

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.  
Note D.—In column 17, note distinctly if no Physician was in attendance, thus (*None.*)

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (*None*).

Enumerator

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth place must be conjectured, the entry may be inclosed in parentheses, thus: Age (26), meaning that the best estimate of the age that can be given is 25 years.

\* Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

Number of the  
line upon  
which the case  
is reported

Place where the family of the deceased resided June 1, 1880.

Town. \_\_\_\_\_ County. \_\_\_\_\_ State. \_\_\_\_\_

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

Number of the line upon which the case is reported

Place where the death occurred

| Town. | County. | State. |
|-------|---------|--------|
|       |         |        |

It would be proper to remark here that I have filled this blank with great care, & after very diligent enquiries. The Physicians and signatures I did not obtain, for several of them lived outside the Enum. Dist., and one outside the County. A provision was made in the Law for paying an Enum. for visiting doctors, and it was also left entirely optional with the Physicians to sign the paper, or not. The Physician I called (Dr. McWhorter) said that my report of the case he attended was incorrect. I interrupted the parties where the Person died, and "Diagnosed" the case myself as a general thing. I understand Physicians of that name.

Page No. 2Supervisor's Dist. No. 3Enumeration Dist. No. 119

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus /, except in the case of divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None).

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in Civil District No. 2, in the County of Lincoln, State of Nebraska.

| NATIVITY.                    |                 |                       |    |    |  |    |      |   |      |   |        |  |                |                                  |     |                                     |     |                            |     |   |     |   |     |                              |     |

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of a family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the family of the deceased resided June 1, 1880.

Town. County. State.

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the death occurred.

Town. County. State.

## REMARKS.

No Physicians' Certificates attached. I showed this Schedule to two of them, but they declined signing on the ground that all the Physicians' names could not be seen; and as they are a peculiar class of men in many things, I could not insist upon them. There was no enumeration of the Physicians' names generally work for pay. The two coroners said that my work here was correct. The Myrtle being in one case in which the cause of death was "accident at hand," as to "Prisoner's" name.

[7-222.]

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus ✓, except in the case of Divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relating to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None.)

**SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in** *Washington* **in the County of** *Washington* **State of** *Virginia*

Note E.—Upon this Schedule should be CAREFULLY RETURNED.

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (35), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the family of the deceased resided June 1, 1880.

Town. County. State.

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the death occurred.

Town. County. State.

REMARKS.

# INSTRUCTIONS

The important point in this Schedule is the question in column 14, headed "Disease or cause of death." Especial pains must be taken in this column to make the answer full and exact, and to this end, attention is called to the following points:

Enter the name of the primary disease in all cases, and where the immediate cause of death has been a complication or consequence of the primary disease, enter that also. For instance, enter all cases of death resulting either immediately or remotely from *measles, scarlet fever, typhoid fever, remittent fever, small pox, &c.*, under the names of those diseases, but add also *dropsy, hemorrhage from the bowels, pneumonia, &c.*, if these occurred as complications and were the more immediate cause of death. In cases of death from hemorrhage, specify the origin of the hemorrhage, thus: *hemorrhage from aortic aneurism, hemorrhage from ulcer of intestines in typhoid fever, hemorrhage from lungs, hemorrhage from wound of neck, &c.* So also for abscess, aneurism, cancer, carbuncle, dropsy, tumor, ulcer, specify the organ or part affected, as *iliac abscess, abscess of liver; femoral aneurism; carbuncle on lip; cancer of breast, cancer of uterus, cancer of face; dropsy of chest, dropsy of abdomen; inflammation of brain, inflammation of liver; tumor of neck, tumor of abdomen; ulcer of face, ulcer of groin, &c.* Typhus, typhoid, and typho-malarial fevers should be carefully distinguished. Especial inquiry should be made for cases of "still-births," including infants born dead from whatever cause. As few deaths as possible should be reported under such general terms as *disease of the throat, disease of the brain, disease of the liver, disease of the lungs, disease of the bowels, disease of the spine, &c.* These should, as far as possible, be reported under special heads.

Make sure that the distinction between *apoplexy, epilepsy, and paralysis* is understood. Distinguish between acute and chronic bronchitis, acute and chronic dysentery or diarrhea, acute and chronic rheumatism. Report cerebro-spinal

meningitis as *cerebro-spinal fever*. Do not report as the cause of death *old age, or intemperance, or debility, or paralysis of the heart, or sudden death*, in any case where it is possible to name any definite disease. In reporting suicide name the means, whether cutting of throat, hanging, drowning, shooting, poisoning by opium, arsenic, &c.

A space is left at the bottom of each page of this Schedule for remarks. It is desired that the enumerators should there describe any particular malady or unusual or peculiar disease which has prevailed in the subdivision, and the supposed cause thereof. In case of any unusual number of deaths by violence or accident (as by the caving of a mine, or similar calamity), an explanation should be given in the space for remarks.

The enumerator should endeavor to see in person every physician residing in or near his enumeration district, who is named in this Schedule as the physician attending at death, and courteously invite him to inspect the entries in regard to the cause of death in his cases, and to verify or restate them as the facts may demand. For this purpose spaces are provided below, numbered to correspond with the lines of the Schedule upon the other side.

If the physician finds the entry in the Schedule correct and fully in accordance with the foregoing instructions he is requested to make the entry in the proper numbered space below: *Correctly stated*. If he does not deem it correct, it is desired that he restate the cause of death in the numbered space in accordance with his own views, signing each entry.

The enumerator should also inquire of each physician within his enumeration district whether he has a record or register of deaths occurring during the census year, kept at the request of the Superintendent of Census, and if so, will offer to take charge of and forward the same to the Census Office under his official frank.

Form for the statement by attending physicians of the causes of death in the cases reported on the reverse side of this sheet.

