In view of the inevitable Death: I now make & write
this my last Will & Testament.

1. Of course my Debt should be paid: but my name &
will please, in justice to my Family, that I leave
nothing; see that some that may claim to be my Credi-
tors, are just in fact, & just in law, libe&c.
2. I bequeath unto my Wife Mary Rutherford Scott, the
whole of what I may die possessed of, both movable
& immovable: except the Island in the Bayou des
Almands, Parish of St Charles, in this State.
3. I bequeath to my Sister in Law, Mrs Laura J Scott
widow of the late Dr John J Scott; my "Isle Prince
Noir" in the Parish of St Charles, for her individual
self.
4. My wife is hereby requested not to give away, or in
any other way dispose of, the Dressing Table, and the Es-
tension dining Table, I went to House Keeping with in
Dec. 1855. the balance of the effects she can dispose
of as her will, or necessities may dictate; these two ar-
ticles, I wish her to keep for her self.
5. I appoint my wife, Mrs Mary R. Scott, my Executrix
to carry out the dispositions of this will, & to do the best
for me, & mine: and request her to employ, & consult
with John B. Cotton, of the Law Firm of Cotton & Son
of New Orleans: and I would like Mr John McLaren Notary
Public, residing in this parish, appointed Notary.
6. I have written this, my last will, in my own proper handwriting &
date it, as above, on the 15th day of November 1875 & the whole of it

VOLUME TWELVE

Monday, September 23rd 1818.

Bushler came in last

even I went to bed. A meeting is called, to take place at 6
this evening at the Court House, to organize a Horora or
Relief Association. It rains during the night. I was
sick during the night from Indigestion, it came from eating
a slice of Apple pie, for dessert yesterday, at dinner, but
relieved this morning & am well as usual.

It is overcast this morning, & very warm. Today is the
SIXTY NINTH day of the prevalence of this EPIDEMIC
in our City. I cut out of this morning's Paper, an article
on the Fever in Carriacou, & paste it. I sent off to Dr.
this Diary, yesterday afternoon, also the Picayune, to Gen.
Whitney, & Mrs. Scratchby's letter to Savva, with a note
the letter, by this morning's mail. I shall have to
Dr. Henry down, I am afraid, as one of these Choppins &
Doctors, that likes to an his NAME and OPINIONS, placed
conspicuously in these TRASH PRINTS of New Orleans,
circulate his name, & name. I suppose the ARTICLE

was written by some of the PICAYUNE's irresponsible RAT TRADERS, who came up here for an article, but more for the purpose of drinking Whisky at the HOTEL, and munching Peanuts, & front of the Dagoes, INEXPENSIVELY — the fellow agents of the young Miss Conrad, as a most accomplished (Bar-Maria) lady &c. Well she was a very nice, pretty young girl & had, in her sphere of life, accomplishments, that some young ladies, in High Circles might envy. But for this Rat to come up here & drink Old CONRAD'S whisky and call for TONY's pines & caties, & "soft-soadie" the DOCTOR into an "interview" — my nose turns up. And it turns up more, when I see the Dr's self-laudations of his own work, & his opposed OPINION, as to the character of the DISORDER, prevailing in our City. In case of Dr Kibbey, the founder of the Fawn Cat, to carry out Dr Choppin's Flower-Pot cure of Yellow Fever, gives the Paper of this City a great deal of stir & excitement. This man Kibbey certainly deserves credit, for he has just arrived in the City, with his Innovation, when he was stricken with the Fawn & now submits himself to the treatment of Dr Choppin, one of his own Cats. This evening's paper reports him doing well. I do not go to the meeting tonight, too damp & dark; this evening's Mail brings a letter from Emma to her cousin Anna, which I will forward to her at Canton. Emma is at a Dr

DEATH and Rioting started them in western Iowa.
These RIOTS ought to be suppressed, both for the health
and the safety of the Northern border to Mexico,
becoming the common in this Country.

