rotation, although used without any other minure, for a period of thirty years.

2. That in consequence of grain containing large quantities of nit rogen and phosphotal, manning containing large quantities of nit rogen and phosphotal, manning southern the second of the containing soluble nitrogen and uses containing soluble nitrogen as attachts or nistic stell, ser especially applicable to these crops.

3. That when crops containing potant, such as purchased durgs, appear to be more suitable.

4. That although potant, phosphoric acid and nitrogen, are the chief manure ingredients in farmyard dung, the manure from articisi fonds and in artificial manues, still the differences in form in which these substances are met with greatly affect their value; the present method of analyzing manures does not properly recognize these distinctions, and the valuations founded upon these analyses, are altogether false and errous.

Winster Oats.

To the Editor of the Wapld:

A Sensible Mether.

It is really phiful to see a good, conscientious little mother shutting herself away from so much that is best and sweetest in her children's lives, for the sale of tucking their dresses and rulling their petitions. How surprised and grieved she will be to find that her hoys and girls at sixteen regard "mother" chiefly as most excellent pend to keep shurts in order and to make new dresses, and not us one to whom they care to go for social companiouship!

ASIESTA, GEORGIA, OCTOBER 2, 1877.
