Remarks: The 5th Ward ends at No 28- The 6th begins at No 29 in this page
Several deaths of transient persons - who have been landed from Steam Boats
have occurred in this Ward at the Landing - of whom I can get no reliable
report - say some 15 or 20 - probably more -

Remarks. Cholera was epidemic in Memphis in June & July 1849 and Jan & Feb 1850 - Small pox during the winter and spring of 1850. The water from wells is rather limestone - Cisterns and being introduced generally throughout the city - The water from cisterns is thought to be much healthier than that from wells.

Surface level - soil fertile and well adapted to cotton.
 Timber plenty on the creeks - on the uplands scarce - owing to most
 of them being in cultivation.

W. L. Guider
 Ass't Marshal

								<i>Ass't M.</i>		

Remarks: This district includes the suburbs south & south east of Memphis - great quantity of timber has been cut in this Dist - in the last year, very much much decayed timber, stumps &c are left on the ground - the land is high and dry and apparently there is no local cause for disease.

730
SCHEDULE 3. — Persons who Died during the Year ending 1st June, 1850, in 14th Civil District in the County of Shelby State of Tennessee, enumerated by me, H. L. Givner Asst Marshal.

Remarks: This District lies immediately above Memphis on the Mississippi River - About half of it is subject to overflow - surface rather level - or broken, White Oak, Cypress - Red Gum, Ash - cotton wood and Yellow Poplar are abundant - but where above overflow was not too broken - very fertile. Land cheap - say from \$1.00 to \$10. per acre.