The Evening Paper announces the death of
William J. Fife, the Northern Hider
most likely of Chappins' experiments in
the border of his own location. It is said
that he first died but ran from the State
until the blade of "that sharp female,"
a sturdy town, & called "La Santita" was
blown by her own hand! "For this she
is here to begin her trial with the people."
Now what will the Mexican people do
to say about Chappins' Human Faking?
Treatment of Chappins over taken now
with the town, I wonder if we can't have
it in place on one of their COT'S subject-
ing our TREATMENT? I know not.

It is a proof of BRAVERY in this location, to die on the
border as a VICTIM to Chappins' experiments. It
may be that the D. G. G. has been too far from the
city lately, & placed him in a HOSPITAL there?

The morning paper, however, can
not be had until after breakfast.

The Bellows from their brother are not yet

arrived, though they are taken down with it.

Father Hall & Mrs. Farnum are still in Boston, & will be here to-morrow, the 2d of May. I will

call on them & his boy, as soon as I get home.

He will be out in a day or two. Mrs. Farnum's absence is due to

her Commotion & fiance here both there. I got a letter from

Parkin Brewster, this evening's mail; he has not yet got

his letter in answer to his, that is strange. Brewster says

I am busy preparing up-making preparation to go back to

Concord, before Tuesday, I hope it will not be many days.

in exhaustion, & am just trying to get a little rest after him.
Cried on him. Bullock comes to think it necessary to have
the consultation for a physician to advise me what we had better do.
Fear a fits fever, & might an increase of cold. Bullock
said there is no time to be lost, & he would go
as soon as possible. He can attend any time, & am having him dinner prepared
this afternoon, cannot spare the time now. Bullock
is going to see also Dr. Thompson who is then there again
about it Tuesday.

of his place, at about two thousand, & then the soldiers came out
over under gun fire. One thousand & forty five in the
line, no stronger than the rest of the party & the
men are running out. Two of the Major & others were
killed and wounded & Captain T. H. Johnson
one of the leading men of the party, went down
in the field. They left him, from the position of the
army, the foot of the hill, & then took the road to the

Has attracted even the attention of Peasants from a distance,

I wish now I had known it, paid it to some, but at the

time, I thought Orange would be done soon, & I determined to

not spend much until the scene did not change.

I paid nothing to the others two, to gain the last piece

just so right out, and DO IT B and are they all, side by side,

the Middle piece, or Orange placed from the Drawing in all

their splendor! Both are green as grass, and yet come

to life! What shall I do with them? I said last t

o consider about what I shall do with them, but as

nothing has made me mad, & I have given them away,

20. Most knifable news & then dark comes in day past, but
you can find thin places, & there is out to them at the hotel.
I sent Messer off to return money for my train, but still
hope it will not be very late tomorrow, at 12 o'clock,
it would further delaying it seems.

Mr. Lether, the Mail of this morning while down, comes
again to our thin evening, with a white Star, how the papers have
written up the white man's representing himself to a Sheriff
to send him out of the place. The things one can say
are almost pain and hate. Well down to go home & consider all diffi-
cult with the same force his representations to me, they have no
right to bind him as, if he is a Negro. I think he has a right
to stay there until the 1st of January coming, & to make, & take off
his coat, that he has planted, & they can impose on him, for
he was born & raised together, in the same old Plantation in
Mississippi, & as long as our negroes are represented themselves
the same principles do we White, I wish to say,
they are in the Right, & below. Well as
one the fact is, this is one time or
another to be awaiting to such
kindness as he proposes, etc.,
against the poor White, the African
with the same selfsame kind.

