# PRACTICAL TRAINING FOR BUSINESS.

FRENCH & CHAMBERLIN'S

## Union Business & Nautical College,

460 Washington Street, opp. Boylston Street, Boston.

CHARLES FRENCH, A.M.  
CHARLES E. CHAMBERLIN, } Principals.

This MOST COMPLETE BUSINESS COLLEGE IN AMERICA, offers to young men and women every desirable facility for thoroughly and practically qualifying themselves for the practical duties of business.

It affords many advantages not found at any other Institution. Its apartments are arranged and furnished in the most commodious manner for **PRACTICAL EDUCATION**, having an entirely **SEPARATE DEPARTMENT for ACTUAL BUSINESS**.

It is most thorough in **DISCIPLINE**, training its Students in all that appertains to the **ETIQUETTE OF BUSINESS**, and teaching them to respect themselves that they may be respected by others.

It affords a Course of Lectures on **COMMERCIAL LAW**, by Prof. BIGELOW of the Boston University Law School, and a Course of practical training in **ELOCUTION**, by Professor MUNROE's System.

Its standard of education is far in advance of any BUSINESS COLLEGE IN AMERICA.

Its Rates of Tuition are *very reasonable*.—*LOWER, even*, than at several of the other Colleges. Its means of placing its graduates in **GOOD SITUATIONS**, ARE UNEQUALLED.

*Students commence any time. Separate Instruction.*

Day Sessions, 9 A.M. to 2 P.M. every business day.

Evening Sessions, from October 1st to April 1st.

# DR. E. D. SPEAR,

SO MUCH CELEBRATED FOR HIS

## *Remarkable Cures.*

**Office, 713 Washington Street,  
BOSTON.**

---

SOME patients, when they first call at Dr. SPEAR's office, have expected to find a full-blooded Indian, instead of the pure New-Englander that he is. This is not to be wondered at, as the term "The Old Indian Doctor" has been applied to him for many years, and grew out of his mode of treatment, based upon the Indian mode of using roots, herbs, and barks of trees, though with all the improvements which the light of civilization and science can throw upon it. Dr. SPEAR is the first educated physician to adopt and refine crude Indian remedies so as to make them available among civilized people. His great object in the treatment of diseases, and what distinguishes his practice from others, is the assistance of Nature by Nature's own remedies, — remedies amply provided by a beneficent Providence in the herbs of the field and the trees of the forest, seeking light and knowledge from every source possible, and acting in harmony with Nature's laws. But such has been the abuse of the name "Indian Doctor," "Indian Physician," &c., of its use by unprincipled, uneducated "doctors," that it is the wish of the doctor to be known hereafter as Dr. E. D. SPEAR, *so much celebrated for his remarkable cures.*

---

THE testimony of many persons who seemed fit tenants for the grave, and who now, happily, enjoy the best of health, is proof sufficient of the great efficacy of the medicines and treatment of Dr. E. D. SPEAR, so much celebrated for his remarkable cures. Success has attended the efforts of Dr. SPEAR in a wonderful degree; and astonishing cures are related, the proofs of which are now living, and will be only too happy to testify in behalf of the doctor's skilful treatment. "Consumption's ghastly form" has brought terror to many a stout heart, and defied the skill of many an excellent physician. That Dr. SPEAR has restored to perfect health many suffering from this obstinate disease is an undoubted fact, and the sceptical should be convinced by investigation.

---

**Dr. SPEAR may be consulted upon ALL diseases free of charge.**

# THE NEW REMINGTON Family Sewing-Machine

*IS SUPERIOR TO ALL OTHERS.*

IT WAS  
AWARDED  
THE

Medal of Progress

AT THE  
Vienna Exposition,  
1873.

Principal Office, Ilion, Herkimer Co., New York.  
Branch Office, 332 Washington St., Boston, Mass.

The Remington Sewing-Machines are rapidly becoming general favorites, and gaining favor in every household where they are introduced. While it is not our purpose to run down any Sewing-Machine, we do claim that our Machines are so complete as to overcome all the principal objections that are found in Shuttle Sewing-Machines. That which has long been sought after by probably every Sewing-Machine Company in the land has been obtained in our Machines; that is, an even, round, bird's-eye stitch on all kinds of goods, coarse or fine, without the use of COG WHEEL GEARS, ROTARY CAMS, OR LEVERS, working silent and smooth while in motion, is positive proof that it will continue to run well for years without expense.