Page No. 1

Supervisor's Dist. No. 3

Enumeration Dist. No. 12

[7-202.]

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus "/," except in the case of Divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None.)

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in *the 12th Precinct*, in the County of *Lincoln*, State of *Tenn*, *E. C. Whitaker* Enumerator.

| Enumerator.  |                 |                       |    |    |  |    |           |      |                                  |      |                                     |      |                            |     |   |               |

| May Consumption                                      |                 |                       |    |    |  |    |           |      |                                  |      |                                     |      |                            |     |   |               |

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

| Number of the line upon which the case is reported above. | Place where the family of the deceased resided June 1, 1880. |        |
|---|--|--------|
| Town.   | County.  | State. |

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

| Number of the line upon which the case is reported above. | Place where the death occurred. |        |
|---|---------------------------------|--------|
| Town.   | County.                         | State. |

REMARKS.

# INSTRUCTIONS.

The important point in this Schedule is the question in column 14, headed "Disease or cause of death." Especial pains must be taken in this column to make the answer full and exact, and to this end, attention is called to the following points:

Enter the name of the primary disease in all cases, and where the immediate cause of death has been a complication or consequence of the primary disease, enter that also. For instance, enter all cases of death resulting either immediately or remotely from measles, scarlet fever, typhoid fever, remittent fever, small pox, &c., under the names of those diseases, but add also dropsy, hemorrhage from the bowels, pneumonia, &c. if these occurred as complications and were the more immediate cause of death. In cases of death from hemorrhage, specify the origin of the hemorrhage, thus: hemorrhage from aortic aneurism, hemorrhage from ulcer of intestines in typhoid fever, hemorrhage from lungs, hemorrhage from wound of neck, &c. So also for abscess, aneurism, cancer, carbuncle, dropsy, tumor, ulcer, specify the organ or part affected, as iliac abscess, abscess of liver; femoral aneurism; carbuncle on lip; cancer of breast, cancer of uterus, cancer of face; dropsy of chest, dropsy of abdomen; inflammation of brain, inflammation of liver; tumor of neck, tumor of abdomen; ulcer of face, ulcer of groin, &c. Typhus, typhoid, and typho-malarial fevers should be carefully distinguished. Especial inquiry should be made for cases of "still-births," including infants born dead from whatever cause. As few deaths as possible should be reported under such general terms as disease of the throat, disease of the brain, disease of the liver, disease of the lungs, disease of the bowels, disease of the spine, &c. These should, as far as possible, be reported under special heads.

Make sure that the distinction between apoplexy, epilepsy, and paralysis is understood. Distinguish between acute and chronic bronchitis, acute and chronic dysentery or diarrhea, acute and chronic rheumatism. Report cerebro-spinal

meningitis as cerebro-spinal fever. Do not report as the cause of death old age, or intemperance, or debility, or paralysis of the heart, or sudden death, in any case where it is possible to name any definite disease. In reporting suicide name the means, whether cutting of throat, hanging, drowning, shooting, poisoning by opium, arsenic, &c.

A space is left at the bottom of each page of this Schedule for remarks. It is desired that the enumerators should there describe any particular malady or unusual or peculiar disease which has prevailed in the subdivision, and the supposed cause thereof. In case of any unusual number of deaths by violence or accident (as by the caving of a mine, or similar calamity), an explanation should be given in the space for remarks.

The enumerator should endeavor to see in person every physician residing in or near his enumeration district, who is named in this Schedule as the physician attending at death, and courteously invite him to inspect the entries in regard to the cause of death in his cases, and to verify or restate them as the facts may demand. For this purpose spaces are provided below, numbered, to correspond with the lines of the Schedule upon the other side.

If the physician finds the entry in the Schedule correct and fully in accordance with the foregoing instructions he is requested to make the entry in the proper numbered space below: *Correctly stated.* If he does not deem it correct, it is desired that he restate the cause of death in the numbered space in accordance with his own views, signing each entry.

The enumerator should also inquire of each physician within his enumeration district whether he has a record or register of deaths occurring during the Census year, kept at the request of the Superintendent of Census, and if so, will offer to take charge of and forward the same to the Census Office under his official frank.

Form for the statement by attending physicians of the causes of death in the cases reported on the reverse side of this sheet.

Page No. 2Supervisor's Dist. No. 3Enumeration Dist. No. 121

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus /, except in the case of Divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None.)

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in Clinton, in the County of Lincoln, State of Tennessee.

Enumerator.

| 11 |    | Waggoner Nelly               | 16  | F   | B  | /      |         | Tenn. |     |     | House-work | May Tuberculosis        |     | Holman    |     |
| 12 |    | Waggoner John                | 1   | M   | B  | /      |         | Tenn. |     |     |            | Sept. Cholera infant.   |     |           |     |
| 13 |    | Whitaker William             | 74  | F   | W  | /      |         | Tenn. |     |     |            | Feb. Female Disease (?) |     | Grissell  |     |
| 14 |    | Whitaker Andy                | 1 1/2   | F   | W  | /      |         | Tenn. |     |     |            | May Cholera infant.     |     | Holman    |     |

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

| Number of the line upon which the case is reported above. | Place where the family of the deceased resided June 1, 1880. |         |        |
|---|--|---------|--------|
|   | Town.  | County. | State. |
|   |  |         |        |
|   |  |         |        |
|   |  |         |        |
|   |  |         |        |
|   |  |         |        |
|   |  |         |        |
|   |  |         |        |
|   |  |         |        |
|   |  |         |        |

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

| Number of the line upon which the case is reported above. | Place where the death occurred. |         |        |
|---|---------------------------------|---------|--------|
|   | Town.                           | County. | State. |
|   |                                 |         |        |
|   |                                 |         |        |
|   |                                 |         |        |
|   |                                 |         |        |
|   |                                 |         |        |
|   |                                 |         |        |
|   |                                 |         |        |
|   |                                 |         |        |
|   |                                 |         |        |

REMARKS.