See, you know, Mr. [unclear] comes to this house every day
morning & then down to here, & then comes past him out on

the road past knifed in. But like comes in often enough to
have a chat; he says down Suisse. There is an appearance that
he is here, the 25th. They have been complaining of him

That man comes "Joe," in a great haste to our, just after
breakfast, his eyes wide open, & ready to blanching in
"Dad, I know what your Orange is!" "you at Mrs. Rose's
house don't know" "the fact was he said in the Grunwile,

of time, & so I told him back to say, asking in the
same manner, as on last one. I like, and strong and

had to look around for what Orange is not given any, as any
time to part it out of the any sister. Nancy understood
what I meant off the part. She reported to me that
the children were better, but that the Orange was still the
same AND THE WHOLE FAMILY knew it, for they were
trying to separate it. Some said the concealed nature
is giving a birth, & if so, they divide it then made alphabetical
names thus: I claim the Orange, from pregnancy having it

The letter by the mail this morning -

Hawkins comes in at 12 O'clock, in his way to the City. He is busy with the police & men with the dead: it seems that he is the only 2 police this morning, & are, among other places, over at Mrs. Ross' & in the bay. Dr. Campbell, it seems has not been to visit the horses, for four days past, the horses being entire & fit. I expect the 1st, as I have seen today entire & fit. - Perfect the 1st, as I have before said, is perfectly worthless for time, & that is just it. Peacock reports "Man" Battle complaining, & he says she is going to be sick - Bignon (Hurst) Ogden, the gamblers king, has lost dinner with the Yellow Head. Mr. Ross didn't bring this evening at 5 O'clock - Dr. Elgin's little girl over also twice, & they have another one on my ice - so it goes. I sent the paper to him yesterday & am only a long letter to Hanley Brown, when Dr. Peacock comes in, he comes from Plymouth, N.H. or has been from a month, & account of Yellow Head in his own family, to Peasey, his master, is very rich with it. & Peasey was to tell him about yesterday - the old fellow looks well, & has been along. Monday October 7, 1878.

It is overcast this morning & very warm - the Protecting Rains, about my place seem to - out do themselves in long - they ring all around me here - Uncle comes by after breakfast & bears bad news & the condition of LIZZIE HUNT @ GOLDEN - She was very low yesterday, had Black vomit, & was still in that condition when Uncle left this last night, at 11^o clock. She was a consultation of Doctor, yesterday, Dr. Brown etc with Dr. Holt. It seems that that Fatal Symptom, of Sanguineous effusion again this morning - the Clock run down & stopped at 9^o o'clock, this morning, I mind it up, & set it going at 12 M. It was noon at 2^o P.M. of yesterday (A.M.)

This morning's Paper, has an article on Doctor's Bills for attending the sick, & a many more one too - but in a dictation like this, Dr. & Hospitalavis & Renderations are rough work. Name & date Points of this big charge for everything in Hospital & the Hospital Memorandum line - Whistled off hand. Telling her of an infarct - a little pie dish in the corner where he is working, & one of the inmates sent off a plant - that person of opposition, to be thrown - it was taken to the June, to the charge for Miles to insect it, but that

was absolutely more than they were able to pay, & so they came to him in this grand way, & he being a organize anti one of the Employers, went around, & got it paid him \$2.50 - but he took in the sum which have come in for one dollar & a half. I am sure that this Recession shall be one of the biggest sort of Penny drives, in fact just above this Bill for Retardation, in Dallas, Texas, was, is an absurd - Don't do, as I say, but do as I say.

After dinner Bill Davis comes in, it seems from his statement to me, that his Men Ryan came up last Saturday & they have made a Conference & this agreement - you see, he came to Shreveport - it made an great shame for the men, I say, Brass Hatch - now if one is selfish, I certainly am - that's the sum of the matter.

The Evening News brings me a letter, & acts as a sort of formal darling wife Maria - very affectionate & good to me to now to Mr. Thompson, seems to be trying

Cloudy & balmy with drift

I rendelet the "Mothers" Song,-

A bright is falling on the pain.

Prize from the East & dearest Care - the Morning's paper
announces the death of LIZZIE HUNTDEN. she died

last night, at a quarter after 6 o'clock, & was buried at
10 o'clock today - I was not able to go down to the funeral

for it was one of my Complaining Friends that pronounced, & it
was too late to get there in time. But poor Lizzie
there and family have my most felt sympathies - she

was a specimen woman, & I love, & appreciate her as

one of our family. This must serve her nice fare.

