COTTCO UNIVERSAL—THE ADAPTABLE INDEX—INSTRUCTIONS

Results of Separately Grouping Common or Frequently Occurring Family Names or Surnames and Active Associations, Corporations, Firms, Etc. Comprehensive Tables to Show the Page on Which All Other Groups Must Start According to the First Letters of Surname or First Letters of First Principal Word in Corporation or Firm Name.

"Table for Mixed Names designates page 1 for As, Ab, Ac, Ad, etc., and the first names to be entered (not a set out) is Adler, write it on first line of page 1, Aarons on second line, Asher on third line, and so on. It will be noted that the figures in the tables run 1, 2, 3, 4, 5, etc., this means each group to be started on the right hand or odd numbered page. The group is continued on the back of sheet, left hand or even numbered page, and when both sides of a sheet are filled up, insert an extra sheet immediately following the sheet that is filled up and number it. (preferably in red ink), the same even number on both sides of the sheet as appears on the left hand page of the pair inserted. It can be seen that any number of sheets can be added for the continuation of a group, and in addition to the even page numbers that you put on both sides of the sheet, we suggest the lettering of each added sheet A, B, C, D, etc.

5. Should a name develop larger than B, you know as a "Mixed Name," rewrite the sheet or sheets and make "the Out House" groups of the names that have developed larger.

6. Many names that are spelled differently and pronounced alike, such as Schaffer-Shaeffer-Shaffer, Lowery-Lowry-Lowrie, Pinson-Pinsone, Reed-Read-Reid, Tolbert-Tolbirt, etc., are grouped together by the Key Tables for Mixed Names. No matter how a person may spell his name, all of such names will be found under the number that is given to the first name in the table. All those who have a name that is spelled differently or by her name is spelled, "Out Box" cannot decide to which group it should be entered in the same way as the different ways of spelling noted in proper alphabetical order.

10. This Index is not complicated, but there is one rule you to study. If in doubt write to the Publishers and Makers, THE COTT SYSTEMS & INDEX CO., CHARLESTON, CONN.

11. Where additional sheets are needed, number them as directed to suggest the use of, where only sheets or any other groups are needed, number them as directed to suggest the use of, where only sheets have indicated. By so doing you will be sure to get supplies correct in every respect.