*It Hems, Tucks, Binds, Braids, Plaits, Fells, Cords, Quilts, Gathers.*

## REASONS WHY

The Remington Family Sewing-Machines are Superior to ALL others.

- 1st. — **THEIR SIMPLICITY.** — The use of them is very easily acquired; and any girl of ordinary intelligence is capable of keeping them in order.
- 2d. — **THE CONSTRUCTION** of the machine is such, that it may be run at a higher rate of speed than any shuttle machine now in the market. In factories, where the speed has been registered, over 1,000 stitches per minute have been attained with ease.
- 3d. — **THEIR DURABILITY.** — Being so strong in all their parts, and fitted with great mechanical nicety, and being free from the harsh jarring movements and friction so common in inferior machines, they will wear a long time without repair of any kind.
- 4th. — **THEIR ADAPTABILITY.** — By a simple change of the needle and thread, they will sew the finest cambric or the heaviest leather. All the various kinds of boots and shoes, buckskin sewing, clothing, caps, stays, shirts, mantles, and dressmaking, can be done with equal facility.
- 5th. — **THE SHUTTLE.** — Being large, it will carry a great quantity of thread, thus saving, in a great measure, the trouble of filling the bobbins.
- 6th. — **The means of getting at the required TENSION on the Threads** is so simple and complete, that an even backstitch on BOTH SIDES of the material (which will not rip or ravel) can be readily obtained.
- 7th. — **They will sew with equal facility Silk, Twist, Linen Thread, and common Spool Cotton.**
- 8th. — **They have no rotary cams, cog-wheels, or lever arms to make a noise, run hard, or to get out of order.**

By the new and peculiar movement of needle and shuttle and thread-controlling parts, there is less wear or strain on the thread used; the thread being set in the material uninjured, the work is therefore better and stronger than that done on many other machines.

Nos. 13 and 15 Tremont Street, . . . Boston,

MANUFACTURERS AND IMPORTERS OF

**Surgical and Dental Instruments,**

Besides a complete assortment of articles intended for the exclusive use of the Medical and Dental professions, have always in store, at the lowest prices, a great variety of the following articles, suited to the wants of the general public:—

**TRUSSES.**

A large assortment of best patterns from which to select to meet the requirements of each case. If convenient, persons requiring Trusses should call at our establishment, where they can have a suitable truss carefully fitted by a competent and experienced person familiar with the Anatomy of Hernia. When a call in person is impracticable, a careful description should be sent, stating whether the rupture is on the right or left side; also the measure around the person two inches below the top of the hip-bone. If the rupture is at the navel, the measure should be around the body at the navel.

**ELASTIC HOSE,**

For Varicose Veins, Swollen Limbs, and Weak Joints. Of these goods we have several classes of Silk and Cotton, possessing different degrees of elasticity, the stout silk being usually the most satisfactory. The sizes are, full length (of leg), three-quarters, half, or knee-hose, knee-caps, and anklets.

Also **Spinal and Abdominal Supporters, Shoulder-Braces, Suspensory Bandages, Apparatus for Weak Ankles, Bow-Legs, Club-Feet, &c.** Also **Crutches** of various and most improved kinds; **Syringes, Rubber Urinals**, to wear on the person day or night, for males and females; **Galvanic Batteries, Hearing Trumpets, Auricles and Conversation Tubes for the deaf, Respirators**, to prevent coughing on entering cold or warm air; together with many other articles for use of the sick and invalids. For Ladies, separate rooms, and attendance by females.

A liberal discount to the trade.

# THE BOSTON HERALD

## FOR 1874.

A Morning and Evening Newspaper.

**FIVE EDITIONS EVERY DAY.**

**The Best Two-Cent Paper in the Country.**

**AVERAGE DAILY CIRCULATION OVER 100,000,**

*Which is more than the combined circulation of all the other  
BOSTON DAILIES.*

THE HERALD has one great advantage over most newspapers which come in competition with it: it is  
**ENTIRELY INDEPENDENT**

in Politics, and can afford to state the truth about all political events. It belongs to no party or clique; its reports are candid to all parties; and its editorial tone is liberal and tolerant, condemning the wrong and commending the right, wherever they are found.

