accession was received, and at Franklin Mills (now Kent) and Cuyahoga Falls. Akron had been advised of their approach, and the entire populace went out to meet them, which they did about noon, at the big bend at the Old Forge. The escort accompanied the boat to town; the company disembarked at the western end of the long trench, in South Akron, and repaired to a large upper room in May's Block (where the Clarendon Hotel now is), where a grand banquet had been spread. One of the most important factors of the boat's cargo was its ample supply of liquor. There was a barrel of sherry, another of Madeira, and a great many dozen bottles of champagne; what was left of these was conveyed to the dinner-room. Besides this thoughtful provision, much more of a like sort had been forwarded in anticipation of the event, and there was no lack of that with which to make merry. Not a few were attacked with a dizziness not incident to sea-sickness. In the evening, another jollification was indulged in at the Ohio Exchange, a noted tavern, where Paige Brothers' hardware store now stands. Speeches were made and drinks taken; bands played, and toasts were offered and responded to; refreshment flowed freely. One of the visitors—old Gen. S., of Warren—imbibed too much, and died before morning, of apoplexy. A son the next day, himself also considerably obfuscated, sobbing and moaning to a friend, Mrs. E., remarked that "he always cried when his father died." One of the Ravenna party, upon his return, was narrating the joyfulness of the occasion to a group of neighbors, when one of them referred to this death of a man who had taken so conspicuous a part, inquiring if that occurrence did not cast a shadow over the general hilarity, to which he responded: "It was dom'd fine! dom'd fine! That dying of S——'s was too bad, to be sure; but the old fellow went out of the world with his belly full of beefsteak and brandy!"

As is mentioned elsewhere, the canal company took possession of the ditch through which the water-power was conveyed to Akron, from Old Forge to Moody's shop on Main

street, between Market and Mill, widening and deepening it, but reserving to the Middlebury Hydraulic Co.—the owners of the power—all their rights. For a time the canal flourished apace. A large amount of business was done and it became the thoroughfare of a considerable passenger traffic. Besides the merchandise brought here or shipped from here, everything from Pittsburgh or Warren destined for Cleveland of course passed through Akron, and thence via the Ohio Canal.

The outlook promised well for the stockholders; in fact, several small dividends were declared. The tolls collected at the port of Akron during the year 1852, amounted to \$6,966.61; in 1853, \$8,110.54. The maximum was reached in 1856, in the sum of \$8,786.78. Very unfortunately for the canal, in 1854 a controlling interest passed into the hands of men who were also financially interested in the new newly constructed Cleveland & Mahoning Railroad. This end was accomplished, first by obtaining stock of the canal company as subscriptions to the railroad company, and afterward by buying from the State her interest. These two, the railroad and canal, being parallel, were necessarily either coadjutors or active competitors. At first they promised to act together, and largely upon that consideration the same men secured the relation of Directors to each. That policy, however, was not long maintained; tolls upon the canal were speedily put up to an exorbitant figure, while the railroad transported between the same points for a much lower cost. The effect is clearly exhibited in the showing of the receipts of toll upon the canal at Akron for the next few years: 1857, \$6,538.96; 1858, \$5,400.96; 1859, \$2,143.42; 1860, \$853.27; 1861, \$772.88.

A joint resolution passed the Legislature April 12, 1858, authorizing the sale of the State's canal stock by the Commissioners of the Sinking Fund, to the highest and best purchaser. Nothing was, however, effected under the order until some years later. Finally, in 1862, November 20, the stock, for which the State of Ohio had paid \$420,000, was sold to Charles L. Rhodes, of Cleveland, for \$35,000. He at once turned it over to the Cleveland & Mahoning Railroad, of which he was Vice President and Superintendent, and the bondage of the canal became complete. Just prior to this sale, the General Assembly had been

urged to permit the canal company "to sell the canal, and that such portions might be closed as the purchasers might think proper." This was rejected in the Senate by a heavy adverse vote. After 1862, the business of the canal was very small and constantly decreasing. No money was expended on repairs; bridges and locks became dilapidated, and the people along its banks were clamorous for a removal of the source of so much sickness. In January, 1867, the canal company again petitioned the Legislature for permission to remedy matters in some way or other, and secured the passage of an act (March, 1867) "authorizing the Directors of the Pennsylvania & Ohio Canal to lease, sell or abandon such portion or portions of said canal and its appendages as may, in their opinion, be for the interest of said company, and not prejudicial to the public interest." * * * Negotiations were then pending between the Middlebury Hydraulic Company before mentioned and the canal company, which, upon the passage of the above act, were completed. The Hydraulic Company, whose rights had fully continued through the period of the canal's active operation, now leased that portion contained between the Portage County summit near Ravenna and the western end, the junction with the Ohio Canal, and including the Shalersville reservoirs, intending to maintain its use as a canal, and also as to the portion between Middlebury and Akron its original purpose of a water-power. Business had now substantially ceased; the water in the channel beyond the Old Forge was stagnant, and by its offensive odors and malarial influences provoked its neighbors beyond the point of their endurance. One night in the spring of 1868, a party of men cut the banks at Cuyahoga Falls and at two other places east and west of that village. By morning only a reeking ditch remained. The State threatened to prosecute the actors, but never did so, and the breaks were never repaired.

Again, in the spring of 1874, the canal was cut one night in Akron by a party of disguised men, between Exchange street and Main. Those engaged in the affair were arrested and tried before a Justice of the Peace, but were never punished. Soon after this, the western part from Mill street to Exchange was permanently closed, and now steps are being

taken to conduit that part of the channel still open upon Main street, from Tallmadge to Mill

An enthusiastic set of men, chiefly from the East, built—on paper—a great city upon the top and side of North Hill, at a point between Cuyahoga Falls and Akron, which was in time to have absorbed both these lesser towns into its suburbs. The imaginary city was to be supplied with a limitless water-power—the *sine qua non* of all manufacturing interests in those days—by means of a canal dug around the brow of the hill, and tapping the Cuyahoga River just below the village of the Falls, and so great was the faith of the projectors of the idea, that they exemplified it in the good Scriptural way, by works. They formed a joint-stock company with a nominal capital of \$500,000. Prominent among its members were E. C. Sackett, Dr. Eliakim Crosby, who had successfully originated and carried out the similar scheme above mentioned of bringing a water motive power from Middlebury, Col. James W. Phillips and Dr. E. W. Crittenden. These four men contracted to build the canal or aqueduct for \$118,000. Col. Phillips at once went East, where, in New York and Philadelphia, he interested a number of capitalists in the project and recruited laborers for the work. The company also issued scrip and paid in land whenever possible; they owned the entire tract of "the chuckery." They had a map of their prospective city platted, published and circulated as an advertisement. One of the heaviest proprietors (from Rochester, N. Y.) offered to stake every dollar he owned in the world, that in less than ten years the best corner lots would be worth as much in the market as those of Rochester. They cut and quarried from the precipitous cliffs along the east side of the river an aqueduct four miles in length, to the site of their well-nigh Utopian scheme. A dam was constructed across the river by which to throw into the raceway so much water as should be needed. Work was begun in 1838 and pushed energetically that year and the next, so that by the latter part of 1839, the water was turned in. With some changes and repairs at places along the route, the canal seemed to operate nicely. But, unfortunately, right here the funds of the organization had been expended, some of its instigators had lost confidence in

its ultimate success, there had been no such influx of population as had been expected, and no capitalists came forward to utilize the power now that it was secured. Several serious breaks occurred in the sandy embankments, the water was shut off, and thenceforward matters remained *in statu quo*. Strong efforts were put forth by the plucky proprietors to overcome the untoward circumstances. Now that the major part of the cost had been met, the labor practically completed, it indeed appeared as though just a *little* more capital would restore the concern to a firm basis, and bring the much-longed-for manufacturing enterprises.

In 1843, the Universalist Church, which had a strong society in Akron, held a mass convention in the old stone church (now the Baptist Church), upon which delegates were in attendance from all over the United States. Among them was Horace Greeley. The officers of the Canal Company showed the entire trench to Mr. Greeley, expatiated upon their intentions and expectations, and the great manufacturing city that was sure to grow upon their plats and records. Evidently a great impression was made upon the editor's mind or the editor's heart, or both, for upon his return the *New York Tribune* contained a lengthy article wherein the whole scheme was enthusiastically set forth, and the prophecy volunteered that Summit City would become the "Lowell of the West." No funds, however, came to the chequer of the company; on the contrary, they became involved in litigation and debt, and so what was once one of the greatest business projects of the day has entirely passed into oblivion, save as it is called back into historical notice. The monument to their blasted hopes is now plainly visible almost its whole extent, and evokes many curious questions from visitors and the younger generations. This young city, with little existence, except on paper, entered the lists as a competitor for the seat of justice of the county, but was unsuccessful in its aspirations in that direction. All this, however, is fully given in the chapter devoted to the organization of Summit County, and will not be repeated here.

It is probably impossible for us of the present day to at all adequately comprehend the wonderful hold which certain moral and theological questions obtained upon the minds and feelings of the people forty years ago. It

was in those days that every pulpit was a forum of polemic display and every discourse a labored argument. The same combative style characterized the newspapers, both secular and religious, and lusty blows were given and taken for opinion's sake. One of the strongest and strangest vagaries was that adopted and preached everywhere in season and out of season by the so-called Millerites. Here in Akron they had a considerable following as well as in neighboring towns. In an April number of the *American Democrat*, issued each week by Horace Canfield, appeared this notice :

The present week is a time of great interest to the believers in the personal reign of Christ, and in the Second Advent as now near. This week, we believe, will conclude the 2,300 years from the going forth of the decree to restore and build Jerusalem, at which time the word of God has been given that the sanctuary shall be cleansed, and there shall be an end of indignation. * * * The time of the feast of the passover was the first full moon after the vernal equinox, which will occur on Friday of the present week. We know not how to escape the fact that there the 2,300 years will terminate, and from that time we shall be in constant expectation of seeing the Lord.

Second Advent Conference to be held at Akron (if the Lord does not come before that time) on Wednesday, April 19, 1843, at 10 o'clock A. M. Friends from all quarters are invited to attend.

Akron has been inclined to agitate the matter of the allowance or prohibition of intoxicating drinks from an early date and at frequent intervals. At a Council meeting May 15, 1841, Ansel Miller presented the following preamble and resolution, and the same were adopted :

WHEREAS, The licensing of groceries for the retailing of ardent spirits by the Town Council is an action on which much difference of opinion exists among the citizens of Akron, therefore,

Resolved, That for the instruction of the Council, the voters at the coming election are hereby requested to write or print on their tickets *License* or *No License*.

Accordingly, upon the succeeding day of election, June 1, the voters declared in favor of *No License*. The Council accepted their verdict, and refused the petitions of all desiring licenses. A pressure was brought to bear upon the State legislators at the session of 1842-43, which effected the following bill in February :

SEC. 2. *Be it enacted by the General Assembly of the State of Ohio*, That the Town Council of

Akron, in Summit County, shall have powers to pass such by-laws as may be necessary to prohibit within the corporate limits of said town the retailing, vending or selling of ardent spirits or other intoxicating liquors by any person or persons other than licensed tavern-keepers or physicians in the course of medical practice.

In pursuance of the power therein conferred, the Town Council convened in special session February 28, and appointed a committee of two—the Mayor, Harvey H. Johnson, and James Mathews—to draft an ordinance in accordance with its intent. The ordinance passed its third reading March 11, 1843, by a unanimous vote, and immediately took effect. This was about the time of the noted "Washingtonian Movement." The County Washingtonian Society called its annual meeting for the 22d of February. A stirring address was delivered by H. W. King, Esq., before a large gathering. The society reported over five thousand members in the county. Henry Rhodes was elected President, and L. V. Bierce, George Bliss and R. McMillen an Executive Committee. At the time of the vote upon the adoption or rejection of our new constitution, June 17, 1851, the question of *license* or *no license* as a system to be incorporated into the State's organic law was separately submitted to the decision of the electors of the State. The vote of Portage Township (including Akron) stood—*For* license to sell intoxicating drinks, 275. *Against* license to sell intoxicating drinks, 312. In common with nearly all the cities and villages of Northern Ohio, Akron was strongly affected by the maelstrom of feeling in the temperance cause which swept over the country in 1874, commonly known as the "Crusade." The movement was countenanced and abetted by the best classes of society. A few were displeased with its methods, and held themselves aloof, but by far the larger part of the city's best people either acted a part or at least sympathized with the endeavors of the crusaders. An interesting episode of the campaign occurred upon the evening of Monday, April 6. It had been the day of the municipal elections. The great question at issue was that of temperance; all other matters were retired from prominence in comparison. A large and enthusiastic concourse, with a considerable proportion of ladies included, gathered at the Council rooms, as it was generally known that a proposed ordinance pro-

hibitory in character was that night to come up for its third and final reading. Every one wishing to first learn the result of the day's work at the polls, the early portion of the evening was devoted to short and stirring speeches by prominent citizens, music, etc. The returns coming in indicated a signal victory for the temperance interests. At 10 o'clock, President J. Park Alexander called the Council to order. The third reading of the ordinance before mentioned was made the special business of the session, and by a unanimous vote of the eight Councilmen present it became a law. Amid intense enthusiasm and outbursts of applause, Mr. Alexander appended his name as President of the Council, and the deed was accomplished. It was announced that a jollification meeting would take place the next evening at the Academy of Music, and that at that time the gold pen with which President Alexander's signature had been affixed would be sold at auction to the highest bidder, the proceeds to be devoted to some charitable object. The next night the Academy was packed; standing-room even could not be had, and many were obliged to turn away disappointed. John R. Buchtel was assigned the post of auctioneer, and the fun began. The first bid was 10 cents; from that it jumped to \$10, then rapidly mounted by tens and fives until finally it was struck off to Mr. Ferdinand Schumacher for \$252.50. That is probably the most costly pen in the United States. Undoubtedly, some permanent good was accomplished by the Crusade, but a considerable portion of the effect proved but temporary, as, indeed, might be expected from the nature of the means employed—a species of coercion—and when the restraint was removed the evils of course returned. Still later have occurred the "Murphy Movement" and a number of lesser waves of temperance reform. While these several spasmodic efforts have been followed by many discouraging lapses and much that tended to dishearten the truly earnest and temperate lovers of temperance, yet we believe that, unconsciously to itself, perhaps, the public has thereby been educated to a higher grade of thought and feeling upon the subject. This we regard as practically the most valuable result of these periodic agitations.

Akron's noted Glendale is justly considered

one of the most beautiful and best kept cemeteries in the entire country. Centrally located, yet possessed of remarkable natural advantages, it is at once removed from all indications of city surroundings, and pleasingly diversified in surface contour. The spacious grounds are under the charge of an experienced and competent manager, who devotes his whole time to the task. There is a fine stone lodge at the city gateway, and just inside a costly memorial chapel, reared in 1875 by the Buckley Post of the Grand Army of the Republic, aided by outside subscribers, in remembrance of the brave comrades from Akron and Portage Townships, who fell in the war of the rebellion. There are also fine greenhouses in connection with the yard, and a well-arranged vault. This brief notice will not undertake to describe Glendale; no attempt at description would convey to one unacquainted with the actual appearances an at all adequate idea of its summer beauty, and to one knowing it the effort would doubtless seem to fall far short of reality.

In 1839, the Town Council passed an act to regulate the public burying-ground (which had already been located where it now is), providing for its thorough care under the supervision of a committee appointed directly by themselves. This management continued until 1850, at which time, in February, the corporation transferred all its right and title to the "Akron Rural Cemetery Association," an organization chartered for the purpose, and in whose hands it still remains, conditioning the transfer upon a perpetuation of the same methods of conduct.

A large share of credit for the present state of improvement is due to the judicious and efficient labors of the Ladies Cemetery Association, an adjunct of the Rural Cemetery Association before mentioned, an organization broader than any denomination or set, and whose members represent them all. These ladies, both by direct exertion and by means of numberless fairs, bazars, musical and other entertainments, have raised considerable sums of money, which have been expended in improving and adorning this beautiful "God's Acre."

The inception of the town, in 1825, was far from promising. Its main features were alder swamps and barren sand hills. A more uninviting site could hardly be found in the neighborhood. The completion of the Ohio Canal

to this point, however, in 1827, worked wonders. That year and those immediately subsequent greatly increased the population, so that by 1830, the census of Portage Township (including Akron, which constituted almost the whole of the enumeration), showed 475. By 1832, Akron was thought to contain about 600 inhabitants; in 1836, when it became legally a town, 1,200; and in 1840, it had reached 1,664.

The imports in 1836 amounted to \$500,000, and the exports \$400,000, indicating a thriving state of business, a characteristic which has been thoroughly maintained and to a remarkable degree ever since. The chapter upon our industries and manufactures will exhibit this fact more clearly. The growth has been in general of a very steady uniform sort, not greatly fluctuating from time to time. It has also been of a desirable kind, healthy and constant. The great panic of 1837, to be sure, was disastrous, but the town soon rallied, and proved to have suffered no lasting check. In the hard times of 1873, and the four years next succeeding, Akron endured the strain much better than the majority of towns and cities of the State.

Quite a number of times she has been visited by extensive conflagrations—notably those of 1848, 1849, 1851, 1854, 1856, 1869, and several of later dates—by which large portions of the heaviest business sections of town have been destroyed, but from the ashes of which, phoenix-like, better forms have followed.

In 1853, Akron had eight churches, five flouring-mills, one woolen factory, three foundries, sixty stores, six hotels, one bank, three printing offices and two telegraph offices.

The State Legislature in 1845 chartered a college in Akron, with power to confer literary, legal, medical and theological degrees. It seems that nothing was ever accomplished in the practical furtherance of this idea. The incorporators evidently had in mind the establishment of a university composed of several colleges. Why the project died we cannot learn.

Akron was, however, provided with a classical college, first opened to students in 1872, through the munificence of Hon. John R. Buchtel, seconded by the contributions of many others, particularly of the Universalist denomination. An extended sketch of Buchtel College is elsewhere presented in this work, so we

will simply refer the reader to that for fuller information.

A number of severe fires in the early years of the town rendered the need of some organized protection imperative. In December of 1839, the Council, by ordinance, provided for the creation and maintenance of volunteer fire companies. Accordingly, a company under the name of the "North Akron Fire Company," was formed January 28, 1840, with twenty-six members. To these persons there was subsequently issued by the Town Recorder, upon the direction of the Council, certificates of membership dating back to the time of joining. February 10, 1846, eight more persons became members, and "No. 1" was added to the name. The application of "Niagara Fire Engine Company, No. 2," was accepted by the Council December 20, 1845, and thirty-seven men appointed members. Again in 1847, a hook and ladder company was, by the same authority made a fire company, and clothed with the name "Tornado Fire Company, No. 3," indicative, we suppose, of the vast energy of its thirty-two members.

Still other companies were from time to time added, all volunteer organizations. In May, 1858, the Council first declared a compensation, further than the statutory privileges, to the members of these companies. This was the princely sum of \$2 each per year, and that conditioned upon a strict compliance with the prescribed regulations.

Gradually, however, improved appliances and a paid service have been substituted for the former less capable but hearty labor, and now Akron is abreast with the foremost cities in the efficiency of her protection against fire.

A petition was presented to the Town Council July 29, 1847, signed by H. B. Ely, praying the privilege of constructing a line of telegraph through Akron. The petition was granted, and a resolution in pursuance adopted whereby "The Lake Erie Telegraph Company was authorized to run their line of communication through this town, provided they do not interfere with or obstruct any street or alley in said town, to the inconvenience of the citizens or public."

This was the earliest move in the direction of telegraphic facilities. The line was built and operated for a few years, but for some reason or other was discontinued.

The railroads of Akron and the county at large are treated of in a distinct article by another writer. We will here merely advert to them, for a fuller and more interesting description, referring to that chapter. The "Akron Branch" of the Cleveland & Pittsburgh Railroad was projected early in 1851; the survey began April 15. In June of the same year, the people of Summit County by a majority vote of 827, instructed the County Commissioners to make a subscription of \$100,000 to the proposed road in behalf of the county. The contract for building from Hudson, its northern terminus and point of junction with the main line, to Akron, was let June 21. The work was pushed with vigor. By the 1st of the succeeding January, the road was in use as far as Cuyahoga Falls. By the next 1st of June it connected at the Old Forge with a packet line of boats upon the Pennsylvania & Ohio Canal. Early on the morning of Sunday, July 4, 1852, it was completed so as to allow the passage of cars into Akron. A mild form of jubilee had to be indulged in although it was Sunday, but the great day of jollification occurred on Monday, the 5th. Of that we will give no narration, as we presume the article devoted specially to this topic will contain it in full, only mentioning that at the great dinner at Cuyahoga Falls, in the afternoon, Col. Simon Perkins, President of the company proposed a name for the new road, "Cleveland, Akron & Zanesville Railroad," which was then and there formally adopted. Subsequently the name was still further amplified in significance—the Cleveland, Zanesville & Cincinnati Railroad—no one of which places, by the way, has it ever reached. It is now known as the Cleveland, Mt. Vernon & Columbus Railroad.

Our next road was the Atlantic & Great Western, completed to Akron in April, 1863, a broad gauge, tributary to the New York & Erie. Of the tribulations of this unfortunate and ill-managed road, a vast chapter might be written. After many successive mutations, the road is at last under an entirely new and distinct organization and with a new name—the New York, Pennsylvania & Ohio—we hope, upon a better, sounder foundation, and in a fair way to serve its patrons respectably and repay its investors.

The third road to enter Akron was the Cuyahoga Valley, commencing operations the 1st

of February, 1830. Though having but just made a beginning, its management appears to have been judicious; it has certainly striven to accommodate the public, and has secured very many friends who warmly desire for it an unqualified success.

In 1860, a strong effort was made to secure the location of the new State Penitentiary at Akron. Several prominent citizens were sent to Columbus to lobby for the measure. In December, the Council empowered our Representatives to tender to the State an eligible site of twenty acres of land or more if needed, free of charge, for that purpose; the offer was not accepted.

With reference to the advancement of Akron from its grade of an incorporated village to become a city of the second class, an enumeration of the inhabitants was taken upon the 14th day of December, 1864. It was thus learned that the requisite 5,000 was exceeded, and steps were at once instituted looking to the desired action. Upon the 20th of December, by resolution of the Council reciting the above fact, the proper State officials were requested to advance the grade as prayed for. In consideration of this petition, and in accordance with the statutory provisions, Gov. Brough, Auditor of State Godman and Secretary of State Smith declared Akron to have become a city of the second class, January 21, 1865.

In September of 1865, there was annexed to the city the territory lying just east of the then eastern corporation line, and extending as far as Middlebury Township, *i. e.*, to where now Middlebury street intersects East Market.

The census of 1860 had shown a population of 3,520 in Akron; that of 1870 showed 10,006. The city had almost trebled in the decade, though the county as a whole had gained but 26½ per cent; of the 7,275, the total county increase, 6,486 had occurred in Akron. This effect was in a measure to be sure due to the gain by annexation before mentioned.

The next and last change in the corporation boundaries took place in 1872. August 24, 1871, the Council provided that at the regular spring election, to be held on the first Monday of April, 1872, the question "Shall the incorporated village of Middlebury be annexed to the city of Akron?" should be submitted to

the electors of that village. By subsequent action it was also ordained that the same question, at the same time, and in the same manner should be declared upon by the voters of Akron. The result was as follows: Akron—For annexation, 1,042; against, 16. Middlebury—For, 140; against, 26. Upon this decisive vote, the Council appointed William T. Allen, George W. Crouse and David L. King Commissioners on the part of Akron to arrange terms and conditions with the Commissioners appointed by Middlebury, namely, Mendall Jewett, Frank Adams and George F. Kent. Upon the 13th of April, the terms of annexation were agreed upon, and, upon the 24th, the report of the Commissioners was presented to the Council, by it adopted, and the former village of Middlebury formally added to the city and made to constitute its Sixth Ward. Final action, perfecting the work, was taken by the County Commissioners October 28, 1872.

From a population of 10,006 in 1870, Akron grew to 16,462 in 1880, a gain of $64\frac{1}{2}$ per cent. Excluding the effect of the annexation of Middlebury, the increase would be $49\frac{1}{2}$ per cent. During the same period the increment of the county was 26 per cent, the same as for the decade preceding.

As a city, we are at the present in the midst of an era of active and great improvement. The telephone system has been in operation less than two years, and the city is radiated in every direction by its wires. It has passed beyond the experimental stage, and from an interesting novelty has become almost a necessity. Akron was the first place in the State, excepting three or four of the largest cities, to possess the telephone. Under the charge of the private company which owns and controls this system, are lines now in successful operation from Akron to Tallmadge, a distance of four miles; Akron to Doylestown, fourteen miles; Canton to Massillon, eight miles, and a line nearly constructed between Akron and Canton, twenty-two miles. When this is completed, Tallmadge, Akron, Canton, Massillon and Doylestown will, for the first time in history, be on speaking terms with one another. To this circuit will in time be added Cleveland and Cuyahoga Falls, and eventually a number of other places.

In the winter of 1879-80, Akron was accorded the privilege of a free postal delivery, and early in the succeeding spring the system was carried into execution, to the great satisfaction of every one.

Akron is a pioneer in the matter of utilizing electricity as a means of lighting streets, and is the *first* city of the world to adopt the method of high masts for that purpose. It is yet too early to predicate the means or the method a success or otherwise, but certainly the beginning augurs well for the future. A new city hall is nearly ready for occupancy; the needs which this will supply have been long and severely felt.

A system of water-works of the most improved type is well on toward completion. It is being put in by a private company, upon which falls the entire responsibility, expense and hazard. We are now promised the turning on of the water by the 1st of June next, and when it comes it will assuredly meet a hearty welcome from all our citizens. Besides this, a complete plan of sewage has been devised by our city Civil Engineer, and the necessary work is now being done. A new paving with stone to replace the worn-out Nicholson has been ordered upon East Market and Mill streets, and before many months, in all probability, several other streets will be repaired in the same manner. With all these progressive steps, Akron yet enjoys the unique position among cities of being wholly free from debt. It is to be hoped that this blissful state of things will continue.

Two more improvements seem earnestly demanded in the near future. One of these, at least, will doubtless soon follow. We mean the hiding from sight that long-time eyesore—the ditch where was once the Pennsylvania & Ohio Canal—alike obnoxious to the nostrils and deleterious to the health of our people. The initial steps toward so desirable a result have already been taken in the City Council, in a resolution to the effect that the old canal bed should be conduited from Tallmadge street to its end at Mill street.

The other is the introduction of street railways, and we confidently predict that not many years will elapse before that also will be chronicled among the manifold advantages of Akron.

CHAPTER IX.*

CITY OF AKRON—ITS MANUFACTORIES—THEIR RISE AND PROGRESS—THE REAPER WORKS—SEWER PIPE AND POTTERIES—MILLS, OATMEAL, ETC.—OTHER INDUSTRIES.

“The bellows-puff, the hammer-beat, the whistle
and the song,
Told, steadfastly and merrily, toil rolled the hours
along.”—*Street.*

THE first steps taken to inaugurate manufacturing within what are now the corporate limits of the city of Akron were by Joseph Hart in 1807. This movement was commenced in what is now the Sixth Ward, Middlebury. Mr. Hart began, during that year, the erection of a “grist-mill.” He soon sold one-half the land he had purchased to Aaron Norton, and the two completed the structure in partnership, finishing their work in 1809. For many years this mill did the work of the surrounding country in the way of grinding—as did “Bagley’s Factory” the cloth-dressing and carding. The projecting of the Ohio Canal gave an impetus to the manufacturing interests of Middlebury—mills, factories and mechanical shops springing into existence; but Akron, on the canal, when once under way, brought a sad discomfiture to the village eastward. In 1831, Dr. Eliakim Crosby conceived the project of bringing the Little Cuyahoga from Middlebury round to Akron, thus creating a fine water-power. No sooner was the project conceived than it was undertaken; the “Cascade mill-race” was dug and the Stone Mill put in operation. Thus was started on its astonishing career of prosperity the manufacturing interests of Akron proper. Middlebury languished for awhile; its factories closed, and the “grinding ceased.” However, in the course of time, mechanical establishments began to increase and its water-power was improved. In the end, the pottery business gave it a permanence, so that now the Sixth Ward is emphatically a manufacturing ward of the city.

Among the prominent industries of Middlebury, nearly thirty years ago, was the carriage manufactory of C. A. Collins, which then turned off goods to the amount of \$20,000 annually. Their carriages were of “the highest

finish and style, and in great demand in the Southern and Southwestern States.” Irish, McMillan & Co. had an extensive machine shop, “where all kinds of machinery were manufactured.” Their building was three stories high, and about three hundred feet long by forty wide. This firm averaged, in manufactured articles, about \$14,000 a year. Their fire-engines were superior to those made in Eastern establishments.

“The pottery business,” says a writer of that period, in speaking of the manufactories of Middlebury, “is carried on extensively. There are three devoted to the making of ordinary stoneware, one to the manufacture of stone pipes and pumps, and one to Liverpool ware. The clay is procured from Springfield, and the ware is of the best quality. The pipe for pumps or water drains, is made in joints of twenty inches, and by shouldered and cement are put together so as to present an entirely smooth inner surface. They are glazed inside and out, to prevent decay of the pipe and an unpleasant taste to the water. They are destined to supersede all metallic pipes.

“The potteries,” continues the writer, “furnish 80,000 gallons of the manufactured articles annually, which average five cents a gallon. There is also a cabinet-shop in this town (Middlebury), which turns off an immense number of articles in its line. Every operation, from jacking an oak board to veneering the choicest mahogany, is done by machinery. Rawson, Goodale & Co. have a woolen factory which employs a large number of hands and turns off a considerable amount of broadcloths, satinetts and flannels. These goods are taken to the New York market, the Ohio mark taken off, and then, by the merchants, returned to Ohio and sold as European manufacture. The deception is a harmless one, as their goods are decidedly preferable to those imported. There is also a comb and button factory in Middlebury, one of fanning-mills, and several for making lucifer matches.” Such was the state of

*Contributed by C. W. Butterfield.

Geo Schumacher

manufacturing industries in what is now the Sixth Ward of Akron, something more than a quarter of a century ago.

From 1831, when the first mill was built in the village of Akron, to 1854—a period of twenty-three years—the manufactories of the place had largely increased both in number and importance; but the great want was a speedy transportation. Says the writer already quoted: “When our immense beds of stone-coal, iron and pottery shall have an opening to market; when our flour, by a speedy transportation, can come in competition with the New York and Eastern production; and when the milk from our dairies can be sent almost warm to the New York market, then Akron will indeed be not only the child of promise but of fulfillment.”

In 1857, there were in Akron two woolen-factories, five flouring-mills, a steam engine factory, a blast-furnace, a mineral paint mill, a card-factory, and an extensive stove-factory, besides a number of smaller works. The next seventeen years showed a large increase; for, in 1874, there were in the whole city, two woolen-mills, two paper-mills, seven flouring-mills, four foundries, one rolling-mill, one blast-furnace, one forge, three planing-mills, two manufactories of reapers and mowers, one of pearl barley, one of oat-meal, one of knives and sickles, one of rubber goods, one of chains, one of matches, and three machine shops. There were, also, one manufactory of boilers, two of plows, one of woolen goods, one of horse hay-rakes, one of stoves, one of iron fences, ten of stoneware, and one of blank books.

There is now, probably, no city in the United States of the same population, presenting such a diversity of manufactories as Akron. The receiving and shipping facilities enjoyed by the manufacturers of the city may be regarded as one of the important factors in their progress and prosperity. The magnificent water-power is another noteworthy advantage; and the abundant supply of cheap fuel from the neighboring coal-banks is still another. The market is stocked, at all seasons, with cheap farm produce; house rents are reasonable; in fact, all the expenses of living are very moderate. The city has already three railways. This gives competing lines East and West, and insures the lowest rates for fare and freights.

In no department of the mechanic arts, it is safe to say, has more marked progress and im-

provement been made within the last quarter of a century than in that of labor-saving farm machinery. The problem of how to construct the most economical and effective mechanism for the consummation of a given purpose in the arena of agricultural enterprise, has for a series of years been made the patient and unremitting study of some of the most talented of American inventors. While admiring a beautiful and perfect piece of machinery, the creation of some master mind, how little conception has the beholder of the many months and even years of studious application, of persistent experimenting, of scientific induction, that were involved in the successful development of it. This is known only to the inventor himself, and it is in entire accord with the doctrine of compensation that he should reap the legitimate reward for his incessant toil and pre-eminent skill. That this reward, in its fullest measure, is due to Lewis Miller, of Akron, inventor of the Buckeye Mower and Reaper, will be conceded by every one acquainted with his inventions. The fact that the machine is to-day, in its essential principles and mechanical construction, the same as when originally brought out—in 1855—is assuredly an emphatic tribute to Mr. Miller's genius. Of course, minor improvements have from year to year been made upon it—here a little and there a little—but its main features remain the same.

These machines were first manufactured in Canton, Ohio, by the firm of C. Aultman & Co. In 1863, the works in Akron were started as a branch of the Canton house. There is now another branch, located in Poughkeepsie, N. Y. Taken together they rank among the largest works of the kind in the world. They are making at Akron sixty-five machines a day, and have shipped an average of three car loads a day since the middle of December, 1880. From this writing (March, 1881) until July following, the average will be about eight car loads a day. The works comprise in Akron a main building, 450x50 feet, with four floors; a warehouse, 50x200 feet, having also four floors; a molding shop, equivalent to 150x70 feet, one floor; engine and boiler-rooms, 50x40 feet, two floors; a blacksmith-shop, 30x200 feet, one floor; an old wood-room, 50x100 feet, having three floors; a new building, 265x60 feet, with four floors; a new engine-room, 20x30 feet, one floor; a repair room, 30x50 feet, two floors; an

iron warehouse, 35x116 feet, and an office building, 40x80 feet, with three floors; the total area of the buildings being 243,900 feet, or upward of five and two-thirds acres. These buildings are thoroughly equipped with very complete machinery, especially adapted to this kind of business, and operated by steam-power supplied from engines of colossal proportions. The machines are sold all over the United States; but, the principal demand is from the wheat-growing districts west of the Mississippi. At the works in Akron are now manufactured the Buckeye Mower; the Buckeye Single Reaper; the Buckeye Combined Mower and Dropper, rear delivery; the Buckeye Combined Mower and Table Rake, side delivery; the Buckeye Harvester, for hand binding; the Buckeye Twine Self-Binder, and the Buckeye Wire Self-Binder.

The firm of Aultman, Miller & Co. was organized in 1865, with a capital of \$300,000, since increased to \$1,000,000, for the exclusive purpose of manufacturing these machines. The headquarters and main works of the company are located at Akron.

But the "Buckeye" is not the only mower and reaper manufactured in Akron. The "Empire," made by J. F. Seiberling, at his works in the city, belongs to the lighter class of machines, and is now sold in every State and Territory in the Union. In its construction numerous improvements have been made since its first introduction into the market. It has been thoroughly tested in all kinds of grass and grain, and on all conditions of ground, with gratifying results. For compactness, simplicity, lightness of draft, ease of management and beauty of finish, it ranks deservedly high. The Empire Mower and Reaper Works were established in Akron by Mr. Seiberling in 1875. Their capacity is now 7,000 machines a year. The Empire works turn out a mower which is a two-wheeled, front-cut machine; to this can be added, at any time, a reaping attachment. This consists of a separate finger-bar, with either the dropper or Empire side-delivery table-rake, or sweep rake. Mr. Seiberling also manufactures the Empire Harvester and Binder, which is a new member in his family of machines. The buildings of Mr. Seiberling are those of the old Excelsior Mower and Reaper Works, located immediately east of the depot of the New York, Pennsylvania &

Ohio Railroad, on Forge and Lincoln streets. They consist of a foundry, 110x95 feet; a main building, 45x180 feet; a warehouse, 45x90 feet, and a blacksmith-shop, 35x40 feet. The steam engine which supplies the motive power of the works is of eighty-horse-power.

That such a prosaic subject as the manufacture of shirts should have been made so highly poetical, under the magic touch of an English poet, as to immortalize his name, is strange indeed; but such is the fact, for

"With fingers weary and worn,
With eyelids heavy and red,
A woman sat in unwomanly rags,
Plying her needle and thread;
Stitch! stitch! stitch!
In poverty, hunger and dirt,
And still with a voice of dolorous pitch,
She sang the 'Song of the Shirt.'"

That is to say, it was wonderfully sung by Thomas Hood, as every one knows. But mention of the two factories in Akron will not be made in verse; nor will the way their owners do business be chronicled in harmonious numbers. The office and factory of George W. Wright & Co. are located at No. 112 South Howard street, on the third floor. These gentlemen do excellent work, and are the sole manufacturers of the patent diamond neckband, which is used in all their shirts. The other factory is upon the same street, at No. 167, and is owned by Sperling & Roberts. They make first-class goods of four grades.

The manufactory of Frank D. Howard, who makes plows, cultivators, field-rollers, road scrapers, farm bells and other articles, is on the corner of High and Mill streets. This manufactory was first started in 1869, by A. Rice & Co., and continued under that name until 1872, when the firm changed to Benjamin & Howard, and, in 1877, the present proprietor became sole owner. The premises occupied by the business covers a space of 120 feet on Mill street and 115 feet on High street. The building consists of a two-story brick with basement, 35x70 feet, used as a factory, sample and sales-room and office; a foundry, 40x50 feet; a blacksmith-shop, 20x30 feet; and an engine-room, 15x20 feet, with sheds and warehouse for storage of material and stock. A forty-horse-power steam engine is used in driving the machinery. Mr. Howard makes superior chilled iron and steel plows, in which he has a large trade. In the foundry department, car wheels

for coal cars are the chief product. The trade of this house extends throughout Central, Northern and Eastern Ohio, Western Pennsylvania, and the Eastern and Western States.

In the Scriptures, carriages or chariots are frequently alluded to. Upon the flight of the the Israelites out of Egypt, they were pursued by Pharaoh with six hundred chariots, all of which were swallowed up by the Red Sea. Chariots and carriages were used mostly by kings and grandees on state occasions. The Greeks and Romans had chariots, but, strange to relate, it was so late as the sixteenth century (1550) that carriages were introduced into France; and at that date only three were known in Paris, then quite a large city. Since taste enters so largely into the construction of modern vehicles, and their price brings them to the doors of many, the manufacturing of them has become general. There are in Akron four carriage manufactories, where goods of that kind can be obtained second to none in the country.

C. A. Collins & Son have the oldest establishment for manufacturing carriages in Northern Ohio. It was commenced in 1837, by C. A. Collins. All styles of open and top buggies, fancy carriages, spring wagons and sleighs are made by this firm. Their works are located on the corner of Main and Church streets; their repository is on the "old gas works" property. An addition 30x50 feet, three stories high, has recently been made to their buildings.

Another manufactory of carriages in Akron is that of John Heppert, at the corner of Market and College streets. Mr. Heppert commenced in this line in 1858, in the Sixth Ward, then Middlebury. He now occupies as office, salesroom and repository two floors of the spacious building, 50x50 feet in size, at the corner of the streets just mentioned. He turns out some of as fine carriages, road wagons, buggies, express wagons and other vehicles as are to be found in this section of country.

A third manufactory of carriages is that of Charles Vogt, who commenced business in that line in 1876, at the corner of Main and Middlebury streets. Mr. Vogt has good manufacturing advantages and a prosperous trade. The old wood department and paint-shop measure 35x70 feet, and the smith-shop 30x45 feet. These are now store buildings. His new and commodious brick structure is used as an office and wareroom on the first floor. The second floor

is occupied as a paint room and repository. This building is on the northwest corner of the streets before mentioned, while the old buildings are on the southwest corner. His new frame building in the rear of the brick is used as a blacksmith-shop.

In addition to the manufactories of carriages before described, there is one belonging to Harpham Brothers, in the Sixth Ward, at 102 High street; but this firm is employed more especially in the making of wagons. They do a large and thriving business and their work is first-class.

The large establishment of the Whitman & Barnes Manufacturing Company makes nothing but articles appertaining to agricultural implements. This company is the outgrowth of two others: the Whitman & Miles Manufacturing Company of Akron, and George Barnes & Co., of Syracuse, N. Y., and was formerly conducted as a branch of a Massachusetts house, founded a number of years ago. The capital stock of the Whitman & Barnes Manufacturing Company is \$500,000. The works at Akron are very extensive, and consist of a number of buildings erected and fitted up expressly for the rapid and perfect prosecution of this particular branch of industry. They make mower knives, reaper sickles, sections, spring keys, guard plates and other articles of this nature. The demand for their goods extends from the rugged and rocky hillsides of New England, across the fertile prairie lands of the Mississippi Valley to the sunny slopes of the Pacific coast. They export large quantities to England, France and Germany. The annual business of the Akron branch of this corporation is fully \$500,000. Two immense engines of 150-horsepower each are used at these works. The company has a smaller branch house at Canton.

The tobacco trade is one of the most extensive in the United States, whether we regard the extent of the capital invested, or the number of hands to whom it gives steady employment. The use of "the weed" is very general, notwithstanding the theories put forth by certain medical writers concerning its bad effects upon the system, and the practice of smoking is on the increase, while chewing is perhaps scarcely holding its own, and snuff-taking is a thing of the past. Cigar manufactories are multiplying all over the country. There are no less than ten in Akron: Freudeman Broth-

ers, 165 South Howard street; M. H. Hart, 125½ same street; Holstein & Golberger, same street (No. 155); Louis Walde, near the fair ground; John Lotze, 707 South Main street; Benjamin McNaughton, 916 East Market street; J. Mengendorf, 125 South High street; H. F. Shrank, 258 West Market street; Peter Langendorf & Brother, 927 South Howard street, and John F. Weber, 164 same street.

There are two tanneries in Akron. The Akron Tannery is the property of James Christy & Sons, and is located on Howard and Main streets. The business was founded here in 1842, by the present senior member of the firm, and, from a comparatively small beginning, has steadily increased to its present extent and magnitude. The firm now occupies as office, storeroom and finishing department, four floors of the spacious new brick structure, 38x60 feet, at the intersection of Howard and Main streets, with a two-story building, 40x100 feet, the first floor of which is used for the storage of bark, and the second as a dry-room for hanging hides, and a two-story tannery building, 80x80 feet. They have all the latest improved machinery in the various departments of their extensive establishment, and manufacture every description of leather of superior grades, and the most excellent qualities, making a leading specialty of fine harness leather, which latter product has attained a national reputation for its uniform excellence and reliability.

John H. Christy is the owner of the other establishment. He is the successor of J. H. Christy & Co., who started the business in Akron in 1849. At that time, the firm purchased the tannery at the corner of Howard and North streets, which had been erected ten years before by Christy & Sawyer. The business continued under the firm name of J. H. Christy & Co. until April, 1849, when, by purchase of the company's interest, John H. Christy became sole owner. The building, occupied for storing and displaying goods, and as an office and salesroom, is a three-story brick, at 109 Market street. In rear of this is a brick warehouse, three stories high, 25x40 feet, with slate roof. Upon the site of the old tannery, an elegant one of brick, three stories high, 100x100 feet, is erected. The leather manufactured is harness, upper and calf. The trade of the house extends throughout all parts of the United States.

Beds have come down to us from the "ages primeval." An easy couch for the weary or sick—what is more comfortable?

"When thoughts
Of the last bitter hour come like a blight
Over thy spirit, and sad images
Of the stern agony, and shroud and pall,
And breathless darkness, and the narrow house,
Make thee to shudder and grow sick at heart;"

When disease has laid us upon a sick bed, and our bodies racked with pain, what greater boon than an improved spring bed-bottom for our couch on which to lie? F. F. Hale manufactures Champion spiral spring bed-bottoms at 206 Mill street. He began business in April, 1880. H. Limbert also makes goods of this description on Summit street. He manufactures, in addition, patent swings.

The Akron Steam Forge Company was originally a partnership concern, established in 1865, but, in 1879, it became an incorporated company under the above title, with a capital of \$60,000. The area of ground owned by the corporation is ten acres, and the works occupy a space of 60x265 feet. These buildings have a fine appointment of mechanical appliances adapted for the special work performed here. In the axle-shop are four steam hammers—one 4,000-pound upright, taking steam both ways; two halves, each with hammer-head weighing 2,000 pounds, and one with head of 1,500 pounds; five heating furnaces, and every requisite modern convenience commended by thorough experience.

The product of this company comprises car, driving and locomotive axles, shafting, eleven sizes of eye-bars for bridges, and every description of wrought shape work. In all departments are employed long-experienced and well-skilled artisans, none but the best selected materials, and absolute perfection is aimed at and attained in all their manufactures. Hence, wherever these uniformly fine goods have been introduced and used, their quality, strength, finish and durability are acknowledged to be unsurpassed by the output of any other like establishment in the Union. In their line of manufacture, the character of the stock employed is an all-important consideration, and therefore they use nothing but carefully selected wrought scrap, of tough and fibrous texture, insuring the most satisfactory results.

The company are doing a very prosperous business, and their product is in active demand by railway and other corporations, keeping the works constantly busy. They now give employment to some fifty hands, while their payroll foots up to \$2,000 per month. The present output is at the rate of about \$300,000 per year.

The shipping facilities of this company are all that need be desired. The Valley Railway runs through their premises, and they have switches connecting with the A. & G. W. and C., Mt. V. & C. roads, whereby they are enabled to ship their products to all parts of the country at competing rates. The office and works are east of the Fountain Driving Park.

One of the large industries of Akron is the manufacture of oat-meal. An analysis made by the eminent chemists Liebig and Hassal, shows that while wheat and barley contain 14 per cent of the nutritious elements—the life and muscle-giving qualities—and corn but 12 per cent and a fraction, oats contain nearly 20 per cent. The phosphorescent qualities of the latter act as a gentle and healthy stimulant to the brain; and on no food can one endure so great or so prolonged mental labor as on oat-meal porridge. To a very great number of people the value of oat-meal is little known, although the prejudice against it is fast giving place to a more just opinion, especially among the educated classes who are capable of appreciating the value of the favorable verdict of chemists and physiologists. There is more oat-meal now consumed in the United States than in Scotland. As it contains in an unusually large degree all the essentials which go to produce health, hardiness and long life, by all means give us more porridge and less pastry. From a highly instructive paper on oat-meal, by Dr. H. A. Mott, an eminent analytical and consulting chemist, of New York, we learn that of all cereal meals, oat-meal is far superior for the following reasons: Because it contains more fattening matter than any other cereal grain; it contains a large amount of nitrogenous matter (gluten); it contains so much nutriment in small bulk; it can be eaten for long periods with beneficial results; it keeps unchanged for a long time. In oat-meal the nitrogenous and carbonaceous elements exist in such proportions as to admit of it being eaten alone as a sustaining diet; hence it is a

typical food. The proper preparation and use of oat-meal for the table to make it palatable, is, as yet, not well understood by a large portion of American cooks. They cannot prepare it properly. To do so, requires a double kettle for boiling in water and steam—iron outside, and tin about an inch smaller inside. In this way the meal cannot be scorched.

The oat-meal mills of Akron may properly be said to have given the city a goodly share of its wide celebrity as a manufacturing center. The man as yet best known in this connection is Ferdinand Schumacher. Before he inaugurated the production in this country of this wholesome article of diet, it was generally believed that such a commodity as good oat-meal could not be made in America, simply because it then was not. But Mr. Schumacher entertained a different opinion in the premises, and, having had some experience in his native country (Germany) in this line, he came to the conclusion that the experiment looking to the production of superior oat-meal here should be persistently attempted. The signal success he has met with in his efforts in this direction shows that he was perfectly right in his judgment. When he began, all the oat-meal consumed in this country was imported from Canada and Europe; but his excellent product at length led the market, and at present the importations of this valuable hygienic food are comparatively trifling in amount.

Near the depot of the New York, Pennsylvania & Ohio Railroad are located Mr. Schumacher's German Mills, devoted exclusively to the manufacture of this article of food. His are among the largest and best-equipped mills in the country. They are seven stories high, and cover an area of 60x90 feet. They are fully furnished, from foundation to the top floor with the latest improved machinery and manufacturing apparatus. The engine, 20x42, is of 125-horse-power, built by the Putnam Machine Company, of Fitchburg, Mass., as were also all the other engines in this establishment.

The German Mills have two basement stories, each thirteen feet high, containing sixteen oat-driers, with a capacity of 3,000 bushels per day. The oats are kept constantly stirred and turned by machinery, so as to secure perfect uniformity in drying. Though the fuel used is coal, the arrangement of the driers is such that

no smoke or smut can come in contact with the grain.

In these mills are eleven hulling stones and buhrs for grinding feed, which are all run from a line shaft by quarter-twist belts. When perfectly hulled and cleaned, the berry of the oats are cut by ingenious machinery patented by Mr. Schumacher, consisting of a series of knives operating in connection with vibrating perforated plates, for the purpose of cutting the meal, instead of bruising and crushing the berry as in the old process, whereby a large proportion of the starch was unavoidably converted into a comparatively worthless meal or flour. The packing and warehouses are very commodious, light and airy, and kept scrupulously clean. The oat-meal is conveyed from the mill into this department by machinery, for the purpose of being packed and shipped fresh every day. A fair proportion of the meal is put up in fourteen-pound air-tight tin packages, in which it may be kept perfectly sweet for years. The "German Mills American Oatmeal" brand is largely shipped to every State in the Union, and its quality and flavor are pronounced unsurpassed on every hand.