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 2, 3, and 8, an affirmative mark only will be used, thus /, except in the case of Divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None.)

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in *St. Louis, Mo.*, in the County of *Lincoln*, State of *Missouri*. *A. J. J. Hopfer* Enumerator.

## Note E.—Upon this Schedule should be CAREFULLY RETURNED.

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

Number of the line upon which the case is reported above. Place where the family of the deceased resided June 1, 1880. Town. County. State.

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

Number of the line upon which the case is reported above. Place where the death occurred. Town. County. State.

1. *Blanche Lincoln* *Iowa*  
29. *Calliope* *Iowa*

## REMARKS.

*Dr. H. H. Robertson disowns to being the Physician in the cases above found on lines 17 and 22 respectively. Says he was called in the night of the death reported on line 22.*

# INSTRUCTIONS.

The important point in this Schedule is the question in column 14, headed "Disease or cause of death." Especial pains must be taken in this column to make the answer full and exact, and to this end, attention is called to the following points:

Enter the name of the primary disease in all cases, and where the immediate cause of death has been a complication or consequence of the primary disease, enter that also. For instance, enter all cases of death resulting either immediately or remotely from measles, scarlet fever, typhoid fever, remittent fever, small pox, &c., under the names of those diseases, but add also dropsy, hemorrhage from the bowels, pneumonia, &c., if these occurred as complications and were the more immediate cause of death. In cases of death from hemorrhage, specify the origin of the hemorrhage, thus: hemorrhage from aortic aneurism, hemorrhage from ulcer of intestines in typhoid fever, hemorrhage from lungs, hemorrhage from wound of neck, &c. So also for abscess, aneurism, cancer, carbuncle, dropsy, tumor, ulcer, specify the organ or part affected, as iliac abscess, abscess of liver; femoral aneurism; carbuncle on lip; cancer of breast, cancer of uterus, cancer of face; dropsy of chest, dropsy of abdomen; inflammation of brain, inflammation of liver; tumor of neck, tumor of abdomen; ulcer of face, ulcer of groin, &c. Typhus, typhoid, and typho-malarial fevers should be carefully distinguished. Especial inquiry should be made for cases of "still-births," including infants born dead from whatever cause. As few deaths as possible should be reported under such general terms as disease of the throat, disease of the brain, disease of the liver, disease of the lungs, disease of the bowels, disease of the spine, &c. These should, as far as possible, be reported under special heads.

Make sure that the distinction between apoplexy, epilepsy, and paralysis is understood. Distinguish between acute and chronic bronchitis, acute and chronic dysentery or diarrhoea, acute and chronic rheumatism. Report cerebro-spinal

meningitis as cerebro-spinal fever. Do not report as the cause of death old age, or intemperance, or debility, or paralysis of the heart, or sudden death, in any case where it is possible to name any definite disease. In reporting suicide name the means, whether cutting of throat, hanging, drowning, shooting, poisoning by opium, arsenic, &c.

A space is left at the bottom of each page of this Schedule for remarks. It is desired that the enumerators should there describe any particular malady or unusual or peculiar disease which has prevailed in the subdivision, and the supposed cause thereof. In case of any unusual number of deaths by violence or accident (as by the caving of a mine, or similar calamity), an explanation should be given in the space for remarks.

The enumerator should endeavor to see in person every physician residing in or near his enumeration district, who is named in this Schedule as the physician attending at death, and courteously invite him to inspect the entries in regard to the cause of death in his cases, and to verify or restate them as the facts may demand. For this purpose spaces are provided below, numbered to correspond with the lines of the Schedule upon the other side.

If the physician finds the entry in the Schedule correct and fully in accordance with the foregoing instructions, he is requested to make the entry in the proper numbered space below: *Correctly stated.* If he does not deem it correct, he is desired that he restate the cause of death in the numbered space in accordance with his own views, signing each entry.

The enumerator should also inquire of each physician within his enumeration district, whether he has a record or register of deaths occurring during the Census year, kept at the request of the Superintendent of Census, and if so, will offer to take charge of and forward the same to the Census Office under his official frank.

Form for the statement by attending physicians of the causes of death in the cases reported on the reverse side of this sheet.

# INSTRUCTIONS.

The important point in this Schedule is the question in column 14, headed "Disease or cause of death." Especial pains must be taken in this column to make the answer full and exact, and to this end, attention is called to the following points:

Enter the name of the primary disease in all cases, and where the immediate cause of death has been a complication or consequence of the primary disease, enter that also. For instance, enter all cases of death resulting either immediately or remotely from measles, scarlet fever, typhoid fever, remittent fever, small pox, &c., under the names of those diseases, but add also dropsy, hemorrhage from the bowels, pneumonia, &c., if these occurred as complications and were the more immediate cause of death. In cases of death from hemorrhage, specify the origin of the hemorrhage, thus: hemorrhage from aortic aneurism, hemorrhage from ulcer of intestines in typhoid fever, hemorrhage from lungs, hemorrhage from wound of neck, &c. So also for abscess, aneurism, cancer, carbuncle, dropsy, tumor, ulcer, specify the organ or part affected, as iliac abscess, abscess of liver, femoral aneurism, carbuncle on lip, cancer of breast, cancer of uterus, cancer of face; dropsy of chest, dropsy of abdomen; inflammation of brain, inflammation of liver; tumor of neck, tumor of abdomen; ulcer of face, ulcer of groin, &c. Typhus, typhoid, and typho-malarial fevers should be carefully distinguished. Especial inquiry should be made for cases of "still-births," including infants born dead from whatever cause. As few deaths as possible should be reported under such general terms as disease of the throat, disease of the brain, disease of the liver, disease of the lungs, disease of the bowels, disease of the spine, &c. These should as far as possible, be reported under special heads.

