PREFACE

Among the many valuable old records to be found in the Nation's custom houses are the certificates of registry and enrollments of American vessels. While the data found in these documents have been admittedly of considerable value to research scholars, in the past it has been difficult to obtain the information they contain about the vessels and their owners. The publication in Massachusetts of a compilation of information from ship registers, by the Survey of Federal Archives in that state, created such favorable comment that a demand was developed by marine historians in different sections of the country for similar volumes devoted to ship registers and enrollments issued at the leading ports of the United States. In response to this widespread favorable comment and suggested enlargement of the scope of the compilations, the National Director of the Survey of Federal Archives requested the Survey of Federal Archives in Louisiana to undertake this work for the port of New Orleans.

Fortunately we found in the record rooms in the Custom House in New Orleans the greater part of the official files of ship registers and enrollments kept there from the time of the extension of the United States Customs Service to New Orleans by Congress in 1804 down to date. The file of registers begins with March 31, 1804. The only major gap in this file was for the period April 20, 1862-May 3, 1864. Information to fill this gap, in greater part, has been secured from the National Archives.

The file of enrollments in New Orleans has larger gaps. Volumes I and II, covering the period to April 1, 1819, appear to have been lost. From The National Archives was secured information partially to fill that part of this gap which begins with 1815. During the period January 1, 1815-March 31, 1819, according to the "Record of Enrollments" in The National Archives, 325 enrollments were issued at New Orleans. Of these The National Archives has copies of 143, from which information was furnished for inclusion in this Volume. In lieu of the 182 missing documents, less complete information was secured from the "Record of Enrollments." A second gap in the New Orleans file of enrollments extends from April 21, 1824 to February 17, 1830. Fortunately, The National Archives was able to furnish information from its copies of 199 enrollments issued January 1, 1827-February 17, 1830, and less complete information from its "Record of Enrollments" for all other vessels enrolled at New Orleans, April 21, 1824-February 17, 1830. Information was similarly secured to fill the two other gaps in the New Orleans file of enrollments, February 11, 1865, and November 17, 1899-November 20, 1900. Thus, the only gap in the New Orleans files which it has not been possible to fill in large part from records in The National Archives is that for enrollments issued during the eleven years before 1815.

Aided by a manual of instructions prepared by the National Director, with the assistance of supervisors of projects in Massachusetts, Connecticut, and California, members of our force were assigned to the task of abstracting the necessary data from the old documents.

Due to the newness of such work and our inability to locate immediately certain documents and thus fill gaps in the record, the work has been slow but it gained, we believe, in accuracy.

The general purpose of the several volumes which are planned to constitute Ship Registers and Enrollments of New Orleans, Louisiana is to make readily available all the information about vessels which were either registered or enrolled at New Orleans from 1804 to date, insofar as information about them is recorded on available copies of registers and enrollments, issued at New Orleans. For each vessel there is a separate entry; the entries are arranged, within each volume, alphabetically by names of vessels; and to each entry, for indexing and reference purposes, is assigned an entry number. To the extent that it is recorded on the registers and enrollments, the information in each entry is as follows: In the first paragraph is given in order; the name of the vessel; rig or type; hailing port; place and date of building and name of builder; tonnage; length, breadth and depth; additional descriptive matter; and documentation immediately preceding the issuance of the vessel's first document at New Orleans, if any. For each documentation at New Orleans, arranged in chronological order, there follows: type of document and its number and date; the names, shares owned, occupations, and residences of owners; the name and residence of the master of the vessel; and information regarding changes of masters. Any changes in rig, tonnage, hailing port, etc., are noted. Finally, any available information regarding the final disposition of the vessel, insofar as the Port of New Orleans is concerned, by documentation at another port or otherwise, is recorded.

Because of changes in state or territorial boundaries some places are shown on the documents examined as being in states other than those to which they now belong. In such cases these places are given as in the original documents, but with the present location added within parentheses, as:: Pascagoula, La. (now Miss.), or Bath, Mass. (now Maine). In other respects an attempt has been made to copy information exactly as it appears on the documents. But because of the worn or incomplete condition of some documents, faded ink, difficult handwriting, etc., it is likely that some errors of transcription have occurred. Every effort has been made to keep these at a minimum.

When information has been secured from a document in The National Archives this has been indicated by following it with the symbol (NA). To indicate the issuance of a few documents by authority of the Confederate States of America the symbol (CS) has been used.

The Survey of Federal Archives in Louisiana acknowledges the valuable assistance and helpful counsel given by Dr. Philip M. Hamer, National Director, in preparing this work; also to the contributions of J. W. McElroy, Deputy Archivist for New England and head of The National Archives Project of Massachusetts; John J. Looney, of the Survey of Federal Archives in Connecticut, and Cyril E. Paquin, of the Survey of Federal Archives in California, on methods of procedure.

In New Orleans we have had the cooperation of Milton L. LeBlanc, Assistant Collector, and of L. Valcour Landry, Record Custodian, of the United States Customs Service.

This work in Louisiana was done under the direction of Mr. Stanley Clisby Arthur, who on June 30, 1941, resigned as State Supervisor of the project to become Executive Director of the Louisiana State Museum. The Assistant State Supervisor, Mrs. Norris B. Fazekas, who gave the technical supervision for this compilation, was succeeded on July 1, 1941, by Mrs. Sadie Wingate, Unit Supervisor. The assistance of Mr. Arthur and Mrs. Fazekas in bringing this volume to publication stage is gratefully acknowledged.

The researches and compilations necessary to compile this record of Ship Registers and Enrollments were performed by several members of the force of the Survey under the direction of Joseph R. Landwehr, foreman, assisted by Dennie Daniel, research editor.

Interested readers are referred to the Introduction in Volume I for a brief administrative history of the United States Customs Office in New Orleans.
