

second wife. They are active in the social life of the community and their home is notable for its generous hospitality.

Evansville, a post-village in the northwestern part of Troup county, reported a population of 54 in 1900. It is twelve miles from La Grange and near the Alabama state line. Roanoke, Ala., is the nearest railroad station.

Eve, Joseph Adams, M. D. LL. D., son of Joseph Eve and Hannah Singleterry was born near Charleston, S. C. Aug. 1, 1805, and died in Augusta, Ga. Jan. 6, 1886. He studied medicine in the office of Dr. Milton Anthony, a distinguished practitioner of the time, and attended his first course of lectures in Liverpool, England. In 1828 he graduated as a Doctor of Medicine from the Medical College of South Carolina. In conjunction with his preceptor, Doctor Anthony, he established in 1829 the Augusta academy of medicine and when the Medical College of Georgia was organized in 1832 he was one of its founders. Doctor Eve first held the chair of materia medica and therapeutics in that institution, but in 1839, on the death of Doctor Anthony, he was made professor of obstetrics and diseases of women and children and continued to hold this chair for an uninterrupted period of fifty-three years. At the first meeting of the American gynecological society, in 1876, Doctor Eve was honored as being the oldest active teacher of obstetrics then living in the world. For many years he was the editor of the Southern Medical and Surgical Journal and most of his contributions to science are recorded in its pages. He was a member of the American medical association and in 1879 was elected president of the Medical Association of Georgia. He was one of the first honorary fellows of the American gynecological society and an honorary fellow of the Boston gynecological society. In 1882 he was made a Doctor of Laws by Emory college in recognition of his distinguished professional career. For sixty years he was a member of St. John's Methodist church, Augusta, Ga., and was a trustee and steward of this church at the day of his death. True to his favorite maxim, "I prefer to wear out than rust out," Doctor Eve labored unselfishly for three score years in the cause of science and humanity and died at a ripe old age, honored by his professional brethren, and revered and beloved by all who knew him.