She will calm the tortured breast.

The nice grave the troubled rest.

And the dead! He matches not.

FATHER RYAN.

No more this morning you are: I declare I begin to feel

very uneasy about this name, & the reason we, all

are with to me: I am afraid she is sick, & then we

may be on indifference about visiting - so that I do not

need know what is in best to get over about it, & a

but make them stop at the gate & have the servants
to deliver it to them there - I think our child is
coming down, too, from their separate regurgitations
before it -

Parker comes by, on his way to the Relief Committee - the 5th
is now indeed a "Heart rending" scene at the House of Govt -
it is to bear the end of a poor little child, now left
brotherless - the little boy which is seen
now, ill, & an expect me, too, will account

THE NUMBER APPACHED

Teller City Tex - A correspondent that

The first has started a suggestion that
have investigating commission. That
them have been more than 10,000 cases
of yellow fever in this city this season,
is in itself sufficient all intelligent reci-

down of New Orleans.

My all the cases have not been re-
ported is probably owing to the fact that
there is no compulsory measure in force

which a report of all cases can be se-
cured.

I am told just there are more than one

million physicians practicing in this

city and I know not one who has not

more than two hundred cases and

one have attended as many as six hun-

dred. Suppose that out an average

such physician has had three hundred

patients that would give a total of thir-

teen thousand cases.

Let any physician any of that you

or others to prove. How many cases

have you today & he will almost

say that he has had at least

the same, that would be equal to 150

new cases each day.

Against my physician what per cent.

one of his patients he has lost and I

will venture the opinion that not one

will acknowledge that he has lost ten

per cent.

Hence I conclude that at least 30,000

people have had the yellow fever this
season in the city. The report of the
Board of Health to the city of New
Orleans - one, fifty - when over
there for work visiting Orleans' home
had so many "old men she breathes
fire" now & singing "Minnie" brown
had when Henry said it came
not a found - & not saving before
ever went where she never action on it
she did, & if I hear Henry it was here &
Henry have done so - as it was if sent an
order thinking it would be necessary she
she says "I am rather inclined to do
main here this winter - may pay you
a visit near about the holidays; she
comes to think Henry is coming soon
comes to think Henry is coming soon
coming from a poor atmosphere to an infected one."

glad, & indeed, I am most anxious to have my husband, & children, & myself, & my wife, bring in the double-funeral to him from the Cemetery.

Rev. W. Warwick died of his wife being at the same disease as another.

Not knowing of her husband's death, and supposing him to be still alive, so on Thursday evening desired

that he should be informed of the fact.

But he

should be informed of the fact

that his chances of recovery seemed

but east hopeless. Her prevention

proved well founded. Early on Wed-

nearly morning she died, and her hus-

band, which had been ex-

posed for 3 a. m. Wednesday, was

removed until 1 p. m. Wednesday, and

will be accompanied each other in their

journey to the tomb. "United in their

brevity, as they were not divided." The sad lesson of the double

death and burial was eloquently com-

municated by the Rev. Dr. Palmer.

The deceased leave four children, two

sons, Rev. Mr. Palmer, Mrs. Palmer,

Miss Anna, and the oldest son, Mr.

of Mrs. Palmer, and two daughters,

Miss Anna, and Mrs. Palmer, who

are all well known. Mr. Palmer is

"Joe" & the negroes have a regular time of it this morning. This Horrible bird, seems to hang for miles & miles along the streets & are apt to be struck, as they will be, as we do these days - Joe had to shake the young girls clean round the square & made him catch it & Nancy cut off the feathers of one wing. She is very obstinate, however, & she thinks that is always success. Soon to breakfast, to have via Boesch's carousal when they get in through a brace of pickets, parades off to the jail, & give the alarm of the next onslaught - & if it does not fit for Joe, I very believe the negroes would like one another when they get to fighting out in the snow - but Joe" dimensions, is always master of the occasion, & when he is down poor, provides them a general that has hung him on Bayou.