THE HERALD is the only paper in New England that has

**ITS FORMS STEREOTYPED,**

and the large editions are now printed on triplicate plates by two of Hoe's Lightning Presses, of six cylinders each, and each capable of printing fifteen thousand impressions an hour, and on one Bullock Press with a capacity of fifteen thousand completed sheets per hour. These facilities enable the publishers to hold back the forms to the latest moment, and give their patrons

**THE VERY LATEST NEWS.**

THE HERALD gives its readers more reading matter for two cents than any other newspaper in the country, and it serves the news up in a spicy and spirited form for which it has long been celebrated.

The price of THE HERALD is *two cents per copy*, and it is sold to agents at **\$1.25** per hundred.

**SUBSCRIPTION RATES:**

Five Dollars per annum, and at same rate for a shorter period.

To Clubs of five or more, to one address, Four Dollars per annum, or One Dollar for three months, payable invariably in advance.

 No Agents employed to solicit either subscriptions or advertisements. 

Advertising rates uniform; and, compared with the enormous circulation, the lowest in the United States. Printed rates furnished on application.

## THE SUNDAY HERALD

is of the same size as the Daily, containing a great variety of reading-matter, including Voluminous Special News Dispatches and Markets, by Telegraph; full reports of Local News; Editorials; Timely Musical, and Dramatic Criticisms; a Business Review of the Week; the best Review of the Boston Stock-Market published, &c., &c. It has a circulation of

**OVER 28,000 COPIES,**

chiefly in the city and suburban towns. A limited number of Advertisements in THE SUNDAY HERALD.

The price of THE SUNDAY HERALD is five cents per single copy; and it is sold to agents at **\$3.50** per hundred. To subscribers, Two Dollars per annum.

All orders should be addressed to

IN THE  
MORNING AND EVENING EDITIONS.

---

**A BUSINESS PAPER!**

**A COMMERCIAL PAPER!**

**A WIDE-AWAKE PAPER!**

**A FAMILY PAPER!**

**WITH FULL MARKET REPORTS.**

It will prove satisfactory, if plain dealing, honest work, and untiring energy, will do it.

It will do good to place a paper in your family which will not pander to corrupt tastes or vicious habits.

It is cheap, — cheaper than any paper of its size in the country.

TRY IT! TRY IT! It costs but little; and see if there cannot be an upright paper, which shall at the same time be wide awake, and ably conducted.

## TESTIMONIALS.

The *Daily Advertiser* says, "The picture is of the kind that rarely fails to achieve popularity."

The *Post* says, "The execution is fine in every way."

The *Traveller* says, "It is a work of genuine merit, with which we hope the public will become well acquainted, and which will teach its beautiful lessons in many homes."

The *Journal* says, "It is a picture which will please the masses."

The *Transcript* says, "The thrilling incident which the picture illustrates is quite graphically presented in the attitudes and expressions of the figures and in the surrounding scenery."

The *Globe* says of the engraving, "It is in a style in every way worthy of the painting."

The *Commonwealth* says, "The moral of the story is too apparent to need explanation; while the sentiment expressed is one that cannot fail to touch a responsive chord in the heart of every parent."

The *Times* says of the engraving, "It is equal to any similar work ever produced in this country."

The *Congregationalist* pronounces it to be "an elevating, refining, and generally pleasing picture."

The *Youth's Companion* says, "The original painting excited the admiration of the people who often crowded Tremont Street last summer; and the expression was not unfrequently heard, 'If I were able to buy a costly painting, it would be that.' This engraving reproduces the original, and puts the beautiful allegory of art within the reach of all."

*Zion's Herald* writes of it in the same admiring way.

## OUR CONDITIONS.

Any new subscriber paying a full year in advance is entitled to the engraving.

Any old subscriber who is in arrears, by paying the same, and also for one full year in advance, is entitled to the engraving.

