1. The first of these is the
fact that the population of the
country has increased very
rapidly since the year 1800.
The population of the country
in 1800 was about 1,000,000
and in 1850 it was about
10,000,000. This increase
has been due to a number of
causes, but the most important
one is the fact that the
country has been very fertile
and has produced a large
quantity of food and other
necessaries of life. This has
enabled the population to
increase so rapidly.
