# LETTING OUT THE CAT.

The suit of the late editor of the Columbus (Ga.) Record against the owners of that paper for the recovery of unpaid past due salary, has led to a very large cat out of the traditional bag. For reasons entirely satisfactory to myself we have long suspected that certain protectionist newspapers in the South were being systematically subsidized by certain monopolists in the North to publish and circulate the sort of high tariff stuff which is sought to be palmed off on our people in the vain hope of weaning them from their convictions and winning them to the support of the Republican party.

We have in our possession such an offer to subsidize the editor of THE BEE, and we have a right to believe that any man or party of men who could suppose that this writer might be purchased from his political principles by a price would hardly hesitate to make the tempting overture to others less known or perhaps more susceptible. It stands, therefore, as a verified fact that the head-centers of monopoly do pay subsidies and bribes to newspapers for support of the humbug and imposture of protection. Does not that equally show that a great many of those who profess to admire the monumental fraud are entirely conscious of its dishonesty? And does it not behoove really honest men who may have sound motives and sound faith, however mistaken, in the gigantic abomination, to drop it forever as they would a fanged adder?

Here is a paper in South Carolina which has been covertly owned by New England, and whose managers and publishers, contrary to their own convictions no doubt, have been regularly paid—or, we should say, regularly promised to be paid—to pretend to be honest, and in this way to pretend to be honest to the South, and to the North, and to the world. It is a paper which has been formally resolved itself into the order last named, and will hereafter be known and become famous thereby.

The annual picnic of the Georgia Press Association is an important event. We observe that as a general thing the newspapers appear to better advantage while the principal editors are away. Please keep your eye on THE BEE.

# A GOOD THING.

An article in THE BEE a week or two ago on the general subject of how to "improve the shining hours" of the day, long season, is said to have awakened some of our public spirited citizens to devices and schemes for local innovations. One of the desiderata contemplated is a bath establishment, and we understand that the couple of the afternoon at fresco of Friday will go to form the nucleus of a fund having for its object the building and fitting up of suitable structures adapted to bathing. As a sanitary enterprise there can be no superior to the plan, and it is likely to grow into immediate popularity and to extend its usefulness into other parts of the country. The bath house is the shrine of Hygiene, and her votaries are everywhere the healthiest and happiest. The idea of a bath house for Union Point is a great one, and the matter is in the right hands to achieve success for the scheme.

# JUST WHAT.

Brother Colyar agrees with the Augusta Chronicle and the Augusta Chronicle agrees with Brother Colyar, that the tariff issue defeated Grover Cleveland. Then Brother Colyar agrees with the Chronicle and the Chronicle agrees with Brother Colyar that on this account the Democratic party should abandon its long tariff tenets and fly the protectionist flag.

Let us look into this. We are not going to ask Brother Colyar, or the Chronicle, or other protectionist boomer, to prove that the tariff issue defeated Mr. Cleveland. We do not wish to ply them with impossible conditions nor place them in needless plight. Protectionists never prove anything, and never proceed on theories—capitula of proof.

We prefer to pick the point, for the sake of the argument, that "the tariff issue defeated Cleveland," and then we wish to see how this defeat was compassed. Our protectionist boomer, admit, it seems, that Mr. Cleveland conducted his campaign and was supported, as opposed on the basis of tariff reform as against high protection. There was no mistake as to this, we acknowledge. And the boomer who admitted that Mr. Cleveland was supported and voted for the tariff reform. Then if the party was defeated, who did the defeating? Wasn't it the protectionist "Democracy," scolded, who had beaten the Democratic candidate and party, and who time had not been changed? Obviously it will not be long before the issue of the tariff will be settled.

of the party. One wing must have killed him. That wing must have been the protectionist wing. No one seems to believe that the low tariff division of the Democracy, which is as 100 to 1 of the Democratic party, could have opposed Mr. Cleveland. They had every right to beat him, but had every right to serve by electing him.

Do not, then, the protectionists mean plainly that they themselves voted against the Democracy on tariff reform? And if they so voted, is it not the fairest question which could be put to them to inquire by what right they set themselves up to be Democrats, having betrayed the party?

But there is one thing even deeper than their apparent unfaith in the late election—it is the cheek and gall with which they ask that the mountain of the party come to the mole-hill of protection. The little Tulee street trio that is backed by the Republicans and beguiled by a few irresponsible newspapers without influence in or out of the Democratic party anywhere, raise a minority howl against the multitudinous shout of the great party of tariff reform and threaten all manner of bow-wow, if the eleven jurors don't do at once to the twelfth man's way of thinking.

