			Males above 16 years.	Females above 15 years.	Children and youth.	Average day's wages for a full year.	Number of employees for each of the 12 months.	Number of employees for each of the 12 months.	Number of employees for each of the 12 months.	Total value of labor employed in the factory during the year.											

CHEESE FACTORIES: BUTTER FACTORIES: COMBINED BUTTER AND SKIM-CHEESE FACTORIES: CONDENSED MILK FACTORIES—Continued.

[illegible]

NOTE.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries with respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general charges of a manufacturer's establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the whole sale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. **POWERS IN MANUFACTURE.**—If the stream is a very small one, mention also the larger stream or river into which it flows. Very seriously believe that the following information should be used in filling these columns.

NOTES RELATIVE TO CHEESE AND BUTTER FACTORIES.

COLUMNS 1 to 15 have reference to all factories of this class, and should be filled for every establishment enumerated.
COLUMNS 16 to 21 have reference to manufacturers of cheese only.
COLUMNS 22 to 27 have reference to manufacturers of butter only.
COLUMNS 28 to 38 have reference to those factories that manufacture both cheese and butter.
COLUMNS 39 and 40 have reference to manufacturers of condensed milk.

BRICK YARDS AND TILE WORKS

[illegible]

BRICK YARDS AND TILE WORKS—Continued.

[illegible]

... full time and 4 months on half time; or 10 months on full time and two months idle

11-All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on part time; or 10 months on full time and 2 months on part time. Great care and judgment should be exercised in making the returns relative thereto. The principal items of cost of material and of product are of prime importance. Freight charges on materials are not to be included in Materials. Mill Supplies and Fuel should be included.

The cost of superintendence, rent, freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in materials. In the case of small shops producing goods or doing work for the neighbors the cost of superintendence, rent, freight of goods to market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighbors the cost of superintendence, rent, freight of goods to market, means the wholesale price of the goods.

POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows.

HOUSE POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

... For e.g. — This is a study of great importance.
