<i>John Lane</i>	<i>65</i>	<i>Y</i>			<i>M</i>	<i>Virginia</i>	<i>65</i>		<i>Wagon</i>	<i>4</i>

Remarks: There is no disease known as an endemic of this region. Epidemic occasionally prevail, the principal of which is Dysentery. The great majority of cases of disease or death are from Dysentery, Pneumonia, Pleurisy, acute Rheumatism, and ague & malarial fever. At particular spots or times, more or less of these diseases prevail.

*Remarks: Lead is found sparingly; and some preparations of Pyrite. Small pieces of
Sulphur have been observed in the country; the grains resembling those of wheat. Springs of the
purest limestone are found in great abundance, there are also a great number of mineral
springs; some Chalybeate, & some Sulphur. Well known very rare in the country, perhaps
not more than a half dozen in the whole County. The soil is generally fertile but a few of the mountains*
