Harborn Harris	35	M			M	N.C	Oct	Mechanic	Infected Wound	6 days

Remarks: The most prevalent malady in my District was Typhoid Fever in a very malignant form. The general character of water is fine stone. Some portions of the County abound with shell when water is found from one to three hundred feet in depth. Soil sandy mixed with gravel and clay. Timber of the most abundant nature growth on Oak, Black Jack Hickory, Chestnut and Pine.