Carter & Steward also manufacture oat-meal in Akron, at 111 South Main street. The buildings occupied by this enterprising firm were erected more than a quarter of a century ago and used as flouring-mills until 1873, when they passed into the hands of the present proprietors, and extensive alterations and improvements were made, and since that time they have been used exclusively for the manufacture of oat-meal. The main building is 33x95 feet in size, and the engine house and kiln, or department for drying oats, is 15x95 feet. The mill is supplied with complete machinery, especially adapted to the uses for which it is employed, and all the appointments of these works are of the best and latest improved designs. The products of these mills are sold in all portions of the United States, from Portland, Me., to San Francisco, Cal., in New Orleans and throughout the entire South. An idea of the capacity of the works and the extent of the business transacted by this house may be gathered from the fact that their annual sales in this one item alone exceeds \$100,000.

Besides the two mills already spoken of, there are those in Akron of Hower & Co., successors to Turner & Co., which make oat-meal, on the

corner of Canal and Cherry streets. Turner & Co. started in 1877, and were succeeded by Hower & Co. in December, 1880. Their mills are now known as the Akron Oat-Meal Mills. Their capacity is sixty-five barrels a day. The trade of the firm extends from Michigan to Maine.

The latest addition to these mills is the manufacture of rolled avena (rolled oats), which is oat-meal as originally made, and claimed to be superior in flavor and much more easily cooked than the granulated meal.

There are in Akron four extensive planing-mills. The Weary, Snyder, Wilcox Manufacturing Company have their buildings on Main street. This company was founded in 1864, by Weary, Snyder & Co. It became a joint-stock company in 1877, with an authorized capital of \$150,000. This company handles about 3,000,000 feet of lumber annually. Their yards and mills occupy about four acres of ground opposite the Empire House. The factory building is three stories in height, and 80x120 feet in size. This is equipped with a variety of machinery especially adapted for this particular branch of industry, among which is a gang of saws twenty-eight in number, planing machines, ten single saws, numerous scroll saws, a dove-tailing machine of their own invention, used especially in the manufacture of boxes for the establishment of F. Schumacher for the packing of oatmeal, pearl barley and cracked wheat; door, sash and blind machinery, etc., operated by a forty-horse power engine. In this establishment is manufactured doors, window sash, blinds, door and window frames, casings and brackets.

In 1852, J. H. Dix & Co. started a planing-mill at the Aetna Mills—the first in Akron. They moved in 1855 to south Howard street near the gas works, where the business is still carried on—but by other parties. They continued the work for three years, when they sold their mill to J. Rockwell & Co. The last-mentioned firm conducted the business about three years, when their interest was disposed of to W. L. Evert & Co., who continued the work for a time when the property was sold to W. B. Doyle & Co., the present owners. This firm manufacture doors, sash and blinds and other articles appertaining to house-building. They also have a lumber-yard connected with their mill. They carry on an extensive business.

Plaster, as a fertilizer, is also manufactured by them.

Another planing-mill is that of Simon Hankey. This was started at his present location, 1136 South Main street, in July, 1872, where he occupies three acres of ground. By reason of his straightforward course, characteristic push and integrity in all his dealings, he has succeeded in establishing a prosperous and constantly amplifying trade. His fine planing-mill measures 60x122 feet, part of which is of two stories. He has the latest improved machinery for general planing and the manufacture of sash, doors, blinds and moldings. His trade is chiefly that of the city and county.

The planing-mill of D. W. Thomas, at 244 West Market street, is an extensive one. It was first started as a furniture factory by George Thomas, father of the present owner. After going through several hands and being changed to a planing-mill, the ownership finally passed to Mr. Thomas, who now conducts a large lumber business in connection with his mill.

All nations, ancient and modern, savage and civilized, have considered respect for the dead a virtue, and burial-places as sacred. Abraham bought the cave of Machpelah as a burial-place. Egyptians hewed sepulchers out of solid rock, and built vast pyramids to serve as repositories for their dead, whose bodies were so embalmed that after 3,000 years they are found in a good state of preservation. The Romans honey-combed the hills of Southern Italy with catacombs, in the niches of which they placed their dead. The cemeteries of modern civilization are fast getting to be picturesque cities of the dead. Monuments of all kinds mark the resting-places of those who slumber in the bosom of the earth. Akron is not behind her sister cities in the manufacture of these standing memorials. The proprietor of the Akron Marble Works, M. H. Crumrine, manufactures and deals in American and Italian marble and in American and Scotch granite mantles and grates. He first started the business in Massillon, in 1857, and in 1863 changed its location to Akron, when he purchased a lot at 219 and 221 East Market street, 100x40 feet, and erected a frame building in which he continued his business until in 1866, when he moved the frame building to the rear of its former location, and on the same site erected a fine three-story brick block known as Castle Hall Block. In 1868,

at 15 North High street, one door from the corner of Market street, he erected a brick building 53x16, which he has since occupied as sample and salesroom and office, with a work-shop immediately in the rear 35x20.

Besides the marble works just mentioned are those of Emil Feige, who manufactures monuments and tombstones of Italian and American marble, sandstone and other varieties, at 235 Main street. This house was founded in 1858, by Jennings & Henry. In 1877, the present proprietor, E. Feige, purchased the establishment and became sole proprietor. The building at present occupied by the business is a frame 20x45—the front portion used for display of manufactured good and the rear for manufacturing.

Not only oat-meal, but pearl barley is extensively manufactured in Akron. The Empire Barley Mills of Ferdinand Schumacher are located near the depot of the New York, Pennsylvania & Ohio Railroad. These mills have six floors, each measuring 85x60 feet. The engine room contains a double engine with combined power of 250 horse. A 40-inch belt on an 18-foot pulley conveys the power to the pearling machines, which, thirteen in number, are attached to a long line shaft, and have a united capacity of 250 half barrels of pearl barley per day, of 110 pounds each.

On the first floor are the barley machines, consisting of an iron shell turning in the opposite direction, from rapidly-revolving sandstones, four feet in diameter by fourteen inches across. This mill, the German Mill, the model Akron (A) elevator, and the commodious packing-houses, which are all adjoined, have a total frontage of 293 feet.

Gorner & Planz are the proprietors of the Akron File Works, located between Carroll and East Middlebury streets. This firm is the only one in Summit County engaged to any extent in this branch of manufacture.

The enterprise was first started by Methias Harter, in 1868. The senior partner of the present firm became a partner in 1870, and the business was conducted until 1873 under the firm name of Harter & Gorner, when Mr. Gorner purchased the interest of Harter, and for a year and a half continued the business alone. In 1875, H. Polle purchased the works from Gorner, and continued the business with Planz as partner until 1877, when Mr. Gorner re-

purchased the interest of Pohle; and since, the firm name has been Gorner & Planz. The buildings occupied for the conduct of the business are two in number—one, 16x32, the other 16x22. The location of the works is just east of the Buckeye Shops, and in the rear of the Akron Knife Works. In the works is a ten-horse-power engine, which is used principally in the grinding of files, five cutting-blocks, and all tools and machinery used in cutting files. The trade of the house extends throughout Northern, Central and Eastern Ohio, a large amount of the product being sold to the large manufacturing establishments of Akron.

Baker, Merriam & Co. manufacture wood and clay smoking pipes, enameled teapot knobs, pail woods and cigar boxes, also all styles of Hamburg and Shaker pipes, at the corner of Bowery and Ash streets. J. W. Baker began business at this point in 1870, in the manufacture of cigar boxes alone, and was joined in the fall following by J. C. McMillen, who purchased an interest in the concern. They made cigar boxes about four years, after which they added wood smoking pipes and tinnerns' teapot knobs. They now carry on a large and flourishing business in the articles above mentioned.

Among the multifarious industries of the city of Akron, there is no single one which has contributed in a greater degree to give the city a wide-spread reputation than that of the production of sewer pipe. From the rock-bound coasts of New England to the prairie cities of the far West the fame of the Akron sewer pipe is familiar as household words, and has repeatedly received the highest encomiums from Mayors and boards of public works, engineers, contractors and chemists. It is manufactured from a combination of the celebrated "Summit County Clays," which by careful analysis have been found to be superior to any yet discovered for this particular purpose. By skilled labor and powerful machinery of the latest and most approved design, the material is rendered homogeneous and uniform throughout, and under immense pressure the pipe is made very compact, and under a high temperature becomes thoroughly vitrified and impervious to the action of acids, gases and steam, all of which are found to a greater or less extent in city sewers. This kind of clay receives a perfect glaze from the vapors of salt, and does not require slip or other foreign substances which are

liable to cut or scale off by the action of sewer gases.

The subject of thorough and perfect sewerage is beginning to receive the general public attention and recognition which its importance demands. That the health of communities is seriously affected and impaired by faulty or inadequate drainage is a proposition susceptible of ample demonstration. The disease-breeding miasmas contaminating the atmosphere of thousands of neighborhoods and homes, poisoning the human system with noxious effluvia and deadly exhalations, are the sure and direct result of heedlessness with regard to sanitary teachings in this direction. Go into a neighborhood where typhoid and typhus fevers prevail, and you will certainly find a cause for this infectious malady in the noisome gases emanating from the undrained soil or from imperfect sewerage, and, not infrequently, in consequence of drinking well water impregnated with fetid percolations from contiguous privy vaults and cess-pools.

It is, moreover, unquestionable that many other forms of disease are contracted by similar means, emphasizing the vital importance of counteracting and removing this pestilent cause of disease and death.

The fact of the need of a universal system of sewerage being well established, it now remains for us to consider and determine as to the best and most approved material for this purpose, inasmuch as upon this point of perfect sewerage depends the health and well-being of the public.

The strange anomaly is too often observed of a house-builder, in order to save a few dollars, contracting for the introduction into his premises of a poor and cheap sewer connection, thus inviting febrile disease into his household; but then does the victim employ a quack doctor to attend his family? No; he hesitates not to summon the best physician to be had. Here is an illustration of obtuse empiricism at the first and corrective skill at the last, although perhaps the latter is employed too late to prevent fatal consequences of the imprudence of "saving at the spigot and leaking at the bung."

The initial process in the manufacture of vitrified pipe is the grinding and tempering of the clay, some of which is extremely "refractory," in huge mills—the substance being manipulated by large revolving discs describing

diverse circles, and moving gradually from center to circumference of the clay receiver by the operation of an automatic screw. From the mills the tempered mass is thrown into the "blockers," which expel the air, solidify the substance, and form it into blocks, which are brought by elevators up to the powerful screw and steam presses, the cylinder whereof contains an inside die suspended from the top of the press, taking the place of the core in iron castings, and an outside die which forms the exterior of the pipe. The clay is forced down between these dies, producing pipe ranging in diameter from one to twenty-four inches, and is cut off at proper lengths by a series of knives. The present forms are then transported by steam and hydraulic elevators, consisting of endless belts, to the drying and finishing departments, where they are seasoned for three or four days by steam heaters. They are then taken by tramways to the burning kilns, ten in number, each of which is as large as a good-sized room, where for several days they are subjected to a most intense heat, perhaps not far from a thousand degrees—a "warmth" that would have made old Dr. LeMoyné, of crematory fame, dance with delight. The torridness of this temperature may be imagined when it is stated that thereby iron can be reduced to a cinder.

After the clay has approached the melting or fluxing state, coarse alkaline salt is thrown upon the fires, producing a dense vapor which permeates every part of the kilns, circulating through and around the sections of pipe, completely enveloping their inner and outer surfaces. This vapor chemically unites with the pipe communicating to it a smooth and glossy finish, whereby the substance becomes vitreous or glass-like, and the glaze is an integral part of the pipe itself; not a mere varnish-like coating, as is the case with the "slip"-glazed pipe. The contents of the kilns are allowed to gradually cool off, and usually at the expiration of a week they are in proper condition for removal and the market.

The Akron Sewer Pipe has for many years been in satisfactory use in every section of the country, and is its own complete recommendation. Its even interior surface has no hummocks to arrest any floating substance, and its glassy smoothness enables a very small flow of water to carry along with it all the solid matter

that finds its way into the sewer. For over twenty years the "Akron" has been the standard in Chicago, where the flat, low-lying surface requires the most perfect sewers, because of the very slight fall possible in their construction. The experience of other cities and towns which have adopted this pipe uniformly corresponds with that of Chicago, and wherever practically tested it has maintained its justly exalted reputation.

Another significant fact is that these pipes have been and are employed in chemical works and retorts, holding the strongest acids, and nothing has ever been used which will produce the slightest effect upon them; they cannot be disintegrated or even weakened by any known chemical.

There are three sewer pipe companies in Akron, each one which is largely engaged in the manufacture of sewer pipe. The Akron Sewer Pipe Company, at 173 North Water street, Sixth Ward, make standard Akron sewer pipe. The business is conducted under the name and style of the Akron Sewer Pipe Company, was founded in this city in 1848, by Merrill, Powers & Co. It subsequently was transferred to Hill & Adams, who were succeeded in 1867, by the Hill & Adams Sewer Pipe Company. In 1871, the company was again reconstructed and became as at present, with a paid-up capital of \$175,000, and an authorized capital of \$300,000. It is a joint-stock company, incorporated under the laws of the State of Ohio, with works and general headquarters at Akron, and agencies in all the principal cities of the United States. The works consist of one two-story brick structure, 50x240 feet in size, and one four-story structure, 50x150 feet, with numerous smaller buildings, sheds, etc. They have ten down-draft kilns, each with a capacity of twenty-five tons. These kilns are constructed so as to secure a uniform heat, vitrifying each piece of pipe, which by gradual cooling is rendered free from checks and scales. The products of the company are sold in almost every State in the Union. These were the first sewer pipe works started west of New York City, and the second established in the United States.

The Buckeye Sewer Pipe Company manufacture, at 921 East Exchange street, Sixth Ward, vitrified salt-glazed sewer pipe. This company was incorporated in 1872, with an authorized

capital of \$100,000. The buildings occupied were erected in 1867, for the manufacture of woolen machinery, and were occupied for this purpose until in 1872, when the business was changed to that of the present. They consist of two main shops of brick, 170x45 and 80x40 respectively, office, sheds, etc. The shops are equipped with all modern appliances for the manufacture of sewer pipe; six kilns of two car-loads dimensions each.

The Hill Sewer Pipe Company also manufacture sewer pipe in Akron. Their place of business is at 1175 East Market street. This company was founded under its present title in 1873, as a stock company, with a capital of \$80,000. D. E. Hill, one of the stockholders, and the gentleman from whom the company takes its name, originated the sewer pipe business in the United States, and to him is largely due the honor of bringing about a much needed reform in the sewerage system of most of the cities of the Union, by the introduction of this pipe, which is now acknowledged to be a safe and reliable article for sewers. The works occupied by the Hill Sewer Pipe Company occupy a large tract of ground, and contain one four-story structure, 50x100 feet in size, equipped with all the necessary machinery for the manufacture of these improved pipes, and four kilns, 15x30 feet in dimension.

That the taste for personal decoration is a universal expression of human existence, and that the art of making jewelry was one of the first at which mankind arrived, is evident from the immense stores taken from the tombs of ruined cities of the Egyptians and other nations. In the manufacture of jewelry but little is done in Akron, but that little is well done by George J. Neiberg, at 179 South Howard street.

Matches in their present form were first made public about 1830, by Faraday, and came rapidly into public use. The tip of the match is a combination of sulphur and phosphorus. The phosphorus ignites at the heat of 120 degrees, which a slight friction will produce, and this in turn ignites the sulphur, which requires 450 or 500 degrees. The flame of the sulphur sets fire to the pine of which the match is composed, and which ignites at about 600 degrees. The combination is necessary because the phosphorus alone would not kindle the match, while the sulphur alone would not ignite with ordinary friction. The

number of matches that are annually consumed in this country is something wonderful to contemplate. According to the late report of the Revenue Department, the tax on matches for the last year yielded revenue to the amount of \$3,561,306. At 1 cent a box, this would represent, in round numbers, 356,000,000 boxes. Calling our population 50,000,000, this would give over 7 boxes to every man, woman and child in the country. The taxes paid on matches by each individual in the land would thus be 7 cents. The revenue tax on matches is 1 cent for each 100 in a box. Where such an immense quantity of matches are consumed, there must be considerable facilities for manufacturing them. This we have in the ingenious machinery used in making them, as most all of the processes in manufacturing them are conducted by mechanical appliances. The wood used is the best—clear white pine—which is first sawed into blocks of equal size, and of two matches in length. These blocks are then made into splints of a proper size, by being forced through tubes with numerous perforations, made as near together as possible, leaving just enough strength for cutting purposes. These perforations may be either round, square or diamond shaped, the latter forming the name of the new combination. The square forms are called "telegraph" matches. These and the diamond are preferable to the round, as they do not break so easily. After the splints are cut into proper sizes, they are fed through a hopper and received by a double chain, which carries them to the sulphur vat, then to the phosphorus vat, when they are taken off and removed to the packing room. The phosphorus composition into which the matches are dipped is composed of phosphorus, niter, glue, red ochre and smalt in proper proportions. In safety matches, the phosphorus is in sand paper on the box, and other materials on the end of the match, so that neither can be ignited without the use of the other. Matches are also made without dipping into sulphur, paraffine oil being used as a substitute. The parlor match is made without the use of sulphur, and phosphorus is replaced by the chlorate of potash and antimony. The wood is prepared with stearine or paraffine.

On the 1st day of January, 1881, the Diamond Match Company, with branches in differ-

ent parts of the United States, went into operation. One of the largest of these branches is what was previously the Barber Match Company, of Akron. The Akron works were established in 1847, by George Barber. The first factory was a small barn; but, from the very beginning of the business, owing to the superior quality of the goods produced, the demand steadily increased. The average product of this branch is 1,500 gross, of 14,400 each, or 21,660,000 matches every day, with a possible capacity for turning out 6,804,000,000 matches per annum. The United States revenue laws require a 1-cent stamp to be placed on every 100 matches, and to do so requires an expenditure by the Akron works of over \$1,900 a day. They use annually from 2,500,000 to 3,000,000 feet of the best quality of white pine lumber. 70 tons of brimstone, 17,000 pounds of phosphorus, 33,600 pounds chlorate of potash, 30,000 pounds of glue, 50,000 pounds of paraffine wax for parlor and drawing-room matches or tapers, and a large quantity of other material. They manufacture their own packages, and use about 250 tons of straw board for boxes, and 20 tons of other paper, and for shipping boxes over 1,000,000 feet of cottonwood lumber. Two printing-presses are kept constantly employed printing labels, and 15 box-making machines, each capable of turning out from 7,000 to 10,000 straw board boxes per day. Three hundred and fifty hands, including men, boys and girls, are constantly employed, and the monthly pay-roll amounts to fully \$6,500. The works are equipped throughout with the most perfect match-making machinery now in use, propelled by two engines of 250 and 150 horse power respectively. The works are located on Falor street. This branch makes about one-fifth of the entire product used in the United States. The Diamond Match Company also run a factory near their match works, where animal pokes, curry-combs and smoking pipes are made. This factory was formerly run by the Hopkins & Robinson Manufacturing Company.

The Akron Machine Works of Taplin, Rice & Co. are located on Broadway and Church street. These works were established in 1861, by Taplin, Rice & Ford. In 1867, under the manufacturing laws of the State of Ohio, it became an incorporated company, with a paid-up capital stock of \$100,000, under the name

and style of Taplin, Rice & Co. They have now a surplus of \$40,000. The works cover a large area and consist of several commodious buildings, all connected, being 550 feet in aggregate length and of an average width of about fifty feet. In addition to these is a separate structure, 40x100 feet, used as a pattern-shop. The works are divided into three separate departments, as follows: Foundry, machine shop and stove department. The buildings are all supplied with the latest improved machinery, tools and appliances requisite for carrying on the business in all its various features and departments. The company manufactures stoves in every variety, and turn out brass and iron castings of all kinds. They make a leading specialty of steam engines, mill gearing, shafting and pulleys, potters' and sewer-pipe machinery, and Mason's Patent Friction Clutch and Pulleys. They attend to the repairing of machinery and gearing of every description. The company have recently purchased, directly opposite their works on Church street the extensive buildings formerly occupied by J. F. Seiberling in the manufacture of his Empire mower and reaper. The patronage of Taplin, Rice & Co. is largely West, extending to the States of Illinois, Iowa, Missouri and Kansas, and east to the western portions of Pennsylvania.

American inventive genius is to be credited with some of the most wonderful achievements of the age, and in the production of valuable articles the eminence of our country is universally conceded. It is no less remarkable how quickly and thoroughly this talent finds applications in the perfection of new ideas and the improvement of old ideas, so that no sooner has a discovery been announced, or a new invention made, than active minds are at once developing its capabilities and extending its uses in all directions. Economy in time, labor and material is the greatest desideratum, never lost sight of by the practical men in our midst, and the wastefulness and inefficiency of primitive methods are never allowed to shelter themselves long behind the plea that nothing better has been thought of.

This train of musing can be particularly applied to the drug trade. Skilled pharmacists become important factors to the trade of all cities. The Smith Brothers manufacture pharmaceutical products at No. 193 South Howard

street. This house was founded in 1873, by Sisler & Hoy, who conducted the business successfully until September, 1878, when they were succeeded by the present proprietors. These gentlemen occupy two floors in the three-story brick structure, No. 193 South Howard street, as office, salesroom and laboratory. Their laboratory is supplied with the latest improved devices and appurtenances of chemical science for the manufacture of solid and fluid extracts, elixirs, pepsin, gelatine coated pills, and a great variety of chemical and pharmaceutical preparations. They manufacture 120 different varieties of gelatine-coated pills. This house does a wholesale and retail business, dealing directly with druggists and physicians.

An industry of considerable dimensions in Akron is that of the manufacture of chains, by the Miller Chain Company. This company succeeded to the business of S. Matherson, at Cuyahoga Falls, in 1879. In order to increase their facilities, and the better to accommodate their increasing trade, in September of that year, they established themselves at Akron, where they have spacious and well-arranged works, with materially improved appliances and conveniences for manufacturing their various goods.

The works comprise four buildings, two brick and two frame, each having dimensions of 20x100 feet; one brick, 60x80 feet, and one brick, 40x60 feet, besides a large packing-room-office building, etc. The firm make cable, crane, agricultural, machine and harness chains of every description. They also make car-brake and other chains to any designated length, and chains for special purposes, from sample or drawing.

All their chain are made from carefully selected stock, in the most faithful and workman-like manner, and are thoroughly inspected before leaving the works. Hence, they can safely guarantee their productions to be of superior quality and finish.

Possessing every modern facility, ample capacity, and unsurpassed advantages for the economic prosecution of this department of industry, they are enabled to offer the most favorable terms to manufacturers using large quantities of chain, and to the trade generally.

Their product finds a market from Maine to California, and they have a prosperous and in-

creasing trade in St. Louis, Chicago, and through the Northwestern States.

The Akron Iron Company is a stock company, founded in 1866, under its present name. Its location is in South Akron. The capital invested in the business is \$400,000. They manufacture every variety of bar and pig iron, hot-polished shafting, best, common, refined and charcoal iron, American-Scotch pig iron of all grades and make. A leading specialty is the production of superior qualities of iron for agricultural implements. This is one of the largest establishments of the kind in the United States devoted expressly to the manufacture of iron for agricultural implements; and for extent, capacity and general completeness of appointments, will compare favorably with any. The buildings occupied by this company are capacious and extensive, and are equipped in all their departments with the most perfect machinery and devices for carrying on their extensive business. Power is supplied at the Akron works by engines of 500-horse-power, and 175 men are regularly employed, many of whom are skilled and experienced mechanics. The company also owns and operates a blast furnace at Buchtel, Ohio, where engines of 700-horse-power are in operation. They also operate coal and iron ore mines in the Hoocking Valley regions, furnishing employment at the mines and furnaces to 175 additional hands. The total monthly pay-roll of these extensive works ranges from \$10,000 to \$15,000, and the amount of business transacted by the company reaches nearly three-quarters of a million dollars per annum. Their trade is principally derived from the large manufacturing establishments within a radius of one hundred miles around Akron.

The manufacture of flour is extensively carried on in Akron. This is made possible by the fine water-power of the city, and the cheapness of coal to drive engines. The Cascade Mills are located at the foot of North Howard street. They are owned and operated by Ferdinand Schumacher. They are run exclusively by water-power, and manufacture the highest grades of flour and farina, by the most approved patent process. The buildings are "L" shaped, and have six floors. The mill measures 50x80 feet, with warehouses attached, 40x80 feet, and barrel-house, 40x40 feet.

The water-power is ample at all seasons. It

has a head and fall of 38 feet. The power is derived from an iron overshot wheel, 35 feet in diameter, with a 10-foot face. This immense wheel weighs 37 tons, and yet, being well balanced, it revolves on its shaft as steadily and smoothly as if it were made of the lightest wood. The wheel contains a series of 96 steel buckets, having a total weight of 16,000 pounds. Each bucket is made of a single sheet of cold-rolled steel one-eighth of an inch in thickness. This complete wheel cost \$8,000, and about \$4,000 additional were expended for its foundation, which is built on the solid rock. The water supply flows through a 6-foot subterranean tube, to an iron stand-pipe rising about 18 feet to the level of the basin, and flowing from an iron-tank 26 feet long, 8 feet wide and $4\frac{1}{2}$ feet high, to the iron-gate, which gauges and delivers it to the buckets at the apex of the wheel. From spur-wheels, connected with a 12-foot pulley, by a 40-inch leather-double belt, 120 feet long, power is communicated to the line-shaft over a 10-foot pulley, whence the 12 run of buhrs are operated by quarter-twist belts.

The mills are equipped with thirteen middlings purifiers, one pair each porcelain and iron-rolls, two cockle-machines, an ending-stone and brush-machine for cleaning wheat, and other appliances, all of the latest improved mechanism.

The Ohio Canal runs through the premises, affording convenient facilities for receiving and shipping product. The waste water, as well as the water discharged from the wheel, flows into the Cuyahoga River through two substantial 12-foot stone underground conduits, each 220 feet long.

The Stone Mills, of which Commins & Allen are proprietors, are located on Howard, Ash and Mill streets.

These mills were erected in 1832, by Gen. Perkins and E. Crosby, and by them transferred to Ebenezer Beech, of Rochester, who, with his successors, continued in possession until about 1867, when they were in turn succeeded by the present proprietors, Commins & Allen. This is not only the largest mill in the city, but the oldest. The main mill structure is of stone, five stories in height, and covers an area of 60x120 feet. The machinery is all of the most complete character, and comprises eleven run of buhrs, from 4 feet to 4 feet 8 inches in diameter, six of which are propelled by water, and five by steam-power. One engine and boiler,

of 125-horse-power, and water-power estimated as fully equal to 100 horses, furnish the motive power for the machinery employed. The amount of capital invested in the business is large and ample. The products of the Stone Mills are known by the following brands: The "Akron Mills," the "Stone Mills," the "Star Mills," the "Lake Mills," the "California Mills" and others. These gentlemen also manufacture and make a leading specialty of superior patent flour.

The Allen Mills were originally a building used as woolen mills, which was changed to a flouring-mill in 1853, by Jacob Allen, Jesse Allen and J. D. Commins, who conducted their business under the firm name of J. & J. Allen & Company. The original building was erected by S. Perkins, J. D. Commins, Jacob Allen and Jesse Allen, who together constituted the Perkins Company. The Allen Mills are located on Canal street, between Mill and Cherry streets, and are owned by F. H. Allen, V. J. Allen and W. A. Palmer. The building, which is of brick, is 35x110 feet. The machinery of the mills is all first-class. The flour manufactured is the fancy patent, and the fine grades of family and baker's flour. The capacity of these mills is 225 barrels in twenty-four hours.

A distillery was first erected on the spot where the Aetna Mills now stand. The building was enlarged and changed to a flouring-mill in 1837, and run by Chamberlain & Standard, of Cleveland. Subsequently, it passed into the hands of Rawson & Noble, who conducted the business until the building burned down. Upon the spot of the burned mill was erected, in 1857, the present mills by Buell & Taylor, who continued proprietors until 1862, when the mills were purchased by the Chamber Company. They were owned by this company until 1877, when they became the property of the Second National Bank of Akron. By the bank they were leased to McNeil & Baldwin, who conduct the business at the present time. The capacity of the mills is 200 barrels of flour in twenty-four hours. McNeil & Baldwin manufacture the straight grade and patent flour.

The South Akron Mills are now owned by the Brewster Coal Company. These mills are located on South Main street. They were erected by George Steese, who sold them to L. S. Herrold, the latter disposing of them to the present owners in 1875. Only custom work is

done at these mills. Connected with them is a saw-mill—the only one in Akron.

Coopering, as might be expected, is carried on to a considerable extent in Akron. The Union Stave Company, C. B. Maurer, General Superintendent, carry on a large business at 402 South High street. This company is now erecting four new frame buildings. One of these will be 28x40 feet in dimensions, 14 feet high; two other buildings will be 30x54 feet each and 18 feet high. These three buildings will front on High street. The fourth structure will be in the rear of the other buildings and will be 30x108 feet in dimensions, 18 feet high.

The first-named building will be used for manufacturing purposes, and the remaining additions will be for storage room.

The material used in the manufacture of barrels, at this place, is prepared from the forest at Union City, Penn., by a force of about fifty men under Mr. Maurer's management. The annual shipments to this city of staves, hoops and headings by Mr. Maurer is fully 200 car loads. This immense amount of stock is here made into about 160,000 barrels per year, by a force of fifty men. The trade is growing very rapidly, and the present year's business will reach at least 175,000 barrels. Another item of interest in this connection is that, while the prepared material is shipped to this place, the finished barrels are shipped from here filled with flour from the mills of F. Schumacher, and Commins & Allen's (Stone) Mills.

There are other establishments in Akron where barrels are made in large numbers: By T. J. Walker, corner of Middlebury and South Main streets; by Lapp & Riner, near the Etna Mills; by George Roth, 353 South Main street; and by Edward Zschech, 362 same street.

The question of ability to manufacture an artificial stone that would, in point of durability and general efficiency, come up to all requirements has, for many years, received the attention not only of the curious and inquiring, but also the practical and scientific, and much time and labor has been devoted to the discovery of a successful process of manufacture. Success has crowned the effort, and now an artificial stone in every way equal to the best natural stone is produced at much less expense, while the fact of its being much lighter and more easily molded into any desired shape, renders it more desirable. For building pur-

poses it is superior to brick, as it is impervious to water, and is not affected by heat or frost, and will "stand fire" much better than either brick or natural stone. This stone is of a hydraulic nature and will harden when set in water, and will resist the action of steam, acids, and other disintegrating influences, as well as our best building stone. The artificial stone was patented by James Harry Thorp, of New York, September 11, 1877, being the second patent issued to himself. The process of manufacturing being simple and requiring but few tools. Wood patterns are made of whatever shape the stone is wanted, sand and cement are then mixed together in proportions three to one, when thoroughly incorporated, the chemical is added in quantity sufficient to dampen the mixture, which is then tamped into patterns, the patterns are then taken away in pieces, the stone is allowed to stand a few days to harden and dry, and is then ready for use. In our larger cities this stone is fast superseding the use of other building material, and is being extensively used for walks, trimming brick houses, etc. The sand found in this vicinity is particularly well adapted to making this stone, and thus the article can be furnished here very cheap. The expense of the material does not average one half that of natural stone. This industry which promises to be of importance to Akron, is carried on at Palmer & Pruner's Artificial Stone Works, 203 North Howard street—H. A. Palmer and H. A. Pruner, proprietors. They manufacture this stone under the patent before mentioned, the firm controlling the right in the counties of Summit, Trumbull, Portage and Stark. They make ornamental lawn vases, window caps, sills and keys, cemetery work, pavements in mosaic and other styles, cisterns and cellars, chimney tops, fountain basins, door steps, horse blocks, and lot fencing and solid stone of all kinds for building purposes, of any size or dimensions.

The Webster, Camp & Lane Machine Company have their works on North Main street. They were established in 1851, under the name and style of the Globe Foundry. In 1869, a stock company, known as the Webster, Camp, & Lane Machine Company, was organized with a capital stock of \$100,000. The works were remodeled and enlarged, and the scope of business considerably increased. The machine-shop, which is two stories in height, covers an

area of 52x150 feet, and is constructed of brick, in the most thorough manner. The foundry building is one story, of wood, 60x100 feet in size. The storehouse is a two-story wooden structure, 40x90, and the smith-shop of one story, 20x40. These buildings are all thoroughly equipped and supplied with the most approved styles of machinery for carrying on the extensive business of the company, in its varied departments and ramifications. One forty-five horse-power engine furnishes the motive power required. The company manufacture every description of gearing and pulleys, mining and milling machinery (these two latter being leading articles of manufacture by this house), pottery machinery, brass castings of every description, steam and water pipe fittings, and other articles pertaining to this line. They make a specialty of furnishing engines constructed and fitted up with special reference to simplicity of mechanism, durability and freedom from derangement, regularity of speed, economy of fuel, and the largest amount of power.

The trade of this house extends all over the West, particularly throughout the States of Ohio, Indiana, Illinois, Missouri, Kansas, etc.

The manufacture of boilers of every description, and heavy sheet and boiler iron work, is extensively carried on by J. C. McNeil, at the Akron Boiler Works, on South Broadway, directly opposite the Buckeye Works. This business was established in January, 1866, by the present proprietor. The main building covers an area of 40x75 feet, and is supplied with the latest improved machinery and devices for carrying on this extensive business. The sheds adjoining the main works cover an equal space, and are used for storage, and for the heavier work. One ten-horse-power engine and boiler furnishes the motive power required, and twenty skilled and experienced workmen are, on an average, employed at this establishment. Mr. McNeil manufactures every description of ordinary boilers, making a specialty of heavy sheet and boiler iron work. His repairing department is in charge of competent and experienced workmen, and is made a prominent feature of his steadily increasing business. The Akron Boiler Works are thoroughly equipped in every particular, and will compare favorably with any similar establishment in the West.

Almost every manufacturing establishment in the city of Akron use and testify to the superiority of his boilers. He also makes a specialty of steam heating "magazine" boilers for public and private buildings. The new buildings measure 66x100 feet, and the shipping facilities are as good as those of any manufacturing establishment in the city, being located immediately on the New York, Pennsylvania & Ohio and Cleveland, Mt. Vernon & Columbus Railroads, thus affording the greatest facilities for loading and shipping the product to any part of the country.

There are two creditable upholstering establishments in Akron, where are manufactured everything in the line of upholstered stock, especially lounges and mattresses. The first is the house of Klinger & Dodge, originally Klinger & Gintz. Their place of business is at 126 Howard street. The other manufactory is that of K. Gintz, 114 Mill street, which was opened in 1880. The work at both these establishments is done in the best manner, and sold at reasonable prices.

Edam & Johnson, manufacturers of commercial fertilizers and best quality of Kelly Island White Lime, have their works at the corner of Cedar and William streets. George Edam began the business in 1877, and Charles N. Johnson purchased an interest in January, 1880. Their establishment is a large one; they burn about forty tons of lime in twenty-four hours, and grind twenty tons of fertilizers in the same length of time. Their new buildings are 40x60 feet; the old ones nearly the same dimensions. Their engine room is 25 feet square. They furnish ground limestone, land-plaster, pure bonedust, white lime, plastering hair, calcined plaster and cement.

The Akron Straw Board Company are located in the Sixth Ward, Middlebury. Their works were established in 1873, by the present proprietors, J. F. Seiberling and M. Seiberling. Since that time their business has steadily increased, until it has now reached the handsome aggregate of \$75,000 to \$100,000 per annum. The works consist of three two-story buildings, one being 30x100 feet in size, one 40x85 feet, and one 40x60. These buildings are supplied with the most approved styles of machinery manufactured expressly for this line of business, and on which numerous improvements have been made by the members of the firm. The

mills are in every respect thoroughly equipped, and for general appointments and capacity will compare favorably with any similar establishment in the United States. The products of these works, which consist principally of a superior quality of steam-dried straw board, in numbers ranging from thirty-five to one hundred and fifty, are used for a variety of purposes, and meet with a ready sale in the Philadelphia, New York and Boston markets, where this trade is principally located. The capacity of the mills is at present from eight to ten tons of finished board per day, the demand for which is fully equal to the supply.

The firm of May & Fieberger are successors to Cramer & May in the manufacture of galvanized iron cornice, window caps and other work. They are located at 114 North Howard street, and do a large and successful business.

Caoutchouc, or, as it is commonly called, India rubber, has within the last twenty-five or thirty years become a very important article of commerce and industry. It is procured from the creamy exudations of several plants, and is found in abundance in a number of tropical countries, the principal sources of supply being Para, Java, Penang, Singapore, Assam and Central America. The best quality of rubber comes from Para, though much of the Central American product is in quality nearly equal to it.

The India rubber tree is a beautiful specimen of the vegetable kingdom, being very tall and straight, with smooth bark, and measuring in many cases eighteen inches through at the base. In these trees small longitudinal gashes are cut, from which flows a white sap, of about the consistency of cream, which is conveyed through an earthen spout to a trough placed beneath. The curing process is performed by means of a fire made from the nuts of the Urucury palm, the smoke of which has the peculiar property of solidifying and curing the rubber in a very thorough manner. The workman dips a wooden paddle in the creamy fluid, turing it quickly in order to separate the sap as much as possible, then passes it repeatedly through the smoke, until the substance assumes a grayish yellow color and becomes solidified. After the rubber has accumulated to a thickness of about two inches on each side of the paddle, it is cut open on one side, peeled from the tool, and

hung up to dry out the water that accumulates between the layers.

The color of the cured rubber is a light yellow, but it gradually changes until with age it takes on the dark brown so familiar in the rubber of commerce.

An effort is being made, aided by the Brazilian Government, to systematize the cultivation of India rubber, and this, if successful, must largely increase the production beyond the requirements of manufacturers, thus decreasing the cost of the raw material, as also of the finished product.

The chemical properties of India rubber are somewhat remarkable, inasmuch as, unlike all other solid vegetable products, it contains no oxygen, the constituents, according to Dr. Ures' analysis, being 90 per cent carbon and 10 per cent hydrogen. It is quite insoluble in alcohol, but in ether, derived from alcohol by washing with water, it readily dissolves and affords a colorless solution. When the ether is evaporated, the rubber becomes again solid. When treated with hot naphtha distilled from native petroleum, or from coal tar, it swells to thirty times its former bulk, and if triturated with a pestle and pressed through a sieve it affords a varnish.

The present skilled stage in the manufacture of India rubber has only been reached after years of patient labor. To get two pieces of clean rubber to unite firmly together, at their recently cut surface; to obtain facile adhesion by the use of hot water; to cut the rubber by the use of a wet blade; to collect the refuse pieces, make them up into blocks, and then cut the blocks into slices, required years of time, the greatest patience and ingenious machinery to effect. Mackintosh, Hancock and Goodyear alike record the simple manipulations they first employed, and the impression produced at last when they compare their individual efforts with the gigantic and complex machinery now used to secure the same result.

Of all the wonderful changes affected by chance, observation or chemical experiment of late years, few have been so important as the change in India rubber by the process called vulcanizing, which was discovered and patented by Charles Goodyear, of New York. The union of sulphur with rubber, to give new properties so valuable that it may be said the prior well-known quality of elasticity is now rendered so variable that almost every range, from the most

A. C. Voris

delicate tenuity to the hardness of metals, is obtained at will by the manufacturer.

India rubber, until the time of Goodyear's invention, had been greatly restricted in use owing to the fact of its being entirely unfitted for many purposes; but now, with extraordinary impetus, the ingenuity of manufacturers was employed in producing an immense variety of articles, which were constantly demanded by the ever augmenting utility of vulcanized rubber in the arts and in mechanical construction. This invention, judged by its great usefulness to society, deserves to rank among the leading discoveries of the nineteenth century.

There are three different and distinct classes of manufacturers of rubber goods, viz., those manufacturing belting, hose, packing, springs, wringer rolls, tubing—in short, goods used for mechanical purposes; those making boots and shoes and clothing, and those producing the thousand and one small articles of utility and ornament which are ever increasing in variety.

There is but one factory in Akron of rubber goods, but this one produces all articles made of caoutchouc adapted to mechanical purposes. This is the Akron Rubber Works, located at 111 Factory street. These works were established in 1869. The resources and trade of this concern have more than kept pace with the general prosperity of Akron. The capital employed is \$75,000, and the annual trade reaches \$300,000. The buildings occupied by these works consist of a main building, 120x60 feet (three stories), an additional back building of 80 feet in length, and a stock-room of 50 feet in length, all built of brick. The parties composing the firm are B. F. Goodrich, H. F. Wheeler and B. T. Morgan. The trade of these works extends over various States besides our own, and their products, among which may be found belting from 2-inch to 24-inch in width, 2 3 and 4 ply, steam packing for making steam-tight joints, standard hose of all kinds and for all purposes, which are unsurpassed, many of the processes used being of their own invention and the result of many years' experience. Hose for fire department service, springs, grain drill tubes, wringer rolls, billiard-table cushions, and, in fact, all articles made of rubber adapted to mechanical purposes.

The Akron Paper Company, the proprietors

of which are Thomas Phillips & Co., have a fine brick mill, 100 feet square, with two floors, containing a full equipment of improved machinery, which is propelled by two steam-engines of respectively 80 and 18 horse power. They make a specialty of manilla flour-sack paper, turning out, on the average, 2 tons every 24 hours, and consuming $3\frac{1}{2}$ tons of old rope per diem. The number of hands employed is 70; annual product, between 600 and 700 tons of paper, worth in the neighborhood of \$160,000.

Besides a very large local demand by the millers of this city, the Akron Paper Company have considerable trade with the millers west to Chicago and St. Louis, and some Southern custom; the aggregate demand being fully equal to the full producing capacity of their mill.

The business was inaugurated in 1872 by Thomas Phillips (deceased in 1878), and it was through his efforts that the enterprise was made a success.

Merrill & Ewart manufacture, on Brook street, Merrill's patent vitrified diamond roofing tile. This firm commenced the manufacture of this tile in Akron in 1875. The works consist of a two-story brick, 64x32 feet in size, with a wing 24x48, and were erected by the firm at a cost of \$10,000. One 40-horse-power engine is used in driving the machinery, which consists in the main of a clay mill, clay packer and tile presser. The trade extends through Ohio, Pennsylvania and the Eastern States generally. The house has an agency in New York City, Boston and Philadelphia. The sizes of tile made by this concern are 14x8 $\frac{1}{2}$ inches and 6x10 inches, and require 250 and 500 respectively to the square. This firm also manufacture a superior quality of drain tile.

The business of D. A. James, designer and manufacturer of fine wood work, was inaugurated by him in 1875, on Main street, between Market & Mill, and was removed to the present location, 218 West Market street, in 1876. W. P. DeLand was admitted to partnership May 1, 1879, when the firm assumed the above title. The partnership continued one year, when Mr. DeLand retired. Mr. James makes fine office and church furniture from architects' or their own designs. All their work in this line is executed in a highly artistic and workmanlike

manner, from the best selected materials. He makes a speciality of ornate picture and mirror frames and room cornices, from unique and original designs, with the most elaborate and artistic finish. He produces special designs to order, which are never duplicated except by permission. This superb art work is executed in precious natural woods, some of them very rare, including Hungarian ash, English oak, burr oak, chestnut, white holly, ebony, African amboine, bird's-eye maple, silver-gray maple, thuya and tulip woods. Making a constant study of this special line of manufacture, and exercising cultured taste and skill in its perfect development, these gentlemen have met with marked success in their sedulous efforts to please their numerous patrons. He likewise pays special attention to wood decorations for dwellings, such as window and door casings, etc., in natural woods susceptible of rich carving and high finish.

The Akron Varnish Works, of which Kubler & Beck are the proprietors, were established in Akron by E. G. Kubler, who, after many years of practical scientific experience in some of the largest manufactories of varnishes and japans in the East, concluded to "go West." He found Akron to be an advantageous point for manufacturing and shipping, and the decision to locate here proved to be a wise one.

Mr. Kubler is a thoroughly skilled chemist, possessing intimate knowledge of all its details, and enjoys the prestige of careful business training, ripe experience and uprightness in all his dealings. With this ample fortification, he has constituted it his strong point to manufacture none but the purest and best goods. After patient experimenting, he has brought the production of black baking japan to such perfection that even his competitors acknowledge the fact that it is unsurpassed in quality and durability.

Owing to the constant growth of the business thus established on a firm foundation, it was found necessary to enlarge the facilities for manufacturing, and a copartnership was formed under the style of the Akron Varnish Works, Kubler & Beck, proprietors. Mr. Beck is also a gentleman of fine business ability, and has acquired a practical knowledge of producing processes in this line. Their goods are sold all over the United States to the largest manufacturers of every description who have occasion

to use varnishes. Their old works are located on Bowery street; their new works on South Main street.

Lager beer, in its use among Americans, is fast superseding whisky. The perfection to which its manufacture is brought in Akron is due in a great measure to F. Horix, who carries on a brewery on North Forge street. Mr. Horix came to Akron in 1868, and, soon after his arrival here, entered upon the brewery business, and has continued in it to the present time. His first start was in a small building which he erected on Exchange street. The buildings which he now occupies consist of the brewery proper, a three-story structure of stone and brick, 68x92 feet, a warehouse of brick, 14x14 feet, and an ice-house 30x80 feet. The cellar used for cooling purposes is beneath the brewery, inclosed by stone, and is 68x90 feet. The arrangement of these buildings is most perfectly adapted to the business. These buildings were erected in 1873 by F. Overholtz. The premises, with all improvements, were purchased by Mr. Horix March 1, 1879, and immediately taken possession of by him. The capacity of this establishment is 20,000 barrels per annum. Excellent lager beer is also manufactured by the Wolf Ledge Ale and Lager Beer Brewery, at 154 Sherman street, by William Burkhardt, proprietor.

At 210 Cherry street, west of the Brick Mill, are manufactured the "Celebrated Cahow Pumps," by H. J. Cahow. He makes deep-well pumps a speciality. His work includes a great variety of force, suction and chain pumps. He also manufactures water pipe. Mr. Cahow does an extensive business in his line.

The city of Akron is not only famous far and wide for the superiority of the sewer pipe and stoneware made within her limits, but likewise for the excellence of the fire brick here produced.

For a series of years J. Park Alexander, proprietor of the Diamond Fire Brick Works, made a careful, erudite study of the subject of making first-class fire brick, expending many thousands of dollars in his laudable endeavors to bring about the consummation he so desired to achieve, and being ultimately rewarded with signal success.

Mr. Alexander commenced the manufacture of fire brick in 1866—the first one to start in this business in Northern Ohio, if not in the

entire State. His previous large experience in the production of stoneware from the chemically peculiar clays of this region, with very satisfactory results, led him to experiment therewith in the making of fire or furnace brick. It was soon demonstrated, however, that only a low-grade brick, suitable for ordinary heating apparatus, could be made from it. In no wise disheartened at the comparative failure, he subsequently made a thorough test of the best clays from New Jersey, Pennsylvania and elsewhere, laying under contribution, as it were, the divers aluminous deposits of the whole country, but still without the successful outcome aimed at. Though baffled, he continued to persevere in his research after the coveted secret, ever keeping in view the adage that "persistence wins the day" at last.

In 1870, or thereabouts, Mr. Alexander inaugurated a series of experiments with the siliceous pebbles found in abundance in the conglomerate rock formation near the western corporation line of Akron, feeling assured that therein he had the material for the production of an infusible and non-shrinkable brick. After long and patient study and experimenting with silica and alumina, and a large pecuniary outlay, he succeeded in discovering a process whereby fire brick of unequalled quality and durability could be made from silica alone. He made application for letters-patent on his new process, which were duly granted.

The material alluded to was analyzed by Prof. Cassell, and found to contain 98.75 per cent of pure silica—an extraordinary proportion—and affording an advantage not enjoyed by other localities. Mr. Alexander has availed himself of this, and for about three years past has made the silica fire brick, known as the "Diamond" brand.

The manufactory of Allison & Hart is on Bank street, Sixth Ward. This firm manufactures fire brick also on a large scale; they also make stove and furnace linings, and ground fire clay for laying fire brick.

The uncommonly fine plastic clays of Summit County, rich in alumina, and practically inexhaustible in extent of deposit, formed the basis for the early inception of pottery manufacture in Akron. It was started here on a somewhat extensive scale, when the town had but a few hundred inhabitants, it being the first mechanical industry of importance established here.

From the date of its introduction, about 1830, it gradually grew in volume up to the year 1852, the surrounding country being supplied with brown, yellow and stone ware from this point. Up to the period mentioned, the means of transportation were restricted to wagon conveyance and the Ohio Canal, and, consequently, the commercially tributary area was limited.

In 1852, however, when the Atlantic & Great Western Railway was opened to Akron, the business gained a fresh impetus, and has steadily increased in volume ever since.

The fame of Akron stoneware has extended pretty much all over the country, and it may be qualifiedly affirmed that it is the only real *stoneware* made on the continent. The peculiar fire qualities of the clay found here are such that the ware made therefrom is capable of standing any degree of heat to which it may be subjected; neither fire nor hot water will affect it injuriously. Hence, it may be used the same as iron vessels for culinary purposes. On the contrary, the so-called stoneware made in New Jersey and elsewhere, from the friable clay of other sections, must be "handled with care," and can only be preserved from fracture by keeping it at a safe distance from calorific influence.

