NOTE.—All the 12 months of the year should be accounted for: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle.
 The inquiry in respect to the value of material used of products are of prime importance. Great care and judgment should be exercised in making the return relative thereto.
 The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included.
 The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included.
 The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop.
 POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows.
 Only sensible boilers and engines are to be reported.
 Horse-power.—This is an inquiry of great importance. The best information available should be used in filling these columns.

NOTES RELATIVE TO CHEESE AND BUTTER FACTORIES.

SCHEDULE 3.—MANUFACTURES.—Products of Industry in 740th Dist, in the County of Muscogee, State of Georgia, during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

Post Office: Upatoi A. J. Odum Enumerator.

[illegible]

REMARKS.—The term "Productive Industry" must be understood, in its largest significance, to include not only all factories and large works, but also the mechanical trades, as blacksmithing, coopering, carpentering, &c. The smallest shop should not be omitted, provided the production reaches \$500 annually, including the cost of materials. Enumerators will take pains to reach all of the productive establishments, large and small, within their several districts.

COLUMN 1.—The kind of business or character of product manufactured should be described as fully as possible, thus: Sewing Machines, Cornish Furniture, Foundry, Machine Shop, Coopering, Blacksmithing, &c.

COLUMNS 2 AND 3.—In many establishments (as carpenter shops, blacksmith shops, &c.) it will be found that no ordinary laborers are employed. In this case column 3 will not be filled.

COLUMNS 4 TO 7.—The kind of business or character of product manufactured should be described as fully as possible, thus: Sewing Machines, Cornish Furniture, Foundry, Machine Shop, Coopering, Blacksmithing, &c.

COLUMNS 8 TO 17.—All the 12 months of the year should be accounted for in one or more of the columns from 8 to 17; thus: 12 months of full time; or 8 months at full time and 4 months on half time; or 10 months on full time and 2 months idle.

COLUMNS 18 TO 20.—These inquiries are of prime importance. Freight rates and judgment should be exercised in making the returns relative thereto,—especially in the case of shops where book-accounts are not kept.

COLUMNS 21 TO 26.—The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are to be included in Materials. Mill Supplies and Fuel should be included.

COLUMNS 27 TO 30.—These inquiries are of prime importance. Freight rates and judgment should be exercised in making the returns relative thereto,—especially in the case of shops where book-accounts are not kept.

COLUMNS 31 TO 34.—The value of the products, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods, or doing work, for the neighborhood only, the value of the product means the price charged at the shop.

COLUMNS 35 TO 39.—If the stream is a very small one, mention also the larger stream or river into which it flows.

COLUMNS 40 AND 41.—Only serviceable hulls and engines are to be reported.

COLUMNS 42 AND 43.—This is an inquiry of great importance. The best information available should be used in filling these columns.

Received August 2, 80.

The business in respect to the value of material and of product of prime importance. Great care and judgment should be exercised in making the return relative thereto.
The value of the product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop.
POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the largest stream or river into which it flows.
Any serviceable boilers and engines are to be reported.
STEAM-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

For the purpose of this study, the following list of industries is suggested as the most significant, to include not only all factories and large works, but also the mechanical trades, as blacksmithing, coopering, carpentering, &c. The smallest shop should not be omitted, provided the product is of sufficient importance to warrant its inclusion. The list should include all of the productive establishments, large and small, within their several districts.

[illegible][illegible][illegible]

[18].—The cost of Superintendence, Rent, Freight of goods to market, and
[19].—The value of the product, in the case of mills and factories producing for a distant market, charged at the shop.
