NOTES RELATIVE TO CHEESE AND BUTTER FACTORIES.

COLUMNS 1 to 15 have reference to all factories of this class, and should be filled for every establishment enumerated.
 COLUMNS 16 to 24 have reference to manufacturers of cheese only.
 COLUMNS 25 to 27 have reference to manufacturers of butter only.
 COLUMNS 28 to 29 have reference to those factories that manufacture both cheese and butter.
 COLUMNS 30 to 31 have reference to those factories that manufacture condensed milk.
 COLUMNS 32 and 33 have reference to manufacturers of condensed milk.

Special Schedules of Manufactures—Nos. 7 and 8.

Products of Industry in 213,215,392 Dols, in the County of Madison, State of Georgia
during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

CONDENSED MILK FACTORIES-Continued.

CHEESE FACTORIES; BUTTER FACTORIES; COMBINED BUTTER AND SKIM-CHEESE FACTORIES; CONDENSED MILK FACTORIES-Continued.

[illegible]

NOTE.—All the 12 months of the year should be accounted for: thus 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries must be answered in relation to the prime importance. Great care and judgment should be exercised in making the returns relative thereto. The 12 months in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight, and of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Products, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shop producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. FUEL USED IN MANUFACTURE.—If the stream is a very small one, mention also the largest stream or river into which it flows. Only serviceable boilers and engines are to be reported. The best information available should be used in filling these columns. HORSE POWER.—This is an inquiry of great importance.

NOTES RELATIVE TO CHEESE AND BUTTER FACTORIES.

The best information available should be used in filling these columns.

COLUMNS 1 to 15 have reference to all factories of this class, and should be filled for every establishment enumerated.

COLUMNS 16 to 21 have reference to manufacturers of cheese only.

COLUMNS 22 to 27 have reference to manufacturers of butter only.

COLUMNS 28 to 37 have reference to manufacturers of manufactures both cheese and butter.

COLUMNS 38 to 39 have reference to these factories that manufacture both cheese and milk.

COLUMNS 40 and 41 have reference to manufacturers of condensed milk.

FLOUR AND GRIST MILLS—CHEESE, BUTTER, AND CONDENSED MILK FACTORIES.

Products of Industry in Anne Arundel Co, in the County of Madison, State of Georgia
during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

NOTE.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle.

The inclusion in respect to the value of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto.

The value of the Product, in the case of mills and factories producing goods or doing work for the neighborhood only, the value of the product means the price charged for the shipment.

The value of the Product, in the case of mills and factories producing goods or doing work for the neighborhood only, the value of the product means the price charged for the shipment.

FACTORY USES IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows.

Only serviceable boilers and engines need to be reported.

NOTE.—This is an inquiry of great importance. The best information available should be used in filling these columns.

NOTES RELATIVE TO CHEESE AND BUTTER FACTORIES.

NOTES RELATIVE TO CHEESE AND BUTTER FACTORIES

NOTES RELATIVE TO COLUMNS

COLUMNS 1 to 15 have reference to all factories of this class, and should be filled for every establishment enumerated.

COLUMNS 16 to 21 have reference to manufacturers of cheese only.

COLUMNS 22 to 27 have reference to manufacturers of butter only.

COLUMNS 28 to 35 have reference to those factories that manufacture both cheese and butter.

COLUMNS 36 and 40 have reference to manufacturers of condensed milk.

Notes.—All the 12 months of the year should be accounted for this: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The population in respect to the value of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the steam is in a very small one, mention also the larger stream or river into which it flows. Only servicable boilers and engines are to be reported. The best information available should be used in filling these columns. HOUSE-POWER.—This is an inquiry of great importance.

Notes.—All the 12 months of the year should be accounted for; 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle.
The inquiries in respect to the value of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto.
The cost of superphosphate, Rock Phosphat, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included.
The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the door.
POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows.
Only servicable boilers and engines are to be reported. The best information available should be used in filling these columns.
HORSE POWER.—This is an inquiry of great importance.

The following classes of Manufacturing Establishments will be reported on a SPECIAL MANUFACTURING SCHEDULE, and not on this Schedule, viz:

- (1.) Boot and Shoe Factories.
- (2.) Cheese and Butter Factories.
- (3.) Flouring and Grist Mills.
- (4.) Salt Works.
- (5.) Lumber Mills and Saw Mills.
- (6.) Brick Yards and Tile Works.
- (7.) Paper Mills.
- (8.) Coal Mines.
- (9.) Agricultural Implement Works.
- (10.) Quarries.

REMARKS.—The term "Productive Industry" must be understood, in its largest significance, to include not only all factories and large works, but also the mechanical trades, as blacksmithing, coopering, carpentering, &c. The smallest shop should not be omitted, provided the production reaches \$500 annually, including the cost of materials. Enumerators will take pains to reach all of the productive establishments, large and small, within their several districts.

COLUMN 2.—The kind of business or the character of product should be described as specifically as possible, thus: Sewing-Machines, Coverts, Furniture, Foundry, Machine Shop, Coopering, Blacksmithing, &c.

COLUMNS 11 to 17.—In many establishments (as carpenter shops, blacksmith shops, &c.) it will be found that no ordinary laborers are employed. In this case column 11 will not be filled.

COLUMNS 18 and 19.—All the 12 months of the year should be accounted for in one or more of the columns 18 to 17, thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and 2 months idle.

COLUMNS 20 and 21.—These inquiries are of prime importance. Great care and judgment should be exercised in making the returns relative thereto, especially in the case of small shops where book-accounts are not kept. Mill Supplies and Fuel should be included.

[18].—The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. The value of the product means the price charged at the shop.

[19].—The value of the product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods, or doing work, for the neighborhood only, the value of the product means the price charged at the shop.

COLUMN 30.—If the stream is a very small one, mention also the larger stream or river into which it flows.

COLUMNS 31 and 32.—Only serviceable boilers and engines are to be reported.

COLUMNS 33 and 34.—This is an inquiry of great importance. The best information available should be used in filling these columns.

BOOTS AND SHOES.—LEATHER (TANNED AND CURRIED)

Products of Industry in River-Villa, in the County of Mecon, State of Georgia, during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

BOOTS AND SHOES.

NAME OF CORPORATION, COMPANY, OR INDIVIDUAL PRODUCING TO THE VALUE OF \$500 ANNUALLY.	CAPITAL (REAL AND PERSONAL) INVESTED IN THE BUSINESS.	Original number of hands employed at any one time during the year.	AVERAGE NUMBER OF HANDS EMPLOYED.		WAGES AND HOURS OF LABOR.						MONTHS IN OPERATION.				MACHINES.			MATERIALS.	
			Males above 15 years.	Females above 15 years.	Children and youth.	Number of hours in the ordinary day of labor.	May to November.	November to May.	Average day's wages for an employed hand during the year.	Total amount paid in wages during the year.	On full time.	On three-quarter time only.	On half time only.	Idle.	Number of sewing machines.	Number of pegging machines.	Number of pressing and finishing machines.	Number skins sole leather.	Number skins upper leather.

Notes.—All the 12 months of the year should be accounted for during: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiry is respect to the value of material and of products of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight, of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of Products, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the large stream or river into which it flows. Only serviceable boilers and engines are to be reported. Horse-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.