By reason of this fact, Akron stoneware has justly achieved a wide reputation, and the demand therefor is rapidly extending. It is now being shipped largely to all parts of the West and Northwest (Chicago being one of the principal distributing points), to the South, to the interior of Pennsylvania, and latterly, considerable orders for this excellent ware have come from Philadelphia, New York, Boston and other Eastern cities.

The business of Whitmore, Robinsons & Co., was established in a comparatively small way, in 1857, by a number of practical potters, under the style of Johnson, Whitmore & Co. They commenced with one kiln, and their whole area for working consisted of about a quarter of an acre of land, situate on the south side of Market street, Middlebury, now the Sixth Ward of Akron, where they set to work making yellow-ware, then a new manufacture in this section. Fortune favored them, and their business prospered.

In January, 1862, Mr. Johnson retired, and in the following April, James B. Manton became a member of the firm, whereupon the style changed to Whitmore, Robinsons & Co., consisting of Richard Whitmore, Thomas Robinson,

William Robinson and James B. Manton. In 1866, Henry Robinson was taken into the co-partnership. From time to time, commodious additions were made to their works, thus increasing their producing capacity, until they had the satisfaction of knowing that theirs was the most extensive and complete stoneware pottery in the world. They run six mills, operated by three steam engines, with a total of 175-horse-power.

While this company make stoneware their principal manufacture, they also produce all kinds of yellow and Rockingham ware. In this department, they have two up-draft kilns, which are run to their full capacity.

The buildings of this immense concern have the following dimensions: Main building, of brick (stoneware department), 177x50 feet, three stories; kiln sheds and engine houses attached, 177x50 feet, one story; yellow ware warehouse, of brick, 80x34 feet, three stories, with wing 20x30 feet; yellow and Rockingham ware factory, of stone, 70x36 feet, three stories; stoneware factory, of stone, 180x36 feet, two stories; slipware shop, of brick, 50x40 feet, two stories; dipping-house and green-house, frame, 100x30 feet, two stories; other small buildings for various uses, about half an acre of area. The aggregate floor surface of these works is 97,660 square feet, or about two and a quarter acres.

They ship their goods principally to the West, and Southwest as far as Texas, while they also have a growing Eastern trade.

The Akron Pottery, owned and carried on by E. H. Merrill & Co., was established in 1861. They do a large and prosperous business in the manufacture of beer and ink bottles, pump cylinders and all styles of stone tobacco pipes. They manufacture a variety of novelties in stoneware, which are the invention of the proprietors, and they have also made many improvements in machinery, especially applicable to this branch of business, among which we may mention a bottle machine and a pipe machine, constructed on new and improved principles. They have also invented an improvement in clay mills, which greatly facilitates the manufacture of their specialties. The buildings occupied by this firm consist of one three-story structure, 30x60 feet in size, and one-story building, 70x100 feet, equipped with all the necessary machinery and implements required in this branch of industry, with an engine and boiler

40-horse-power. Their place of business is at 404 South Main street.

Meyres & Hall manufacture Ohio stoneware, having their office and warehouse near the depot of the New York, Pennsylvania & Ohio Railroad. Their works, although located in another town, may appropriately be classed among the industries of Akron. The business was established in 1864, by S. L. Stall & Co., at Mogadore, and passed into the hands of the present proprietors in 1873. They manufacture a superior grade of goods, widely known as "Ohio Stoneware," consisting in part of churns, butter, pickle and snuff-jars, milk pans, jugs, water fountains, fruit, preserve and cream-jars, bean pots, stove tubes, etc. The office and warerooms of the firm are located near the union depot, Akron, and the potteries at Mogadore. These consist of one building, 60x40 feet, with an L-shaped addition, 40x50 feet; another building, 40x50 feet, and numerous smaller structures, sheds, etc. These are supplied with all the necessary machinery and appliances, operated by one 20-horse-power engine and boiler, which serves to turn the lathes and to heat the buildings. All the machinery is of the most perfect construction, especially adapted to this line of business.

Stoneware is manufactured by F. J. Knapp, wholesale dealer, east of Fountain street. He and his father began business at that point many years ago. The present buildings were erected by them. Mr. Knapp purchases his clay in Springfield. He has two kilns. His works have a capacity of 14,000 gallons a week. His motive power is furnished by a steam engine of thirty-horse-power.

At 115, 117 and 119 Fountain street, are the pottery works of Whitsel, Gibbs & Co., manufacturers and wholesale dealers in Ohio stoneware. Their buildings were erected over twenty years ago by F. J. Knapp and his father, who afterward sold to Beecher & Lantz. The latter ran the works one year and sold them to Peter Bodenbohl, who disposed of them to Shenkle Brothers & Mann. This firm conducted the business until last year, when the works were purchased by the present proprietors. The capacity of the establishment is 15,000 gallons a week. There are three kilns. Their trade goes West, largely.

Next to the works of Whitmore, Robinsons & Co., those of the Akron Stoneware Company, on Bank street, Sixth Ward, are the largest in

Akron. This is an incorporated company, organized May 1, 1879, with a capital of \$60,000. Joseph Cook, President; R. H. Kent, Secretary and Treasurer; David A. Butler, General Agent. This company manufactures every variety of standard Akron stoneware. Their works are large and their trade extensive.

Johnson & Baldwin occupy the works first started by Johnson & Dewey as a redware manufactory, on the corner of Market and High streets, Sixth Ward. The proprietors are Thomas Johnson and Harvey Baldwin. Their works have a capacity of 15,000 gallons a week. They have two down-draft kilns. Their entire trade is disposed of to Quigley Brothers, of Akron, wholesale dealers in stoneware. The latter have an office at 215 High street, Sixth Ward, also one near the depot of the New York, Pennsylvania & Ohio Railroad.

Jones, Waite & Co. carry on the manufacture of stoneware on River street, Sixth Ward; William Rowley on the same street; Cook & Fairbanks on South High street; and Viall & Marle on East Market street, same ward. These works are all extensive and their trade widely extended.

Akron has three broom factories; that of Bachtel & Pontius was established in 1870. This firm, of whom the members are A. C. Bachtel and N. Pontius, manufacture in large quantities every variety of the best brooms, at 125 Carroll street. Their broom-corn is brought from Illinois; their handles from Columbus, Ohio; their wire from Cuyahoga Falls; and their twine from New York City. The shop of H. B. Cross, who also manufactures brooms, is at Lock No. 1, Ohio Canal; that of Mr. Hardy is on Mill street.

The Akron Malleable Iron Works are located on East Water street, Sixth Ward, Hope & Greer proprietors. W. Foster Hope, Business Manager; John F. Greer, Superintendent. This firm manufacture malleable iron castings, nickel-plated castings, models for patents, and gray iron castings of every description.

Lepper & Sackett make Bohemian or hullless oat-meal at their Bohemian Oat-Meal Mills, on Water street, Sixth Ward. Their goods are sent to various parts of the country.

In addition to the industries already noticed, there are a number in Akron helping to swell the aggregate, each one of which is of importance: Louis Cohn's Awning Manufactory is lo-

cated in the Phoenix Block, South Howard street. N. O. Freer, makes, at 176, same street, furnaces for heating and ventilating buildings. He began his business first on Mill street, in 1876, and moving to his present rooms in 1878. G. W. McNeil & Sons manufacture stone grain scourers and polishers on South High street. George W. McNeil, Jr., makes, at the same place, the Acme Wheat Steamer. M. Shouler manufactures soda water, ginger ale and Seltzer water, at the Akron City Bottling Works, 834 Bowery street. At 240 Mill street, R. L. & A. Andrew make window shades. They have been established in the business since 1876. Nahum Fay, at 926 East Market street, manufactures cordage. John J. Grether makes soap and candles, at 717 South Broadway. He established the candle business in Akron in 1852, adding soap manufacture some years subsequent. Adam Beck also manufactures soap near the fair grounds. Walter Andrews makes candies at the Akron Steam Candy Works, selling them at wholesale only. J. Bergdorf is engaged in the manufacture of baskets on Cuyahoga street.

A summary of the manufacturing interests of Akron is as follows: Capital invested, \$6,127,250; hands employed, 4,163; total value of materials consumed, \$4,606,774; total annual production, \$9,313,451.

Number of establishments that turn out a product annually of \$1,000,000 or over, 2; \$900,000 or over annually, 1; \$250,000 and less than \$900,000 annually, 7; \$100,000 and less than \$250,000 annually, 7; \$50,000 and less than \$100,000 annually, 11; \$25,000 and less than \$50,000 annually, 18; \$10,000 and less than \$25,000 annually, 34.

It may be said, therefore, with truth, that the crowning glory of Akron is her manufactories. It has been shown that a number of them are among the largest and most successful of their kind in the United States, giving them almost the control of the market for the particular commodities manufactured. The history of most of them shows a gradual development from small beginnings. Not all, of course, have been alike successful; but, the rule has been, to which there have been but few exceptions, that every industry persevered in and conducted on strictly business principles in Akron, has, in the end, proved a success. There really seems no limit to the increase of the manufacturing interests of this thriving city.

CHAPTER X.*

CITY OF AKRON—ITS EARLY CHRISTIANITY—FORMATION OF CHURCHES—BUILDING OF CHURCH EDIFICES—RELIGION AT THE PRESENT DAY—SUNDAY SCHOOLS, ETC.

"Magna est veritas, et prevalebit."

THE church history of Akron dates back almost to the dawn of its existence as a town or settlement. The great truths of religion make their appeals to man, whatever may be his circumstances or surroundings. If there has ever been a church-going habit; if the Sabbath has ever found recognition from him; and truth and love to God predominated in his heart; then, when deprived of the opportunities of going to church, this religious nature will make its appeals with the recurrence of the seventh day, demanding that he should rest, or by some means recognize the day set apart for rest, by special command. This demand, or religious influence, is early felt in pioneer life; and, because the opportunities for church-going are few, they are, therefore, the more highly prized. In a very early period in the history of the town, religious societies were formed, and churches established, as will be gathered from a perusal of the sketches following of the different religious denominations having organized churches within the city limits. These sketches have been written, either by the Pastor or some leading member of their congregations, and are as full and complete as our limited space will allow, and are given without comment.

The First Methodist Episcopal Church of Akron comes first in the order of formation, and dates its organization back to 1830. The following historical sketch of it was furnished for this work by Mr. Jacob Snyder, and will be found of interest to its members: With the characteristic zeal of the Methodist Episcopal societies of the world, that of the First Methodist Episcopal Church, Akron, Ohio, secured a location in this city when it was but a young village. The society was organized in about 1830, and by the Rev. John Janes, of the North Ohio Conference, of the territory of which the then village of Akron formed a part. In about the same year of the organization of the so-

ciety, the erection of a church edifice was commenced, which was an unpretentious wooden structure of 40x60 feet, located directly in front of the present one, and fronting toward the West. It was destroyed by fire in March, 1841, and upon its foundation another of like design was immediately built. In 1836, this city was taken within the bounds and placed under the control of the Erie Conference, when Revs. Thomas Carr and John L. Holmes were appointed to serve the society. In 1837, the appointees were Daniel M. Stearnes and Thomas Graham; in 1838, Horatio N. Stearnes; in 1839, John Robinson and Caleb Brown; in 1840, John Robinson continued, and Benjamin K. Maltby; in 1841, Ira Eddy and John Wood; in 1842, Timothy Goodwin, M. D.; in 1843, William H. Hunter; and in 1844-45, Edwin J. Kinney.

The busy throng in practical life is apt to be absorbed only by what the present forces upon it; yet there is now and then one, who, somewhat more far-sighted, overleaps the general boundary, and invites to remembrance the men and the deeds of the past. Such was Rev. Samuel Gregg, who was appointed to this station in 1846, and who was the author of "The History of Methodism in the Erie Conference," in two volumes, which we have taken the liberty to use in preparing these historical sketches. In 1847, James R. Locke was the appointee to the station; in 1848, Martin C. Briggs; in 1849, Reuben J. Edwards; in 1850-51, Ezra Jones; in 1852-53, John Tribby; in 1854, Gaylord B. Hawkins; in 1855-56, William F. Day; in 1857-58, George W. Clark; in 1859, Thomas Stubbs, and in 1860-61, John D. Norton.

With this last-mentioned pastorate, the time had arrived when, to meet the increased wants of the society, the old church must undergo extension and reparation. The Pastor seeing this necessity, urged upon the trustees its possible accomplishment, which resulted in reversing its front, enlarging the building, and in otherwise improving its several apartments, at

* Edited by W. H. Perrin.

a cost in all of about \$3,500. In 1862-63, John Peate was appointed to the charge; in 1863, E. A. Johnson, and in 1865-67, D. C. Osborne. It was during the latter's pastorate in 1866 that the centennial of Methodism was celebrated by the society in the old church, at which time there was subscribed and paid about \$30,000, as a nucleus from which the present edifice sprang. During this year and the early part of the following one, the Centenary picture, now decorating the main Sunday-school room was made, whose design embodies the ideal of the then prospective departments, and exhibits the members of the entire Sunday school, as well as many of the congregation of the old church, to the extent of between seven and eight hundred photographic likenesses made by G. W. Manly, Esq.

In the spring of 1867, ground was broken for the present edifice, and by late autumn, the foundation walls were elevated to about one-half their designed height. The work was then delayed in the winter, and again resumed in the spring of 1868, and thence prosecuted to the entire inclosing of the building by the return of the next autumn. Another winter's cessation from the work was followed by its resumption in the spring of 1869, and the completion of the Sunday-school and the lecture-room apartments in April, 1870, when the transition from the old church to the present one was made by the society and Sunday school. On the 15th of this month, the finished apartments of the first story, main building, and the second story of the Sunday-school rooms were formally dedicated by Dr. C. H. Fowler, of Chicago, and Dr. J. H. Vincent, of New York. At this time, W. F. Day, D. D., had charge of the appointment, he having after an interval of about twelve years been re-appointed thereto in 1868, and he continued in the position until August, 1871. During the last ten years previous to the occupancy of the new edifice, the ratio of increase of membership, both of church and Sunday school was greater than of any previous decade of the society's history.

In June, 1871, the work upon the audience-room of the present church was resumed which had been permitted to rest during the interval of completing the other departments of the church; and in the January following, it was completed and dedicated, Bishop Wiley and Dr.

B. I. Ives conducting the dedicatory exercises. Both the main audience-room and the Sunday-school apartments are considered models of excellence, and, to an extent, even beyond a State-wide reputation.

In 1871, W. W. Ramsay, of the Cincinnati Conference, was transferred to the Erie, and appointed to this charge, his term of service ending in 1874, when Henry Baker became his successor, and continued until 1877. In the latter year, I. A. Pierce became the appointee, and in 1878 W. W. Case, the present incumbent was transferred from the Cincinnati Conference to the East Ohio, and appointed to the charge. The present membership of the church is about eight hundred, and that of the Sunday-school about seven hundred and fifty.

When the pews of the spacious audience-room are well filled, their united capacity is about one thousand sittings. When all of the vacant places of the room are supplied with extra means of seating, this capacity may be increased to 1,500, and the possible capacity by the availment of all of the standing room, which probably has been the case in a few instances, is 2,000. Both in the church and Sunday school there seems to be a continually growing interest upon the part of all connected therewith. And it seems as if the Sunday-school appointments especially were likely at some not far distant day to become too straitened to accommodate the growing attendance. For here may be seen

“ ‘Fathers and mothers, brothers, sisters, friends,
And very little boys and girls—around,
Across, within the spacious sacred rooms,
‘They walk, they sit, they stand,’ what
Crowds press in!’ ”

The church and Sunday school are both greatly indebted to Mr. Lewis Miller for the great proportions they have assumed since the enterprise of the present church edifice was commenced, he having both by an unusual expenditure of time and money contributed to the advancement of their interests.

The First Presbyterian Church of Middlebury (now the Sixth Ward of Akron) is one of the early church organizations of this section. The following sketch of it was written by Mrs. Henry Robinson especially for this work: At a meeting held in the schoolhouse in the village of Middlebury, then Portage, now Summit County, Thursday, December 15, 1831, the First

Presbyterian Church of Middlebury was organized by Rev. Benson C. Baldwin, assisted by Rev. John D. Hughes, of Springfield. The following-named persons were then admitted to membership: Jesse Neal and Nancy, his wife; Dr. Titus Chapman, Richard Chapman, Mrs. Eliza Chapman, Mrs. Sylvia Chapman, Woolsey Welles, Mrs. Mary B. Welles, James Neal, William F. Astroon, Harvey B. Spellman, Edgar Chapman (only member now living), Miss Sallie Allen, Miss Amanda Gillet, Miss Mary A. Gillet, Miss Naomi Hickox, Miss Louisa Neal, Miss Sophronia Neal, Miss Sophia Neal, Miss Mary Erwin, Miss R. M. Jennison, Mrs. Jane Bell, Mrs. Mary Ann Cotter, Mrs. Clarissa Hickox, Mrs. Allen and Miss Emeline King. The officers of the church were Woolsey Welles and Richard Chapman, Ruling Elders; Jesse Neal, Deacon. Rev. Benson C. Baldwin remained a much-loved Pastor of this little church until September 30, 1838, when he removed to Medina. He was succeeded by Rev. Almon Saunders, of Unionville, who commenced his labors October 7, 1838, and continued with the church for one year. In July, 1840, the Rev. H. A. Sackett took charge, remaining until the next January. During his labors large numbers were added to the church. In the fall of 1841, Rev. James Shaw was settled as Pastor. The church was greatly blessed during his pastorate, 109 members being added. In the fall of 1845, on account of failing health, he requested that his pastoral relations with the church be dissolved. This good man passed to his eternal rest in 1874 or 1875.

Soon after Mr. Shaw ceased his relations with the church, a part of the members seceded. The subject of slavery had for some time been agitated, and a part of the church, on this account, not being willing to retain their connection with Presbytery, withdrew and formed a Congregational Church. From this time until the fall of 1846, the pulpit was supplied by the aged minister, Rev. William Hanford. In September of that year, the Rev. Horace Foot was engaged for one year, and in January, 1848, Rev. Elroy Curtis was called, and labored as Pastor until the spring of 1854, faithfully and efficiently. In 1860, the slavery question, which had divided the churches, being settled, they were united, and formed an independent church, under the charge of Rev. William Dempsey, who remained until 1863. He died in 1864 at Me-

dina. The church then hired Rev. Mr. Hicks, who remained for three years, and was succeeded by Rev. John G. Hall. He remained three years, and in May, 1871, Rev. Henry Avery came, remaining until May, 1874; Rev. Carlos Smith then officiated for three months.

This brings us to the period in the history of the church, when it again connected itself with the Presbytery. This was accomplished through the earnest efforts of Mr. Ambrose L. Cotter, who has been connected with it for forty-six years having become a member in 1835. He has always been an earnest and zealous worker in the cause of Christ, and, though now past his fourscore years, his enthusiasm kindles at the very mention of the church. The next minister in charge was Rev. C. E. Barnes, who came in October, 1874, and was employed as stated supply until 1877. On the 1st of April, 1878, Rev. J. H. Jones was formally installed as Pastor, and still continues his labors as such. During all these years, this little church has had but three regularly installed Pastors, viz.: Rev. James Shaw, Rev. E. Curtis and Rev. J. H. Jones, the others having officiated merely as stated supply.

There are very few of the earlier members now known to be living. Mrs. D. A. Hine, who resides here, and who united with the church at the same time as did Mr. Cotter, is still an earnest and devoted Christian worker. The society is now recognized as the "First Presbyterian Church of Akron." Its present membership is sixty-one; the officers are Rev. J. H. Jones, Pastor; A. L. Cotter, J. K. Robinson and Henry Hart, Ruling Elders; James B. Manton, William Robinson, Dr. F. C. Reed, Harvey Baldwin and J. K. Robinson, Trustees. The church edifice was erected in 1833, but has since been remodeled and repaired.

The Sabbath school has been in existence ever since the organization of the church, and at present numbers over one hundred, with an average attendance of sixty-five. The officers are Dr. C. C. Davidson, Superintendent; Mrs. Henry Robinson, Assistant Superintendent; Byron Robinson, Secretary; Miss Kate Palmer, Treasurer; Miss Frances Robinson, Organist; and Miss Belle Berger, Chorister.

In connection with the church is a Ladies' Foreign Mission Society, formed May 17, 1880, by Miss Loring; and at the same time the children formed a home Mission Band, to be

known as the "Austin Mission Band." They have undertaken the support of a pupil in Miss Austin's School, at Sitka, Alaska. Members, thirty-nine; amount of money raised in less than a year over \$45; officers, Mrs. Henry Robinson, Superintendent; Miss Kate Palmer, Assistant Superintendent; Miss Lizzie Griffin, President; Henry B. Manton, Vice President; Miss Nellie Farwell, Secretary; and Park T. Robinson, Treasurer.

St. Paul's Episcopal Church,* Akron, Ohio, is another of the early church organizations. The records of the church were burned and consequently much that would be deemed necessary for its history is lost. What we give here has been collated from journals, Episcopal addresses, etc. Rev. A. Sanford reports in 1832: "Solemnized one marriage at Akron." Bishop McIlvaine in 1834, says: "From Stow to Middlebury, October 11; two or three Episcopal families in the neighborhood; heard of none in the village; preached at night in the school-house to a very considerable and attentive audience; next day went to Akron, to take the canal-boat for Massillon. This growing place is destined to become a manufacturing town of great importance. There was no place of worship in it when I was there, and seldom any preaching of the Gospel. It should be a missionary station as soon as possible. I should have preached there, had not the constant expectation of the boat prevented." The Rev. W. K. Newnan took charge of St. John's, in Stow, and of two new parishes at Akron and Franklin.

From the Bishop's address, 1836: "July 8, visited St. Paul's, Akron; preached and met the Vestry; the Rev. Mr. Barrow has been invited to assume the care of this point and Franklin." This minister reports, in the same year, five communicants. Mr. John Hanford was the first lay delegate from this parish to the diocesan convention. Rev. Mr. Barrow remained one year. In 1837, nine communicants are reported. In 1838, the Bishop reports preaching in the Baptist Church, and confirming five persons. This year the Rev. T. J. Davis, of Connecticut, assumed charge of the church. In 1839, Mr. Davis reports fifteen communicants, and that a Sunday-school has been organized, which numbers twenty-five children; also the organization of a society called the Christian Knowledge Society. A room was fitted up in a stone building

on the ground now occupied by Mr. Henry's store, to be used as a place of worship.

Referring to a visitation made in 1839, Bishop McIlvaine says: "In a large upper room in a warehouse fitted up for a church, I preached, catechised the young, addressed the parents, and confirmed three. This parish has much prospered since that date." November 6, 1840, the Bishop visited St. Paul's and confirmed six persons. It was this year, on a Sunday morning, at the hour of worship, that a severe storm threw a large chimney and heavy ornamental stones in upon the assembled congregation, and although the people were hurled down through a broken floor, but one man was killed and a few others injured.

About this time the congregation undertook the building of what is known under the name of the old "Cobb House," northwest of the city, near the bend of the canal. It was to serve for the combined purposes of parsonage, seminary and parish school. From a letter of a Warden, dated November, 1840, we give the following extract: "This parish has received donations, solicited by Rev. Mr. Davis, about \$900 from the friends of the church in Philadelphia, and this diocese to assist in the erection of a temporary house of worship and parsonage and support of the Rector. It would probably be a satisfaction to the donors to know that their benevolent wishes have been fulfilled in the erection of the building contemplated, and the establishment of the church upon a permanent basis." This year occurred the first attempt to chant, under the direction of Mrs. Cowan. It was a nine days' wonder. In November, 1840, Rev. Mr. Davis resigned. The resolutions passed by the Vestry were exceedingly complimentary to Mrs. Davis, and were signed by John Hanford and E. W. Chittenden, Wardens; Alvah Hand, Abram Smith and J. G. Darby, Vestrymen.

In 1841, Rev. Lyman Freeman was called. During his administration, the building in which the congregation is now worshipping was undertaken. For this purpose \$1,770 was collected from persons other than citizens of Akron. Mr. Lyman Cobb had the contract for building, and in part payment on contract, the title of the Cobb House was transferred to him. On the 2d of June, 1844, the church was consecrated. The parish then numbered sixty communicants, and the building was described

* By Rev. R. L. Ganter.

as being 40x60 feet. Four months after the consecration of the church, the Rev. Mr. Freeman resigned. Rev. Mr. Cox took charge December 8, 1844. Rev. Mr. McIlhinney, November, 1847. Rev. J. K. Stuart in 1848. Rev. E. H. Cumming, December 20, 1850. He was followed by Rev. R. S. Nash, and he in turn was succeeded in November, 1854, by Rev. D. C. Maybin. The Rev. Edward Meyer preached his first sermon December 16, 1855. He reports that "during the summer of 1856, through the exertions of the ladies' society, a set of neat green blinds were procured for the south side windows, adding greatly to the comfort of the worshipers, and furnishing a pleasant and subdued light; the cost was \$40." Mr. Meyer's resignation was accepted July, 1859. The Rev. Henry Adams took charge in 1860; the Rev. Samuel Maxwell in 1863; the Rev. W. T. Fitch in 1866; the Rev. Henry Gregory in 1869, and the Rev. R. L. Ganter, the present Rector, in 1870.

In 1870, the church edifice was enlarged and a new organ procured. The same year, also, a commodious parsonage was erected on North Summit street. In 1872-73, \$4,000 were expended for new Sunday-school rooms.

The following are the present officers of the church: R. L. Ganter, Rector; Senior Warden, D. L. King; Junior Warden, Philo Bennett; Vestrymen, Frank Adams, J. A. Beebe, O. C. Barber, C. A. Collins, A. L. Conger, G. W. Crouse, U. L. Marvin, W. B. Raymond; Superintendent of Sunday school, H. J. Church; Assistant Superintendent, U. L. Marvin; Secretary, A. N. Sanford; Assistant Secretary, Percy W. Leavitt; Treasurer, W. B. Raymond; Librarians, W. F. Snook and W. A. Noble.

Ladies' Aid Society: President, Mrs. Frank Adams; Vice President, Mrs. Lorenzo Hall; Treasurer, Mrs. A. Commins; Assistant Treasurer, Miss Ruth Hubdell; Directors, Mesdames H. H. Brown, E. W. Shook, A. Brewster, L. Camp, James McNeil, O. C. Barber, C. B. Cobb and E. Buckingham.

St. Paul's Church numbers 170 families, 230 communicants. Sunday-school teachers and officers, 31; scholars, 283; total, 314.

The Baptist Church of Akron* was organized at Middlebury (now Sixth Ward of Akron) April 18, 1834, under the name of the Akron and Middlebury Baptist Church. The names

of Elder Caleb Green and Elder Amasa Clark appear as Moderator and Scribe of the Council. The church at its organization was composed of three male members—Horace Barton, Daniel B. Stewart, Henry H. Smoke; and six females—Miss C. Barton, Mrs. Thirza J. Smoke, Mrs. E. Burton, Mrs. Sally Smith, Miss Amanda Smith and Miss Elizabeth Stewart. The first house of worship (now owned by the German Reformed Church), on Broadway, just south of the Court House, was dedicated in September, 1837.

The church had the services of several ministers for brief periods for about two years after its organization, services being held in schoolhouses in Akron and Middlebury. In the year 1836, Rev. E. Crane became the settled Pastor, and services were held in a hall in Middlebury, and in a schoolhouse in Akron while the first house of worship was in process of erection. Mr. Crane is still living, and resides at Mount Pleasant, Iowa. Rev. H. Carr succeeded Mr. Crane, and was the Pastor at the dedication of the house of worship in 1837.

While the church worshiped in this house, it had as Pastors Rev. H. Carr, Rev. S. Van Voris, Rev. C. S. Clark, Rev. J. Hall (afterward President of Denison University), Rev. D. Bernard, Rev. L. Ransted, Rev. J. M. Gregory (now President of Illinois State University) Rev. J. C. Courtney (who died after a brief pastorate), and Rev. A. Joy, during whose pastorate the house on Broadway was sold, and the present house on North High street purchased and remodeled. It was dedicated June 17, 1853. Mr. Joy was succeeded by Rev. J. W. Hammond in 1855, whose pastorate continued one year. Rev. Samuel Williams became Pastor in 1856, and remained five years. Rev. N. S. Burton succeeded him after an interval in 1862. Rev. F. Adkins was Pastor from 1866 to 1868. His successor was Rev. C. T. Chaffee, from 1869 to 1872. He was succeeded by Rev. J. P. Agenbroad for one year. Charles A. Hayden was ordained, and became Pastor Nov. 25, 1873. He resigned in May, 1876. The present Pastor, Rev. N. S. Burton, entered upon his second pastorate in July, 1877. The present membership is about 145. R. A. Grimnow and W. T. Allen are Deacons, and J. W. Burton, Clerk and Treasurer.

A Sunday school was organized when the

*Written by Rev. N. S. Burton.

church entered its first house of worship, and has been maintained since. Its present Superintendent is Dr. Denitt G. Wilcox. The average attendance about 110.

Three of the Pastors, J. W. Hammond, F. Adkins and C. A. Hayden, received ordination here. More than most churches, this church has suffered loss by the removal of valuable members to larger cities, where they have become efficient workers in church work. Though small in numbers in comparison with neighboring churches, it has always had its full proportion of men and families of high standing in business and social circles.

St. Vincent De Paul's Congregation (Roman Catholic) of Akron, Summit County, Ohio, comes next in order of church organizations. The following sketch of it was written at our request by Rev. T. F. Mahar, the present Pastor: Previous to the organization of this congregation, and as early as 1835, visits were paid to the few Catholics of Akron, by Father Henni, the present Archbishop of Milwaukee, who came on horseback from Cincinnati, and said mass in a log cabin owned by James McAllister. Right Rev. J. B. Purcell, now Archbishop of Cincinnati, followed soon after and said mass here; and the Rev. Louis De Goesbriand, Pastor of Louisville, Stark County, visited shortly after him. Rev. Father McLaughlin, of Cleveland, was also here, and Rev. Basil Short baptized the children and attended the Catholics from 1837 to 1842.

Hitherto mass was said in private houses or rented halls. The frame church on Green street was commenced by Rev. M. Howard, in 1843, and he remained in charge of Akron Congregation to 1844. Father Cornelius Daly succeeded in February, 1845, and was the first resident Pastor. He remained in charge till 1848, and enlarged and finished the church commenced by Father Howard. During the charge of Father Daly, the Archbishop of Cincinnati ordained Rev. J. V. Conlan, in the old frame church now used for school purposes. The Rev. Cassina Moavet, was here from October, 1848, to June, 1850, then came Rev. Father Goodwin. He was succeeded by Rev. Francis McGann, who owned the present site of the new church and the present cemetery. Father McGann was here from December, 1850, to August, 1855. Rev. L. Molon came in January, 1856, and was succeeded by Rev. Thomas

Walsh. Then followed the Rev. W. O'Connor, now a Redemptorist. Rev. M. A. Scanlon, was appointed to this charge in July, 1859, and remained here to November, 1873. During his pastorate the Catholic Germans, who till then formed part of St. Vincent's congregation, separated (in 1861) and organized themselves by permission of Bishop Rappe, as St. Bernard's congregation. Rev. Father Scanlon was succeeded November 23 1873, by Rev. Timothy Mahoney. Father Mahoney, after having freed the congregation from the greater part of a burdensome debt, was transferred August 1, 1880, to the larger and more important charge of St. Patrick's Church, Cleveland, and was succeeded by Rev. T. F. Mahar, D. D., the present Pastor. Among the prominent laymen and pioneer members of the congregation may be mentioned James McAllister, John Cook, John Dunne—father of Judge Dunne—Thomas Jones, J. McSweeney, Martin Quigley and Thomas Garaghty.

The present and second church edifice built by St. Vincent De Paul's congregation was commenced on St. Patrick's Day, 1864, by Rev. M. A. Scanlon. It is a massive stone structure, fifty feet wide and one hundred feet long, and of Roman style of architecture. The interior is quite attractive, the ceiling, especially, being very beautifully stuccoed. There are no pillars, and hence an unobstructed view is had of the whole interior. The twelve elegant, stained-glass windows are gifts from the different church societies and from several members of the congregation. The altar is only temporary, and will be replaced by another as soon as the debt is somewhat diminished. The cost of the church is estimated at about \$50,000. The parish school was organized during the pastorate of Rev. Francis McGann, about the year 1853. There are at present two divisions with an average attendance of one hundred and fifty children.

The Universalist Church* is among the early religious societies organized in Akron. Some time in the summer of 1837, Rev. Freeman Loring visited Akron for the purpose of establishing a Universalist Church. His meetings were held in the building now known as Merrill's pottery, and, subsequently, in a hall on the site now occupied by the store of Wolf, Church & Beck. Among those who became

* By Rev. Richard Eddy.

interested in the movement was Dr. Eliakim Crosby, then a man of wealth and great enterprise in business. An organization was effected in a few months. Dr. Crosby, Minor Spicer, Jacob and Jesse Allen and Henry Chittenden being among the more prominent members. Wholly at the expense of Dr. Crosby, and under the superintendence of Mr. Loring, a stone church edifice 44x57 feet, surmounted by a steeple 100 feet high, was erected, and dedicated in November, 1839. The cost of the building was about \$8,000. Mr. Jesse Allen presented the church with a fine organ, and the building was completely furnished with the church conveniences of that day. Mr. Loring was installed as Pastor on the day of the dedication, and the membership then amounted to about one hundred persons. Dr. Crosby was at this time engaged in the construction of a canal, commonly known as "The Chuckery Race," for the purpose of bringing water power from the Cuyahoga, at the falls, to Akron, a project which proved to be a disastrous failure, involving the doctor in financial ruin. To relieve his embarrassment in a measure, the members of the church organized a stock company, and bought the church building, paying therefor \$7,000. Mr. Loring resigned in the fall of 1839, and was succeeded by Rev. Nelson Doolittle, whose pastorate extended through several years. To him succeeded Revs. J. G. Foreman and Z. Baker. Under the latter there were divisions growing out of the introduction by the Pastor, of skeptical theories and so-called Spiritualism. The building needing extensive repairs, and the church becoming discouraged, the edifice was at last sold by the stockholders to the Baptist society, by whom it is now held and occupied.

A new effort to organize a church was made in November, 1872, when twenty-four persons adopted and subscribed a profession of faith and church government—John R. Buchtel, Moderator; S. M. Burnham, Clerk; Avery Spicer and Talmon Beardsley, Deacons. Rev. G. S. Weaver was chosen Pastor in April, 1873, and the church held its meetings in the lecture room of Buchtel College. Thirty members were added to the church during the first year of Mr. Weaver's pastorate; twenty-three the second year. In December, 1876, Mr. Weaver resigned. He was succeeded by Rev. H. L. Canfield, whose term of service

lasted about eighteen months, during which time there was a small increase of membership. Rev. E. L. Rexford, D. D., became Pastor in April, 1878, and remained till July, 1880, when he resigned. During Dr. Rexford's pastorate, the church completed the erection, at a cost of about \$45,000, of an elegant church edifice, on the corner of Broadway and Mill street. Large accessions were also made to the membership. The present Pastor, Rev. Richard Eddy, commenced his labors in September, 1880. The officers of the Church, elected in January, 1881, are W. D. Shipman, Moderator; S. M. Burnham, Clerk; J. H. Pendleton, Treasurer; Ferdinand Schumacher, John R. Buchtel, D. S. Wall, George W. Weeks, J. H. Pendleton, Dr. William Murdock, S. M. Burnham, William Hardy, D. T. Parsons, Trustees. The present membership is 160.

A Sunday school, the membership unknown, was established in connection with the early organization. The present school was organized in 1872, and has a membership of 190, with an average attendance of 160. The present Superintendent is Mr. George W. Weeks.

The creed of the Church is expressed in the following Profession of Belief, adopted by the Universalist Convention in 1803:

I. We believe that the Holy Scriptures of the Old and New Testaments contain a revelation of the character of God, and of the duty, interest and final destination of mankind.

II. We believe that there is one God, whose nature is love, revealed in one Lord Jesus Christ, by one Holy Spirit of Grace, who will finally restore the whole family of mankind to holiness and happiness.

III. We believe that holiness and true happiness are inseparably connected, and that believers ought to be careful to maintain order and practice good works; for these things are good and profitable unto men.

The Church of Christ of Akron was organized in 1839, but its history dates back several years beyond the period of its formation as a church. The following sketch was furnished by its Pastor, Elder C. C. Smith:

In the history of every church, there is first, the period of struggle previous to organization, when a few devoted persons, strong in faith and conviction, fight for a place among the workers in God's vineyard. This time of warfare in this church occupied about ten years preceding the beginning of the history of the Akron Church of Christ proper. From the time when Elder

William Hayden and E. B. Hubbard preached a few sermons in Middlebury in 1829, to the organization of the church in 1839. Some of the first fruits of the early seed-sowing was the baptizing of William Pangburn and Mrs. Judge Sumner, by Elder O. Newcomb; also the baptizing of Mrs. Pangburn and Levi Allen (still a member of the church), by Elder Hayden.

Prominent at this early time may be noticed Elder M. S. Wilcox, who preached as opportunity permitted, in schoolhouses and private residences. A discussion was held in Middlebury between him and a Methodist minister of the name of Graham. The name of Elder A. B. Green is also prominent in the early history of the church. We could not very well give too much prominence to the labors of two women connected with this work, viz., Mrs. Dr. Parker and Mrs. J. N. Botsford. Brother A. S. Hayden says: "These were the days of heart-song and heaven-reaching prayers and the preaching! It was hail mingled with rain. The prolonged hour flitted away unconsciously. The group of Disciples tarried, exhorted each other, sung warmly and feelingly a parting hymn, and with a final, earnest supplication, they commended one another to the good Shepherd and separated. But they were unspeakably happy!"

In the year 1839, Brothers Bently and Bosworth came at the call of the brethren, and in the building on Main street, now occupied by Merrill's pottery, they organized, with thirty-two members, into the Church of Christ of Akron, and with Levi Allen and Samuel Bangs as Elders; W. R. Storer and Jonah Allen, Deacons. Although organized into a society, the church had no regular place of meeting. Sometimes it came together at Middlebury, and sometimes in Akron in schoolhouses and private residences. In 1843, a meeting was held by Elder John Cochrane, assisted by Elder John Henry, of Mahoning County (of whom it was said, he "was swift to hear, but not slow to speak"), which resulted in forty-nine conversions to Christ, and in greatly increasing the influence of the church. Shortly after this, the church purchased a small frame building on a lot on High street, the present site of the German Lutheran Church building and parsonage, which was its first home.

In 1845, Dr. William F. Pool moved into Akron, and while practicing his profession, greatly strengthened the church, "laboring in

word and doctrine." In 1849, M. J. Streator became Pastor of the flock, remaining with it about ten months. In 1854, W. S. Gray commenced his three years' service for the church; in 1857, during his last year's stay, it sold the above mentioned house and lot. For six years the church rented Tappin Hall, on Market street, for its place of meeting. Here Elder Warren Belding held for them a very successful meeting, and here they were blessed with the labors of Elder J. Carroll Stark. In 1861, Elder J. G. Encil commenced his pastorate. While he still remained with the church, a lot was purchased in 1863, and the building now occupied was erected at a cost of about \$6,000. Then came the following ministers in the order named: J. O. Beardsley, L. R. Norton, R. L. Howe, L. Cooley, John L. Rowe, R. G. White, F. M. Greene and C. C. Smith, the present Pastor. The pastorate of L. Cooley was the longest of any, five years, and his memory is still held dear by those who labored with him. The labors of R. G. White during three years were signalized by a large ingathering of souls, and the establishing of the Mission Church at Middlebury, Sixth Ward of Akron, resulting in eighty members going out from the church for that purpose.

The officers of the church at the present time are: Elders—Levi Allen, Dr. William Sisler, Jacob Rhodes and C. C. Smith. Deacons—William Allen, Bennett Smetts, William Weston, Elijah Briggs, Edwin A. Barber, John Noble and J. P. Teeple. Clerk—Horton Wright. Treasurer—Albert Allen. There is upon the church books, 444 members, a net increase of 164 members during the four years of the last pastorate. It is in a vigorous and healthy condition, and stands first among the churches of Christ in the State in its liberality to establish the cause at home and abroad. Then there is the unwritten history of the struggles and triumphs of the individual members, and the unrecorded number who have taken membership from the church below to the church above. The names of the following ministers (not mentioned above) were prominently connected with the early work of the church here: Elders A. S. Hayden, J. W. Jones, Benjamin Franklin and R. Moffett.

The Sunday school was in existence as far back as 1845, but was not permanently organized until 1864, under Brother Beardsley's ad-

ministration, since which time it has been steadily on the increase. Mrs. Harvy, Daniel Storer, Camden Rockwell, J. P. Teeple and Byron Grove were, at different times, Superintendents, and stand prominently connected with the work. The present Superintendent is John Noble; Assistant, Charles Trarler; Clerks, Eugene and P. Rowe. During 1880, the average attendance was 160; average collection, per Lord's Day, \$5.60. It is but just to state that the attendance would be much greater if there were accommodations in the house for a larger school.

In September, 1876, the sisters organized "The Akron Auxiliary of the Christian Woman's Board of Missions," with Mrs. Levi Allen as President. The society has been in a flourishing condition from the start, and is now one of the largest and most efficient societies of the kind in the State.

The Congregational Church, although one of the oldest churches in the Western Reserve, did not organize in Akron as early as some of the other denominations. The following sketch of "the Congregational Church of Akron," was written, at our request, by the Pastor, Rev. T. E. Monroe:

On the 30th of May, 1842, a number of persons met to consider the expediency of organizing the present Congregational Church. A resolution was then adopted, declaring such organization desirable, and appointing a committee of three gentlemen—Mr. Seth Sackett, Mr. H. B. Spellman and Mr. A. R. Townsend—to prepare a confession of faith and a covenant, as a basis for final and permanent organization. At the same meeting a similar committee was appointed to prepare a statement of the reasons which seemed to require another church organization, and to invite neighboring ministers to assist in forming it. The meeting then adjourned to January 2, 1843. At this adjourned meeting, the articles of faith and the covenant were approved, and their adoption deferred to the 8th of June, at which time a Council was convened, to which these proceedings, with the reasons which justified them, were submitted for advice. This Council was composed of Rev. Seagrove Magill, of Tallmadge; Rev. Joseph Merriam, of Randolph; Rev. Mason Grosvenor, of Hudson, and Rev. William Clark, of Cuyahoga Falls. This Council advising the formation of a church, it was organ-

ized by twenty-two persons signing the confession of faith and covenant. On the 3d of July, nine others united with the infant church, when, on the 7th of July, with thirty-one members, the first election of officers was made, Mr. H. B. Spellman being elected Deacon and Mr. Allen Hibbard being chosen Clerk.

On the 1st of May, 1843, Rev. Isaac Jennings, having ministered to the church for six months as a supply, was called to be its first Pastor. This call was accepted, and on the 14th of June following he was ordained and installed. In June, 1845, the society completed a comfortable house of worship, situated on North Main street, at a cost of \$1,800. Mr. Jennings remained Pastor of the church until June 7, 1847, when he tendered his resignation. Several meetings of the church having been held at which he was urged to withdraw his resignation, it was reluctantly accepted on the 7th of February following, and the separation was approved by Council, convened upon the joint request of the church and Pastor, on the 12th of February, 1847. Rev. W. R. Stevens supplied the pulpit of the church from November, 1847, until May, 1849, when Rev. N. P. Bailey began his ministry to this people. On the 7th of October following, he was ordained and installed by Council. This relation continued until May, 1856, when Mr. Bailey tendered his resignation. This resignation was accepted on the 3d day of August following, without convening a Council. The church was supplied by Rev. A. Duncasson from February, 1857, to November, 1858, when Rev. Abram E. Baldwin was invited to officiate as Pastor for one year, with reference to future settlement. This invitation was accepted, and at the close of this engagement it was renewed, and, in February, 1860, he was ordained by Council convened upon invitation of the church, and his ministry continued until May, 1861. On December 30, 1861, the church called the Rev. Carlos Smith to become its Pastor, who accepted the call, and entered upon his pastorate February 2, 1862. The church at this time had a membership of about sixty. It had been heartily engaged in the great reforms of the day, and its new Pastor cordially cooperated in every work which sought the purity of society and the progress of reform.

During Mr. Smith's pastorate, the present church edifice was erected, at a cost of about \$40,000, and the membership of the church in-

creased from 60 to 268. About three hundred members had united with the church during this time, a flourishing Sunday school had been maintained, and the church had prospered in all its activities. In the winter of 1873, after a pastorate of eleven years, which had endeared him to the entire people, Mr. Smith resigned his relation to the church, but remained a communicant of it until his death, which occurred April 22, 1877, as the bell was tolling for morning service, at the age of seventy-six years. Few ministers have been so widely beloved or have made so warm personal friends.

During the winter of 1873, the church called Rev. T. E. Monroe, who commenced his ministry here on the first Sabbath of April, 1873, and is still Pastor of the church. During this time, new Sunday school rooms have been built below, and a gallery, accommodating 150 people, built in the audience-room above. An organ floor and small choir have been built in the rear of the church. These improvements, with repairs, cost \$5,000, and furnish accommodations for a Sunday school of 400 children and sittings for 750 people in the audience. The present membership is a little more than six hundred resident members, with about one hundred who are absent. The various benevolent activities of the church are earnestly prosecuted, and the church enters the current year with fresh hopes of usefulness.

On the night of the second Saturday of February, 1881, the house was seriously damaged by fire to an extent requiring \$9,000 for repairs. Extensive improvements are at present proposed, and subscriptions are now circulating for this purpose which will, if executed, afford convenient accommodation for 550 children in the Sabbath school rooms, and 950 sittings in the audience room. The church is to be heated throughout with steam, every pew having its steam-heated foot-rest, and every class-room its radiators. A superior organ will be procured, open-grate fires to be introduced as an attractive feature, and every convenience for social and public church work amply provided.

The Sunday school has been for eight years under the efficient management of Mr. Samuel Findly, to whom it is indebted for its eminent order and intelligence. Mr. Henry Perkins, an officer beloved by all our pupils, was elected to the office of Superintendent for the current year, and, though the school suffered se-

riously from changes rendered necessary by the fire, it is regaining its numbers and its interest.

Should the present plans for improvement be carried out, this church will be very amply furnished for a growing future work, and ought to prosper in the years to come quite as much as in those gone by.

The Methodist Episcopal Church of Middlebury (Sixth Ward of Akron) is one of the very old churches of Summit County, or, rather, has grown out of the old Middlebury Methodist Church. In a very early period of the history of the county, the Rev. Doctor Clark and the Rev. Mr. Monk, of Tallmadge, preached at this place. From the present Pastor of the church, Rev. Mr. Arundel, we obtained some of the facts pertaining to the history of this church, and which are here given.

What is now known as the Second Methodist Episcopal Church of Akron was formerly part of a circuit consisting of Tallmadge, Pleasant Valley, Mogadore, Brimfield and Middlebury. Soon after, or about the time of the annexation of Middlebury to the city proper, in 1870, this church was set off as a charge by itself, and, since that time, has been supplied by the following clergymen: Revs. Painter, Greer, Elliott, Merchant, Wilson, Corry, Randolph, and Arundel, the present Pastor. Some three years ago, the old building was entirely remodeled, under the efficient direction of Mr. Jacob Snyder, architect of Akron, at a cost of \$3,000. The audience-room and parlor are very neat and conveniently arranged, and, together with the Sunday-school room, have just been handsomely decorated by Messrs. Diehl and Caskey, of this city. The present membership is about eighty-five. The Sunday school has some two hundred enrolled on its books, and an average attendance of one hundred and fifty.

The following historical sketch of the First German Reformed Church of Akron was furnished for this work by the Pastor, Rev. J. Dahlmann. The First German Reformed Church of Akron, Summit Co., Ohio, had its origin in and was the continuation of the German Evangelical Protestant congregation which was organized about 1842, and worshiped in the stone church on North High street near the Pennsylvania & Ohio Canal. The building still stands, but is now turned into a dwelling house. The Lutheran element separated from

the congregation in 1852 and organized a congregation of their own. The Reformed element remained and continued their organization until the year 1855, when it united with the German Reformed Church of Akron and became identified with it. Before the two congregations united their interests, the latter had already purchased the frame church building of the Baptists on the northwest corner of Broadway and East Center streets. After uniting their interests, they mutually assumed the responsibility to cancel the debt which still rested on the church property. Divine services were held in the English and German languages on alternate Sundays by Rev. L. C. Edmonds, a young minister of talent and energy.

The English portion of the congregation did not possess sufficient activity to go forward energetically. After Rev. L. C. Edmonds had resigned, the German portion, not wishing to be long without a Pastor, called Rev. John F. Engelbach, of the German Reformed Church in the United States as their minister. They had undertaken much and were successful. Under the pastorate of Rev. J. F. Engelbach, the German portion of the congregation—the English portion merely existing in name—obtained a charter, and was incorporated on the 27th day of April, 1857, as the First German Reformed Church of Akron, Summit Co., Ohio.