The thing is so ridiculous that one can hardly write of it in candor. THE BEE is for business from the best of the last one of these cranks and old-fashioned protectionists. Their stupidest cheek stands out like Stone Mountain, and they are a dead load for an honest craft. They should be sent up Salt Creek on a raft.

# Keep your eye on THE BEE.

# THE B. B. B.

This legend no longer signifies Bontine Blood Balm nor Boston Baked Beans. It is the sign of the "Bee Base Ball Club," and by this sign the club will conquer. Since our report of the late match contest the club has formally resolved itself into the order last named, and will hereafter be known and become famous thereby.

The annual picnic of the Georgia Press Association is an important event. We observe that as a general thing the newspapers appear to better advantage while the principal editors are away. Please keep your eye on THE BEE.

# FIRE BRICK LAY.

Fire-brick clay exists in undetermined quantities but of known quality in several parts of Greene county. Near Union Point it is plentiful. Hitherto little has been known as to the value or utility of these deposits, for the reason that public attention has but lately been drawn to the mineral resources of this section. From an article on this subject in the Manufacturing Record we clip a paragraph in order that the value of this resource of fire-brick clay as a factor of manufacturing wealth may be learned and appreciated. Fire brick clay is now found in abundance in Kentucky, and a writer thus speaks of it:

While the centre of iron manufacture is being rapidly removed from the Northern to the Southern States, and the erection of blast and other furnaces for the manufacture of iron and steel is going on at a rate that a few years past would have been thought to be impossible—and as the present time appears to be only the commencement of what it ultimately will be one of the most important elements that has to be taken into consideration in the erection of these furnaces is the most suitable fire brick for lining the same. While Alabama has prospered and tested for a good fire-brick clay with a perseverance that does her people credit, nothing has yet been found that will answer the purpose for furnace building. It can be safely asserted that every furnace built in the South has been made of fire-brick manufactured in the Northern States, principally in Pennsylvania and Ohio, the heavy freight on which amounts to more than the value of the fire-bricks. These fire-bricks are principally carried by the Louisville & Nashville and Cincinnati Southern railways, thus entering the State of Kentucky at the Northern line, and passing through at the Southern, while at the same time Kentucky has in its own State the best fire-brick in the world. Some of the Ohio manufacturers name it in Kentucky send it up to their works in Ohio to improve the quality of their own clay, and again reship the product through the State to the South.

We must permit nothing to fail which is undertaken in Union Point, no matter what. We take it that nothing will be attempted in our section of Providence.

FRIDAY, JUNE 7, 1890.

## THE WONDERFUL SOUTH.

How it Continues to Marvelously Develop.

SHEFFIELD, ALA., May 18, 1890.  
Editor Manufacturers' Record:—The following account of three trips to Sheffield will illustrate North Alabama progress:

First trip.—Late in the summer of '88 I was requested by a Pittsburg company to go to Sheffield, Ala., and make a bid for them on a new blast furnace contemplated to be built. I had never heard of Sheffield, but examined a map I found in the western portion of Middle Alabama a small town of that name some thirty or forty miles off any line of railroad. Without further inquiry I answered my friends that rumor of a blast furnace at Sheffield was probably a mistake. It was probably a month after this I was at Memphis, Tenn., and there I learned something of a new town of Sheffield, and upon inquiry was shown a map of "The City of Sheffield, Ala. in North Alabama on the Tennessee river." The memorandum under the title included the information that to reach Sheffield one should leave the Memphis & Charleston Railroad at Tusculum and travel by back two miles to the Tennessee river. Having occasion to go over the Memphis & Charleston railroad, I and a friend who was with me, concluded we would stop and see what the place looked like and what there was in the report of the contemplated blast furnace. Arriving at Sheffield, we at once perceived that the map we had seen was much more complete than the city. Montgomery avenue was the street which was located, and it led from the middle of a cotton field up a gentle slope to a bluff overlooking the Tennessee river.