The picture can be taken from our counter without expense. When it is ordered to be sent by mail, ten cents must be sent for postage and wrapping.

The lowest retail price for this elegant engraving is two dollars and a half, the price for which we will furnish it to any one who may desire it otherwise than as a premium.

Terms \$3.00 per Year. Sample Copies sent free.

# PROTECT YOUR BUILDINGS!

Which may be done with less than quarter the usual expense by the use of the

## Langley Patent Slate Coating Paint, PATENTED AUGUST 1, 1871.

A roof may be covered with a very cheap shingle, and by the application of this slate be made to last from 25 to 30 years. Old roofs can be patched and coated and made to look much better and last longer than new shingles without the slate, for **One-Third the Cost of Re-Shingling**. The cost of Slating new Shingles is only about the cost of simply laying them, and the Slate is **Fire-Proof** against sparks and live coals falling upon it, as it may be easily tested by any one, and as appears from the fact that Insurance Companies **make the same Tariff that they do for Slated Roofs**. For tin and iron it has no equal, as it expands by heat and contracts by cold, and **never cracks or scales**. For Cemetery fences it is particularly adapted, as it will not corrode in the most exposed places. Roofs covered with Tar Sheeting Felt can be made water-tight at a small expense. (For this fact we would refer to G. L. Smith, 51 and 53 Cornhill, Boston.) The Slate or Paint is

### EXTREMELY CHEAP!

Two gallons will cover a hundred square feet of Shingle Roof, or over four hundred of Tin or Iron. Price of the Slate Coating ready for use is 80 cents per gallon, \$16 per half barrel, or \$30 per barrel of about 40 gallons, with a liberal discount to the trade. We furnish and apply the material for \$2.50 per 100 square feet in the vicinity of Beverly. **We use no Tar in this Composition.** The coating has a very heavy body, but is easily applied with a 4 or 6 inch coloring brush. On old and rotten shingles it fills up the holes and pores, hardens them, and gives a new and substantial roof that will last for years. On curled or warped shingles it brings them to their place, and keeps them there. The color of the Slate Coating when first applied is of a dark purple; in about a month it changes to a light uniform slate color, and is, **to all intents and purposes, Slate**. It is a slow dryer, but rain will not affect it in the least in one hour after it is put on. **Price 80 cents per Gallon. \$30 per Barrel of 40 Gallons.**

### LIBERAL DISCOUNT TO THE TRADE.

Orders for the article respectfully solicited. For full information, recommendations from Insurance Companies and others, editorials from the leading newspapers, or a sample shingle coated with slate, address

# Ornamental Iron Works, FLOWER STANDS, &c.

WEIR STREET, TAUNTON, MASS.

The following are some of the many advantages we claim over all others:—

It will hold more plants than any other occupying the same space. Plants can be cared for in half the time required where an ordinary stand is used.

Any plant can be removed without disturbing those next to it.

It stands on castors, so that it can be very easily moved without removing the plants.

It will never wear out, nor is it liable to get out of order, but in case of accident, should any part get broken, you can procure a duplicate at any time.

To GEO. M. MOWBRAY :

Mr. Geo. M. Mowbray has supplied us with his Tri-Nitro-Glycerin ever since we have been engaged upon the Hoosac Tunnel, upwards of four years; during which time our consumption of the article has frequently exceeded four tons a month. We have had the greatest satisfaction in our dealings with Mr. Mowbray, and have no hesitation in saying that, without the assistance of the admirable explosive he manufactures, the time within which this work will be completed would have extended over two years beyond what it will actually be when, within the next few months, the tunnel will be open to the world.

(Signed)

F. SHANLEY & CO., Contractors,

North Adams, Mass. July 11, 1873.

The experience of four years' employment of your Nitro-Glycerin here, has led me to view it as an essential agent on the score alike of economy and efficiency, wherever it is desired to accomplish large results or to attain rapid progress through any difficult rock.

BENJ. D. FROST, Chief Engineer, Hoosac Tunnel.

\* \* \* It is wonderful the work it will perform when properly applied, besides being so much safer to use than powder,

R. H. MCGREEVY, Contractor, Intercolonial R.R. of Canada.

\* \* \* We have made greater progress in one month with your Tri-Nitro-Glycerin, than we were able to make in the six months previous with powder.