The following are some of the original members: John Heintz, Philip Heintz, Louis Koch, Joh. Kling, Peter Brecht, Carl Schwing, J. Jacob Grether, George Billau, Jacob Grether, George Grether, Michael Grether, Friedrich Gessler, George Angne, Carl Nähr, Joh. Brobt, Nicolaus Fuchs, Adam Schaaf, Joh. Schaab, Joh. Fink, William Fink, Conrad Fink, Jacob Steigner, Christoph Baumgartel, Joh. Hätterich, Christoph Oberholz, Conrad Zettel, Gottfried Stegner, Andreas Koch, Joh. Gush and Friedrich Haushalter, etc.

The First German Reformed Church continued to worship in the house of God which they owned conjointly with the English portion or the German Reformed Church of Akron, Ohio, until the fall of 1858, when the former bought the latter out and obtained full possession of the church property which they still hold.

Rev. J. F. Engelbach labored faithfully for the welfare of the congregation, and resigned

near the end of the year 1860. They were for some time without a Pastor.

Rev. Robert Koehler, formerly of Mount Eaton, Ohio, took charge of the congregation in April, 1861, and entered as Chaplain of volunteers in the United States service in August, 1864. Very little progress was made during his pastorate, and this was that the congregation was separated from other congregations and became a charge itself.

Mr. J. D. Leemann, an educated school-teacher, preached over two years to the congregation, and established a parochial school in the German language on the northwest corner of South High and East Center streets. This school flourished for some time, and with its discontinuance his labors came to a close, especially when the consistory and the congregation forbid him to preach any longer for them.

Rev. John Baumgärtner, an educated minister, from Canton Berne, Switzerland, who had been Pastor for some time of a Reformed congregation in Pittsburgh, Penn., was chosen as Pastor. He entered upon his labors in the fall of 1866, and continued until September 18, 1870. During his pastorate, a new constitution for the congregation was drawn up and accepted, and an attempt made to sever the connection of the congregation with the Reformed Church in the United States which was not successful.

Rev. Christoph Schiller, from Limaville, Ohio, was by the congregation unanimously elected as Pastor on October 16, 1870, and entered upon his duties on November 27, 1870. He was successful in rescuing the congregation from ruin and enervate it to new life. It began to live again and became conscious of its duty as a Christian congregation. Under his labors, the congregation increased in membership and activity, and purchased and enlarged the parsonage next to the church on East Center street. In the summer of 1876 he resigned, and moved to Toledo, Ohio.

Rev. Julius Herold, of Charleston, Ind., was his successor by unanimous election, and entered upon the pastorate in July, 1876. He was active, and caused the church edifice to be remodeled inside, and the purchasing of over seven acres of land on the west end of the city, north of Market street, for a burial-place, which was dedicated in August, 1880, for that purpose. After having resigned his pastorate

A. B. Stone

in August, he continued his labors until November 14, 1880.

Rev. Jacob Dahlmann, D. D., of Philadelphia, Penn., succeeded him on the 9th of December, 1880. He was born in Barmen, Rhein Prussia, and emigrated with his parents to the United States in 1848, and entered upon his studies for the Christian ministry in Franklin and Marshall College, Lancaster, Penn., in 1855. After graduating in honor in 1860, he pursued his theological studies at the seminary of the German Reformed Church at Mercersburg, Penn., under Dr. Philip Schaff and others. There was a call extended to him, in 1862, to go to Philadelphia, Penn., and organize the Emanuel's German Reformed Church in West Philadelphia, to which he responded, and, after laboring nearly nineteen years in his first charge, having built a large and beautiful church and parsonage, he accepted a call from this congregation for the purpose of leaving the general church work, which became too burdensome for him, to other hands. Having served the Reformed Church, especially the German portion thereof, in the East in various ways, he continues to be Assistant Stated Clerk of the General Synod of said church, and it is hoped that his pastorate will, his life being spared, be of long duration and crowned with great success.

The church edifice, on the northwest corner of Broadway and East Center streets, was erected more than forty years ago, by the Baptist congregation. It is a frame building, massive in timbers, 40x60 feet, with four large pillars in front, and a steeple, in which Summit County placed a bell more than twenty-five years ago for the purpose of announcing the time for the convening of the court, and until lately to give the alarm for fire.

The congregation has 420 communicants and 280 unconfirmed members. The Pastor is Rev. Jacob Dahlmann, D. D.; the Elders, John Kling and John George Eberhard; the Deacons are Henry Schmiedel, Charles Brodt, Louis Müller and Peter Kulin. These form the consistory of the congregation, and constitute at the same time the Board of Trustees.

The Sunday school of the congregation was organized by Mr. John Heintz, in 1857, with 20 to 30 scholars, and who continued to be Superintendent until 1862, when the school had increased to 50 and more scholars. Elder

John Kling and others held the office of Superintendent of the Sunday school. Elder John George Eberhard was, during the last ten years or more, on or off Superintendent until lately, when the Pastor, Rev. Jacob Dahlmann, D. D., became (ex officio) Superintendent of the Sunday school. The Sunday school is held every Sunday morning from 9 to 10:30 o'clock. There are 150 children on the roll, and 130 or more in regular attendance in the summer and 110 in the winter.

Grace Reformed Church has been in existence in Akron for a third of a century. The following historical sketch is by Rev. Emil P. Herbruck, its present Pastor: Grace Reformed Congregation was organized on the 5th of March, 1853, by Rev. N. Gehr, Missionary of the German Reformed Church in the United States. At a meeting held in the old Universalist Church on High street, a constitution was adopted, and signed by the following persons: John Weimer, Catharine Weimer, Thomas Moore, Susanna Moore, William Heil, Esther Heil, Philip Kremer, Henry Rinehart, Sophia Rinehart and Magdalena Kremff. Rev. N. Gehr was elected Pastor, and served the congregation about one year. He was followed by Revs. P. J. Spangler, L. Edmonds, J. Schlasser, J. F. Helm, William McCaughey, W. H. H. Snyder, S. S. Miller, J. M. Mickley and I. E. Graff, in pastorates ranging from one to three years in length. In May, 1868, Rev. Edward Herbruck accepted a call to the charge, and under his direction it enjoyed a greater measure of prosperity than at any previous time. He labored in the congregation successfully for four years, though having almost unsurmountable difficulties to overcome. Rev. M. Laucks became his successor, and served for about two years. In April, 1876, Rev. Emil P. Herbruck assumed the pastorate, and has discharged its duties ever since.

The first edifice was bought at second-hand from the Congregational Church in Middlebury, and moved piece-meal to the present lot on Broadway, where it was in constant use by the congregation for eighteen years. In 1881, it became apparent that a new building was necessary to meet the growing demands of the church. Accordingly, on the third Sunday in April, the corner-stone of the present structure was laid. It is built of brick, with stone

dressing, and is 52x80 feet in dimensions. The auditorium is amphitheatrical in shape, and, in connection with a quarter gallery, has a seating capacity of about five hundred. The commodious basement is arranged for the Sunday school, with class-rooms of semicircular form. The building is neat and attractive, furnished with the modern conveniences, and cost \$15,000.

The present membership of the church is 270, and is constantly increasing. The officers for the year 1881 are: Elders, John Weimer and Frank Bolander; Deacons, John Kritz, Isaac Kittenger, Jacob Baus and A. F. Hunsicker.

The Sunday school was organized in 1853, and has been kept up ever since, though with a somewhat fluctuating attendance. It is at present in a flourishing condition, having an average attendance of 175. The school is well conducted by its Superintendent, G. F. Eberhard.

The German Zion's Lutheran Church* was organized on the 6th day of August, 1854, by the Rev. P. J. Buehl. The original members were J. Beyruther, N. Henke, Ch. Baumgaertel, J. Grad, D. Steinhagen, J. Rogler, J. Bauernfeind, E. Seidel, J. Dietz, W. Gerdtz, H. Wishmeier, Mrs. W. Beck, Ch. Schmidt, L. Strobel, W. Strobel, A. Voss, N. Oelrich, G. Kling, J. Feuchter, I. Frank, G. Proehl, C. Kroeger, Mrs. Kaiser, J. Harter, G. Beck, J. Miller, W. Schroeder, P. Bibricher, E. Ditles, W. Hageman, J. Bernitt, D. Lamparter, J. Stein, C. Reinhard, S. Schmidt, G. Miller, J. Wolf, J. Brod, G. Goetz, J. Bitsch, Mrs. Sorrik, Ch. Nehr, J. Reibly, Mr. Schneider, G. Tents, Mrs. Shoenfeld, Mr. Dresler. In 1855, the society purchased a church edifice for their own from the Disciples, a building which was the pioneer house of worship in Akron, having been erected in 1834-35, by the Congregationalists, on a portion of the present court house grounds. Rev. Buehl having accepted a call to the Lutheran Church at Massillon, Rev. G. Th. Gotsch was called as his successor in 1864, who served the congregation until 1872, when the present Pastor, Rev. H. W. Lothmann, was called, and took charge of the congregation. On account of the rapidly growing membership, a larger structure as a place of worship became a necessity, and, on the 16th day of

*By Rev. H. W. Lothmann.

September, 1877, the present building, costing \$16,000, was solemnly dedicated to the services of the triune God. It is situated at the corner of High and Quarry streets, and covers a space 50x100 feet, with a spire 150 feet high; it has a seating capacity of about five hundred people, and is built of brick. The congregation at present consists of about one hundred and fifty families with 450 communicants. A school containing 130 scholars, is connected with the church, in which the children are taught both the German and English languages, Mr. F. Strieter acting as teacher. The school is held in the old church building, which was removed to the rear of the lot back of the new church edifice. The present officers of the church are as follows: George Haas, Treasurer; F. Manthey, W. Wiese and W. Woehler, Trustees; Ch. Baumann, H. Dietz and F. Kunz, Vestrymen.

St. Bernard Catholic Church* (German) was organized in 1861. In that year, the few German families deemed it proper to form a separate congregation, and for this purpose gathered in the cooper-shop of George Roth, on Green street. The number of families then were twenty-three, and they resolved to separate from St. Vincent De Paul's Church, to which they had belonged up to that time. A church was formed under the title of St. Bernard Catholic Church. The lot on the northeast corner of Center and Broadway was purchased, where the present building of the society stands. Rev. Father Loure, of St. Peter's Church, Cleveland, attended the little flock for some time, and, in 1862, the corner-stone of the new church was laid by Very Rev. Father Loure. In June, 1862, Rev. Louis Shiele was appointed the first regular Pastor of the congregation, and remained one year. In January, 1863, they took possession of their new building, and, in July, of the same year, Rev. Peter Donnerhoffe succeeded Father Louis Shiele, and, on the 19th of July, 1866, Rev. Father Donnerhoffe was succeeded by Rev. J. B. Broun, the present Pastor.

In 1865, the residence of the Pastor was purchased, at a cost of about \$2,200.; in 1866, the cemetery was purchased for \$2,500; in 1867, the schoolhouse was built at a cost of \$1,400; in 1868, the church was renovated throughout, and stained-glass windows put in,

*By Rev. J. B. Broun.

at a cost of \$1,150; in 1870, two bells were bought, at a cost of \$1,350; in 1872, the organ was purchased, costing \$1,260; in 1874, some improvements were made at a cost of \$1,200; in 1877, the tower on the church was built, at a cost of \$2,600; the church frescoed at a cost of \$400 more, and a large bell bought at \$946, and other improvements at a cost of \$200. In 1880, an addition was built to the church at a cost of \$12,000. The present strength of the church is about three hundred families, with some four hundred attendants at the Sunday school. At the school, conducted under charge of the Church, the attendance is about two hundred and eighty children.

The Akron Hebrew congregation dates its organization back to the year 1865. On the 2d of April of that year, the following named gentlemen met and formed themselves into a society, to be known as the Akron Hebrew Association, the object of the association to be the establishment of a school and synagogue, for the promotion of the educational, moral and religious interests of the Jewish community. The charter members were Michael Joseph, Theo. Rice, J. L. Joseph, S. B. Hopfman, Simon Joseph, H. W. Moss, Isaac Levi, S. M. Ziesel, Moses Joseph, Herman F. Hahn, J. N. Leopold, D. Leopold, Louis Calish, Caufman Koch and Jacob Koch. The first Jewish residents in Akron were Mr. Isaac Levi and Mr. Caufman Koch, who were engaged in business in Akron as early as the year 1845, when Akron was a mere village. Mr. S. B. Hopfman came to Akron in the year 1851; Mr. H. Moss in the year 1856; Mr. Michael Joseph in the year 1864, and thus the Jewish population gradually increased, until at the present writing (March, 1881), it numbers 175 souls, while the books of the congregation show a membership of 30. Owing to the fact that the congregation has never called upon the community at large for pecuniary assistance, a policy to which, until now, it has strictly adhered, its financial strength has been slow but steady, and constant in its development. For four years after its foundation, the congregation found itself unable to provide a permanent place of worship; but had to content itself with the establishment of a school for instruction in German, Hebrew, Jewish history and religion; holding religious service only on special occasions, and on holidays. In the fall of the year 1869, the congregation

rented a hall and fitted up a synagogue and school on the third floor in Allen's Block, which it occupied for five years, when the steady increase in membership made the rooms inadequate, and its financial prosperity enabled it to secure more commodious quarters. In the meanwhile, the Congregation had purchased "burial grounds" adjoining the Akron Rural Cemetery; but, the "grounds" being unsuitable, they were exchanged, October 15, 1871, for a large section in the southeast corner of the Akron Rural Cemetery, the congregation paying the cemetery association the additional sum of \$1,000. The new synagogue and school-room, which were located in Clark's building, were dedicated on the 26th of October, 1874. Besides supporting a school and synagogue, employing a regular teacher and minister, and purchasing burial grounds, the congregation responded freely to appeals to its benevolence, contributing in the year 1868, \$477 to the newly-established Jewish Orphan Asylum in Cleveland, and, sending in November, 1871, \$198, raised by voluntary subscription, to the sufferers by the Chicago fire. In the year 1880, the increased membership, and the additional number of pupils, compelled the Congregation to seek new accommodations, and the third floor of the newly-erected Barber Block was leased for a term of five years. Over a thousand dollars were expended in fitting up the synagogue and school-room, which were dedicated to divine worship on the 23d of July, 1880, and which will compare favorably with the temples of many much larger congregations. As an adjunct to the congregation, the ladies organized a society called "Der Schweslerbund," which has been in existence for over thirteen years, and which has nobly assisted in promoting the great objects of the congregation. During the sixteen years of its existence, the executive power of the congregation has been in the hands of the following nine Presidents: Isaac Levi, Moses Joseph (two terms), H. F. Hahn, S. B. Hopfman (two terms), Isidor Cohn, George Marienthal, and the present presiding officer, Benjamin Desenberg. The first minister was the Rev. N. Hirsch, succeeded in regular order by Rev. N. L. Holstein, Rev. J. Jesselson, Rev. A. Suhler, Rev. A. Schreier, Rev. A. Burgheim and the present minister Rabbi S. M. Fleischman. This is the history of the Akron Hebrew Congregation from the days of its inauguration to

the present time. Its prosperous condition indicates a bright future, and it is hoped that when the congregation is again compelled to remove from its present location, it will dedicate a temple built by its own money on its own property.—[*Written by Rabbi S. M. Fleischman for this work.*]

Calvary Church, of the Evangelical Association of Akron, was organized in 1866, by Rev. H. F. S. Siehley, of the Bristol Circuit. To the Rev. L. W. Hankey, the Pastor, we are indebted for the following facts pertaining to this church: Calvary Church was organized with the following members: Benjamin Stahl (leader), Catharine Stahl, Henry Nicholas, Catharine Nicholas, Samuel Nicholas, Leah Nicholas, Joseph Nicholas, Martha Nicholas, Louisa Cook, Nancy Henninger, W. W. Farnsworth, Margaret Farnsworth and John and Eliza Shaffer. In 1867, it was determined by Conference that Akron should be made a Mission, under the charge of Rev. Mr. Siehley. There was no preaching, however, in the early part of the year, on account of being unable to obtain a suitable building. A church was commenced during the year and the basement completed, and dedicated in October, 1867, by Rev. John Stull, Presiding Elder. The dedicatory sermon was preached by him, on the 6th of October. During the winter of 1867-68, the main audience-room of the church was finished, and dedicated to the service of God May 3, 1868, by Rev. Joseph Long, Bishop. The building, which is a substantial frame, cost about \$4,000, outside of considerable work and material, which was contributed by individual members. It has been remodeled and improved since it was originally built, and is now a handsome and commodious church edifice, located in South Akron.

The following Pastors have been called to the charge since organization: Revs. Jesse Lerch, A. Swartz, H. E. Strauch, A. E. Dreisbach, S. S. Condo, A. Vandersoll, and the present Pastor, Rev. L. W. Hankey. The membership at this time is two hundred and twenty-seven.

The Sunday school of this church was organized on the 27th of October, 1867, and numbered at the time about forty scholars. It has continued since without interruption, and, at the present time, is in a very flourishing state, with a general attendance of 240 scholars, under the superintendence of W. S. Youts.

The English Evangelical Lutheran Church of the Holy Trinity, Akron, Ohio, was organized in the spring of 1870. The pioneer work which resulted in this organization was performed by Rev. W. A. Passavant, D. D., of Pittsburgh, and Rev. S. Laird, now of Philadelphia, Penn. There were about thirty members at the time of its organization. The first regular Pastor of the congregation was Rev. U. P. Ruthrauff, now deceased. It was during his ministry that the fine gothic church on Prospect street was built and the parsonage purchased, at a cost of about \$45,000. The church, though not yet completed in its towers and Sunday school arrangements, was consecrated in June, 1872. Rev. W. P. Ruthrauff soon after resigned the charge and was succeeded by Rev. J. F. Fahs, the present Pastor, who took charge of the congregation in October, 1872. The congregation now numbers about one hundred and ninety-five communicant members.

The Sunday school was organized soon after the organization of the congregation, and numbers about one hundred and twenty-five scholars, with an average attendance of about one hundred. Mr. R. N. Kratz is the Superintendent.—[*Written by Rev. J. F. Fahs.*]

The Church of Christ of Middlebury, or the Sixth Ward of Akron, is of recent organization. The facts for the following sketch of it were furnished by the Pastor, Elder T. D. Butler: The Church of Christ, Middlebury, Summit County, Ohio, was organized March 30, 1875, with eighty members, and the following officers: H. J. White, A. Brown, M. Jewett, Elders; F. W. Inman, G. F. Kent, T. H. Botsford and Richard Whitmore, Trustees; G. F. Kent and T. H. Botsford, Deacons; S. C. Inman, Clerk, and Almon Brown, Treasurer. The membership of the church at present is eighty-five. The first Pastor was Elder H. J. White. He has been followed by Elders F. M. Green, R. G. White, J. W. James, W. H. Rogers (in the order named), and by the present Pastor, Elder T. D. Butler. The church building is quite a model of architectural beauty, and was erected in 1878, at a cost of about \$6,000.

The Sunday school of this church was organized during the summer of 1875, and is in a flourishing condition, with an average attendance of about eighty children, under the superintendence of C. J. Robinson.

CHAPTER XI.*

CITY OF AKRON—EDUCATIONAL HISTORY—THE EARLY SCHOOLS—PERFECTION OF THE COMMON SCHOOLS—BUCHTEL COLLEGE—PRESIDENT AND FACULTY—ENDOWMENT, ETC.

Precepts and rules are repulsive to a child, but happy illustrations winneth him.—*Tupper.*

IN a history of Akron, its common schools and educational facilities occupy a prominent place. The following historical sketch of the schools of the city was written by Judge C. Bryan, and is so full and complete that we incorporate it almost bodily in this work. It is as follows: "In 1846, there were within the incorporated limits of the village of Akron, 690 children between the ages of four and sixteen years. Of this number, there was an average attendance at the public and other schools the year through of not more than 375. During the summer of 1846, one of the district schools was taught in the back room of a dwelling house. Another was taught in an uncouth, inconvenient and uncomfortable building, gratuitously furnished by Capt. Howe, for the use of the district. There were private schools, but these were taught in rooms temporarily hired, and unsuited for the purpose in many respects. Reading, writing, spelling, arithmetic and grammar were more or less attended to in the private and public schools; but of the above number, there were, as estimated, 200 who did not attend school at all, who ought to have been receiving the benefits of good school instruction.

"It was in view of this state of things that Rev. I. Jennings, then a young man, and Pastor of the Congregational Church of Akron, self-moved, set himself to work to re-organize the common schools of Akron. There were many friends of a better education in the place, who co-operated with Mr. Jennings, and, on the 16th of May, 1846, at a public meeting of the citizens, a committee was appointed, of which he was Chairman, 'to take into consideration our present educational provisions and the improvement, if any, which may be made therein.' On the 21st of November, 1846, there was an adjourned meeting of the citizens of Akron, at Mechanics' Hall, at which Mr. Jennings, on behalf of the committee, submitted

their report. It was a good, business-like document, clear in its statements, definite in its recommendations, and so just and reasonable in its views, that it received the unanimous approval and adoption of the citizens there assembled, and a committee, consisting of R. P. Spaulding, H. W. King, H. B. Spelman and L. V. Bierce, was appointed to secure the necessary legislation. The following is the plan of the committee: 1. Let the whole village be incorporated into one school district. 2. Let there be established six primary schools in different parts of the village, so as best to accommodate the whole. 3. Let there be one grammar school, centrally located, where instruction may be given in the various studies and parts of studies not provided for in the primary schools, and yet requisite to a respectable English education. 4. Let there be gratuitous admission to each school in the system, for the children of residents, with the following restrictions, viz.: No pupil shall be admitted to the grammar school who fails to sustain a thorough examination in the studies of the primary school, and the teacher shall have power, with the advice and direction of the Superintendent, to exclude for misconduct in extreme cases, and to classify the pupils as the best good of the schools may seem to require. 5. The expense of establishing and sustaining this system of schools shall be thus provided for: First, by appropriating what public school money the inhabitants of the village are entitled to, and what other funds or property may be at the disposal of the board for this purpose; and, secondly, a tax to be levied by the Common Council upon the taxable property of this village for the balance. 6. Let six Superintendents be chosen by the Common Council, who shall be charged with perfecting the system thus generally defined, the bringing of it into operation, and the control of it when brought into operation. Let the six Superintendents be so chosen that the term of office of two of them shall expire each year.

*Contributed by W. H. Perrin.

"The plan was adopted by the Legislature, and embodied in the 'act for the support and better regulation of common schools in the town of Akron,' passed February 8, 1847, with a change in the name and mode of election of officers named in the sixth paragraph only, the substance being retained. The committee urged in behalf of this plan, that it will secure a thorough classification of pupils, bring different classes into constant fellowship, lay hold of native talent and worth, whether rich or poor, and secure the best superintendence and management. It will not only give the best schools, but the cheapest; for while such instruction as the youth of Akron now get costs about \$2,200 a year, or \$6.82 for each of the 375 who attend school, under the plan proposed 500 can be instructed for \$1,700 a year, or \$3.40 a scholar for cost of instruction. The interval between the meetings in May and November, 1846, was improved by Mr. Jennings in collecting information, maturing the plan and elaborating the report. The idea originated with Mr. Jennings, and the labor of visiting every house in the village, to ascertain what children went to school and who did not go, and who went to public schools and who went to private, and how much was paid for school instruction, was performed by him. He went to Cleveland and Sandusky City in the same interest, to see the operation of graded schools there. He procured estimates by competent mechanics, of the cost of erecting a grammar-school building to accommodate 500 pupils, and omitted no detail of the plan that was necessary to show it in organic completeness; and whatever credit and distinction Akron may have enjoyed for being the first to adopt the principle of free graded schools in Ohio, is due to Mr. Jennings. Others saw and felt the need of a system and of better methods of instruction and management, but in his practical and sagacious mind the subject took form and proportion as an organic whole, and under his presentation the plan looked so feasible, so admirable, that hostility was disarmed and the people were eager for its adoption.

"Mr. Jennings was the father and founder of the Akron schools; and, though he did not remain in Akron to see their operation, he gave them their first impulse and direction, and inspired their management and administration. His plan was flexible to the needs of the

growth and enlargement, and in essential features remains as it first took form on the statute book. For actions less signal and beneficent, men have been honored and recognized as public benefactors. The first election under the law was in the spring of 1847, and L. V. Bierce, H. B. Spelman, James Mathews, William H. Dewey, William M. Dodge and Joseph Cole constituted the first Board of Education, which organized by choosing L. V. Bierce, President; H. B. Spelman, Secretary, and William H. Dewey, Treasurer. The Town Council appointed J. S. Carpenter, A. B. Berry and H. K. Smith, Examiners. The work of the board for the first year was mainly that of organization. They divided the Akron school district into eight subdistricts, built two primary school-houses, 25x32 feet, at a cost of \$370 each, purchased two and a half acres of land on Mill, Prospect and Summit streets, at a cost of \$2,137.31, on which stood a dwelling-house, which, at an expense of \$613.44, was fitted up for a grammar school. Mr. M. D. Leggett, late Commissioner of Patents, was employed as teacher and superintendent at a salary of \$500, assisted by Miss Wolcott, at a salary of \$200, and Miss Pomeroy, at a salary of \$150. The primaries were taught by young ladies, at \$3.50 per week. There were two terms of the grammar school, the first commencing in August, and enrolling 127, with an average daily attendance of 112, or eighty-eight per cent; the second term enrolling 188, and having an average attendance of 167, or eighty-nine per cent. The primaries during the year showed an average attendance of fifty-five per cent, and an enrollment during the first term of 641. During the second term, 880 was the number enrolled. Some of these were from without the district. Such was the state of opinion at the first annual report, made in March, 1848, that the board felt called upon to justify the employment of female teachers in the primaries on the ground, first, of economy, and, second, that the Superintendent was required to spend one hour each day in these schools, visiting them in rotation, which the Board believed secured all the advantages to be derived from the employment of male teachers.

"The Akron school law and the operations of the first board under it had a strong opposition from property-holders. The principle of free graded schools had not yet been recognized.

These men felt it a grievance that their property should be taxed to educate the children of the village. An unlimited power of taxation for school purposes had been given the board which they felt to be dangerous, and made an objection to the system. As a peace-offering to this class and to disarm opposition, the first call was for but two mills on the dollar. But the board went farther, asking the Legislature to limit its power to five mills. The act was amended, fixing the limit at four mills a year for school purposes. This change was unfortunate. The State had just changed its rate of taxation for school purposes, by which the amount Akron would otherwise receive was reduced over \$300. Schoolhouses had to be built, lots purchased and paid for, and the board was compelled to an economy of management that bordered upon parsimony, and in the second year to lose the services of Mr. Leggett, who was doing well for the school. The board was able, however, to make a good showing in its first annual report in this, that the cost of tuition for each scholar was less than \$2 a year—a saving to the town of from \$1,340 to \$1,776 a year on the common-school system. In the grammar school were taught orthography, reading, writing, arithmetic, geography, history, grammar, algebra, geometry, trigonometry, physiology, natural philosophy, mental philosophy, chemistry, book-keeping, astronomy, phonography, and an hour each week given to composition and declamation. The board bears honorable testimony to the zeal and efficiency of teachers of grammar and primary schools, and to the Board of Examiners for 'efficient and valuable suggestions,' and in view of all the facts may be pardoned if it slightly magnified its work when it said it had given 'the benefits of a *finished* English education to all the children of the town at less than the average rate of tuition under the common-school system.' During the second year, ending March 31, 1849, two new schoolhouses were erected for the primaries, at a cost of \$480 each, but the accommodations were still inadequate. The schools were crowded, and more room needed without the means to build. The average daily percentage of attendance in the primaries had risen to be 62 per cent, and that of the grammar fallen to 71 for the first term and 80 for the last. In the third year the subdistricts were increased to nine, the

primaries were graded, and the grammar school suspended from April 27 to September 3, 1849. At the latter date, Mr. C. Palmer took the charge under an engagement for two years, assisted by Mrs. Palmer and Mr. Graham. The suspension was a financial necessity, but the board was enabled to speak assuredly of the improvement in the public regard for the schools. 'The ardor of novelty had subsided, but the sober judgment of the people fully sustained the system.' 'We doubt,' the board say, 'whether at any time a motion to relapse into our former chaotic state would have been met by a more determined or numerous opposition than now. In truth, we think our school system may be looked upon as having passed the crisis, and as being fixed in the convictions and cherished in the conscientious wants of the people.'

"In the winter of 1850-51, the board entered into a contract with Mr. Charles Brown for laying the foundation of a brick edifice, 70x50 feet, and two stories high, for the grammar school, an undertaking for which there was pressing need on account of the entire unfitness of the building then in use for that purpose. The corner-stone of this edifice was laid with due ceremonies Aug. 18, 1851, and the walls finished before the commencement of winter. The grammar school was taught but six weeks during the fifth school year, and closed in consequence of the illness of Mr. Palmer, the Superintendent, not to be opened again until the new building was ready for occupation. The necessity of this suspension lay in the state of the finances and the limited powers of the Board for taxation. Mr. and Mrs. Olmstead were employed at \$50 a month to teach a high grade primary school, which took the place of the grammar school. The salary of Mr. Palmer was \$600. In the fourth annual report the term, 'High School,' first appears in the transactions of the board. During the third and fourth school years, J. S. Carpenter, Esq., is President of the Board, and the reports deal more in certain general aspects, the methods, means and ends of education; less external stimulation, and more of self-help in the school room. The fifth annual report shows the same aptness for comparative statistics as the first and second, and gives the cost of tuition for the whole year: Per scholar upon average enrolled, \$2; per scholar upon average attendance,

\$2.80 ; per scholar upon average enumeration, \$1.12, and believes an instance cannot be found where so thorough an education can be obtained at so small an expense.

"On the 13th of October, 1853, the new structure was completed and dedicated to the cause of education. The cost of the building was \$9,250, and in its plan and appearance was creditable to the then village of Akron. Mr. Samuel F. Cooper was put in charge of the high school, assisted by Mrs. Cooper and Miss Voris ; Miss Codding, assisted by Misses Prior and Gilbert, had charge of the grammar school. A nucleus of a philosophical apparatus and geological cabinet was formed under Mr. Cooper. In April, 1856, the engagement of Mr. Cooper closed. In the October following, H. B. Foster, Esq., of Hudson, entered upon the office of instruction and superintendence, and continued until the following spring, when his engagement closed. He was assisted by Misses Bernard and Williamson, all able and competent teachers, with whom the board was loath to part. Mr. Foster declining a re-engagement, Mr. E. B. Olmstead was employed to take his place, and J. Park Alexander was put in charge of the grammar school at \$35 per month. The primary teachers were paid from \$3.75 to \$5. per week. In 1855-56, the grammar school was in charge of Mr. George Root, assisted a part of the year by Misses Angel and McArthur. Mr. Root gave special attention to penmanship and book-keeping in the high school, and his instruction in those branches was attended with marked results. The pay-roll of teachers for the year ending April, 1856, was \$2,777.42, including superintendence. In the report made April, 1857, the estimated expense of running the schools for the next year was \$4,200, 'including incidentals,' and it was in this report that claim was first made for compensation to members of the board for their services. It was in this report also that the first rule was laid down touching the reading of the Bible and religious instruction in the schools. The following is the rule : 'Teachers may open their schools in the morning by singing with the scholars, or reading a short passage of Scripture (the Lord's prayer, for instance), without note or comment, or without any general exercise, as they may think proper.' In this report also is laid down the rule of the board touching the

qualifications of teachers. 'The board, as a general rule, have determined to employ no teachers in the Akron schools but those of *ripe age, ample experience and successful tact* in their profession, while it is entirely necessary and essential that a teacher shall have a fine education, and an ample fund of general knowledge, it is as important to possess *tact* also.' Besides these, the teacher must have 'great goodness and kindness of heart, indomitable perseverance, *good common sense*, and last, but not least, the qualities, in a measure, of a successful military general.' It might excite our wonder that so rare and so fair a cluster of graces and acquirements could be had for the asking in the year 1854, and at so low figures as from \$3.50 a week in the primaries to \$65 a month to the principal of the high school and Superintendent of all the schools. The board hints at no difficulty in procuring teachers of ripe age, ample experience, successful tact, fine education, etc., or that the market is not full of that description of candidates for the office of instruction. The high school lot is being graded, and, when done, "the grounds will be planted with forest trees, evergreens and shrubbery, such as will best conduce to the appearance of the place, and, in after years, to the comfort of the scholars.' A substantial stone wall has been erected on the west front, and on the other three sides a tight board fence.

"The Akron School District was, in April, 1857, divided into five subdistricts, in the first and second of which, primary and secondary grades of pupils were to be taught by the same teacher in the same room. In the other subdistricts, the primaries and secondaries were to be taught separately. A course of study is laid down. Reading and spelling run through the four grades, 'writing when desired,' in the secondary, and every day in the grammar and in the high school, 'so as to be able to write a fair hand.' The scholars in the grammar school shall be taught to read and spell the fourth reader fluently ; to master the first half of Stoddard's Intellectual Arithmetic ; the whole of Tracy's and Stoddard's Practical as far as interest ; the general definitions in grammar ; Colton and Fitch's Modern School Geography ; to practice writing every day ; map drawing ; declamation one hour each week, and general practical oral instruction daily. The high school course included, 3d, Stoddard's Practical

Arithmetic, after which Greenleaf's National may be taken up (one class), and the whole school practiced in mental arithmetic; 4th, English grammar and parsing; 5th, map drawing and geography; 6th, philosophy; 7th, history; 8th, physiology; 9th, algebra; 10th, chemistry; 11th, astronomy; 12th, botany and geometry. Declamation and composition to be practiced by each pupil every four weeks. These in their order, the 1st and 2d being occupied by reading, spelling and writing. The Superintendent is to be Principal of the high school and institutes, and spend two hours each week visiting the other public schools of the town, advising with the teachers, examining the classes with reference to their classification, progress and promotion, and to report monthly to the board.

"This outline closes the tenth year of the Akron schools. One of the features of this period is the 'Specimen Schools or Teachers' Institutes', held each Saturday morning in the presence of all the teachers, members of the board, etc. One teacher, by previous appointment, calls her school together on Saturday morning, and pursues her routine course for an hour and a half, and then dismisses it. After this, lectures, discussions, etc. These institutes, the board say, 'have worked admirably.' Teachers were required to attend them. It was in the seventh year of the schools (1854), that we first hear of these 'Specimen Schools or Teachers' Institutes.' They gave way in 1860 to teachers' meetings, which were designed for mutual improvement, and to enable the teacher to keep pace with progress in the 'art of teaching.' When Latin and Greek were dropped does not appear, but here is the mind of the board upon the subject: 'The introduction of the study of languages into the high school has often been urged by a few of our citizens; but, the board have been of the opinion that a good practical English education is all that any one has a right to expect or exact at the hands of a generous public.' The Akron schools have now been in operation ten years, and under five different Superintendents, three of whom, Leggett, Palmer and Foster, were capable, competent and valuable men for the place. Their work was mainly that of instruction in the department under their immediate charge; the supervision of other schools being quite nominal, consisting chiefly in occasional visitation. In

the existing state of opinion and resources of the board, this was the best that could be done. But the necessity of permanence in the office of superintendence and instruction was being felt. The evils of frequent changes had become apparent. The schools had not at all times maintained the prestige they at first enjoyed, nor the pre-eminence to which they were entitled as the pioneer free graded schools of Ohio. In the eleventh annual report, the board declare their conviction that the 'lowest wages' principle was not the best economy, and that such compensation should be paid for superintendence and instruction as would secure the best skill and ability in both departments. Acting upon these views, Mr. T. C. Pooler, a teacher of experience in the State of New York, was employed as Superintendent, at a salary of \$1,000, assisted by Misses M. K. Parsons and H. A. Bernard in the high school. Mr. H. M. Ford, assisted by Miss Coffman, was made Principal of the grammar school. During a part of Mr. Pooler's first year, Misses Angel and Church were his assistants, Miss Bernard coming in the second year. Mr. Pooler retained the position three years, and declined a re-engagement. With him began superintendence and the practice of making annual reports to the board. At this point also begins a change in the school year from the 31st of March, to the 31st of August, consequently this report covers fifty-three weeks of the schools—fifteen in the spring and summer of 1857, and forty weeks from September, 1857, to July, 1858. Hereafter the school year will commence with September. The above statement that with Mr. Pooler, superintendence commenced, must be qualified, for if it commenced it did not continue to any valuable extent. Rule fifth, of the board, adopted September, 1859, provided that 'he shall visit each school at least once in four weeks, and advise and direct the several teachers in regard to classifying and disciplining their pupils.' His reports are practical, and relate to matters with which he is charged. The statistics of enrollment and attendance show an improving condition in these regards.

"The engagement of Mr. I. P. Hole as Principal of the high school and Superintendent commenced September, 1870, at a salary of \$900 a year, and continued until September, 1868, during which period his salary was from time to time increased, until it reached \$1,500.

Besides this substantial approval by successive boards, Mr. Hole was cordially indorsed, as reports and resolutions of the Board abundantly show. His report as Superintendent was published during the first six years of his engagement, and are useful for the information they contain of the condition of the schools. The average attendance for all the schools is 91 per cent for the year 1866, while for the years 1863 and 1864 it is 78 per cent. The tables accompanying his reports show an increase in enrollment and attendance during this period, and they also show that the number attending the high school as steadily diminished. In 1860 and 1861, the total enrollment in that department was 141; monthly membership, 83, and average daily attendance, 63, while in 1865 and 1866, the total enrollment was 67; monthly membership, 44; average attendance, 41. * * * The schools had become crowded. Six primaries taught during the fall of 1865, and seven during the winter and spring following, had an enrollment of 724 pupils; one secondary school, employing three teachers, enrolled 216, and the grammar school, with three teachers, enrolled 156 pupils. The high school, with an enrollment of 67, employed one teacher regularly, one about half of the time, and the Principal something over one-half. Of all these schools, except the high, he has words of unqualified praise, and of that he says, 'decorum seems to forbid that I should speak.' He makes honorable mention of Mrs. Coburn, who had been associated with him in that department six years, and had resigned, 'as deserving to be held in grateful remembrance by the people of Akron, and the hundreds of young persons whom she had served so earnestly and faithfully.' Rule 13 of the Board, adopted September, 1859, defining the duties of Superintendents, says: 'He shall hold a meeting of the parents at the commencement of each school year, or oftener, and address them in reference to their school duties and obligations.' He did not restrain himself to 'such facts connected with the operation of our public school system as may be of general interest to the community,' but sometimes expressed himself at large on the duties of parent and citizen. In his report of 1863, he notices the assumption of parents and teachers that when pupils have memorized the text-books put into

their hands, 'that their work has been well done.' This assumption he says, 'stops too short,' and he proceeds to elaborate his views of the processes of the mind in acquiring knowledge through eight successive and distinct operations, from impressions on one of the five senses, to reason, 'the most important characteristic of rationality.' The moral tone is always good. The report of 1864 contains the first notice of graduation from the high school. Miss P. H. Goodwin, of Akron, is the graduate of this year. We find no published reports of the board or of Mr. Hole, as Superintendent, for the last two years of his connection with the schools, and the history of his period of principalship and superintendence substantially closes with September, 1866. In February, 1868, he tenders his resignation. The board passes a resolution of confidence, 'earnestly invokes the confidence and support of the community as being eminently due to those having charge of our public schools, as Superintendent and teachers, and as at present advised, decline to accept the resignation.' In December, 1865, the board assumes the control of the Spicer Addition to the Akron School District, with about one hundred pupils, and in 1866, enters upon the enlargement of the high school building, by the addition of two wings, with two schoolrooms to each wing, and recitation rooms adjoining. An enlargement of school accommodations had become a necessity, and to meet this expense a loan of \$15,000 was authorized by the board in May, 1867, and, in April, 1868, bonds in that amount were provided for by resolution of the board.

"Before entering upon a new period of management and administration of the schools, there are certain points of interest in the past which deserve to be noticed. In the second year of the schools, instruction was given in Latin and Greek languages, and in the fourth year, classes and teachers were commended for thoroughness of training in those branches, as well as for others taught in the high school. When these were dropped does not appear, but probably during the suspension of the grammar school. We have seen the stand taken by the board in 1858 in reference to these branches, but, in August, 1865, Latin and Greek were again admitted by resolution. Tardiness and irregularity of attendance are a grievance from the first organization of the

schools—the refrain of every report down to 1865. Sometimes the remedy was supposed to be with the parents, and sometimes with teachers or pupils, or all combined. The expedient is tried of closing the doors against pupils a few moments after the hour for opening has arrived, and shutting them out until recess. This did not cure the evil. In 1864, three absences during one month were visited with suspension, and boards at succeeding meetings heard and granted restoration. This rule worked better. It put parents to inconvenience; made them feel the power of the board, and to see that Boards of Education had rights. In 1847–48, the percentage of attendance in the primaries was $55\frac{1}{2}$; in the grammar school, 88 per cent; while in 1866, the percentage of attendance reached 90 per cent for the schools. This improvement became a matter of gratulation with boards and Superintendents. In the report of the board for 1861, jets of humor for the first time appear in these documents. As a Board of Education of Akron, after fourteen years' experience, may be supposed to know something of boards and teachers in general, this board may be allowed to speak on the subject. Of the numerous applications for places as teachers in our schools, and the qualifications, or rather the want of them, which many of those applying exhibit, the board says: 'Without heads or hearts for the teacher's work, come the Jeremy Diddlers, out at the elbows, and the Flora McFlinseys, with nothing to wear, seeking the salaries of the schoolroom to mend their coats and failing fortunes, and to enlarge their scanty wardrobes. Teachers and boards are often sadly at fault in their anatomy of the soul and body of the young. They would define a pupil to be a boy or girl from five to twenty-one years of age, having no heart to make better or keep pure, no bones and joints to grow strong and shapely, no muscles to train and develop to flexibility, no taste for the beautiful to be cultivated, but only a head to be filled with syntaxes and prosodies, with ratios and quantities, with ologies and osophies—only this and nothing more. Herbert Spencer's work on "Education" should be added to the library of all who give or accept this definition of a pupil.' Whether it was the expression of an abstract opinion by the board, or whether it was suggested by the state of things then

existing in the high school does not appear, but they say in substance that, inasmuch as the high school had taken the place of the academy and seminary, where attention was paid to ethics and the proprieties of social life, the high school 'should care somewhat for these things.' In 1859, a course of study was prescribed. For the grammar and high school it was a three-years course. There were to be exercises in singing daily by the pupils who could sing. Music was not a branch of instruction, but an exercise. Moral instruction and attention to manners are enjoined upon the first division of the secondary, and in the grammar school, oral instruction in manners and behavior was to be given daily. The board regards its work with favor, and says 'the prominence which it assigns to moral culture, to drawing and to music, heretofore much neglected, will meet with the approbation of all whose approbation is worth having.' Two years later, the course of study was revised—that for the high school enlarged to four years, and the same prescription as to manners and behavior in the grammar school continued. Why this discrimination does not appear, for the board, as we have seen, this year suggested that these matters were being neglected in the high school. To all that the board enjoins in regard to 'morals, manners and behavior,' it may be objected that they 'stop too short.' Standards vary with persons and places, and what the ideal of this board was as to what constituted good morals and manners is left to conjecture. The ninth section of the act for the support and better regulation of common schools in Akron made provision for periodical visitation of the schools by persons to be appointed by the Council and Mayor. With thorough and systematic superintendence of the schools, there would be little or no need of these visitations; but that period had not yet arrived. Rev. S. Williams was appointed school visitor under that section of the law, and made, in the years 1858 and 1859, his reports to the Council, which were published, and, so far as appears, were the first official visitations made. Mr. Williams was a man of culture and of much experience as a teacher, and competent for the work he undertook. He was too kindly and urbane in manners for trenchant criticism, but he discriminates with candor, and leaves the

reader of his reports means of an opinion as to excellences and defects of particular schools. He marked the absence of historical studies from the grammar and high school, and, in the year following, we find history in the course of study for those departments. With the fifteenth annual report of the board is published the report of R. O. Hammond, Esq., as school visitor for that year. His report shows the value of independent criticism and observation of the conduct and management of the schools. He commends warmly and censures unsparingly. He says: 'The board say in their report that mental philosophy, political economy, moral science and evidences of Christianity are taught in the fourth year. *But they are not taught.* And yet there is no good reason why they are omitted.' He urges the cultivation of vocal music. 'This, in my judgment,' he says, 'should be taught in our schools as a component part of daily instruction. I mean that the principles of music should be taught—taught as a science. In this way, at a small expense, singers with well cultivated voices, able to read music readily, may be fitted for the choir, the concert and the parlor.'

'The school year beginning September 1, 1868, was the beginning of a new period in the history of the Akron schools. Akron had become a city. Its school population numbered 3,007. The growth and promise of the place had brought in new men, and with new business success and prosperity, larger and more liberal views had come to prevail. Akron had no institution or interest it cherished as it did its schools. They had acquired a sure footing in the regard and affection of the people. The report of the board by its President, Dr. Bowen, shows this by its tone of cheerful assurance. Mr. Hole and other teachers of the high and grammar schools had resigned, and it became the duty of the board to fill their places. 'They cast about for teachers who had attained a high rank in their profession, and were known by competent judges to have come honestly by their good reputations.' There were not many such, and the demand was large. 'Other Boards of Education were abroad as bidders, and having made selections, based, as was believed, on a full fitness for the work to be done, it remained for us to pay such prices as would take the teachers we wanted from other bids, and bring them to our schools, instead of allowing them

to go elsewhere.' This is frank, free from tone of apology, and the board is to be commended for carrying out so good a programme. Mr. Samuel Findley, a gentleman of good scholarly attainments and ripe experience as a teacher, was secured as Superintendent; Mrs. N. A. Stone, of State-wide reputation as a teacher and disciplinarian, was put in charge of the high school, and Miss Herdman, a teacher of much experience and rare excellence, was put in charge of the grammar school. At the close of the year, the board was justified in saying of the work done, that it was well done. Mr. Findley had shown rare executive ability. The leading features of an improved management of the high school, under Mrs. Stone, assisted by Misses Saunders and Trowbridge, 'were thoroughness in preparing the lesson, an animated, accurate and full recitation of it, and more of polite deportment.' The grammar school, under Miss Herdman, assisted by Misses Voris and Worthington, 'has become a well-behaved room, where decorum prevails, and where lessons are thoroughly studied and well recited. Never in all its life has its order been so good and its teaching so thorough.' The primary schools also were well taught. The board makes a financial exhibit for the year ending September 1, 1869, showing a total of disbursements of \$32,763. Of this amount, the salaries of Superintendent and teachers were \$14,002.50; building sites, building and repairs, \$15,752.60; fuel and other contingent expenses, \$2,907.98; total receipts, \$35,553.34. * * * * * For the work Mr. Findley has shown rare fitness and ability. With great firmness he unites courteous manners and an openness of mind to what is new and also good in school management and instruction. He found it necessary, early in the year, to reduce the eleven primary school districts to six, giving two schools to each district, except one, and making two grades of primary scholars. By this change, the teaching force was nearly, if not quite, doubled, without any increase in the number of teachers, or in expense. With this came a course of study for the primary and grammar schools, of four years in each department. Text-books are excluded from the primaries, except readers, and the school hours of the lowest grade reduced to four. There are to be monthly written examinations in the high and grammar schools. English literature takes

its place in the high school, and vocal music becomes a speciality of instruction in all departments of the central building. Drawing, heretofore neglected, 'has been promoted to the rank of a regular study,' and runs through the grammar and lower grades. Morals and manners run through the three first years of the primary course in this specific form: 'Inculcate reverence and love for God as the Great Father of all, obedience to parents and teachers, and a kind, forgiving spirit toward brothers and sisters and schoolmates. Guard against rudeness of manners, and suppress profanity and other immoral practices.' This is a rule on the subject of moral instruction of all the schools: 'It shall be a duty of the first importance on the part of the teachers, to exercise constant supervision and care over the general conduct of their scholars; and they are especially enjoined to avail themselves of every opportunity to inculcate the observance of correct manners, habits and principles.' Results for the first year must be regarded as satisfactory. The percentage of punctuality in no school falls below 96, and in many of them reached 98 and 99, and the average for all was 98.4. The percentage of attendance on average number belonging, for all the schools, was 93.1, and but two fell below 90. How much of this was due to the steady toning up of the Superintendent, is best known to the teachers.

"Reports of the board and Superintendent, after the year 1869, are for the school years 1871-74-75. The board reports are plain and intelligible statements of the financial condition and transactions of the board and the general state of the schools. In 1870, there were paid for building, repairs, furniture, etc., \$17,412; and, in 1874, for sites and buildings, \$17,200. In 1871, the primaries are crowded, and the necessity pressing for additional accommodation for the present and increasing population of the city. The board has settled upon a plan of systematic enlargement of school structures, which is thus explained in the report of G. W. Crouse, Esq., President of the Board: In providing additional buildings, it is the present policy of the board that each additional school building erected shall be part of a general plan, which shall have for its object the supplying of each section of our city with a suitable school building, located centrally with reference to the part

of the city it is designed to accommodate, and which shall contain not less than six rooms.' The estimated cost of such structures was \$15,000, and, in pursuance of this plan, the North Broadway building has been enlarged to the capacity above named, and the school edifices known as the Perkins and Spicer, have been erected and occupied. The estimated value of all school property, in 1874, was \$136,000. To this is to be added the Spicer Schoolhouse, since built, estimated at \$25,000. In the report of this year, by Lewis Miller, Esq., President of the Board, attention is called to the fact that, about twenty-eight years ago, the experiment of free graded schools was authorized in Akron, by special act of the Legislature, and that about a year since the Legislature, by general act, had extended the principle to all the public schools of the State.