Make sure that the distinction between apoplexy, epilepsy, and paralysis is understood. Distinguish between acute and chronic bronchitis, acute and chronic dysentery or diarrhoea, acute and chronic rheumatism. Report cerebro-spinal

meningitis as cerebro-spinal fever. Do not report as the cause of death old age, or intemperance, or debility, or paralysis of the heart, or sudden death, in any case where it is possible to name any definite disease. In reporting suicide name the means, whether cutting of throat, hanging, drowning, shooting, poisoning by opium, arsenic, &c.

A space is left at the bottom of each page of this Schedule for remarks. It is desired that the enumerators should there describe any particular malady or unusual or peculiar disease which has prevailed in the subdivision, and the supposed cause thereof. In case of any unusual number of deaths by violence or accident (as by the caving of a mine, or similar calamity), an explanation should be given in the space for remarks.

The enumerator should endeavor to see in person every physician residing in, or near his enumeration district, who is named in this Schedule as the physician attending at death, and courteously invite him to inspect the entries in regard to the cause of death in his cases, and to verify or restate them as the facts may demand. For this purpose spaces are provided below, numbered to correspond with the lines of the Schedule upon the other side.

If the physician finds the entry in the Schedule correct and fully in accordance with the foregoing instructions he is requested to make the entry in the proper numbered space below: *Correctly stated.* If he does not deem it correct, it is desired that he restate the cause of death in the numbered space in accordance with his own views, signing each entry.

The enumerator should also inquire of each physician within his enumeration district whether he has a record or register of deaths occurring during the Census year kept at the request of the Superintendent of Census, and if so, will offer to take charge of and forward the same to the Census Office under his official stamp.

Form for the statement by attending physicians of the causes of death in the cases reported on the reverse side of this sheet.

| 463 | Walter, Danny       | 3  | F   | W                        | 1  | Dem | Dem | Dem  | May   | Hooping  |             | 3   |     | Grissell |     | Grissell |

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being, at date of death, a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the family of the deceased resided June 1, 1880.

Town. County. State.

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the death occurred.

Town. County. State.

REMARKS.

## INSTRUCTIONS.

The important point in this Schedule is the question in column 14, headed "Disease or cause of death." Especial pains must be taken in this column to make the answer full and exact, and to this end, attention is called to the following points:

Enter the name of the primary disease in all cases, and where the immediate cause of death has been a complication or consequence of the primary disease, enter that also. For instance, enter all cases of death resulting either immediately or remotely from *measles, scarlet fever, typhoid fever, remittent fever, small pox, &c.*, under the names of those diseases, but add also *dropsy, hemorrhage from the bowels, pneumonia, &c.*, if these occurred as complications and were the more immediate cause of death. In cases of death from hemorrhage, specify the origin of the hemorrhage, thus: *hemorrhage from aortic aneurism, hemorrhage from ulcer of intestines in typhoid fever, hemorrhage from lungs, hemorrhage from wound of neck, &c.* So also for abscess, aneurism, cancer, carbuncle, dropsy, tumor, ulcer, specify the organ or part affected, as *iliac abscess, abscess of liver, femoral aneurism, carbuncle on lip, cancer of breast, cancer of uterus, cancer of eye, dropsy of chest, dropsy of abdomen, inflammation of brain, inflammation of liver, tumor of neck, tumor of abdomen, ulcer of face, ulcer of groin, &c.* Typhus, typhoid, and typho-malarial fevers should be carefully distinguished. Especial inquiry should be made for cases of "still-births," including infants born dead from whatever cause. As few deaths as possible should be reported under such general terms as *disease of the throat, disease of the brain, disease of the liver, disease of the lungs, disease of the bowels, disease of the spine, &c.* These should, as far as possible, be reported under special heads.

Make sure that the distinction between *apoplexy, epilepsy, and paralysis* is understood. Distinguish between acute and chronic bronchitis, acute and chronic dysentery or diarrhea, acute and chronic rheumatism. Report cerebro-spinal

meningitis as cerebro-spinal fever. Do not report as the cause of death *old age, or intemperance, or debility, or paralysis of the heart, or sudden death*, in any case where it is possible to name any definite disease. In reporting suicide name the means, whether cutting of throat, hanging, drowning, shooting, poisoning by opium, arsenic, &c.

A space is left at the bottom of each page of this Schedule for remarks. It is desired that the enumerators should there describe any particular malady or unusual or peculiar disease which has prevailed in the subdivision, and the supposed cause thereof. In case of any unusual number of deaths by violence or accident (as by the caving of a mine, or similar calamity), an explanation should be given in the space for remarks.

The enumerator should endeavor to see in person every physician residing in or near his enumeration district, who is named in this Schedule as the physician attending at death, and courteously invite him to inspect the entries in regard to the cause of death in his cases, and to verify or restate them as the facts may demand. For this purpose spaces are provided below, numbered to correspond with the lines of the Schedule upon the other side.

If the physician finds the entry in the Schedule correct and fully in accordance with the foregoing instructions he is requested to make the entry in the proper numbered space below: *Correctly stated.* If he does not deem it correct, it is desired that he restate the cause of death in the numbered space in accordance with his own views, signing each entry.

The enumerator should also inquire of each physician within his enumeration district whether he has a record or register of deaths occurring during the Census year, kept at the request of the Superintendent of Census, and if so, will offer to take charge of and forward the same to the Census Office under his official frank.

Form for the statement by attending physicians of the causes of death in the cases reported on the reverse side of this sheet.

Page No.

