INQUIRIES APPLICABLE TO COMBINED BUTTER AND SKIM																													

NOTE.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the value of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of milk and butter, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER.—CHEESE IN MANUFACTURE.—If the steam is a very small one, mention also the larger stream or river into which it flows. Only workable bullocks and engines are to be reported. Horse-power.—This is an inquiry of great importance. The best information available should be used in filling these columns.

NOTES RELATIVE TO CHEESE AND BUTTER FACTORIES.

COLUMNS 1 to 15 have reference to all factories of this class, and should be filled for every establishment enumerated.
COLUMNS 16 to 31 have reference to manufacturers of cheese only.
COLUMNS 32 to 37 have reference to manufacturers of butter only.
COLUMNS 38 to 39 have reference to those factories that manufacture both cheese and butter.
COLUMNS 40 and 41 have reference to manufacturers of condensed milk.

Special Schedules of Manufactures—Nos. 7 and 8.

Products of Industry in 311⁷⁰ Elm Street, in the County of Putnam, State of Georgia
during the twelve months beginning June 1, 1879, and ending May 31, 1880; as enumerated by me.

Number of pounds of butter made.	Number of pounds of cheese made.	Average number of milk cows owned and milked during the year.	Average number of milk cows owned and milked during the year.	Average price per pound of butter during the year.	Average price per pound of cheese during the year.	Price per 100 pounds paid for milk during the year.	Price per 100 pounds paid for milk during the year.	Cost of freight per 100 pounds of butter during the year.	Cost of freight per 100 pounds of cheese during the year.	Number of pounds of condensed milk produced during the year.	Value of condensed milk produced during the year.	Do you do custom work or make condensed milk for sale? If so, state quantity of your product in custom grinding?	Do you do custom work or make condensed milk for sale? If so, state quantity of your product in custom grinding?	Do you do custom work or make condensed milk for sale? If so, state quantity of your product in custom grinding?	Do you do custom work or make condensed milk for sale? If so, state quantity of your product in custom grinding?	Do you do custom work or make condensed milk for sale? If so, state quantity of your product in custom grinding?	Do you do custom work or make condensed milk for sale? If so, state quantity of your product in custom grinding?	Do you do custom work or make condensed milk for sale? If so, state quantity of your product in custom grinding?	Do you do custom work or make condensed milk for sale? If so, state quantity of your product in custom grinding?	IF WATER-POWER IS USED.									
25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	53	54

NOTES.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the place of sale.

POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows.

Only reversible boilers and engines are to be reported.

Hoist-power.—This is an inquiry of great importance. The best information available should be used in filling these columns.

NOTES RELATIVE TO CHEESE AND BUTTER FACTORIES.

COLUMNS 1 to 15 have reference to all factories of this class, and should be filled for every establishment enumerated.

COLUMNS 16 to 21 have reference to manufacturers of cheese only.

COLUMNS 22 to 27 have reference to manufacturers of butter only.

COLUMNS 28 to 38 have reference to those factories that manufacture both cheese and butter.

COLUMNS 39 and 40 have reference to manufacturers of condensed milk.

Enumeration Dist. No.

Special Schedules of Manufactures—Nos. 7 and 8.

FLOUR AND GRIST MILLS—CHEESE, BUTTER, AND CONDENSED MILK FACTORIES.

Products of Industry in 306th, 350th & 35th Ave. St., in the County of Putnam, State of Georgia
during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

FLOURING AND GRIST-MILLS.

NOTES.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the value of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the largest stream or river into which it flows. Only servicable boilers and engines are to be reported. Horse-power.—This is an inquiry of great importance. The best information available should be used in filling these columns.

NOTES RELATIVE TO CHEESE AND BUTTER FACTORIES.

COLUMNS 1 to 15 have reference to all factories of this class, and should be filled for every establishment enumerated.
 COLUMNS 16 to 21 have reference to manufacturers of cheese only.
 COLUMNS 22 to 27 have reference to manufacturers of butter only.
 COLUMNS 28 to 33 have reference to those factories that manufacture both cheese and butter.
 COLUMNS 34 to 40 have reference to manufacturers of condensed milk.

NOTES.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream on river into which it flows. Only servicable boilers and engines are to be reported. HORSE-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

Special Schedules of Manufactures—Nos. 5 and 6.

Products of Industry in 306th 39th 9th *Mc* *West* *N. Ave.*, in the County of *Pulham*, State of *Georgia*
during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

Notes.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle.

The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making returns relative thereto.

The cost of superphosphate, bent, freight of goods to market, and other general expenses of a manufacturing establishment should not be included in Materials. Mill Supplies and Fuel should be included.

The value of the Product in the case of mills and factories producing for a distant market, means the wholesale price. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop.

POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows.

Only verifiable household returns are to be reported.

HOUSE POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

Supervisor's Dist. No. 4

Enumeration Dist. No. 112

The following classes of Manufacturing Establishments will be reported on a SPECIAL MANUFACTURING SCHEDULE, and not on this Schedule, viz:

- (1.) Boot and Shoe Factories. (5.) Lumber Mills and Saw Mills. (8.) Coal Mines.
 (2.) Cheese and Butter Factories. (6.) Brick Yards and Tile Works. (9.) Agricultural Implement Works.
 (3.) Flouring and Grist Mills. (7.) Paper Mills. (10.) Quarries.
 (4.) Salt Works.