"In the year 1872, Middlebury became a part of the Akron School District, bringing with it 163 pupils, and the Board of Education, from 1872, consisting of twelve members, instead of six, as formerly. The reports of the Superintendent that accompany these reports of the board are instructive reading. They relate to matters that come under his official supervision and are within the legislative sphere of the board. He carefully considers what he says, and gives trustworthy information and matured opinions on educational matters. The following summaries from the Superintendent's tables, contain evidences of good condition and healthfulness. The averages are so high that they leave little room for improvement in that line:

1874—Number of youth between six and twenty-one.....	3,809
1875—Number of youth between six and twenty-one.....	3,964

Number of schools:	
High school.....	1
Grammar schools.....	8
Primary schools.....	24
Teachers in high school.....	4
Teachers in grammar schools.....	13
Teachers in primary schools.....	24
Music teacher.....	1
Average number of regular teachers.....	40.3

Average number of pupils in daily attendance at	
High school.....	111.8
Grammar schools.....	513.8
Primary schools.....	1,128.8
Total average daily attendance.....	1,754.4

The percentage of average daily attendance on the average number belonging

In the high school.....	95.6
In the grammar schools.....	94.8
In the primary schools.....	95
In all the schools.....	94.9

“The number of graduates from high school prior to 1869, beginning in 1864, were 15; in 1869, 5; in 1871, 4; in 1872, 17; in 1873, 11; in 1874, 16; in 1875, 18.

“The course of study adopted in 1869 has been adhered to. The high school course has been cut down to three years, and the scholars of the A Grammar Grade, who have been hitherto included in the high school have been confined to their proper department. Written examinations are twice a term instead of monthly, and promotions twice a year instead of annually. School hours have been reduced to five. Musical instruction runs through all grades, and is in the hands of a specialist in that department. ‘The lessons in music,’ he says, ‘are given daily, and occupy from fifteen to thirty minutes, according to the age of the pupil. The instruction is thoroughly graded, commencing in the lowest primary grade with the simplest exercises in distinguishing and making musical sounds, and advancing by regular gradations to the practice of classic music in the high school.’ As Mr. Findley declares himself an original skeptic on the subject of musical capabilities, he may be allowed to state his conversion in his own words: ‘Before investigating the subject and hearing the testimony of those who had made the experiment, I shared in the common belief that musical talent is a special gift, and that only the favored few have it in sufficient degree to make its cultivation desirable. That this is a fallacy has been amply proven. Nothing else in all my experience, in connection with the work of instruction has given me such enlarged views of what is attainable in the direction of the cultivation of the human powers. We can fix no limits to the possibilities of human culture.’

“The competence of women for instruction and discipline has been fairly tried in the Akron schools, and the results thus stated in the report of 1874: ‘The average number of regular teachers employed was thirty-seven—*all women*. I have no hesitation in saying, that the experiment we have made the last six years in employing none but women as regular teachers in our schools, has been eminently

successful.’ Moral and religious instruction is a subject which undergoes discussion in these reports. The views entertained on this subject by successive boards and Superintendents may, so far as they have given them expression, be briefly stated. In the second year, the moral nature is recognized as of equal rank with the intellectual. But this cannot have been a sentiment rather than a conviction, though it led to no definite provision then and there for the moral nature. With teachers of the right ethical tone, the whole matter of ‘morals and manners’ in schools might, with safety, be left, and this is where the early boards seem to have left them. In the tenth year, came the rule for the qualified reading of the Bible as an opening exercise. In the twelfth year, ‘moral culture,’ heretofore neglected, or but little cared for, ‘was assigned a rank with drawing and music.’ In the fifteenth year, Mr. Hole gave ‘moral training’ a prominence, and introduced Cowdery’s ‘Moral Lessons,’ but the board protested ‘that nothing sectarian has been introduced into your schools—nor any sectarian practice permitted.’ All Mr. Hole’s convictions inclined him to do in the schools whatever could be done for the moral nature, and the twelfth board quotes this with approval: ‘It has become quite evident that moral education, not occasional and irregular, but systematic and thorough, is entitled to a fixed position in every system of instruction.’ We share the surprise and conviction of Superintendent Findley, as expressed in his report of 1869: ‘It seems strange that any attempt should be made to divorce intellectual and moral culture. The two are inseparable. Our moral and intellectual faculties are so closely allied as to be scarcely distinguishable to our consciousness; at least, life’s intellectual activities and pleasures find their culmination and fulfillment in the moral. The moral is the pinnacle of our whole being. A man is whatever his heart is. His faith, his love, his purposes—these determine his character.’ He touches the key-note to the whole great question of the Bible in the public schools, in the above passage, and others in the same and subsequent report: ‘It is not so much what the teacher *says*, as what he *is* and *does*, which effects for good or evil the future lives and characters of his pupils. All the moral and religious influences of the school which is of any worth must come as an

emanation from the teacher's character and life.'

* * * * *

"In his report of 1874, the Superintendent called the attention of the board to the necessity of employing untrained and inexperienced teachers, as the greatest evil with which they have to contend, without, however, suggesting at that time any remedy. It is but one step from the discovery of an evil or want, to the invention and application of a remedy. The remedy in this case is simple, and consists in the conversion of the new Spicer building into a training or normal school. Young ladies, graduates of the high school, without experience in teaching, are employed, nominal salaries for the first year, and set to teaching. Over them is placed a teacher of tried skill and ability in the instruction and government of schools, who oversees and directs the work of the new teachers. It is an experiment which has been entered upon during the present year, and has the merit of originality and simplicity, with a promise of good results. * * * *

* * * * * Certain results have been reached, which are a promise of good fruits in the future. One of these is a demand for a higher education, as shown by the increased attendance upon the high school, which amounts for the six years ending January 25, 1875, to 234 per cent, while the increase in all the schools has been 50 per cent for the same period. That the supply has kept pace with the demand, may be seen in the fact that, at the close of the spring and summer term of 1874, four boys of the Akron High School passed creditable examinations for admission to Western Reserve College, and three of them entered that institution the fall following. Three of the four were prepared wholly under Miss Oburn, assistant in the high school, and the fourth in part. Another gain is the punctuality of attendance, and the substantial cure of tardiness and irregularity. This subject is referred to in the report of 1871, which says: 'Irregular attendance and tardiness have become unpopular with the pupils themselves, and the majority of parents appreciate the importance of punctual and constant attendance.'

"Miss Herdman remained in charge of the Senior Grammar School with the same eminent success that marked her first year, until the spring of 1874, when she withdrew on account

of ill health, and died in the November following. Her Superintendent says of her: 'Her strength of character, combined with fervent affection and genial humor, gave her great power over her pupils. She governed by the strength of her own character, rather than by the inflictions of pains and penalties.' Miss P. H. Goodwin, for many years an assistant in the high school, paid a touching tribute to her memory in a paper read before the teachers' meeting: 'She has given to us an example of a true teacher, wrought out before our eyes in characters of light—a grand six years' object lesson that increases in significance as we study its harmony of parts.'

"Mrs. N. A. Stone continued in charge of the high school as Principal until the close of the school year, 1873, a period of five years, with the same success and ability which marked her first year, and then resigned for a year of rest and travel. She was succeeded by Miss Maria Parsons, who still holds the position, and is eminently faithful and successful in it. Many teachers in the Akron schools, not already named, have attained a high degree of success; but for a long and faithful service of sixteen years, Mrs. M. L. Harvey deserves honorable mention. During the first ten years of the schools, the labor of supervision, now performed by the Superintendent, was thrown upon the Board and Examiners; and for the faithful and valuable services, the three first Presidents of the Board, Messrs. Bierce, Carpenter and Howard, and the three first Examiners, Messrs. Carpenter, Berry and Smith, deserve to be honorably remembered; especially Gen. Bierce, for eight years of service on the board—six of these as President; and Judge Carpenter, for four years of service as member of the Board of Examiners—who gave to the schools in that period of construction and organization, the full benefit of their practical ability and generous public spirit.

"The first death that occurred in the board was that of Dr. Joseph Stanton, in the year 1855, of whom the board of that year say: 'In his death the board has lost a valuable member, the State an honorable citizen, and the cause of education an earnest friend.' The death of Houston Sisler, member and late Treasurer of the board, is announced in the report of 1861-62, and of him the board say: 'We can bestow no fitter eulogy upon him than to say that he

was an honest, intelligent and conscientious man, just to himself, and just and generous to his neighbors.' The death of J. K. Holloway is recorded at a meeting of the board April 18, 1874, and in him the board 'mourn the loss of a valuable member, a congenial companion, an esteemed friend, and useful citizen.' The following have been Presidents of the Board of Education of Akron for the periods named: Gen. L. V. Bierce, six years; Judge J. S. Carpenter, two years; Dr. E. W. Howard, two years; C. B. Bernard, two years; Rev. S. Williams, three years; M. W. Henry, two years; Dr. I. E. Carter, two years; Dr. William Bowen, one year; Judge S. H. Pitkin, two years; George W. Crouse, two years; Lewis Miller, two years; Dr. Thomas McEbright, one year. There was fitness in the choice of these gentlemen as presiding officers of the board."

This closes the sketch of Judge Bryan, and but little more can be said of the public schools of Akron. In the foregoing, their history has been traced from a period when they were in a "chaotic state" to their present perfection. We will add but a few names and statistics. The following is from the last report of the Board of Education to the County Auditor:

Balance on hand September 1, 1879.....	\$26,423 32
State tax.....	6,697 50
Irreducible fund.....	429 37
Tax for school and schoolhouse purposes.....	35,953 76
Amount received from sale of bonds.....	5,000 00
Fines, licenses, etc.....	1,282 50

Total receipts.....\$75,795 45

Whole amount paid teachers in common schools.....	\$27,507 50
Paid manager or Superintendent.....	2,000 00
Paid for sites and buildings.....	9,641 25
Interest on redemption of bonds.....	26,486 67
Paid for fuel and other expenses.....	9,892 39

Total expenditures.....\$75,527 81

Balance on hand September 1, 1880. \$ 267 64

Total value of school property.....	105,000 00
Number of teachers employed.....	56
Average wages paid teachers per month.....	\$49 00

Pupils enrolled:

Primary—males 1,448; females 1,417.....	2,865
High—males 61; females 129.....	190

Total.....3,055

Average daily attendance:

Primary—males 1,154; females 1,121.....	2,275
High—males 48; female 102.....	150

Total.....2,425

The following is the roster of teachers* for the present year (1880-81), according to the grade or department in which they are employed: Prof. Samuel Findley, Superintendent of Instruction. High School: Wilbur V. Rood, Principal; M. J. O. Stone, Assistant; M. A. Strong, Assistant; M. E. Stockman, Assistant; Ira Baird, Assistant. Grammar Schools, Grade A—J. A. Newberry, Principal; M. M. Parsons, Assistant. Grade A and B—N. J. Malone, Principal; Lizzie Bowers, Assistant. Grade B—S. A. Hillis, Principal; Estelle Simmons, Assistant. Grade C—Mary Baird, Principal; Carrie Allen, Assistant. Grade C and D—Clara Hemmings, Principal; Carrie McMillan, Assistant. Broadway School: Sarah C. Lake, Principal, and teacher of D Primary; M. C. Andrews, D Grammar; Lida M. Dussell, A Primary; Lillie Rice, B Primary; Lillian Walters, B and C Primary; Libbie Fish, C Primary. Crosby School: Ida B. Foote, Principal, and teacher of C and D Grammar; Rilla Boardman, A Primary; S. P. Bennett, B and C Primary; Malana Harris, C and D Primary. Perkins School: S. I. Carothers, Principal, and teacher of D Primary; Hattie A. Sill, D Grammar; H. E. Applegate, A Primary; M. A. Bennett, A and B Primary; Helen Fisher, B and C Primary; Mary A. Sill, D Primary. South School: Jennie E. McLain, Principal; Alice V. Chisnell, D Primary; N. E. Brown, C Primary; Libbie Berg, B Primary; Carrie Jones, B Primary; Addie Hamman, A Primary; Anna Hollinger, D Grammar; Mary Cochran, C Grammar. Spicer School: M. L. Macready, Principal, and teacher of C and D Primary; Fannie Sisler, C Grammar; Maggie T. Bender, D Grammar; Kate L. Palmer, A Primary; Julia L. Allyn, A and B Primary; Nellie L. Wilcox, B Primary; Lillian A. Randolph, C Primary; M. Elma Campbell, C and D Primary. Sixth Ward School: Ada M. Kershaw, Principal, and teacher of C and D Grammar; M. K. Pearce, A and B Primary; M. E. Miller, B and C Primary; Eliza Skidmore, D Primary. Bell School: Sarah J. Bardsley, C and D Primary. South Hill School: Clara Chisnell, C and D Primary.

* Corrected and revised by Prof. Findley.

J B Tappin

Teacher of vocal music (two days each week), N. L. Glover. Teacher of writing and drawing, Mary E. Bradley.

The Board of Education at present (1880-81), comprise the following gentlemen: First Ward, Thomas McEbright, W. B. Raymond; Second Ward, S. M. Burnham, W. C. Jacobs; Third Ward, A. M. Armstrong, Lewis Miller; Fourth Ward, E. W. Wiese, N. N. Leohner; Fifth Ward, F. L. Bishop, F. L. Danforth; Sixth Ward, J. A. Baldwin, H. J. Griffin, with Thomas McEbright, President of the Board; E. W. Wiese, Secretary, and W. B. Raymond, Treasurer. The term of service of the present board will expire in April, 1881, but not in time for any changes that may occur to be corrected for this work.

Buchtel College now claims our attention. The following excellent sketch was written by Rev. Orello Cone, D. D., President of the institution, at our special request, and is given in full. President Cone notices the founding of the college, and traces its history down to the present time. His sketch is as follows:

The founding and establishment of Buchtel College, in the city of Akron is due to a movement which originated with the Universalist Church of the State of Ohio. In the year 1867, the Ohio State Convention of Universalists, composed of the clergy of the State, and representatives from all its parishes, heard a report from its Committee on Education in favor of establishing a Seminary for the education of the young of both sexes. At the next annual session of the convention, in June, 1868, a plan for the establishment of an academy was presented by Rev. Andrew Willson, and unanimously adopted. This plan was not, however, carried out, and, in 1869, the convention reconsidered its former resolution, and authorized the Board of Trustees and Committee on Education to take the necessary steps for the establishment of a college. The Board of the Convention then consisted of Rev. J. S. Cantwell, Rev. Andrew Willson, Rev. H. L. Canfield, Rev. J. W. Henley and O. F. Haymaker, Esq.; and the Committee on Education of Rev. E. L. Rexford, Rev. M. Crosley and Rev. B. F. Eaton.

In view of the near approach of the One Hundredth Anniversary of the Universalist Church of the United States, it was desired to make the new college the centennial offering of Ohio. Accordingly, at a joint meeting of the above-mentioned board and committee,

held in November, 1869, Rev. H. F. Miller, of Indiana, was invited to become their Financial Secretary, to supervise and direct the raising of the money necessary for buildings and endowment. Mr. Miller accepted the invitation, and entered upon the duties of his office in January, 1870.

Petitions from several places praying for the location of the college were received and considered by the board, and finally at a joint meeting held in Columbus, February 16, 1870, the location was fixed in Akron on the condition that the citizens of Summit County legally secure \$60,000 to the State Convention of Universalists. In pursuance of this offer, a prompt and vigorous effort was made at Akron to secure the location of the college in that city. John R. Buchtel led off with a subscription of \$25,000 for the endowment fund and \$6,000 for the building. He was followed by others so that on the 31st of May, 1870, the Financial Secretary was able to report to the Board of Trustees and Committee on Education that the \$60,000 necessary to secure the location of the college at Akron had been subscribed. This body then in a joint meeting on the above-mentioned day, passed a resolution locating the college which was then called the "Universalist Centenary School of Ohio," in the city of Akron, and named as "corporators" to act in conjunction with itself, Rev. H. F. Miller, Rev. Willard Spaulding, Rev. George Messenger, Henry Blondy, Esq., and the following resident freeholders of Summit County: John R. Buchtel, Hon. N. D. Tibbals, E. P. Green, Esq., Col. George T. Perkins, James A. Lantz and George Steese, Esq.

The steps prescribed by the laws of the State of Ohio for the organization of the corporation were then taken, and articles of association were drawn up and adopted. The association which took the name of "Buchtel College" and organized "for the establishment and maintenance of a college of learning for both sexes, to be under the control of the Ohio State Convention of Universalists," was composed of John R. Buchtel, Rev. J. S. Cantwell, George T. Perkins, Henry Blondy, Rev. George Messenger, Rev. B. F. Eaton, N. D. Tibbals, Rev. J. W. Henley, E. P. Green, O. F. Haymaker, Rev. Willard Spaulding, James A. Lantz and George Steese. It was made the duty of these to elect a Board of eighteen Trustees, five of whom

should always be resident freeholders of Summit County, and who should be the directors of the college with power to make all necessary by-laws, erect suitable buildings, etc. It was provided that after the first election of Trustees by the corporators, the Ohio State Convention of Universalists should at each annual session nominate at least fifteen persons whom they may think to be suitable for the office of Trustees, and that the acting Trustees should from the persons so nominated make all elections and fill all vacancies.

The first board elected was composed as follows: For three years, John R. Buchtel, President, H. Blondy, Philip Wieland, J. D. Auger, E. P. Green, George T. Perkins; for two years, Rev. H. L. Canfield, Rev. E. L. Rexford, Gen. James Pierce, J. F. Seiberling, Rev. J. S. Cantwell, Hon. N. D. Tibbals; for one year, O. F. Haymaker, S. M. Burnham, Secretary; J. R. Cochrane, Charles Foster, Rev. George Messenger, Avery Spicer. George W. Crouse, not a member of the board, was appointed Treasurer.

As early as the next meeting of the board, December 28, 1870, it was voted that the Financial Secretary be authorized to make contracts for perpetual scholarships at \$1,000, and a committee was appointed to prescribe a form of contract for such scholarships. It was not, however, until November 19, 1872, that the report of this committee was made to the board, when the form of contract presented was adopted. According to this form, the donor agrees to pay at his decease the sum of \$1,000 to found and secure for himself and heirs a perpetual scholarship in Buchtel College, and agrees to pay interest annually on this sum, at a rate per cent to be agreed upon when the contract is signed. This rate of interest has generally been fixed at 6 per cent. The privileges of these scholarships were limited, by action of the board, to the regular courses in the college and preparatory department, and may be used to defray the expenses of "tuition and room rent as defined by the catalogues," but do not "include any extras therein specified."

On the 28th of December, 1870, plans for the college building were submitted to the board by the architect, Thomas W. Lilloway, of Boston, and a building committee of seven was appointed to proceed with the construction of the edifice according to the plan adopted. The building was located on an eminence overlook-

ing the city of Akron, and said to be one of the highest points of land in the State. On the 4th of July, 1871, the corner-stone was laid with appropriate ceremonies, and an address was delivered by Horace Greeley, on "Human conceptions of God as they effect the moral education of the race." The address was a masterly advocacy and defense of Theism in opposition to the spirit and tendency of an atheistic materialism. At no time, probably, within the next half-century, will the following vigorous words of this great and good man be inappropriate in the contest between these conflicting and apparently irreconcilable forces of modern thought:

"There are those who talk sonorously, stridently of law—of the law of development or progress—as though they had found in a word a key which unlocks all the mysteries of creation. But I am not silenced by a word; I demand its meaning, and then seek to determine how far that meaning bridges the gulf which the word was invoked to overleap. To my apprehension law is the dictate of an intelligent will, or it is nothing. That it should please the Author of all these things to make each material body to attract every other in a ratio proportioned to their relative weight, and with an intensity corresponding to their distance from each other, I readily comprehend; that such attraction should inhere in and be inseparable from matter as an unprompted impulse, an inevitable property, I cannot conceive. To my apprehension gravitation, magnetic attraction, electricity, etc., are properties of matter which in themselves afford proofs of creative purpose—of Omnipotent design. In short, whatever demonstrates the presence of law in nature attests the being and power of God."

It can hardly be out of place in the history of the foundation of a college, to quote Mr. Greeley's estimate of the function of this class of public institutions:

"This, then, I apprehend, is the proper work of the college: To appreciate and measure, and undistrustfully accept and commend, the gigantic strides which physical science is making in our day, yet be not swept away by them; to lend an attentive and unprejudiced ear to the bold speculations of our Darwins and Huxleys, wherein they seem almost to lay a confident finger on the very heart of the great mystery of life, without fear that they will ever

evict God from His universe, or restrict Him to some obscure corner thereof; to welcome all that is true and beneficent in the impetuous currents of modern thought, but not to exaggerate their breadth and depth, nor accept their direction as authoritative and final; to proffer a genial and gracious hospitality to whatever is nobly new, yet hold fast, and from time to time assert, the grand old truths which are grounded in the nature of man and his relations to the universe, in the firm assurance that no discoveries in science, no advances in human knowledge, can ever invalidate or ever belittle the Golden Rule, and no conclusions of philosophy ever equal in importance that simple affirmation of the untaught Judean peasant, who long ago perceived and proclaimed that *GOD IS LOVE.*"

Rev. T. B. Thayer, D. D., of Boston, Mass., having declined a call to the presidency of the college, a call was extended to the Rev. S. H. McCallister, of New Hampshire, in March, 1872, which was accepted. The building was rapidly pushed to completion, and was ready for occupancy in the fall of 1872. On the 22d of September of this year, President McCallister was inaugurated, the college having been opened for the reception of students a few days before. The Faculty was constituted as follows: Rev. S. H. McCallister, A. M., President, and Professor of Mental and Moral Philosophy; N. White, A. M., Professor of Ancient Languages; S. F. Peckham, A. M., Professor of Natural Science; Carl F. Colbe, A. M., Professor of Modern Languages; Miss H. F. Spaulding, L. A., Professor of Rhetoric and English Literature; Alfred Welsh, A. B., Professor of Mathematics; H. D. Persons, Professor in Normal Department; Gustavus Sigel, Professor of Music; Miss Hattie L. Lowdon, Teacher in English.

The number of students registering the first year for the classical course was only seven, of whom six were classified as freshmen and one as junior. These entered for the regular college course of four years. For the short course of two years, called the philosophical course, thirty-nine registered. The academical or preparatory department, numbered 171, making a total of 217, of whom 119 were gentlemen, and 98 ladies. This was the greatest number in attendance at one time during the year.

The large number of ladies in attendance is worthy of notice, as showing the confidence of

the public at this time in co-education. Co-education was, indeed, no longer a novelty in the West, the experiment having been pretty thoroughly tested in Oberlin, Delaware, Antioch College and other institutions. It is proper to add that the experience of Buchtel College up to this time (1881), has tended to confirm its officers in the opinion that the founders of the institution acted wisely in opening its doors on equal terms to both sexes.

At the opening of the college but two courses were established—a classical course of four years with three years of work in the preparatory department, and a philosophical course of two years with preparatory work of three years. The classical course corresponded with that usually pursued in colleges in the United States, and has continued substantially the same to the present time (1881), except that in 1879 it was considerably strengthened in the department of mathematics, so that it is now equal to that of the best colleges in the country.

The philosophical course of two years, with three years of preparatory study was extended to three years in 1874, with two years of preparatory work, and was called the Philosophical and Engineering Course. In 1876, the name was again changed to that of Philosophical Course, when it was extended to four years, with two years of study in the preparatory department. Besides the regular English studies usually pursued in college, it contained the modern languages, and the usual course in natural science, and was especially strong in mathematics. In 1878, this course was discontinued, and, in 1879, it was restored as a four years' college course, with three years of preparatory study, and Latin was substituted in place of the higher scientific and mathematical studies which it had formerly contained. As such it remains to this time (1881), containing the modern languages (two years of German and one year of French), the usual English studies, a thorough course in the natural sciences and mathematics, and most of the Latin of the classical course.

In 1874, a scientific course of three years, with two years of preparatory work, was established, containing, in addition to the usual English, scientific and mathematical studies, all the Latin of the classical course. In 1876, this was made a four years' course, with two years of preparatory work. In 1877, the

Latin work was reduced to Cæsar, Cicero and one session of Virgil. In 1879, it was changed into a scientific course in the stricter sense of the term by excluding Latin, with the exception of one year's work in this language in the preparatory school, in which form it remains to the present time (1881). It has now four years of college and three of preparatory work, and is especially in English and mathematics, including studies in engineering.

It belongs to the history of the college to mention a course established for ladies in 1877 under the name of the Ladies' Literary Course. This was a course of four years, and the preparation required was the ordinary discipline in the common English branches. In 1878, it was made a three years' course, with two years of preparatory discipline, and, in 1879, it was discontinued.

It will be seen that the college courses, as now constituted, embrace (1) the ordinary classical course; (2) a philosophical course, from which Greek is excluded, but which contains most of the Latin of the classical course, English studies, German and French, a thorough discipline in the natural sciences and the mathematics usually taught in colleges; (3) a scientific course, which is without Latin or Greek, but contains French and German and natural science, and is especially strong in mathematics (including studies in engineering) and in English.

The college has been generally fortunate in its Faculty. The changes have been few, and some who began their work with the opening of the college are still members of its Faculty. It has had three Presidents:

1. Rev. Sullivan H. McCallister, D. D., assumed the office at the opening of the college September 11, 1872. He was ordained to the Universalist ministry in 1854; had filled several important pastorates, and been for some years principal of Westbrook Seminary, located at Pevens Plains, near Portland, Me. He won many friends during his administration, which was distinguished by a singular disinterestedness, consecration and devotion to his duties. Dr. McCallister offered his resignation at the close of the college year, June, 1877. It was not, however, accepted until June, 1878, at the annual meeting of the Board of Trustees. He has resumed pastoral work, and is at present settled in Bellows Falls, Vt.

2. Everett L. Rexford, D. D. He graduated in 1865, at the Theological School of St. Lawrence University, Canton, N. Y., and settled as Pastor over the First Universalist Parish in Cincinnati, Ohio. Thence he moved to Columbus, accepting a call to the church in that city. The New Universalist Parish in San Francisco, recognizing his distinguished ability as a pulpit orator, soon after secured his services as Pastor, from which field of labor he removed in 1878 to Akron, and assumed the Presidency of the college, and the pastorate of the Universalist Parish in the city. After two years of service in this double capacity, he resigned, and accepted a call to the pastorate of the New Universalist Parish, in Detroit, Mich., where his abilities as a preacher have won a striking success.

3. Rev. Orello Cone, A. M., D. D. He entered the Universalist ministry from a professorship in St. Paul's College, Palmyra, Mo., in 1862, and was ordained in 1864, as Pastor of a church in Little Falls, N. Y. He was called to the Chair of Biblical Languages and Literature in the Theological School of St. Lawrence University, Canton, N. Y., in 1865, and held this position for fifteen years, when, in 1880, he accepted a call to the Presidency of the college.

The professors and instructors who have served in the college are as follows:

1. Rev. Nehemiah White, A. M., Ph. D. He was a graduate of Middlebury College, Vermont, and was Professor of Mathematics in St. Lawrence University, Canton, N. Y., from 1865 to 1869. He assumed the Chair of Ancient Languages in Buchtel College, on the opening of the institution, and served until the close of the fall session, in 1875, when he accepted a call to the Presidency of Lombard University, Galesburg, Ill., which position he now holds.

2. S. F. Peckham, A. M. He was Professor of Natural Science from the opening of the college for one year, when he accepted a call to the Chair of Chemistry, in the University of Minnesota, where he remained until 1880.

3. Miss Helen F. Spaulding, L. A. She was Professor of Rhetoric and English Literature for one year from the opening of the college.

4. Karl F. Kolbe, A. M. Prof. Kolbe is a graduate of the University of Gottingen, and had already had considerable experience as a teacher of modern languages before he took this chair in Buchtel as a member of its first

Faculty in 1872. He held this position until the close of the college year in 1877, when he assumed charge, for one year, of an academy in Pennsylvania, after which he returned to the Chair of Modern Languages, which he had left, where he has since remained.

5. Alfred Welsh, A. M. He was educated in Baldwin University and was the first professor of mathematics. He held this position for two years and was then made Professor of Natural Sciences, and served in this capacity for one year to the end of the college year in 1875, when he accepted a position as teacher in the Columbus High School, where he still is.

6. Elias Fraunfelter, A. M., Ph. D. He was educated at Vermillion Institute, at Hayesville, Ohio, and was for a number of years instructor in Mathematics and English in that school. In 1866, he was made co-Principal of Savannah Academy, and Instructor in Mathematics, Natural Science and Modern Languages. He was called to the college as Professor of Civil Engineering at the opening of the second year in 1874. The next year he was made Professor of Mathematics (his chair being made to include the instruction in Engineering) in which position he still remains completing this year (1881) his twenty-first year of service as an instructor.

7. Sarah M. Glazier, A. M. She graduated from Vassar College, and immediately accepted a call to the Chair of Natural Science in 1874. After serving in this capacity for one year, she accepted a call to a chair in Wellesley College.

8. Charles M. Knight, A. M. After graduating from Tuft's College he took the Chair of Natural Science in 1876, which he still holds.

9. I. B. Chote, A. M. He was called to the Chair of Ancient Languages in 1876, which he occupied until the close of the college year in 1878. He is at present studying in Harvard.

10. G. H. G. McGrew. He graduated from Harvard and occupied the Chair of Modern Languages during the absence of Prof. Kolbe in 1878.

11. Rev. George A. Peckham, A. M. He graduated from the college in the class of 1875, and was made a Tutor in Ancient Languages and Mathematics in 1876, which position he held for two years. After an absence of one year, as Pastor of a Disciples' Church, he was called to the Chair of Ancient Languages, which position he filled until 1880, when he ac-

cepted a call to the Chair of Mathematics in Hiram College.

12. Benjamin T. Jones, A. M. He was educated at Bethany College, where he was afterward for some years instructor in Ancient Languages. He was for a number of years Superintendent of Public Schools in Millersburg and Ashland. In 1880, he accepted a call to the Chair of Rhetoric and English Literature, and was the next year transferred to that of Ancient Languages, of which he is still the incumbent.

13. Miss Maria Parsons. She graduated from Putnam Seminary in 1857, in which institution she afterward taught two years. She has been employed for some twenty years in the high schools of Zanesville, Mansfield and Akron, in which last she was Principal for seven years. In the fall of 1880, she accepted a call to the Chair of English Literature in the college.

14. H. D. Persons was, during the first year, a Professor in the Preparatory Department, and afterward entered the profession of journalism in Union City, Penn.

15. Miss Hattie L. Lowdon. She was teacher of English in the Preparatory Department during the first year.

16. Wallace Mayo, A. M. He graduated from Tuft's College, Boston, Mass., in 1873, and accepted a call to the Preparatory Department, as instructor in Latin, Greek and other branches, in 1874. He continued until 1876, when he left and went into business in Akron.

16. Miss Mary E. Stockman, L. A. She was called from a chair in Westbrook Seminary, Maine, in 1874, as teacher of Latin and English in the Preparatory Department, and continued until 1876, when she was called to a position in the Akron High School, which she still holds.

17. Miss Susan E. Chamberlain, M. S. She is a graduate of the college, in the Class of 1873, and was appointed teacher in English, in 1874, in the Preparatory Department. In 1879, she was made Professor of Mathematics in the same department, and, in 1881, she was engaged as a teacher of English branches.

18. Miss Jennie Gifford. She is a graduate of the Normal School at Lebanon, Ohio. In 1875, she was engaged as instructor in English branches in the Preparatory Department, and was made Principal of that department and

Professor of Science and Normal Studies, which position she still holds.

19. Miss Mary B. Jewett, A. B. She graduated from the College in the Class of 1876, and was appointed tutor in Latin in the Preparatory Department, in which position she remained until 1878, when she accepted a call to a chair in Hiram College, where she still remains.

20. William D. Shipman, A. M. He graduated from the college in 1877, and became Professor of Ancient Languages in the Preparatory Department in 1878, which position he still occupies.

21. Miss Lizzie N. Slade, A. M. (now Mrs. E. F. Voris) was a graduate of the college in the Class of 1877, and became a tutor in the Preparatory Department during the year 1878.

22. Inez L. Shipman, M. S. She graduated from the college in 1876, and, in 1878, was made a tutor in the Preparatory Department, in which position she remained only during that year.

23. James H. Aydelott, B. S. He graduated from the Normal School in Lebanon in 1878, and became tutor in Mathematics in the Preparatory Department in 1879, entering, at the same time, the Junior Class, and graduating with the same. In 1881, he was made Professor of Mathematics in the Preparatory Department, which position he still holds.

24. Gustavus Sigel was made Professor of Music at the opening of the college, and held the position until 1879.

25. Mrs. E. L. Rexford was made Director of Music in 1879, and held the position until the close of the college year of 1880.

26. Arthur S. Kimball, a graduate of the Boston Conservatory of Music, was made teacher of Vocal Culture and Harmony in 1881.

27. Miss Ella H. Morrison, a graduate of the Musical Department of the Ohio Wesleyan College, was appointed as teacher of instrumental music in 1881.

Buehtel College, it will be seen, is yet comparatively a young institution. It has, however, enjoyed a large share of patronage, and is now thoroughly organized and equipped for complete college work. Its courses of study are equal to those of the oldest institutions in the State, and it has all the usual apparatus and appliances for instruction in its several departments. Among its present Faculty it

reckons instructors of large experience, ripe scholarship and rare skill in teaching and discipline. Its aim is thoroughness and exact knowledge, which it seeks to secure by requiring faithful application and conscientious work of all its students. The results of its training already appear in many of its graduates, who are rising young men in several of the professions. The authorities insist on a strict classification, and aim to encourage and promote the class spirit—the *esprit de corps*—in all the classes, believing that in this way alone can the permanent success of a college be secured, though it may sometimes lead through difficulties, and require the sacrifice of such students as are destitute of strength and resolute purpose. No student is allowed to graduate who has not faithfully completed the course which he has chosen.

The college is under the auspices of the Universalist Church, but is not sectarian in its teaching, nor does it attempt in any way to exert upon its students a doctrinal influence. It aims to maintain a high standard of morals, and insists on dignified, refined and genteel deportment on the part of all under its control. Devotional exercises, conducted by some member of the Faculty, are held in the assembly room at the opening of every day on which college work is done, and students are required to attend every Sunday the church of their choice, or that which may be designated by their parents or guardians. No excuses from attendance at church are granted to minors, except on request of parents or guardians.

Special facilities are offered by the excellent courses in the Preparatory Department for Normal work, and many young ladies and gentlemen intending to follow the profession of teaching in the common and high schools here, pursue the studies preparatory to that work. The Principal of that department is a graduate of a normal school, and has had a large experience in training teachers.

The study of ornamental branches has been provided for, and especial attention is given to vocal culture and instrumental music. Instructors in these departments are permanently connected with the college, and pianos are furnished for practice.

The property of the college, including building, grounds, philosophical and chemical apparatus, furniture, etc., cost originally about \$175,-

000. It has two endowments of \$25,000 each given, one by Mrs. L. A. E. Messenger, in memory of her deceased husband, Rev. George Messenger, and one by John H. Hilton, of Akron. There are also two endowments of \$20,000 each, one of which was given by the women of Ohio and Pennsylvania, to endow a Woman's professorship. Of this amount, \$10,000 were given by Mrs. Chloe Pierce, of Sharpsville, Penn., and the professorship has been called by her name. The other was endowed by J. R. Buchtel, in the name of his wife, Mrs. Elizabeth Buchtel. There are thirty scholarships of \$1,000 each, of which those already productive are paying six per cent per annum. Of these, two were endowed by residents of Summit County—John K. Smith and Mrs. John H. Hilton.

The students have organized three literary societies—the Bryant and Everett, composed of gentlemen, and the Cary, composed of ladies. They all have well-furnished halls, and two of them have already made a good beginning in the accumulation of libraries.

The Greek-letter societies, or inter-collegiate fraternities are represented by two chapters.

Buchtel College is named after its most mun-

ificent benefactor and real founder, Hon. John R. Buchtel. It will appear from his biography, which is given in another part of this volume, that he has devoted himself to the college with singular consecration from its foundation to the present time. He has come to its assistance in every time of need, and has already bestowed upon it more than \$75,000. To its maintenance and endowment he has consecrated his tireless energy and his whole fortune.

Among those who were active and prominent in the foundation of the college, and in its direction down to the present time, are deserving of especial mention Rev. George Messenger, whose counsel was of great value amidst the difficulties attending its establishment; Rev. J. S. Cantwell, whose services as editor of the *Star in West* were unremitting in its behalf, and who has often spoken for it with great effect in public assemblies; S. M. Burnham, for many years its Secretary; Avery Spicer, Hon. N. D. Tibbals, E. P. Green, Gen. A. C. Voris, Joy H. Pendleton, F. Schumacher, Henry Blondy, George T. Perkins, James Pierce, and Rev. E. L. Rexford, D. D., active and efficient member of its Board of Trustees, Executive Committee and Committee on Teachers.

CHAPTER XII.*

MIDDLEBURY TOWNSHIP—FOUNDING OF THE VILLAGE—EARLY INDUSTRIES—CHARCOAL MANUFACTURE—NAMES OF EARLY SETTLERS—INCORPORATION—FORMATION OF TOWNSHIP—ANNEXATION TO AKRON—EDUCATION AND RELIGION.

“O, Country! rich in sturdy toil,
In all that makes a people great;
We hail thee, queen of Buckeye soil,
And fling our challenge to the State,
We hail thee, queen, whose beauty won
Our fathers in their golden years;
A shout for greater days begun,
A sigh for sleeping pioneers.”

THE American people are becoming famous for their love of celebrities. In opposition to the democratic theory of human equality, they have become genuine hero-worshippers, and usually select their idols from the nobler specimens of the race. They are not particular whether the person be dead or in the full vigor of life. So strong has become this sentiment, that the mind

is unsatisfied with homely realities, but seeks faultless conceptions that lie within the magic circle of inspiration. Imagination comes forward and decks the images with the flowering attributes of nobility. The location of the being worshiped, in point of time, depends upon the age of the devotee, his moral and intellectual temperament, and the natural elevation of his soul. The path which men pursue in life, the dark waves they struggle to repel, the placid waters they endeavor to traverse, and their temporal happiness, depends almost wholly upon surrounding circumstances. To the war-like, the names of Alexander and Napoleon will be fresh in the memory forever. Musicians bow in adoration at the grave of Mozart. Poets burst into songs of inspiration over the gothic

* Contributed by W. A. Goodspeed.

bard of Avon. Philosophers view with wonder the logic of Bacon and Aristotle. Astronomers are astonished at the discoveries of Newton and Laplace. Artists stand entranced before the sublime paintings of Raphael or Angelo. The past is filled with venerated beings, many of whom had no just claims of pre-eminence. The untrod paths of future years are partially explored by the feeble light of existing human experience; the present is illumined by the dazzling genius of the progressive man; and the past, is seen in spectral relief through the many sided prism of the soul. The distance that lends enchantment to the view of the past, hides a cold sterility. Ideality takes the limpid clay of beings long since returned to dust, re-creates it in the image of divinity, and breathes into it the breath of life. Contemptible creatures are lifted from among the undeserving, and crowned with the bright flowers of unearned greatness and eternal remembrance. Beings with transcendent virtues pass into obscurity and forgetfulness. The faculty of the human mind to venerate the dead, had its origin in the general results of evolution. It began in its lowest type in primitive and barbarous man, and as it steadily developed, mortals were deified and gods created. Ancestral worship is universal, and has been from time immemorial. The virtues or vices of the dead, as one or the other preponderates, are magnified by the passage of time, thus leading inevitably to hero-worship. The demand for such a sentiment, and its steady and rapid growth when begun, have resulted in its universal development in man, and have changed the whole current of his life. Devotion to God is the highest type of hero-worship. Devotion to ancestors is second in degree of reverence, while the great beings of the present and the shadowy ones of the future, afford perhaps the lowest degree. The fact that history is but a record of the lives of men, and the relation of those lives to the plastic forms of social and political being, renders such a study of vast interest to mankind, in view of the statement that in the past are found the greater number of those heroes who are venerated by the race. Where is the youth who is not told to imitate the virtues of some person long since dead? The existence of near relationship multiplies the loyalty of the race to the departed ancestors. How tenderly we cherish the memory of a parent or other dear friend, who has

been laid at rest in the silent grave. History is the record of our hopes, ambitions, experiences, thoughts, deeds and accomplishments, and, consequently, is the most important study in the curriculum.

But the historian has wandered far from the topic before him, and must retrace his steps. So far as Middlebury has contributed to the history of Summit County, appropriate and ample credit will be given. That it has played the part of a star actor in the drama of the county, becomes evident to those who will take the pains to examine the memorials of its rise and progress. It was at the height of its power and prosperity when Akron was first founded; and at that time was one of the most important trading-points in Northeastern Ohio. Much of its early history was never recorded, and the fact that all the early settlers are dead, transports the subject to the province of conjecture. An attempt, however, has been made to gather the prominent events of early years, with what fidelity the reader is required to determine. A citizen, well known to the people of the county,* writes as follows: "The founder of this village was Capt. Joseph Hart. In 1807, he purchased fifty-four acres of land, including the site now occupied by the village, moved on the farm thus selected, and commenced erecting a mill. He soon after sold one-half of his purchase to Aaron Norton, and the two in company finished the erection of the mill." The building was a one-storied affair, with one run of stone, a large tub wheel, and, from the fact that the Little Cuyahoga, upon which the mill was located, contained three times as much water as at present, it was capable of operating the entire year. Near the spot where it was built, was a natural fall in the stream, of about ten feet. Instead of endeavoring to utilize this fine power, the owners of the mill had built a strong dam about five rods below it, and, at this point, on one side of the stream, was the log grist-mill, and, on the opposite side, a saw-mill, which was built soon afterward. Why the owners did not take advantage of the natural fall of water is difficult to determine. The labor would have been greater, the dam much more insecure, and the cost multiplied, had they done otherwise than they did. At least, these reasons seem to have been in their minds when they selected the mill-site below the fall. A splendid custom work

* Gen. L. V. Bierce.

was immediately secured, and the mill continued to be, until the building of the canal, the most valuable mechanical enterprise in the county. Settlers came for flour to this mill thirty and forty miles, and the Middlebury Mills became famous. No merchant work was done, as, on account of the enormous cost of transportation, it was impossible to compete with those mills near the consumer. The mill was a godsend to all the settlers for miles around, and was the corner-stone of the Middlebury of sixty years ago. After a few years, Mr. Hart died, and his interest went to his heirs. His son, William J. Hart, afterward a prominent man at Middlebury, controlled this interest until about the year 1818, when the settlement of the father's estate having been perfected, the son became the owner of one-half interest in the mill. At this time, about 1818, the old mill was torn down, and a new three-storied frame, 30x40 feet, was erected a short distance above it. Two run of stone were employed, and the vast custom trade was renewed. At the death of Judge Norton, the nature of the mill was altered. The saw-mill was operated successfully until the time when the new grist-mill was built, and was then removed.

It should be noticed that at this time Middlebury did not exist as it does now. Four townships centered at that point, and the village had not been laid out. Heavy forests covered the land, and stumps and trees could be seen in all directions. In about the year 1810, John and Samuel Preston, then living in Tallmadge, purchased a small portion of the land belonging to Mr. Hart, and erected thereon a small frame building, in which was placed machinery for carding wool and fulling cloth. The machinery was simple, and the work was done largely by hand. Few sheep were in the country at that period, but a few years later the carding-mill had all the custom work it could do. Wool was brought to the mill to be carded, after which it was taken to the cabins to be spun and woven into cloth, and then returned to the mill to be fulled and perhaps dressed. The fulling, dressing and coloring were done by hand. These men continued their enterprise until about the year 1820, when Bagley & Humphrey assumed control, and increased the scope of the mill. They purchased machinery for weaving, and employed a first-class weaver of satin. They

manufactured considerable cloth, which was mostly used at home. Some five or six hands were employed. Mr. Almon Brown remembers that he purchased a suit of inferior broadcloth for the consideration of a barrel of whisky and \$2.

One of the industries in early years was a "furnace," erected by Laird & Norton. Considering the meager population in the county at that time, the magnitude of this undertaking was gigantic. More than sixty employes were connected with it in one way or the other. The ore was obtained in Springfield, Copley, Northampton and other townships, and consisted of two kinds—bog-iron ore and kidney ore or stone ore. Large quantities of the latter were hauled by men with teams and unloaded at the furnace. Here it was first burned on log heaps, under which process it crumbled into lumps about as large as a walnut. It was then ready for the melting process. As soon as the molten ore was ready, it was ladled into moldings, and there received its permanent shape. Many large cast-iron kettles were made, some of them containing a hundred gallons. These were sold to the settlers, and used in the manufacture of pot-ash, of which enormous quantities were prepared in the backwoods in early years. Smaller kettles for culinary and domestic purposes were also made. Flat-irons, andirons, chimney jambs and other useful articles were also provided. One of the chief articles manufactured was stoves. These were known as box stoves, or ten-plate stoves. Ten distinct iron plates were cast with holes at the corners, and these were fastened together with iron rods, and sold to the settlers. They were looked upon as the perfection of inventive skill. A house containing one of these, instead of the old fire-place, was supposed to be without a care in the world, and its inmates were regarded as the happiest of mortals. The fuel used in this furnace was almost wholly charcoal. A score or more of men were employed to chop the surrounding forests into cord-wood, and experienced colliers were given control of the subsequent proceedings. Under their direction the cord-wood was placed in great bowl-like heaps, often containing 100 cords, after which the whole was covered with several inches of leaves raked up in the forest. This being done, the entire heap was covered

with some five inches of earth, the leaves serving to prevent the dirt from falling down between the wood. In the center of the heap, a small opening was left, with which air-holes communicated. Here, material was left that fired the kiln after its erection was completed. The fire having been lighted, the blaze slowly ate its way through the heap of wood, under the guidance of the collier, who seemed to know just where it was burning and how rapidly. Care was necessary to prevent the fire from consuming the wood, instead of charring it as desired. A few small air-holes, changed as the charring progressed, were carefully guarded; and when, in the judgment of the collier, the process was completed, all the air-holes were closed, and in a short time the charcoal was ready to be taken from the kiln. Mr. Beardslee, who worked in the furnace for a number of years, says, that a premium of a gallon of whisky was promised the collier for each stick of charred cord-wood he could produce unbroken. Sometimes several were found, in which case the liquor was provided and enjoyed. The kiln was first opened on the lower edge, and, as the wood was yet a mass of glowing coals, the fire had to be smothered before the charcoal could be loaded into wagons and taken to the furnace. This smothering was done by means of the covering of earth, but air must be kept from the interior, as otherwise the wood would be wholly consumed and the kiln a total loss. It occasionally happened that, either from the structure of the kiln or its subsequent management, the wood and labor were lost in the manner stated. A novice would be unable to tell when the burning was finished, and when the fire should be smothered out. Not so the collier. He could tell from several signs, the chief one being the settling of the covering of earth. The owners of the furnace employed, as stated above, some sixty hands in the various departments of mining and hauling the ore, melting it, and from the molten mass manufacturing the desired article, and cutting the cord-wood and burning the kilns and hauling the charcoal. This industry alone would have founded a village around it, as the greater number of the employes had wives and families, who lived in the village. Some twelve or fifteen families lived at the village in 1812, and six or eight years later it had a population of between two and three hundred. Just before

Akron sprang into existence with its gigantic manufacturing interests, the population of Middlebury was almost or quite four hundred, and if the emphatic statements of the early settlers are to be believed, there were no idlers nor loafers.

Another early and important industry was a nail-factory, begun and conducted by the Sumner brothers. The enterprise was begun in 1820, and is said to have been the first "combined rolling-mill and nail-factory" in Ohio. From three to five hundred pounds of nails were manufactured daily. The heavy iron was taken, and, by repeated rollings, given the desired thickness; then, by means of suitable machinery run by water-power, the plates were cut into rough nails, and the heading and pointing process was done entirely by hand, the "header" being able to prepare about one hundred pounds per day. The iron was largely obtained from New York, Philadelphia and other Eastern cities, and was transported to the village at the enormous cost of $12\frac{1}{2}$ cents per pound. This was the cost of transportation alone; four, six, eight and tenpenny nails were manufactured, and, on account of the scanty supply of ready money, the nails, kettles and other articles manufactured in the village became almost a legal tender. These products were exchanged for farm produce, and many a promissory note was given, payable in nails, kettles or agricultural products. The fuel used in the nail factory was charcoal, and many men were employed in this branch of the business. A forge was built on the stream, some distance below the village. The furnace, nail-factory and forge, it is said, were capable of consuming from four hundred to eight hundred bushels of charcoal per day. This fitly illustrates the enormous quantity of charcoal prepared. It was not long before the heavy woods, for several miles around, were leveled with the earth and used in the manner stated. This accounts for the denuded condition of the surrounding country. The nails were sold for about 25 cents per pound, and the enterprise was continued until about the year 1828, and then abandoned. About this time Heine & Sherman owned and conducted a small furnace. They likewise made considerable potash. All the establishments having running machinery were operated by water-power, most of them having large overshot wheels. It

was also about this time that a small machine-shop was erected by Nathan Gillett, Jr., at which cards for the woolen-mills were manufactured, besides other mechanical articles.

