34 John Reynolds	4 1/2	m				"	July		Worms	15
35 Martha	8	f				"	May		Cholera	2

Remarks: Very fertile with numerous species of good limestone and abundant with a
 abundance of iron ore, well timbered such as oak, poplar, beech, hickory, walnut, etc.
 various other kinds of timber which grows naturally in fine soil. There is a
 County school with numerous fine springs of the purest and best water with
 the exception of the mineral part of it adjoining it which is not so well watered.

Remarks: In my remarks I should first state to you that there has been no particular
malady or disease in my district in the year ending June the first 1850 with any other
cause exist in my district for producing disease but such as are common to all mankind. I
would further state that the character of the water in my dist is generally pure
and the soil of my County the farming point is heavy and productive but in the main
