Notes.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the value of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of superintendence, rent, freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. Only servicable boilers and engines are to be reported. HORSE POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

The following classes of Manufacturing Establishments will be reported on a SPECIAL MANUFACTURING SCHEDULE, and not on this Schedule, viz:

Enumerator.

[illegible]

REMARKS.—The term "Productive Industry" must be understood, in its largest significance, to include not only all factories and large works, but also the mechanical trades, as blacksmithing, coopering, carpentering, &c. The smallest shop should not be omitted, provided the production will add value to the raw materials. Enumerate as specifically as possible, (1) as: Sewing-Machine, Cornet, Furniture, Machine Shop, Coopering, Blacksmithing, &c.

QUESTIONS 2.—The kind of business or the character of product should be described in detail. It will be found that in ordinary laborers are employed. In this case column 11 will not be filled.

QUESTIONS 11.—In many establishments (as carpenter shops, blacksmith shops, &c.) it will be found that in ordinary laborers are employed. In this case column 11 will not be filled.

QUESTIONS 12.—All the 12 months of the year should be accounted for in one or more of the columns 13 to 17, thus: 12 months on full time, or 8 months on full time, or 4 months on full time, or 10 months on full time and 2 months idle.

QUESTIONS 13 and 14.—These questions are of prime importance. Great care and judgment should be exercised in making the return relative thereto, especially in the case of small shops where book-accounts are not kept.

QUESTIONS 15 and 16.—These questions are of prime importance. Great care and judgment should be exercised in making the return relative thereto, especially in the case of small shops where book-accounts are not kept.

QUESTIONS 17 and 18.—These questions are of prime importance. Great care and judgment should be exercised in making the return relative thereto, especially in the case of small shops where book-accounts are not kept.

QUESTIONS 19.—The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included.

QUESTIONS 20.—The value of the product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods, or doing work, for the neighborhood only, the value of the product means the price charged at the shop.

QUESTIONS 21.—If the stream is a very small one, mention also the larger stream or river into which it flows.

QUESTIONS 22 and 23.—Only serviceable boilers and engines are to be reported.

QUESTIONS 24 and 25.—This is an inquiry of great importance. The best information available should be used in filling these columns.

[illegible]

—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The price in respect to the value of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of transportation, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The cost of extraneous items, such as the cost of the labor of the neighborhood only, the value of the product means the price charged at the shop. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. WATER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. For serviceable boilers and engines are to be reported. House-ovens.—This is an inquiry of great importance. The best information available should be used in filling these columns.