When the furnace was closed in about 1828, Dr. Crosby began manufacturing cast-iron plows on a small scale; but soon afterward sold out to Daniel Stewart, who enlarged the scope of the enterprise. The plow was "Wood's Patent," and many were manufactured and sold throughout the surrounding country. A Mr. Graham opened a distillery at a spring a short distance east of the grist-mill. This was about 1811, and terminated in 1815. Considerable liquor was manufactured. Mr. Gillett also conducted an establishment of the same nature, beginning in about 1817. It was continued in operation a few years, and manufactured whisky at the rate of about eight gallons per day. All this found a speedy home consumption, selling at from 15 to 25 cents per gallon, largely in trade. During all these years, whisky was imbibed by everybody, and the most respectable people were often engaged in the manufacture that is looked upon with so much disfavor at present. It is stated that all the leading merchants at Middlebury, in early years, kept a keg of whisky on their counters, at all times, for the free indulgence of customers. A tavern without a bar-room was a novelty that met with comment and criticism, if it did not meet with studious avoidance from the traveling public. In truth, taverns of this character were compelled to suspend business from a lack of patronage. Abstainers were careful not to adopt the occupation of hotel-keeping. Samuel Newton erected a large hotel in about 1817, and continued to entertain the public for many years. His old building was burned down but a short time since. He, on one occasion, bought twenty-five barrels of whisky of a man in the Miami Valley, who was compelled to sell, paying 16 cents per gallon, and finding a ready disposal for the whole.

An early writer has this to say of Middlebury: "From 1815 to 1828, business of all kinds increased, and the village became the center of trade and fashion for all the surrounding country. It seemed destined to become the leading town on the Reserve. As Akron had no habitation, not even a name, Middlebury became the resort of the enterprising and business men, who were bidders and con-

tractors on the Ohio Canal. So great was the business at that time (about 1825), that there were no less than sixteen stores in the village, and all doing a good business. Mills, factories, and mechanical shops sprang into existence as if by magic. On the location of the canal, Akron sprang up with its immense water-power, and, for a time, entirely overshadowed Middlebury. Several of the early friends of the village died. Others looking to immediate effects, became discouraged, and with their capital, left the place. The factories closed, the grinding ceased, the thronged streets were transferred to Akron, and the epitaph of Carthage was almost inscribed on her monument. The friends of Middlebury then discovered that prosperity did not lie in speculation nor fashion, but in industry and enterprise. Mechanical establishments began to increase, and the valuable water-power was improved. A company was incorporated by the Legislature of Ohio, called the Middlebury Hydraulic Company, and authorized to raise the natural surface of Springfield Lake, in which the Little Cuyahoga had its rise, six feet, and lower it four feet below the natural surface. This gave to the water-power of the village a permanency and sufficiency that could at all times be relied on." Aaron Norton, one of the founders of the village, did a great deal in early years to improve it. The same writer continues, "While the Judge was upon the bench, a fellow who had been employed in the Middlebury Mills was indicted and tried for stealing a log-chain. His defense was former good character, to sustain which he called on the Judge who swore his character was about as good as that of millers in general. After the adjournment of court, Gen. Woodward, of Franklin, who was a miller took Norton to task for what he called an impeachment of the character of the millers. 'I was bound,' said Norton, 'to swear to the truth. I believe his character for honesty is as good as millers in general, but I believe he stole the log-chain.'"

The first tavern was opened by Peleg Mason. In about the year 1815, this man brought a small stock of goods to the village. About three years later, Orrin Pitkin began with a stock. Several others came in within the next two years. By 1825, ten years after the first store was opened, there were, as stated above, sixteen stores in the village. Among the more prominent were H. & H. A. Howard, dry goods, gro-

ceries, hardware, crockery, glassware, stone and hollow-ware, tinware, drugs, medicines, surgical instruments, etc.; Hiram Johnson & Co., the same. (These firms bought all sorts of produce, flour, pork, whisky, pot and pearl ash, giving in exchange their goods or paying their money.) McClure Brothers, general assortment; John McMillan, ditto; Kent & Oviatt, ditto; McNorton & Cleveland, ditto. Besides these there were H. Briggs, boots and shoes; James Ross, soap and candle factory; M. Johnson, druggist and physician; H. Loveland, attorney at law; G. F. Norton, ditto; Barlow & Allen, wool-carding and cloth-dressing; William Bell, saddles, harness and bridles; L. Chatfield, fancy and dining chair factory; Hard & Sumner, wool-carding and cloth-dressing; H. Rhodes, tavern keeper; G. Powers, Jr., attorney at law; McNaughton & Cleveland, tanners; Mrs. L. Wheeler, milliner; Phineas Pettis, plow manufactory; John McMillan, grain buyer; Zenas Chase, boot and shoe maker; Alva R. Chapman, painter; B. A. Allyn, cabinet-maker; Payne & Squire, distillers at Old Forge; Linus Potter, tailor; Humphrey & Kirkum, attorneys at law; John & Legrand Hanford, hat manufacturers; Ed. Sumner, tavern keeper; McNorton & Cleveland, grain buyers; Erastus Tarrey, ditto; Daniel Crist, boot and shoe maker; and a multitude of others, in for a short time at various pursuits.

A Masonic lodge was organized in about the year 1822. It was known as "Middlebury Lodge, No. 34." It participated in the ceremonies of the laying of the corner stone of the first college building erected at Hudson. A post office was secured at an early day, and soon a tri-weekly mail was obtained. Hemperly & Sumner ran stages between Middlebury and the villages of Cleveland, Canton and Wooster. While the canal was in process of construction, large quantities of flour, pork and produce were purchased, to be consumed by the laborers. When the canal was opened in 1827, several companies of men began buying enormous quantities of grain preparatory to being shipped away when the canal was opened. But the greater portion of this business died out, when Akron sprang full-fledged into life. There was a company of firemen organized at Middlebury in an early day. From the fact that McMillan & Dodge were engaged in the manufacture of "brake engines," the value of a

fire organization was rendered at once easy and desirable. According to the statements of Julius A. Sumner, a "bucket company" was also organized. Whether these firemen had much work to do is not recorded. The Sumner Brothers engaged quite extensively in buying and shipping cattle and horses. Julius Sumner says he crossed the mountains eight times while engaged in this business. Oxen were purchased for about \$40 a yoke, and three-year-old steers for some \$10 or \$12 a head. The brothers rode all over the country, buying 100 or 150 cattle, which were driven to Philadelphia or New York. Mr. Sumner says he made \$500 on his first drove, and continued the occupation until over a thousand cattle had been thus purchased and disposed of. A few droves of horses were also bought and driven to New York, whence they were shipped mostly to the West Indies, to be used on the large sugar plantations.

An independent rifle company was organized in Tallmadge during the war of 1812, many of its members residing in what is now Middlebury, a considerable portion of which belonged to the former township. It was under the command of Capt. Rial McArthur. The following correspondence between the citizens and Gen. Wadsworth is interesting, as showing the exposed situation of the country at the commencement of the war of 1812:

TO THE HON. MAJ. GEN. ELIJAH WADSWORTH, ESQ.:

Sir: We, your petitioners, humbly pray that you will take into consideration the defenseless condition we are in; therefore, we pray your Honor to issue orders for Capt. Rial McArthur's Independent Company and the Fourth Company of the Independent Battalion, Fourth Brigade and Fourth Division of Ohio Militia, commanded by Capt. Samuel Hale, to be retained for public safety, as we are on the frontier; that said companies be drilled one day in each week, and hold themselves in constant readiness in case of an attack to march at a moment's warning. Those families that were to the west of us have moved into the settlement, and we are left on the frontier; therefore, we, your petitioners, wish you to take this into consideration, and act as in your wisdom you shall see fit.

(Signed)

JOHN WRIGHT,	JONATHAN SPRAGUE,

PETER NORTON.

SPRINGFIELD, July 13, 1812.

This communication proves that the citizens in the vicinity of Middlebury were thoroughly aroused to the fact of their exposed situation; but subsequent events proved that their fears were almost wholly groundless. It may be supposed that the following letter afforded universal satisfaction:

CAPT. RIAL McARTHUR:

Sir: You doubtless are sensible of the critical situation of our country at this time. War being declared by the United States against Great Britain, it becomes necessary, as we have become the frontier, for the whole body of the militia to be in perfect readiness to meet the enemy; and, sir, yours being an independent company, I place great confidence in your ability and activity in being ready with your company to march and meet the enemy of your country at a moment's warning. You will, therefore, please to order your company to meet at any place you may think proper and convenient, one day in each week, and in the most perfect manner possible. See that every man furnishes himself with arms and ammunition, and other necessary accouterments for actual service. You will please to inform me after the first meeting of your company of their actual situation,

ELIJAH WADSWORTH,

Maj. Gen. Fourth Division Ohio Militia.

Soon after this correspondence was held, the Independent Rifle Company was ordered, first to Cleveland, and afterward to Old Portage, the headquarters of Gen. Wadsworth, and, finally, to the camp of Gen. Simon Perkins, a temporary post on the Huron River. They returned during the spring of 1813, after a short, bloodless, though arduous, service in the field. There were forty-eight men in the company, as follows:

Captain—Rial McArthur,
Lieutenant—Wiley Hamilton,
Ensign—Charles Powers,
Sergeants—Alpha Wright, Justus Barnes, Daniel Kennedy, Samuel Cheney,
Corporals—Edmund Strong, Shubael Lowery, John Campbell, Justin E. Frink,
Drummer—Stephen Butler,
Fifer—Ara Gillett.
Privates—Philander Adams, Samuel Allyn, Samuel Atkins, Christian Cackler, Jr., Titus Chapman, Nathaniel Darrow, Liverton Dickson, Thomas Ellett, David Ellett, Samuel Fogger, Jesse Neal, Asa Draper, David Powers, Samuel Preston, Lot Preston, David Prior, Amos Spicer, Jr., Joseph Towsley, Jonathan Williams, Abner Green, James Thompson, Henry King, Elisha Perkins, John S. Preston, Norman Sackett, John Wright, Jr., Ephraim Clark, Jr., Aaron Norton, Joshua King, James Bradley, John Collins, Drake Fellows, Henry Bierce, John Castle, David Preston, Jr.

When the above company was first ordered into the service, it comprised but forty-four men, several of whose names do not appear above, and were as follows: Luman Bishop, Charles King, Stephen Perkins and William Prior. The following men were not members of the company during the first enlistment: Samuel Atkins, Asa Draper, David Prior, Jonathan Williams, Abner Green, James Thompson, Ephraim Clark, Jr., Aaron Norton and Joshua King. This company first volunteered, and were ordered into the service of the United States for the protection of the frontiers, on the 22d of August, 1812. Their first term of service ended February 22, 1813. Although the company was then out of service, it did not disband, but kept drilling about once a week.

On the 17th of April, 1813, Gov. R. J. Meigs wrote to Gen. Wadsworth, advising him that "The Fort at the rapids of the Miami (Fort Meigs) is threatened with an attack from British and Indians," and ordering him immediately to detach "one flank company to strengthen the post at Lower Sandusky, as the post at the rapids is, I fear, too weak." In pursuance of this order, Gen. Wadsworth, on the 20th of April, 1813, ordered Capt. McArthur's company to march to Lower Sandusky immediately, and to take with them five or six days' provisions, or a sufficient allowance to take them to that place. Gen. Wadsworth says in his order, "You will be shortly relieved, as a large number of troops are on their march to re-enforce that army." This was the company whose names appear at length above. It will be noticed that many members of the company lived at old Middlebury. Immediately after the surrender of Detroit by Gen. Hull, in August, 1812, Gen. Wadsworth was ordered to organize a brigade of 1,500 men. To effect this, volunteers were called for, and, finally, the General was obliged to resort to a draft. The company above mentioned, with one or two exceptions, volunteered. Among the drafted were Reuben Upson, John Caruthers, Norman Sackett, Moses Bradford, Ara Gillett and Jotham Blakeslee. Old Portage was the headquarters of these forces, and became celebrated on that account. In later years, Col. John C. Hart organized a regiment of cavalry militia at Middlebury and the surrounding country. It will be observed that almost all the members

of Capt. McArthur's company lived in what is now Summit County.

It is now necessary to go back and notice other matters relating to the early history of Middlebury. The village comprises land formerly belonging to the townships of Tallmadge, Springfield, Coventry and Portage. Some of the first owners of the Middlebury land were Capt. Joseph Hart, Aaron Norton, Liverton Dickson, William Neil and Ara Gillett, in Tallmadge; Peter Norton, Rial McArthur and others, in Springfield; Amos Spicer and Jesse Allen, in Coventry; and Amos Spicer, Jr., in Portage.

During all the early history of the village, and for eleven years after the completion of the canal, the electors residing in the village met to poll their votes in their respective townships—the four mentioned above. The original village was in the southwestern corner of Tallmadge; but, as it gradually enlarged, portions of the other three townships were occupied, after being surveyed into lots. Among the early residents of what afterward became Middlebury, were the following, although this is neither a complete nor a perfect list: Capt. Joseph Hart, Judge Aaron Norton, Rial McArthur, Liverton Dickson, Samuel and John Preston, Amos Spicer, Sr. and Jr., Ara Gillett, Peter Norton, William Neil, Barney Williams, Mr. Graham, William J. Hart, George Simcox, Peleg Mason, Orrin Pitkin, John McMillan, Elijah Mason, Mr. Hazen, Thomas Sumner and his sons, Charles, Holland, Joseph, John, Increase, Edward and Julius A., the latter yet living at Akron; Nathan Gillett, probably the first Postmaster, and many others. The village was first regularly laid out into lots, and probably recorded at Ravenna, in 1818, by William J. Hart. That portion of the village known as W, was probably the first laid out, as it is recorded in Book F, at Ravenna; while E and S are recorded in Books S and K, respectively. It is likely that over fifty lots were laid out by Mr. Hart, to which additions were made as the rapid growth of the village required. The "boom" at the time of the building of the canal no doubt vastly increased the number of lots, as it did the number of buildings of all kinds.

It is likely that the village was incorporated by a special law of the Ohio Legislature, enacted during the session of 1837-38, as the following, quoted from the Middlebury records,

would seem to imply, if it does not explicitly state:

At a meeting of the qualified electors of the village of Middlebury, held in said village on the first Tuesday in May, A. D., 1838, agreeable to an act to incorporate the village of Middlebury, for the purpose of electing officers of said corporation, Roan Clark, Henry Chittenden and William L. Clark were chosen Judges, and Theron A. Noble was chosen Clerk of said election, whereupon, the following officers were elected: Henry Chittenden, President of the Council; Theron A. Noble, Recorder; Roswell Kent, Jesse Neal, Gregory Powers, Thaddeus H. Botsford and Harry Pardee, Trustees.

(Signed)

T. A. NOBLE, Recorder.

These officers were immediately qualified, and entered upon the discharge of their several duties. The following committees were then appointed: T. A. Noble and Gregory Powers, on by-laws; and R. Kent, Jesse Neal, Harry Pardee and T. H. Botsford, on appointments. At a session, May 6, 1838, the "set of rules for the regulation of the Council" was unanimously adopted; also, Smith Burton was appointed Marshal; Roswell Kent and T. H. Botsford, Committee on Streets, Highways and Nuisances; Jesse Newland, Harry Pardee, Committee on Revenue and Expenditure; and Gregory Powers and T. A. Noble, Committee on By-Laws and Ordinances. Soon afterward, John H. McMillan was appointed Treasurer; Daniel McNaughton, Assessor; and William L. Clark, Surveyor. The records reveal the fact that the Council began at this time to make a vigorous attack upon all nuisances, and passed several stringent ordinances looking to the abatement of the same. On the 21st of July, 1838, it was enacted by the Council "That the Chief Warden be authorized to procure a suitable number of hooks and ladders at the expense of the corporation, to be made and finished as he may direct, to be used in cases of fire and not otherwise." The five fire wardens appointed a short time before were Ambrose Cotter, Daniel McNaughton, Samuel Newton, Harry Pardee and John Johns. In 1843, Philpot and Camp were permitted to build a horse railroad through certain streets of the village, the road to be used for the passage of coal obtained in Springfield. In 1845, the first stone bridge over the Little Cuyahoga was constructed, under the contract of Increase Sumner, who erected the stone work for \$1.74 per perch, the whole cost amounting to \$578.55. So far as can be learned, the village electors voted in their respective townships until the act of incor-

poration was passed; after which, the village, having been constituted an election district, they met there to poll their votes. The following is quoted from the records of November, 1846: "The Council did not meet at the office of the President in Sherman's building according to adjournment, because the President was out of town on business, with the key in his pocket. (Signed) George W. McMillan, Recorder." The second stone bridge was built in 1847, by Abraham Rhodes, at a cost of \$350. The total cost was, however, much greater than that amount. The inference from the following, taken from the records of 1849, is, that the sanitary regulations of the village were inoperative or neglected: "*Resolved*, That \$10 be appropriated for the use of the Marshal in procuring *fifty bushels* of lime, as required by the ordinance relating to nuisances." It is also to be inferred that the desired results were not secured; for two months later, it was "*Resolved*, That each member of this Council be appointed a special committee to examine and report what is necessary for a *thorough cleansing* of this town, and to report at the next meeting." The records of a few succeeding meetings, show active work in the right direction on the part of the select committees.

Early in 1857, the citizens of Middlebury petitioned the County Commissioners as follows: "The undersigned householders residing in Middlebury, in said county, respectfully petition your honorable body to erect and set off a new township, to be composed of the territory embraced within the corporate limits of the village of Middlebury, in the county aforesaid." This petition was signed by eighty-four householders of the village. Attached to the petition was "The undersigned, Trustees of the townships interested in the formation of a new township, as proposed in the above petition, hereby give our consent that the said new township may be erected and set off in accordance with the prayer of said petition, to be composed of the territory embraced within the corporate limits of Middlebury." This was signed by a majority of the Trustees of each township. The County Commissioners, at the March session of 1857, proceeded as follows: "The Commissioners, being satisfied that the majority of the householders residing in the village of Middlebury had signed the petition, and that the consent of a majority of the Trustees of the sev-

eral townships affected by the creation of the new township had been obtained, and that the necessary legal notices had been given, *Ordered*, That the territory comprised within the corporate village of Middlebury be set off from the townships of Coventry, Portage, Springfield and Tallmadge, and be hereafter known as the township of Middlebury." Notices were also issued by the Commissioners for the qualified electors of the new township to meet at the town hall in Middlebury, on the first Monday in April, 1857, for the purpose of electing township officers. Thus the village remained until the spring of 1872, when the question of its annexation to the city of Akron, as the Sixth Ward, was submitted to the electors in both towns with the following result: Votes in Akron—for annexation, 1,042; against annexation, 16. Votes in Middlebury—for annexation, 140; against annexation, 26. The necessary number of affirmative votes having been secured, each town elected a committee to confer with that of the other town, to unite on the terms of annexation. These terms are too voluminous to be quoted here, yet it may be said that both towns will be benefited, in the end, by the annexation. The later history of Middlebury will be found in another chapter.

The first schoolhouse in Middlebury was erected near the site of the present one, in about the year 1811. It was a small one-storied frame, 20x25 feet, with a broad fire-place in one end. The first teacher is not remembered; but, in 1813-14 and 1814-15, J. P. Skinner, from near Ravenna, taught. This man was a skillful disciplinarian and a competent instructor. He received his pay by subscription, at the rate of some \$12 or \$15 per month. The three R's were largely dwelt on, and woe unto the scholar with a neglected lesson. Whispering was prohibited, and, in case the rule was violated, dire and summary correction was sure to follow. The old-time school-teachers were very strict about their rules. They usually succeeded in creating an understanding among their scholars that the violation of a rule of the school was an unpardonable offense, and it was often amusing to see how the guilty one languished. Sometimes young men were severely feruled, and more than one school has terminated in a promiscuous fight. One day Mr. Skinner, annoyed from having so much laughter in the room, made a rule that the first one that

laughed out should take the ferule and hand it to the next one that laughed out, who was to do likewise, and so on, and the scholar having the ferule when school was dismissed, should be feruled by the teacher. A short time afterward some one laughed, whereupon the teacher handed him the ferule, of which he must get rid, or he would be punished when school closed. It passed through several hands, and finally went to Ira Dixon. The rule was, by this time working altogether too well to suit the teacher. He, therefore, announced that the next one who laughed should ferule Dixon, and the latter should ferule him. Almon Brown and Ira Dixon were great friends, and, when the former saw that the latter was in for sure punishment, his mirth knew no bounds. He endeavored to repress the tide, and his efforts resulted in volcanic peals of laughter. That instantly precipitated events, and the teacher told the boys they must ferule one another. This each one did, laying it on with a gusto not at all appreciated by the other. By this time, the gravity of the whole school was seriously affected. Mutterings were heard here and there, and at last a young man named Denison Williams burst into a roar of laughter. He was feruled by the teacher, greatly to his mortification, and then the rule that had played so much mischief was declared annulled. Such scenes often transpired in the early schools, and even in later ones. There were fifty-nine scholars enrolled during the winter of 1814-15, at which time the above funny, though serious, event occurred. This schoolhouse was used, summer

and winter, until 1828, when J. A. Sumner and others were employed to construct what is known in history as the "Old Brick." Both of these houses were used for school, church, town and other purposes. In 1826, Mr. I. N. Mason taught a "select grammar school" in the village. Other terms were subsequently taught. In 1853, the old brick schoolhouse was purchased by the Village Council for \$255, and converted into a town hall, to which use it was devoted for many years. It is likely that the present school building was erected about the same time, although nothing is before the writer of this chapter proving that to have been the case.

From the fact that Tallmadge was blessed with good churches, and that many of the early residents of Middlebury belonged to these, no efforts looking to the organization of religious societies in the village were made until about the year 1830. Many of the villagers were laborers in the various shops, and were not professors of religion; while the few who were professors preferred going to Tallmadge to church, instead of sustaining the cost of erecting a building of their own. However, soon after the completion of the Ohio Canal, several religious societies sprang into existence. The Methodists started up at an unknown date. The Presbyterians put up their church in December, 1831, and the Congregationalists, in December, 1845. Other religious organizations have been established, and Middlebury is now well supplied with churches. Many other interesting historical events in the village will be found narrated in other chapters.

CHAPTER XIII.*

HUDSON TOWNSHIP—ITS PRIMITIVE ATTRACTIONS—THE FIRST START IN THE WOODS—OF MOVING ACCIDENTS BY FLOOD AND FIELD"—ON THE BORDER—THE EARLY RESOURCES OF THE SETTLERS.

"The sweet remembrance of the just,
Like a green root, revives and bears,
A train of blessings for his heirs,
When dying nature sleeps in dust."

TO form a correct idea of the early history of the Western Reserve, it is essential that it should be viewed through the contemporaneous history of the parent State. The Puritan colony which had been planted in Connecticut some one hundred and sixty years before, had grown to the dignity of a State. Its primitive customs, involving a close union of Church and State, had grown with its growth until the church militant had become the church triumphant so far as it concerned municipal governments and communities. Each town had its ministerial fund, schools were everywhere provided, and a patriotic pride in the individuality of its institutions was the dominant influence with every citizen of the State. The Puritan of the last century was no weakling in his least estate, but at this period he was at the summit of his power. Of a robust nature, physically and mentally, he handled the ponderous themes of the time as the mythological deities did thunderbolts, and in the lowest condition of life counted himself "a hero in the strife." Thus equipped, he was aggressive in every fiber of his being, and pushed his conquests with an imperiousness that abated not a tittle of his earthly or heavenly heritage. It was with something of this spirit that the State maintained her right to the territory embraced by the provisions of her charter, in the midst of conflicting claims and the overwhelming opposition of non-claiming States. But when at last in the interest of harmony, Connecticut surrendered her pretensions, save to the Reserve, and finally relinquished her jurisdiction to that, she had surrendered only her feeblest power. Her

conquering spirit laid hold of its civilization, and in the hearts of its citizens she rules the Western Reserve to-day.

The early settlement of the Reserve was an effort to reproduce in this Western wild the honored institutions of the motherland. This was the beginning of the golden period of the Connecticut churches, a period marked by revivals of religion throughout the State, distinguished for their power, purity and permanent influence, greatly enlarging the churches, improving the morals of society, and bringing the people of the State, to a great extent, under the control of religion." It was just at this time also that the Connecticut method of "missions to the new settlements" was completed, which was destined to play so important a part in the New Connecticut; and these civilizing influences combined to leave an impress upon the plastic civilization of the new land that has been crystallized in the culture of to-day. These influences were early marked, and perhaps nowhere more distinctly than in the region which is now embraced in Summit County. A letter from the Western Reserve to Eastern friends dated 1812, reads as follows: "I like Tallmadge better on several accounts than any other place I have seen. The settlers in this town are much the most respectable of any on the Reserve. There is provision made for the permanent support of preaching, which is not the case in any other town." Another letter dated from Tallmadge in the same year, speaks in the same strain: "I am persuaded that if any of our friends think of going to a new country, they will find none that they will be so well pleased with, either on account of the quality of the land or of the society. I do not think there is in the State of Connecticut a society where there is that attention paid to the Sabbath, and to religion generally, that there is

*Contributed by J. H. Battle.

here. There are very few who do not attend meeting regularly, and very few prayerless families." There is no question but that the early history of Tallmadge was exceptional in some respects, but of Hudson it was scarcely less true. Its founder, the son of a tailor who taught his children as he plied his trade, grew up to advanced manhood embracing skeptical notions. Caught by the sweeping power of the church movement of this period he was converted, and with the characteristic practicability of the Puritan mind, he sought an opportunity to prove his faith in work. The missionary spirit that had begun to pervade the religious communities of his native State, and the recent organization of the great Land Company, prepared the way which he adopted without hesitation. Zealous in his new found faith, "he wished to do something to repair the injury he had done, and to advance, to the extent of his ability, the interests of that cause which he had early labored to destroy. These were the views that led him to emigrate.

* * * * The early efforts and sacrifices of the men who came to Hudson, show that they were actuated by the motives I have ascribed to them. They never suffered the Sabbath to pass by after the settlement was commenced, without religious worship; and by great effort and great pecuniary expenditure, they provided for the enjoyment of religious ordinances among themselves, and sought to promote the progress of religion in this part of our country. It was the first desire of Mr. Hudson's heart to see the day when a church should be organized within the township, and he rejoiced in that day. The next object of desire was that this church might enjoy the labors of a settled Pastor, and he lived to see that day and was glad. Then it was in his heart to see a house erected for the worship of God, and that he saw completed to his great satisfaction. 'But,' said he, 'the college—the college; that was a child of my old age. I never expected to live to see that.' Yet the college was in coincidence with his plans and with his missionary spirit. He spent most of his time in visiting Christian families in all parts of the Reserve, and securing the organization of churches and it was with him a matter of painful solicitude, how

the infant churches rising up on the Reserve were to be supplied with able, faithful ministers, in sufficient numbers to meet their wants. The college came in as the appropriate instrument to supply the deficiency."*

The site chosen for this enterprise—Township 4, Range 10—was centrally located in the land company's purchase, and contained what has since proven to be among the best farming lands in Summit County. It was laid down in the original survey, however, as a swamp township and was "equalized" by the addition of 10,000 acres, situated in the townships of Norton and Chester. West of the central line of the township the land was covered by an almost impassable swamp, which, filled with innumerable springs, gave rise to the Brandywine Creek, flowing in a northwesterly course to the Cuyahoga River and Mud Brook, flowing nearly due south in Hudson but further on in its course, taking a curve to the westward finds an outlet in the Cuyahoga. A branch of Mud Brook in the southwest part of the township, known as Powers' Brook, and Tinker's Creek, which flows in a northerly course in the northeast part of the township, crossing back and forth from Hudson to Stratsboro, completes the list of the more important water-courses of the township. None of these, however, were found available in the first years of the settlement for such pioneer industries as the community needed, save the latter stream for a short period. Other water-courses were found which in the changes wrought by the process of clearing and tilling, have become extinct or insignificant, that afforded suitable power for the early attempts at milling and manufacturing. The township is now inhabited by a purely agricultural community. The luxuriant growth of heavy timber which once covered every acre, has largely given way to meadow-lands and grain-fields, save where each farmer's woodland gives token of the grandeur of "God's first temple." The soil in the lowlands of the western part is largely a black muck, rich but saturated with moisture and liable to frost. In the eastern part the surface is more rolling with a soil varying from a stiff, stubborn clay to a clay loam. There is

*Address by Rev. G. E. Pierce, D. D.

but little regularity in the disposition of these varieties, though in the southern and north-eastern parts it is said the clay-loam predominates. Eighty years of tillage has wrought great changes in the character of the soil, and the swampy portion of the early township has given place to good farms, and it is estimated that not over one thousand two hundred acres of low wet land remains. Water is everywhere easily accessible. Springs abound in the western part, while in other portions of the township there is no special difficulty experienced in securing good wells; some artesian wells, however, have been sunk. The soil is the chief material resource of the township, though there is an abundance of a fair quality of sandstone which has been utilized in the construction of the foundations of the college buildings, most of the residences, railroad culverts, etc. The chief objection to the stone is its dark color and its lack of weathering qualities. These objections would probably prove no serious obstacle to its general use, if the more desirable stone was not found in the near vicinity which is placed upon the ground here as cheaply as the product of the home quarries can be got ready for transportation. As in most townships of the Reserve, the social and business center is at the geographical center of the township. An early cluster of houses in the southern part of the township on the central road has given name to the road, and across the line in the adjoining township it is designated, in the nomenclature of the map, Darrowville. The early jurisdiction of the township embraced what is now known as the townships of Stow, Boston, Twinsburg, Aurora and Mantua, besides its own territory. As the settlement increased in these townships the jurisdiction of Hudson became limited to the lines of the original survey, which now bounds it on the north by Twinsburg, east by Stratsboro, in Portage County, south by Stow and west by Boston.

The original purchasers of this township with its annexes, were Nathaniel Norton, of Bloomfield, N. Y., Birdseye Norton and David Hudson, of Goshen, Conn. There are no means now of ascertaining the arrangement between these partners in relation to this purchase. Nathaniel Norton was a well-to-do

farmer in Bloomfield, N. Y., where he had come as an early settler; Birdseye Norton was a wealthy merchant of Goshen, and David Hudson a farmer in comfortable circumstances, but of little cash capital. From such evidence as the old account books of Mr. Hudson afford, it is probable that Birdseye Norton furnished one-half of the capital and each of the others contributing a fourth, Mr. Hudson probably turning in his Connecticut farm to Mr. Birdseye Norton. The land was purchased at 52 cents per acre, but with the equalizing annexes the average cost per acre was reduced to 34 cents. Nathaniel Norton, some time in 1801, disposed of his share, probably to Stephen Baldwin, Benjamin Oviatt and Theodore Parmele. The first draft of the Reserve was made in 1798, and early in the following year, Mr. Hudson started out to explore and survey the land for the company in which he was a partner. His preparations for his new adventure were carefully made, as the following exhibit taken from an old account-book shows:

DAVID HUDSON, BIRDSEYE NORTON AND NATHANIEL NORTON TO NORTON & RICHARDS, DR.:

May 11, 1799.

	£.	s.	d.
By 2 sickles, 8s; 2 bells @ 10s.....	1	8	00
By 1 doz. garden seeds @ 1s 6d.....		16	00
By 1 lb. allspice, 4s; 2 hoes, @ 8s 6d....	1	1	00
By 1 grindstone, wt. 62 lbs., @ 7d.....	1	16	2
By 1 pail @ 5s 6d; 7½ lbs lead, 9s 4d....		12	10
By 1 comb, 1s 6d; 1 almanack, 1s.....		2	6
By 1 ax, 12s; 1 gallon bottle, 5s.....		17	00
By 1 bed-cord, 8s; 1 clothes-line, 6s....		14	00
By 9½ lbs. dried venison.....		7	1
By 693 lbs. pork.....	27	14	3
By 25 lbs. gammon @ 1s 4d.....	1	14	00
By 1 carpenter's adze.....		14	00

Total.....£37 15 10

The above articles were bought of Thadæus Chapin.

May 13, 1799:

	£.	s.	d.
To 4 lbs. ginger @ 2s 8; 2 lbs. tea @ 13s 6d	1	15	00
To 6 lbs. chocolate @ 3s 6d; to 81 lbs. cheese @ 1s.....	5	2	00
To 44 lbs. chain @ 2s 4d; to 1½ lbs. of chalk @ 9d.....	5	4	00
To 3 lbs. powder @ 10s; to 3 lbs. pepper @ 4s 8d.....	2	4	00
To 281 lbs. sugar @ 1s 1d; to 50½ lbs. nails @ 2s.....	20	5	5
To 9½ lbs. leather @ 2s 6d.....	1	3	9
To 1 small account book.....		6	00
To 1 quire of paper, 2s 6d; 1 draw-shave, 5s 8d.....		8	2

	£.	s.	d.
To 8 narrow axes @ 16s.	6	8	00
To 2 bells @ 17s.		17	00
To 1 plowshare, 50s 2d; 1 spider, 7s 6d. .	2	17	8
To 2 hoes @ 7s 14; 1 skimmer, 1s; 1 dip- per, 1s 6d.		16	6
To 2 plane-irons @ 1s 8d; 2 chisels @ 3s.		8	4
To 1 chisel, 2s 6; 1 doz. awls, 8d; 3 awl- hafts, 1s 6d.		3	8
To 1 spade, 11s; 3 gimlets, 1s 6d; 3 au- gers, 17s.	1	9	6
To jackknives, 11s, 4d; 1 pincer, 1s 5d. .		12	10
To 1 doz. fish-hooks, 3s; 1 line, 4s (used as chalk-line).		7	00
To 1 saw, 18s; 2 set teaspoons, 2s 4d. . .	1	0	4
To 1 carving-knife and fork, 6s 9d.		6	9
To ½ bushel clover seed.	3	4	00
To 12 bushels oats @ 2s 6d.	1	10	00
To 1 bushel and ½ peck herd-grass seed.	1	16	00
To 1 bushel peas, 10s; 2 sets teacups, 5s 8d.		15	8
To 1 razor, 6s; razor-strop, 2s 6d.		8	6
To 1 shaving-box, 2s 10d; 4 cakes soap, 10d.		6	2
To 3 barrels, 24s; 1 hammer, 4s.	1	8	00
To 5 first blankets @ 32s.	8	00	00
To 3 do @ 16s 8d.	2	10	00
To 4½ yards tow-cloth @ 3s.		13	6
To 3 ax-helves @ 1s.		3	00
To 1 trowel, 4s; 1 hasp, 2s.		6	00
To 100 dollars cash.	40	00	00
To 1 set spoons, 3s; 2 knives, 1s 8d.		4	8
May 15, 1799:			
To 31¼ gallons whisky @ 18s.	12	14	00
To 1 barrel.		8	00
Total.	£122	4	3

On the same date Nathaniel Norton sup-
plied the following items:

1 set harrow-teeth.	5	1	4
1 iron kettle.	3	4	00
3 bushels of salt @ 10s; 1 barrel, 6s.	1	16	00
1 coffee-pot, agreed at 3s.		3	00
90 lbs. bread @ 3d.	1	2	6
1 hat.		18	00
2 yoke oxen.	46	8	00
34 bushels wheat @ 8s.	13	12	00
2 yokes and bows, irons, etc.	1	6	8
1 cow, 20 dollars.	8	00	00
7 barrels @ 4s.	1	8	00
2 barrels pork @ 18.	14	8	00
Transportation to Gerundagut.	7	4	00
1 boat, 33 dollars.	13	4	00
½ bushel peas @ 5s.		5	00
1 bushel potatoes @ 2s 6d.	2	6	00
1 bag, 4s.		4	00
1 cow, 13 dollars.	5	4	00
Total.	£125	14	4

These articles, involving an outlay of
upward of \$700, were principally secured at
Bloomfield. This point, at that time, was on
the frontier, and the overland pioneer to the

far West was forced to depend upon the uncer-
tain guidance of Indian trails and the survey-
or's marks. The thoroughfare of Western
travel was by the lakes, and Mr. Hudson has left
a carefully prepared "traveler's guide" over
that route as follows: From Black Rock to
Buffalo Creek, three miles; Buffalo Creek to
Five Mile Creek, five miles; Five Mile Creek
to Eighteen Mile Creek, thirteen miles; Eight-
teen Mile Creek to Cattaraugus, twelve miles;
Cattaraugus to Four Mile Creek, four miles;
Four Mile Creek to Fifteen Mile Creek, eleven
miles; Fifteen Mile Creek to Chataqua,
twenty-five miles; Chataqua to Lowry's, six-
teen miles; Lowry's to Presque Isle, sixteen
miles; Presque Isle to Walnut Creek, twelve
miles; Walnut Creek to Elk Creek, eight miles;
Elk Creek to Conneaut, ten miles; Conneaut to
Ashtabula, fourteen miles; Ashtabula to Grand
River, twenty-six miles; Grand River to Cha-
grin, ten miles; Chagrin to Cuyahoga, twenty
miles; a total of 205 miles. The only public
source of information in regard to this country
was "Morse's Geography," which represented
the latter river as navigable for sloops for
forty miles from its mouth.

On the 22d day of April, 1799, in company
with Jesse Lindley, William McKinley, whom
he had hired as assistants, and Ira, his son of
eleven years, Mr. Hudson started for Bloom-
field, N. Y. The party was accompanied by a
wagon driven by Thaddeus Lacey, who brought
his wife and two children. Mr. and Mrs.
Lacey were engaged as purveyor and cook for
the party, and were in charge of the supplies
with which the wagon was loaded. Their
route lay toward Albany, where they arrived
on the 24th. Here Mr. Hudson hired Joseph
Darrow for six months, at \$10 per month, to
accompany the expedition, terms similar to
those on which the others had been engaged.
Their course then led through Schenectady, old
Fort Schuyler, Onondaga to Bloomfield. Six-
teen miles west of Schenectady, Mr. Hudson,
leaving his son and Lindley with the wagon,
pushed on ahead with Darrow, making his
way on foot to Fort Schuyler on the 29th, where
he engaged Jonah Meecham; to Onondaga on
May 2, where he added Richard H. Blin to his
party, reaching Nathaniel Norton's in Bloom-
field on the 5th day of May. Here the little

party was detained eleven days, which they employed in further providing for their enterprise in the wilderness. Here Mr. Hudson fell in with Benjamin Tappan, later known as Judge, on his way to his town of Ravenna. Mr. Tappan here bought a yoke of oxen and Mr. Hudson, as will appear in the preceding statement, bought two yoke of oxen and two cows. These animals were confided to the care of Meacham, who assisted by some of Tappan's hired men, brought them safely on the Indian trail through Buffalo, until he found near the lake the west line of the seventh range on the Reserve. This line, the eastern boundary of the present township of Painesville, Concord, Chardon, Monson, Newburg, Auburn, Mantua, Shalersville and Ravenna, they followed due south for more than forty miles, crossing the Grand and Cuyahoga Rivers and striking the Salt Spring Indian trail near the southeastern corner of Ravenna, and thence to their destination. In the meanwhile Hudson had his baggage and supplies transported to Grondigut Bay, where, to his great disappointment, he found his boat in no condition for use. He sent back Eliada Lindley and Farr and Straight, whom he had secured at Bloomfield, and obtained passage in one of Tappan's boats for himself and Darrow. He also had the good fortune to find Elias Harmon here, about to start out with his wife for Mantua. In one of his boats he obtained passage for Blin and McKinley, dividing such of his store as he was able to take between the two boats. This was on the 16th of May, but meeting with bad weather the little fleet did not reach Niagara until the 22d, when to their astonishment they found the river full of floating ice. They proceeded up the river, however, against the united strength of the current and floating ice, and with great effort reached Buffalo Creek on the 26th, where they were blocked up with ice "at least twelve feet high." Happily the ice broke up that night leaving Lake Erie clear, but with so heavy a swell rolling that the expedition was obliged to lay by until the 29th, when for three days the lake was almost at a dead calm. Prompt use was made of these advantageous circumstances, the little party rowing from Buffalo to Elk Creek, a distance of 120 miles in the meantime. On the 1st of June they put out

and attempted to continue their journey and rowed six miles, but they were obliged to beach their boats at Crooked Creek, and lay wind-bound for several days. "On the 5th," says Mr. Hudson, "we put out from Crooked Creek and dined in Conneaut, with a fair wind from the northeast. At 2 o'clock P. M., the wind shifted into the north and blew on the shore with such violence that the boat in which myself and Darrow were, and which was heavily loaded, filled with water before a single article could be got on shore. With most unremitting and violent exertion, we saved our boat and loading, and spent the remainder of the day and part of the next in drying our loading which was much damaged with water. On the 7th and 8th we sailed to Grand River, using the bed blankets as sails. The boat in which McKinley and Blin had taken passage and which was in our company, fared worse, it being stove, and a part of my potatoes went through her bottom. But after the wind had subsided they got her up, and with the help of my nails they so far repaired the wreck that they got her into Grand River with her loading on the same day we got there."* This was the destination of Mr. Harmon's goods and as there was no way of securing the transportation of the goods on board, he purchased this boat of Mr. Harmon for \$1 and proceeded with his boat, leaving Blin and McKinley to proceed up the river some four miles, discharge Harmon's goods and then to continue the journey to the Cuyahoga River.

Without waiting for his second boat, Mr. Hudson proceeded, reaching the Cuyahoga River on the 9th, where, on the following day, finding that the other boat had not come up, he left Darrow to assist the men up the river. He also took the precaution to lighten Mr. Tappan's boat of a large part of his stores, leaving them to be brought on by his newly purchased boat, and proceeded up the river. The season previous to their coming having been very dry, they had proceeded but a few miles when they found the water in places only eight or ten inches deep, and were often obliged to get out, join hands and drag their boats over shallow places. In this way they

*Diary of David Hudson.

proceeded until the 12th, when they reached such a rapid current that it was impossible to draw the boat any further. Mr. Hudson continues in his diary as follows: "I, myself, went on the land searching for some surveyor's line whereby we could find our township. In this place my men overtook us, and to my great concern informed me that my boat had been plundered the night before of a considerable quantity of whisky, pork, flour and some few potatoes. The men suspected of this villainy was an Indian in the Sandnsky tribe, and a white man who calls himself Armstrong. They are two villains, famous in this quarter, and their conduct is not allowed of by their chiefs.

"13th.—We now took a part of Tappan's load into my boat, and by our united strength we got the two boats along slowly up the rapid and shallow water, I still continuing on the land searching for some town line. In this way we proceeded until the 17th, when, as I had not been able to find any land mark, we determined to take a few days' provisions and strike our course in a southeast direction till we could find some clew whereby we could tell what part of the world we were in. It was at this time I most heartily repented having undertaken the expedition, but I must now persevere. I proceeded with my men and Tappan with several of his assistants, and to my great joy found the southwest corner of No. 4, Range 10, at about 11 o'clock on the 17th of June. I immediately went about making a road, getting our stores up from the river, and in endeavoring to get a road into the middle of the town. In the latter attempt a new difficulty was met. I tried at many places and could find no pass for a road across a swamp which stretched itself from the south line of the town, about three and a half miles, as I afterward found in a northerly direction about one-half mile from the west line. I afterward went across the swamp and found excellent land beyond. In this dilemma, I determined to set my men at work on the west side of the swamp, until the land could be so far surveyed as to find some pass for a road. We found it a work of time and difficulty to get a road across the gullies which lie in No. 4, Range 11 (Boston), but,

by the 25th of June, we got some of our things on."

By a very happy combination of circumstances the cattle, of which the explorers were just now beginning to need, arrived at the landing on the 18th, just one day after the discovery of the township line. The journey of these men over some three hundred and fifty miles, guided by the tortuous trails of the Indian and the township lines of the surveyor, through a totally unknown land, was one of the difficulties of which we are scarcely able to appreciate. Their mode of traveling was to secure firmly upon the backs of the oxen several bags of flour and pork, together with two blankets and an ax. They waded fordable streams and compelled their cattle to swim those that could not be forded, crossing these streams themselves with their provisions on rafts hastily constructed of sticks. The teams thus happily at hand, rude sleds were constructed and the labor of transporting the goods from the boats to the place where Mr. Hudson had decided to begin operations commenced. In the meanwhile a road had been cut out and a bark shelter erected. The cattle were greatly tormented by the immense swarms of flies that attacked them at all times, nearly driving them mad. It is said they actually killed one of Mr. Tappan's cattle.

About this time David Kellogg with his wife, applied to be taken into Mr. Hudson's employ. He had come out in the service of Mr. Tappan, but for some reason desired to change his service. Judge Tappan afterward took occasion in the public prints to say that Mr. Hudson enticed him away, which is an entirely mistaken idea. The provisions of the Hudson colony were very low, and he had great fears that those already dependent upon him would suffer for lack of supplies. He, however, granted the request, but Mr. Kellogg never became a permanent settler in this colony, though staying for a year or two.

As soon as the first most pressing duties were accomplished, Mr. Hudson set about making a clearing, aided by his four men. The robbing of his boat and the failure of his goods, shipped by wagon, to come on began to give him some uneasiness as to their means of subsistence. He borrowed some

pork of a Capt. Stoddard, settled in what is now Northampton, and taking his boat as soon as unloaded on the 24th of June, proceeded alone down the river in quest of Lacey. Speaking of this trip in his diary, Mr. Hudson says: "I had the misfortune to lose my fire, and being exceeding wet and the night very cold, I experienced the most uncomfortable night I ever felt. I arrived at Cleveland in twenty-eight hours, and, although several boats had lately arrived, I could not get any information concerning Lacey. I had not heard a word from him since I left him on the Mohawk River near Schenectady in April. I was at a great loss what to do, but, on the whole, I thought best to wait a little longer. In three days an opportunity presented of going down the lake, and, after a quick and dangerous passage, I had the good fortune to find my boy, Lacey and the boat." It appears that Lacey had got as far as Cattaraugus Creek with the boat which Mr. Hudson found unfit for a voyage when he left, and was resting there very much at his ease. He had also quite an addition for the colony in the way of several hired men, which Nathaniel Norton had secured to go to the settlement. But of what the settlement needed the most they were nearly destitute. "My joy at finding the boat," says Mr. Hudson, "was turned to sorrow on finding that they had but little more flour than enough to last through the voyage, excepting three barrels that belonged to Capt. Austin (Eliphalet Austin, of Austintown). I found myself under the most disagreeable necessity of abandoning my men, who were at work, to their fate, quitting the whole expedition and returning home, or else taking Capt. Austin's flour. After a sleepless night deliberating what was my duty in the trying case, I determined as the least of two evils to take Austin's flour, to dismiss my hands, saving barely enough to manage the boat, pay Austin whatever his damage might be and prosecute my business. Having written my situation and reasons to Capt. Austin and Esquire Norton, I proceeded on my voyage. In a few days, by rowing in the night and crowding our business, I got to Cuyahoga, and without meeting any further disaster we arrived with all our loading at the landing on No. 4, Range 11, on

the 19th of July." It must be remembered that these voyages were made in open boats and were propelled by oars save when a light breeze was taken advantage of to raise a sail rudely constructed out of blankets. The courses of these boats were necessarily near the shore and were completely at the mercy of a brisk wind, and were greatly hindered in their voyages on this account. The present case was a pressing one, and Mr. Hudson made good some of the delays during the day by rowing nights. Among the crew was one Lindley, who declared that he was hired to work by the day and refused to work nights. Mr. Hudson therefore excused his rowing in night voyages, but when forced to lay by in the daytime put him at "chopping wood." A day or two of this experience caused him to surrender unconditionally.

The supplies came just in time, and after getting them into the shelter (which took one hand and the team several days), three days were spent in cutting over the land begun for a wheat-patch. Hitherto the bark shanty which had been hastily erected, on their first arrival, had been their only shelter. Rain had fallen almost incessantly, and with the recent additions the little colony, swelled to thirteen persons, demanded something better for their protection. A log house 16x18 feet was at once erected, and within a week's time the whole party were made comfortable beneath its roof. A day and a half had been spent in the meanwhile in surveying, the only fair weather during the week, but now matters were in a comfortable shape for the time being, Mr. Hudson was anxious to get the township ready for settlement. "I now determined," says he, "to crowd the surveying business to the utmost, and if possible to get time to survey our annexation, but, in the last week in July, J. Lindley, Darrow, Meecham and Blin were all taken sick, and, in short, there was none save myself that could be called well. For four weeks our people who kept about did little else than take care of the sick. Rain fell in showers about every other day, and in those four weeks we cut three small stacks of poor hay which was much damaged by the rains, and fired and burnt the brush on about nine acres—the rain being such that we could not burn our brush

any other way than to pull our heaps to pieces and lay them on the fire. My original design was to sow a large piece to turnips, but not being able to burn the land over, I sowed on the 1st day of August a small piece from which we cut the timber and brush the week preceding.