Supervisor's Dist: No.

Enumeration Dist: No. 123

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus /, except in the case of Divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None).

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in *Civil Dist No. 8*, in the County of *Lincoln*, State of *Tennessee*. *S. H. McLeod* Enumerator.

| Name of the person deceased. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  | Personal Description. |  |  | NATIVITY. |  |  | Profession, Occupation or Trade. |  | The month in which the person died. |                | Disease or cause of death. |    | If the disease was not fatal, state the place of death, date, and the name of the attending Physician. |    |  |           |  |              |  |                     |  |                        |  |                   |  |                   |  |                   |  |     |  |     |  |     |  |

Note E.—Upon this Schedule should be CAREFULLY RETURNED.

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of this enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the family of the deceased resided June 1, 1880.

Town.

County.

State.

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the death occurred.

Town.

County.

State.

REMARKS.

# INSTRUCTIONS.

The important point in this Schedule is the question in column 14, headed "Disease or cause of death." Especial pains must be taken in this column to make the answer full and exact, and to this end, attention is called to the following points:

Enter the name of the primary disease in all cases, and where the immediate cause of death has been a complication or consequence of the primary disease, enter that also. For instance, enter all cases of death resulting either immediately or remotely from measles, scarlet fever, typhoid fever, remittent fever, small pox, &c., under the names of those diseases, but add also dropsy, hemorrhage from the bowels, pneumonia, &c., if these occurred as complications and were the more immediate cause of death. In cases of death from hemorrhage, specify the origin of the hemorrhage, thus: hemorrhage from aortic aneurism, hemorrhage from ulcer of intestines in typhoid fever, hemorrhage from lungs, hemorrhage from wound of neck, &c. So also for abscess, aneurism, cancer, carbuncle, dropsy, tumor, ulcer, specify the organ or part affected, as: iliac abscess, abscess of liver; femoral aneurism; carbuncle on lip; cancer of breast, cancer of uterus, cancer of face; dropsy of chest, dropsy of abdomen; inflammation of brain, inflammation of liver; tumor of neck, tumor of abdomen; ulcer of face, ulcer of groin, &c. Typhus, typhoid, and typho-malarial fevers should be carefully distinguished. Especial inquiry should be made for cases of "still-births," including infants born dead from whatever cause. As few deaths as possible should be reported under such general terms as disease of the throat, disease of the brain, disease of the liver, disease of the lungs, disease of the bowels, disease of the spine, &c. These should, as far as possible, be reported under special heads.

Make sure that the distinction between apoplexy, epilepsy, and paralysis is understood. Distinguish between acute and chronic bronchitis, acute and chronic dysentery or diarrhoea, acute and chronic rheumatism. Report cerebro-spinal

meningitis as cerebro-spinal fever. Do not report as the cause of death old age or intemperance, or debility, or paralysis of the heart, or sudden death, in any case where it is possible to name any definite disease. In reporting suicide name the means, whether cutting of throat, hanging, drowning, shooting, poisoning by opium, arsenic, &c.

A space is left at the bottom of each page of this Schedule for remarks. It is desired that the enumerators should there describe any particular malady or unusual or peculiar disease which has prevailed in the subdivision and the supposed cause thereof. In case of any unusual number of deaths by violence or accident (as by the caving of a mine, or similar calamity), an explanation should be given in the space for remarks.

The enumerator should endeavor to see in person every physician residing in or near his enumeration district, who is named in this Schedule as the physician attending at death, and courteously invite him to inspect the entries in regard to the cause of death in his cases, and to verify or restate them as the facts may demand. For this purpose spaces are provided below, numbered to correspond with the lines of the Schedule upon the other side.

If the physician finds the entry in the Schedule correct and fully in accordance with the foregoing instructions he is requested to make the entry in the proper numbered space below: Correctly stated. If he does not deem it correct, it is desired that he restate the cause of death in the numbered space in accordance with his own views, signing each entry.

The enumerator should also inquire of each physician within his enumeration district whether he has a record or register of deaths occurring during the Census year, kept at the request of the Superintendent of Census, and if so, will offer to take charge of and forward the same to the Census Office under his official frank.

Form for the statement by attending physicians of the causes of death in the cases reported on the reverse side of this sheet.

| Number of the line upon which this case is reported. | CAUSE OF DEATH.                   |            | SIGNATURE OF THE ATTENDING PHYSICIAN. | Number of the line upon which this case is reported. | CAUSE OF DEATH.                  |            | SIGNATURE OF THE ATTENDING PHYSICIAN. |

REMARKS.

The four names in this schedule are not enumerated in Schedule no. 1. The other six are. It is an oversight that I did notice until it was too late to put them in. I hope it will make no difference, as it will only amount to this, that 14 names of this schedule will not be deducted from Schedule no. 1.

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus: / except in the case of Divorced.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None).

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in 10 Civil District, in the County of Lincoln, State of Illinois.

Ans J. Green

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

\*Of the deaths reported above, the following occurred in this enumeration district, but the families for which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

[illegible]

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

[illegible]

Supervisor's Dist. No. 9

Enumeration Dist. No. 126

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus, /, except in the case of Divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None.)

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in 126th Enumeration District, in the County of Lincoln, State of Tennessee, Frank P. Taylor Enumerator.

| 1.                          | 2.                | Personal Description.   |     |   | 6.     | 7.      | 8.          | 9.  | 10.   | 11.  | 12.                              | 13.                                 | 14.                        | 15.  | 16.   | 17.                          |

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of this enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the family of the deceased resided June 1, 1880.

Town. County. State.

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

Number of the line upon which the case is reported above.

Place where the death occurred.

Town. County. State.

REMARKS.

