

SCHEDULE 3. Persons who Died during the Year ending 1st June, 1850, in ⁴⁵ 17th Sub Division in the County of Campbell State of Lennessee, enumerated by me, John Phillips Ass't Marshal.

NAME OF EVERY PERSON WHO DIED during the Year ending 1st June, 1850, whose usual Place of Abode at the Time of his Death was in his Family.	DESCRIPTION.					PLACE OF BIRTH. Naming the State, Territory, or Country.	The Month in which the Person died.	PROFESSION, OCCUPATION, OR TRADE.	DISEASE, OR CAUSE OF DEATH.	Number of DAYS ILL.
	Age.	Sex.	White, black, or mulatto.	Free or Slave.	Married or single.					
1	2	3	4	5	6	7	8	9	10	11
1 Ellis Right	5	M				Tenn	Feb		Scalded Tongue	sudden
2 Oliver Huff	70	M				Tenn	April		Burnt	4
3 Minerva Adkins	1	F				Tenn	Nov		Whooping Cough	14
4 Chesley Adkins	7	M				Tenn	Dec		Whooping Cough	10
5 Candace Adkins	79	M				Tenn	Nov		unknown	28
6 Robert Stanklefeldt	82	M			(W)	Nb	Oct	None	unknown	39
7 David Henderson	13	M				Tenn	May		Fever	23
8 Milly Keller	23	F			(M)	Tenn	March		Fever	13
9 George Davis	78	M			(M)	unknown	April	Farmers	unknown	39
10 James Douglass	7	M				Tenn	Sept		unknown	2
11 Samuel Douglass	5	M				Tenn	Sept		unknown	4
12 Jesse Lay	84	M			(W)	unknown	March	none	old age	9

Remarks: said great permanency in dry weather. Particularly a stream called Cedar Creek which for the number of its falls & its durability is I think not excelled any where. It is fed by hundreds of fine springs breaking out of the eminences hills into its course. There are many chalybeate and sulphur springs some having valuable medicinal virtues. In the valleys (about one fourth of the county) the soil is stiff clayey and rich.

NAME OF DECEASED PERSON	DATE OF DEATH	AGE	SEX	COLOUR	PROFESSION	PLACE OF BIRTH	CAUSE OF DEATH
-------------------------	---------------	-----	-----	--------	------------	----------------	----------------

In the rest of the county the soil is gravelly or sandy & on the crests & over very rich. The Cumberland Mountain occupies about 1/3 the county it has much rich table land & other lands that are cultivated.

Rocks In the valleys the rocks are limestone. In the mountains sandstone and slate.

Timber is tolerably large of fine quality & abundant. Of forest trees Oak is most abundant. Then pine, hickory, Beech, poplar & walnut. Cedar sugar maple (from which a considerable quantity of sugar is made) Elm, beech, Birch, Linden, Alder, Wild Cherry, Magnolia, persimmon, Locust. But but cypress, Laurel tree &c &c.

Fertilizers Lime is obtained by burning the limestone of the valleys. The plasterers who have used it say it is the best they have ever seen made from the limestone.

Ores. There are considerable quantities of lead ore which however is not worked. The iron ore is of superior quality and vastly abundant. One vein particularly runs across the county (20 miles) where the mountain and Powell Valley joins just at the base of the mountain. This ore is only worked in a small way though it yields a large per cent of the best iron.

Coal, There are many vast beds of coal mostly of good quality though some contains sulphur. It is only used by blacksmiths. Charcoal being used in iron making.

Persons who Died during the Year ending 1st June, 1850, in 17th Sub-Division, in
County of Campbell State of Tennessee, enumerated by me, John Phillips

NAME OF EVERY PERSON WHO DIED during the Year ending 1st June, 1850, whose usual Place of Abode at the Time of his Death was in this Family.	DESCRIPTION.					PLACE OF BIRTH. 21 James Smith	12	M				Tenn	Sept		hives	4
22 James Cannon	12	M				Tenn	July		hoopingcough	16
23 Oliver Collins	22	M M				Nb	Aug	Farmer	consumption	180
24 Parlena Heatherly	1	F				Tenn	May		brood	8
25 Martha Smith	23	F				Tenn	Feb		unknown	13
26 Euricus Smith	67	M			(M)	V A	Feb	Farmer	cansei	150
27 John H Murings	74	M				Tenn	Sept		unknown	2
28 John Harris	1	M				Tenn	Feb		unknown	30
29 Elijah Braden	26	M			(M)	Tenn	March	Farmer	fever	14
30 Dicy M Turner	1	F				Tenn	May		unknown	6
31 Napoleon Futtis	3	M				Tenn	May		unknown	14
32 Anna Loy	15	F				Tenn	Jan		fever	9
33 Sarah Sharp	83	F			(W)	Nb	June		unknown	40
34 Morris Bridges	49	M			(M)	Nb	June	Farmer	fever	20
35 Elizabeth Bridges	6	F				Tenn	July		fever	35

Remarks. Disease in this county is of a very diversified character, mostly Chronic Fevers
are mostly Typhoid, though some intermittent on the Creek Rivers & some dysentery & cholera are
now prevalent. Some cases of Malaria Water. This county is finely watered in the valley,
the water is strong limstone in the valleys of the county it is called from stone water.
Perhaps no industry has found water power for machinery. The streams have many falls.