"On the 22d day of August, our people having gradually recovered, we resumed surveying and pressed it closely as possible until the 12th of October, when the business and writing was completed." The settlement so far had been confined to the northeast corner of Lot 11, but on the 1st of September Mr. Hudson brought his men to the center of the township and began to cut brush and timber on Lots No. 55 and 56. Here he designed to make his home, and "twenty-three days' work" were spent in building a temporary hut and making the clearing for the more substantial cabin. "Sixteen days' work" erected a good log-house on the line of these two lots where Baldwin street now abuts on Main in Hudson Village, and two days were spent "in trying to dig a well." While this work was progressing the surveying party were finishing their work, while another party connected the two clearings with a road: cut out another to the boat landing in "No. 4, Range 11," now called Boston. About the middle of this month they found their store of provision running very low. Supplies were expected every day from Nathaniel Norton, but at this point Mr. Hudson realized something must be done to avert possible distress. He went immediately to Cleveland and purchased of Lorenzo Carter a small field of corn and potatoes for \$50, turning in a yoke of oxen as the larger part of the payment. In case of necessity he thought the corn might be pounded up in mortars and sustain the company until relief should come. He hastened back to his station, but having previously heard that Ebenezer Sheldon had made a road through the wilderness to Aurora, and that there was a bridle-path thence to Cleveland, he thought it probable that he might obtain pork for present necessity from that quarter. He accordingly set out on foot and alone, and regulated his course by the range of his shadow, making allowance for change in the time of day. He

found the Cleveland path near the center of Aurora, in a dense forest. Thence he proceeded two and a half miles to Mr. Sheldon's cabin, but found he could obtain nothing within a reasonable distance. The next morning he returned to his colony to find that his long-expected boat had arrived, and that there was once more plenty in the camp.

Having completed their surveying on the 11th of October, and got affairs well under way to make comfortable his family, and such colonists as he might bring back with him, he started on the following day with his son Ira, Meacham and Darrow for Connecticut. They went down the river in the old Harmon boat, intending to transfer to the strong boat which Lacey had brought when he came, but on arriving at the mouth of the river he found the boat borrowed without leave and gone to Detroit. It was late in the year and any delay would only bring nearer the season of the year when such navigation was impossible or extremely hazardous, and they proceeded on their way in the old wreck. There was no tar at hand with which to "pitch" the seams, and it proved so leaky that it required one hand most of the time to bail out the water, and so weak that it bent considerably in crossing the waves. During their passage the weather was generally cold and boisterous; three different times they narrowly escaped drowning by reason of the darkness of the night or violence of the wind. Referring to one of these narrow escapes from both the wind and darkness, Mr. Hudson writes in his diary: "This salvation has determined me never in future to put into the lake in a dark night." Lying wind-bound at Chataqua for several days, they eked out their scanty stock of provisions by living on boiled chestnuts. They arrived at Gerundagut on the 31st of October, whence their journey to Goshen was by land. Mr. Hudson in the middle of November, found his family well and anxious to hear of the land which was to be their new home. No time was spent in idling, however, and by the 1st day of January, 1800, he had made his arrangements to leave with his family, his native State with all its tender and endearing associations, for the wilderness where he had known so much anxiety and hardship. "Thus," says he, "ends

the eventful year of 1799, filled with many troubles, out of all of which hath the Lord hath delivered me." His stay at his old home had been a busy time for him. He had settled accounts with the Norton brothers; had sought among his old friends and acquaintances for colonists; and had his own affairs in his old home to settle as well as to provide supplies for the one to which he was about to move his family. His accounts for the first year are interesting to read over and vividly illustrate the character of the man and the enterprise. Among the items of expenditures are the following: April, 1799, "paid \$3 for an excellent dog which we lost in Schenectady;" May, "lent Mr. Bacon \$5 for ageeing to pilot us, for which he gave his note, which note I lost with all my minutes and observations on the Cuyahoga in wading the stream;" "paid Mr. Holly for twelve bushels seed wheat, \$18;" October, "Gave Mr. Kellogg as a present to support himself and family, they being sick, \$3;" October 19, "Gave as a gift to Mr. Berion, of Conneaut, he and his family beingsick and in distress, \$1;" November 16, "Returned to Goshen, expended in returning \$9.75." The whole account reaches some \$300, which does not include the unpaid balance of wages due his help, and which was applied on the land which each purchased, nor the supplies which had been brought from the East. On the credit side, Mr. Hudson shows tools and materials still in possession of the proprietors to the amount of \$350.90: surveying instruments, \$33; "nine acres of wheat on the ground calculated at \$20 per acre, \$180; sundry other articles not here enumerated, \$36.91;" making a grand total of \$600 worth of property for little more than an equal expenditure. In raising recruits for the new colony, his efforts had been marked with excellent success. It is said that he offered a bounty of forty acres to the first one to volunteer, and Ruth Gaylord, whom Rev. John Seward calls "an ancient maiden" received the land, which afterward she gave to her niece, the daughter of Elijah Nobles. Among the party that were prepared to return with Mr. Hudson and his family, were Samuel Bishop with his four sons, David, Reuben, Luman and Joseph, Joel Gaylord, Heman Oviatt, Dr. Moses Thompson, Allen Gaylord, Stephen

Perkins, Joseph and George Darrow, William McKinley and three men from Vermont by the names of Derrick, Williams and Shefford. The women in the company were the wives of Messrs. Hudson, Bishop and Nobles, with Miss Ruth Gaylord and Ruth Bishop. The six children of Mr. Hudson completed the party that started for the New Connecticut. Among these names will be noticed those of some who went out the preceding year. Darrow returned with his brother, Joel Gaylord and Heman Oviatt went out to view the land with the intention of taking their families thither if the situation proved favorable. Mr. Bishop, with his son-in-law Elijah Nobles, alone hazarded everything on the single cast of the die. The three men from Vermont were evidently acquaintances of Lacey, through whom they had probably learned of this settlement, and was desirous of trying their fortune. They probably did not stay long as no mention is made of them in any of the old papers of Mr. Hudson.

In January, 1800, Mr. Hudson started, with his family, on sleighs, from Goshen for Bloomfield, N. Y., the place of rendezvous. Here he occupied an empty cabin of Eber Norton's during the winter, employing his time in preparing for his journey by the lakes. He procured four boats, in addition to the Harmon boat, which he thoroughly repaired, and loaded them with supplies, including window-glass for his cabin put up the preceding fall, a large quantity of woolen and linen cloth, peach and apple seeds, garden seeds, additional tools, and a supply of groceries intended to last his family for a full year—the whole reaching a cost of some \$2,000. The balance of the party secured three boats for their transportation, and all was completed on the 29th of April. "The next night," said Mr. Hudson, "while my dear wife and six children, with all my men, lay soundly sleeping around me, I could not close my eyes. The reflection that those men and women, with most all that I held dear in life, were now to embark in an expedition in which so many chances appeared against me; and, should we survive the dangers in crossing the boisterous lakes, and the distressing sickness usually attendant on new settlements, it was

highly probable that we must fall before the tomahawk and scalping-knife. As I knew, at that time, no considerable settlement had been made but what was established in blood, and I was about to place all those who lay around me on the extreme frontier, and, as they would look to me for safety and protection, I almost sank under the immense weight of responsibility resting upon me. Perhaps my feelings on this occasion were a little similar to those of the patriarch, when expecting to meet his hostile brother; but, after presenting my case before Israel's God, and committing all to His care, I cheerfully launched out, the next morning, upon the great deep." The little fleet experienced little difficulty coming up the lakes until they reached the mouth of the Cuyahoga River. The wind on this day was rather high, and Mr. Hudson, in attempting to enter with his boat, missed the channel and stuck fast upon the bar. In this perilous situation, the boat shipped considerable water, and the occupants must have inevitably all been drowned had not a mountain wave struck the boat with such power as to float it clear of the obstruction. On reaching a point within two miles of their destination, darkness coming on, they were obliged to stop for the night a little north of Northfield, at a place called the Pinery. They encamped on the banks, which were somewhat low. During the night, a tremendous rain set in, which had so raised the river by daybreak that it overflowed its banks, and was on the point of floating off the very beds on which they were lying. Everything was drenched, many finding themselves without a dry thread upon them, and here they were obliged to wait five days before the water had so far subsided as to allow them to force their boats against the current. On the sixth day, May 28, they reached the landing place near the Boston line. Here Mr. Hudson left his family and the crew to look after the unloading, and hurried to visit the people he had left in the clearing, whom he found in good spirits. Before leaving Bloomfield, Mr. Hudson had secured some hogs, fourteen cows, a bull and a horse, which, with a yoke of oxen belonging to Mr. Bishop, were intrusted to the care of Elijah Nobles to bring through the wilderness by the route by which the cat-

tle had been brought the preceding year. These arrived about the time the boats were unloaded, but Mr. Hudson, busy in arranging for the large accession to the colony, did not take his horse to the landing after his family for several days. When he arrived, he found his family suffering from the persistent attacks of the gnats and mosquitoes that infested the woods at this season, and his wife, who had cheerfully borne all the trials of the journey hitherto, was now very much discouraged. A change to more cheerful surroundings, and a fairly comfortable house, wrought a great change in her feelings, and she nobly seconded the efforts of her husband. The work of transporting the goods from the boats to the settlement on wooden sleds, over eight miles of hilly woods-road, was no slight undertaking, and it was several days before it was accomplished. After all the persons belonging to the settlement had collected, Mr. Hudson led them in rendering thanksgiving to the God of mercy, who had brought them safely to their desired haven. Public worship on the Sabbath, which had been discontinued in his absence, was resumed. In relating the fact, Mr. Hudson said: "I felt, in some measure, the responsibility resting on first settlers, and their obligations to commence in that fear of God which is the beginning of wisdom, and to establish those moral and religious habits on which the temporal and eternal happiness of a people essentially depends."

Once settled in their new quarters, the little community was at once a scene of bustling activity. Joel Gaylord selected and purchased 640 acres lying in a square piece on the southwest corner of the public square; Dr. Moses Thompson, who had been promised by Mr. Hudson \$50, in medicine, if he concluded to settle here, selected for his father and brothers eight and a half lots, of 160 acres each, four of them forming a square mile of land adjoining the southeast part of the public square; Heman Oviatt selected a site south of the village about a mile, adjoining the Thompson property; a large elm tree standing on the road line to the farm now owned by Philander Ellsworth, which sprang from a riding-whip which Mr. Oviatt brought on one of his trips to Pittsburgh, and carelessly stuck in the

ground there, marks the vicinity where he erected his cabin in this year. Dr. Thompson made some clearings and planted a crop on three lots, and all found plenty of work to do. Darrow bought in the southern tier of lots, near the central road, and in July, Ebenezer Stone, of Boughton, Ontario Co., N. Y., came out and bought Lot 70. Notwithstanding the frequent rains, the season on the whole was very favorable for the crops, and there was an abundant harvest of potatoes and turnips and wheat.

On the 28th of October of this year, occurred the first native accession to the settlement. On this date, a daughter was born to Mr. and Mrs. Hudson, and, notwithstanding the lack of professional aid, with the attendance of the women of the settlement, mother and child prospered finely. The heroine of this occasion, and the eldest born of the county, was Anna Maria Hudson, later the wife of Harvey Baldwin, who now lives in a vigorous old age, to rejoice in the results of her parents' pioneer labors. Two weeks later, another event occurred which served to vividly impress upon these people the stern reality of frontier life. Milo and William, two sons of Mr. Hudson, were sent to drive the hogs out where they could find plenty of nuts to feed upon. The path they followed was very rough, and Milo, who was barefooted, experienced a good deal of pain in trying to travel in it. His brother, finding that he did not need his assistance, sent him back and proceeded on alone with his charge. In returning, Milo left the path to walk upon the leaves in the wooded part to avoid the "hubs," and inadvertently strayed too far and became lost. A slight snow had fallen, and it was a chilly autumn day. He looked about him for some clew to his whereabouts, and, seeing a clearing at some distance, ran toward it only to find that it marked the site of a swamp. The return of William and the absence of his brother at once excited alarm, and the men rallied out with horns, guns and bells to find the lost boy. He heard the signals of those in search, but, deluded by the appearances of a clearing made by the various swamp lands, he only got farther away, until, night coming on, worn out with the anxiety and exertion of

the day, he prepared to pass the night in the wilderness. Raking a pile of leaves beside a great log, and wrapping his bare feet in his jacket, which he had taken off for the purpose, he burrowed deep into the leaves and fell asleep. The hunters could not thus easily lay aside their cares. The unsuccessful search caused them to redouble their exertions during the night, and Mr. Hudson, with a father's anxiety, offered a reward of \$40 to stimulate a search in which the keenest interest was already enlisted. The search was continued without avail until 11 o'clock the following day, when the boy was found still asleep, his hair fringed with frost and his toes slightly frosted, but otherwise unharmed.

It was some years before the danger of being lost in woods was overcome by the number of settlements. As late as 1809, a little girl of Eben Pease, eight or nine years old, was lost. She was sent on an errand to Benjamin Oviatt's, about two miles north of the center. She got there safely, but on her return, mistaking a cow-path for the trail, she wandered off and was lost. Not returning by dark, her parents became alarmed, and, going to Oviatt's, learned she had left there early and was probably lost. The neighborhood was rallied out in search. Guns and horns were brought into requisition, but it was 10 o'clock the next day before she was found by Richard Croy. She was found asleep on a log, with her feet wrapped in some aprons which she had taken to bring home.

The following spring brought the families of Joel Gaylord and Heman Oviatt, who came in wagons by the overland route, bringing with them Benjamin Oviatt, John Bridge and James Newton. Their wagons were the first that ever penetrated the wilderness in this part of the Reserve, and these pioneers were obliged to chop their way through the woods for miles. A little later in this year came Eliada Lindley, John Oviatt, William Boughton, Aaron Norton, Ezra Wyatt, James Walker, Deacon Stephen Thompson with his sons, Abraham, Stephen, Jr., and Moses, and his sons-in-law, George Pease and Bradford Kellogg. In the same company came George Kilbourne and William Leach. Dr. Moses Thompson had expended his patrimony in

prosecuting his medical studies, but his father proposed to give him a lot of land if he would investigate the Hudson settlement and, if favorably impressed, move the family out to it. After coming out with Mr. Hudson and selecting the land, he returned on foot to Goshen, carrying his provisions in a pack at his back. He made the 650 miles in eleven and a half days, helped to do the haying, and, returning with his father's brother's family, as well as his own. He secured some apple seeds from some pumace at a cider-mill in Reading, Penn., and the first apples from this seed, were the admiration of the little folks, who had never seen an apple before.

His land was situated northwest of the village, on what is known as the Northampton road, where he lived until the day of his death. He was the earliest doctor in the township, and had a practice that took him over a territory a hundred miles in extent. He retired from his practice in 1815, to engage in business. Christian Cackler came here in the spring of 1804, together with his father and eldest brother, settling on a part of Lot 10, in the southeast corner of the township. They came from Pennsylvania, bringing a horse and a yoke of oxen, and such supplies as could be packed on a horse. Coming to Ravenna, they found a few residents, and a road marked out and partly underbrushed to Hudson. Here they came, selected their land, and, going to the site, put up a temporary shelter. Four forks were driven into the ground, and upon them were laid poles, upon which a covering of bark was laid. The same material supplied the floor and the sides of this hastily constructed tabernacle. Beds made of leaves and covered with blankets completed their household arrangements, and they proceeded at once to clear their lands for their spring crops. It was then the 10th of May, but they put in about three acres of corn, and cleared off another piece in time to sow some wheat. Provisions were hard to procure, and were obtained by working for their neighbors. In his published reminiscences, Mr. Cackler says: "In September, my father and brother went back after the family, and left me in care of the shanty until they should return. I was then only twelve years

old. They left for my use a small loaf of bread, an old rifle that carried an ounce ball and some powder and bullets, that I might kill squirrels for meat. They thought they would be back in three weeks. It was a trying time for me. I could get along very well through the day, but when night came, I was lonesome indeed. I would build a big fire and roll myself up in my blankets so that I could not hear anything, and there remain until morning. I managed so about two weeks. My loaf began to get very small, and I had to make my allowance still smaller to make it hold out. Three weeks expired and nobody came. The fourth passed; my bread was gone and squirrels furnished my only food. The fifth passed, and found me without bread or bullets. I managed to kill some squirrels with gravel-stones, but the most of those I shot at escaped without serious injury. I stayed there until the sixth week began to drag its slow length along, when one afternoon in the cabin, to avoid a heavy thunder shower, I fell asleep, and awoke to find it growing dark. The fire had gone out, and everything was so saturated with the rain that I could not relight. While tinkering with the fire, I was startled by the howl of the wolves in the near vicinity. I seized my gun loaded with stone, and, wrapping my blankets about me, sat down to defend myself against the wolves. I sat there until morning without a visit from the wolves, and then I left the shanty to care for itself, and went over to where Harry O'Brien lived, about three miles distant, and remained until our family came back, which was not long." Others came from time to time to gladden the hearts and share the burdens of the little frontier community. It is not possible, at this time, to learn all the particulars of their coming, or even of their names. Among those who came during the first fifteen years of the colony were David Hudson, 1799; Thaddeus Lacey, 1799; R. H. Blin, 1799; William McKinley, 1799; David Kellogg, 1799; Joseph Darrow, 1799; Jonah Meacham, 1799; Jesse Lindley, 1799; Samuel Bishop, 1800; David Bishop, 1800; Joseph Bishop, 1800; Luman Bishop, 1800; George Darrow, 1800; Allen Gaylord, 1800; Joel Gaylord, 1801; Heman Oviatt, 1801; Stephen Thompson, Sr., 1801;

Abraham Thompson, 1801; Stephen Thompson, Jr., 1801; Dr. Moses Thompson, 1801; John Bridge, 1801; James Newton, 1801; George Pease, 1801; Eben Pease, 1801; William Leach, 1801; George Kilbourne, 1801; Bradford Kellogg, 1801; Amos Lusk, 1801; John Oviatt, 1801; Eliada Lindley, 1801; William Boughton, 1801; Ezra Wyatt, 1801; Aaron Norton, 1801; Robert Walker, 1801; John Walker, 1801; James Walker, 1801; Robert Walker, Jr., 1801; George Walker, 1801; Elisha Norton, 1802; George Holcomb, 1802; Nathaniel Farrand, 1803; Robert O'Brien, 1803; John O'Brien, 1803; Charles Miles, 1804; Rev. David Bacon, 1804; Henry Post, 1804; Zina Post, 1804; Jonathan Williams, 1804; Christian Cackler, Sr., 1804; Owen Brown, 1805; Benjamin Whedon, 1805; Marmaduke Deacon, 1805; Daniel Johnson, 1809; William Chamberlain, 1809; William Chamberlain, Jr., 1809; Nathaniel Stone, 1810; Samuel Hollenbeck, 1810; Gad Hollenbeck, 1810; Joseph Kingsbury, 1810; Elisha Ellsworth, 1810; Dr. Jonathan Metcalf, 1812; Augustus Baldwin, 1812; Frederick Baldwin, 1812; Dudley Humphrey, 1812; Ariel Cobb, 1813; Gideon Mills, 1814; Chauncey Case, 1814; Harvey Baldwin, 1814; Rev. John Seward, 1814. Most of these persons came from Litchfield County, Connecticut, or Ontario County in the State of New York. The larger proportion were married, and some brought into the country large families, that intermarried, so that few of the earliest families remained unrelated in this way. "David Hudson brought in a family of six children—Samuel, Ira, William, Timothy, Milo and Abigail. Ira Hudson married Huldah Oviatt; William married Phoebe Hutchinson; Milo married Hannah Rogers; Abigail married Birdseye Oviatt. Samuel Bishop had a family of five sons and four daughters: Timothy married Rebecca Craig; David married Miss Kennedy; Lunan married Rachel Gaylord; Reuben died single; Joseph married Miss Hollenbeck; one of the girls married Stephen Perkins; one, Elijah Nobles; one, Samuel Vaile; and one, Gad Hollenbeck. Joel Gaylord brought with him three sons and four daughters: John, Daniel, Harvey, Sally, Olive and Betsey; Sally Gaylord married William

Leach; and afterward a John Ford; Olive married George Darrow; Betsey married William McKinley; and Nancy married William Chamberlain."*

The little settlement thus dropped in the woods, like a pebble in the ocean, seemed lost in the vast expanse of wilderness that stretched, with interminable proportions, from the frontiers of Western New York along the lakes to the great West. By the treaty 1785 with the savages, the Cuyahoga River was made a part of the dividing line between the territories of the contracting parties. Eight miles to the east of this national boundary, separated from the civilized world by hundreds of miles of wearisome, hazardous journey on land or sea, were a little handful of resolute men, with their wives and children, while on its western bank clustered the strongholds of the merciless savage, whose barbarous warfare had written the history of the Northwest in letters of fire and blood. None felt the seriousness of the situation, and the crushing weight of responsibility which it brought, more keenly than the heroic founder of this colony. He knew the jealous watchfulness with which the natives marked the coming of each accession to the white colony; the sentiment of reckless indifference to the rights of others which possessed that class of hunters and trappers which hang about the outskirts of advanced settlements, and, to prevent the contact of these antagonistic elements, and to smooth the natural, inevitable asperities of the situation, was his constant care from the beginning. He was constantly engaged in Indian conferences, entertaining them at his house and giving them presents, and to his upright dealings and judicious management may be credited the harmonious relations and commanding influence of the community with the natives. The Seneca, Chippewa and Ottawa tribes had villages in the vicinity of the Hudson colony, and were frequently found among the whites on trading or begging expeditions. Stigwanish, the chief of the Seneca village, was on intimate terms with his new neighbors, and was a frequent and welcome visitor at Mr. Hudson's cabin. He was a large, muscular man, standing straight as an arrow, nearly six feet in height, with a stern expres-

*Reminiscences by Christian Cackler.

sion of countenance and a keen black eye. He is represented, by all who knew him here, as well disposed toward his white neighbors, and upright in his dealings, strongly discountenancing anything in his followers which was likely to provoke trouble. His people had corn-fields on the river bottoms near where the village of Cuyahoga Falls now stands, which they cultivated for years. On one occasion, having reason to fear an attack from another tribe, he requested his white friends to build him a fort near the falls of the river, which they did, though, happily, it was never needed for the purpose of defense. Heman Oviatt, with a shrewd eye to business, early established a trading-point at his cabin, about a mile south of the site of the village. This was a place of great attraction to the Indians, who gathered here in considerable numbers, exchanging the furs they secured by trapping and hunting for trinkets of various kinds, powder, lead and whisky. The latter was in the greatest demand, and a scale of prices, according to Christian Cackler's account, was established, as follows: Coon-skins, a half-pint of whisky; buck-skins, one pint; bear-skins' four quarts. Mrs. Oviatt soon acquired their language and gained quite an ascendancy over their "untutored minds." Before giving them any considerable amount of whisky, she was in the habit of demanding their guns, tomahawks and knives, which they surrendered to her until they got sober, as they invariably got "kok kusi." One of these orgies, as described by Cackler, was as follows: "They were of the Ottawa tribe, and there were about fifteen or eighteen of them. They were provided with a deer-skin suit, like a little boy's suit, all whole, but open before, and supplied with openings for legs and arms. When put on, it was tied in front. It was ornamented around the arms and legs with fringe some three inches three inches in length, to which was attached a variety of animal claws, such as those of the turkey, coon, deer, bear, etc. One would put on this suit, and jump, hop, and kick about in a sort of Indian 'Highland fling,' while two others furnished the inspiration by patting and humming. The success of the performer seemed to depend upon his ability to get the greatest possible amount of

clatter out of the claws attached to the fringe. When tired, he would doff the garment, take a drink of the whisky provided, and give place to another Terpsichorean artist. In this way, each one would try his agility, and gradually get beastly intoxicated. This they kept up two days. Before the proceedings began, however, they placed all their weapons in the hands of their squaws, who were quiet spectators of the scene. At the end of two days, all save two of the squaws who were assigned to the charge of the papooses, got drunk, and exhibited all the worst phases of this degrading revel." It was hardly to be expected that the free use of whisky in this way should always result so harmlessly to the general interests of the community at large. The women and children could never learn to look upon the savages with any degree of equanimity, and the natives were not slow to perceive this. Occasionally, an ill-disposed fellow, inflamed by whisky, would frighten a woman if he found her unprotected in an isolated cabin. On one occasion, a party of Indians came to the cabin of Marmaduke Deacon, situated where his son now resides, and, finding his wife alone with her children, approached her in a threatening manner, making some demand in their own language. Not able to understand their utterances, she provided them with a generous supply of provisions. They still maintained their menacing attitude, when she secured and gave them every cent of money there was in the cabin, and, finding them still unsatisfied, she left her children and proceeded, through the snow, to the cabin of O'Brien, who lived some distance away, for more to satisfy their demands. She reached her destination, but the fright, added to the exposure, was too much for her feeble strength, and she never left alive, dying of quick consumption in a few weeks. This circumstance aroused the revengeful disposition of a certain class of the whites, who, known as "Indian haters," became Indian slayers whenever occasion offered the chance of escaping the penalty of their acts. Jonathan Williams, who came in with Christian Cackler, Sr., in 1804, was one of this class. "George Wilson," a son of Stigwanish, was a quarrelsome fellow when under the influence of liquor, and had several

serious misunderstandings with the whites. One time, when feeling particularly surly, he happened at the cabin of "Old Mother Newell," on Paines' road, near the town line. She was alone, and, noticing his approach, she took the precaution to bar the door. Denied admittance to the cabin, which had but one door, he put his gun-barrel through the opening between the logs, and satisfied his ugly disposition by forcing her, with threats, to dance in the middle of the floor till, tired of the sport, he went away. He had scarcely left before Mrs. Newell, on the watch for some passer-by, saw Williams coming along the trail with his gun on his shoulder, as usual. She called him, and related the circumstances. Williams waited only to hear the story, and pushed on after the Indian. Williams' character was not unknown to the natives, and, finding him on his trail, Wilson left the road and struck through the woods hoping to avoid an encounter. Williams gained upon him slowly but surely, and, when in vicinity of a piece of "honey-comb swamp," taking advantage of a moment when the Indian was off his guard, he shot and killed him. Drawing his body into this piece of swamp, he thrust it out of sight, sending, also, the Indian's rifle down with him. The mysterious disappearance of Wilson created a great commotion among the Senecas, and great effort was made to discover the whereabouts of his remains and the cause of his final taking-off. The Indians suspected what the whites did not learn until years afterward, and Williams was obliged ever afterward to be constantly on his guard against surprise. It is said, on another occasion while hunting while there was a light coating of snow on the ground, he lost for awhile his bearings, and found himself following his own track in a circle. He observed, in coming upon his own trail, the track also of a moccasined foot, and, with a hunter's instinct, recognizing his pursuer, he took to a tree and shot him as he came again following the trail.

By the treaty of 1805, the Indians were removed from the near neighborhood of the whites, who were rapidly pouring into this country, but they still continued to come back in squads to their old haunts, to trade or hunt. In 1806, Stigwanish, with his sons, John Big-

son, John Amur, his sons-in-law, Nickshaw and Wobmung, and others of their family, came to their old camps in Deerfield. During their stay, Nickshaw traded his pony with a settler by the name of John Diver. The Indian felt aggrieved, and complained to some of the leading settlers, and endeavored to trade back with Diver, without success. Nickshaw felt that he had been cheated, and agreed, with Mohawk, to shoot Diver. Until this horse trade, there had been the kindest relations existing between the parties, and no fears were entertained that the disagreement would cause a rupture. The young men called at Daniel Diver's cabin soon afterward, and sought to get his brother within their grasp by strategem, but failed. A little later in the same evening, Daniel, in going out to placate the Indians, was shot so as to blind him—a wound which did not prove mortal—and fled, supposing he had killed the one with whom they had had the difficulty. A party of settlers at once started in pursuit. Their camp, some three miles distant, was found deserted, but, following their trail along the great Indian road from the Ohio River to Sandusky, they crossed the Cuyahoga River, where Kent now stands, and the center road of Hudson, about a mile south of the village, thence across the Cuyahoga again near the site of Peninsula, in Boston Township. The trail entered Hudson on Lot No. 10, and passed within sixty rods of Cackler's cabin, and the pursuers, under the lead of Maj. H. Rogers, reached this cabin about 1 o'clock in the morning. It was a clear, cold night in the latter part of December of 1806: the moon was shining with peculiar brightness upon the earth, lightly covered with snow, giving the pursuers every facility. When they arrived here, however, some of the party were nearly frozen, and a number of them went no further. Rogers got Christian Cackler, Sr., his oldest son and Jonathan Williams, to accompany him in continuing the pursuit. "They went to Hudson, got a new recruit, and followed on to near the west part of Richfield. Here the Indians had stopped, built a fire, stacked their arms, tied their ponies, and lain down with their feet to the fire. Most of them had pulled off their moccasins. When Rogers and his men saw the

fire, they scattered and surrounded the Indians, some of whom were in a doze, and some asleep. As they were closing up, Nickshaw and Mohawk sprang up and ran off bare-footed. They closed in on the rest, and, it beginning to be light, Rogers wanted somebody to go after Nickshaw, and George Darrow, of Hudson, and Jonathan Williams, volunteered to go. The Indians' feet began to bleed before they got a mile, when they sat down on a log, tied pieces of blanket on their feet, and then separated. Darrow and Williams followed one of them, who proved to be Nickshaw, and whom they overtook in about three miles. He looked back, and, seeing them, gave a whoop and increased his speed, and they after him like hounds after a fox. In about a mile they overtook him, and asked him to come back, but he would not. Darrows said he thought he would clinch him; but, when he made the attempt, Nickshaw would put his hand under his blanket as though he had a knife. Darrow thought he would get a club and knock him down, but Mr. Indian could get a club and use it too. They got out of patience, and Williams fired his gun over Nickshaw's head, to let him know what was coming if he did not yield. This did not make the desired impression, and Williams loaded his gun and killed him by a second shot. They placed him under a log, covered him with brush and old chunks, and came back to Hudson.* The whites returned with Bigson and his two sons, who were committed, by the Justice of Deerfield, to the jail at Warren. A squaw belonging to them was allowed to escape, and, it is said, perished in the snow. The killing of Nickshaw, however, it was thought was unwarrantable, and, fearing the consequences of such an act if allowed to pass unnoticed, David Hudson, Heman Oviatt and Owen Brown mounted their horses and brought in the body of the dead Indian. The matter was brought before the proper legal authorities, but the investigation came to a lame conclusion, and finally ended in a "hoe-down," where whisky was plenty, and a collection of \$5 for Williams as a reward for the deed. Bigson was finally set at liberty, and remained near the settlements for years.

*Cackler's Reminiscences.

The affair occasioned no further trouble, although it occasioned considerable uneasiness amongst the settlers for a time. The Indians either acquiescing in the judgment of the whites, or realizing their inability to successfully cope with the settlers, made a virtue of necessity and passed it by without notice.

The year 1806 was a marked one in other respects, to both the whites and Indians. A full eclipse of the sun occurred on 17th of June, much to the terror of the untutored savage, and greatly to the injury of the crops of the whites. The Indians were greatly frightened by the event, and, though it had been in some cases foretold by some of the squaws (how they learned of the fact has never been ascertained), it was not believed, and the women were executed as witches. When the event occurred, therefore, they were greatly frightened, and, forming in a circle, and marching around in regular order, each one fired at the evil spirit that was threatening the destruction of the world. Happily for one "brave," he discharged his gun just as the shadow began to move off, and he was created a chief on the spot for his bravery and the great service he had performed for the natives. The whites, though less affected by the phenomenon, were hardly less seriously affected by its effects, if the reminiscences of Mr. Cackler are to be relied upon. He says: "The day of the great eclipse was a beautiful, warm day; we were hoeing corn the second time, with only shirts and pants on, but, after the eclipse was off, the weather was so much colder that we had to put on our vests and coats to work in. There were frosts every month that summer; no corn got ripe, and the next spring we had to send to the Ohio River for seed-corn to plant. The next summer was the hardest time I ever saw. There was no grain in the country. My father and Adam Nighman went to Georgetown, on the Ohio River, for flour; they had no money, but took a rifle and pledged it for flour, and I guess they never redeemed it."

A good rifle was a valuable piece of property to the first settlers. Next to his ax and plow, he depended upon it for support in subduing the wild land in which he reared his cabin home. The vast forests abounded with

A. L. Leongier

game, which at first was his principal dependence for sustenance, and later his greatest annoyance and damage. Elk, the common deer, bears, wolves, panthers, with otters, beavers and raccoons infested the country and preyed on the crops and stock of the early community with comparative impunity. Bears came right into the settlement, and, seizing a hog, carried it, struggling and squealing, to the woods, and destroyed it before the aroused settlers could prevent. Wolves attacked stock, killing calves and yearlings, and frequently assailed travelers, though generally with no serious results. Squirrels, raccoons and blackbirds, in their attack upon the grain-fields, were hardly less troublesome, and all the available children of the community were pressed into the service of protecting the growing crops from their depredations. As the settlement became less dependent upon game for food, the disadvantages of this abundance became more apparent, and organizations were made, much against the wishes of the professional hunter, to drive it out of the country. The township of Streetsboro, on the east of Hudson, was not settled for years after its neighbors, and offered a secure retreat for the animals that played such havoc upon the stock of the pioneer settlements. The communities which suffered most from this state of affairs determined, in 1819, to rid themselves of these unpleasant neighbors. A committee was appointed, which marked off thirty or forty acres a little south of the center, into which the game was to be driven. The settlers of Hudson came in on the west, of Franklin on the east, and of Aurora on the north. In describ-

ing the hunt, Cackler, who was an old hunter, says: "When the ring closed up, there was the greatest sight I ever saw. There were over a hundred deer, and a large number of bears and wolves. As they ran around the ring, the guns cracked like a battle. The deer came in great herds, forming a splendid sight with their large antlers, and, as they came toward the ranks, the hunters made wide gaps and let them out, closing in again to keep the bears and wolves. When we thought all dead, a wounded wolf came limping along a few rods from the line, calling out a perfect shower of bullets. A Hudson man, with another of the band, standing near each other, fired at the wolf when he fell dead. Both claimed the scalp, which then was worth \$7, not a small sum for that time, and began a struggle for it that ended in a bout of fisticuffs. When finally the Hudson man was conquered, the wolf's scalp was gone. The proceeds of this hunt, when brought together, comprised over sixty deer, seven bears and five wolves. A large number of the wolves escaped, and many of the slaughtered animals were picked up and carried off by those who had not joined in the hunt, but enjoyed the game. The larger game grew rapidly scarce after this. The hunters of Hudson frequently went to the region of Sandusky Bay, the swamps of the Huron and Portage Rivers, and secured furs and plenty of game, but the lawlessness of the people who congregated at these points, and the dangers of lake travel, made it a hazardous undertaking, that scarcely remunerated the hunter for his risks and hardships.

CHAPTER XIV.*

HUDSON TOWNSHIP—CHARACTER OF THE EARLY COMMUNITY—ORGANIZATION—PIONEER INDUSTRIES—VILLAGE OF HUDSON—ITS INCORPORATION AND GROWTH—
FOUNDING OF CHURCH AND SCHOOL.

"Non ignara nati, miseris succurrere disco."

THE early community of Hudson was patriarchal in its characteristics. It originated in the self-sacrificing devotion of its founder; its first steps were directed by his judgment, and in its maturer years it bears his name and the impress of his character. It is difficult to imagine the early prosperity of this settlement without the material and moral support of Mr. Hudson. He is the central figure in all its early history, and remained so until his death. Coming with ample resources for the prosecution of his enterprise, he allowed no desire for private ends to swerve him from his chosen course. He sought to establish a center of civilizing influence; his was the mission of a public benefactor, and the records of that time bear ample evidence of his faithfulness. The sick and unfortunate found in him a helpful friend; public enterprises were placed beyond the danger of failure by his efforts; struggling merit never failed for lack of material aid when solicited of him, while his old account books, bearing the names of every member of the settlement in those early days, tell many a tale of his devotion to his people. In the building-up of the influence he sought, Mr. Hudson exercised his power without the aid of compulsion. He laid no restrictions upon the freedom of thought or action in the sale of his land. The support of church and school was voluntary on the part of each one, but his personal influence—not an unimportant factor in the issue—he put without reserve in favor of these institutions, and in the end he wrought success, where more exacting methods reaped failure. There were two elements here from the first, antagonistic to each other in both politics and religion, but Mr. Hudson, commanding the respect of his cotemporaries in years, and the reverence of the young, on the principle of the resolution of forces, though his influence united

them in carrying forward the general principles upon which the settlement was founded. There was in all this, however, no spirit of asceticism. The New England pleasures of the husking-bee and apple-paring were added to the Western logging-bees and spinning matches.

"When toil remitting lent its turn to play,
And all the village train, from labor free,
Led up their sports."

Dancing was a common form of amusement. There were plenty of violins and many a hard day's work in the field and cabin was supplemented by a night's scarcely less vigorous exercise in dancing. The first ball in Cleveland was attended from all the surrounding settlements, and among the rest Hudson sent her complement. The occasion was the 4th of July, 1801, and R. H. Blinn, of Hudson, was one of the "managers." An old chronicle says: "Notwithstanding the dancers had a rough punchon floor, and no better beverage to enliven their spirits than whisky sweetened with maple sugar, yet it is doubtful if the anniversary of American independence was ever celebrated in Cleveland by a more joyful and harmonious company than those who danced the scamper-down double-shuffle, Western swing, and half-moon forty-six [eighty] years ago in the log cabin of Maj. Carter." The only record we have of the observance of this day in Hudson was on July 4, 1800. There were then just forty-two souls in the settlement, the most of whom had come in the preceding month. These all sat down at a table of elm bark, in the woods on what is now a part of the public square, a few rods north of the actual center of the township, and a very little west of the north-and-south road. Their fare may be imagined; their guests were David Hudson, his wife Anna Hudson, their children, Samuel, Ira, William N., Milo L., Timothy and Abigail L. Hudson; Thaddeus Lacey, his wife Rosanna Lacey, their children, Isaac H., Ann and Susan Lacey;

*Contributed by J. H. Battle.

David Kellogg, his wife Mrs. Kellogg, their children, Eleanor, Hiram and an infant; Samuel Bishop, his wife, Mrs. Bishop, their children, Ruth, David, Luman, Reuben, Joseph, Phoebe, and a maiden sister of Mrs. Bishop, Ruth Gaylord; Elijah Noble, his wife, Anna Noble and child, Ira Noble. Those not having families at that time, or whose families were still in the East, were Joel Gaylord, Heman Oviatt, Dr. Moses Thompson, Stephen Perkins, William Leach, Reuben Parker, George Darrow, Joseph Darrow, Gordon Crandall and John Wood.

The property of the early community was very evenly distributed, and there were none who could be termed wealthy, even by the standard of that day. A few would be, perhaps, accurately placed by that New England term of "fore-handed farmers." The accumulations of a well-advanced life-time invested in the cheap lands of the Reserve made a somewhat imposing show, but all were blessed with large families, among whom the parents sooner or later divided their property, so that there was but little difference in the size of their farms. All fared on the same food. The woods furnished freely to all an abundance of game, berries, honey and nuts, while none were so poor after a few years' residence that he could not raise his own pork and supply his own table with milk, butter, cheese and flour. The most marked difference perhaps was in the superior comfort of some of the dwellings, and the fact that some wore shoes the year round. But even this difference brought with it the compensating burden of responsibility and risk to its possessor. The first, and perhaps the most pretentious house in the village was the hewed-log cabin built by Mr. Hudson, on Baldwin street. This was supplied with glass windows, and was in its appointments a fitting residence for the principal man of the town. In 1802, his growing family and his duties of hospitality demanded a larger cabin, and he set about putting it up, choosing a site a few feet east of the first one. This he had completed and had moved a few beds and other things into it, and being in the middle of "moving" the family slept in their new home, the children leaving their clothing in the old one. An arbitration had been held in the old house until quite late at night, and a roaring fire had been maintained on the hearth. A short time after

closing the business and Mr. Hudson had retired to bed in the new building, he was aroused by the flames showing in the chamber of the old cabin. The old "cat-and-clay" chimney had proved recreant to its trust, and the chamber loft had been set on fire. Mr. Hudson saved his valuable papers, but everything else was lost, including a large stock of supplies intended to provide for his family and such of the settlers as would need them for a full year, and even his children's shoes. His loss was estimated at a \$1,000, and was the more serious from the fact that the nearest market was Pittsburgh, which could only be reached by traversing miles of trackless woods. There were others, like Christian Cackler, Jr., who found consolation in that traditional old lady's philosophy, "blessed be nothing." On moving from Hudson in 1816, "our furniture," says he, "proved no inconvenience; my wife had a bed, I had an ax, I added to this by purchase of Zenas Kent three white cups and saucers costing 75 cents, three knives and forks and a wooden pail. The woman who lived with us gave three wooden plates, and a kettle to cook our victuals in. My wife's father also gave us a table which completed our 'set out.'" (In 1870, his property was estimated at \$30,000). Such a distinction was obviously too slender a foundation upon which to build a spirit of caste. Indeed, the whole fabric of society rested upon an aristocracy of labor, and none were so high or so low that he did not minister to his necessities with his own hands. The fathers of the community wrought in the fields with their sons, and were not less strong in action than wise in counsel. Their endurance is the marvel of later generations.

In 1802, Mr. Hudson was called to Goshen on business pertaining to the land which he held in company with Mr. Norton. He started out on horseback and alone, carrying his provisions with him. It was in July, and after going some fifty miles he found his horse jaded by the journey and used up by the flies which were the scourge of animal life in the new country. He accordingly sold his horse, and slinging his pack upon his shoulder he proceeded on his way on foot. On reaching the Cattaraugus Creek, which was considerably swollen with rains, and finding no one there to aid him, he determined to cross on his own account. It was not far from its mouth and the

current was dangerously rapid, but taking an old half-rotten sled that chanced to be near, he launched out for the other shore. Unfortunately he had miscalculated the force of the current and he found himself borne rapidly toward the open lake. To proceed far in this way meant death, and taking advantage of the course of the current he leaped from his raft upon a shifting sandbank which the current was piling up near the bank and after severe effort secured firm ground on the same side of the stream from which he had started, a wet but wiser man. Going some distance up the stream, he forded it in safety, continued his journey to Bloomfield, in New York, where he bought a horse and completed his journey and back to the settlement in safety. This was the exploit of a man over forty years of age.

The matrons were of a not less hardy race, and are no less a marvel to the women of these "degenerate days." "Carpets, or even painted floors, were not then found even in the houses of comparatively well-to-do families, but the floors were kept scoured to a snowy whiteness, and in the best rooms were neatly sanded and then marked into fantastic figures. Crockery, or queensware, as it was then called, was too expensive for the tables of the yeomanry, and the dresser was supplied with pewter platters, which must be kept polished to a silvery whiteness. The thrifty housewife kept her deal tables and benches and unpainted doors washed to immaculate cleanness. The towels, table-linen, bed-linen, and most of the summer clothing of the family were the products of home industry. The mothers and daughters hatched the flax, at a small wheel spun the thread, and afterward their hands threw the shuttle that formed the durable fabrics, the remains of which are held as heir-looms by the descendants of the old families, and proudly shown as proofs of the handiwork of hands long since laid to rest. Spinning, knitting and weaving linen, and braiding straw hats and bonnets, were a large part of the regular work of the winter. Bleaching, cutting, making and fashioning these ready for use was spring work. Then came cleansing, picking and carding the wool into bats ready for spinning on the large wheel. The yarn was woven into blankets for bedding. Some was made into checked flannel for aprons and dresses for the women, and died red for the children's dresses. Part

of the flannel was fulled for clothing for the men and boys. Then there must be many skeins of yarn of divers shades and colors for the hose and mittens and comforters of all. Knitting occupied the evenings of the grandmother and daughters in the family of the olden time, and she was considered a poor knitter who could not show a well-shaped sock or a double mitten as the result of a winter evening's work. Summer gloves or mitts were made of linen thread with a hook similar to the modern crochet needle. Nor were these branches of home industry confined to the families of farmers. No woman was held of much account whose hands laid not hold of the spindle and distaff, and who looked not well to the ways of her household, or could even be suspected of eating the bread of idleness. The strength of these women was equal to their day, and their work did not hurry them so that they could not occasionally make and receive visits of half a day with neighbors and friends. They were able to attend two long services in church on the Sabbath, and to stand through the longest prayer that was ever offered.* There was present in the early society not only the plain virtue of helpfulness, but there were some homes that without losing this, foreshadowed the culture which to-day is Hudson's crown of glory.

The fathers of the colony were not men of learning or of courtly demeanor. With tastes formed by the experiences of New England farm life, and the echoes of that controversial conflict which was characterized more by the power exhibited than by the culture of the combatants, their intellectual tastes preferred "sound common sense" to the elegant accomplishments. But they brought with them an earnest appreciation of and desire for educational advantages, which attracted those like-minded, and early cast over the community here an air of culture that was to be found nowhere else on the Reserve. By the permission of Miss Emily Metcalf, we are permitted to look in upon one of these early homes, which she has sketched with such a "tender grace." Mrs. Metcalf came to Hudson in 1814. "The first ten years of her married life were spent in a house of hewed logs, its four rooms neatly hung with newspapers; an article only procured

*Memor of Mrs. Lucy D. Brown, widow of Harman Hinsdale and Owen Brown.

in sufficient numbers through the generosity of her ministerial friends and her legal friend, Judge Parkman. Its windows were of glass instead of oiled paper, which ranked the appointments of the house as decidedly superior, nor was it wanting in a certain air of refinement, which could not be absent from a house of which she was mistress. The house stood near the woods, a mile from the nearest neighbor. Wild animals from the forest often ventured near, and Indians frequently called to light the pipe and beg a mug of cider. Her husband's ride in the practice of medicine was over several contiguous counties. * * *

At such times the wife, left alone with her small children, had no diversion from intense solicitude except in reading; and, in the scarcity of books and papers of general interest, she resorted to her husband's medical library. In the long nights, when anxiety forbade sleep to the defenseless wife and mother, these medical works were read and re-read, until, without aiming at such acquisition, she had gained a very creditable knowledge of medicine, which became of great value to her, both in rearing her own family, and in kindly offices for the sick in other families, when her services were ever esteemed above price." Mrs. Metcalf, before her marriage, had pursued a course of study in the academy at Westfield, Mass. Here her fine mental powers, stimulated by that unquenchable thirst for knowledge which characterized her whole life, ranked her high in every department of study. Especially did the artistic chord in her nature respond rejoicingly to the æsthetic culture of the school, and, after a period of nearly sixty years (1870), she leaves as heirlooms several paintings and pieces of finest ornamental needle-work, executed by herself at that time."*

Dr. Jonathan Metcalf came to Hudson in 1812. After a long tour of inspection on horseback, he came to Aurora, and was about to leave for Pittsburgh, when he was met by David Hudson, who persuaded him to visit the Hudson settlement. The place pleased him, and he took up his abode with Mr. Hudson on the 6th of June. Two weeks later, the little community was startled by the intelligence that war had been declared with Great Britain. The militia which had been formed a few years previous were ordered out. A company formed

from Hudson and the several adjoining townships, had its headquarters here, and was under the command of Amos Lusk as Captain. A good deal of uneasiness prevailed in this frontier settlement, although there seemed no necessity for any public measure of safety save to remain constantly on the alert. Late one Saturday evening in August, a messenger from Newburg entered Mr. Hudson's house, bringing the news of Hull's surrender, and the further rumor that the British and Indians in great numbers were making their way down the lake in flatboats.

The whole community was thrown at once into a fever of excitement. Preparations were made for placing the women and children in a place of safety, and the company of militia was summoned to their place of rendezvous. On the Sabbath morning following, Capt. Lusk paraded his company on the green, prepared to act upon the first information or order, when a messenger from the Committee of Public Safety at Cleveland announced that the forces approaching were the paroled troops of Gen. Hull. At this juncture, Capt. Lusk called for a volunteer to carry the news to Warren, to which Dr. Metcalf responded, as he was provided with a good riding horse. "There was then only a bridle path by marked trees to Warren, and no bridges across the streams, and he was an entire stranger to the country. He left Hudson about 11 o'clock with a letter of introduction from Capt. Lusk to Col. Edwards, of Warren, and rode forty miles on a sultry August day, swimming the Mahoning River two or three times, the water coming nearly to the seat of the saddle. He reached Warren about dark, found Col. Edwards at the house of Gen. Perkins, delivered his communication, and was invited to stay all night at the house of the former. In the morning he found an Eastern acquaintance who was trading in Warren, who informed him that Col. Cotgrave, who was then encamped with his regiment on the common, under marching orders, had raised a great excitement the preceding night. It was alleged that Metcalf was a British officer in disguise, and had brought the message to delay the marching of the regiment and gain time for the British. It was intimated, moreover, that if he had not enjoyed the protection of Col. Edwards, his life would probably have been sacrificed by the excited

soldiers."* Fortunately, the excitement was allayed by morning, and Mr. Metcalf returned to Hudson in safety. Capt. Lusk's company was ordered a little later to old Portage under Gen. Wadsworth's command, and afterward to Huron and Sandusky, being out some three months, but saw no active service. While in the service. Dr. Metcalf accompanied them as Surgeon in charge. These troops were armed with such weapons as each man owned, and something of their effectiveness may be learned from an incident that occurred at old Portage. A company of some twenty men practicing in firing by platoons found only one gun that did not miss fire at the first shot. The peace establishment after the war was entered into with enthusiasm by the Hudson people. A company of "light infantry" was organized, which was the pride of the colony and the envy of the regular militia at general musters in Ravenna.

