Remarks. The malaria has prevailed within the limits of this County the last year and as usual the citizens have comparatively enjoyed good health. The soil is rich upon the whole and well adapted the raising of better Cotton, Sugar Corn and Hops as well as Farming. Portions of the County are still but even they are productive while the land on the Western corner is remarkably productive.

Remarks. The agriculture of the County is as well conducted as that of any County in the Eastern Division of the State. Wheat and Corn are the chief staples. The former is of excellent quality, and together with Bacon and other provisions is largely exported. Iron ore is very abundant in the County. It is also very common in the southern part of the County. It has been worked for many years.

*Remark. Making (or running out) at or times of about one thousand pounds of pure hair  
supplies to be equal in quality to any in the Union. There are large quantities of  
this stuff, the rest of which is unsalable. This also exists in parts of the County, and  
to a considerable extent. The water is principally hair stuff and of an excellent quality. This  
is the only place where the hair stuff properly happens to be equal in value for the extraction of hair to  
any in any County.*
