35. <i>Sarah Gault</i>	10	F				<i>Miss</i>	<i>Aug</i>		<i>Scars</i>	8 wks

Remarks: The most prevalent disease have been typhoid fever and
 purpuraeumonia. The fever of the country is high and rolling in part
 and in part very angruous. The great cause of disease are the
 frequent and great vacuities in the temperature of the atmosphere
 and the great amount of vegetable debris in the unburnt woods.
 The biological formation of the secondary Mottled. There are less granules
 of the secondary Mottled. There are less granules of the secondary Mottled.