SCHEDULE 3.—MANUFACTURES.—Products of Industry in 112, in the County of Putnam, State of Georgia, during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

Post Office: Calontown Putnam County Ga

James M. Bullard
Examiner.

Name of Corporation, Company, or Individual, according to the value of the property.	Name of Business, Manufacture, or Product.	Capital invested in the business.	Average number of hands employed.				Wages and Hours of Labor.				Months in Operation.				Power used in Manufacture.			
			Males above 18 years.	Females above 15 years.	Children and Youth.	Men to November.	Hours in the ordinary day of labor.	Average day's wages for a skilled man.	Total amount paid in wages during the year.	On full time.	On 3/4 time only.	On 1/2 time only.	On 1/4 time only.	On 1/8 time only.	If water power is used.	Wheels.		
																Number.	Kind.	Revolutions per minute.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19
1	Wheat Threshing		800	4	3	1	10	8	75	200	2	1	2	5	100	11	50	1
2	Cotton Ginning		700	5	4	1	10	8	25	125	2	1	1	1	75	12	5	1
3	Cotton Ginning		1350	4	4	1	10	8	25	130	1	3	5	7	75	11	12	1
4	Cotton Ginning		750	6	5	1	10	8	25	125	2	1	9	1400	19	60	1	1
In the above enumeration Mr. Caswell threshed 5000 Bushels of Wheat & oats worth \$5000. Ginned 200 Bales Cotton worth \$10000 all of which was done for Customs charging 10¢ for threshing & 125¢ per Bale for Ginning. Ginned & threshed 3000 Bushels of Wheat & oats & 150 Bales Cotton worth \$2500 for Customs charging 10¢ for threshing & 25¢ for Ginning. Howard & Finch Ginned 160 Bales Cotton for Customs charging 25¢ per Bale. Athon & Co Ginned 280 Bales for Customs charging 25¢ per Bale. The above has been done by men having no blanks in it. The exact case. And the \$500 clause below being difficult of application to the Bureau.																		

REMARKS.—The term "Productive Industry" must be understood, in its largest significance, to include not only all factories and large works, but also the mechanical trades, as blacksmithing, coopering, carpentering, &c. The smallest shop should not be omitted, provided the production reaches \$500 annually, including the cost of materials. Enumerators will take pains to reach all of the productive establishments, large and small, within their several districts.

COLUMN 2.—The kind of business or the character of product should be described as specifically as possible, thus: Sewing-Machines, Corsets, Furniture, Foundry, Machine Shop, Coopering, Blacksmithing, &c.

COLUMN 11.—In many establishments (as carpenter shops, blacksmith shops, &c.) it will be found that no ordinary laborers are employed. In this case column 11 will not be filled.

COLUMNS 13 to 17.—All the 18 months of the year should be accounted for in one or more of the columns 13 to 17, thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and 2 months idle.

COLUMNS 18 and 19.—These inquiries are of prime importance. Great care and judgment should be exercised in making the returns relative thereto, especially in the case of small shops where book-accounts are not kept.

[18].—The cost of superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included.

[19].—The value of the product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods, or doing work, for the neighborhood only, the value of the product means the price charged at the shop.

COLUMN 20.—If the stream is a very small one, mention also the larger stream or river into which it flows.

COLUMNS 27 and 28.—Only serviceable boilers and engines are to be reported.

COLUMNS 29 and 30.—This is an inquiry of great importance. The best information available should be used in filling these columns.

Enumeration Dist. No. 113

(1.) Boot and Shoe Factories.	(5.) Lumber Mills and Saw Mills.	(8.) Coal Mines.
(2.) Cheese and Butter Factories.	(6.) Brick Yards and Tile Works.	(9.) Agricultural Implement Works.
(3.) Flouring and Grist Mills.	(7.) Paper Mills.	(10.) Quarries.
(4.) Salt Works.		

Post Office: Canton, Ia

S Newman

Enumerator

[illegible]

REMARKS.—The term "Productive Industry" must be understood, in its widest significance, to include not only all factories and large works, but also the mechanical trades, as blacksmithing, coopering, carpentering, &c. The smallest shop need not be omitted, provided the product exceeds \$500 annually, including the cost of materials. Enumerators will take pains to reach all of the productive establishments, large and small, within their several districts.

COLUMN 2.—The kind of business or character of product should be described as specifically as possible, thus: Sewing-Machines, Corns, Furniture, Foundry, Machine Shop, Coopering, Blacksmithing, &c.

COLUMN 3.—In many establishments (as carpenter shops, blacksmith shops, &c.) it will be found that no ordinary laborers are employed. In this case column 11 will not be filled.

COLUMN 4.—The number of men employed in the establishment should be given, as follows:—

COLUMNS 13 to 17.—All the 12 months of the year should be accounted for in one or more of the following 12 lines:—

COLUMNS 18 and 19.—These inquiries are of prime importance relative to the value of the product, and should be entered especially in the case of small shops where book-accounts are not kept:

COLUMNS 20 and 21.—The cost of Superintending, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included.

COLUMN 22.—The value of the product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods, or doing work, for the neighborhood only, the value of the product means the price charged at the shop.

COLUMN 23.—If the stream is a very small one, mention also the larger stream or river into which it flows.

COLUMNS 24 and 25.—Only workable boilers and engines are to be reported.

COLUMNS 26 and 27.—This is an inquiry of great importance. The best information available should be used in filling these columns.