The political organization of Hudson was very early. The settlement here was, at that time, the largest on the Reserve, and the townships of Stow, Boston, Twinsburg, Aurora and Mantua were attached to it for township purposes. It has been agreed among the original proprietors that the township should be named after its founder, and, in 1802, the Commissioners of Trumbull County, sitting at Warren, the county seat, organized this territory with the name of Hudson. On the 5th of April following, twenty electors gathered at the cabin of David Hudson, and elected Thaddeus Lacey, Township Clerk; Heman Oviatt, Ebenezer Sheldon and Abraham Thompson, Trustees; Elias Harmon and Samuel Bishop, Poormasters; Aaron Norton, John Oviatt and Jotham Atwater, Fence Viewers; Joel Gaylord and Elias Harmon, Appraisers of Houses; George Kilbourne, Moses Pond and Moses Thompson, Supervisors of Highways; Ebenezer Lister, Aaron Norton and Rufus Edwards, Constables. Of the election, Mr. Hudson was Chairman, and the voters were D. Hudson, J. Darrow, G. Darrow, Dr. Thompson, T. Lacey, William McKinley, A. Norton, H. Oviatt, E. Sheldon (of Aurora), E. Nobles, S. Bishop, J. Gaylord, A. Thompson, Deacon S. Thompson, Robert Walker (of Stow), Elias Harmon (of Mantua), Jotham Atwater, Moses Pond, Rufus Edwards and George Kilbourne. In 1801, Gov. St. Clair appointed Mr. Hudson,

* MSS. of Miss Emily Metcalf.

Justice of the Peace, and his first official act bears date of March 24, 1801, with the following entry on his docket: "Issued a writ of arrest in favor of Thaddeus Lacey against Thomas and Daniel Judd, to balance book accounts; said Lacey having made oath that, in his opinion, he is in danger of losing the debt due him from said Judds." It is probable, that in his opinion he was mistaken, for there is no further entries upon that subject, or, in fact, in that year. His official services were called into requisition, however, during the latter part of that year, but hardly in a way to call for a docket entry. This was on the occasion of the marriage of George Darrow to Miss Olive Gaylord, which he legalized on the 11th of October, 1801. On the 5th of November following, he performed the same functions for Stephen Perkins and Miss Ruth Bishop, all of Hudson. These marriages were before provision had been made to record such events, and they are found noted upon the fly-leaf of an old land record book in the Recorder's office at Warren. In the first case, Mr. Hudson is said to have been considerably embarrassed, and was obliged to correct himself repeatedly before he could satisfy himself that he had discharged his duty in the premises. The lady in the case did not exhibit so much trepidation, and showed her housewifely care, by dropping the hand of the groom at a critical point, and proceeding across the room removed a "thief" that was "guttering" the candle. On resuming her position, the ceremonies went on. The story is told of her, that a little later, when the first census taker called on her with his usual bundle of interrogations, her only response was, "George and I live here," and with this the enumerator was forced to satisfy himself. The year previous, a log schoolhouse had been erected, and this served for years in the threefold capacity of meeting, town and school house. The early records are in an excellent state of preservation, but they present nothing of any interest to the present generation. There was very little parade made by the governing powers, and, save the recording of "ear-marks," and noting the proceedings of each "annual meeting," there was no call for records. The April election was an important event, however, in the township, and was scrupulously attended by the male portion of the community. The business was generally

opened with prayer, and the day spent as a holiday. After surveying the whole township into one hundred lots, following the plan of New England villages, the proprietors laid out a public square on the geographical center of the township. This consisted of two acres in a square form, taken equally from the converging corners of Lots Nos. 45, 55, 56 and 46. There was, then, according to the record, "laid out to the proprietors of said town of Hudson, of mechanic lots, each lot containing two and a half acres, being 5.00 square, bounded south on the east and west center line; west on Lot No. 54; north on the remaining part of David Hudson's Lot No. 55; east on the public green; said lots taken off 5.00 wide from the south side of said Hudson's Lot, No. 55. Also seven mechanic lots laid off from the south side of Lot No. 56; bounded west on the public green; north on the remaining part of said Hudson's Lot No. 56; east on Lot No. 57; south on east and west center line; each lot containing two and one-half acres, being 5.00 square. Also seven mechanic lots taken from the north side of Lot No. 46; bounded west on the public green; north on the east-and-west center line; east on Lot No. 47; south the remaining part of Lot No. 46; the above said mechanic lots divided by posts and lines at 5.00 distance. Thaddeus Lacey, surveyor; David Hudson, agent for proprietors." The earliest road which opened this settlement to the outside world was that one leading to the boat landing in Boston on the Cuyahoga. This was the only outlet, and was used for several years. In 1802, Edward Payne laid out what is known under the various titles of Aurora road, Payne road or Old State road, from Painesville to Chillicothe, then the capital of the State. This passed through Kirtland, Chester, Bainbridge, Aurora, Hudson, etc. It entered the latter township where the Aurora road does, and followed its course until it struck the village, when it changed its course and followed the center road south, about a mile from the village, where it branched off to the southwest, touching a little later Cuyahoga Falls and then on to old Portage. About the same time, or perhaps a little earlier, the road from Cleveland to Canton passed through Hudson on the north-and-south center road, which is yet known as the Cleveland road. It was in this year also (1802) that Mr. Hudson, at the request of Capt. Olmsted, the proprietor

of Franklin Township, laid out the Ravenna road. The work was set on foot by petition to the Commissioners in February, and it was the last of December before he was ready to build a bridge where the road crossed the Cuyahoga River. On the 31st of December, he secured nine volunteers—S. Bishop, E. Lindley, W. McKinley, A. Thompson, H. Oviatt, M. Parker, G. Darrow, W. Leach and T. Lacey, to accompany him to construct a bridge across the "Narrows," near the scene of Brady's leap. This was no slight undertaking, poorly provided as they were with tools and machinery. A tree standing on the bank near at hand was first felled across the stream, and with this start, aided by three yoke of cattle and some volunteers from Ravenna, the structure was completed in two days, and was the first bridge constructed in this vicinity. The men took their provisions with them, camping out until their work was accomplished, and though each one thought he was contributing his labor, Mr. Hudson secured them pay at 50 cents per day. The general line of this road is still marked by Ravenna street and its extension. Some years afterward, the east-and-west center road was extended to Warren. The town thus early made accessible, took on a vigorous growth. The road thus laid out brought considerable through travel to Hudson, which could not fail to build up its business interests. A stage route was established from Cleveland to Pittsburgh as early as 1825, passing through Hudson. Jabez Gilbert was the earliest of a long line of stage-drivers who are remembered by the older residents of the place. He drove at first a two-horse vehicle, which with the increase of business was exchanged for one drawn by the regular four-in-hand, with frequently a half-dozen "extras" following it. The great drawback to this enterprise here as elsewhere, was the almost impassible condition of the roads during the inclement seasons. These were often in places too muddy to travel at all, and it was a common occurrence for teams passing on the Aurora road to make a detour on the high ground that is found to the north of it.

The first mill in this part of the country was at Newburg, which was erected by W. W. Williams in 1800. The Hudson colonists brought considerable flour with them, and were forced occasionally to go to considerable distances to renew the supply before they secured a harvest,

Dr. Thompson going at one time to Georgetown on the Ohio River, a distance of eighty miles. The first harvest was derived from the nine acres which Mr. Hudson had sown in 1799. The yield was 183 bushels, one-fourth of which Lacey got for harvesting and threshing. The balance was apportioned among the proprietors as follows: "Birdseye Norton, one-half and one-half a quarter, 85.25 bushels; Hudson, one-quarter, 34.10 bushels; Oviatt, Parmele and Baldwin, one-eighth, 17.5 bushels." The wheat was all used in the colony, however, and what was not lost was ground at the Newburg mill. "To go to mill" was a three days' task; two consumed on the journey of twenty miles and return, and one in waiting for the grist. The first load of wheat was taken to mill by Samuel Bishop, in February, 1801, under a bargain of receiving one-half for his trouble. He was obliged to set out shortly after a rain, and arriving at Tinker's Creek he found the stream considerably swollen by the rainfall. He ventured to cross, however, but found the current too strong for him, and he got back to shore, losing his entire load of wheat, and barely saving his oxen and sled. At another time Dr. Thompson and William Leach undertook the task of going to the same mill in the spring of the year. They had three yoke of oxen and a cart. The river was high and the current strong, but they urged their team across. The lead cattle soon began to swim, then the second yoke, and soon the third yoke and cart. Fortunately the first yoke had by this time gained their footing and enabled the others to successively come to the shallower water. But the cart swinging down stream with the current, and not being a seaworthy craft, lost its load of wheat, and barely carried the drivers through in safety. The Doctor was not thus brought to the end of his resources. He bought some wheat for which he gave his note, got it ground, and returned with his flour to find the stream lower and fordable. It was not possible for all to go to this expense for flour. Corn was substituted for wheat and smashed in wooden mortars, i. e., a stump with a hole burned in it with a long wooden pestle attached to a spring-pole. More of it was prepared on what was called "blood mills," a tin grater made by punching holes in a piece of old tin, then giving it a curve and nailing it to a piece of board. The community was placed under such disad-

vantages but a short time. In preparing for the settlement, Mr. Hudson had not forgotten this important feature of frontier life, and in his first bills of articles, mill-stones were prominent items. But who put up the first mill in Hudson is as variously claimed as the killing of "Cock Robin." In 1801, Ezra Wyatt and Aaron Norton commenced building mills on Tinker's Creek, in the northeast part of this township. From evidence gathered from the account-books of Mr. Hudson, though not clear, it is made probable that Mr. Wyatt began this undertaking alone, encouraged and assisted by Mr. Hudson. An entry without date is as follows: "Have been at the expense of furnishing all Wyatt's provisions and laborers, and all things necessary to build one-half of the mills, and to take my payment in boards one, two, three and four years hence, without interest. Also I have engaged to make him a free gift of 100 acres of land to encourage him to go on with the mills after the discovery of quicksand." Notwithstanding this liberal subsidy, Mr. Wyatt became tired of his undertaking, and Mr. Norton took his place, the former going to Cleveland. The saw-mill was completed for business that fall, and the grist-mill so that it would grind, but not bolt, in the spring of 1802, not far from the 18th of April. A distillery was started in connection with the mills soon afterward, and the whole business run in the name of Hudson & Norton. It stood but a year or two, when the whole establishment was destroyed by fire in the latter part of 1803. Norton, in 1806, built mills on Mud Brook in Northampton, and two years later built others in Middlebury. Deacon Thompson built a saw-mill immediately after the destruction of the Norton mill, on the site of the present Holmes mill. This stood until it rotted down, and was then replaced by Augustus Baldwin, and subsequently two others were built upon the same site. Joel Gaylord also erected a mill not far from the same time that Deacon Thompson put up his, which was replaced by George Leach, who at different times built two other mills on Breakneck Creek. The coming of Owen Brown in 1805, introduced another industry that was second only to the mills in its usefulness to the new settlement. He was a tanner by trade, and at once set about preparing to ply his trade here. He sank his vats a little west of the village, and made a good market for such skins

as the settlers derived from the game. A few years afterward, he and his son John, known better to fame in later years through his aggressive opposition to the slave-power, started another northwest of the village near where Morris Johnson now lives. George Kilbourne essayed the same business about a mile and a half south of the town on the Center road. It was not a very extensive affair; vats were sunk and a well dug, and some sheds erected, but no great amount of business was done. The well and the signs of the vats still mark the spot. Some time afterward, Asahel Kilbourne started a tannery on the run which passes Sherman Thompson's house, choosing a site just across where the railroad now runs. This was a more vigorous institution, and continued for some years. The most successful business in this line, however, was probably done by William Dobbs. He came here from Canton, and, purchasing the Brown tannery, extended the trade, and carried it on until the development of the country grew beyond his reach, and the business passed into the category of lost arts in this community. Another branch of the manufacturing business, which subserved an excellent purpose in those pioneer times was an ashery, established, and conducted by Hillis & James, early merchants in Hudson. Here the ashes of the settler's hearth and log-heaps were converted into "potash, pearl-ash and black salts," and made to serve him again in its new form.

The social customs of the time, and the only avenue of foreign trade, made the distilling of liquor an early and profitable business. Oviatt, who commenced trading with Indians as early as 1801, found whisky not only a legal tender for whatever he cared to buy, but a commodity in very lively demand by the natives. He built a distillery on the stream near Sherman Thompson's residence, but probably not until the Hudson & Norton distillery had burned down. This he continued for some years, but the sale of it to the Indians was forbidden by the Government, and he finally abandoned it, though it had proved very profitable to him. George Darrow erected another about 1815, where the Eagle Cheese Factory now stands, and manufactured rye and corn whisky for years, selling it at his place of business to such as wanted it. There was an abundant demand for it for years after the Indians had generally removed. Whisky was found everywhere in

the early society, and none were "Puritanic" enough in their sentiments to object to its use. At the stores the customer found it "on tap," to use free of expense; every social gathering was enlivened by its presence and use; and even preachers and people drew nearer each other in a social glass. The good judgment of people was not blinded to the evil which was growing up in the shadow of this social custom, and a movement to curtail its use was begun by those who had used it freely for years. It began to be refused at house-raising, perhaps, as early as 1820 or 1825, to the no small opposition of a considerable portion of the community. At one of these temperance raisings, it is said, the two elements of society met, and the opposition refused to let the building go up. They held on to the frame-work, until, by the redoubled efforts of the temperance men, who were in a majority, they were lifted off the ground and the structure went up. In 1828 or 1830, the barn of Dr. Everett was raised without whisky and without opposition, the opposition staying away entirely. An incident is related of Rev. Randolph Stone which illustrates how strongly the habitual use of liquor had become fixed in the social intercourse of the time. Mr. Stone had taken a very pronounced position in favor of temperance, going to the extent of advising that all apple-trees should be destroyed to prevent the manufacture of cider. Soon after taking this position, he took some students to board that had come to attend the Western Reserve College, then just opened, and placed upon the table for their use, some "whisky and fennel," of which, however, he did not partake. This was probably from the force of habit and the desire to avoid the appearance of discourtesy, but was very soon abandoned.

The early years of the township did not demand a hotel to dispense its hospitality. Each pioneer entertained strangers as often without pecuniary remuneration as with it. But as the town grew in proportion and the through lines of travel were established through the place, there was a demand for an inn. Heman Oviatt first provided such entertainment at his cabin, a mile south of the village, but, about 1813, he preferred to confine his attention to the more lucrative business of trade, and persuaded Mr. Hudson to open his house to the public in this way, and this was perhaps the first *regular* inn in the village. This was at the house where

Mrs. Harvey Baldwin now resides. Mrs. Baldwin, when a girl, often presided at the bar, and the fare dispensed in those days may be inferred from the fact that on one occasion the whole female force of the family was occupied the whole day in baking "corn pones" for the consumption of their guests. In 1816 or thereabouts, George Kilbourne offered "entertainment for man and beast" where Justin Kilbourne now lives; some years afterward—about 1825—Augustus Baldwin opened a hotel in the house where Mrs. Buss at present resides, and another was kept by George Darrow at the present residence of William Darrow. The "Mansion House," the only survivor of this race of public benefactors, was built in 1830, for Samuel Edgerly. It was afterward put into a lottery by Mr. Hertzell and disposed of, but who the fortunate possessor of the ticket was is not revealed. A long line of hosts have entertained the public here, among whose names appear those of Edgerly, Hertzell, Shields, Wadhams and Bouton, the present host. In the palmy days of the stage business, the Mansion House was a place of consequence, and attracted a large crowd of patrons of the stage and idle lookers-on, which of late years has been transferred to the railway station.

Business beginnings found their start with Heman Oviatt a mile south of the center of the township. His trade was at first confined chiefly to the Indians, who, so long as they remained, were his most valuable customers. When he had accumulated skins enough to make two good-sized bales, he would load them on a horse across a pack-saddle, and take them to Pittsburgh, which was his nearest market. His return load was made up of shawls, blankets, powder, lead and whisky. The latter he soon made himself and avoided transportation, and gradually worked into the sale of commodities to the settlers. About 1806, he came to the "Center" and opened up his business, more especially for the patronage of the settlement occupying the front room of the Grosvenor House in later years. He was a keen business man, requiring the last cent in a bargain, but just as ready to pay it when he agreed to do so. A story is told of him which illustrates the former characteristic of his dealings. In the course of some dealing with a member of the settlement he had taken a note for \$1.01, which was nothing unusual in those days of fractional

cents and petty dealings. A short time afterward, the drawer of the note handed Oviatt \$1 which he accepted with some hesitation, and, after some cogitation, said, "I suppose you want this indorsed on your note, don't you, John?" He was always on the alert for a safe business venture, and, in the fall of 1815, he put in \$1,000 into a partnership with Zenas Kent, the latter furnishing \$500 more and setting up a store in Ravenna, which proved a "paying" business. He was a partner with Alison Kent in Canfield and with Roswell Kent in Middlebury. He retired from business about 1825, and is remembered as a close bargainer, strictly honest and successful in business. In 1812, the business circle of Hudson received a valuable accession in the Baldwin brothers. Pomeroy Baldwin, after the death of his father, came to Hudson in 1811, to look after the property the family owned here. He remained but a short time, and returned to his home in Goshen in company with Mr. Hudson. The journey was made in a "pung" sleigh, with conveniently shaped roots as runners. In the following year, Augustus and Frederick came to Hudson, arriving on the 12th of June, bringing with them Dudley Humphrey, who had shipped a lot of boots and shoes as a speculation. The Baldwins proposed to open up a business in dry goods, and all the goods were shipped from Buffalo, whither they had brought them with two teams. Seventeen days were consumed in reaching Buffalo from Goshen. The distance from the former place to Cattaraugus Creek, thirty-two miles, was accomplished in a single day, which was considered a remarkable event. Their store was built near the site of C. H. Buss' present store, and, in 1827, they put up that building. The character of the early trade may be imagined; cotton cloth, three-quarters of a yard wide, sold for 50 cents; 75 cents for the yard-wide cloth. At that rate, it took three days' work to buy a shirt. The Baldwins built Mechanics' Hall about 1830. This was a frame building, placed in the rear of where Buss' store now stands, and, in accordance with the original plan of the founders of the town, was occupied by the mechanics of the place. Here was the shop of the shoe-maker, the tailor and cabinet-maker, "to their majesties," the popular sovereigns of Hudson. This formal arrangement did not last long, and each workman was soon found where

inclination or favorable circumstances suggested to him. Before this, the tanners were shoe and harness makers as well, and it was the custom to "cat whip it" throughout the community, *i. e.*, the workman went to each family with his kit of tools, and worked up the leather which each provident citizen provided for the family, shoes and such harness as he needed. Among the early blacksmiths were Treat (who afterward went to Aurora), Ruggles, Perley Mansur, and Hinsdale who came here in 1814. The Baldwin brothers changed the members of the firm several times, one brother and another retiring until they were succeeded by J. H. Crawford & Co., who gave way to Hillis & James, whom Mr. Buss followed in occupying the store. Mr. Augustus Baldwin went to Franklin Mills in 1836, to engage in the banking business, and his brother Frederick to farming in Hudson.

In 1830, A. A. Brewster came from Ravenna and opened a store in a building which has since been enlarged and used by Mr. Farwell as a blacksmith-shop. Soon afterward he moved into a building on the corner of Main and Aurora streets, where the present brick building was erected. Mr. Brewster first began business here in partnership with Zenas Kent, of Ravenna, the latter being represented solely by his capital. Mr. Kent came to Hudson in the spring of 1814, and settled on Darrow street. He came, it is said, with his wife, in a one-horse peddling wagon, bringing in some goods. He worked the first summer at the carpenter's trade, and in the winter taught school. In the following fall he went to Ravenna and opened up business with Oviatt, where he amassed considerable property, buying out his partner and conducting the business alone for years. In 1833, he reciprocated the interest of Oviatt, and induced Mr. Brewster to come to Hudson under a similar arrangement. The latter purchased Mr. Kent's interest, and, in 1855, admitted D. D. Beebe as partner, who eventually succeeded to full control and still conducts the business. About the same time with the coming of Kent & Brewster came Hamlin & Dawes, which changed later to firm name of Hamlin & Ellsworth, and then to Ellsworth & Buss, and, finally, to John Buss alone. Mr. Buss came to Hudson in 1833, to attend college, but, his health failing, he went South. Returning, he entered the store of Kent & Brewster, and, about 1841, entered into business with Ellsworth in the

present old bakery building. While here the firm changed to Buss & Bond; and, in 1845, Mr. Buss bought the store where his son, C. H. Buss, succeeded him in the business, which he still continues. The only attempt at banking in Hudson was by Mr. Brewster, who furnished facilities for collection and discount of commercial paper in connection with his dry goods business. He continued it only a few years.

Up to 1851, Hudson's only means of communication with the outside world was such as the dirt roads afforded, and these for a large part of the year were nearly impassable for light vehicles, not to mention heavy-ladened wagons. Yet, in spite of these disadvantages incident to an inland town, the village gradually increased in size and importance, and the projected railroad from Cleveland to Pittsburgh, which was agitated some time previous to 1851, did much to increase its prosperity. The first charter granted for this road expired by limitation, because it was not used; but, in 1846, it was renewed. The people of Hudson took a great interest in this movement, and subscriptions were made to the extent of the people's ability, Judge Sylvester H. Thompson being one of the commissioners appointed on behalf of the State. In 1850, the road was finished to this place, and the people and the members of the Legislature received the first train in Hudson with great rejoicings in 1850. The business men and citizens of all classes became enthusiastic over the future prospects of the village, and an enterprise was at once put on foot to construct another line of railroad, one that should connect New York with Omaha direct. The plan was to combine a number of separate lines through New York and Pennsylvania to the Ohio line. From this point, it was proposed to build the Clinton Air Line along the line surveyed years before for the Clinton Canal, to Hudson. The plan further proposed an "extension" west from this village to Toledo, and one to Omaha. During this movement, the "Akron Branch" of the Pittsburgh road was completed to Akron, and Hudson seemed right in the direct line of preferment. The Clinton Air Line was particularly a Hudson enterprise, and some \$200,000 were subscribed in stock, and some of the citizens prominent on the Board of Directors. The work was pushed with vigor, and some \$18,000 expended on the road-bed in this township.

This activity in railroad matters stimulated business circles in the little village into a perfect frenzy of speculation. Henry N. Day, who came to Hudson as a Professor in the college, and who had some capital, went into business, and put up the Pentagon at a cost of \$18,000, in 1849-50. It was occupied by Sawyer, Ingersoll & Co., Mr. Day constituting the "company." This firm launched into the publishing business on the broadest scale. The town was known as an intellectual center, and a paper of considerable influence had been published here for years, and the firm proposed to build up a large publishing house. All branches of the business were undertaken, and proved successful so long as they confined their attention to jobbing. Ambitious, however, to gain a reputation as publishers, they began to publish on their own account, and soon found their capital locked up in unprofitable books. The firm then changed hands, and D. Marshall & Co. took the business. The change brought no increase of capital to the concern, and it soon changed to the Hudson Book Company, which finally made an assignment. In the west part of the building, J. W. Smith & Co. opened a dry goods store about the same time, Prof. Day and Jeremiah Day, of New York City, forming the company. This firm, possessed by the same spirit of speculation, expanded their operations to the fullest extent, trusting to the realizations of the future to justify their risks. In the meanwhile, large accessions to the population of the village were attracted, and every house was crowded. Rents and property were high, and the demand was for more houses. At this juncture, a planing mill and lumber company was formed to cater to this demand for more buildings. Smith was the prime mover in this enterprise, and the business was planned on a large scale. A \$10,000 stock of lumber was secured, houses were built for everybody on easy terms, and the village bid fair to become a city on the strength of railroad promises. All this business activity exacted a large expenditure of money, and far in excess of what the persons engaged in the operations possessed. But they had friends who were easily convinced that the future of Hudson was assured, and readily advanced large sums of money. In addition to this outlay, the promoters of these projects were also deeply interested in the success of the Clinton Air Line Railroad, and were

subscribers to a large amount, as were most of the moneyed citizens.

All this activity and expenditure was crowded into the space of some five or six years, and, before that time had elapsed, the suspicion began to be entertained that neither the present nor future of the village warranted this extravagant outlay of capital. Public faith in the final completion of the new railroad began to waver, the terrible strain upon the authors of this artificial business activity began to be observed, and the whole commercial fabric of the village, like a great wall tottering to its fall, seemed about to end in a crash. The end soon came, as it might have been foreseen, perhaps, from the beginning. There was one assignment after another, until not only was all of the overestimated business wiped out, but all business received such a shock as to require several years to rally. The lumber company suspended with \$35,000 liabilities, and J. W. Smith, who was active in all these enterprises, retired with \$100,000 liabilities and \$80,000 nominal assets. On the heels of all this came the realization of the worst forebodings of the Clinton Railroad, involving not only a loss of all subscriptions, but a liability for an equal amount in addition. Fortunately, by the misplacement of some records, the Hudson subscribers escaped from the full penalty of their enterprise in this matter, or the whole business community would have been financially annihilated. Belonging to this period, though in no way connected with the movers in other enterprises, were J. C. Snyder and I. C. Dowd, produce merchants, who, attracted by the business activity of the village, linked their fortunes with the place. The latter built a warehouse near the depot, and both did considerable business, but, in the end, they only served to swell the general disaster. Tallmadge & Jaynes' grist-mill, built on the Brandywine Creek, where the Cleveland & Pittsburgh road crosses the stream, was built in 1852 or 1853. Though suffering in the general depression, it did not cease altogether. It changed into the hands of a Mr. Wilson, and after an existence of some ten or twelve years was destroyed by fire.

Singularly enough, in this prostration of business are found the beginning of some of the largest enterprises of the present. After a tedious litigation, the planing-mill property fell

into the hands of Osborne, Dunham & Co., who fitted it up and manufactured the Buckeye Land Roller, and, later, with Benjamin Wheelock, manufactured chairs. The business did not prove successful, and the property came into the hands of Mr. Wheelock alone, and, in the fall of 1873, Jacob Miner put in two run of stone, and fitted it up for milling purposes, taking a share in the whole property. Through Wheelock's business embarrassment, the property once more fell into the hands of the law and the Sheriff. It has finally become the property of A. R. Hurd. It has since been improved by the addition of two new run of stone and otherwise improved to the capacity of fifty barrels per day. It is rented by the Hudson Mill Company, and does a large custom business, filling any spare time on a light jobbing trade which they have fallen into rather than built up.

On the ruins of the old Pentagon enterprises is now established the flourishing factory business of S. Straight & Son. The senior partner of this firm was, at the time of the Hudson depression, a member of the firm of Straight, Demming & Co., commission merchants of Cincinnati, and had done considerable business with the produce dealers here. One of the the Hudson dealers becoming involved, secured the Cincinnati firm on a part of this property here, which, in the end, was bid in for the Cincinnati house. Subsequently, when Mr. Straight retired from active relations with the Cincinnati business, this property attracted his attention to Hudson, and was influential in determining his locating here. He began the cheese-factory business in Hudson in 1867, by the purchase of two and the building of one factory. He secured the Pentagon building and fitted it up with shelving for 15,000 cheeses for his business, at a cost of about \$7,000; later, admitted his son to the business, and has enlarged the business from year to year, until now the firm owns and operates thirteen cheese-factories, making the milk of over 6,000 cows into 50,000 cheeses annually. In 1878, the firm erected a large brick curing-house in the rear of the Pentagon, 60x60 feet, with two stories and a basement, at a cost of \$10,000. This building is supplied with an engine and boilers, steam elevators, three large exhaust fans, and shelving for 12,000 cheeses. The basement has storage capacity for 250,000

pounds of butter. An ice-house, with a storage capacity of 450 tons of ice, is provided with a series of pipes through which the air is drawn by the exhaust fans for the cooling of the curing-house. In addition to the large amount of cheese manufactured by this firm, they buy immense quantities in Illinois and elsewhere, shipping it East or storing it in their buildings in Hudson until the market will warrant its shipment. The firm employs sixty-five hands, and buys all the milk of the farmers, each factory working up the milk of from two hundred and fifty to six hundred cows. The capital invested in fixtures is estimated at \$100,000, and the business of the firm is rated among the few large Western firms in this business.

Closely connected, historically, with these enterprises is the Hudson Butter-Tub and Cheese-Box Company. In 1870, Mr. E. A. Osborne, in connection with E. Croy, built a small building and started this business. These gentlemen had had a connection with the enterprises that preceded the grist-mill and withdrew to supply the demand which the cheese trade of S. Straight & Son began to make. The business rapidly developed, and seven or eight hands were constantly employed in the manufacture of cheese-boxes. In 1873, the machinery for the manufacture of butter-tubs was added, and the business prosecuted together until 1878, when the partnership was dissolved. The firm is now E. A. Osborne & Sons. They turn out in the busy season about one hundred tubs and two hundred cheese-boxes per day. The timber is taken in the log and worked up with little waste, the parts unsuitable for the boxes and tubs are worked up into staves, heading and spokes. The business demands an outlay of about \$500 per month. Their boxes are sold principally to S. Straight & Son; the tubs are sold in Chicago, Cleveland and Pittsburgh. Closely adjoining is the saw-mill and cheese-box works of E. Croy, who established an independent business on the dissolution of partnership in 1878. This covers the manufacturing business of the village at present, save the Oviatt Manufacturing Company. This company was organized in January, 1878, for the purpose of manufacturing the "Oviatt Grain-Thresher," the "Common-Sense Wagon," and the "Independent Runner Sled." The patents are held by S. E. Oviatt and it was

proposed to build up a manufacturing enterprise of considerable extent. The company was composed of eight members, principally mechanics, on the co-operative plan. In a short time, four of the company bought the stock of the other four, but a lack of the necessary capital has greatly restricted the enterprise thus far. Their products have met with abundant encouragement wherever placed upon the market, and the expectation is that at no distant day the necessary capital will be secured and the business developed.

Meanwhile, the "internal improvements" of the *de facto* village had kept pace with its business enterprise. The earliest frame building was the barn of Mr. Hudson, built almost entirely of black-walnut lumber, sawed at Norton's mill. This was followed, in 1806, by the house which Mrs. Baldwin now owns and occupies as a residence. These pioneer frame buildings were soon followed by others as there was neither a dearth of timber nor scarcity of mills. In 1826, the college was established and the buildings, gradually put up, improving the appearance of the town and stimulating its citizens to build more comely structures for dwellings. The soil rendered the supply of brick inexhaustible and cheap. The brick needed for the spacious hearths and great chimneys of Mr. Hudson's house, were made by a Mr. Lyon on the site now occupied by the Athenaeum, the mud being tramped into condition for molding by two yoke of oxen. The first brick dwelling was put up by Julian Lusk, on the site occupied by Farrar's Block, and ante-dated the college buildings some three years, being erected in 1823. An early brick house and perhaps the second one was that erected by Asahel Kilbourne and now occupied by Sherman P. Thompson, situated south of the village. The college brought a large accession to the population of the village, and the village began to expand. It was the design of the founders that the town should gather about the geographical center of the township, but there were several obstacles in the way. The ground toward the south was low and undesirable for dwellings and the owners of these lands were rather reluctant to sell in small parcels, and the village early began to extend northward and eastward to the higher ground. The location of the college buildings, secured by a liberal donation of land by Mr. Hudson, had some-

thing to do with the direction in which the expansion of the village took. With all this growth, however, such improvements as municipal government grants to a community, was left to the voluntary action of the people without any very great results, and it was not long before the citizens began to agitate the desirability of securing a village *de jure*, with its advantages in this respect. On April 1, 1837, an act of the Legislature was signed, incorporating the village to be known thereafter as "The town of Hudson." The boundaries, inclosing an area one mile by one and a half miles, are described in the act as follows: "Beginning at the southwest corner of the herein contemplated corporation limits, at a stake and stones 160 poles west of the north-and-south center road, leading through said township of Hudson, and 240 poles south from the east-and-west center road, running through said township; thence from said southwest corner, running north in a line parallel with said north-and-south center road 480 poles to a stake and stones; thence east in a line parallel with said east-and-west center road, 320 poles; thence south in a line parallel with the west line, 480 poles to a stake and stones; thence in a line parallel with the north line, 320 poles to the place of beginning." These limits have not been found to interfere with the metropolitan aspirations of the village, and no extensions have been made. A few unimportant additions have been platted on the Aurora road, and somewhat built up, but there has been no positive demand on the part of the owners of this property to be admitted to a share in the municipal taxes.

The first election under the act of incorporation was held on the first Tuesday in May, 1837, resulting in the choice of Heman Oviatt as Mayor; Lyman Hall, Recorder; Frederick Baldwin, John B. Clarke, Jesse Dickenson, Harvey Baldwin, Daniel C. Gaylord, Trustees. The largest number of votes received by any candidate was nineteen. The records of the Board of Trustees, or, in more modern phrase, of the Council, are devoid of any particular interest in the early years. One or two entries, however, afford a striking illustration of the vanity of all aspirations for wealth, when they appear on the tax lists. The real estate valuation of the village, in 1837, was placed at \$93,967.58, and personal property at \$19,474; in 1844, the next entry of the tax list, the real es-

tate had shrunk to \$30,427, and the personal property to \$12,177. The attention of the Council during the first eight or ten years was to sidewalks and streets. The latter had been pretty well provided for by land owners before the incorporation of the village, and needed but little attention in the way of originating highways. The sidewalks was a subject of more portentous proportions, and gave the average Councilman no end of worry. It was first ordained that the sidewalks should by constructed of "brick, four feet wide, and curbed with heavy timbers," plank was afterward allowed as a substitute for the brick, and represents the character of nine-tenths of the sidewalks in the town at this day. Stock was "ordered off the streets," and a "pound" provided for, at the first meeting of the Council, but it was a year before the structure was ready to serve the public, and cost about \$20. In 1852, the first step was taken to improve the public square. As early as 1812, the tendency of the village to extend northward was observed, and the Township Trustees took steps to modify the "public green" to suit the new order of things. By exchanging portions of the original green, that portion of the green above Church street was secured. Nothing was done to improve it save to clear it of the timber until 1852. The Council then provided a fence, seventy-four trees and had it plowed, sowed to oats and "seeded down." In 1854, the subject of proper protection from fire came before the Council. Neither the township nor village had suffered severely from fire, if the terrible fatality in connection with the destruction of the cabin of Nathaniel Stone, in 1845, is excepted. Mr. Stone was one of the early settlers, and was then occupying a cabin where his son, Roswell Stone, lives, when it caught fire. A son and daughter occupied the upper chambers, and, when they were aroused, the stairway was in flames, having ignited from the fire-place. The chambers were filled with smoke, but the son, making his way to a window, escaped; but the daughter, some twenty-two years of age, stifled with smoke and bewildered with fright, was too late, and perished in the flames. Undoubtedly this tragedy made a lasting impression, and the growing village rendered the danger of fires more threatening. A small, rotary engine was bought at Middlebury, but before it was paid for the au-

thorities desired to "back out." The seller would not accede to their wishes in this matter, and the coffee-mill affair was brought to scare the fire fiend away. Reservoirs were constructed from time to time, but the inadequacy of the engine became more and more apparent, and, in 1858, the Council bought the present machine of Button & Blake. The pumps are 9 and 7 inches, 17½-foot brakes, 16-foot suction hose, and wheels of 28 and 35 inches diameter. The cost was \$725. The company organized to work the first engine took this in charge, and of this organization the fire department consists to-day. There is a chief of the department, and the company is allowed a small remuneration for attending the fires that occur. The engine-house is found in the rear of the Congregational Church, to which it belongs, but is given rent-free to the village so long as it is used as an engine-house and the machine kept there. In 1879, the Council re-organized this department, proposing to pay each member \$1 each six months, provided that the number should not exceed forty. In 1870, the corporation rose to the dignity of a "lock-up." This was situated upon a corner of the school-lot, and was a wooden affair, with some iron supports about the windows, erected at a cost of some \$125. It fell into disrepute with certain citizens, and was set on fire, it is supposed, by some one who had had a more intimate acquaintance with it than he enjoyed, and totally destroyed. An effort was put forth by the Council this year to improve the streets by the use of cinders from the rolling mills at Cleveland. This material was bought at the mills at \$1.50 per car, and freighted here by rail at \$6 per car load. A part of Main and College streets were treated with a layer of this material, covered with gravel from the vicinity of the village, with very beneficial results. Some portions of other streets have been treated in like manner, with some variation in the price of materials. In 1877, lamps for lighting the streets were provided, on condition that certain parties who were chiefly benefited would supply the material for the lighting and care for the lights. A year later the Council took the matter into their own hands; and from a start of thirteen lamps, in 1877, the number has doubled at the present. In 1878, the subject of a town hall began to be agitated. The Council had met in various

rooms and offices about town, and after the lock-up was burned, there was no provision for municipal criminals, and the demand seemed to be pressing. The Township Trustees took the proposition in hand, and, after submitting the matter to a vote, made preparation for the erection of such a building. The Council then proposed to join with them and provide for the need of the corporation in the same structure. Such an agreement was made, the Council buying the site of the old Congregational Church for \$800, and leasing it to the Township Trustees for ninety-nine years, in consideration of the latter providing a council-room and cells, with an upper hall open alike to both parties. The contract for the building was let in 1878 to Thomas Crisp and Charles W. Stewart, for \$4,575, and finally a further allowance of \$215 for extra work was paid. The building is a two-story brick, with a large hall on the second floor, neatly seated, and two rooms below for the use of Trustees and Council with two cells in the rear for corporation culprits. The first meeting of the Council in their new quarters was on November 11, 1879. The Council took action in May of this year to support a public reading-room and library. This project had been set on foot by private enterprise, but was likely to fail, and the Council stepped in and has maintained it since. There is no library in connection, although the original plan contemplated such an addition. Another department of the municipal government is the cemetery.

The original cemetery purchased by the Township Trustees was situated on the Brandywine Creek, southwest of the village. The first death in the settlement was that of Ira Nobles, a child eight years old, who died Aug. 23, 1801, and, it is supposed, was the first burial here. It was used as a burial-place until 1808, when, on the occasion of the death of Mrs. Owen Brown, it was found too wet, and Mr. Hudson effected an exchange for the ground on College street. Here Mrs. Brown, with a babe resting upon her arm, was the first occupant. This continued to be used until 1855, when Markellie laid out one in the northwest part of the village. At his death in 1869, he willed the ground to the corporation, the gift being accepted in the spring of that year. Since then it has been cared for by a regular appropriation. It has been enlarged

since then, systematically laid out, and is the only place for burial in the corporation. Burials have been forbidden in the old burial ground on College street, and efforts have been made to remove the remains from that place, but it has been resisted hitherto. There are a number of cemeteries about the township, some private and others for neighborhood purposes. Of the latter, an acre contributed by Mr. O'Brien in the southwest part of the township and Maple Grove Cemetery, on Darrow street, are the more important.

Hudson village, of the present, is pleasantly situated, of some seventeen hundred inhabitants, noted for its neat dwellings, its general air of culture, and the seat of the Western Reserve College. The business portion, situated principally on Main street and about the public green, consists of four general stores, four saloons, three hardware stores, three meat markets, five blacksmith-shops, three harness-shops, two groceries, two barber-shops, two drug stores, two wagon-shops, two livery stables, a bakery, millinery store, undertaker's establishment, boot and shoe store, merchant tailor store, jeweler's shop, and one hotel. Of the public buildings, there are three church buildings, the town hall and the Adelphi Hall, or better known as Farrar's Block. This is composed of two large store-rooms below, with offices on the second story, and a fine large hall which occupies the whole of the upper story. The hall has a seating capacity of 900, is provided with commodious dressing rooms, a spacious stage and fine scenery. Such a hall, accessible to an appreciative community, attracts some of the finest entertainments, and Hudson is favored far beyond the average village of its size. This block was erected in 1866 by C. W. Farrar and Dr. A. E. Berbower.

Hudson Lodge of Free and Accepted Masons, No. 510, finds a home here. Its lodge room is in the upper part of the old bakery building. The lodge was organized November 25, 1874, and worked under a dispensation until a charter was issued under date of October 18, 1876. The first officers were Lewis Lemoine, W. M.; James K. Frost, S. W.; S. E. Judd, J. W. The charter members were J. K. Frost, S. E. Judd, C. H. Buss, and twenty-one others. They have a fine rented hall pleasantly furnished. There was an early lodge established here, of which many of the prominent citizens—D. Hudson,

JOHN BUCHEL

Harvey Baldwin and others—were members. During the excitement succeeding the abduction of Morgan, the lodge was abandoned, and an opposition sprung up to this fraternity that lasted for years.

In a settlement founded upon the principles upon which Hudson was established, it would be natural to find the church organization among the earliest institutions of the place. The difficulties in the way of such an organization should not, however, be underrated. Ministers were few, and could not have been adequately supported by the scattered communities then planted in the wilderness, if there had been more. Providentially the demands of the time and place were met by the representative of the Connecticut Missionary Society, Rev. Joseph Badger, whom Congregationalists delight to call the "Apostle of the Reserve." From his printed diary, the first inception of the Hudson Congregational Church is learned as follows: He had come from Cleveland to Newburg. "In coming from Cleveland to this place, I fell in company with a man from Hudson, who wanted to know if I was going there to form a church. I replied that if I found suitable characters, I should. 'Well,' said he, 'if you admit old Deacon Thompson,' and some others he named, 'it shall not stand; I will break it down. I will have an Episcopal Church.' I observed to him, 'You must undertake a dangerous work to break down the church of Christ; I advise you not to meddle with such an undertaking.' I went on to Hudson, preached on the Sabbath, and on Wednesday organized the church in that place, in which Deacon Thompson, Esquire Hudson and others were united." This was on September 4, 1802, the original members being Stephen Thompson and Mary, his wife; David Hudson; Abraham Thompson and Susanna, his wife; Stephen Thompson, Jr., and Abigail, his wife; George Kilbourne and Almira, his wife; Heman Oviatt and Eunice, his wife; Amos Lusk and Hannah Lindley. These were all members of the Congregational Church, at Goshen, Conn., save the last two, who were members of the same denomination at Bloomfield, N. Y.

The church thus established depended upon Mr. Badger and other missionaries for what preaching they had. Services were held in the log schoolhouse that was erected in 1801, and

which served for all public gatherings relating to church or State. The absence of a minister did not prevent public worship and it is related with pride that not a single Sabbath since the latter part of June, 1800, has passed without public religious services of some character. The Rev. David Bacon, who had gone in behalf of the Connecticut Missionary Society as a missionary to the Indians in 1801, was recalled to New Connecticut in 1804. "In the month of August he left the isle of Mackinaw, with his wife and two children, the youngest less than six weeks old, and, after a weary and dangerous voyage, some part of which was performed in an open canoe, they arrived safe on the soil of the Western Reserve. About the 1st of October they were at Hudson, where they found a temporary home."* The church proposed then to hire him one-half of his time, provided the society would retain him in their employ for the balance. This arrangement was effected—the first time that the Gospel was administered in any township otherwise than by occasional visits of itinerant missionaries—and continued until 1807, when he moved to Tallmadge. On the 19th of April, 1811, it was voted unanimously by the church that "Benjamin Whedon be appointed a committee for us, and in our behalf to procure a minister of the Gospel to dispense the Word and ordinances in this place, and the said Mr. Whedon is hereby requested and authorized to make such negotiations and arrangements on the subject as he shall judge prudent and proper." The result of this action on the part of the church was a vote, February 27, 1815, to call the Rev. William Hanford. The call was issued under date of June 10, 1815, and brought an affirmative response under date of August 10, 1815, followed by the installation of Mr. Hanford by the Grand River Presbytery, on the 17th of August, 1815, the church having come under the care of the Presbytery shortly before this occasion.

It would be interesting to note here that "Plan of Union" which eventually agitated church circles throughout the Reserve, and found in Hudson its main support and exponent. Eventually the church became divided upon this subject, and, in 1826, the article prescribing the form of its prudential committee was erased from its regulations. In 1830, a movement

*Address of Rev. Leonard Bacon.

was inaugurated to sever the connection of the church with the Presbytery, and, five years later, the Presbytery granted a release. Since that time, it has been what it was originally, a Congregational Church. The organization still retains a large Presbyterian element, which, in connection with the majority, works harmoniously to the end of all church effort. The internal growth of the church has been regular and uninterrupted. Up to the pastorate of Rev. William Hanford twenty-seven members had been admitted, principally by Revs. Joseph Badger and Abraham Scott, both missionaries of the Connecticut Society. During Mr. Hanford's pastorate, from 1815 to 1831, 133 were added; in the pastorate of Rev. Amri Nichols, from July to December, 1832, nine were added; by Rev. Giles Doolittle, supply, 1832-40, fifty-two were admitted; by Rev. Josiah Town, July to October, 1840, eight were admitted; Rev. Mason Grosvenor, during his pastorate, 1840-43, admitted fifty-six; Rev. William Hanford, in October, 1843, admitted two; Rev. John C. Hart, in his pastorate, 1844-52, admitted 122; Rev. N. Barrett, 1853-58, admitted ninety-seven; Rev. G. Darling, 1858-74, admitted 196; Rev. E. W. Root, 1874-76, admitted twenty-six; Rev. J. Towle, 1876, admitted two; and Rev. T. Y. Gardner, 1876. —; the present pastor has admitted forty-one up to October 6, 1878. There are now about 200 members.

The outward improvement of the church began in 1819. On the 26th of June, 1817, at a "town meeting" held in the "Center Schoolhouse," it was voted that "there shall be a place selected for the purpose of building a house of public worship, according to a subscription paper now in circulation, provided the different denominations do not unite in building a house together. Voted, that the house shall stand on the west side of the green, the southeast corner to stand where there is now a stake stuck in the ground, and to extend thence north from said stake, and as far back as it shall be necessary to build said house. Voted, that Joel Gaylord, Daniel H. Johnson and Owen Brown shall be a committee for the purpose of adopting some method upon which to unite in building a meeting house for different denominations of Christians." At this time there was a great deal of denominational difference among the members of the community.

A church building resulted from this action, and was erected upon the site chosen, but the bond of union in this project trenched too much upon the orthodox notions of such men as Mr. Hudson, Owen Brown, Benjamin Whedon and others, and they decided to build for themselves. Timbers for the frame work were brought upon the ground, but they laid upon the ground near the schoolhouse for nearly two years while the people wrangled over the proper site. In March, 1818, the Congregational society, having decided to build a place of worship on their own account, selected the site now occupied by the town hall. The building committee consisted of Benjamin Whedon, Moses Thompson and Heman Oviatt, with Augustus Baldwin as Treasurer. Owen Brown was the contractor, and was two years in completing the building, which cost upward of \$5,000. It was dedicated on March 1, 1820, and, in the old New England style, was for several years without the means of warming it during the cold season.* In 1865, this building was abandoned for church purposes, and served, under the name of Thompson's Hall, for public gatherings until 1878, when it gave place to the town hall. The present brick edifice on Aurora street was projected in 1863, and completed some two years later, at an expense of \$10,000, in addition to the cost of lot and furniture.

The Union Church building, the result of the effort above mentioned, was used in common by the Universalists, Methodists, and any others that desired to have a hearing. Among others remembered as preaching here, are John Campbell and his son Alexander. The Methodists finally built a place of worship on Aurora street, and the "Free Church" was after awhile sold and used for a blacksmith-shop.

The Methodist Episcopal Church was organized in 1828, with Daniel Gaylord, Moses Draper, Perley Mansur and their wives as early members, with others. In 1846, their building which stands on Aurora street was erected, Mr. F. W. Bunnell being the contractor. What the contract price was is unknown, but the contractor received \$1,600 in addition to contributions of labor, etc., on the part of subscribers.

* Elizer Wright relates an incident of his early going to church which illustrates the difficulties attending the early worship here. He says: "I remember taking my brother-in-law Hanford's old gray horse, and taking my wife upon the horse behind me. She was not used to this way of riding, and when the horse began to flounder in the mud of the bottoms near the green, she became alarmed, and alighting in the mud, lost one of her shoes."

The first pastors in the new house were Rev. D. Prosser and Rev. Pinney. The church has suffered severely by removals and death, and gradually dwindled in numbers, until there is now no regular service held in this church building on the Sabbath. The last entry upon the church records is as follows: "I. Thomas Hickling, came to Hudson from Massillon, in the boundary of the Pittsburgh Conference, on April 4, 1873, to reside and do business, and found the society in a very indifferent condition, without any regular means of grace, and, being an ordained local preacher, volunteered my services and found them appreciated." There were then twenty-seven members.

Early in the year 1840, a few residents of Hudson Township, desiring a place "where the worship of God could be conducted according to the primitive usages," proposed the organization of an Episcopal Church. Henry O'Brien and Frederick Brown were the leaders in this movement, and finally invited T. B. Fairchild, of Cuyahoga Falls, to come to Hudson to preach. The call thus extended was accepted, and Mr. Fairchild held the first services in this year in the Congregational meeting-house. The second service was held in the room over Kent & Brewster's store, and continued there until late in the fall of 1840, when, by the consent of the authorities of the Methodist Church, their services were held there. During the following spring, Mr. Fairchild, with Rev. George S. Davis, of Franklin, conducted services here alternately every two weeks. During the summer, each of the clergy of the Northwest Convocation arranged to give two Sundays to Hudson. The services were then transferred to the "brick academy," and, with a view of forming a regular parish, the following document was circulated for signatures: "We, whose names are here affixed, deeply impressed with the importance of the Christian religion, and wishing to promote its holy influence in the hearts of ourselves, our families and our neighbors, do hereby associate ourselves under the name, style and title of the Parish of Christ Church, Hudson, County of Summit, and State of Ohio. And by so doing, do adopt the constitution and canons of the Protestant Episcopal Church in the Diocese of Ohio, in communion with the Protestant Episcopal Church of the United States of America." Thirty-seven names were secured to this