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in 14<sup>th</sup> Civil Dist., in the County of \_\_\_\_\_, State of \_\_\_\_\_, J. M. Mcatee

REMARKS

# INSTRUCTIONS.

The important point in this Schedule is the question in column 14, headed "Disease or cause of death." Especial pains must be taken in this column, to make the answer full and exact, and to this end, attention is called to the following points:

Enter the name of the primary disease in all cases, and where the immediate cause of death has been a complication or consequence of the primary disease, enter that also. For instance, enter all cases of death resulting either immediately or remotely from measles, scarlet fever, typhoid fever, remittent fever, smallpox, &c., under the names of those diseases, but add also dropsy, hemorrhage from the bowels, pneumonia, &c., if these occurred as complications and were the more immediate cause of death. In cases of death from hemorrhage, specify the origin of the hemorrhage, thus: hemorrhage from aortic aneurism, hemorrhage from ulcer of intestines in typhoid fever, hemorrhage from lungs, hemorrhage from wound of neck, &c. So also for abscess, aneurism, cancer, carbuncle, dropsy, tumor, ulcer, specify the organ or part affected, as iliac abscess, abscess of liver; femoral aneurism; carbuncle on lip; cancer of breast, cancer of uterus, cancer of face; dropsy of chest, dropsy of abdomen; inflammation of brain, inflammation of liver; tumor of neck, tumor of abdomen; ulcer of face, ulcer of groin, &c. Typhus, typhoid, and typho-malarial fevers should be carefully distinguished. Especial inquiry should be made for cases of "still-births," including infants born dead from whatever cause. As few deaths as possible should be reported under such general terms as disease of the throat, disease of the brain, disease of the liver, disease of the lungs, disease of the bowels, disease of the spine, &c. These should, as far as possible, be reported under special heads.

Make sure that the distinction between apoplexy, epilepsy, and paralysis is understood. Distinguish between acute and chronic bronchitis, acute and chronic dysentery or diarrhoea, acute and chronic rheumatism. Report cerebro-spinal

meningitis as cerebro-spinal fever. Do not report as the cause of death old age, or intemperance, or debility, or paralysis of the heart, or sudden death, in any case where it is possible to name any definite disease. In reporting suicide name the means, whether cutting of throat, hanging, drowning, shooting, poisoning by opium, arsenic, &c.

A space is left at the bottom of each page of this Schedule for remarks. It is desired that the enumerators should there describe any particular malady or unusual or peculiar disease which has prevailed in the subdivision, and the supposed cause thereof. In case of any unusual number of deaths by violence or accident (as by the caving of a mine, or similar calamity), an explanation should be given in the space for remarks.

The enumerator should endeavor to see in person every physician residing in or near his enumeration district, who is named in this Schedule as the physician attending at death, and courteously invite him to inspect the entries in regard to the cause of death in his cases, and to verify or restate them as the facts may demand. For this purpose spaces are provided below, numbered to correspond with the lines of the Schedule upon the other side.

If the physician finds the entry in the Schedule correct and fully in accordance with the foregoing instructions he is requested to make the entry in the proper numbered space below: *Correctly stated.* If he does not deem it correct, it is desired that he restate the cause of death in the numbered space in accordance with his own views, signing each entry.

The enumerator should also inquire of each physician within his enumeration district whether he has a record or register of deaths occurring during the Census year, kept at the request of the Superintendent of Census, and if so, will offer to take charge of and forward the same to the Census Office under his official frank.

Form for the statement by attending physicians of the causes of death in the cases reported on the reverse side of this sheet.

Supervisor's Dist. No. 3

Enumeration Dist. No. 127

[7-222.]

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 7, and 8, an affirmative mark only will be used, thus /, except in the case of Divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None).

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in 15<sup>th</sup> Civil Dist. in the County of Lincoln, State of Tennessee. J. M. C. J. M. C. J. M. C.

| Name of the person deceased.                              | Personal Description.<br>Age, sex, color, height, weight, hair, eyes, nose, mouth, ears, hands, feet, scars, marks, or tattoos, if any. | What was the civil condition of the person who died?<br>Single, Married, Widowed, Divorced D. | NATIVITY.<br>Place of birth of this person, naming the State or Territory or the U. S., or the country, if it be foreign. | Where was the father of this person born?<br>As in column 10. | Where was the mother of this person born?<br>As in column 11. | Profession, Occupation or Trade.<br>Not to be asked in respect to persons under 10 years of age. | The month in which the person died. | Disease or cause of death. | If the disease was not contracted at place of death, state the place. | Name of attending Physician. |

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of this enumeration district, as follows:

| Number of the line upon which the case is reported above. | Place where the family of the deceased resided June 1, 1880.<br>Town. County. State. | Number of the line upon which the case is reported above. | Place where the death occurred.<br>Town. County. State. |

REMARKS.

## INSTRUCTIONS.

The important point in this Schedule is the question in column 14, headed "Disease or cause of death." Especial pains must be taken in this column to make the answer full and exact, and to this end, attention is called to the following points:

Enter the name of the primary disease in all cases, and where the immediate cause of death has been a complication or consequence of the primary disease, enter that also. For instance, enter all cases of death resulting either immediately or remotely from *measles, scarlet fever, typhoid fever, remittent fever, small pox, &c.*, under the names of those diseases, but add also *dropsy, hemorrhage from the bowels, pneumonia, &c.*, if these occurred as complications and were the more immediate cause of death. In cases of death from hemorrhage, specify the origin of the hemorrhage, thus: *hemorrhage from aortic aneurism, hemorrhage from ulcer of intestines in typhoid fever, hemorrhage from lungs, hemorrhage from wound of neck, &c.* So also for abscess, aneurism, cancer, carbuncle, dropsy, tumor, ulcer, specify the organ or part affected, as *iliac abscess, abscess of liver; femoral aneurism; carbuncle on lip; cancer of breast, cancer of uterus, cancer of face; dropsy of chest, dropsy of abdomen; inflammation of brain, inflammation of liver; tumor of neck, tumor of abdomen; ulcer of face, ulcer of groin, &c.* Typhus, typhoid, and typho-malarial fevers should be carefully distinguished. Especial inquiry should be made for cases of "still-births," including infants born dead from whatever cause. As few deaths as possible should be reported under such general terms as *disease of the throat, disease of the brain, disease of the liver, disease of the lungs, disease of the bowels, disease of the spine, &c.* These should, as far as possible, be reported under special heads.