Dear Mr. & Mrs. -

My coat is blowing from the east, & some clouds up, &

from Lemire & Co., date Oct 6th, Post Master Oct 9th. It
does take an age long enough, for a letter to come from

Broken Homes and Broken Earth.

When houses and broken boats!
Who only knows how many there are
now in our beautiful South, and God
only knows how many more there will
be before the angel of Death stays his
hand. At the first sight of one of
these broken houses we stand in spirit
with reverent heart and uncovered heads:
and would fain speak some word of com-
fort to the broken heart within, but
there is one broken home in particular
the home of our uncle Mr. Jacob Poitev-
ent of Grenada, Miss., at whose thresh-
old we linger longest and most sadly.
Only a short while ago there was no
home in Grenada so beatified and happy,
so rich in love and contentment and all
that makes home sacred, and now—there
is naught left but the desolate walls.
Father and mother and one child dead;
another hardly convalescing and two
other numbers of the household heart-
broken and scattered.

When the fever became epidemic in
Grenada, Mr. Poitevent made prepara-
tions to move his family into the country; three of his children were sent out
and his wife and remaining children
were to follow the next day.
Fatal delay when every breath of
air that floated above doomed Grenada
was poison. Before the morning came
lovely cousin Mollie, who had been
nursing a sick friend who died with
fever, and the noise and battle of de-
parture gave place to hundred voices
and sobs—moans, and alas, in
a few days more, to the wail
of mourning, for Mollie Poitevent, one
of the loveliest maidens of Grenada,
and one of the sweetest and most attrac-
tive daughters, was dead.

Alas! In such evil days as these, when

Plague and Pestilence are holding carni-
val in our midst, there is but little time
to mourn our dead. Sorely had the
bereaved parents grieved a farewell kiss

on the cold lips of their dead daughter;

when another was battling for life with

Oct. 15, 1878.

the inexorable hand of fever. It was
then that our uncle wrote to a friend
Sister Mme. "Mollie is dead," he said.
"We fear, will soon follow her; our family
physician is dead, our neighbors all dead,
or moved out of town; no nurse or help
of any kind to be had for love or money."

I am doing the cooking, and my dear
wife the nursing. Pray for us."

The next news we have from our dear

wife:

"Mr. and Mrs. Poitevent both dead.

On convalescent,"

Then followed dreary days and weeks
of waiting but nothing further could be learned except that Orn, the only one
left in the house, poor child, had a good
nurse from this city and was attended
by Dr. Stone.

After a while there came a feeble little
note from the sick girl: "They are all
dead but me. I know when father and
mother died, but I was too sick to kiss
them good-bye. I am better, and have a
kind nurse; but oh, so few ever recover
yet!"

All, what an agony of dread and grief!

These poor sick children must have suf-
fered during those slow hours of conva-
lescence, with no one but strangers to dry
their tears and administer to her wants.

But braving could not have been

greater than the agony of suspense en-
dured by the absent brother and sisters
who could hold no communication with
the stricken town. One of these re-
cently wrote: "Our has come out to us,
but so weak that I am jealous of every
breath that hangs her white cheek.

Mother was sick in the same room.

With C. father in the admis-

sion room. The Rev. Mr. McCracken
wrote with another before she died, and
she had a last message to leave, she ap-
peared, "tell my son to be a good boy
and meet me in Heaven." Then turned
her face toward Oras bed, she said, "Kiss all my children for me, and tell
your dear father good-bye for a little
while."

"Mother died on the 28th of August
and father on the 29th. Father's nurse
thought that he might recover, and did
not tell him of mother's death, because
nothing of it until he met her in
Heaven. Of father's last moments
we know nothing; we only know
that he was always prepared for
death, and if he was conscious, felt no
fear. All of our clothes beds and bed-
ding have been burnt and as we hear
till the doors of the house are wide
open, no doubt, the table service has
been stolen as well as the furniture.
When cold weather comes we are going
back home, if it can be called home,
where there is no father nor mother—
nothing but empty walls."