The manager of the Sheffield Land, Iron & Coal Co., with his family occupied part of the upper portion of a new brick building, and the remainder of the population of the town occupied the two or three other rooms in the building. Tusculum, the station at which we had left the cars, seemed about as dead as a town could well be, and across the river Florence, though a beautiful place, seemed like Tusculum, to have been in a quiescent state for years. In answer to our inquiry as to what formed the basis of the hope of a city at Sheffield, the manager of the company said in substance: "Good coal, iron ore, and limestone, all in abundance and in close proximity, river transportation to many of the important markets of the United States that will take our iron and send back food products for distribution in the south, a fertile soil and a beautiful climate. In fact, all the advantages Birmingham has had and many more."

Second trip.—The town has now become recognizable from the map of it. Many streets are graded, many new buildings have been erected, five blast furnaces are in course of construction, an electric light plant is under contract, the Sheffield & Birmingham Railway is in operation from Sheffield twenty-five miles to Birmingham, and a branch of the Louisville & Nashville is being pushed from Columbia, Tenn., towards Sheffield. The excitement has reached Florence, and a "New Florence" has been laid out. Everybody's mind is excited and imbued with the immense value of the resources in the surrounding country if once fairly developed. Material for woodworkers, for brickmakers, for house building, whether of wood, brick or stone, is all at once found to be abundant and cheap, and the people who ventured to work the raw material found ready market for their product and were doing well. Houses were being built up great numbers, and it was now evident that this section would be the centre of an active industrial population, and in all probability when Sheffield was laid for a business and manufacturing centre, which will ultimately merge Sheffield, Florence and Tusculum into one city, it is not one corporation, at the head of navigation on the Tennessee river.

Third trip.—Sheffield has become a city. Her streets are well lit by electricity. The sidewalks are paved. Every room in the hotel has one or more incandescent electric lamps. A dummy road is in operation between Sheffield and Tusculum, and half-hourly trips are made. The first National Bank is occupying one of the best banking buildings in Alabama. The Sheffield & Birmingham railroad is in operation through Birmingham, and the trains of the Louisville & Nashville railroad also run into Sheffield over a track lately built. Two blast furnaces are in operation turning out good pig iron. A good compass did a paying business the past season, and many manufacturing concerns are in operation. Across the river Florence is making progress. It is more substantial than that of Sheffield, and everything would seem to indicate that at the head of navigation on the Tennessee river a great city will develop.

**Hence the Great Crowds that Flock to and Throng**

**\* The Grand Trade Temple of \***

**DAVIS, BROTHER & SEALS.**

**No Lull in Trade. We are busy Buying and Selling all the Time.**

**MONDAY MORNING, MAY 10,**

**Big Bargain Tables will be Opened, and**

The following fine departments of goods will be marked to the ridiculous prices of half cost. We mean Business, and lots of it. Clean out and buy again: Ladies', gents', misses' and children's shoes and slippers at half cost. Gents' odd clothing at half cost. Dress goods, ginghams, satines, fans, parasols, bleachings and domestics. Tinware, glassware, crockeryware; gloves and mitts, lace, lace curtains, linen shades, gossamers and embroideries. Silks will be butchered. Notions of every kind and description. In fact, on these tables will be found a little of everything at the lowest price on earth. Come and inspect the unapproachable bargains offered on these **BARGAIN TABLES**.

**A MASSACRE OF PRICES.**

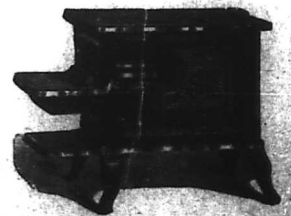

We have slaughtered prices in all clothing, straw and wool hats. Closing out, making room for the fall trade. Bargains to the right of you, bargains to the left of you, bargains all around you. Things needed brought to your notice: **1000** gallons ready mixed paints just received, lowest prices. All sizes rubber belting for threshing grain.

**WE NAME SOME FEW**

**ADDITIONS:** New arrivals in dress goods; new arrivals in white goods; new arrivals in Swiss flouncings; new arrivals in Satines; new arrivals in shoes. All the newest designs just out. Come and see them.

We are Agents for the celebrated Charter Oak Stoves, with wire-gauze doors; for the unrivalled Singer Sewing Machines, with all the improvements, and for Warner Bros.' Coraline Corsets, the finest made. These goods are all the best to be had.

**\*(Conclusion)\***

During the months of June, July and August, we intend to **CLOSE CLEAN OUT** our entire stock of Spring and Summer Goods. We will make the price. Come and get your share of the spoils. This advertisement is no balloon ascension, but it is the **WHOLE TRUTH**. We invite everybody, far and near, to come and see for themselves. Truly, **DAVIS, BRO. & SEALS.**