Make sure that the distinction between *apoplexy, epilepsy, and paralysis* is understood. Distinguish between acute and chronic bronchitis, acute and chronic dysentery or diarrhoea, acute and chronic rheumatism. Report cerebro-spinal

meningitis as cerebro-spinal fever. Do not report as the cause of death *old age, or intemperance, or debility, or paralysis of the heart, or sudden death*, in any case where it is possible to name any definite disease. In reporting suicide name the means; whether cutting of throat, hanging, drowning, shooting, poisoning by opium, arsenic, &c.

A space is left at the bottom of each page of this Schedule for remarks. It is desired that the enumerators should there describe any particular malady or unusual or peculiar disease which has prevailed in the subdivision, and the supposed cause thereof. In case of any unusual number of deaths by violence or accident (as by the caving of a mine, or similar calamity), an explanation should be given in the space for remarks.

The enumerator should endeavor to see in person every physician residing in or near his enumeration district, who is named in this Schedule as the physician attending at death, and courteously invite him to inspect the entries in regard to the cause of death in his cases, and to verify or restate them as the facts may demand. For this purpose spaces are provided below, numbered to correspond with the lines of the Schedule upon the other side.

If the physician finds the entry in the Schedule correct and fully in accordance with the foregoing instructions he is requested to make the entry in the proper numbered space below: *Correctly stated.* If he does not deem it correct, it is desired that he restate the cause of death in the numbered space in accordance with his own views, signing each entry.

The enumerator should also inquire of each physician within his enumeration district whether he has a record or register of deaths occurring during the Census year, kept at the request of the Superintendent of Census, and if so, will offer to take charge of and forward the same to the Census Office under his official frank.

Form for the statement by attending physicians of the causes of death in the cases reported on the reverse side of this sheet.

Page No.

Supervisor's Dist. No.

Enumeration Dist. No.

[7-222.]

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus "X" except in the case of Divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None).

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in the 16th and 17th Precincts in the County of Lincoln, State of Tennessee.

Enumerated by

| Name of the person deceased.   | Personal Description. | What was the civil condition of the person who died? | NATIVITY. | Place of birth of this person, naming the State or Territory of the U. S., or the country, if of foreign birth. | Where was the father of this person born? (As in column 10.) | Where was the mother of this person born? (As in column 11.) | Profession, Occupation or Trade. | The month or months of the year in which the person died. | Disease or cause of death. | If the disease was not certified place of death, state the place. | Name of attending Physician. |

REMARKS.

Page No.

Supervisor's Dist. No.

Enumeration Dist. No.

Note A.—The Census Year begins June 1, 1870, and ends May 31, 1880.

Note B.—In making entries in columns 9, 10, and 11, an affirmative mark only will be used, thus /, except in the case of Divorced persons, column 9, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None.)

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in Enumeration Dist. 129 in the County of Lincoln, State of Tennessee. Alfred Borden

| 1.  | 2.                | 3. Personal Description. |         |           | 6. What was the civil condition of the person who died? | 7. Place of birth of this person, naming the State or Territory of the U.S., or the country, if of foreign birth. | 8. Where was the Father of this person born? As in column 9. | 9. Where was the Mother of this person born? As in column 10. | 11. Profession, Occupation or Trade. | 12. The month in which the person died. | 13. Disease or cause of death. | 14. How long a resident of the county? If less than one year, state month and day. | 15. If the disease was not contracted at place of death, state the place. | 16. Name of attending Physician. |

## REMARKS.

Death Register 3. Look up the family names of Lucinda Randolph and Lucinda Wilson. On the first of June no such family existed.

# INSTRUCTIONS

The important point in this Schedule is the question in column 14, headed "Disease or cause of death." Especial pairs must be taken in this column to make the answer full and exact, and to this end, attention is called to the following points:

Enter the name of the primary disease in all cases, and where the immediate cause of death has been a complication or consequence of the primary disease, enter that also. For instance, enter all cases of death resulting either immediately or remotely from measles, scarlet fever, typhoid fever, remittent fever, small pox, &c., under the names of those diseases, but add also dropsy, hemorrhage from the bowels, pneumonia, &c., if these occurred as complications and were the more immediate cause of death. In cases of death from hemorrhage, specify the origin of the hemorrhage, thus: hemorrhage from aortic aneurism, hemorrhage from ulcer of intestines in typhoid fever, hemorrhage from lungs, hemorrhage from wound of neck, &c. So also for abscess, abscess of liver; femoral aneurism; carbuncle on lip; cancer of breast, cancer of uterus, cancer of face; dropsy of chest, dropsy of abdomen; inflammation of brain, inflammation of liver; tumor of neck, tumor of abdomen; ulcer of face, ulcer of groin, &c. Typhus, typhoid, and typho-malarial fevers should be carefully distinguished. Especial inquiry should be made for cases of "still-births," including infants born dead from whatever cause. As few deaths as possible should be reported under such general terms as disease of the throat, disease of the brain, disease of the liver, disease of the lungs, disease of the bowels, disease of the spine, &c. These should, as far as possible, be reported under special heads.