When I next write to him, I do trust divine grace to go

great pleasure, & gratification to him.

Went to the French Market last evening and came home early. The weather was cool and cloudy all day. I went to the French Market in the afternoon and saw the usual sights. The French Market is a large open square surrounded by a fence. There are many small houses and buildings in the square. There are also many trees and bushes. The French Market is a very busy place. There are many people walking around and buying things. There are also many street vendors selling fruits and vegetables. The French Market is a very popular place for tourists and visitors. There are also many restaurants and cafes in the square. The French Market is a very lively place.

the service at the Hotel de la Paix in New York city.

In this they say of it is not a certain way, there is no
hope for me but I have come up to the best of my ability
to help him. He is very ill, I have been trying to do
what I can to make him comfortable.

The doctor at this time has got him well enough
so he can go home by himself. He has been
treated with the most skill and care by the
doctors here and I am very anxious to have him
return home.

I have now got him into condition to go home

fever cases within a week there
is less than half that within a week there
is more than half. Although the lowest
number we may reasonably suppose
that within a week there are more than half
of what it was in 1863 still the current
opinion is that the disease was more fatal in its
more widespread if not more prevalent
character than that which prevailed
a quarter of a century ago.

A question of a contradiction may be easily ex-
plained. This year the disease has
been in almost every house who con-
cerned in it has carried away numbers who
succumbed. As declined. In 1863
the material chiefly proved upon con-
sidered theme, a ship from Liverpool and Havre
sister of new-comers from foreign lands.
Every ship from Liverpool and Havre
was crowded with emigrants, hence a
considerable portion of our general pop-
ulation was not in the best of health.
This was just the natural result of
those who had been exposed to
infectious disease in the natural course
of life by the arrival of the
large mortality of that year. More than
this reason is more so easily felt than
that of 1863 is because of our people
in general condition of an exceptionally
unhealthy and ill health.

In 1863 New Orleans was employ-
ingly wealthy city. There was an employ-
ment and willing to work. Busi-
ness also and willing to interrupted
was scarcely interrupted able
average labour was in

You found your treasures, gone,
And droop in mourning o'er:
North,
They flowered in bolls like snow;
From East and West came gazing forth
To save, protect and cheer.

O! well remember you!
City with city vied in love—
The humble village too;
Moved by one impulse from above—
O! well remember you!

You heard a wail upon the air,
From Southern homes it came:
Brought well with them freely share
Our fortunes and our fame.

What's gold and silver worth when tears
Plead to the gallant Duke?
I'll stop the train of Southern liers,
Yes—well remember you!

You gave us help, to check "grim death,"
The skies were strong of war!
And with them we have staid his breath,
And driven the field infant!

Then besides the Volunteer Patrol,
which is fit enough in all conscience,
further out on each of the roads above
mentioned are tents, each occupied by
two men, who are paid by the city. The
tents are their home; they are not allowed
to leave their post, and no one is allowed
to pass them unless they can show a
clean bill of health, and negroes are
obliged to have a permit signed by their
overseer.

Our hands are clasped for ay!
In golden hands are bound to you
The hearts of Southern Gray.

If ever on my native shore,
You see—

Volunteer Northern land,

The Lord distress bring to your door—
On you God's judgment bring.

April 20, 1806.

All of the family are well with the exception of thy Father and little Rebecca - they have severe colds - they were both bled today (Rebecca was not quite two years old) ----- Mr. David Estey (the new tutor) has arrived on fifth day evening accompanied by Mr. Tucker who recommended him - I was quite alarmed to see so small a man and but twenty years of age. I had no idea of so young a man coming in the office of teacher but he appears sensible and very grave in his manner - he enters upon new duties tomorrow - Richard is seven years old came to me after breakfast Mr. Estey left the table 'Mother', said he, 'Which of them is the school master?' The small one I told him. 'Ah,' says he, and shook his head. 'He's too little to keep school, thy Mother isn't he a boy?'

