NOTE TO THE READER

This collection of Alabama Bible records contains an itemized list of the births, marriages, and deaths found in approximately 256 family Bibles. Many of the records were sent to me over the past twenty years by the actual owners, while others I copied from Bibles located in the Georgia State Archives, local libraries, or other genealogical publications. The collection spans a period stretching from the early 1700s to the 1900s and because of this range and diversity should be of assistance to the researcher of Alabama families.