Make sure that the distinction between apoplexy, epilepsy, and paralysis is understood. Distinguish between acute and chronic bronchitis, acute and chronic dysentery or diarrhoea, acute and chronic rheumatism. Report cerebro-spinal

meningitis as cerebro-spinal fever. Do not report as the cause of death old age, or intemperance, or debility, or paralysis of the heart, or sudden death, in any case where it is possible to name any definite disease. In reporting suicide name the means, whether cutting of throat, hanging, drowning, shooting, poisoning by opium, arsenic, &c.

A space is left at the bottom of each page of this Schedule for remarks. It is desired that the enumerators should there describe any particular malady or unusual or peculiar disease which has prevailed in the subdivision, and the supposed cause thereof. In case of any unusual number of deaths by violence or accident (as by the caving of a mine, or similar calamity), an explanation should be given in the space for remarks.

The enumerator should endeavor to see in person every physician residing in or near his enumeration district, who is named in this Schedule as the physician attending at death, and courteously invite him to inspect the entries in regard to the cause of death in his cases, and to verify or restate them as the facts may demand. For this purpose spaces are provided below, numbered to correspond with the lines of the Schedule upon the other side.

If the physician finds the entry in the Schedule correct and fully in accordance with the foregoing instructions he is requested to make the entry in the proper numbered space below: *Correctly stated.* If he does not deem it correct, it is desired that he restate the cause of death in the numbered space in accordance with his own views, signing each entry.

The enumerator should also inquire of each physician within his enumeration district whether he has a record or register of deaths occurring during the Census year, kept at the request of the Superintendent of Census, and if so, will offer to take charge of and forward the same to the Census Office under his official frank.

Form for the statement by attending physicians of the causes of death in the cases reported on the reverse side of this sheet.

| Number of the line on Schedule 5 upon which this case is reported. | CAUSE OF DEATH.  |              | SIGNATURE OF THE ATTENDING PHYSICIAN. | Number of the line on Schedule 5 upon which this case is reported. | CAUSE OF DEATH.  |              | SIGNATURE OF THE ATTENDING PHYSICIAN. | Number of the line on Schedule 5 upon which this case is reported. | CAUSE OF DEATH.  |             | SIGNATURE OF THE ATTENDING PHYSICIAN. |

Page No. 1  
 Supervisor's Dist. No. 3  
 Enumeration Dist. No. 130

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.  
 Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus /, except in the case of Divorced persons, column 8, when the letter "D" is to be used.  
 Note C.—For instructions relative to the entries in column 14, see back of this Schedule.  
 Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None.)

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in District No. 3, in the County of Lincoln, State of Ill. L. C. Butler Enumerator.

| Name of the person deceased. |                  | Age at last birthday. If under 15, give month and day. If female, give date of last menstruation. |    | Personal Description. |    | What was the civil condition of the person who died? |    | NATIVITY. |         |         | Profession, Occupation or Trade. |       | The month in which the person died. |     | Disease or cause of death. |     | If the disease was not contracted at place of death, state the place. |     | Name of attending Physician. |  |

Supervisor's Dist. No. 3

Enumeration Dist. No. 130

[7-222.]

Note A.—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 9, 10, and 11, an affirmative mark only will be used, thus /, except in the case of divorced persons, column 9, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule.

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None).

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in 20th Civil Dist, in the County of Lincoln, State of Illinois. 86

| Schedule 1                   |    |                       |    |          |  |           |       |                       |     |                |                                  |     |                                     |     |                            |     | Enumerator.  |     |   |     |                              |     |

| 161. no name                 | 72 | M                     | W  | 1        | Illinois   | Unmarried | Sept  | apoplexy              | 7   | place of birth | Lincoln                          |     |                                     |     |                            |     |  |     |   |     |                              |     |

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1880, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

| Number of the line upon which the case is reported above. | Place where the family of the deceased resided June 1, 1880. |
|---|--|
| Town.   | County.  |
|   |  |
|   |  |

The Doctor reported above I showed them the Physicians they said that I had the disease correct, the case of Mrs Tucker. He is a Circuit Rider and was from home and could learn nothing about her only what I have reported. Some cases no Physician thy before they was known to be dangerous. The cases reported could learn the family was from home & I could not find them.

**Note A.**—The Census Year begins June 1, 1879, and ends May 31, 1880.

Note B.—In making entries in columns 6, 7, and 8, an affirmative mark only will be used, thus /, except in the case of Divorced persons, column 8, when the letter "D" is to be used.

Note C.—For instructions relative to the entries in column 14, see back of this Schedule

Note D.—In column 17, note distinctly if no Physician was in attendance, thus (None.)

SCHEDULE 5.—Persons who DIED during the Year ending May 31, 1880, enumerated by me in \_\_\_\_\_, in the County of \_\_\_\_\_

Lincoln, State of Tennessee

### Enumerator

Note E.—Upon this Schedule should be CAREFULLY RETURNED:

1st. Every death which has occurred in this enumeration district during the Census year, whether the deceased was or was not, at death, a member of any family which resided June 1, 1890, in the district.

2d. Every death which has occurred outside of this enumeration district during the Census year, the deceased being at date of death a member of a family which resided June 1, 1880, in the enumeration district.

The enumerator should make these entries upon this Schedule with great care, seeking every source of information. When a positive statement is impossible, as when an age can only be estimated, or a birth-place must be conjectured, the entry may be inclosed in parentheses, thus: Age (25), meaning that the best estimate of the age that can be given is 25 years.

Of the deaths reported above, the following occurred in this enumeration district, but the families to which the deceased belonged, resided June 1, 1880, out of the enumeration district, as follows:

Of the deaths reported above, the following occurred out of this enumeration district, though the families to which the deceased belonged, resided June 1, 1880, in this enumeration district, as follows:

[illegible]