June 14, 1807.

I believe I have nothing more to tell thee only that we are all well that will be no blessing or anyt inc. Anna is as healthy, Richard as flighty, Abbigail as mild, Rebecca as sprightly and Jackwood as lovely as when thee left home. Fanchall, Frances and John are old enough to remind thee of themselves.

There is one person living in anxious for thy welfare in every respect - thy Mother.

Anna Howell

1808.

The letter directed to Benjamin I committed to the flames again to thy request without feeling the least degree of curiosity to know its contents, it will always give me pleasure to be in the confidence of

children, so far as it is perfectly agreeable to themselves, but while I have the same reliance on their prudence that I have hitherto had ^I have not the smallest inclination to know what they do not wish to communicate.

I am very anxious about Paschall, he seems crazy to go to sea, he has an offer from Reeve Lewis for his new brig Saunders, and his Father has almost determined upon his going. I have thought I would never oppose his going again, but I believe I must a little, for at present I have more than common reasons for objecting to it (her last child was born that year) beside the opportunity he will lose of improving his education, and the critical state of affairs between this country and Europe.

December 21, 1778.

----- I am pleased with the information you give me of Mr. Powell's attention to his school. There are three things to which I at present wish your close attention, and are more than mere accomplishments to the Man of Business as well as the gentleman- Accuracy in figures, True spelling and correct writing, for the first pay a close attention to your arithmetic, for the two last let your leisure hour be employed in reading the best authors as well for amusement as instruction, and pay proper attention to what you read, Mr. Powell will assist your judgment in the choice of the authors as well as the subject you may choose to study. I am, my dear Joshua

Thy affectionate Father,

John Ladd Howell.

Some extracts from a common place book belonging to one of my great-grandmothers. The date has been so badly blotted that I can not definitely say whether it is 1806 or 1807, but as she was married in 1807 the latter would seem more likely to be the correct one. She used these remedies on her children.

Cure for quinzy.

Take a common barn swallow nest, put it into a skillet with as much new milk as will soften it. Stew it until soft enough for a poultice. Apply one half to the place afflicted at a time changing it occasionally until the disease abates.

Cure for a felon.

Take a piece of rock salt about the size of a butter nut or an English walnut and wrap it closely in a green cobbarc leaf, but if n't to had a piece of brown paper well moistened in water. Lay it on the eggers, and cover it up to roast. When it has been inn about twenty-minutes take it off and powder it as fine as possible. Then take some burnt iron and mix the powdered salt with it, so as to make a salve. If the soap should contain but little turpentine which its smell will determine add sôme more, but if it smells strongly of it none need be added. Apply this salve to the affected and in a short time it will destroy it and remove the pain.

Cure for the itch.

Take black pepper, ginger, and brimstone, of each an equal part, a little West India rum and hog's lard all well mixed with salve. rub a little in(?) your hands, hold them to the fire and swell(?) them for a few moments. Repeat this several ti as often as at night.

Colds, Coughs and Whooping

Quarter of a pound of linseed(?) two ounces of stick licorice and a

1/4 pound of raisens or turkey firs. Put these into two quarts of cold soft water. Simmer over a slow fire untill it is reduced nearly half. Then add 1/4 pound of brown sugar candy (pounded) one pint of old rum and 2 table spoonfull's of lemon juice. Drink a tea cupfull on going to bed and take a little whenever the cough is troublesome. This recipe will generally cure the worst of colds.

An Excellent Plaister for the Stomache in Cholera.

One handfull of cloves and a nutmeg pulverized, some ginger and a little brandy stewed together and thickened with flour.

Mrs. D--- Recipe for a poultice for an Inflamed Ulcer.

Take a handfull of wormwood and the same of old man. Boil them well in water and thicken with Indian's meal. Apply it warm three times a day rubbing a little lard on the sore each time.

A child bit by a mad dog was perfectly restored by the careful and repeated use of the lancet and caustic to the tumours beneath the tongue.

The ashle upon the red cedar is good for worms.