# THE GREATEST ECONOMY IN WATER POWER!

## STEVENS' PATENT

# TURBINE WATER WHEEL

Patented May 18, 1869; Reissued July 16, 1872; Patented Aug. 13, 1872.

CANNOT BE EQUALLED FOR

Economy in Water,  
Perfection in Workmanship,  
Durability and Power.

The only Turbine adapted to variable streams. By the independent and simultaneous opening of the gates in sets, it adjusts the supply of water to the exact amount of work. The gates give a full opening under all circumstances, and are balanced by the action of the water itself; thus insuring quick, positive and easily-controlled gates under a high as well as a low head of water.

The guides are cast-steel, placed stationary between the wheel and gates, at the true angle of hydraulic force, and are not varied by the movement of the gates, giving the water the most perfect direction on the buckets.

## THE INDEX,

*A Weekly Paper devoted to Free and Rational Religion.*

It is the object of THE INDEX to give public utterance to the boldest, most cultivated and best matured thought of the age on all religious questions, and to apply it directly to the social and political amelioration of society.

It is edited by **FRANCIS E. ABBOT**, assisted by **ABRAM W. STEVENS**, with the following list of Editorial Contributors:

O. B. FROTHINGHAM, New York City.  
THOMAS W. HIGGINSON, Newport, R.I.  
WILLIAM J. POTTER, New Bedford, Mass.  
WILLIAM H. SPENCER, Haverhill, Mass.

RICHARD P. HALLOWELL, Boston, Mass.  
MRS. E. D. CHENEY, Jamaica Plain, Mass.  
REV. CHARLES VOYSEY, London, England.  
PROF. FRANCIS W. NEWMAN, London, England.

Every Liberal should subscribe for THE INDEX as the best popular exponent of Religious Liberalism. Every Christian minister, and every thinking church member, should subscribe for it, as the clearest, most candid, and most scholarly exposition of the differences between Free Thought and Evangelical Christianity, and as the best means of becoming well-informed of the arguments and the movements which the Church will have to meet in the future.

Almost every number contains a discourse or leading article, which alone is worth the price of one year's subscription.

**Prof. MAX MULLER**, of Oxford, England, in a letter to the Editor, published in THE INDEX for January 4, 1873, says: "That the want of a journal entirely devoted to Religion in the widest sense of the word should be felt in America—that such a journal should have been started and so powerfully supported by the best minds of your country, is a good sign of the times. There is no such journal in England, France, or Germany; though the number of so-called religious or theological periodicals is, as you know, very large." And later still: "I read the numbers of your INDEX with increasing interest."

Send \$3 for one year, or 75 cents for three months on trial.

# DR. NICHOLS' WROUGHT IRON FURNACE

The employment of CAST IRON in the construction of the Heat-Radiating Surfaces of Hot-Air Furnaces has proved a source of great annoyance and discomfort, as well as positive injury to health, by the presence of gas and dust in the hot air produced by such furnaces. It is impossible to construct furnaces of CAST IRON, and secure impermeability to gases. The results of the experiments by Dr. Nichols, four years ago, and also by many other scientific men since, prove that the gaseous products of combustion do *pass through* cast iron when under the influence of heat. In Dr. Nichols' Furnace, cast iron has been entirely discarded in the Heat-radiating Surfaces, and heavy Wrought Iron, carefully and securely riveted together, substituted. Not a particle of ashes can get into the air-chamber, and the heated air passes into the rooms pure and fresh, entirely free from poisonous and deadly gases. Dr. Nichols' Furnace having been improved and perfected this season, we offer it to the public with the assurance that it is the only heating apparatus that will stand the test of practical operation, and that it does away with all the objections heretofore urged against hot-air furnaces. We have made extensive preparations to supply the demand for this furnace in any part of the country. Parties contemplating a change in their heating apparatus, should give their orders as early as possible.

The trade are cordially invited to an inspection of the merits of the Nichols Furnace, and correspondence relating to the same is solicited.

We manufacture three sizes in portable form, and four to be set in brick-work. The furnaces are adapted to warm the smallest dwelling or the largest church or factory.
